

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## Tables of Abbreviations

The following tables and notes are intended to guide readers of THE CATHOLIC ENCYCLOPEDIA in interpreting those abbreviations, signs, or technical phrases which, for economy of space, will be most frequently used in the work. For more general information see the article ABBREVIATIONS, ECCLESIASTICAL.

### I.—GENERAL ABBREVIATIONS.

a. .... article.	inf. .... below (Lat. <i>infra</i> ).
ad an. .... at the year (Lat. <i>ad annum</i> ).	It. .... Italian.
an., ann. .... the year, the years (Lat. <i>annus, anni</i> ).	l. c., loc. cit. .... at the place quoted (Lat. <i>loco citato</i> ).
ap. .... in (Lat. <i>apud</i> ).	Lat. .... Latin.
art. .... article.	lat. .... latitude.
Assyr. .... Assyrian.	lib. .... book (Lat. <i>liber</i> ).
A. S. .... Anglo-Saxon.	long. .... longitude.
A. V. .... Authorized Version (i.e. tr. of the Bible authorized for use in the Anglican Church—the so-called “King James”, or “Protestant Bible”).	Mon. .... Lat. <i>Monumenta</i> .
b. .... born.	MS., MSS. .... manuscript, manuscripts.
Bk. .... Book.	n., no. .... number.
Bl. .... Blessed.	N. T. .... New Testament.
C., c. .... about (Lat. <i>circa</i> ); canon; chapter; <i>compagnie</i> .	Nat. .... National.
can. .... canon.	Old Fr., O. Fr. .... Old French.
cap. .... chapter (Lat. <i>caput</i> —used only in Latin context).	op. cit. .... in the work quoted (Lat. <i>opere citato</i> ).
cf. .... compare (Lat. <i>confer</i> ).	Ord. .... Order.
cod. .... codex.	O. T. .... Old Testament.
col. .... column.	p., pp. .... page, pages, or (in Latin references) <i>pars</i> (part).
concl. .... conclusion.	par. .... paragraph.
const., constit. .... Lat. <i>constitutio</i> .	<i>passim</i> .... in various places.
cura. .... by the industry of.	pt. .... part.
d. .... died.	Q. .... Quarterly (a periodical), e.g. “Church Quarterly”.
dict. .... dictionary (Fr. <i>dictionnaire</i> ).	Q., QQ., quest. .... question, questions (Lat. <i>questio</i> ).
disp. .... Lat. <i>disputatio</i> .	q. v. .... which [title] see (Lat. <i>quod vide</i> ).
diss. .... Lat. <i>dissertatio</i> .	Rev. .... Review (a periodical).
dist. .... Lat. <i>distinctio</i> .	R. S. .... Rolls Series.
D. V. .... Douay Version.	R. V. .... Revised Version.
ed., edit. .... edited, edition, editor.	S., SS. .... Lat. <i>Sanctus, Sancti</i> , “Saint”, “Saints”—used in this Encyclopedia only in Latin context.
Ep., Epp. .... letter, letters (Lat. <i>epistola</i> ).	Sept. .... Septuagint.
Fr. .... French.	Sess. .... Session.
gen. .... genus.	Skt. .... Sanskrit.
Gr. .... Greek.	Sp. .... Spanish.
H. E., Hist. Eccl. .... Ecclesiastical History.	sq., sqq. .... following page, or pages (Lat. <i>sequens</i> ).
Heb., Hebr. .... Hebrew.	St., Sts. .... Saint, Saints.
ib., ibid. .... in the same place (Lat. <i>ibidem</i> ).	sup. .... Above (Lat. <i>supra</i> ).
Id. .... the same person, or author (Lat. <i>idem</i> ).	s. v. .... Under the corresponding title (Lat. <i>sub voce</i> ).
	tom. .... volume (Lat. <i>tomus</i> ).

# TABLES OF ABBREVIATIONS.

tr. .... translation or translated. By itself it means "English translation", or "translated into English by". Where a translation is into any other language, the language is stated.  
 tr., tract. .... tractate.  
 v. .... see (Lat. *vide*).  
 Ven. .... Venerable.  
 Vol. .... Volume.

## II.—ABBREVIATIONS OF TITLES.

Acta SS. .... *Acta Sanctorum* (Bollandists).  
 Ann. pont. cath. .... Battandier, *Annuaire pontifical catholique*.  
 Bibl. Dict. Eng. Cath. Gillow, *Bibliographical Dictionary of the English Catholics*.  
 Dict. Christ. Antiq. .... Smith and Cheetham (ed.), *Dictionary of Christian Antiquities*.

Dict. Christ. Biog. .... Smith and Wace (ed.), *Dictionary of Christian Biography*.  
 Dict. d'arch. chrét. .... Cabrol (ed.), *Dictionnaire d'archéologie chrétienne et de liturgie*.  
 Dict. de théol. cath. .... Vacant and Mangenot (ed.), *Dictionnaire de théologie catholique*.  
 Dict. Nat. Biog. .... Stephen (ed.), *Dictionary of National Biography*.  
 Hast., Dict. of the Bible .... Hastings (ed.), *A Dictionary of the Bible*.  
 Kirchenlex. .... Wetzer and Welte, *Kirchenlexicon*.  
 P. G. .... Migne (ed.), *Patres Græci*.  
 P. L. .... Migne (ed.), *Patres Latini*.  
 Vig., Dict. de la Bible. Vigouroux (ed.), *Dictionnaire de la Bible*.

NOTE I.—Large Roman numerals standing alone indicate volumes. Small Roman numerals standing alone indicate chapters. Arabic numerals standing alone indicate pages. In other cases the divisions are explicitly stated. Thus "Rashdall, Universities of Europe, I, ix" refers the reader to the ninth chapter of the first volume of that work; "I, p. ix" would indicate the ninth page of the preface of the same volume.

NOTE II.—Where St. Thomas (Aquinas) is cited without the name of any particular work the reference is always to "Summa Theologiae" (not to "Summa Philosophiae"). The divisions of the "Summa Theol." are indicated by a system which may best be understood by the following example: "I-II, Q. vi, a. 7, ad 2<sup>um</sup>" refers the reader to the seventh article of the sixth question in the first part of the second part, in the response to the second objection.

NOTE III.—The abbreviations employed for the various books of the Bible are obvious. Ecclesiastical is indicated by *Eccles.*, to distinguish it from Ecclesiastes (*Eccles.*). It should also be noted that I and II Kings in D. V. correspond to I and II Samuel in A. V.; and I and II Par. to I and II Chronicles. Where, in the spelling of a proper name, there is a marked difference between the D. V. and the A. V., the form found in the latter is added, in parenthesis.

# THE CATHOLIC ENCYCLOPEDIA

## A

**Assizes of Jerusalem.**—The signification of the word assizes in this connexion is derived from the French verb *asseoir*, whose past participle is *assis*. *Asseoir* means "to seat", "to place one on a seat". Hence the idea of putting something into its place, determining it to something. Thus *assise* came to mean an enactment, a statute. Assize is the English form of the word, and used in the plural, assizes, it denotes a court. The "Assizes of Jerusalem" (*les assises de Jérusalem*) are the code of laws enacted by the Crusaders for the government of the Kingdom of Jerusalem. They are a collection of legal regulations for the courts of the Latin Kingdom of Jerusalem and Cyprus. Thus we have the "Assizes of Antioch", the "Assizes of Rumania", legal regulations for the Latin principality of Antioch and for the Latin Empire of Constantinople. It is erroneous to ascribe the "Assizes of Jerusalem" to Godfrey de Bouillon on the presumption that as he was King of Jerusalem he enacted its laws. The "Assizes of Jerusalem" were compiled in the thirteenth century, not in the eleventh; not in Jerusalem, but after its fall; not by any ruler, but by several jurists. Not even the names of these are all known, though two of them were the well-known John of Ibelin, who composed, before 1266, the "Livres des Assises de la Cour des Barons", and Philippe de Navarre, who, about the middle of the thirteenth century, compiled the "Livres de forme de plait en la Haute Cour".

There are nine treatises in the "Assizes of Jerusalem", and they concern themselves with two kinds of law: Feudal Law, to which the Upper Court of Barons was amenable; and Common Law, which was applied to the Court of the Burgesses. The latter is the older of the two and was drawn up before the fall of Jerusalem. It deals with questions of civil law, such as contracts, marriage, and property, and touches on some which fall within the province of special courts, such as the "Ecclesiastical Court" for canonical points, the "Cour de la Fonde" for commerce, and the "Cour de la Mer" for admiralty cases. It deals rather with what the law enjoins in these several fields than with determining penalties for transgressions. The celebrated "Livres de la Haute Cour" of Ibelin was adopted, after revision (1359), as the official code of the Court of Cyprus, which kingdom succeeded to the title and regulations of Jerusalem. We possess only the official text of this, which is not much older than the works of French lawyers of Rouen and Orléans. But the superiority of the "Assizes of Jerusalem" is that it reflects the genuine character of feudal law, whereas the works of the French feudalists betray something of the royal influence which affected those sections after the revival of the Roman law. No other work dwells so insistently on the rights of the vassal towards his lord, no other throws such a light on the

resolution of a disputed point by an appeal to arms, its challenge, its champions, its value as evidence. In brief, the "Assizes of Jerusalem" give us a faithful and vivid picture of the part played by the law in the Latin Kingdom of Jerusalem.

BEUGNOT, *Recueil des historiens des Croisades: Lois*, 2 vols. in fol. (Paris, 1841-43), an edition which supercedes the older ones of THAUMAPRIÈRE (1690), KANSLER (1839), FOUCHER (1840); PAULIN PARIS, review of Beugnot's edition, in the *Journal des Savants* (Paris, 1841); MONNIER, *Godefroy de Bouillon et les Assises de Jérusalem* (Académie des Sciences morales, Paris, 1873-74). Consult also any work on feudal or medieval law.

CH. MOELLER.

**Assmayer, IGNAZ**, an Austrian musician, b. at Salzburg, 11 February, 1790; d. in Vienna, 31 August, 1862. He studied under Brunmayr and Michael Haydn, and later, when he went to Vienna, he received further instruction from Eybler. In 1808 he was organist at St. Peter's in his native town, and here he wrote his oratorio "Die Sündfluth" (The Deluge) and his cantata "Worte der Weihe". Some time after his removal to Vienna, in 1815, he became choirmaster at the Schotten-Kirche, and in 1825 was appointed imperial organist. After having served eight years as vice-choirmaster, he received in 1846 the appointment of second choirmaster to the Court, as successor to Weigl. His principal oratorios, "Das Gelübde", "Saul und David", and "Sauls Tod", were repeatedly performed by the *Tonkünstler-Gesellschaft*, of which he was conductor for fifteen years. He also wrote fifteen masses, two requiems, a Te Deum, and various smaller church pieces. Of these two oratorios, one mass, the requiems, and Te Deum, and furthermore sixty secular compositions, comprising symphonies, overtures, pastorales, etc., were published. As to his style Grove calls it correct and fluent, but wanting in both invention and force.

J. A. VÖLKER.

**Association, RIGHT OF VOLUNTARY.**—I. THE LEGAL RIGHT. A voluntary association means any group of individuals freely united for the pursuit of a common end. It differs, therefore, from a necessary association inasmuch as its members are not under legal compulsion to become associated. The principal instances of a necessary association are a conscript military body and civil society, or the State; the concept of voluntary association covers organizations as diverse as a manufacturing corporation and a religious sodality. The legal right of voluntary association—the attitude of civil authority toward bodies of this nature—has varied in different ages and still varies in different countries. Under the rule of Solon the Athenians seem to have been free to institute such societies as they pleased, so long as their action did not conflict with the public

law. The multitude of societies and public gatherings for the celebration of religious festivals and the carrying on of games, of other forms of public recreation and pleasure, which flourished for so many centuries throughout ancient Greece, indicates that a considerable measure of freedom of association was quite general in that country.

The Roman authorities were less liberal. No private association could be formed without a special decree of the senate or of the emperor. And yet voluntary societies or corporations were numerous from the earliest days of the Republic. There existed *collegia* for the proper performance of religious rites, *collegia* to provide public amusements, *collegia* of a political nature, *collegia* in charge of cemeteries, and *collegia* made up of workers in the various trades and occupations. In Judea the Pharisees and Sadducees—though these were schools, or sects, rather than organized associations—and the Essenes were not seriously interfered with by the Roman governors. With the union of Church and State in 325 there came naturally an era of freedom and prosperity for associations of a religious nature, especially for the religious orders. During the period of political chaos that followed the fall of the Empire, liberty of association was as extensive as could be expected among populations whose civil rulers were not sufficiently powerful either to repress or to protect the formation of voluntary unions. Indeed, the "minor, obscure, isolated, and incoherent societies", to use the words of Guizot, that erected themselves on the ruins of the old political organization and became in time the feudal system, were essentially private associations.

As the needs, culture, and outlook of men extended, there sprang into being a great number and variety of associations, religious, charitable, educational, and industrial. Instances are the great religious orders, the societies for the relief of poverty and sickness, the universities, and the guilds which arose and flourished between the tenth and the fourteenth centuries. All of these associations were instituted either under the active direction of the Church, or with her warm encouragement, and as a rule without any serious opposition on the part of the civil power. Some of them, in fact, performed important political functions; others secured a measure of social peace that the civil authorities were unable to enforce; while as a whole they constituted a considerable check to the exercise of arbitrary power by sovereigns. Thus, the merchant and craft guilds governed trade and industry with a series of regulations that had all the force and authority of legal statutes; the associations instituted to enforce the "Truce of God", helped greatly to lessen petty warfare between different lords and different sections of the same country; while "the monarch was . . . hemmed in on all sides . . . by universities, corporations, brotherhoods, monastic orders; by franchises and privileges of all kinds, which in greater or less degree existed all over Europe".

With the rise and extension of political absolutism in most of the countries of Europe in the seventeenth century, freedom of association became everywhere greatly restricted. It was frequently subjected to unreasonable conditions in the last century, and it is still withheld by some governments. From 1820 to 1824 labour unions were absolutely prohibited in Great Britain. Up to the year 1901 non-industrial associations consisting of more than twenty persons could not be formed in France without authorization by a public official whose power in the matter was almost arbitrary. At present, authorization is required in the case of associations composed of Frenchmen and foreigners; associations whose

supreme head resides outside of France; and associations whose members live in common. Owing partly to the terms of the law and partly to the course pursued by the officials charged with its enforcement, almost all the religious congregations have been driven out of France. In Prussia and in most of the other German states political associations are subject to close inspection, and can be dissolved by the public authorities in case they go outside of certain well-defined limits. Most other societies pursuing reasonable ends can obtain existence and recognition by becoming registered according to a general law of the empire. The law of Austria empowers magistrates to forbid the formation of any association that either in aim or personnel seems contrary to law, and to dissolve any society that is no longer conducted in accordance with the legal conditions to which it is subject. In Russia participation in any association not expressly authorized by the Government is a penal offence. Speaking generally, it may be said that with the exception of France, Russia, and Turkey, European governments exhibit to-day a liberal attitude toward associations pursuing reasonable ends.

In the United States associations whose purpose is pecuniary gain, and all other societies that desire a corporate existence and civil personality, must, of course, comply with the appropriate laws of incorporation. Unincorporated societies may be instituted without legal authorization, and may pursue any aim whatever, so long as their members do not engage in actions that constitute conspiracy or some other violation of public order. Even in these contingencies the members will not be liable to legal prosecution for the mere act of forming the associations. Under the present fairly liberal attitude of governments, and owing to the great increase in the number and complexity of human interests, the number and variety of associations in the Western world have grown with great rapidity. We may enumerate at least nine distinct types, namely: religious, charitable, intellectual, moral, political, mutual-benevolent, labour, industrial, and purely social. The largest increase has taken place in the three classes devoted to social intercourse and enjoyment, such as clubs and "secret" societies; to industry and commerce, such as manufacturing and mercantile corporations, and to the interests of the wage earner, such as trade unions. Probably the great majority of the male adults in the cities of the United States have some kind of membership in one or other of these three forms of association.

II. THE MORAL RIGHT.—Like all other moral rights, that of voluntary association is determined by the ends that it promotes, the human needs that it supplies. The dictum of Aristotle that man is a "political" animal, expresses more than the fact that man naturally and necessarily becomes a participant in that form of association known as the State. It means that man cannot effectively pursue happiness nor attain to a reasonable degree of self-perfection unless he unites his energies with those of his fellows. This is particularly true of modern life, and for two reasons. First, because the needs of men have greatly increased, and second, because the division of labour has made the individual more and more dependent upon other individuals and groups of individuals. The primitive, isolated family that knows only a few wants, and is able in rude fashion to supply all these, may enjoy a certain measure of contentment, if not of culture, without the aid of any other association than that inherent in its own constitution. For the family of to-day such conditions are unsatisfying and insufficient. Its members are constrained to pursue many lines of activity and to satisfy many wants that demand organized and associated effort.

Since the individual is dependent upon so many other individuals for many of those material goods that are indispensable to him, he must frequently combine with those of his neighbours who are similarly placed if he would successfully resist the tendency of modern forces to overlook and override the mere individual. A large proportion of the members of every industrial community cannot make adequate provision for the needs that follow in the train of misfortune and old age unless they utilize such agencies as the mutual benefit society, the insurance company, or the savings bank. Workmen find it impossible to obtain just wages or reasonable conditions of employment without the trade union. On the other hand, goods could not be produced or distributed in sufficient quantities except through the medium of associations. Manufacturing, trade, transportation, and finance necessarily fall more and more under the control of partnerships and stock companies.

Turning now from the consideration of these material needs, we find that association plays a no less important part in the religious, moral, intellectual, political, and purely social departments of life. Men cannot give God due worship except in a public, social way. This implies at least the universal Church and the parish, and ordinarily it supposes devotional and other associations, such as sodalities, altar societies, church-fund societies, etc. Select souls who wish to embrace the life of perfection described by the evangelical counsels must become organized in such a way that they can lead a common life. In every community there are persons who wish to do effective work on behalf of good morals, charity, and social reform of various kinds. Hence we have purity leagues, associated charities, temperance societies, ethical culture societies, social settlements. Since large numbers of parents prefer private and religious schools for the education of their children, the need arises for associations whose purpose is educational. Literary and scientific associations are necessary to promote original research, deeper study, and wider culture. Good government, especially in a republic, is impossible without political associations which strive vigilantly and constantly for the removal of abuses and the enactment of just laws.

In the purely social order men desire to enroll themselves in clubs, "secret" societies, amusement associations, etc., all of which may be made to promote human contentment and human happiness. Many of the forms of association just enumerated are absolutely necessary to right human life; none of them is entirely useless. Finally, voluntary associations are capable of discharging many of the tasks that otherwise would devolve upon the State. This was an important feature of their activity in the Middle Ages, and it is very desirable to-day when the functions of government are constantly increasing. Chief among the organizations capable of limiting State activity are those concerned with education, charitable work, industry, and commerce, and the improvement of the working classes. In so far as these can perform their several tasks on reasonable terms and without injury to the State or to any class of its citizens, the public welfare is better served by them than it would be if they were supplanted by the Government. Individual liberty and individual opportunity have a larger scope, individual initiative is more readily called into play, and the danger of Government despotism is greatly lessened.

The right of voluntary association is, therefore, a natural right. It is an endowment of man's nature, not a privilege conferred by civil society. It arises out of his deepest needs, is an indispensable means to reasonable life and normal self-development.

And it extends even to those associations that are not in themselves necessary for these ends—that is, so long as the associations do not contravene good morals or the public weal. For the State has no right to prohibit any individual action, be it ever so unnecessary, which is, from the public point of view, harmless. Although it is not essential to his personal development that the citizen should become a member of an association that can do him neither good nor harm, it is essential to his happiness and his self-respect that he should not be prevented from doing so by the State. The moment that the State begins to practise coercion of this kind it violates individual rights. The general right of voluntary association is well stated by Pope Leo XIII in the encyclical, "*Rerum Novarum*": "To enter into private societies is a natural right of man, and the State must protect natural rights, not destroy them. If it forbids its citizens to form associations, it contradicts the very principle of its own existence; for both they and it exist in virtue of the same principle, namely, the natural propensity of man to live in society."

Nor is the State justified in prohibiting voluntary associations on the ground that they may become inimical to public welfare. An institution should not be utterly condemned because it is liable to abuse; otherwise an end must be made of all institutions that are erected and conducted by human beings. The State has ample power to protect itself against all the abuses to which liberty of association is liable. It can forbid societies that aim at objects contrary to good morals or the public welfare, lay down such reasonable restrictions as are required to define the proper spheres of the various associations, punish those societies that go beyond their legitimate fields, and, in extreme cases, dissolve any particular organization that proves itself to be incorrigible. Through these measures the State can provide itself with all the security that is worth having; any further interference with individual liberty would be a greater social evil than the one that is sought to be remedied. The formality of legal authorization, or registration, is not in itself unreasonable, but it ought not to be accompanied by unreasonable conditions. The procedure ought to be such that any society formed in accordance with the appropriate law of association could demand authorization, or registration, as a civil right, instead of being compelled to seek it as a privilege at the hands of an official clothed with the power to grant or refuse it at his own discretion.

The difference between these two methods is the difference between the reign of law and the reign of official caprice; between constitutional liberty and bureaucratic despotism. Precisely this sort of arbitrary power is at present exercised by French officials over religious congregations. The result is that Frenchmen and Frenchwomen who wish to live in associations of this nature are denied the right to do so. Speaking generally of religious congregations, we may justly say in the words of Pope Leo XIII, that they have "the sanction of the law of nature", that is, the same natural right to exist on reasonable conditions as any other morally lawful association, and, "on the religious side they rightly claim to be responsible to the Church alone". When the State refuses them the right to exist it violates not merely the natural moral law but the supernatural Divine law. For these associations are an integral part of the life of the Church, and as such, lie within her proper sphere. Within this sphere she is independent of the State, as independent as one sovereign civil power is of another. Abuses that may grow out of religious associations can be met by the State in the ways outlined above. Treasonable acts can be punished; excessive accumulation of property can be prevented; in fact, every

action, circumstance, or tendency that constitutes a real danger to the public welfare can be successfully dealt with by other methods than that of denying these associations the right of existence.

JOHN A. RYAN.

**Association of Ideas**, (1) a principle in psychology to account for the succession of mental states, (2) the basis of a philosophy known as Associationism. The fact of the association of ideas was noted by some of the earliest philosophers; Aristotle (*De mem. et rem.*, 2) indicates the three laws of association which have been the basis of nearly all later enumerations. St. Thomas, in his commentary on Aristotle, accepts and illustrates them at some length. Hamilton (*Notes on Reid*) gives considerable credit to the Spanish Humanist, Vives (1492-1540), for his treatment of the subject. Association of ideas is not, therefore, a discovery of English psychology, as has often been asserted.

It is true, however, that the principle of association of ideas received in English psychology an interpretation never given to it before. The name is derived from Locke who placed it at the head of one of the chapters of his "Essay", but used it only to explain peculiarities of character. Applied to mental states in general, the name is too restricted, since ideas, even in the English sense, are only cognitive processes. The association theory was held by Hobbes, Berkeley, Hume, and Hamilton; but it received its widest interpretation at the hands of the Associationists, Hartley, Priestley, James Mill, John Stuart Mill, Bain, and Spencer. They regarded it as a principle capable of explaining all mental phenomena. For them it is in the subjective world what the principle of gravitation is in the physical world. Association of ideas, though variously explained, is accepted by all modern psychologists. Sully, Maudsley, James, Höfding, Münsterberg, Ebbinghaus, Ziehen, Taine, Ribot, Luys, and many others accept it more or less in the spirit of the Associationists.

The traditional laws of association, based on Aristotle, are: 1. Similarity; 2. Contrast; 3. Contiguity in time or space. In the course of time efforts were made to reduce them to more fundamental laws. Contrast has been resolved into similarity and contiguity. Contrasts, to recall each other, suppose generic similarity, as white recalls black. Yet this alone will not suffice, since this gives us no reason for the fact that white recalls black in preference to green or blue; hence experience, based on the fact that nature works in contrasts, is called into aid. Spencer, Höfding, and others try to reduce all the laws of association to that of similarity, while Wundt and his school believe that all can be reduced to experience and hence to contiguity. Bain, who has analyzed the laws of association most thoroughly, holds both similarity and contiguity to be elementary principles. To these he adds certain laws of compound association. Mental states easily recall one another when they have several points of contact. And in fact, considering the complexity of mental life, it would seem probable that simple associations, by similarity or contiguity alone, never occur. Besides these primary laws of association, various secondary laws are enumerated, such as the laws of frequency, vividness, recentness, emotional congruity, etc. These determine the firmness of the association, and consequently the preference given to one state over another, in the recall. Association

of ideas is a fact of everyday experience which furnishes an important basis for the science of psychology; yet it must be remembered that the laws of association offer no ultimate explanation of the facts observed. In accounting for the facts of association we must, in the first place, reject as insufficient the purely physical theory proposed by Ribot, Richet, Maudsley, Carpenter, and others, who seek an explanation exclusively in the association of brain-processes. Psychology thus becomes a chapter of physiology and mechanics. Aside from the fact that this theory can give no satisfactory explanation of association by similarity which implies a distinctly mental factor, it neglects evident facts of consciousness. Consciousness tells us that in reminiscence we can voluntarily direct the sequence of our mental states, and it is in this that voluntary recall differs from the succession of images and feelings in dream and delirium. Besides, one brain-process may excite another, but this is not yet a state of consciousness.

Equally unsatisfactory is the theory of the ultra-spiritualists, who would have us believe that association of ideas has nothing to do with the bodily organism, but is wholly mental. Thus Hamilton says that all physiological theories are too contemptible for serious criticism. Reid and Bowne reject all traces of perception left in the brain substance. Lotze admits a concomitant oscillation of the brain elements, but considers them quite secondary and as exercising no influence on memory and recall. Like the purely physical theory, this also fails to explain the facts of consciousness and experience. The localization of activities in the various brain-centres, the facts of mental disease in consequence of injury to the brain, the dependence of memory on the healthy condition of the central organ, etc. have in this theory no rational meaning. We must, then, seek an explanation in a theory that does justice to both the mental and the physical side of the phenomena. A mere psychophysical parallelism, proposed by some, will not, however, suffice, as it offers no explanation, but is a mere restatement of the problem. The Scholastic doctrine, that the subject of sensory activity is neither the body alone nor the soul alone, but the unitary being compounded of body and soul, offers the best solution. As sense perception is not purely physiological nor purely mental, but proceeds from a faculty of the soul intrinsically united to an organ, so the association of these perceptions proceeds from a principle which is at the same time mental and physical. No doubt purely spiritual ideas also associate; but, as St. Thomas teaches, the most spiritual idea is not devoid of its physiological basis, and even in making use of the spiritual ideas which it has already acquired, the intellect has need of images stored in the brain. It requires these organic processes in the production of its abstract ideas. In its basis, the association of ideas is physiological, but it is more than this, as it does not follow the necessary laws of matter. The higher faculties of the mind can command and direct the process. The Scholastic theory does justice to the fact of the dependence of mental activities upon the organism, and yet leaves room for the freedom of the will attested by consciousness and experience.

English Associationism, while claiming to be neither idealistic nor materialistic, and disavowing metaphysics, has erected the principle of association of ideas into a metaphysical principle to explain all mental activity. James Mill enunciated the principle of indissoluble associations: Sensations or ideas occurring together frequently, and never apart, suggest one another with irresistible force, so that we combine them necessarily. This principle is employed to explain necessary judgments and meta-

physical concepts. Bain applied the principles of association to logic and ethics. Spencer interpreted them in an evolutionistic sense. Certain beliefs and moral principles are such that the associations of the individual are not sufficient to explain them; they are the associations of successive generations handed down by heredity. The whole process is governed by necessary laws. Mental states associate passively, and mental life is but a process of "mental chemistry". Later Associationists, like Sully, have come to recognize that the mind exerts activity in attention, discrimination, judgment, reasoning. With this admission there should logically come also the admission of a soul-substance that attends, discriminates, judges, and reasons; but as they have not come to this conclusion, the soul is for them a "train of thoughts", a "stream of consciousness", or some other series veiled in metaphorical language. Association of ideas can never explain necessary judgments, conclusions drawn from premises, moral ideas and laws; these have their causes deeper in the nature of things.

**Association of Priestly Perseverance**, a sacerdotal association founded in 1868 at Vienna, and at first confined to that archdiocese. In 1879, chiefly through the influence of its periodical organ, "La Correspondance", it spread into other dioceses and countries, and in 1903 counted 14,919 living members, belonging to 150 dioceses in Austria, Germany, Switzerland, and other countries. This organization is very similar to that of the Apostolic Union of Secular Priests (q. v.).

JOSEPH H. McMAHON.

**Association of the Holy Family.** See HOLY FAMILY.

**Associations, Pious.**—Under this term are comprehended all those organizations, approved and indulged by Church authority, which have been instituted, especially in recent times, for the advancement of various works of piety and charity. Other terms used with the same meaning are: pious union, pious work, league, society, etc. Pious associations are distinguished, on the one hand, from ordinary societies composed of Catholics by having an explicitly religious purpose, by enjoying indulgences and other spiritual benefits, and by possessing ecclesiastical approbation. They are distinguished, on the other hand, from confraternities and sodalities. The latter distinction is not determined by the name and is not always apparent. In general, pious associations have simpler rules than confraternities; they do not require canonical erection, and though they have the approbation of authority, they are not subject to as strict legislation as confraternities; they have no fixed term of probation for new members, no elaborate ritual, no special costumes; they are not obliged to meet for common religious practices, and, as a rule, they make the help of others more prominent than the improvement of self. Of all these differences, only that of canonical erection seems essential. Some authorities, however, declare that practices in common constitute the trait which distinguishes a confraternity from a pious association.

Some well-known pious associations are: Society of St. Vincent de Paul; Society of the Propagation

of the Faith; Apostleship of Prayer, known also as the League of the Sacred Heart of Jesus; Holy Childhood League; Priests' Eucharistic League; Cäcilienverein, an association especially developed in Germany for the advancement of religious music.

F. P. DONNELLY.

**Assuerus**, the name of two different persons in the Bible.—I. In I Esdr., iv, 6, and Esth., i, 17, it corresponds to the Hebrew *'Achashweroth*, and the Sept. *'Assueros* (in Esth. *'Atrachéris*), and denotes Xerxes I, the King of Persia. It was to him that the Samaritans addressed their complaints against the inhabitants of Jerusalem soon after 485 B. C., i. e. in the beginning of his reign. Intent upon his pleasures and a war with Egypt, the king seems to have disregarded these charges. The report of Herodotus (VII, viii) that Xerxes convoked a council of his nobles, in the third year of his reign, to deliberate about the war against Greece agrees with Esth., i, 3, telling of the great feast given by the king to his nobles in the third year of his reign. In the seventh year of his reign, after the return of Xerxes from his war against Greece, Esther was declared queen. In the twelfth year of the king's reign, Esther saved the Jews from the national ruin contemplated by Aman. II. Another Assuerus occurs in the Greek text of Tob., xiv, 15 (*'Assueros*), in conjunction with Nabuchodonosor; the taking of Ninive is ascribed to these two. In point of fact, Assyria was conquered by Cyaxares I, the King of Media, and Nabopolassar, the King of Babylonia, and father of Nabuchodonosor. Hence the Assuerus of Tob., xiv, 15, is Cyaxares I; his name is coupled with Nabuchodonosor because the latter must have led the troops of his father in the war against Assyria. The same Cyaxares I is probably the Assuerus (*'Achashweroth*) mentioned in Dan., ix, 1, as the father of Darius the Mede. Most probably Darius the Mede is Cyaxares II, the son of Astyages, the King of Media. The inspired writer of Dan., ix, 1, represents him as a son of Cyaxares I, or Assuerus, instead of Astyages, on account of the glorious name of the former. This could be done without difficulty, since, in genealogies, the name of the grandson was often introduced instead of that of the son.

A. J. MAAS.

**Assumption**, LITTLE SISTERS OF THE, a congregation whose work is the nursing of the sick poor in their own homes. This labour they perform gratuitously and without distinction of creed. The congregation was founded in Paris in 1865, by the Rev. Etienne Pernet, A.A. (b. 23 July, 1824; d. 3 April, 1899), and Marie Antoinette Tage, known in religion as Mother Marie de Jésus (b. 7 Nov., 1824; d. 18 Sept., 1883). Both had long been engaged in charitable work, Father Pernet while a professor in the College of the Assumption at Nîmes, and Mlle. Tage as a member of the Association of Our Lady of Good Counsel in Paris. They met in Paris and Father Pernet placed her in charge of the work of nursing the sick poor which he had inaugurated. Out of this movement the sisterhood grew, Mother Marie de Jésus being the first superior. The nursing of the sick poor is not the only or even the chief purpose of the Little Sisters. They endeavour to bring about conversions, to regularize illicit unions, to have children baptized, sent to school, and prepared for First Communion and Confirmation. They form societies among their clients and enlist the aid of laymen and laywomen of education and means to further the work of regeneration. The congregation has established houses in Italy, Spain, Belgium, England, Ireland, and the United States of America. The papal Brief approving the congregation was

issued in 1897. The sisters take simple vows and are governed by a mother-general, who resides in Paris.

THOMAS GAFFNEY TAAFFE.

**Assumption, SISTERS OF THE**, a congregation of French nuns devoted to the teaching of young girls. It was founded in 1839 by Eugénie Milleret de Bron, in religion Mère Marie-Eugénie de Jésus (b. 1817; d. 1898), under the direction of the Abbé Combalot, a well-known orator of the time, who had been inspired to establish the institute during a pilgrimage to the shrine of Sainte-Anne d'Auray in 1825. The foundress, who had previously made a short novitiate with the Sisters of the Visitation at Côte Saint-André, was admirably adapted for the undertaking, and had the co-operation of three companions, each especially fitted to undertake the direction of some one of the activities of the order. Much of the initial success was due to the stanch friendship of Monseigneur Affre, Archbishop of Paris. The motto of the congregation is "Thy Kingdom Come", and the aim to combine with a thorough secular education a moral and religious training which will bear fruit in generations to come. The habit of the sisters is violet, with a white cross on the breast and a violet cincture. The veil is white. On certain occasions a mantle of white with a violet cross on the shoulder is worn in the chapel. Since its foundation the congregation has spread beyond France to England, Italy, Spain, and Nicaragua. Several communities devote themselves to the work of Perpetual Adoration and the instruction of poor children. The mother-house is situated at Auteuil, a suburb of Paris, in a former château, rich in historical associations. The daughters of many distinguished European families have studied at Auteuil, as well as many English and Americans, who receive a special training in the French language.

F. M. RUDGE.

**Assumption of the Blessed Virgin Mary**, FEAST OF THE, 15 Aug.; also called in old liturgical books PAUSATIO, NATIVITAS (for heaven), MORS, DEPOSITIO, DORMITIO S. MARIE. This feast has a double object: (1) the happy departure of Mary from this life; (2) the assumption of her body into heaven. It is the principal feast of the Blessed Virgin. Regarding the day, year, and manner of Our Lady's death, nothing certain is known. Epiphanius (d. 403) acknowledged that he knew nothing definite about it (Hær., lxxix, 11). The dates assigned for it vary between three and fifteen years after Christ's Ascension. Two cities claim to be the place of her departure: Jerusalem and Ephesus; common consent favours Jerusalem, where her tomb is shown [Nirschl, Haus und Grab der allerh. Jungfrau (Mainz, 1900); Mommert, Die Dormitio (Leipzig, 1900)]; but in 1906, J. Niesen brought forth new arguments in favour of Ephesus (Panagia Kapuli, Dülmen, 1906). The first six centuries did not know of the tomb of Mary at Jerusalem. The belief in the corporeal assumption of Mary is founded on the apocryphal treatise "De Obitu S. Dominae", bearing the name of St. John, which belongs however to the fourth or fifth century. It is also found in the book "De Transitu Virginis", falsely ascribed to St. Melito of Sardis, and in a spurious letter attributed to St. Denis the Areopagite. If we consult genuine writings in the East, it is mentioned in the sermons of St. Andrew of Crete, St. John Damascene, St. Modestus of Jerusalem and others. In the West, St. Gregory of Tours (De gloria mart., I, iv) mentions it first. The sermons of St. Jerome and St. Augustine for this feast, however, are spurious. St. John of Damascus (P. G., I, 96) thus formulates the tradition of the Church of Jeru-

salem: "St. Juvenal, Bishop of Jerusalem, at the Council of Chalcedon (451), made known to the Emperor Marcian and Pulcheria, who wished to possess the body of the Mother of God, that Mary died in the presence of all the Apostles, but that her tomb, when opened, upon the request of St. Thomas, was found empty; wherefrom the Apostles concluded that the body was taken up to heaven."

To-day, the belief in the corporeal assumption of Mary is universal in the East and in the West; according to Benedict XIV (De Festis B. V. M., I, viii, 18) it is a probable opinion, which to deny were impious and blasphemous. Regarding the origin of the feast we are also uncertain. It is more probably the anniversary of the dedication of some church than the actual anniversary of Our Lady's death. That it originated at the time of the Council of Ephesus, or that St. Damasus introduced it in Rome, is only a hypothesis. According to the life of St. Theodosius (d. 529) it was celebrated in Palestine before the year 500, probably in August (Bæumer, Brevier, 185). In Egypt and Arabia, however, it was kept in January, and since the monks of Gaul adopted many usages from the Egyptian monks (Bæumer, Brev., 163), we find this feast in Gaul in the sixth century, in January [*mediante mense undecimo* (Greg. Turon., De gloria mart., I, ix)]. The Gallican Liturgy has it on the 18th of January, under the title: *Depositio, Assumptio, or Festivitas S. Mariæ* (cf. the notes of Mabillon on the Gallican Liturgy, P. L., LXXII, 180). This custom was kept up in the Gallican Church to the time of the introduction of the Roman Rite. In the Greek Church, it seems, some kept this feast in January, with the monks of Egypt; others in August, with those of Palestine; wherefore the Emperor Maurice (d. 602), if the account of the "Liber Pontificalis" (II, 508) be correct, set the feast for the Greek Empire on 15 August. In Rome (Batiffol, Brev. Rom., 134) the oldest and only feast of Our Lady was 1 January, the octave of Christ's birth. It was celebrated first at Santa Maria Maggiore, later at Santa Maria ad Martyres. The other feasts are of Byzantine origin. Duchesne thinks (Origines du culte chr., 262) that before the seventh century no other feast was kept at Rome, and that consequently the feast of the Assumption, found in the Sacramentaries of Gelasius and Gregory, is a spurious addition made in the eighth or seventh century. Probst, however (Sacramentarien, 264 sqq.), brings forth good arguments to prove that the Mass of the Blessed Virgin Mary, found on the 15th of August in the Gelasianum, is genuine, since it does not mention the corporeal assumption of Mary; that, consequently, the feast was celebrated in the church of Santa Maria Maggiore at Rome at least in the sixth century. He proves, furthermore, that the Mass of the Gregorian Sacramentary, such as we have it, is of Gallican origin (since the belief in the bodily assumption of Mary, under the influence of the apocryphal writings, is older in Gaul than in Rome), and that it supplanted the old Gelasian Mass. At the time of Sergius I (700) this feast was one of the principal festivities in Rome; the procession started from the church of St. Hadrian. It was always a double of the first class and a Holy Day of obligation. The octave was added in 847 by Leo IV; in Germany this octave was not observed in several dioceses up to the time of the Reformation. The Church of Milan has not accepted it up to this day (Ordo Ambros., 1906). The octave is privileged in the dioceses of the provinces of Sienna, Fermo, Michoacan, etc. The Greek Church continues this feast to 23 August, inclusive, and in some monasteries of Mount Athos it is protracted to 29 August (Menæa Græca, Venice, 1880), or was, at least, formerly. In the dioceses of Bavaria a thirtieth day (a species

of month's mind) of the Assumption was celebrated during the Middle Ages, 13 Sept., with the Office of the Assumption (double); to-day, only the Diocese of Augsburg has retained this old custom. Some of the Bavarian dioceses and those of Brandenburg, Mainz, Frankfurt, etc., on 23 Sept. kept the feast of the "Second Assumption", or the "Fortieth Day of the Assumption" (double) believing, according to the revelations of St. Elizabeth of Schönau (d. 1165) and of St. Bertrand, O.C. (d. 1170), that the B. V. Mary was taken up to heaven on the fortieth day after her death (Grotefend, *Calendaria* 2, 136). The Birgittines kept the feast of the "Glorification of Mary" (double) 30 Aug., since St. Birgitta of Sweden says (Revel., VI, lxii) that Mary was taken into heaven fifteen days after her departure (Colvenarius, *Cal. Mar.*, 30 Aug.). In Central America a special feast of the Coronation of Mary in heaven (double major) is celebrated 18 Aug. The city of Gerace in Calabria keeps three successive days with the rite of a double first class, commemorating: 15th of August, the death of Mary; 16th of August, her Assumption, and 17th of August, her Coronation. At Piazza, in Sicily, there is a commemoration of the Assumption of Mary (double second class) the 20th of February, the anniversary of the earthquake in 1743. A similar feast (double major with octave) is kept at Martano, Diocese of Otranto, in Apulia, 19th of November.

HOLWECK, *Fasti Mariani* (Freiburg, 1892); KELLNER, *Heortologie* (Freiburg, 1901), 171.

FREDERICK G. HOLWECK.

**Assur**, or **Assuræ**, a titular see of Proconsular Africa, now Henchir-Zenfour. Its episcopal list (251-484) is given in Gams (p. 464). Ruins of its temples and theatres and other public buildings are still visible.

MORCELLI, *Africa Christiana* (1816), I, 86-87.

**Assur** (Hebrew, אַשּׁוּר; Sept., Ἀσσοῦρ). (1) The name used in the Old Testament to designate the Assyrian land and nation. (See **ASSYRIA**.) (2) The name of one of the sons of Sem, mentioned in Gen., x, 22. In verse 11 of the same chapter, the Douay version has: "Out of that land came forth Assur". Here the name in the original refers not to a person, but to the country, as above, and the reading: "... he (Nimrod) went forth into Assyria (Assur)" is preferable. Another Assur, or Ashur, "father of Thecua", is mentioned in I Paral., ii, 24, and iv, 5. (3) The national god of the Assyrians (in the cuneiform inscriptions Asshur and Ashur). The religion of the Assyrians, like their language and their arts, was in all essential particulars derived from the Babylonians. But together with the preponderance of the Assyrian power over the southern provinces came a corresponding exaltation of the local tutelary deity. Asshur, who was originally the eponymic god of the capital of Assyria (also called Ashur), thus became a national god, and was placed at the head of the Assyrian pantheon. In his name, and to promote his interests, the Assyrian monarchs claim to undertake their various military expeditions. He is styled King among the gods; the god who created himself. Differently from the other deities, Asshur is not represented as having a consort or posterity. His symbolic representation is ordinarily a winged disc, sometimes accompanied by the figure of a human bust. (See **ASSYRIA**.)

GABRIEL OUSSANI.

**Assurbanipal**. See **ASSYRIA**.

**Assyria**.—In treating of Assyria it is extremely difficult not to speak at the same time of its sister, or rather mother, country, Babylonia, as the peoples of these two countries, the Semitic Babylonians and the Assyrians, are both ethnographically and linguistically the same race, with identical religion,

language, literature, and civilization. Hence Assyro-Babylonian religion, mythology, and religious literature, especially in their relation to the Old Testament, will be treated in the article **BABYLONIA**, while the history of the modern explorations and discoveries in these two countries will be given in the present article.

**GEOGRAPHY**.—Geographically, Assyria occupies the northern and middle part of Mesopotamia, situated between the rivers Euphrates and Tigris; while the southern half, extending as far south as the Persian Gulf, constitutes the countries of Babylonia and Chaldea. Assyria originally occupied but a scant geographical area, comprising the small triangular-shaped land lying between the Tigris and Zab Rivers, but in later times, owing to its wonderful conquests, its boundaries extended as far north as Armenia; to Media on the east; to northern Syria, and to the country of the Hittites, on the west; and to Babylonia and Elam on the south and south-east, occupying almost the entire Mesopotamian valley. By the Hebrews it was known under the name of *Aram-Naharaim*, i. e. "Aram [or Syria] of the two rivers", to distinguish it from Syria proper, although it is doubtful whether the Hebrew name should be read as dual, or rather as a plural; i. e. *Aram-Naharim*, "Aram of the many rivers", or "of the great river"—the Euphrates. In later Old Testament times, it was known under the name of *Asshur*. By the Greeks and Romans it was called *Mesopotamia*, and *Assyria*; by the Arameans, *Beth-naharin*, "the country of the rivers"; by the Egyptians, *Nahrina*; by the Arabs, *Athar*, or *Al-Gezirah*, "the island", or *Bain-al-nahrain*, "the country between the two rivers"—*Mesopotamia*. Whether the name *Assyria* is derived from that of the god Asshur, or vice versa, or whether *Asshur* was originally the name of a particular city and afterwards applied to the whole country, cannot be determined.

The area of Assyria is about fifty thousand square miles. In physical character it is mountainous and well watered, especially in the northern part. Limestone and, in some places, volcanic rock form the basis of its fertile soil. Its southern part is more level, alluvial, and fertile. Its principal rivers are the Tigris and the Euphrates, which have their source in the Armenian mountains and run almost parallel as far south as Babylonia and Chaldea, flowing into the Persian Gulf. There are other, minor rivers and tributaries, such as the Khabur, the Balikh, the Upper and Lower Zab, the Khoser, the Turnat, the Radanu, and the Subnat. Assyria owes to these rivers, and especially to the Tigris and Euphrates, somewhat as Egypt owes to the Nile, its existence, life, and prosperity.

The principal cities of Assyria are: (1) Asshur, whose site is now marked by the mound of Kalah-Shergat, on the right bank of the Tigris. (2) Calah, on the eastern bank of the Tigris and at its junction with the Upper Zab, a city built (c. 1280 B. C.) by Shalmaneser I, who made it the capital of Assyria, in place of Asshur. Its site is nowadays marked by the ruins of Nimroud. (3) Nineveh (in the Douay Version, Ninive), represented by the villages and ruins of the modern Kujunjik and Nebi-Yunus, on the eastern bank of the Tigris, opposite Mosul. Nineveh was undoubtedly one of the most ancient cities of Assyria, and in the time of Sennacherib (7th cent. B. C.) it became the capital of the empire, and the centre of the worship of Ishtar, the Assyro-Babylonian Venus, who was called Ishtar of Nineveh, to distinguish her from Ishtar of Arbela. In the Old Testament the city of Nineveh is well known in connexion with the prophets, and especially as the theatre of Jonah's mission. (4) Dur-Sharrukin, or Dur-Sargon (i. e. Sargonsburg), built by Sargon II (8th cent. B. C.), the founder of the famous Sargonid

dynasty. It was made first the royal residence of Sargon, and afterwards became the rival of Nineveh. Its site is represented by the modern Khorsabad. (5) Arbailu, or Arbela, famous in Greek and Persian annals for the decisive victory won by Alexander the Great over the formidable army of Darius, King of Persia and Babylon (331 B. C.). (6) Nasibina, or Nisibis, famous in the annals of Nestorian Christianity. (7) Harran, well known for the worship of Sin, the moon-god. (8) Ingur-Bel, corresponding to the modern Tell-Balawat. (9) Tarbis, corresponding to the modern Sherif-Khan. The sites and ruins of all these cities have been explored.

SOURCES OF ASSYRO-BABYLONIAN HISTORY.—These may be grouped as: (1) the Old Testament; (2) the Greek, Latin, and Oriental writers; and (3) the monumental records and remains of the Assyrians and Babylonians themselves.

In the first division belong the Fourth (in Authorized Version, Second) Book of Kings, Paralipomenon (Chronicles), the writings of the prophets Isaiah, Nahum, Jeremiah, Jonas, Ezechiel, and Daniel, as well as the laconic but extremely valuable fragments of information contained in Genesis, x, xi, and xiv. To the second group of sources belong the Chaldeo-Babylonian priest and historian Berosus, who lived in the days of Alexander the Great (356–323 B. C.) and continued to live at least as late as Antiochus I, Soter (280–261 B. C.). He wrote in Greek a great work on Babylonian history, under the title of “Babyloniaca”, or “Chaldaica”. This valuable work, which was based on contemporary Babylonian monuments and inscriptions, has unfortunately perished, and only a few excerpts from it have been preserved in later Greek and Latin writers. Then we have the writings of Polyhistor, Ctesias, Herodotus, Abydenus, Apollodorus, Alexander of Miletus, Josephus, Georgius Syncellus, Diodorus Siculus, Eusebius, and others. With the exception of Berosus, the information derived from all the above-mentioned historians is mostly legendary and unreliable, and even their quotations from Berosus are to be used with caution. This is especially true in the case of Ctesias, who lived at the Persian court in Babylonia. To the third category belong the numerous contemporary monuments and inscriptions discovered during the last fifty years in Babylonia, Assyria, Elam, and Egypt, which form an excellent and a most authoritative collection of historical documents.

For the chronology of Assyria we have some very valuable means of information. These are (1) The “Eponym List”, which covers the entire period from the reign of Ramman-nirari II (911–890 B. C.) down to that of Asshurbanipal (669–625 B. C.). The eponyms, or *limmu*, were like the eponymous archons at Athens and the consuls at Rome. They were officers, or governors, whose term of office lasted but one year, to which year they gave their name; so that if any event was to be recorded, or a contract drawn in the year, e. g. 763 B. C., the number of the year would not be mentioned, but instead we are told that such and such an event took place in the year of Pur-Shagli, who was the *limmu*, or governor, in that year. (2) Another source is found in the chronological notices scattered throughout the historical inscriptions, such as Sennacherib's inscription engraved on the rock at Bavian, in which he tells us that one of his predecessors, Tiglath-pileser (Douay Version, Theglathpalasar) reigned about 418 years before him, i. e. about 1107 B. C.; or that of Tiglath-pileser himself, who tells us that he rebuilt the temple of Anu and Ramman, which sixty years previously had been pulled down by King Asshur-dan because it had fallen into decay in the course of the 641 years since its foundation by King Shamshi-Ramman. This notice, therefore, proves that

Asshur-dan must have reigned about the years 1170 or 1180 B. C. So also Sennacherib tells us that a seal of King Tukulti-Ninib I had been brought from Assyria to Babylon, where after 600 years he found it on his conquest of that city. As Sennacherib conquered Babylon twice, once in 702 and again in 689 B. C., it follows that Tukulti-Ninib I must have reigned over Assyria in any case before 1289 B. C., and possibly a few years before 1302 B. C. (3) Another chronological source is to be found in the genealogies of the kings, which they give of themselves and of their ancestors and predecessors. (4) Further valuable help may be obtained from the so-called “Synchronous History” of Babylonia and Assyria, which consists of a brief summary of the relations between the two countries from the earliest times in regard to their respective boundary lines. The usefulness of this document consists mainly in the fact that it gives the list of many Babylonian and Assyrian kings who ruled over their respective countries contemporaneously.

ASSYRO-BABYLONIAN EXPLORATION.—As late as 1849, Sir Henry Layard, the foremost pioneer of Assyro-Babylonian explorations, in the preface to his classical work entitled “Nineveh and Its Remains”, remarked how, previously, with the exception of a few cylinders and gems preserved elsewhere, a case, hardly three feet square, in the British Museum, enclosed all that remained not only of the great city, Nineveh, but of Babylon itself. At that time few indeed would have had the presumption even to imagine that within fifty years the exploration of Assyria and Babylonia would have given us the most primitive literature of the ancient world. What fifty years ago belonged to the world of dreams is at the present time a striking reality; for we are now in possession of the priceless libraries of the ancient Assyrians and Babylonians, of their historical annals, civil and military records, State archives, diplomatic correspondences, textbooks and school exercises, grammars and dictionaries, hymns, bank accounts and business transactions, laws and contracts, and an extensive collection of geographical, astronomical, mythological, magical, and astrological texts and inscriptions. These precious monuments are actually scattered in all the public and private museums and art collections of Europe, America, and Turkey. The total number of tablets, cylinders, and cuneiform inscriptions so far discovered is approximately estimated at more than three hundred thousand, which, if published, would easily cover 400 octavo volumes of 400 pages each. Unfortunately, only about one-fifth of all the inscriptions discovered have been published so far; but even this contains more than eight times as much literature as is contained in the Old Testament. The British Museum alone has published 440 folio, and over 700 quarto, pages, and about one-half as much more has appeared in various archaeological publications. The British Museum has more than 40,000 cuneiform tablets, the Louvre more than 10,000, the Imperial Museum of Berlin more than 7,000, that of the University of Pennsylvania more than 20,000, and that of Constantinople many thousands more, awaiting the patient toil of our Assyriologists. The period of time covered by these documents is more surprising than their number. They occur from prehistoric times, or about 5000 B. C., down to the first century before the Christian Era. But this is not all, for, according to the unanimous opinion of all modern Assyriologists, by far the largest part of the Assyro-Babylonian literature and inscriptions are still buried under the fertile soil of these wonderful regions, which have ever been the land of surprises, awaiting further explorers and decipherers.

As has already been remarked, the meagre and often unreliable information concerning Assyria and

Babylonia which has come down to us through the Persian, Greek, Latin, and Arabic writers—historians and geographers—has contributed little or nothing to the advancement of our knowledge of these wonderful countries. The early European travellers in the region of the Tigris and Euphrates valley, such as Benjamin of Tudela (1160), John Eldred (1583), Anthony Shirley (1599), Pietro della Valle (1614–26), John Cartwright (1610), Gasparo Balbi (1590), John Otter (1734), Niebuhr (1765), Beauchamp, Olivier, Hagers, and others at the end of the eighteenth century, have left us a rather vague and superficial account of their personal visits and impressions. Later travellers, however, such as Claudius James Rich (1811, 1821–22), J. S. Buckingham (1816), Sir Robert Ker Porter (1817–20), Captain Robert Mignan (1826–28), G. Baillie-Fraser (1834–35), the Euphrates Expedition under Colonel Chesney (1835–37), James Felix Jones, Lynch, Selby, Collingwood, Bewsher, and others of the first half of the nineteenth century made a far more searching and scientific study of the Mesopotamian region. But the real founders and pioneers of Assyro-Babylonian explorations are Emile Botta (1842–45), Sir Henry Austen Layard (1840–52), Victor Place (1851–55), H. Rassam (1850, 1878–82), Loftus (1850), Jules Oppert, Fresnel and Thomas (1851–52), Taylor (1851), Sir Henry Rawlinson, G. Smith, and others who have not only opened, but paved, the way for future researches and explorations. The first methodical and scientific explorations in Babylonia, however, were inaugurated and most successfully carried out by the intrepid French consul at Bassora and Bagdad, M. de Sarzec, who, from about 1877 until 1899, discovered at Tellô some of the earliest and most precious remains and inscriptions of the pre-Semitic and Semitic dynasties of Southern Babylonia. Contemporaneously with de Sarzec there came other explorers, such as Rassam, already mentioned above, who was to continue George Smith's excavations; the American Wolf expedition, under the direction of Dr. Ward, of New York (1884–85); and, above all, the various expeditions to Nippur, under Peters, Haynes, and Hilprecht, respectively, sent by the University of Pennsylvania (1888–1900). The Turkish Government itself has not altogether stood aloof from this praiseworthy emulation, sending an expedition to Abu Habba, or Sippar, under the direction of the well-known Dominican scholar, Father F. Scheil of Paris, in 1894 and the following years. Several German, French, and American expeditions have later been busily engaged in excavating important mounds and ruins in Babylonia. One of these is the German expedition under Moritz and Koldewey, with the assistance of Dr. Meissner, Delitzsch, and others, at Shurgul, El-Hibba, Al-Kasr, Tell-ibrahim, etc. The expedition of the University of Chicago, under the direction of Dr. Banks, at Bismaya, in South Babylonia, came unfortunately to an early termination.

**THE LANGUAGE AND CUNEIFORM WRITING.**—All these wonderful archaeological researches and discoveries would have been useless and destitute of interest, had not the language of Assyro-Babylonian inscriptions been deciphered and studied. These inscriptions were all written in a language, and by means of characters, which seemed for a while to defy all human skill and ingenuity. The very existence of such a language had been forgotten, and its writing seemed so capricious and bewildering that the earlier European travellers mistook the characters for fantastic and bizarre ornamental decorations; their dagger- or arrow-headed shape (from which their name of cuneiform) presenting a difficult puzzle. However, the discovery, and tentative decipherment, of the old Persian inscrip-

tions (especially those of Persepolis and of the Behistun rock, not far from Hamadan, in Persia), by Grotefend, Heeren, the Abbé Saint Martin, Rask, Bournouf, Lassen, Westergaard, de Saulcy, and Rawlinson, all taking place at about the end of the first half of the nineteenth century, opened the way for the decipherment of the Assyro-Babylonian inscriptions. The principal credit unquestionably belongs to Rawlinson, Norris, J. Oppert, Fox Talbot, and especially to Dr. Hinks of Dublin. The acute and original researches of these scholars were successfully carried out by other Semitic scholars and linguists no less competent, such as E. Schrader and Fred. Delitzsch, in Germany; Ménant, Halévy, and Lenormant, in France; Sayce and G. Smith, in England.

The Assyro-Babylonian language belongs to the so-called Semitic family of languages, and in respect to grammar and lexicography offers no more difficulty to the interpreter than either Hebrew, or Aramaic, or Arabic. It is more closely allied to Hebrew and Aramaic than to Arabic and the other dialects of the South-Semitic group. The principal difficulty of Assyrian consists in its extremely complicated system of writing. For, unlike all other Semitic dialects, Assyrian is written not alphabetically, but either syllabically or ideographically, which means that Assyrian characters represent not consonants, but syllables, open or closed, simple or compound, and ideas or words, such as *ka*, *bar*, *ilu*, *ziku*, etc. These same characters may also have both a syllabic and an ideographic value, and nearly always more than one syllabic value and as many as five or six; so that a sign like the following may be read syllabically as *ud*, *ut*, *u*, *tu*, *lam*, *bir*, *par*, *pir*, *lah*, *li*, *hish*, and *his*; and ideographically as *umu*, "day"; *pi*, "white"; *Shamash*, the Sun-god; etc. The shape of these signs is that of a wedge, hence the name *cuneiform* (from the Latin *cuneus*, "a wedge"). The wedges, arranged singly or in groups, either are called "ideograms" and stand for complete ideas, or they stand for syllables. In course of time the same ideographic signs came to have also the phonetic value of syllables, without losing, however, their primitive ideographic value, as can be seen from the example quoted above. This naturally caused a great difficulty and embarrassment even to the Assyro-Babylonians themselves, and is still the principal obstacle to the correct and final reading of many cuneiform words and inscriptions. To remedy this great inconvenience, the Assyro-Babylonians themselves placed other characters (called determinatives) before many of these signs in order to determine their use and value in certain particular cases and sentences. Before all names of gods, for example, either a sign meaning "divine being" was prefixed, or a syllabic character (phonetic complement), which indicated the proper phonetic value with which the word in question should end, was added after it. In spite of these and other devices, many signs and collocations of signs have so many possible syllabic values as to render exactness in the reading very difficult. There are about five hundred of these different signs used to represent words or syllables. Their origin is still a subject of discussion among scholars. The prevailing theory is that they were originally picture-signs, representing the ideas to be conveyed; but at present only about sixty of these 500 signs can be with certainty traced back to their original picture-meanings.

According to the majority of Assyriologists, the cuneiform system of writing originated with the Sumerians, the primitive non-Semitic inhabitants of Babylonia, from whom it was borrowed by the Semitic Babylonians and Assyrians, and applied to their own language. In the same way the Greeks

adopted the Semitic Phœnician alphabet, and the Germans adopted the Latin. The Semitic language of Babylonia and Assyria was, therefore, written in Sumerian characters, just as Hebrew can be written in English letters, or Turkish in Armenian, or Arabic in Syriac (*Karshūni*). This same cuneiform system of writing was afterwards adopted by the Medians, Persians, Mitanni, Cappadocians, ancient Armenians, and others. Hence five or six different styles of cuneiform writings may be distinguished. The "Persian" style, which is a direct, but simplified, derivative of the Babylonian, was introduced in the times of the Achæmenians. "Instead of a combination of as many as ten and fifteen wedges to make one sign, we have in the Persian style never more than five, and frequently only three; and instead of writing words by syllables, sounds alone were employed, and the syllabary of several hundred signs reduced to forty-two, while the ideographic style was fractionally abolished." The second style of cuneiform, generally known as "Median", or "Susian", is, again, a slight modification of the "Persian". "Besides these two, there is a third language (spoken in the north-western district of Mesopotamia between the Euphrates and the Orontes), known as 'Mitanni', the exact status of which has not been clearly ascertained, but which has been adapted to cuneiform characters. A fourth variety, found on tablets from Cappadocia, represents again a modification of the ordinary writing met with in Babylonia. In the inscriptions of Mitanni, the writing is a mixture of ideographs and syllables, just as in Mesopotamia, while the so-called 'Cappadocian' tablets are written in a corrupt Babylonian, corresponding in degree to the 'corrupt' forms that the signs take on. In Mesopotamia itself quite a number of signs exist, some due to local influences, others the result of changes that took place in the course of time. In the oldest period known, that is, from 4000 to 3000 B. C., the writing is linear rather than wedge-shaped. The linear writing is the modification that the original pictures underwent in being adapted for engraving on stone; the wedges are the modification natural to the use of clay, though when once the wedges became the standard method, the greater frequency with which clay, as against stone, came to be used led to an imitation of the wedges by those who cut out the characters on stone. In consequence, there developed two varieties of wedge-writing: the one that may be termed lapidary, used for the stone inscriptions, the official historical records, and such legal documents as were prepared with especial care; the other cursive, occurring only on legal and commercial clay tablets, and becoming more frequent as we approach the latest period of Babylonian writing, which extends to within a few decades of our era. In Assyria, finally, a special variety of cuneiform developed that is easily distinguished from the Babylonian by its greater neatness and the more vertical position of its wedges" (Jastrow, *The Religion of Babylonia and Assyria*, Boston, 1898, p. 20).

The material on which the Assyro-Babylonians wrote their inscriptions was sometimes stone or metal, but usually clay of a fine quality most abundant in Babylonia, whence the use spread all over Western Asia. "The clay was very carefully prepared, sometimes ground to an exceeding fineness, moistened, and moulded into various forms, ordinarily into a tablet whose average size is about six by two and one-half inches in superficial area by one inch in thickness, its sides curving slightly outwards. On the surface thus prepared, and while still soft, the characters were impressed with a stylus, the writing often standing in columns, and carried over upon the back and sides of the tablet. The clay was quite frequently moulded also into cones and barrel-shaped cylinders,

having from six to ten sides on which writing could be inscribed. These tablets were then dried in the sun, or baked in a furnace—a process which rendered the writing practically indestructible, unless the tablet itself was shattered" (G. S. Goodspeed, *History of the Babylonians and Assyrians*, p. 28).

Unlike all other Semitic systems of writing (except the Ethiopic, which is an adaptation of the Greek), that of the Assyro-Babylonians generally runs from left to right in horizontal lines, although in some very early inscriptions the lines run vertically from top to bottom like the Chinese. These two facts evidence the non-Semitic origin of the cuneiform system of writing.

**VALUE OF ASSYRIOLOGY FOR STUDY OF THE OLD TESTAMENT.**—The part played by these Assyro-Babylonian discoveries in the exegesis and interpretation of the Old Testament has been important in direct proportion to the immense and hitherto unsuspected influence exercised by the Assyro-Babylonian religion, civilization, and literature upon the origin and gradual development of the literature and the religious and social institutions of the ancient Hebrews. This Babylonian influence, indeed, can be equally traced in its different forms and manifestations through all Western Asia, many centuries before that conquest of Palestine by the twelve Israelitish tribes which put an end to the Canaanitish dominion and supremacy. The triumph of Assyriology, consequently, must be regarded as a triumph for Biblical exegesis and criticism, not in the sense that it has strikingly confirmed the strict veracity of the Biblical narratives, or that it has demonstrated the fallacies of the "higher criticism", as Sayce, Hommel, and others have contended, but in the sense that it has opened a new and certain path whereby we can study the writings of the Old Testament with their correct historical background, and trace them through their successive evolutions and transformations. Assyriology, in fact, has given us such excellent and unexpected results as to completely revolutionize our former exegetical methods and conclusions. The study, it is true, has been often abused by ultra-radical and enthusiastic Assyriologists and critics. These have sought to build up groundless theories and illogical conclusions; they have forced the texts to say what they do not say, and to support conclusions which they do not support; but such an abuse, which is due to a perfectly natural enthusiasm and scientific ardour, can never vitiate the permanent value of sober Assyriological researches, which have demonstrably provided sources of the first importance for the study of the Old Testament. These few abuses can be discerned and in due time corrected by a more temperate and judicious criticism. If the value of Assyriology in its bearing upon the Old Testament has been too often exaggerated, the exaggeration is at least partly excusable, considering the comparatively recent date of these researches and their startling results in the way of discovery. On the other hand, that school of critics and theologians which disregards the genuine merits and the great value of Assyriological researches for the interpretation of the Old Testament is open to the double charge of unfairness and ignorance.

**HISTORY OF ASSYRIA TO THE FALL OF NINEVEH (NINIVE.—c. 2000-606 B. C.).**—The origin of the Assyrian nation is involved in great obscurity. According to the author of the tenth chapter of Genesis, the Assyrians are the descendants of Assur (Asshur) one of the sons of Sem (Shem—Gen., x, 22). According to Gen., x, 11, "Out of that land [Sennar] came forth Assur, and built Ninive, and the streets of the city, and Chale. Resen also between Ninive and Chale", where the Authorized Version reads: "builded Nineveh, and the city of Rehoboth, and

Calah, and Resen between Nineveh and Calah". Till quite recently the most commonly accepted interpretation of this passage was that Assur left Babylonia, where Nemrod (Nimrod) the terrible was reigning, and settled in Assyria, where he built the cities of Nineveh, Rehoboth, Chale (Calah), and Resen. Nowadays, however, this interpretation, which is mainly based on the Vulgate version, is abandoned in favour of the more probable one, according to which Nemrod himself, the beginning of whose kingdom was Babylon (Babel), Arach (Erech), Achad (Accad), and Chalanne (Calneh), in Southern Babylonia (Gen. x, 10), went up to Assyria (Assur in this case being a geographical name, i. e. Assyria, and not ethnographical or personal), and there he built the four above-mentioned cities and founded the Assyrian colony. Whichever of these two interpretations be held as correct, one thing is certain: that the Assyrians are not only Semites, but in all probability an offshoot of the Semitic Babylonians, or a Babylonian colony; although, on account of their apparently purer Semitic blood, they have been looked upon by some scholars as an independent Semitic offshoot, which, at the time of the great Semitic migration from Arabia (c. 3000-2500 B.C.), migrated and settled in Assyria. The first Assyrian rulers known to us bore the title of *Ishshaku* (probably "priest-prince", or "governor") and were certainly subject to some outside power, presumably that of Babylonia. Some of the earliest of these *Ishshaki* known to us are *Ishmi-Dagan* and his son *Shamshi-Adad I* (or *Shamshi-Ramman*). The exact date of these two princes is uncertain, although we may with reasonable certainty place them about 1840-1800 B.C. Other *Ishshaki* are *Igur-Kapkapu*, *Shamshi-Adad II*, *Khallu*, and *Irishum*. The two cities of Nineveh and Assur were certainly in existence at the time of *Hammurabi* (c. 2250 B.C.), for in one of his letters he makes mention of them. It is significant, however, that in the long inscription (300 lines) of *Agumkakrime*, one of the Kassite rulers of Babylonia (c. 1650 B.C.), in which he enumerates the various countries over which his rule extended, no mention is made of Assyria. Hence, it is probable that the beginning of an independent Assyrian kingdom may be placed towards the seventeenth century B.C. According to an inscription of *King Esarhaddon* (681-668 B.C.), the first Assyrian *Ishshaku* to assume the title of King was a certain *Bel-bani*, an inscription of whom, written in archaic Babylonian, was found by *Father Scheil*. His date, however, cannot be determined.

Towards the fifteenth century B.C. we find Egyptian supremacy extended over Syria and the Mesopotamian valley; and in one of the royal inscriptions of *Thothmes III* of Egypt (1480-27 B.C.), we find Assyria among his tributary nations. From the *Tel-el-Amarna* letters also we know that diplomatic negotiations and correspondences were frequent among the rulers of Assyria, Babylonia, Syria, Mitanni, and the Egyptian Pharaohs, especially *Amenhotep IV*. Towards this same period we find also the Kings of Assyria standing on an equal footing with those of Babylonia, and successfully contesting with the latter for the boundary-lines of their kingdom. About 1450 B.C. *Asshur-bel-nishe-shu* was King of Assyria. He settled the boundary-lines of his kingdom with his contemporary *Karaindash*, King of Babylonia. The same treaty was concluded again between his successor, *Puzur-Asshur*, and *Burnaburiash I*, King of Babylon. *Puzur-Asshur* was succeeded by *Asshur-nadin-Aphe*, who is mentioned by his successor, *Asshur-uballit*, in one of his letters to *Amenhotep IV*, King of Egypt, as his father and predecessor. During most of the long reign of *Asshur-uballit*, the relations

between Assyria and Babylonia continued friendly, but towards the end of that reign the first open conflict between the two sister-countries broke out. The cause of the conflict was as follows: *Asshur-uballit*, in sign of friendship, had given his daughter, *Muballitat-sherua*, for wife to the King of Babylonia. The son born of this royal union, *Kadashman-Charbe* by name, succeeded his father on the throne, but was soon slain by a certain *Nazi-bugash* (or *Suzigash*), the head of the discontented Kassite party, who ascended the throne in his stead. To avenge the death of his grandson the aged and valiant monarch, *Asshur-uballit*, invaded Babylonia, slew *Nazi-bugash*, and set the son of *Kadashman-Charbe*, who was still very young, on the throne of Babylonia, as *Kurigalzu II*. However, towards the latter part of his reign (c. 1380 B.C.), *Kurigalzu II* became hostile to Assyria; in consequence of which, *Bel-nirari*, *Asshur-uballit's* successor on the throne of Assyria, made war against him and defeated him at the city of *Sugagu*, annexing the northern part of Babylonia to Assyria. *Bel-nirari* was succeeded by his son, *Pudi-ilu* (c. 1360 B.C.), who undertook several successful military expeditions to the east and south-east of Assyria and built various temples, and of whom we possess few, but important, inscriptions. His successor was *Ramman-nirari*, who not only strengthened the newly-conquered territories of his two predecessors, but also made war and defeated *Nazi-Maruttash*, King of Babylonia, the successor of *Kurigalzu II*, adding a considerable Babylonian territory to the newly arisen, but powerful, Assyrian Empire.

Towards the end of the fourteenth century B.C. (about 1330-20 B.C.) *Ramman-nirari* was succeeded by his son *Shalmaneser I*. During, or about the time of this ruler, the once powerful Egyptian supremacy over Syria and Mesopotamia, thanks to the brilliant military raids and resistance of the Hittites, a powerful horde of tribes in Northern Syria and Asia Minor, was successfully withstood and confined to the Nile Valley. With the Egyptian pressure thus removed from Mesopotamia, and the accession of *Shalmaneser I*, an ambitious and energetic monarch, to the throne of Assyria, the Assyrian Empire began to extend its power westwards. Following the course of the Tigris, *Shalmaneser I* marched northwards and subjugated many northern tribes; then, turning westwards, invaded part of north-eastern Syria and conquered the Arami, or Aramaeans, of Western Mesopotamia. From there he marched against the land of *Musri*, in Northern Arabia, adding a considerable territory to his empire. For strategic reasons he transferred the seat of his kingdom from the city of *Asshur* to that of *Kalkhi* (the Chale, or Calah, of Genesis), forty miles to the north, on the eastern bank of the Tigris, and eighteen miles south of Nineveh. *Shalmaneser I* was succeeded by his son *Tukulti-Ninib* (c. 1290 B.C.), whose records and inscriptions have been collected and edited by *L. W. King* of the British Museum. He was a valiant warrior and conqueror, for he not only preserved the integrity of the empire but also extended it towards the north and north-west. He invaded and conquered Babylonia, where he established the seat of his government for fully seven years, during which he became obnoxious to the Babylonians, who plotted and rebelled against him, proclaiming a certain *Ramman-shur-usur* king in his stead. The Assyrians themselves also became dissatisfied on account of his long absence from Assyria, and he was slain by his own nobles, who proclaimed his son, *Asshur-nasir-pal*, king in his stead. After the death of this prince, two kings, *Asshur-narrara* and *Nabudayan* by name, reigned over Assyria, of whom however, we know nothing. Towards 1210-1200 B.C. we find *Bel-Kudur-usur* and his successor,

Ninib-pal-Eshara, reigning over Assyria. These, however, were attacked and defeated by the Babylonians, who thus regained possession of a considerable part of their former territory. The next Assyrian monarch was Aashur-dan, Ninib-pal-Eshara's son. He avenged his father's defeat by invading Babylonia and capturing the cities of Zaban, Irria, and Akarsallu. In 1150 B. C., Aashur-dan was succeeded by his son, Mutakkil-Nusku; and in 1140 B. C., by the latter's son Aashur-resh-ishi, who subjugated the peoples of Ahlami, Lullumi, Kuti (or Guti), and other countries, and administered a crushing defeat to his rival and contemporary, Nabuchodonosor (Nebuchadnezzar) I, King of Babylonia.

About 1120-10 B. C. Aashur-resh-ishi was succeeded by his son, Tiglath-pileser I, one of the greatest Assyrian monarchs, under whose reign of only ten years duration Assyria rose to the apex of its military success and glory. He has left us a very detailed and circumstantial account of his military achievements, written on four octagonal cylinders which he placed at the four corners of the temple built by him to the god Ramman. According to these, he undertook, in the first five years of his reign, several successful military expeditions against Mushku, against the Shubari, against the Hittites, and into the mountains of Zagros, against the people of Nairi and their twenty-three kings, who were chased by him as far north as Lake Van in Armenia; against the people of Musri in Northern Arabia, and against the Arameans, or Syrians. "In all", he tells us, "forty-two countries and their kings, from beyond the Lower Zab, from the border of the distant mountains as far as the farther side of the Euphrates, up to the land of Hatti [Hittites] and as far as the upper sea of the setting sun [i. e. Lake Van], from the beginning of my sovereignty until my fifth year, has my hand conquered. I carried away their possessions, burned their cities with fire, demanded from their hostages tribute and contributions, and laid on them the heavy yoke of my rule." He crossed the Euphrates several times, and even reached the Mediterranean, upon the waters of which he embarked. He also invaded Babylonia, inflicting a heavy blow on the Babylonian king, Marduk-nadin-ahhe and his army, and capturing several important cities, such as Dur-Kurigalzu, Sippar, Babylon, and Opis. He pushed his triumphal march even as far as Elam. Tiglath-pileser I was also a daring hunter, for in one of his campaigns, he tells us, he killed no fewer than one hundred and twenty lions on foot, and eight hundred with spears while in his chariot, caught four elephants alive, and killed ten in his chariot. He kept at the city of Asshur a park of animals suitable for the chase. At Nineveh he had a botanical garden, in which he planted specimens of foreign trees gathered during his campaigns. He built also many temples, palaces, and canals. It may be of interest to add that his reign coincides with that of Heli (Eli), one of the ten judges who ruled over Israel prior to the establishment of the monarchy. At the time of Tiglath-pileser's death, Assyria was enjoying a period of tranquillity, which did not last, however, very long; for we find his two sons and successors, Aashur-bel-Kala and Shamshi-Ramman, seeking offensive and defensive alliances with the Kings of Babylonia.

From about 1070 to 950 B. C., a gap of more than one hundred years presents itself in the history of Assyria. But from 950 B. C. down to the fall of Nineveh and the overthrow of the Assyrian Empire (606 B. C.) the history of Assyria is very completely represented in documents. Towards 950 B. C., Tiglath-pileser II was king over Assyria. In 930 B. C. he was succeeded by his son, Aashur-dan II, and about 910 B. C. by the latter's son, Ramman-nirari II,

who, in 890, was succeeded by his son, Tukulti-Ninib II. The last two monarchs appear to have undertaken several successful expeditions against Babylonia and the regions north of Assyria. Tukulti-Ninib's successor was his son Aashur-nasir-pal (885-860 B. C.), with whose accession to the throne began a long career of victory that placed Assyria at the head of the great powers of that age. He was a great conqueror, soldier, organizer, hunter, and builder, but fierce and cruel. In his eleven military campaigns he invaded, subdued, and conquered, after a series of devastations and raids, all the regions north, south, east, and west of Assyria, from the mountains of Armenia down to Babylon, and from the mountains of Kurdistan and Lake Urmi (Urumyah) to the Mediterranean. He crossed the Euphrates and the Orontes, penetrated into the Lebanon region, attacked Karkemish, the capital of the Hittites, invaded Syria, and compelled the cities of the Mediterranean coast (such as Tyre, Sidon, Byblos, and Arvad) to pay tribute. But the chief interest in the history of Aashur-nasir-pal lies in the fact that it was in his reign that Assyria first came into touch with Israel. In his expedition against Karkemish and Syria, which took place in 878 B. C., he undoubtedly exacted tribute from Amri (Omri), King of Israel; although the latter's name is not explicitly mentioned in this sense, either in Aashur-nasir-pal's inscriptions, or in the Old Testament. The fact, however, seems certain, for in the Assyrian inscriptions from about this time down to the time of Sargon—nearly 150 years—the land of Israel is frequently mentioned as the "land of Omri"; and Jehu, a later King of Israel, but not of the dynasty of Amri, is also called the "son of Omri". This seems to show that the land of Israel was known to the Assyrians as the land of that king who happened to be reigning when they were first brought into political relations with it, and we know that this king was Amri, for in 878, the year of Aashur-nasir-pal's expedition to Syria, he had been king over Israel for some nine years.

Aashur-nasir-pal was succeeded by his son, Shalmaneser II, who in the sixth year of his reign (854 B. C.) made an expedition to the West with the object of subduing Damascus. In this memorable campaign he came into direct touch with Israel and their king Ahab (Ahab), who happened to be one of the allies of Benhadad, King of Damascus. In describing this expedition the Assyrian monarch goes on to say that he approached Karkar, a town to the south-west of Karkemish, and the royal residence of Irhulini—"I desolated and destroyed, I burnt it: 1,200 chariots, 1,200 horsemen, 20,000 men of Biridri of Damascus; 700 chariots, 700 horsemen, 10,000 men of Irhulini of Hamath; 2,000 chariots, 10,000 men of Ahab of Israel . . . these twelve kings he [i. e. Irhulini] took to his assistance. To offer battle they marched against me. With the noble might which Aashur, the Lord, granted, with the powerful weapons which Nergal, who walks before me, gave, I fought with them, from Karkar into Gilzan I smote them. Of their soldiers I slew 14,000."—The Old Testament is silent on the presence of Ahab in the battle of Karkar, which took place in the same year in which Ahab died fighting in the battle of Ramoth Galaad (III Kings, xxii).

Eleven years after this event Jehu was proclaimed king over Israel, and one of his first acts was to pay tribute to Shalmaneser II. This incident is commemorated in the latter's well-known "black obelisk", in the British Museum, in which Jehu himself, "the son of Omri", is sculptured as paying tribute to the king. In another inscription the same king records the same fact, saying: "At that time I received the tribute of the Tyrians, Sidonians, and Jehu the son of Omri." This act of homage took

place in 842 B. C., in the eighteenth year of Shalmaneser's reign.

After Shalmaneser II came his son Shamshi-Ramman II (824 B. C.), who, in order to quell the rebellion caused by his elder son, Asshur-danin-pal, undertook four campaigns. He also fought and defeated the Babylonian King, Marduk-balatsu-iqbi, and his powerful army. Shamshi-Ramman II was succeeded by his son, Ramman-nirari III (812 B. C.). This king undertook several expeditions against Media, Armenia, the land of Nairi, and the region around Lake Urmi, and subjugated all the coastlands of the West, including Tyre, Sidon, Edom, Philistia, and the "land of Omri", i. e. Israel. The chief object of this expedition was again to subdue Damascus, which he did by compelling Mari', its king, to pay a heavy tribute in silver, gold, copper, and iron, besides quantities of cloth and furniture. Joachaz (Jehoahaz) was then king over Israel, and he welcomed with open arms Ramman-nirari's advance, inasmuch as this monarch's conquest of Damascus relieved Israel from the heavy yoke of the Syrians. Ramman-nirari III also claimed sovereignty over Babylonia. His name is often given as that of Adad-nirari, and he reigned from 812 to 783 B. C. In one of his inscriptions, which are unfortunately scarce and laconic, he mentions the name of his wife, Sammuramat, which is the only Assyrian or Babylonian name discovered so far having any phonetic resemblance to that of the famous legendary queen, Semiramis. The personal identity of the two queens, however, is not admissible. Ramman-nirari III was succeeded by Shalmaneser III (783-773 B. C.), and the latter by Asshur-dan III (773-755 B. C.), who in turn was followed by Asshur-nirari II (755-745 B. C.). Of these three kings we know little, as no adequate inscriptions of their reigns have come down to us.

In the year 745 B. C. Tiglath-pileser III (in the Douay Version, Theglathphalasar) seized the throne of Assyria, at Nineveh. He is said to have begun life as a gardener, to have distinguished himself as a soldier, and to have been elevated to the throne by the army. He was a most capable monarch, enterprising, energetic, wise, and daring. His military ability saved the Assyrian Empire from the utter ruin and decay which had begun to threaten its existence, and for this he is fitly spoken of as the founder of the Second Assyrian Empire. Tiglath-pileser's methods differed from those of his predecessors, who had been mere raiders and plunderers. He organized the empire and divided it into provinces, each of which had to pay a fixed tribute to the exchequer. He was thus able to extend Assyrian supremacy over almost all of Western Asia, from Armenia to Egypt, and from Persia to the Mediterranean. During his reign Assyria came into close contact with the Hebrews, as is shown by his own inscriptions, as well as by the Old Testament records, where he is mentioned under the name of Pul (Pul). In the Assyrian inscriptions his name occurs only as that of Tiglath-pileser, but in the "List of Babylonian Kings" he is also called Pul, which settles his identity with the Pul, or Pul, of the Bible. He reigned for eighteen years (745-727 B. C.). In his annals he mentions the payment of tribute by several kings, amongst whom is "Menahem of Samaria", a fact confirmed by IV Kings, xv, 19, 20. During his reign, Achanaz was King of Judah. This prince, having been hard pressed and harassed by Rasin (Rezin) of Damascus, and Phacee (Pekah) of Israel, entreated protection from Tiglath-pileser (Theglathphalasar), who, nothing loath, marched westward and attacked Rasin, whom he overthrew and shut up in Damascus. Two years later, the city surrendered, Rasin was slain, and the inhabitants were carried away captives (IV Kings, xvi, 7, 8, 9). Meanwhile

Israel also was overrun by the Assyrian monarch, the country reduced to the condition of a desert, and the trans-Jordanic tribes carried into captivity. At the same time the Philistines, the Edomites, the Arabians, and many other tribes were subdued; and after the fall of Damascus, Tiglath-pileser held a durbar which was attended by many princes, amongst whom was Achanaz himself. His next expedition to Palestine was in 734, the objective this time being Gaza, an important town on the sea-coast. Achanaz hastened to make, or, rather, to renew, his submission to the Assyrian monarch; as we find his name mentioned again with several other tributary kings on one of Tiglath-pileser's inscriptions. In 733 the Assyrian monarch carried off the population from large portions of the Kingdom of Israel, sparing, however, the capital, Samaria. Tiglath-pileser was the first Assyrian king to come into contact with the Kingdom of Judah, and also the first Assyrian monarch to begin on a large scale the system of transplanting peoples from one country to another, with the object of breaking down their national spirit, unity, and independence. According to many scholars, it was during Tiglath-pileser's reign that Jonas (Jonah) preached in Nineveh, although others prefer to locate the date of this Hebrew prophet a century later, i. e. in the reign of Assurbanipal (see below).

Tiglath-pileser III was succeeded by his son (?), Shalmaneser IV, who reigned but five years (727-722 B. C.). No historical inscriptions relating to this king have as yet been found. Nevertheless, the "Babylonian Chronicle" (which gives a list of the principal events occurring in Babylonia and Assyria between 744 and 688 B. C.) has the following statement: "On the 25th of Thebet [December-January] Shalmaneser [in D. V. Salmanasar] ascended the throne of Assyria, and the city of Shamara'in [Samaria] was destroyed. In the fifth year of his reign he died in the month of Thebet." The Assyrian "Eponym Canon" (see above) also informs us that the first two years of Shalmaneser's reign passed without an expedition, but in the remaining three his armies were engaged. In what direction the armies of Shalmaneser (Salmanasar) were engaged, the "Canon" does not say, but the "Babylonian Chronicle" (quoted above) and the Old Testament (IV Kings, xviii) explicitly point to Palestine, and particularly to Samaria, the capital of the Israelitish Kingdom. In the second or third year of Shalmaneser's reign, Osee (Hoshea) King of Israel, together with the King of Tyre, rebelled against Assyria; and in order to crush the rebellion the Assyrian monarch marched against both kings and laid siege to their capitals. The Biblical account (Douay Version, IV Kings, xvii, 3 sqq.) of this expedition is as follows: "Against him came up Salmanasar king of the Assyrians, and Osee became his servant, and paid him tribute. And when the king of the Assyrians found that Osee endeavouring to rebel had sent messengers to Sua the king of Egypt, that he might not pay tribute to the king of the Assyrians, as he had done every year, he besieged him, bound him, and cast him into prison. And he went through all the land: and going up to Samaria, he besieged it three years. And in the ninth year of Osee, the king of the Assyrians took Samaria, and carried Israel away to Assyria; and he placed them in Hala and Habor by the river of Gozan, in the cities of the Medes."—See also the parallel account in IV Kings, xviii, 9-11, which is one and the same as that here given. The two Biblical accounts, however, leave undecided the question, whether Shalmaneser himself or his successor conquered Samaria; while, from the Assyrian inscriptions, it appears that Shalmaneser died, or was murdered, before he could personally carry his victory to an end. He was succeeded by Sargon II.

Sargon, a man of commanding ability, was, notwithstanding his claim to royal ancestry, in all probability a usurper. He is one of the greatest figures in Assyrian history, and the founder of the famous Sargonid dynasty, which held sway in Assyria for more than a century, i. e. until the fall of Nineveh and the overthrow of the Assyrian Empire. He himself reigned for seventeen years (722-705 B. C.) and proved a most successful warrior and organizer. In every battle he was victor, and in every difficulty a man of resource. He was also a great builder and patron of the arts. His greatest work was the building of Dur-Sharrukin, or the Castle of Sargon, the modern Khorsabad, which was thoroughly explored in 1844-55 by Botta, Flandin, and Place. It was a large city, situated about ten miles from Nineveh, and capable of accommodating 80,000 inhabitants. His palace there was a wonder of architecture, panelled in alabaster, adorned with sculpture, and inscribed with the records of his exploits. In the same year in which he ascended the throne, Samaria fell (722 B. C.), and the Kingdom of Israel was brought to an end. "In the beginning of my reign", he tells us in his annals, "and in the first year of my reign . . . Samaria I besieged and conquered . . . 27,290 inhabitants I carried off . . . I restored it again and made it as before. People from all lands, my prisoners, I settled there. My officials I set over them as governors. Tribute and tax I laid on them, as on the Assyrians." Sargon's second campaign was against the Elamites, whom he subdued. From Elam he marched westward, laid Hamath in ruins, and afterwards utterly defeated the combined forces of the Philistines and the Egyptians, at Raphia. He made Hanum, King of Gaza, prisoner, and carried several thousand captives, with very rich booty, into Assyria. Two years later, he attacked Karkemish, the capital of the Hittites, and conquered it, capturing its king, officers, and treasures, and deporting them into Assyria. He then for fully six years harassed, and finally subdued, all the northern and north-western tribes of Kurdistan, of Armenia (Urartu, or Ararat), and of Cilicia: the Mannai, the Mushki, the Kummukhi, the Milidi, the Kammani, the Gamgumi, the Samali, and many others who lived in those wild and inaccessible regions. Soon after this he subdued several Arabian tribes and, afterwards, the Medians, with their forty-two chiefs, or princes.

During the first eleven years of Sargon's reign, the Kingdom of Juda remained peacefully subject to Assyria, paying the stipulated annual tribute. In 711 B. C., however, Ezechias (Hezekiah), King of Juda, partly influenced by Merodach-baladan, of Babylonia, and partly by promises of help from Egypt, rebelled against the Assyrian monarch, and in this revolt he was heartily joined by the Phœnicians, the Philistines, the Moabites, and the Ammonites. Sargon was ever quick to act; he collected a powerful army, marched against the rebels, and dealt them a crushing blow. The fact is recorded in *Isaiah*, xx, 1, where the name of Sargon is expressly mentioned as that of the invader and conqueror. With Palestine and the West pacified and subdued, Sargon, ever energetic and prompt, turned his attention to Babylonia, where Merodach-baladan was ruling. The Babylonian army was easily routed, and Merodach-baladan himself abandoned Babylon and fled in terror to Beth-Yakin, his ancestral stronghold. Sargon entered Babylonia in triumph, and in the following year he pursued the fleeing king, stormed the city of Beth-Yakin, deported its people, and compelled all the Babylonians and Elamites to pay him tribute, homage, and obedience. In 705, in the flower of his age and at the zenith of his glory, Sargon was assassinated. He was succeeded by his son, Sennacherib (705 to 681 B. C.), whose

name is so well known to Bible students. He was an exceptionally cruel, arrogant, revengeful, and despot ruler, but, at the same time, a monarch of wonderful power and ability. His first military expedition was directed against Merodach-baladan, of Babylonia, who, at the news of Sargon's death, had returned to Babylonia, assuming the title of king, and murdering Merodach-zakir-shumi, the viceroy appointed by Sargon. Merodach-baladan was, however, easily routed by Sennacherib; fleeing again to Elam and hiding himself in the marshes, but always ready to take advantage of Sennacherib's absence to return to Babylon. In 701, Sennacherib marched eastward over the Zagros mountains and towards the Caspian Sea. There he attacked, defeated, and subdued the Medians and all the neighbouring tribes. In the same year he marched on the Mediterranean coast and received the submission of the Phœnicians, the Ammonites, the Moabites, and the Edomites. He conquered Sidon, but was unable to lay hands on Tyre, on account of its impregnable position. Thence he hurried down the coast road, captured Askalon and its king, Sidqa; turning to the north, he struck Ekron and Lachish, and dispersed the Ethiopian-Egyptian forces, which had assembled to oppose his march. Ezechias (Hezekiah), King of Juda, who together with the above-mentioned kings had rebelled against Sennacherib, was thus completely isolated, and Sennacherib, finding his way clear, marched against Juda, dealing a terrific blow at the little kingdom. Here is Sennacherib's own account of the event: "But as for Hezekiah of Judah, who had not submitted to my yoke, forty-six of his strong walled cities and the smaller cities round about them without number, by the battering of rams, and the attack of war-engines [?], by making breaches, by cutting through, and the use of axes, I besieged and captured. Two hundred thousand one hundred and fifty people, small and great, male and female, horses, mules, asses, camels, and sheep without number I brought forth from their midst and reckoned as spoil. Himself [Hezekiah] I shut up like a caged bird in Jerusalem, his royal city. I threw up fortifications against him, and whosoever came out of the gates of his city I punished. His cities, which I had plundered, I cut off from his land and gave to Mitinti, King of Ashdod, to Padi, King of Ekron, and to Cil-Bel, King of Gaza, and [thus] made his territory smaller. To the former taxes, paid yearly, tribute, a present for my lordship, I added and imposed on him. Hezekiah himself was overwhelmed by the fear of the brilliancy of my lordship, and the Arabians and faithful soldiers whom he had brought in to strengthen Jerusalem, his royal city, deserted him. Thirty talents of gold, eight hundred talents of silver, precious stones, *guhli daggassi*, large lapis lazuli, couches of ivory, thrones of elephant skin and ivory, ivory, *ushu* and *urkarinu* woods of every kind, a heavy treasure, and his daughters, his palace women, male and female singers, to Nineveh, my lordship's city, I caused to be brought after me, and he sent his ambassador to give tribute and to pay homage."

The same event is also recorded in *IV Kings*, xviii and xix, and in *Isaiah*, xxxvi and xxxvii, but in somewhat different manner. According to the Biblical account, Sennacherib, not satisfied with the payment of tribute, demanded from Ezechias the unconditional surrender of Jerusalem, which the Judean king refused. Terrified and bewildered, Ezechias called the prophet *Isaiah* and laid the matter before him, asking him for advice and counsel. The prophet strongly advised the vacillating king to oppose the outrageous demands of the Assyrian, promising him Yahweh's help and protection. Accordingly, Ezechias refused to surrender, and

Sennacherib, enraged and revengeful, resolved to storm and destroy the city. But in that same night the whole Assyrian army, gathered under the walls of Jerusalem, was stricken by the angel of the Lord, who slew one hundred and eighty-five thousand Assyrian soldiers. At the sight of this terrible calamity, Sennacherib, in terror and confusion, departed and returned to Assyria. The Assyrian and the Biblical accounts are *prima facie* conflicting, but many more or less plausible solutions have been suggested. In the first place we must not expect to find in Sennacherib's own annals mention of, or allusion to, any reverse he may have suffered; such allusions would be clearly incompatible with the monarch's pride, as well as with the purpose of annals inscribed only to glorify his exploits and victories. In the second place, it is not improbable that Sennacherib undertook two different campaigns against Juda: in the first, to which his annals refer, he contented himself with exacting and receiving submission and tribute from Eschias (Hezekiah); but in a later expedition, which he does not mention, he insisted on the surrender of Jerusalem, and in this latter expedition he met with the awful disaster. It is to this expedition that the Biblical account refers. Hence, there is no real contradiction between the two narratives, as they speak of two different events. Furthermore, the disaster which overtook the Assyrian army may have been, after all, quite a natural one. It may have been a sudden attack of the plague, a disease to which Oriental armies, from their utter neglect of sanitation, are extremely subject, and before which they quickly succumb. Josephus explicitly affirms that it was a *flagellum prodigiosum* (Antiq. Jud., X, i, n. 5); while, according to an Egyptian tradition preserved to us by Herodotus (Lib. II, cxli), Sennacherib's army was attacked and destroyed by a kind of poisonous wild mice, which suddenly broke into the Assyrian camp, completely demoralising the army. At any rate Sennacherib's campaign came to an abrupt end, and he was forced to retreat to Nineveh. It is noteworthy, however, that for the rest of his life Sennacherib undertook no more military expeditions to the West, or to Palestine. This fact, interpreted in the light of the Assyrian monuments, would be the result of the complete submission of Syria and Palestine; while in the light of the Biblical narrative it would signify that Sennacherib, after his disastrous defeat, dared not attack Palestine again.

While laying siege to Jerusalem, Sennacherib received the disquieting news of Merodach-baladan's sudden appearance in Babylonia. A portion of the Assyrian army was detached and hurriedly sent to Babylonia against the restless and indomitable foe of Assyria. In a fierce battle, Merodach-baladan was for the third time defeated and compelled to flee to Elam, where, worn and broken down by old age and misfortunes, he ended his troubled life, and Asshur-nadin-shum, the eldest son of Sennacherib, was appointed king over Babylonia. After his return from the West, and after the final defeat of Merodach-baladan, Sennacherib began lengthy and active preparations for an effective expedition against Babylonia, which was ever rebellious and restless.—“The expedition was as unique in its methods as it was audacious in its conception.”—With a powerful army and navy, he moved southward and, in a terrific battle near Khalulu, utterly routed the rebellious Chaldeans, Babylonians, and Elamites, and executed their two chiefs, Nergal-usesib and Musesib-Merodach. Elam was ravaged, “the smoke of burning towns obscuring the heavens”. He next attacked Babylon, which was stormed, sacked, burnt, flooded, and so mercilessly punished that it was reduced to a mass of ruins, and almost obliterated. On his return to Assyria, Sennacherib

appears to have spent the last years of his reign in building his magnificent palace at Nineveh, and in embellishing the city with temples, palaces, gardens, arsenals, and fortifications. After a long, stormy, and glorious reign, he died by the hand of one of his own sons (681 B. C.). The Bible tells us that “as he [Sennacherib] was worshipping in the temple of Ne-roch his god, Adramelech and Sarasar his sons slew him with the sword, and they fled into the land of the Armenians, and Asarhaddon [Esarhaddon] his son reigned in his stead” (IV Kings, xix, 37). The “Babylonian Chronicle”, however, has “On 20 Thebet [December-January] Sennacherib, King of Assyria, was slain by his son in a rebellion . . . years reigned Sennacherib in Assyria. From 20 Thebet to 2 Adar [March-April] was the rebellion in Assyria maintained. On 18 Adar his son, Esarhaddon, ascended the throne of Assyria.” If the murderer of Sennacherib was, as the “Babylonian Chronicle” tells us, one of his own sons, no son of Sennacherib by the name of Adramelech or Sharezer has as yet been found in the Assyrian monuments; and while the Biblical narrative seems to indicate that the murder took place in Nineveh, on the other hand an inscription of Assurbanipal, Sennacherib's grandson, clearly affirms that the tragedy took place in Babylon, in the temple of Marduk (of which Ne-roch, or Nis-roch, is probably a corruption).

Sennacherib was succeeded by his younger son, Esarhaddon, who reigned from 681 to 668 B. C. At the time of his father's death, Esarhaddon was in Armenia with the Assyrian army, but on hearing the sad news he promptly set out for Nineveh, first to avenge his father's death by punishing the perpetrators of the crime, and then to ascend the throne. On his way home he met the assassins and their army near Cappadocia, and in a decisive battle routed them with tremendous loss, thus becoming the sole and undisputed lord of Assyria. Esarhaddon's first campaign was against Babylonia, where a fresh revolt, caused by the son of the late Merodach-baladan, had broken out. The pretender was easily defeated and compelled to flee to Elam. Esarhaddon, unlike his father, determined to build up Babylon and to restore its ruined temples, palaces, and walls. He gave back to the people their property, which had been taken away from them as spoils of war during Sennacherib's destructive campaign, and succeeded in restoring peace and harmony among the people. He determined, furthermore, to make Babylon his residence for part of the year, thus restoring its ancient splendour and religious supremacy. Esarhaddon's second campaign was directed against the West, i. e. Syria, where a fresh rebellion, having for its centre the great maritime city of Sidon, had broken out. He captured the city and completely destroyed it, ordering a new city, with the name of Kar-Esarhaddon, to be built on its ruins. The King of Sidon was caught and beheaded, and the surrounding country devastated. Twenty-two Syrian princes, among them Manasses, King of Juda, surrendered and submitted to Esarhaddon. Scarcely, however, had he retired when these same princes, including Manasses, revolted. But the great Esarhaddon utterly crushed the rebellion, taking numerous cities, captives, and treasures, and ordering Manasses to be carried to Babylon, where the king was then residing. A few years later Esarhaddon had mercy on Manasses and allowed him to return to his own kingdom. In a third campaign, Esarhaddon blockaded the impregnable Tyre, and set out to conquer Egypt, which he successfully accomplished by defeating its king, Tirhakah. In order to effectively establish Assyrian supremacy over Egypt, he divided the country into twenty provinces, and over each of these he appointed a governor; sometimes a native, sometimes an

Assyrian. He exacted heavy annual tribute from every one of these twenty provinces, and returned in triumph to Assyria. "As for Tarqu [Tirhakah], King of Egypt and Cush, who was under the curse of their great divinity, from Ishupri as far as Memphis, his royal city—a march of fifteen days—every day without exception I killed his warriors in great number, and as for him, five times with the point of the spear I struck him with a deadly stroke. Memphis, his royal city, in half a day, by cutting through and scaling, I besieged, I conquered, I tore down, I destroyed, I burned with fire, and the wife of his palace, his palace women, Ushanahuru, his own son and the rest of his sons, his daughters, his property and possessions, his horses, his oxen, his sheep without number, I carried away as spoil to Assyria. I tore up the root of Cush from Egypt, a single one—even to the suppliant—I did not leave behind. Over all Egypt I appointed kings, prefects, governors, grain-inspectors, mayors, and secretaries. I instituted regular offerings to Asshur and the great gods, my lords, for all time. I placed on them the tribute and taxes of my lordship, regularly and without fail." Earsahaddon also invaded Arabia, penetrating to its very centre, through hundreds of miles of sandy lands which no other Assyrian monarch had penetrated before. Another important campaign was that directed against the Cimmerians, near the Caucasus, and against many other tribes, in Armenia, Cappadocia, Cilicia, Asia Minor, and Media. The monarch's last expedition was a second campaign against Egypt. Before leaving Assyria, however, i. e. in the month of Iyyar (April-May), 668 B. C., as if forecasting future events, he constituted his son Assurbanipal co-regent and successor to the throne, leaving to his other son, Shamash-shum-ukin, Babylonia. But, while on his way to Egypt, he fell sick, and on the 10th of Marsheshwan (October), in the year 668, he died.

Earsahaddon was a truly remarkable ruler. Unlike his father, he was religious, generous, forgiving, less harsh and cruel, and very diplomatic. He ruled the various conquered countries with wisdom and toleration, while he established a rigorous system of administration. A great temple-builder and lover of art, he has left us many records and inscriptions. At Nineveh he rebuilt the temple of Asshur, and in Babylonia, the temples at Ukuk, Sippar, Dur-Ilū, Borsippa, and others, in all about thirty. In Nineveh he erected for himself a magnificent palace and arsenal, and at Kalkhi (Calah; Douay, Chale) another of smaller dimensions, which was still unfinished at the time of his death. Assurbanipal, Earsahaddon's successor, was undoubtedly the greatest of all Assyrian monarchs. For generalship, military conquests, diplomacy, love of splendour and luxury, and passion for the arts and letters, he has neither superior nor equal in the annals of that empire. To him we owe the greatest part of our knowledge of Assyro-Babylonian history, religion, literature, art, and civilization. Endowed with a rare taste for letters, he caused all the most important historical, religious, mythological, legal, astronomical, mathematical, grammatical, and lexicographical texts and inscriptions known to his day to be copied and placed in a magnificent library which he built in his own palace. "Tens of thousands of clay tablets systematically arranged on shelves for easy consultation contained, besides official dispatches and other archives, the choicest religious, historical, and scientific literature of the Babylonia-Assyrian world. Under the inspiration of the king's literary zeal, scribes copied and translated the ancient sacred classics of primitive Babylonia for this library, so that, from its remains, can be reconstructed, not merely the details of the government and administration of the Assyria of his time, but the life and

thought of the far distant Babylonian world." (G. H. Goodspeed, *Hist. of the Babylonians and Assyrians*, pp. 315, 316.) Of this library, which must have contained over forty thousand clay tablets, a part was discovered by G. Smith and H. Rassam, part has been destroyed, and part yet remains to be explored. Here G. Smith first discovered the famous Babylonian accounts of the Creation and of the Deluge in which we find so many striking similarities with the parallel Biblical accounts. Assurbanipal was also a great temple-builder—in Nineveh, Arbela, Tarbish, Babylon, Borsippa, Sippar, Nippur, and Uruk. He fortified Nineveh, repaired, enlarged, and embellished Sennacherib's palace, and built next to it another palace of remarkable beauty. This he adorned with numerous magnificent statues, sculptures, bas-reliefs, inscriptions, and treasures. Assyrian art, especially sculpture and architecture, reached during his reign its golden age and its classical perfection, while Assyrian power and supremacy touched the extreme zenith of its height; for with Assurbanipal's death Assyrian power and glory sank into the deepest gloom, and perished, presumably, to rise no more.

Assurbanipal's military campaigns were very numerous. He ascended the throne in 668 B. C., and his first move was against Egypt, which he subdued, penetrating as far as Memphis and Thebes. On his way back, he exacted tribute from the Syrian and Phœnician kings, among whom was Manasse of Judah, who is expressly mentioned in one of the king's inscriptions. He forced Tyre to surrender, and subdued the Kings of Arvad, of Tabal, and of Cilicia. In 665, he marched against Babylonia and drove away from it a newly organized, but powerful coalition of Elamites, Chaldeans, and Arameans. He afterwards marched into the very heart of Elam, as far as Susa, and in a decisive battle he shattered the Elamite forces. In 625, Shamash-shum-ukin, Assurbanipal's brother, who had been appointed by his father King of Babylonia, and who had till then worked in complete harmony with his brother, rebelled against Assurbanipal. To this he was openly and secretly incited by many Babylonian, Elamite, and Arabian chiefs. Assurbanipal, however, was quick to act. He marched against Babylonia, shut off all the rebels in their own fortresses, and forced them to a complete surrender. His brother set fire to his own palace and threw himself into the flames. The cities and fortresses were captured, the rebels slain, and Elam completely devastated. Temples, palaces, royal tombs, and shrines were destroyed. Treasures and booty were taken and carried away to Assyria, and several thousands of people, as well as all the princes of the royal family, were executed, so that, a few years later, Elam disappeared for ever from history. In another campaign, Assurbanipal advanced against Arabia and subdued the Kedarenes, the Nabatæans, and a dozen other Arabian tribes, as far as Damascus. His attention was next attracted to Armenia, Cappadocia, Media, and the north-western and north-eastern regions. In all these he established his supremacy, so that from 640 till 626, the year of Assurbanipal's death, Assyria was at peace. However, most scholars incline to believe that during the last years of the monarch's reign the Assyrian Empire began to decay.

Assurbanipal is probably mentioned once in the Old Testament (I Eedras, iv, 10) under the name of Asenaphar, or, better, Ashenappar (Ashenappal) in connexion with his deportation of many troublesome populations into Samaria. He is probably alluded to by the Second Isaiah and Nahum, in connexion with his campaigns against Egypt and Arabia. According to G. Brunengo, S.J. (Nabuchodonosor di Giuditta, Rome, 1886) and other scholars.

Assurbanipal is the Nabuchodonosor (Nebuchadnezzar) of the Book of Judith; others identify him with the Sardanapalus of Greek historians. In view, however, of the conflicting characters of the legendary Sardanapalus and the Assurbanipal of the cuneiform inscriptions, this last identification seems impossible. Besides, Assurbanipal was not the last king of Assyria, as Sardanapalus is supposed to have been.

Assurbanipal was succeeded by his two sons, Asshur-etil-elani and Sin-shar-ishkun. Of their respective reigns and their exploits we know nothing, except that in their days Assyria began rapidly to lose its prestige and power. All the foreign provinces—Egypt, Phœnicia, Chanaan, Syria, Arabia, Armenia, Media, Babylonia, and Elam—broke away from Assyria, when the degenerate and feeble successors of the valiant Assurbanipal proved unable to cope with the situation. They had probably abandoned themselves to effeminate luxury and debaucheries, caring little or nothing for military glory. In the meanwhile Nabopolassar, King of Babylon, and Cyaxares, King of Media, formed a family and political alliance, the latter giving his daughter in marriage to the former's son, Nabuchodonosor (Nebuchadnezzar). At the head of a powerful army, these two kings together marched against Nineveh and laid siege to it for fully two years, after which the city surrendered and was completely destroyed and demolished (606 B. C.), and Assyria became a province of Babylonia and Media.

RELIGION AND CIVILIZATION.—The religion and civilization of Assyria were almost identical with those of Babylonia, the former having been derived from the latter and developed along the same lines. For, although the Assyrians made notable contributions to architecture, art, science, and literature, these were with them essentially a Babylonian importation. Assyrian temples and palaces were modelled upon those of Babylonia, although in the building-material stone was far more liberally employed. In sculptural decorations and in statuary more richness and originality were displayed by the Assyrians than by the Babylonians. It seems to have been a hobby of Assyrian monarchs to build colossal palaces, adorned with gigantic statues and an infinite variety of bas-reliefs and inscriptions showing their warlike exploits. Assurbanipal's library shows that Assyrian religious literature was not only an imitation of that of Babylonia, but absolutely identical therewith. An examination of the religions of the two countries proves that the Assyrians adopted Babylonian doctrines, cults, and rites, with such slight modifications as were called for by the conditions prevailing in the northern country. The chief difference in the Assyrian pantheon, compared with that of Babylonia, is that, while in Semitic times the principal god of the latter was Marduk, that of the former was Asshur. The principal deities of both countries are: the three chief deities, Anu, the god of the heavenly expanse; Bel, the earth god and creator of mankind; and Ea, the god of humanity *par excellence*, and of the water. Next comes Ishtar, the mother of mankind and the consort of Bel; Sin, first-born son of Bel, the father of wisdom, personified in the moon; Shamash, the sun-god; Ninib, the hero of the heavenly and earthly spirits; Nergal, chief of the netherworld and of the subterranean demons, and god of pestilence and fevers; Marduk, originally a solar deity, conqueror of storms, and afterwards creator of mankind and the supreme god of Semitic Babylonia; Adad, or Ramman, the god of storms, thunders, and lightning; Nebo, the god of wisdom, to whom the art of writing and the sciences are ascribed; Girru-Nusku, or, simply, Nusku, the god of fire, as

driving away demons and evil spirits; Asshur, the consort of Belit, and the supreme god of Assyria. Besides these there were other minor deities.

Astaroth (ASTARTE). See PHœNICIA.

Asterisk (Gr., ἀστέρ, a star).—This is a utensil for the Mass according to the Greek Rite, which is not used in the Roman Rite at all. It consists of two curved bands, or slips, made of silver or gold which cross each other at right angles and thus form a double arch. It is used to place over the *amnos*, or particles of blessed bread, when spread out upon the paten during the *proskomide* and earlier part of the Greek Mass, so as to prevent the veil from coming in contact with or disturbing these blessed but unconsecrated particles of bread in carrying the paten from the *prothesis* to the altar, or while it is standing at either place. It is laid aside after the Creed and is not ordinarily used again during the Mass. The *asterisk* is usually surmounted by a cross, and often has a tiny star suspended from the central junction, and in the Greek Orthodox is somewhat larger in size than in the Greek Catholic Church. When the priest in the *proskomide* service is through incensing the blessed bread lying upon the paten, he takes up the *asterisk* and incensing it says, "And the star came forth and stood over where the child was". Then he puts it over the particles of bread upon the paten, and proceeds to cover it with the various veils and at conclusion of the *proskomide*, begins the celebration of the Mass.

ANDREW J. SHIPMAN.

**Asterius**, name of several prominent persons in early Christian history.—(1) Asterius of Petra, a bishop of Arabia, ill-treated by the Arian faction at the Council of Sardica (343) for withdrawing from them his support, and exiled to Upper Libya in Egypt, whence he was recalled in 362 by the edict of Julian that restored all the banished bishops. He took part in the Council of Alexandria (362), called, among other reasons, for the purpose of healing the Meletian schism that was rending the Church of Antioch. He was one of the bearers of the letter addressed by the council to the stubborn Lucifer of Cagliari and the other bishops then at Antioch. These peaceful measures were, however, rendered useless by Lucifer's precipitancy in consecrating Paulinus as successor to Meletius of Antioch, whereby the schism gained a new lease of life.—(2) Asterius of Amasea in Pontus (c. 400). The only fact in his life that is known is related by himself, viz. his education by a Scythian or Goth who had been sent in his youth to a schoolmaster of Antioch and thus acquired an excellent education and great fame among both Greeks and Romans. The extant writings of Asterius are twenty-one homilies, scriptural and panegyric in content. The two on penance and "on the beginning of the fasts" were formerly ascribed to St. Gregory of Nyssa (Bardenhewer, *Patrologie*, 1901, 267). A life of his predecessor, St. Basil, is ascribed to Asterius (*Acta SS.*, 26 April). His works (*P. G.*, XL) are described by Tillemont (*Mém.*, X, 409). He was a student of Demosthenes and an orator of repute. Lightfoot says (*Dict. of Christ. Biogr.*, I, 178) that his best sermons display "no inconsiderable skill in rhetoric, great power of expression, and great earnestness of moral conviction; some passages are even strikingly eloquent." The homilies of Asterius, like those of Zeno of Verona, offer no little valuable material to the Christian archaeologist. [De Buck in *Acta SS.*, 20 Oct. (Paris, 1883), XIII, 330-334.]—(3) Asterius of Cappadocia, a Greek sophist, a friend of Arius, and also his fellow student in the school of Lucian of Antioch. St. Athanasius quotes more than once from a pro-Arian work of this writer. He wrote commentaries on the Epistle to the Romans, the Gospels, the Psalms, and "many other works" (*Jerome*, *De Vir. Ill.*, c. xciv), all of which have perished (Zahn, *Marcellus von Ancyra*, Gotha, 1867, 68 sqq.).—(4) Asterius, a Roman senator mentioned by Eusebius (*Hist. Eccl.*, VII, 16) as a Christian distinguished for faith and charity. Rufinus says that he suffered martyrdom at Caesarea in Palestine in 262 (*Baronius*, *An. Eccl. ad an.* 262, §§ 81, 82).—(5) Asterius Urbanus, a Montanist writer of the latter part of the second century, referred to in Eusebius (*Hist. Eccl.*, V, 16, 17); his work was probably a compilation of the pseudo-prophetic utterances of Montanus and his female companions Priscilla and Maximilla.

THOMAS J. SHAHAN.

**Asti**, DIOCESE OF, one of the divisions of the province of Alexandria, and suffragan of Turin. Asti is a very old town. It became Christian at an early period of the Christian Era. The first known bishop was Pastor in 451. After him, were Majoranus in 465, Benenatus in 680, and St. Evasius in 730. From 800 begins the regular list of bishops, though the see was vacant from 1857 to 1867. There has been some controversy as to the beginning of the Diocese of Asti and the episcopate of St. Evasius, once placed by some at much earlier dates. Asti has 182,600 Catholics, 107 parishes, 300 secular priests, 12 regulars, 92 seminarists, 525 churches or chapels.

GAMS, *Series episcop. Eccles. cathol.* (Ratisbon, 1873), 812; UGHETTI, *Italia Sacra* (Venice, 1722), IV, 332; CAFFARELLI, *Le chiese d'Italia* (Venice, 1866), XIV, 179; SAVIO, *Gli antichi vescovi d'Italia: Piemonte* (Turin, 1897), I, 109-157.

**Aston**, name of several English Catholics of prominence.—SIR ARTHUR, member of an ancient and knightly family, an able military officer in the army of Charles I, governor of Oxford for the king, and made governor of Drogheda (Ireland) in 1649. He was killed 10 September, 1649, at the siege of that town by the forces of Oliver Cromwell; his brains were dashed out with his wooden leg during the massacre that followed the capture (D. Murphy, *Cromwell in Ireland*, Dublin, 1897, p. 99).—HERBERT, an English poet, b. at Chelsea, 1614, third son of Walter, first Lord Aston of Forfar, whom he accompanied to Madrid on his second embassy in 1635, author of "Tixall Poetry, Collected by the Hon. Herbert Aston, 1658" (ed. with notes and illustrations by Arthur Clifford, Esq., Edinburgh, 1813, 4to).—WALTER, father of the preceding and son of Sir Edward Aston, of Tixall in Staffordshire, educated under the direction of Sir Edward Coke, sent as one of the two ambassadors to Spain (1619) to negotiate a marriage treaty between Charles (I), Prince of Wales, and the Infanta, daughter of Philip III. He became a convert to the Catholic Faith on this occasion, and on his return to England was made Lord of Forfar (Scotland). He had a decided taste for literature, and was the patron of Drayton, who dedicated to him (1598) his "Black Prince", and in his "Polyolbion" praises the Aston's "ancient seat" of Tixall.—WILLIAM, b. 22 April, 1735, educated at St. Omer, entered the Society of Jesus in 1751, and taught for several years in the Society's colleges of St. Omer, Watten, and Bruges, until the suppression in 1773; d. at Liège, 15 March, 1800, as canon of the cathedral. Among his writings are "Lettres Ultramontaines" and "Le Cosmopolite".

**Astorga** (ASTURIGA AUGUSTA), DIOCESE OF, suffragan of Valladolid in Spain, dates, it is said, from the third century. It was the principal church of the Asturias in 344, after a long eclipse was again an episcopal see in 747, and exhibits since 841 a regular succession of bishops. It was at different times a suffragan of Braga and of Santiago. It includes the whole province of Leon, and counts 300,115 Catholics, 990 parishes, and as many parish churches, 431 chapels, and 1,183 priests.

**Astrolatry**, See SABAISM.

**Astrology**, the supposed science which determines the influence of the stars, especially of the five older planets, on the fate of man (*astrologia judiciaria*; mundane, or judicial astrology) or on the changes of the weather (*astrologia naturalis*; natural astrology) according to certain fixed rules dependent upon the controlling position of the stars (constellations and aspects) at the time under consideration. Judicial astrology—the more important branch of this occult art—depended for its predictions upon the position of the planets in the "twelve houses" at the moment of the birth of a human being. The calculations necessary to settle these positions were called casting the *horoscope* or the *diagram* of the heavens (*thema cæli*) at the nativity. Starting with the point that was rising just at the moment of birth, the celestial equator was divided into twelve equal parts, six above and six below the horizon, and circles were drawn through these points and the intersecting points of the horizon and the meridian. Thus the heavens were divided into twelve *houses*. The first house (*horoscopus*) begins with the point of the ecliptic that is just rising (*ascendens*). The twelve

houses are divided into cardinal houses, also called *anguli*, succeeding houses (*succedentes, anaphora*) and declining or cadent houses (*cadentes, cataphora*). The houses symbolize respectively: life, personal property, consanguinity, riches, children and jewels, health, marriage and course of life, manner of death and inheritance, intellect and disposition (also long journeys), position in life and dignities, friends and success, enemies and misfortune. In the horoscope all these symbolic meanings are considered in their relation to the newly born. A Latin hexameter thus sums up the meaning of the twelve houses:

Vita, lucrum, fratres, genitor, nati, valetudo,

Uxor, mors, sapiens, regnans, benefactaque, daemon. The position of the planets and the sun and moon in the twelve houses at the moment of birth is decisive. The planets vary as to meaning. They are divided into day-stars (Saturn, Jupiter, and also the sun) and night-stars (the moon, Mars, and Venus); Mercury belongs both to day and night. The sun, Jupiter, and Mars are masculine; the moon and Venus are feminine, Mercury belonging again to both classes. Jupiter (*fortuna major*) and Venus (*fortuna minor*) are good planets; Saturn (*infortuna major*) and Mars (*infortuna minor*) are malignant planets. The sun, moon, and Mercury have a mixed character. Each of the planets known to antiquity, including sun and moon, ruled a day of the week; hence the names still used to designate the various days. Judicial astrology also took into consideration the position of the sun in the zodiac at the moment of birth; the signs of the zodiac also had a special astrological significance in respect to the weal and woe of the newborn, particularly his bodily health. In medical astrology every sign of the zodiac ruled some special part of the body, as for example: Aries, the Ram (♈), the head and its diseases; Libra, the Balance (♎), the intestines. Judicial astrology postulates the acceptance of the earth as the centre of the solar system. Natural astrology predicts the weather from the positions of the planets, especially the moon. Many of its theories are not to be rejected *a priori*, since the question of the moon's meteorological influence still awaits a solution which must depend upon the progress of human knowledge as to ether waves and cognate matters.

**HISTORY.**—The history of astrology is an important part of the history of the development of civilization; it goes back to the early days of the human race. The unchangeable, harmonious course of the heavenly bodies, the profound impression made on the soul of man by the power of such heavenly phenomena as eclipses, the feeling of dependence on the sun, the giver of daylight—all these probably suggested, in the early ages of the human race, the question whether the fate of man was not dependent on these majestic manifestations of Divine power. Astrology was, therefore, the foster-sister of astronomy, the science of the investigation of the heavens. From the start astrology was employed for the needs and benefit of daily life; the astrologers were astronomers only incidentally and in so far as astronomy assisted astrology in the functions which the latter had to perform in connexion with religious worship. According to the belief of the early civilized races of the East, the stars were the source and at the same time the heralds of everything that happened, and the right to study the "godlike science" of astrology was a privilege of the priesthood. This was the case in Mesopotamia and Egypt, the oldest centres of civilization known to us in the East. The most ancient dwellers on the Euphrates the Akkado-Sumerians were believers in judicial astrology, which was closely interwoven with their worship of the stars. The same is true of their successors, the Babylonians and Assyrians, who were the chief exponents of astrology in antiquity. The Babylonians

and Assyrians developed astrology, especially judicial, to the status of a science, and thus advanced in pure astronomical knowledge by a circuitous course through the labyrinth of astrological predictions. The Assyro-Babylonian priests (Chaldeans) were the professional astrologers of classic antiquity. In its origin Chaldaic astrology also goes back to the worship of the stars; this is proved by the religious symbolism of the most ancient cuneiform texts of the zodiac. The oldest astrological document extant is the work called "Namar-Beli" (Illumination of Bel) composed for King Sargon I (end of the third millennium B.C.) and contained in the cuneiform library of King Asurbanipal (668-626 B.C.). It includes astronomical observations and calculations of solar and lunar eclipses combined with astrological predictions, to which the interpretation of dreams already belonged. Even in the time of Chaldean, which should be called Assyrian, astrology, the five planets, together with the sun and moon, were divided according to their character and their position in the zodiac as well as according to their position in the twelve houses. As star of the sun, Saturn was the great planet and ruler of the heavens. The weather, as far back as this time, was predicted from the colour of the planets and from their rising and setting. Classical antiquity looked upon Berosus, priest of the temple of Bel at Babylon, as the oldest writer on astrology; and according to Vitruvius Berosus founded a school of astrology at Cos. Seneca says that a Greek translation, made by Berosus, of the "Namar-Beli" from the library of Asurbanipal was known to classical antiquity.

The Egyptians and Hindus were as zealous astrologers as the nations on the Euphrates and Tigris. The dependence of the early Egyptian star (sun) worship (the basis of the worship of Osiris) upon early Chaldaic influences belongs to the still unsettled question of the origin of early Egyptian civilization. But undoubtedly the priests of the Pharaohs were the docile pupils in astrology of the old Chaldean priests. The mysterious Thoth (Thoth), the Hermes Trismegistus of antiquity, was regarded as the earliest teacher of astrology in Egypt. He is reputed to have laid the foundation of astrology in the "Hermetic Books"; the division of the zodiac into the twelve signs is also due to him. In classic antiquity many works on astrology or on occult sciences in general were ascribed to this mythical founder of Egyptian astrology. The astrological rule of reckoning named after him "Trutina Hermetis" made it possible to calculate the position of the stars at the time of conception from the diagram of the heavens at the time of birth. The Egyptians developed astrology to a condition from which it varies but little to-day. The hours of the day and night received special planets as their rulers, and high and low stood under the determinative influence of the stars which proclaimed through the priestly caste the coming fate of the land and its inhabitants. It is significant that in ancient Egypt astronomy, as well as astrology, was brought to an undoubtedly high state of cultivation. The astoundingly daring theories of the world found in the Egyptian texts, which permit us to infer that their authors were even acquainted with the heliocentric conception of the universe, are based entirely on astrologico-theosophic views. The astrology of the ancient inhabitants of India was similar, though hardly so completely developed; they also regarded the planets as the rulers of the different hours. Their division of the zodiac into twenty-eight houses of the moon is worthy of notice; this conception, like all the rest of the fundamental beliefs of Hindu astrology, is to be found in the Rig-Veda. In India both astrology and the worship of the gods go back to the worship of the stars. Even to-day, the Hindus, especially the Brahmins, are considered the best au-

thorities on astrology and the most skilful casters of horoscopes.

India influenced and aided the development of astrology in ancient China; both India and Mesopotamia that of the Medes and Persians. The Assyro-Babylonian and Egyptian priests were the teachers of the Greek astrologers. Both of these priestly castes were called Chaldeans, and this name remained the designation of all astrologers and astronomers in classic antiquity and in the period following. It speaks well for the sound sense of the early Grecian philosophers that they separated the genuine astronomical hypotheses and facts from the confused mass of erroneous astrological teaching which the Egyptian priests had confided to them. At the same time it was through the old Hellenic philosophers that the astrological secrets of the Oriental priestly castes reached the profane world. The earliest mention of the art of astrological prediction in early classical literature is found in the "Prometheus Vinculus" of Æschylus (line 486 sqq.)—a comparatively late date. The often quoted lines of the *Odyssey* (Bk. XVIII, 136 sqq.) have nothing to do with astrology. Astrology was probably cultivated as an occult science by the Pythagorean school which maintained the exclusiveness of a caste. The teaching of Pythagoras on the "harmony of the spheres" points to certain astrological hypotheses of the Egyptian priests. It is a striking fact that Greek astrology began to flourish when the glory of the early classical civilization had begun to wane. It was in the age of Euripides, who refers to astrological predictions in a little comedy, that the belief in astrology began to grow popular in Greece. After the overthrow of the Assyro-Babylonian Empire, the priests of those regions found refuge in Greece and spread their astrological teachings by word of mouth and writing. In this way astrology lost the character of occult science. Astronomy and astrology remained closely united, and both sciences were represented by the so-called Chaldeans, Mathematici, and Genethliacs. Astrology proper, from the time of Posidonius, was called *ἀποτελεσματικά* (rendered into English, "apotelesmatics" in order to indicate more clearly the influence of the stars upon man's final destiny; *ἀπό*, "from", and *τέλος*, "end"). Astrology soon permeated the entire philosophical conception of nature among the Greeks, and rapidly attained a commanding position in religious worship. Plato was obliged to take astrology into consideration as a "philosophical doctrine", and his greatest disciple, Aristotle, was the first to separate the science of astrology from that of meteorology, which was reserved for the phenomena of the atmosphere. The Stoics who encouraged all forms of divination were active promoters of astrology. The more plainly the influence of Oriental teaching manifested itself in Greek civilization, and the more confused the political conditions and religious ideas of the Greek States became, the greater was the influence of astrologers in public, and the more mischievous their activity in private, life. Every professional astronomer was at the same time an astrologer. Eudoxus of Cnidus, the author of the theory of concentric spheres, was perhaps the first to write in Greek on purely astrological topics, being led to select this subject by his studies in Egypt. Most of the Greek astronomers known to us followed in his footsteps, as, for instance, Geminus of Rhodes whose most important work treating of astronomy and astrology *Εἰσαγωγή εἰς τὰ Φαινόμενα* (Introduction to Phenomena) was commented on even by Hipparchus. About 270 B. C. the poet Aratus of Soli in his didactic poem, "Phænomena", explained the system of Eudoxus, and in a poem called "Diosemeia", which was appended to the former, he interprets the rules of judicial and natural astrology that refer to the various changes of the

stars. The poem of Aratus was greatly admired by both the Greeks and the Romans; Cicero translated it into Latin, and Hyginus, Ovid's friend, wrote a commentary on it. In this age astrology was as highly developed as in its second period of prosperity, at the Renaissance. Medical astrology had also at this date secured a definite position. Hippocrates of Cos in his work "De Aere, Aqua et Locis", which shows the influence of the Pythagoreans, discusses at length the value of astrology and its prognostications for the whole domain of medicine. In the Alexandrine school of medicine, astrological prognosis, diagnosis, and hygiene soon covered with their rank growths the inherited scientific teachings that had been tested by practice. In this way "astrological" cures grew in favour. These forms of the art of healing are not without interest both for the history of suggestion and for that of human error. The diseases of the more important bodily organs were diagnosed according to the influence of the sign of the zodiac at the time, and a medicine applied which either acted by suggestion, or was wholly inoperative. In the division of the zodiac according to its medical effect on the different parts of the body the first sign taken was the Ram (*Aries*), which ruled the head, and the last of the series was the Fishes (*Pisces*), which controlled the health or ailments of the feet. As the appetite of the Greeks for the mysterious wisdom of astrology grew keener, the Egyptian and Chaldean astrologers continually drew out still more mystical, but, at the same time, more dubious treasures from their inexhaustible store-house. The newly founded city of Alexandria, where the later Hellenic culture flourished, was a centre for all astrologers and practitioners of the occult arts. From time to time books appeared here, professing to have had their origin in the early days of Egyptian civilization, which contained the secret knowledge pertaining to astrological and mystical subjects. These writings seemed to meet the aspirations of ordinary men for the ideal, but all they offered was a chaotic mass of theories concerning astrology and divination, and the less they were understood the more they were applauded. In the Renaissance these pseudo-scientific works of antiquity were eagerly studied. It suffices here to mention the books of Nechepso-Petosisiris which were believed by the neo-Platonists to be the most ancient Egyptian authority on astrology but which, probably, were written in Alexandria about 150 B. C. About this same time, in all probability, Manetho, an Egyptian priest and traveller repeatedly mentioned by Ptolemy, wrote on astrology. In order to meet the exigencies which arose, each degree of the heavens in late Egyptian astrology was assigned to some special human activity and some one disease. Besides this, the "heavenly spheres", which play so important a part in the history of astronomy, were increased to 54, and even a higher number, and from astrological calculations made from the complicated movements of these spheres the fate both of men and nations was predicted. Thus arose in late classic times the *sphæra barbarica* (foreign sphere) which in the Middle Ages also had a controlling influence over astrology.

It was to be expected that the sober-minded, practical Romans would soon be dissatisfied with the mystical and enigmatical doctrines of Alexandrian astrology. Cato uttered warnings against the mischievous activity of the Chaldeans who had entered Italy along with Greek culture. In the year 139 B. C. the Prætor Cneius Cornelius Hispanus drove all astrologers out of Italy; but they returned, for even the Roman people could not begin an important undertaking without the aid and advice of augurs and auspices. It is only necessary to recall the greatest man of ancient Rome, Julius Cæsar. Cicero, who in

his younger days had busied himself with astrology, protested vigorously, but without success, against it in his work "De Divinatione". The Emperor Augustus, on the other hand, believed in astrology and protected it. The first Roman work on astrology was dedicated to him; it was the "Astronomica", written about 45 B. C. by Marcus Manilius, who was probably a Chaldean by birth. In five books this poem gives an outline of the astrology of the zodiac and constellations. The fifth book is devoted to the *sphæra barbarica*. It is a curious fact that the poem does not take up the astrology of the planets. In spite of repeated attempts to suppress it, as in the reigns of Claudius and Vespasian, astrology maintained itself in the Roman Empire as one of the leading forms of culture. The lower the Romans sank in religion and morals the more astrology became entwined with all action and belief. Under Tiberius and Nero the two astrologers named Thrasyllus, who were father and son, held high political positions. The most distinguished astronomer of antiquity, Claudius Ptolemæus, was also a zealous astrologer. His "Opus Quadripartitum, seu de apotelesmatibus et judiciis astrorum, libri IV" is one of the chief treatises on astrology of earlier times and is a detailed account of astrological teachings. This work occupied in astrology as important a position as that which the same author's *Μεγάλη Σύνταξις* (also called "Almagest"), held in the science of astronomy before the appearance of the Copernican theory. It is a striking fact that Ptolemy sought, in the second book of the "Opus Quadripartitum", to bring the psychical and bodily differences of the various nations into relation with the physical conditions of their native lands, and to make these conditions, in their turn, depend on the positions of the stars. The Roman astrologers wrote their manuals in imitation of Ptolemy, but with the addition of mystic phantasies and predictions. After the death of Marcus Aurelius, the Chaldeans were always important personages at the imperial court. As late as the time of Constantine the Great the imperial notary Julius Firmicus Maternus, who later became a Christian, wrote on "Mathematics, or the power and the influence of the stars" eight books which were the chief authority in astrology until the Renaissance. With the overthrow of the old Roman Empire and the victory of Christianity, astrology lost its importance in the centres of Christian civilization in the West. The last known astrologer of the old world was Johannes Laurentius (sometimes called Lydus), of Philadelphia in Lydia, who lived A. D. 490-565.

**ASTROLOGY UNDER CHRISTIANITY.**—From the start the Christian Church strongly opposed the false teachings of astrology. The Fathers energetically demanded the expulsion of the Chaldeans who did so much harm to the State and the citizens by employing a fantastic mysticism to play upon the ineradicable impulses of the common people, keeping their heathen conceptions alive, and fostering a soul-perplexing cult which, with its fatalistic tendencies, created difficulties in the discernment of right and wrong and weakened the moral foundations of all human conduct. There was no room in the early Christian Church for followers of this pseudo-science. The noted mathematician Aquila Ponticus was expelled from the Christian communion, about the year 120, on account of his astrological heresies. The early Christians of Rome, therefore, regarded the astrologers as their bitterest and, unfortunately, their too powerful enemies; and the astrologers probably did their part in stirring up the cruel persecutions of the Christians. As Christianity spread, the astrologers lost their influence and reputation, and gradually sank to the position of mere quacks. The conversion of Constantine the Great put an end to the importance of this so-called science, which for

five hundred years had ruled the public life of Rome. In 321 Constantine issued an edict threatening all Chaldeans, Magi, and their followers with death. Astrology now disappeared for centuries from the Christian parts of Western Europe. Only the Arabic schools of learning, especially those in Spain after the Moors had conquered the Iberian peninsula, accepted this dubious inheritance from the wisdom of classic times, and among the Arabs it became an incentive to pure astronomical research. Arabian and Jewish scholars were the representatives of astrology in the Middle Ages, while both Church and State in Christian countries rejected and persecuted this false doctrine and its heathen tendencies. Unfortunately, at the same time the development of astronomy was checked, excepting so far as it was needed to establish certain necessary astronomic principles and to calculate the date of Easter. Yet early Christian legend distinguished between astronomy and astrology by ascribing the introduction of the former to the good angels and to Abraham, while the latter was ascribed to Cham. In particular, St. Augustine ("De civitate Dei", VIII, xix, and in other places) fought against astrology and sought to prevent its amalgamation with pure natural science. Once more the East prepared a second period of prosperity for astrology. The Jews, very soon after they were driven into Western Europe, busied themselves with astrological questions, being stimulated thereto by the Talmud. Jewish scholars had, moreover, a knowledge of the most important works of classic times on astrology and they became the teachers of the Arabs. These latter, after the rapid spread of Mohammedanism in Western Asia and North Africa, and their defeat in Western Europe by Charles Martel, began to develop a civilization of their own. The mystical books which appeared in Jewish literature after the time of the Talmud, that is, the books called the "Sefer Zohar" and the "Sefer Yezirah" (Book of Creation), are full of rules of divination dealing especially with astrological meanings and calculations. The high reputation of the Talmud and the Cabbala among the Jews in the Middle Ages explains their fondness for astrological speculations; but at a very early date, it should be noted, they distinguished between astronomy, "the science of reading the stars", and astrology, "the science of divination".

Caliph Al-Mansur, the builder of Bagdad, was, like his son, the famous Harun-al-Rashid, a promoter of learning. He was the first caliph to call Jewish scholars around him in order to develop the study of the mathematical sciences, especially astronomy, in his empire. In the year 777 the learned Jew Jacob ben Tarik founded at Bagdad a school for the study of astronomy and astrology which soon had a high reputation; among those trained here was Alchindi (Alkindi), a noted astronomer. It was one of Alchindi's pupils, Abumassar (Abu Mashar), from Balkh in Chorassan, born about the year 805, whom the Middle Ages regarded as the greatest of Arabian astrologers. Astrology being regarded by the caliphs as the practical application of astronomy, all the more important Arabic and Jewish astronomers who were attached to that court, or who taught in the Moorish schools were also astrologers. Among the noteworthy Jewish astrologers may be mentioned Sahl ben Bishr al-Israel (about 820); Rabban al-Taban, the well-known cabbalist and Talmudic scholar; Shabbethai Donalo (913-970), who wrote a commentary on the astrology of the "Sefer Yezirah" which Western Europe later regarded as a standard work; and, lastly, the Jewish lyric poet and mathematician Abraham ibn Esrah. Among the noted Arabic astronomers were Maassah Allah Albategnius, Alpetragius, and others. The Arabo-Judaic astrology of the Middle Ages pursued the path indicated by Ptolemy, and his teachings were apparently the im-

movable foundation of all astronomical and astrological activity. At the same time the "Opus Quadripartitum" of the great Alexandrian was corrupted with Talmudic subtleties and overlaid with mystical and allegorical meanings, which were taken chiefly from the Jewish post-Talmudic belief concerning demons. This deterioration of astrology is not surprising if we bear in mind the strong tendency of all Semitic races to fatalism and their blind belief in an inevitable destiny, a belief which entails spiritual demoralization. The result was that every conceivable pursuit of mankind, every disease, and indeed every nation had a special "heavenly regent", a constellation of definitely assigned position from the course of which the most daring prophecies were deduced.

Up to the time of the Crusades, Christian countries in general were spared any trouble from a degenerate astrology. Only natural astrology, the correctness of which the peasant thought he had recognized by experience, secured a firm footing in spite of the prohibition of Church and State. But the gradually increasing influence of Arabic learning upon the civilization of the West, which reached its highest point at the time of the crusades, was unavoidably followed by the spread of the false theories of astrology. This was a natural result of the amalgamation of the teachings of pure astronomy with astrology at the Mohammedan seats of learning. The spread of astrology was also furthered by the Jewish scholars living in Christian lands, for they considered astrology as a necessary part of their cabalistic and Talmudic studies. The celebrated didactic poem, "Imago Mundi", written by Gautier of Metz in 1245, has a whole chapter on astrology. Pierre d'Ailly, the noted French theologian and astronomer, wrote several treatises on the subject. The public importance of astrology grew as the internal disorders of the Church increased and the papal and imperial power declined. Towards the close of the Middle Ages nearly every petty prince, as well as every ruler of importance, had his court astrologer, upon whose ambiguous utterances the weal and woe of the whole country often depended. Such a person was Angelo Catto, the astrologer of Louis XI of France. The revival of classical learning brought with it a second period of prosperity for astrology. Among the civilized peoples of the Renaissance period, so profoundly stirred by the all-prevailing religious, social, and political ferment, the astrological teachings which had come to light with other treasures of ancient Hellenic learning found many ardent disciples. The romantic trend of the age and its highly cultivated sensuality were conditions which contributed to place this art in a position far higher than any it had attained in its former period of prosperity. The forerunners of Humanism busied themselves with astrology, and but few of them perceived the dangerous psychological effect of its teachings upon the masses. Towards the end of the thirteenth century the Florentines employed Guido Bonatti as their official astrologer, and, although Florence then stood alone in this respect, it was scarcely a hundred years later when astrology had entered in earnest upon its triumphant course, and a Cecco d'Ascoli was already its devoted adherent. In Petrarch's day the questionable activity of the astrologers at the Italian courts had made such progress that this clear-sighted Humanist (*De remed. utr. fortun.* I, iii, sqq; *Epist. rer. famil.* III, 8, etc.) again and again attacked astrology and its representatives with the keenest weapons of his wit, though without success, and even without any following except the weak objections of Villani and the still more ineffectual polemics of Salutato in his didactic poem "De fato et fortunâ". Emperors and popes became votaries of astrology—the Emperors Charles IV and V, and Popes Sixtus IV, Julius II,

Leo X, and Paul III. When these rulers lived astrology was, so to say, the regulator of official life; it is a fact characteristic of the age, that at the papal and imperial courts ambassadors were not received in audience until the court astrologer had been consulted. Regiomontanus, the distinguished Bavarian mathematician, practised astrology, which from that time on assumed the character of a bread-winning profession, and as such was not beneath the dignity of so lofty an intellect as Kepler. Thus had astrology once more become the foster-mother of all astronomers. In the judgment of the men of the Renaissance—and this was the age of a Nicholas Copernicus—the most profound astronomical researches and theories were only profitable in so far as they aided in the development of astrology. Among the zealous patrons of the art were the Medici. Catharine de' Medici made astrology popular in France. She erected an astrological observatory for herself near Paris, and her court astrologer was the celebrated "magician" Michel de Notredame (Nostradamus) who in 1555 published his principal work on astrology—a work still regarded as authoritative among the followers of his art. Another well-known man was Lucas Gauricus, the court astrologer of Popes Leo X and Clement VII, who published a large number of astrological treatises. In Germany Johann Stöffler, professor of mathematics at Tübingen, Matthias Landenberg, and, above all, Philip Melancthon were zealous and distinguished defenders of astrology. In Pico della Mirandola (*Adversus Astrologos libri XII*) and Paolo Toscanelli astrology encountered its first successful antagonists; later in the Renaissance Johann Fischart and the Franciscan Nas were among its opponents. (Cf. Philognesius, *Practica Practicarum*, Ingolstadt, 1571.)

Gabotto's charming essay, "L'astrologia nel quattrocento", in "Rivista di filosofia scientifica", VIII, 378, sq., gives much information concerning astrology in the fifteenth century. A. Graf's "La fatalità nelle credenze del medio evo" (in "Nuovo Antologia", 3d series, XXVIII, 201, sqq.) is also of value for astrology at the turning point of the Middle Ages. Some of the late Roman astrologers, among whom was probably Firmicus Maternus, thought to reform astrology by idealizing it and raising its moral tone. The same purpose animated Paolo Toscanelli, called Maestro Pagollo, a physician greatly respected for the piety of his life, who belonged to the learned and artistic circle which gathered around Brother Ambrosius Camaldulensis in the Monastery of The Angels. There were special professors of astrology, besides those for astronomy, at the Universities of Pavia, Bologna, and even at the Sapienza during the pontificate of Leo X, while at times these astrologers outranked the astronomers. The three intellectual centres of astrology in the most brilliant period of the Renaissance were Bologna, Milan, and Mantua. The work of J. A. Campanus, published at Rome in 1495, and often commented on, namely, "Oratio initio studii Perugiæ habita", throws a clear light on the lack of comprehension shown by the Church Fathers in their attitude towards pagan fatalism. Among other things it is here said: "Quoniam Augustinus, sanctissimus ille vir quidem ac doctissimus, sed fortassis ad fidem religionemque propensor, negat quicquam vel boni vel mali astrorum necessitate contingere".

In the Renaissance, religion, also, was subordinated to the dictation of astrology. The hypothesis of an astrological epoch of the world for each religion was widely believed by Italian astrologers of the time, who obtained the theory from Arabo-Judaic sources. Thus it was said that the conjunction of Jupiter with Saturn permitted the rise of the Hebrew faith; that of Jupiter with Mars, the appearance of the Chaldaic religion; of Jupiter with the sun, the Egypt-

tian religion; of Jupiter with Venus, Mohammedanism; and of Jupiter with Mercury, Christianity. At some future day the religion of Antichrist was to appear upon the conjunction of Jupiter with the moon. Extraordinary examples of the glorification of astrology in Italy during the Renaissance are the frescoes painted by Miretto in the Sala della Ragione at Pavia, and the frescoes in Borso's summer palace at Florence. Petrarch, as well, notwithstanding his public antagonism to astrology, was not, until his prime, entirely free from its taint. In this connection his relations with the famous astrologer, Mayno de Mayneri, are significant. (Cf. Rajna, *Giorn. stor.*, X, 101, sq.)

Even the victorious progress of the Copernican system could not at once destroy confidence in astrology. The greatest astronomers were still obliged to devote their time to making astrological predictions at princely courts for the sake of gain; Tycho Brahe made such calculations for the Emperor Rudolph II, and Kepler himself, the most distinguished astronomer of the age, was the imperial court astrologer. Kepler was also obliged to cast horoscopes for Wallenstein, who later came completely under the influence of the alchemist and astrologer Giambattista Zenno of Genoa, the Seni of Schiller's "Wallenstein". The influence of the Copernican theory, the war of enlightened minds against pseudo-prophetic wisdom, and the increasing perception of the moral and psychical damage wrought by astrological humbug at last brought about a decline in the fortunes of astrology, and that precisely in Wallenstein's time. At the same period astrological tracts were still being written by the most celebrated of English astrologers, William Lilly of Diseworth, Leicestershire, who received a pension of £100 from Cromwell's council of state, and who, in spite of some awkward incidents, had no little political influence with Charles II. Among his works was a frequently republished "Christian Astrology". Shakespeare (in *King Lear*) and Milton were acquainted with and advocated astrological theories, and Robert Fludd was a representative of the art at the royal court. Francis Bacon, it is true, sought to win adherents for a purified and reformed astrology in order to destroy the existing form of the art. It was Jonathan Swift who in his clever satire, "Prediction for the Year 1708 by Isaac Bickerstaff, Esq.", which deserves to be read even at the present day, gave the deathblow to the belief of English society in astrology. The last astrologer of importance on the Continent was Jean-Baptiste Meirin, who issued "Astrologia Gallica" (1661). The greatly misunderstood Swiss naturalist Theophrastus Paracelsus was an opponent of astrology, and not its advocate, as was formerly inferred from writings erroneously attributed to him. The rapid growth of experimental investigation in the natural sciences in those countries which had been almost ruined, socially and politically, by the Thirty Years War completely banished the astrological parasites from society. Once more astrology fell to the level of a vulgar superstition, cutting a sorry figure among the classes that still had faith in the occult arts. The peasant held fast to his belief in natural astrology, and to this belief the progress of the art of printing and the spread of popular education contributed largely. For not only were there disseminated among the rural poor "farmer's almanacs", which contained information substantiated by the peasant's own experience, but the printing-presses also supplied the peasant with a great mass of cheap and easily understood books containing much fantastic astrological nonsense.

The remarkable physical discoveries of recent decades, in combination with the growing desire for an elevated philosophico-religious conception of the world and the intensified sensitiveness of the modern

cultured man—all these together have caused astrology to emerge from its hiding place among paltry superstitions. The growth of occultistic ideas, which should, perhaps, not be entirely rejected, is reintroducing astrology into society. This is especially true of judicial astrology, which, however, by its constant encouragement of fatalistic views unsettles the belief in a Divine Providence. At present judicial astrology is not justified by any scientific facts. To put forward the theory of ether waves as an argument for astrological assertions is not in accord with the methods of sober science. Judicial astrology, therefore, can claim a place only in the history of human error, while, however, as an historical fact, it reflects much light upon the shadowy labyrinth of the human soul.

**ASTROLOGY AMONG THE ANCIENT JEWS.**—The Bible is free from any base admixture of astrological delusions. There is no reason for dragging the passage Josue x, 12, into historico-astrological discussions; the facts there related—the standing still of the sun in the valley of Gabaon and of the moon in the valley of Ajalon—are of purely astronomical interest. Only a few indications in the Old Testament suggest that, notwithstanding the Divine prohibition (Ex., xxii, 18; Deut., xviii, 10, etc.), the Jews, especially after they were exposed to the influence of Egyptian and Babylonian errors, may have practised astrology in secret, along with other superstitions. The Prophets warned the people against the pernicious ascendancy of soothsayers and diviners of dreams (Jer., xxix, 8; Zach., x, 1-2), among whom astrologers were included. Thus in the Book of Wisdom (xiii, 1-2) it is said: "All men are vain . . . who . . . have imagined either . . . the swift air, or the circle of the stars, or the great water, or the sun and moon, to be the gods that rule the world." The Book of Job, a writing of importance in the history of astronomy and star nomenclature, is also free from astrological fatalism. But to this fatalism the Jews had a natural predisposition, and when Hellenism gained a footing in the Holy Land it was accompanied by the spread of astrology, largely among the learned, the "philosophers", at whom even in an earlier age the passage in Wisdom had probably been aimed. Again, Isaias (xlvii, 13-14) derides the Babylonian astrologers ("Let now the astrologers stand and save thee, they that gazed at the stars . . . Behold they are as stubble, fire hath burnt them"), and Jeremias exclaims (x, 2): "Be not afraid of the signs of heaven, which the heathen fear".

After the Exile, however, astrology spread so rapidly, above all among the educated classes of Israel, that as early as the Hellenistic era a Jewish astrological literature existed, which showed a strong Persico-Chaldean influence. The prophets had been keen opponents of astrology and of a relapse into fatalism. If, when they were prophesying of the great events to come, the contemplation of nature, and especially of the stars, filled them with sympathetic enthusiasm, by reason of their poetic inspiration and power of divination, this had nothing to do with astrology. On the other hand it does not appear impossible that in Daniel's time some exiled Jews practised astrology. Judging from Daniel, v, 7, 11, it is possible that the prophet himself held a high rank among the astrologers of the Babylonian court. After the Exile an attempt was made to separate astrology from sorcery and forbidden magical arts, by denying a direct Biblical prohibition of astrology and by pretending to find encouragement for such speculations in Genesis, i, 14. It is a characteristic fact that in ancient Israel astrology received no direct encouragement, but that its spread was associated with the relapse of many Jews into the old Semitic star-worship which was aided by Persico-Chaldean influence. For this Jeremias

is a witness (vii, 18; xix, 13; xlv, 17-19, 25). Coincident with the spread of astrology in old Israel and the decline of the nation was the diffusion of demonology. The Jewish prayers to the planets, in the form in which they are preserved with others in Codex Paris, 2419 (folio 277r), came into existence at the time when Hellenism first flourished in the East, namely, the third and second centuries B. C. In these prayers special angels and demons are assigned to the different planets; the greatest and most powerful planet Saturn, having only one angel, Keteol, and one demon, Beelzebub. These planetary demons regulated the destiny of men.

The most notable witness for astrological superstitions in the era of the decadence of Israel is the apocryphal "Book of the Secrets of Henoch", which, notwithstanding its perplexing phantasies, is a rich treasure-house of information concerning cosmological and purely astronomical problems in the Hellenic East. The author of "Henoch" is said by a Samaritan writer to be the discoverer of astronomy, and the book contains valuable explanations in regard to astronomy and astrology at the time of the Machabean dynasty. The evidences for astrologic demonology in ancient Israel, when the nation was affected by Hellenism and Babylonian decadence, are found in the latter part of the "Book of the Secrets of Henoch"—the "Book of the Course of the Lights of Heaven"—as also previously in the fourth section which treats of Henoch's wanderings "through the secret places of the world". This latter is perhaps the archetype of Dante's "Divine Comedy". According to the "Book of Henoch" the human race derived its knowledge of astrology and "lunar sorceries", together with all other forms of magic, from the seven or eight spirits from whom come the chief sins of mankind (Henoch, i, 8). It is, moreover, worthy of note that the "Book of Henoch" must be regarded as a witness to Jewish national prophesy. It does not betray the ascendancy of Hellenism in any such degree as do the verses of the "Sibylline Oracles", which were recorded in the old Ionic dialect during the reign of Ptolemy Physcon (145-112 B. C.) by Jewish scholars in Egypt, and probably at a later date in the Holy Land itself.

The astrological demonology of the Jews was continually fed from Egyptian and Babylonian sources, and formed in its turn the basis for the astrology of certain neo-Platonic sects. Together with the Parsee astrology, it was the foundation of the astrological demonology of the Gnostics and Priscillianists. The influence of Hellenistic Judaism is also plainly visible in the philosophic system of the Harranites, or Sabæans. It is only necessary to mention here the high honour paid by the Sabæans to the seven planetary gods who regulate the fate of man. According to the belief of the Sabæans every planet is inhabited by a spirit as star-soul, and the deciphering of the figures of the conjunction and opposition of the planets made the prediction of future destiny possible. Other elements of late Judaic astrology were adopted by the earliest known Christian writer on astrology, the Byzantine court-astrologer, Hephæstion of Thebes. The didactic astrological poem of Johannes Kamateros (about the middle of the twelfth century), which was dedicated to the Byzantine Emperor Manuel I, appears to have been drawn from Judæo-Gnostic sources. It is a striking fact that as "demonized astrology" gained ground in ancient Israel—and this was a branch of astrology in great favour among the Jewish scholars of the age of the Ptolemies, and much practised by them—the worship of the stars ventured once more to show itself openly. It was not until the appearance of Christianity that the preposterous and, in part, pathologically degener-

ate, teachings of late Judaic astrology were swept away.

The lower the Jewish nation sank in the scale of religion and civilization the greater was the power gained by the erratic doctrines of astrology and the accompanying belief in demonology. The earthly labours of the Saviour purified this noxious atmosphere. The New Testament is the opponent of astrology, which, by encouraging an apathetic fatalism, prevents the development of an elevating and strengthening trust in a Divine Providence. The "Star of the Wise Men" (Matt., ii, 2, 7, 9, sq.) cannot be identified by astronomy; perhaps, according to Ideler (*Handbuch der mathemat. und techn. Chron.*), the conjunction of the planets Jupiter and Saturn is meant. But this hypothesis, which would be of decisive importance in settling the year of the birth of Christ, still lacks convincing proof. It finds a curious support in Abrahanel's comment that, according to Jewish astrologers, a conjunction of Jupiter and Saturn was a sign of the Messias. It must, however, remain questionable whether and to what extent a prediction of Jewish astrologers, or *Kere schamajim*, is to be considered as realized in the "Star of the Wise Men" (Matt., ii, 2, etc.). The first heralds of Christianity, the Twelve Apostles, at once began a bold war against the rank growths of superstition. They also battled with the propensity of the people for astrology and in its stead planted in the hearts of men a belief in the power and goodness of God. Supported by the teachings of the Scriptures, the Church Fathers became powerful opponents of astrology and attacked with determination the bewildering and demoralizing ascendancy of its devotees. The assertion is therefore justified that the Book of Books remained free from the taint of astrological delusion. The passion for astrology evinced by decadent Judaism, and preserved in the Bible, is only one more proof of the propensity of Semitic nations for fatalistic superstitions and of the purifying and victorious power of the ethics of Christianity.

Campbell Thompson's monumental work, "The Reports of the Magicians and Astrologers of Nineveh and Babylon" (London, 1902), may be consulted for the valuable facts which throw light upon the dependence of the astrology of the ancient Jews on that of Babylon. "A special branch of astrology which was zealously cultivated in Babylon was medical astrology, or the astrological prognosis of disease." Medical astrology is important in regard to the question of astrology in the Bible. It was greatly favoured by the spread of empirical treatment of disease among the astrologers. The Bible itself gives very little information concerning this form of the science, but subordinate Jewish sources, above all the Talmud, allow conclusions to be drawn as to its importance. Medical astrology, derived from Arabo-Judaic sources, flourished again at the time of the Renaissance. Its professional representatives were then called "Iatromathematicians", after the mathematical mode of arriving at conclusions in their "art of healing". [Cf. Karl Sudhoff, *Iatromathematiker, vornehmli. des XV. und XVI. Jahrhund.*, in *Abhand. zur Gesch. der Medizin* (Breslau, 1902), pt. II; Wilh. Ebstein, *Die Medizin im Alten Testament* (Stuttgart, 1901); Gideon Precher, *Das Transzendente, Magie im Talmud* (Vienna, 1850); Träsen, *Sitten der alten Hebräer* (Breslau, 1853).]

The Babylonians, chiefly in relation to medical astrology, distinguished between a spherical method of calculation (from the point of view of the observer to the stars, i. e. subjectively), and a cosmical method (from the relative position of the stars, i. e. objectively). The former was used in the prognosis deduced from the observation of the twelve houses

of the heavens; the latter in that drawn from the twelve signs of the Zodiac.

GRÄSSE, *Lehrb. einer Literärgesch.* (Leipzig, 1839) II, contains a list of the earlier literature of the subject; LÖW, *Astronomie in der Bibel in Ben Chananja* (1863); REITZENSTEIN, *Poimandres* (Leipzig, 1904); MAASE, *Die Tagesgötter* (Berlin, 1902); CHEWOLSON, *Seabier und Seabierum* (1856); KROLL in *Neue Jahrb. für Phil. und Päd.*, VII, 559, sqq.; SCHIAPARELLI, *L'astronomia nell' Antico Testamento* (Milan, 1904); BOLL, *Sphæra* (Leipzig, 1905); REITZENSTEIN, *Zwei religionsgesch. Fragen* (Strasburg, 1901); BOUSSET, *Religion des Judentums im neulatestam. Zeitalter* (Berlin, 1906). See also the literature quoted for ancient astrology. In discussing the "Star of the Wise Men", spoken of in Matthew, use may be made (although caution should be observed) of the works of FELIX VON ORFEL, *Die Angaben der Berliner Planetentafel P. 8879 verglichen mit der Geburtsgeschichte Christi, in Mitteilungen der Vorderasiat. Gesellsch.* (1903), VIII, Pt. II; IDEM, *Das Horoskop der Empfängnis Christi*, in the same proceedings, Pt. VI.

MAX JACOBI.

**Astronomy** (from Gr. *ἀστρον*, star; *νόμος*, to distribute), a science of prehistoric antiquity, originating in the elementary needs of mankind. It is divided into two main branches, distinguished as astrometry and astrophysics; the former concerned with determining the places of the heavenly bodies, the latter, with the investigation of their chemical and physical nature. But the division is of quite recent date. The possibilities of antique science stopped short at fixing the apparent positions of objects on the sphere. Nor was any attempt made to rationalize the observed facts until the Greeks laboriously built up a speculative system, which was finally displaced by the vast fabric of gravitational theory. Descriptive astronomy, meanwhile, took its rise from the invention of the telescope, and the facilities thus afforded for the close scrutiny of the denizens of the sky; while practical astronomy gained continually in refinement with the improvement of optical and mechanical arts. At the present time, astrophysics may be said to have absorbed descriptive astronomy, and astrometry necessarily includes practical research. But mathematical astronomy, grounded on the law of gravitation, keeps its place apart, though depending for the perfecting of its theories and the widening of its scope upon advances along the old, and explorations in new, directions.

**PREHISTORIC ASTRONOMY.**—Formal systems of astronomical knowledge were early established by the Chinese, Indians, Egyptians, and Babylonians. The Chinese were acquainted, probably in the third millennium B. C., with the cycle of nineteen years (rediscovered in 632 B. C. by Meton at Athens), by which, since it comprised just 235 lunations, the solar and lunar years were harmonized; they recorded cometary apparitions, observed eclipses, and employed effective measuring apparatus. European methods were introduced at Pekin by Jesuit mis-

sionaries in the seventeenth century. Indian astronomy contained few original elements. It assigned particular prominence to the lunar zodiac, called the *nakshatras*, or mansions of the moon, variously reckoned at twenty-seven or twenty-eight; and these, which were probably a loan from Chaldaea, served mainly for superstitious purposes. In Egypt, on the other hand, considerable technical skill was attained, and a peculiar constellation system of obscure derivation, came into use. The Babylonians alone, among the nations of the fore-time, succeeded in laying the foundations of a progressive science. Through the medium of the Greeks, they transmitted to the West their entire scheme of uranography, our familiar constellations having been substantially designed on the plain of Shinar about 2800 B. C. Here, too, at a remote epoch, the "Saros" became known. This is a cycle of eighteen years and ten or eleven days, which affords the means of predicting the recurrence of eclipses. The changing situations of the planets among the stars were, moreover, diligently recorded, and accurate acquaintance was secured with the movements of the sun and moon. The interpretation in 1889, by Fathers Epping and Strassmaier, of a collection of inscribed tablets preserved in the British Museum vividly illuminated the methods of official Babylonian astronomy in the second century B. C. They were perfectly effectual for the purpose chiefly in view, which was the preparation of yearly ephemerides announcing expected celestial events, and tracing in advance the paths of the heavenly bodies. Further analysis in 1899 by Father Kugler, S. J., of the tabulated data employed in computing the moon's place, disclosed the striking fact that the four lunar periods—the synodic, sidereal, anomalistic, and draconitic months—were substantially adopted by Hipparchus from his Chaldean predecessors.

**GREEK ASTRONOMY.**—Astronomy, however, no sooner became a distinctively Greek science than it underwent a memorable transformation. Attempts began to be made to render the appearances of the sky intelligible. They were, indeed, greatly hampered by the assumption that movement in space must be conducted uniformly in circles, round an immobile earth; yet the problem was ostensibly solved by Apollonius of Perga (250–220 B. C.), and his solution, applied by Hipparchus to explain the movements of the sun and moon, was extended by Claudius Ptolemaeus (Ptolemy) to the planets. This was the celebrated theory of eccentrics and epicycles, which, by the ingenuity of its elaboration, held its own among civilized men during fourteen centuries. Hipparchus, the greatest of ancient astronomers, observed at Rhodes (146–126 B. C.), but is considered as belonging to the Alexandrian school. He invented trigonometry, and constructed a catalogue of 1080 stars, incited, according to Pliny's statement, by a temporary stellar outburst in Scorpio (134 B. C.). Comparing, as the work progressed, his own results with those obtained 150 years earlier by Timocharis and Aristyllus, he detected the slow retrogression among the stars of the point of intersection of the celestial equator with the ecliptic, which constitutes the phenomenon of the precession of the equinoxes. The circuit is completed in 25,800 years; hence the tropical year, by which the seasons are regulated, is shorter than the sidereal year by just twenty-one minutes, the equinox shifting backward to meet the sun by the annual amount of 50". Greek astronomy was embodied in Ptolemy's "Almagest" (the name is of mixed Greek and Arabic derivation), composed at Alexandria about the middle of the second century A. D. It was based upon the geocentric principle. The starry sphere, with its contents, was supposed to revolve, once in twenty-four hours, about the fixed terrestrial globe, while the sun and moon, and the

five planets, besides sharing the common movement, described variously conditioned orbits round the same centre. The body of doctrine it inculcated made part of the universal stock of knowledge until the sixteenth century. The formidable task of demonstrating its falsity, and of replacing it with a system corresponding to the true relations of the world, was undertaken by an active and exemplary ecclesiastic, Nicholas Copernicus, Canon of Frauenburg (1473-1543). The treatise in which it was accomplished, entitled "*De Revolutionibus Orbium Cœlestium*", saw the light only when its author lay dying; but a dedication to Pope Paul III bespoke the protection of the Holy See for the new and philosophically subversive views which it propounded. Denounced as impious by Luther and Melancthon, they were, in fact, favourably received at Rome until theological discredit was brought upon them by the wild speculations of Giordano Bruno (1548-1600), and the imprudent utterances of Galileo Galilei (1564-1642).

**DESCRIPTIVE ASTRONOMY.**—Descriptive astronomy may be said to have originated with the invention of the telescope by Hans Lippershey in 1608. Its application to the scrutiny of the heavenly bodies, by Galileo and others, led at once to a crowd of striking discoveries. Jupiter's satellites, the phases of Venus, the mountains of the moon, the spots on the sun, Saturn's unique appendages, all descried with a little instrument resembling a unioocular opera-glass, formed, each in its way, a significant and surprising revelation; and the perception of the stellar composition of the Milky Way represented the first step in sidereal exploration. Johann Kepler (1571-1630) invented in 1611, and Father Scheiner of Ingolstadt (1575-1650) first employed, the modern refracting telescope; and the farther course of discovery corresponded closely to the development of its powers. Christian Huygens (1629-95) resolved, in 1656, the *anæ* of Saturn into a ring, divided into two by Giovanni Domenico Cassini (1625-1712) in 1675. Titan, the largest of Saturn's moons, was detected by Huygens in 1655, and four additional members of the family by Cassini before 1684. The Andromeda nebula was brought to notice by Simon Marius in 1612, the Orion nebula by J. B. Cysatus, a Swiss Jesuit, in 1618; and some few variable and multiple stars were recognized.

**THEORETICAL ASTRONOMY.**—The theoretical, however, far outweighed the practical achievements of the seventeenth century. Kepler published the first two of his "Three Laws" in 1609, the third in 1619. The import of these great generalizations is: (1) that the planets describe ellipses of which the sun occupies one focus; (2) that the straight line joining each planet with the sun (its *radius vector*) sweeps out equal areas in equal times; (3) that the squares of the planetary periods are severally proportional to the cubes of their mean distances from the sun. The geometrical plan of movement in the solar system was thus laid down with marvellous intuition. But it was reserved for Sir Isaac Newton (1643-1727) to expound its significance by showing that the same uniformly acting force regulates celestial revolutions, and compels heavy bodies to fall towards the earth's surface. The law of gravity, published in 1687 in "*Philosophiæ Naturalis Principia Mathematica*" is to the following effect: every particle of matter attracts every other with a force directly proportional to their masses, and inversely proportional to the squares of their distances apart. Its validity was tested by comparing the amount of the moon's orbital deflection in a second with the rate at which an apple (say) drops in an orchard. Allowance being made for the distance of the moon, the two velocities proved to tally perfectly; and the identity of terrestrial gravity with the force control-

ling the revolutions of the heavenly bodies was definitively established. But this was only a beginning. The colossal work remained to be accomplished of calculating the consequences of the law, in the minute details of its working, and of comparing them with the heavens. It was carried forward, first by Newton himself, and in the ensuing century, by Euler, Clairaut, d'Alembert, Lagrange, and Laplace. Urbain Leverrier (1811-77) inherited from these men of genius a task never likely to be completed; and the intricacies of lunar theory have been shown, by the researches of John Couch Adams (1819-92), of Hansen and Delaunay, of Professors Hill and Newcomb, and many more, to be fraught with issues of unexpected and varied interest.

**DISCOVERIES IN THE SOLAR SYSTEM.**—The extraordinary improvement of reflecting telescopes by Sir William Herschel (1738-1822) opened a fresh epoch of discovery. His recognition of the planet Uranus (13 March, 1781) as a non-stellar object marked the first enlargement of the bounds assigned of old to the solar system; two Uranian moons, Oberon and Titania, were detected by him 11 January, 1787, and the innermost Saturnian pair, Enceladus and Mimas, 28 August and 17 September of the same year. Saturn was, in 1906, known to possess ten satellites. Hyperion was described by W. C. Bond at the observatory of Harvard College 16 September, 1848, and Professor W. H. Pickering, of the same establishment, discovered by laborious photographic researches, Phœbe in 1898, and Themis in 1905. In point of fact, an indefinite number of satellites are agglomerated in the rings of Saturn. Their constitution by separately revolving, small bodies, theoretically demonstrated by J. Clerk Maxwell in 1857, was spectroscopically confirmed by the late Professor Keeler in 1895. The system includes a dusky inner member, detected by Bond, 15 November, 1850. The discovery of the planet Neptune, 23 September, 1846, was a mathematical, not an observational feat. Leverrier and Adams independently divined the existence of a massive body, revolving outside Uranus, and exercising over its movements disturbances the analysis of which led to its capture. Its solitary moon was noted by William Lassell of Liverpool in October, 1846; and he added, in 1851, two inner satellites to the remarkable system of Uranus. With the great Washington refractor, 26 inches in aperture, Professor Asaph Hall discerned, 16 and 17 August, 1877, Deimos and Phobos, the swiftly circling moonlets of Mars; the Lick 36-inch enabled Professor Barnard to perceive, 9 September, 1892, the evasive inner satellite of Jupiter; and two exterior attendants on the same planet were photographically detected by Professor Perrine in 1904-05. The distances of the planets are visibly regulated by a method. They increase by an ordered progression, announced by Titius of Wittenberg in 1772, and since designated as "Bode's Law". But their succession was quickly seen to be interrupted by a huge gap between the orbits of Mars and Jupiter; and the conjecture was hazarded that here a new planet might be found to revolve. It was verified by the discovery of an army of asteroids. Ceres, their leader, was captured at Palermo, 1 January, 1801, by Giuseppe Piazzi, a Theatine monk (1746-1826); Pallas, in 1802 by Olbers (1758-1840), and Juno and Vesta in 1804 and 1807, by Harding and Olbers respectively. The original quartette of minor planets began in 1845 to be reinforced with companions, the known-number of which now approximates to 600, and may be indefinitely increased. Their discovery has been immensely facilitated by Professor Max Wolf's introduction, in 1891, of the photographic method of discriminating them from stars through the effects of their motion on sensitive plates.

The solar system, as at present known, consists of four interior planets, Mercury, Venus, the Earth, and Mars; four exterior, and relatively colossal planets, Jupiter, Saturn, Uranus, and Neptune, the diffuse crowd of pygmy globes called asteroids, or minor planets, and an outlying array of comets with their attendant meteor-systems. All the planets rotate on their axes, though in very different periods. That of Mercury was determined by Signor Schiaparelli of Milan in 1889 to be 88 days, the identical time of his revolution round the sun, and Venus was, in the following year, shown by him to be, in all likelihood, similarly conditioned, the common period of rotation and circulation being, in her case, 225 days. This implies that both planets keep the same hemisphere always turned towards the sun, as the moon does towards the earth; nor can we doubt that the friction of tidal waves was, on the three bodies, the agency by which the observed synchronism was brought about. All the planets travel round the sun from west to east, or counter clockwise, and most of the satellites move in the same direction round their primaries. But there are exceptions. Phœbe, Saturn's remotest moon, circulates oppositely to the other members of the system; the four moons of Uranus are retrograde, their plane of movement being inclined at more than a right angle to the ecliptic; and the satellite of Neptune travels quite definitely backward. These anomalies are of profound import to theories of planetary origin. The "canals" of Mars were recognized by Schiaparelli in August, 1877, and he caught sight of some of them duplicated two years later. Their photographic registration at the Lowell observatory in 1905 proves them to be no optical illusion, but their nature remains enigmatical.

**COMETS AND METEORS.**—The predicted return of Halley's comet in 1759 afforded the first proof that bodies of the kind are permanently attached to the sun. They accompany its march through space, traversing, in either direction indifferently, highly eccentric orbits inclined at all possible angles to the ecliptic. They are accordingly subject to violent, even subversive disturbances from the great planets. Jupiter, in particular, sways the movements of a group of over thirty "captured" comets, which have had their periods curtailed, and their primitive velocities reduced by his influence. Schiaparelli announced in 1866 that the August shooting-stars, or Perseids, pursue the same orbit with a bright comet visible in 1862; and equally striking accordances of movement between three other comets and the Leonid, Lyrid, and Andromede meteor-swarms were soon afterwards established by Leverrier and Weiss. The obvious inference is that meteors are the disintegration-products of their cometary fellow-travellers. A theory of comets' tails, based upon the varying efficacy of electrical repulsion upon chemically different kinds of matter, was announced by Theodor Brédikhine of Moscow in 1882, and gave a satisfactory account of the appearances it was invented to explain. Latterly, however, the authority of Arrhenius of Stockholm has lent vogue to a "light-pressure" hypothesis, according to which, cometary appendages are formed of particles driven from the sun by the mechanical stress of his radiations. But the singular and rapid changes photographically disclosed as taking place in the tails of comets, remain unassociated with any known cause.

**SIDEREAL ASTRONOMY.**—Sir William Herschel's discovery, in 1802, of binary stars, imperfectly anticipated by Father Christian Mayer in 1778, was one of far-reaching scope. It virtually proved the realm of gravity to include sidereal regions; and the relations it intimated have since proved to be much more widely prevalent than could have been imagined

beforehand. Mutually circling stars exist in such profusion as probably to amount to one in three or four of those unaccompanied. They are of limitless variety, some of the systems formed by them being exceedingly close and rapid, while others describe, in millennial periods, vastly extended orbits. Many, too, comprise three or more members; and the multiple stars thus constituted merge, by progressive increments of complexity, into actual clusters, globular and irregular. The latter class is exemplified by the Pleiades and the Hyades, by the Beehive cluster in Cancer, just visible to the naked eye, and by the double cluster in Perseus, which makes a splendid show with an opera-glass. Globular clusters are compressed "balls" of minute stars, of which more than one hundred have been catalogued. The scale on which these marvellous systems are constructed remains conjectural, since their distances from the earth are entirely unknown. Variable stars are met with in the utmost diversity. Some are temporary apparitions, which spring up from invisibility often to an astonishing pitch of splendour, then sink back more slowly to quasi-extinction. Nova Persei, which blazed 22 February, 1901, and was photographically studied by Father Sidgreaves at Stonyhurst, is the most noteworthy recent instance of the phenomenon. Stars, the vicissitudes of which are comprised in cycles of seven to twenty months, or more, are called "long-period variables". About 400 had been recorded down to 1906. They not uncommonly attain, at maximum, to 1,000 times their minimum brightness. Mira, the "wonderful" star in the Whale, discovered by David Fabricius in 1596, is the exemplar of the class. The fluctuations of "short-period variables" take place in a few days or hours, and with far more punctuality. A certain proportion of them are "eclipsing stars" (about 35 have so far been recognized as such), which owe their regularly recurring failures of light to the interposition of large satellites. Algol in Perseus, the variations of which were perceived by Montanari in 1669, is the best-known specimen. Hundreds of rapid variables have been recently detected among the components of globular clusters; but their course of change is of a totally different nature from that of eclipsing stars. Edmund Halley (1656-1742), the second Astronomer Royal, announced in 1718 that the stars, far from being fixed, move onward, each on its own account, across the sky. He arrived at this conclusion by comparing modern with antique observations; and stellar "proper motions" now constitute a wide and expansive field of research. A preliminary attempt to regularize them was made by Herschel's determination, in 1783, of the sun's line of travel. His success depended upon the fact that the apparent displacements of the stars include a common element, transferred by perspective from the solar advance. Their individual, or "peculiar" movements, however, show no certain trace of method. A good many stars, too, have been ascertained to travel at rates probably uncontrollable by the gravitational power of the entire sidereal system. Arcturus, with its portentous velocity of 250 miles a second, is one of these "runaway" stars. The sun's pace of about 12 miles a second, seems, by comparison, extremely sedate; and it is probably only half the average stellar speed. The apex of the sun's way, or the point towards which its movement at present tends, is located by the best recent investigations near the bright star Vega.

**DISTANCES OF THE SUN AND STARS.**—The distances of the heavenly bodies can only be determined (speaking generally) by measuring their parallaxes, in other words, their apparent changes of position when seen from different points of view. That of the sun is simply the angle subtended at his distance

by the earth's semi-diameter. Efforts were made with indifferent success to fix its value by the aid of the transits of Venus in the eighteenth and nineteenth centuries. The asteroids have proved more efficient auxiliaries; and through the mediation of Iris, Sappho, and Victoria, in 1888-89, Sir David Gill assigned to the great unit of space a length of 92,800,000 miles, which the photographic measures of Eros, in 1900-01, bid fair to ratify. The stars, however, are so vastly remote that the only chance of detecting their perspective displacements is by observing them at intervals of six months, from opposite extremities of a base-line nearly 186,000 miles in extent. Thus, the annual parallax of a star means the angle under which the semi-diameter of the earth's orbit would be seen if viewed from its situation. This angle is in all cases, extremely minute, and in most cases, altogether evanescent; so that, from only about eighty stars (as at present known), the terrestrial orbit would appear to have sensible dimensions. Our nearest stellar neighbour is the splendid southern binary,  $\alpha$  Centauri; yet its distance is such that light needs four and one-third years to perform the journey thence. Thomas Henderson (1798-1844) announced his detection of its parallax in 1839, just after Bessel of Königsberg (1784-1846) had obtained a similar, but smaller result for an insignificant double star designated 61 Cygni.

**CELESTIAL PHOTOGRAPHY.**—The second half of the nineteenth century was signalized by a revolutionary change in the methods and purposes of astronomy. Experiments in lunar photography, begun in 1840 by J. W. Draper of New York, were continued in the fifties by W. C. Bond, Warren de la Rue, and Lewis M. Rutherford. The first daguerreotype of the sun was secured at Paris in 1845, and traces of the solar corona appeared on a sensitized plate exposed at Königsberg during the total eclipse of 28 July, 1851. But the epoch of effective solar photography opened with the Spanish eclipse of 18 July, 1860, when the pictures successively obtained by Father Angelo Secchi, S.J., and Warren de la Rue demonstrated the solar status of the crimson protuberances by rendering manifest the advance of the moon in front of them. At subsequent eclipses, the leading task of the camera has been the portrayal of the corona; and its importance was enhanced when A. C. Raney pointed out, in 1879, the correspondence of changes in its form with the alternations of solar disturbance. The eleven-year periodicity of sunspots was published in 1851 by Schwabe of Dessau; and among the numerous associated phenomena of change, none are better ascertained than those affecting the shape of the silvery aureola seen to encompass the sun when the moon cuts off the glare of direct sunlight. At spot maxima the aureola spreads its beamy radiance round the disc. But at times of minimum, it consists mainly of two great wings, extended in the sun's equatorial plane. A multitude of photographs, taken during the eclipses of 1898, 1900, 1901, and 1905, attest with certainty the punctual recurrence of these unexplained vicissitudes. The fundamental condition for the progress of sidereal photography is the use of long exposures; since most of the objects to be delineated emit light so feebly that its chemical effects must accumulate before they become sensible. But long exposures were impracticable until Sir William Huggins, in 1876, adopted the dry-plate process; and this date, accordingly, marks the beginning of the wide-spreading serviceableness of the camera to astronomy. In nebular investigations above all, it far outranges the telescope. Halley described in 1716 six nebulae, which he held to be composed of a lucid medium collected from space. The Abbé Lacaille (1713-62) brought back with him from the Cape, in 1754, a list

of forty-two such objects; and Charles Messier (1730-1817) enumerated, in 1781, 103 nebulae and clusters. But this harvest was scanty indeed compared with the lavish yield of Herschel's explorations. Between 1786 and 1802 he communicated to the Royal Society catalogues of 2,500 nebulae; he distinguished their special forms, classified them in order of brightness, and elaborated a theory of stellar development from nebulae, illustrated by selected instances of progressive condensation. The next considerable step towards a closer acquaintance with nebulae was made by Lord Rosse in 1845, when the prodigious light-grasp of his six-foot reflector afforded him the discovery of the great "Whirlpool" structure in Canes Venatici. It proved to be typical of the entire class of spiral nebulae, the large prevalence of which has been one of the revelations of photography. The superiority in nebula-portraiture of the chemical to the eye-and-hand method was strikingly manifested in a photograph of the Orion nebula taken by Dr. A. A. Common, 30 January, 1883. Its efficacy for discovery became evident through the disclosure, on plates exposed by Paul and Prosper Henry, and by Isaac Roberts in 1885-86, of complex nebulous formations in the Pleiades, almost wholly invisible optically. Professor Keeler (1857-1900) estimated at 120,000 the number of nebulae which the Crossley reflector of the Lick observatory would be capable of recording in both hemispheres with an hour's exposure, while telescopically constructed catalogues include less than 10,000. But it is through the combination of photography with spectroscopy, constituting the spectrographic mode of research, that astrophysics has achieved its most signal triumphs.

**ASTROPHYSICS.**—The fundamental principle of spectrum analysis, enunciated by Gustav Kirchhoff (1824-87) in 1859, depends upon the equivalence of emission and absorption. This means that, if white light be transmitted through glowing vapours, they arrest just those minute sections of it with which they themselves shine. And if the source of the white light be hotter than the arresting vapour, there results a prismatic spectrum, interrupted by dark lines, distinctive of the chemical nature of the substance originating them. Now this is exactly the case of the sun and stars. The white radiance emanating from their photospheres is found, when dispersed into a spectrum, to be crossed by numerous dusky rays indicating absorption by gaseous strata, to the composition of which Kirchhoff's principle supplies the clue. Kirchhoff himself identified in 1861, as prominent solar constituents, sodium, iron, magnesium, calcium, and chromium; hydrogen was recognized by A. J. Angström (1814-74); helium by Sir Norman Lockyer in 1868; and about forty elementary substances are now known with approximate certainty to be common to the earth and sun. The chemistry of the stars is strictly analogous to that of the sun, although their spectra exhibit diversities symptomatic of a considerable variety in physical state. Father Angelo Secchi, S.J. (1818-78), based on these diversities in 1863-67 a classification of the stars into four orders, still regarded as fundamental, and supplied by Dr. Vogel in 1874 with an evolutionary interpretation, according to which, differences of spectral type are associated with various stages of progress from a tenuous and inchoate towards a compact condition. Since 1879, when Sir William Huggins secured impressions of an extended range of ultra-violet white star light, stellar spectra have been mostly studied photographically, the results being, not only precise and permanent, but also more complete than those obtainable by visual means. The same eminent investigator discovered, in 1864, the bright-line spectra of certain classes of nebulae, by which they were known

to be of gaseous composition, and recognized, as of carbonaceous origin, the typical coloured bands of the cometary spectrum, noted four years previously, though without specific identification, by G. B. Donati (1827-73) at Florence.

Doppler's principle, by which light alters in refrangibility through the end-on motion of its source, was first made effective for astronomical research by Huggins in 1868. The criterion of velocity, whether of recession or approach, is afforded by the shifting of spectral lines from their standard places; and the method was raised to a high grade of accuracy through Dr. Vogel's adaptation, in 1888, of photography to its requirements. It has since proved extraordinarily fruitful. Its employment enabled Dr. Vogel to demonstrate the reality of Algol's eclipses, by showing that the star revolved round an obscure companion in the identical period of light-change; and the first discoveries of non-eclipsing spectroscopic binaries were made at Harvard College in 1889. These interesting systems cannot be sharply distinguished from telescopic double stars, which are, indeed, believed to have developed from them under the influence of tidal friction; their periods vary from a few hours to several months; and their components are often of such unequal luminosity that only one leaves any legible impression on the sensitive plate. Their known number amounted, in 1905, to 140; and it may be indefinitely augmented. It probably includes all short-period variables, even those that escape eclipses; though the connection between their duplicity and luminous variations remains unexplained. The photography in daylight of solar prominences was attempted by Professor Young of Princeton in 1870, and the subject was prosecuted by Dr. Braun, S.J., in 1872. No genuine success was, however, achieved until 1891, when Professor Hale of Chicago and M. Deslandres at Paris independently built up pictures of those objects out of the calcium-ray in their dispersed light, sifted through a double slit on to moving photographic plates. Professor Hale's invention of the "spectroheliograph" enables him, moreover, to delineate the sun's disc in any selected quality of its light, with the result of disclosing vast masses of calcium and hydrogen *floculi*, piled up at various heights above the solar surface.

**SIDEREAL CONSTRUCTION.**—The investigation of the structure of the sidereal heavens was the leading object of William Herschel's career. The magnitude of the task, however, which he attempted single-handed grows more apparent with every fresh attempt to grapple with it; and it now engages the combined efforts of many astronomers, using methods refined and comprehensive to a degree unimagined by Herschel. An immense stock of materials for the purpose will be provided by the international photographic survey, at present advancing towards completion at eighteen observatories in both hemispheres. About thirty million stars will, it is estimated, appear on the chart-plates; and those precisely catalogued are unlikely to fall short of four millions. The labour of discussing these multitudinous data must be severe, but will be animated by the hope of laying bare some hidden springs of the sidereal mechanism. The prospect is indeed remote that the whole of its intricacies will ever be penetrated by science. We only perceive that the stars form a collection of prodigious, but limited, extent, showing strongly concentrative tendencies towards the plane of the Milky Way. Nor can the nebulae be supposed to form a separate scheme. The closeness of their relations, physical and geometrical, with stars excludes that supposition. Stars and nebulae belong to the same system, if such the sidereal world may properly be called in the absence of any

sufficient evidence of its being in a state of dynamical equilibrium. We cannot be sure that it has yet reached the definitive term appointed for it by its Creator. Suggestive hints, on the contrary, of instability and evanescence help us to realize that the heavens are, in very truth, the changing vesture of Him whose "years cannot fail."

AGNES M. CLERKE.

**ASTRONOMY IN THE BIBLE.**—No systematic observations of the heavenly bodies were made by the Jews. Astral worship was rife in Palestine, and they could hardly have attended closely to its objects without yielding to its seductions. Astronomy was, under these circumstances, inseparable from astrology, and the anathemas of the prophets were not carelessly uttered. As the most glorious works of the Almighty, the celestial luminaries were indeed celebrated in the Scriptures in passages thrilling with rapture; but the appeal to them for practical purposes was reduced to a minimum. Even the regulation of times and seasons was largely empirical. The Jews used a lunar year. It began, for religious purposes, with the new moon next after the spring equinox, and consisted normally of twelve months, or 354 days. The Jewish calendar, however, depended upon the course of the sun, since the festivals it appointed were in part agricultural celebrations. Some process of adjustment had then to be resorted to, and the obvious one was chosen of adding a thirteenth, or intercalary, month whenever the discrepancy between the ripening of the crops and the fixed dates of the commemorative feasts became glaringly apparent. Before the time of Solomon, the Jews appear to have begun their year in the autumn; and the custom, revived for civil purposes about the fifth century B. C., was adopted in the systematized religious calendar of the fourth century of our era.

Both the ritual and the civil day commenced in the evening, about half an hour after sunset. Its subdivisions were left indeterminate. The Old Testament makes no mention of what we call hours; and it refers to the measurement of time, if at all, only in the narrative of the miracle wrought by Isaiah in connection with the sundial of Achaz (IV Kings, xx, 9-11). In the New Testament, the Roman practice of counting four night-watches has superseded the antique triple division, and the day, as among the Greeks, consists of twelve equal parts. These are the "temporary hours" which still survive in the liturgy of the Church. Since they spanned the interval from sunrise to sunset, their length varied with the season of the year, from 49 to 71 minutes. Corresponding nocturnal hours, too, seem to have been partially used in the time of the Apostles (Acts, xxiii, 23).

As might have been expected, the Sacred Books convey no theory of celestial appearances. The descriptive phrases used in them are conformed to the elementary ideas naturally presenting themselves

to a primitive people. Thus, the earth figures as an indefinitely extended circular disk, lying between the realm of light above and the abyss of darkness beneath. The word *firmamentum*, by which the Hebrew *rakia* (רָקִיעַ) is translated in the Vulgate, expressed the notion of a solid, transparent vault, dividing the "upper waters" from the seas, springs, and rivers far below. Through the agency of the flood-gates, however, the waters sustained by the firmament were, in due measure, distributed over the earth. The first visibility after sunset of the crescent moon determined the beginning of each month; and this was the only appeal to the skies made for the purposes of the Jewish ritual. Eclipses of the sun and moon are perhaps vaguely referred to among the signs of doom enumerated by the Prophets Joel and Amos, who may easily have enhanced their imagery from personal experience, since modern calculations show solar totalities to have been visible in Palestine in the years 831, 824, and 763 B. C., and the moon reddened by immersion in the earth's shadow is not an uncommon sight in any part of the world. But the passages in question cannot be literally associated with mere passing phenomena. The prophets aimed at something higher than intimidation. An express warning against ignoble panic was indeed uttered by Jeremiah in the words: "Be not afraid of the signs of heaven, which the heathens fear" (x, 2). The stellar vault, conceived to be situated above the firmament, is compared by Isaiah to a tent stretched out by the Most High. The "host of heaven", a frequently recurring Scriptural expression, has both a general and a specific meaning. It designates, in some passages, the entire array of stars; in others it particularly applies to the sun, moon, planets, and certain selected stars, the worship of which was introduced from Babylonia under the later kings of Israel. Venus and Saturn are the only planets expressly mentioned in the Old Testament. Isaiah (xiv, 12) apostrophizes the Babylonian Empire under the unmistakable type of *Helal* (Lucifer in the Vulgate), "son of the morning"; and Saturn is no less certainly represented by the star *Kaiwan*, adored by the reprobate Israelites in the desert (Amos, v, 26). The same word (interpreted to mean "steadfast") frequently designates, in the Babylonian inscriptions, the slowest-moving planet; while *Sakkuth*, the divinity associated with the star by the prophet, is an alternative appellation for *Ninib*, who, as a Babylonian planet-god, was merged with Saturn. The ancient Syrians and Arabs, too, called Saturn *Kaiwan*, the corresponding term in the Zoroastrian *Bundahish* being *Kewan*. The other planets are individualized in the Bible only by implication. The worship of gods connected with them is denounced, but without any manifest intention of referring to the heavenly bodies. Thus, *Gad* and *Meni* (Isaiah, lrv, 11) are, no doubt, the "greater and the lesser Fortune" typified throughout the East by Jupiter and Venus; *Neba*, the tutelary deity of Borsippa (Isaiah, xlii, 1), shone in the sky as Mercury, and *Nergal*, transplanted from Assyria to Kutha (IV Kings, xvii, 30), as Mars.

The uranography of the Jews is fraught with perplexity. Some half-dozen star-groups are named in the Scriptures, but authorities differ widely as to their identity. In a striking passage the Prophet Amos (v, 8) glorifies the Creator as "Him that made *Kimah* and *Kesil*", rendered in the Vulgate as Arcturus and Orion. Now *Kimah* certainly does not mean Arcturus. The word, which occurs twice in the Book of Job (ix, 9; xxxviii, 31), is treated in the Septuagint version as equivalent to Pleiades. This, also, is the meaning given to it in the Talmud and throughout Syrian literature; it is supported by etymological evidences, the Hebrew term being ob-

viously related to the Arabic root *kum* (accumulate), and to the Assyrian *kamu* (to bind); while the "chains of *Kimah*", referred to in the sacred text, not inaptly figure the coercive power imparting unity to a multiple object. The associated constellation *Kesil* is doubtless no other than our Orion. Yet, in the first of the passages in Job where it figures, the Septuagint gives *Herper*; in the second, the Vulgate quite irrelevantly inserts Arcturus; Karstens Niebuhr (1733-1815) understood *Kesil* to mean Sirius; Thomas Hyde (1636-1703) held that it indicated Canopus. Now *kesil* signifies in Hebrew "foolish", or "impious", adjectives expressive of the stupid criminality which belongs to the legendary character of giants; and the stars of Orion irresistibly suggest a huge figure striding across the sky. The Arabs accordingly named the constellation *Al-gebbār*, "the giant", the Syriac equivalent being *Gabbara*, "a strong man"; and *Kesil* is actually translated *Gabbara* in the old Syriac version of the Bible known as the *Peshitta*. We may then safely admit that *Kimah* and *Kesil* did actually designate the Pleiades and Orion. But further interpretations are considerably more obscure. In the Book of Job—the most distinctively astronomical part of the Bible—mention is made, with other stars, of *Ash* and *Ayish*, almost certainly divergent forms of the same word. Its signification remains an enigma. The Vulgate and Septuagint inconsistently render it "Arcturus" and "Hesperus". Abenezra (1092-1167), however, the learned Rabbi of Toledo, gave such strong reasons for holding *Ash*, or *Ayish*, to mean the Great Bear, that the opinion, though probably erroneous, is still prevalent. It was chiefly grounded on the phonetic resemblance between *ash* and the Arabic *na'ash*, "a bier", applied to the four stars of the Wain, the three in front figuring as mourners, under the title of *Bend na'ash*, "daughters of the bier". But Job, too, speaks of the "children of *Ayish*", and the inference seems irresistible that the same star-group was similarly referred to in both cases. Yet there is large room for doubt. Modern philologists do not admit the alleged connection of *Ayish* with *na'ash*, nor is any funeral association apparent in the Book of Job. On the other hand, Professor Schiaparelli draws attention to the fact that *ash* denotes "moth" in the Old Testament, and that the folded wings of the insect are closely imitated in their triangular shape by the doubly aligned stars of the Hyades. Now *Ayish* in the *Peshitta* is translated *Iyutha*, a constellation mentioned by St. Ephrem and other Syriac writers, and Schiaparelli's learned consideration of the various indications afforded by Arabic and Syriac literature makes it reasonably certain that *Iyutha* authentically signifies Aldebaran, the great red star in the head of the Bull, with its children, the rainy Hyades. It is true that Hyde, Ewald, and other scholars have adopted Capella and the Kids as representative of *Iyutha*, and therefore of "Ayish and her children"; but the view involves many incongruities. The glories of the sky adverted to in the Book of Job include a sidereal landscape vaguely described as "the chambers [i. e. *penetralia*] of the south". The phrase, according to Schiaparelli, refers to some assemblage of brilliant stars, rising 20 degrees at most above the southern horizon in Palestine about the year 750 B. C. (assumed as the date of the Patriarch Job), and, taking account of the changes due to precession, he points out that the stellar pageant formed by the Ship, the Cross, and the Centaur meets the required conditions. Sirius, although at the date in question it culminated at an altitude of 41 degrees, may possibly have been thought of as belonging to the "chambers of the south"; otherwise, this splendid object would appear to be ignored in the Bible. Job opposes to the "chambers of the south", as the source of cold, an

asterism named Mezarim (xxxvii, 9). Both the Vulgate and the Septuagint render this word by *Arcturus*, evidently in mistake (the blunder is not uncommon) for *Arctos*. The Great Bear circled in those days much more closely round the pole than it now does; its typical northern character survives in the Latin word *septentrio* (from *septem triones*, the seven stars of the Wain); and Schiaparelli concludes, from the dual form of *mezarim*, that the Jews, like the Phœnicians, were acquainted with the Little, as well as with the Great, Bear. He identifies the word as the plural, or dual, of *mizreh*, "a winnowing-fan", an instrument figured by the seven stars of the Wain, quite as accurately as the Ladle of the Chinese or the Dipper of popular American parlance.

Perhaps the most baffling riddle in Biblical star-nomenclature is that presented by the word *Mazzaroth*, or *Mazzaloth* (Job, xxxviii, 31, 32; IV Kings, xxiii, 5), usually, though not unanimously, admitted to be phonetic variants. As to their signification, opinions are hopelessly divergent. The authors of the Septuagint transcribed, without translating, the ambiguous expression; the Vulgate gives for its equivalent Lucifer in Job, the Signs of the Zodiac in the Book of Kings. St. John Chrysostom adopted the latter meaning, noting, however, that many of his contemporaries interpreted *Mazzaroth* as Sirius. But this idea soon lost vogue, while the zodiacal explanation gained wide currency. It is, indeed, at first sight, extremely plausible. Long before the Exodus the Twelve Signs were established in Euphratean regions much as we know them now. Although never worshipped in a primary sense, they may well have been held sacred as the abodes of deities. The Assyrian *manzaltu* (sometimes written *manzazu*), "station", occurs in the Babylonian Creation tablets with the import "mansions of the gods"; and the word appears to be etymologically akin to *Mazzaloth*, which in rabbinical Hebrew signifies primarily the Signs of the Zodiac, secondarily the planets. The lunar Zodiac, too, suggests itself in this connection. The twenty-eight "mansions of the moon" (*menazil al-kamar*) were the leading feature of Arabic sky-lore, and they subserved astrological purposes among many Oriental peoples. They might, accordingly, have belonged to the apparatus of superstition used by the soothsayers who were extirpated in Judah, together with the worship of the *Mazzaroth*, by King Josias, about 621 B. C. Yet no such explanation can be made to fit in with the form of expression met with in the Book of Job (xxxviii, 32). Speaking in the person of the Almighty, the Patriarch asks, "Canst thou bring forth *Mazzaroth* in its time?"—clearly in allusion to a periodical phenomenon, such as the brilliant visibility of Lucifer, or Hesperus. Professor Schiaparelli then recurs to the Vulgate rendering of this passage. He recognizes in *Mazzaroth* the planet Venus in her double aspect of morning and evening star, pointing out that the luminary designated in the Book of Kings, with the sun and moon, and the "host of heaven", must evidently be next in brightness to the chief light-givers. Further, the sun, moon, and Venus constitute the great astronomical triad of Babylonia, the sculptured representations of which frequently include the "host of heaven" typified by a crowd of fantastic animal-divinities. And since the astral worship anathematized by the prophets of Israel was unquestionably of Euphratean origin, the designation of *Mazzaroth* as the third member of the Babylonian triad is a valuable link in the evidence. Still, the case remains one of extreme difficulty. Notwithstanding the scepticism of recent commentators, it appears fairly certain that the "fugitive serpent" of Job, xxvi, 13 (*coluber tortuosus* in the Vulgate) does really stand for the circumpolar reptile. The Euphratean con-

stellation Draco is of hoary antiquity, and would quite probably have been familiar to Job. On the other hand, *Rahab* (Job, ix, 13; xxvi, 12), translated "whale" in the Septuagint, is probably of legendary or symbolical import.

The subjoined list gives (largely on Schiaparelli's authority) the best-warranted interpretations of biblical star-names: *Kimah*, the Pleiades; *Kesil*, Orion; *Ash*, or *Ayish*, the Hyades; *Mezarim*, the Bears (Great and Little); *Mazzaroth*, Venus (Lucifer and Hesperus); *Hadre theman*—"the chambers of the south"—Canopus, the Southern Cross, and a Centaur; *Nachash*, Draco.

The New Testament is virtually devoid of astronomical allusions. The "Star of the Magi" can scarcely be regarded as an objective phenomenon; it was, at least, inconspicuous to ordinary notice. Kepler, however, advanced, in 1606, the hypothesis that a remarkable conjunction of Jupiter and Saturn, which occurred in May of the year 7 B. C., was the celestial sign followed by the Wise Men. Revived in 1821 by Dr. Münter, the Lutheran Bishop of Zealand, this opinion was strongly advocated in 1826 by C. L. Ideler (*Handbuch der Chronologie*, II, 399). But the late Dr. Pritchard's investigation (Smith's Dict. of the Bible, *Memoirs Roy. Astr. Society*, XXV, 119) demonstrated its inadequacy to fulfil the requirements of the Gospel narrative.

AGNES M. CLERKE.

**Astros**, PAUL-THÉRÈSE-DAVID D', a French cardinal, b. at Tourves (Var) in 1772; d. 29 September, 1851. He was a nephew of Portalis, a minister of Napoleon, and as such was engaged in the formulation of the Concordat of 1801. On its conclusion he was made vicar general of Archbishop (later, Cardinal) Belloy, of Paris, and after the latter's death (1808) administered the diocese until the nomination of Cardinal Maury. He received, and was accused of promulgating, the bull of Pius VII (10 June, 1809), excommunicating Napoleon. For this act he was imprisoned at Vincennes until 1814. After the Restoration he became Bishop of Bayonne, and in 1830 Archbishop of Toulouse. At the request of Louis Napoleon, Pius IX created him cardinal, in 1850. He wrote "*La vérité catholique démontrée; ou, Lettre aux Protestants d'Orthez*" (2 v. 8°, Toulouse, 1833). He was one of the earliest opponents of Lamennais, against whom he wrote "*Censure de divers écrits de La Mennais et de ses disciples par plusieurs évêques de France, et Lettres des mêmes évêques au souverain pontife, Grégoire XVI*", etc. (Toulouse, 1835).

THOMAS J. SHAHAN.

**Astruc**, JEAN, b. at Sauves, 19 March, 1684; d. at Paris, 5 May, 1766. He was the son of a converted Protestant minister. After he had taught medicine at Montpellier, he became a member of the Medical Faculty at Paris. His medical writings, however numerous, are now forgotten, but a work published by him anonymously has secured for him a permanent reputation. This book was entitled: "*Conjectures sur les mémoires originaux dont il paroît que Moïse s'est servi pour composer le livre de la Genèse. Avec des remarques qui appuient ou qui éclaircissent ses conjectures*" (Brussels).

Astruc himself did not intend to deny the Mosaic authorship of Genesis; but his work created an era in Biblical inquiry, occasioning the modern critical theories.

**Atahualpa**, properly ATAU-HUALPA (etymology usually given as from *hualpa*, the name of some indigenous bird), son of the Inca war chief Huayna Capac and an Indian woman from Quito hence (descent being in the female line) not an Inca, but an Indian of Ecuador. The protracted wars, during which the Incas overpowered the Ecuadorian tribes, having brought about the permanent lodgment of Inca war parties in Ecuador, led to intermarriages with women of that country, and the formation of a new tribe composed of Inca men with women and children from Quito. Collisions ensued between this tribe and the descendants of Inca women, and in the strife, Atau-hualpa figured as the leader of the former, whilst the latter recognized Huascar, duly elected war chief at Cuzco. Atau-hualpa acted with great cruelty, nearly exterminating such Ecuadorian tribes as resisted. He finally prevailed, and sent his warriors southward along the backbone of the mountains, against Cuzco. When Pizarro landed at Tumbes (northern Peruvian coast) in 1532, the Quito people had already overthrown the Inca tribe at Cuzco, taken the settlement, and committed the most horrible cruelties, chiefly against the keepers of ancient traditions whom they attempted to exterminate, so as to wipe out the remembrance of the past of Cuzco and begin a new era. Atau-hualpa himself remained with a numerous war party at Caxamarca. There he awaited the whites, whom he despised. The Spaniards found Caxamarca deserted, and the warriors of Atau-hualpa camping three miles from the place. Pizarro recognized that a trap had been set for him, and prepared for the worst.

On the evening of the 16th of November, 1532, Atau-hualpa entered the square of Caxamarca with a great retinue of men carrying their weapons concealed. They packed the court densely. Pizarro had placed on the roof of the building his artillery (two *pedereros*) that could not be pointed except horizontally. When the Indians thronged into the square, a Dominican friar, Fray Vicente Valverde, was sent by Pizarro to inform Atau-hualpa, through an interpreter, of the motives of the Spaniards' appearance in the country. This embassy was received with scorn, and the friar, seeing the Indians ready to begin hostilities, warned Pizarro. His action has been unjustly criticised; Valverde did what was his imperative duty under the circumstances. Then, not waiting for the Indians to attack, the Spaniards took the offensive. The sound of cannon and musketry, and the sight of the horses frightened the Indians so that they fled in dismay, leaving Atau-hualpa a prisoner in the hands of Pizarro, who treated him with proper regard. The stories of a terrible slaughter of the Indians are inordinate exaggerations. While a prisoner, Atau-hualpa caused the greater portion of the gold and silver at Cuzco to be turned over to the Spaniards, at the same time he had Huascar murdered, and laid plans for surprising the Spaniards and having them massacred. When this was discovered Pizarro had him executed, on the 29th of August, 1533. The execution was not unjustifiable. Atau-hualpa, at the time of his death, was about thirty years of age.

Modern works, like those of PRESCOTT, ROBERTSON, HELPS, MARKHAM, and others, are mostly inspired by bitter prejudices against the Catholic Church and Spain, and written without adequate knowledge of the sources, of Indian character, and of the localities. But the reports of eyewitnesses deserve particular attention. See especially FRANCISCO DE XEREZ, *Verdadera Relación de la Conquista del Perú* (1534), of which there is a good English translation by MARKHAM in *Publications of the Hackluyt Society*; ANON., *La Conquista del Perú llamada la nueva Castilla* (Seville, April, 1534); PEDRO SANCHO *Relacione per sua Maesta*, (14 July, 1534), RAMUSIO, III, 1566; HERNANDO PIZARRO, *Carta á la Audiencia de Santo Domingo*, in OVIEDO, *Historia natural y general de las Indias*; PEDRO PIZARRO, *Relación del Descubrimiento y Conquista del Perú*, published in vol. V of the *Doc. para la Historia de España*; CRISTÓBAL MOLINA, *Conquista y Población del Perú*; ANON. MS., *Relación del Primer Descubrimiento de la Costa y Mar del Sur*. On the events at Cuzco preceding the arrival of the Spaniards, *Discurso sobre la Descendencia y Gobierno de los Incas* (1542), published in 1892 by JIMÉNEZ DE LA ESPADA under the title of *Una Antigualla Peruana*. Later authorities, like CIEZA, GARCILASO DE LA VEGA, GUTIÉRREZ DE SANTA CLARA, and others, have not the merit of the above-mentioned eyewitnesses, although indispensable for the study of the subject.

AD. F. BANDELIER.

**Atahualpa**, JUAN SANTOS, an Indian from Cuzco who, being in the service of a Jesuit, went to Spain with his master. Upon his return, having committed a murder at Guamanga (Ayacucho in Peru), he fled to the forests on the eastern slopes of the Andes. There, in 1742, he persuaded the Indians that he was a descendant of the Inca head-chiefs and assumed the title of "Atahualpa Apu-Inca". He claimed to have been sent by God to drive the Spaniards from western South America. As he was able to read and write Latin, as well as Spanish, he readily made the forest tribes believe him to be a powerful wizard and induced them to follow him, abandoning the towns which the Franciscans had established successfully at Ocopa and further east. To his influence was due the ruin of the prosperous missions throughout the Pampa del Sacramento in eastern Peru. Under his direction the forest tribes became very aggressive, and the missions were partly destroyed. Efforts against him proved a failure, owing partly to the natural obstacles presented by the impenetrable forests, partly to the inefficiency of the officers to whom the suppression of his revolt was entrusted. The uprising caused by his appeal to Indian superstition, was the severest blow dealt to the Christianization of the forest Indians in Peru, and it took decades of sacrifice and toil to recover the territory lost. To this day, according to reliable testimony, the Indians included under the generic name of Chunchos (properly Campas) claim to preserve the corpse of Santos Atahualpa, hidden from the whites, in a wooden, or willow, casket, as their most precious fetish.

**Atavism** [Lat., *atavus*, a great-grandfather's grandfather, an ancestor].—Duchesne introduced the word to designate those cases in which species revert spontaneously to what are presumably long-lost characters. Atavism and reversion are used by most authors in the same sense.

I. The term *atavism* is employed to express the reappearance of characters, physical or psychical, in the individual, or in the race, which are supposed to have been possessed at one time by remote ancestors. Very often these suddenly reappearing characters are of the monstrous type, e. g. the three-toed horse. The appearance of such a monster is looked upon as a harking back to Tertiary times, when the ancestor of the modern horse possessed three toes. The three-toed condition of the monstrous horse is spoken of as atavistic. The employment of the term in connection with teratology is often abused; for many cases of so-called atavistic monstrosities have little

do with lost characters, e. g. the possession by man of supernumerary fingers and toes.

II. Atavism is also used to express the tendency to revert to one of the parent varieties or species in the case of a hybrid; this is the atavism of breeders. Crossed breeds of sheep, for example, show a constant tendency to reversion to either one of the original breeds from which the cross was formed. De Vries distinguishes this kind of atavism as *vicinism* (Lat. *vicinus*, neighbour), and says that it "indicates the sporting of a variety under the influence of others in the vicinity."

III. Atavism is employed by a certain school of evolutionistic psychologists to express traits in the individual, especially the child, that are assumed to be, as it were, reminiscences of past conditions of the human race or its progenitors. A child by its untruthfulness simply gives expression to a state that long since was normal to mankind. Also in the child's fondness for splashing about in water is exhibited a recrudescence of a habit that was quite natural to its aquatic ancestors; this latter is called water-atavism. Many such atavisms are distinguished, but it hardly needs to be said that they are in many instances highly fantastic. Atavism is commonly supposed to be a proof of the evolution of plants and animals, including man. Characters that were normal to some remote ancestor, after having been latent for thousands of generations suddenly reappear, and thus give a clue to those sources to which the present living forms are to be traced back. That a character may lie dormant for several generations and then reappear, admits of no doubt; even ordinary observation tells us that a grandchild may resemble its grandparent more than either of its immediate parents. But the sudden appearance of a tailed man, for instance, cannot be said to prove the descent of man from tailed forms. Granting that man has really descended from such ancestors, the phenomenon is more intelligible than it would be were no such connexion admitted. But the proving force of atavism is not direct, because teratological phenomena are so difficult to interpret, and admit of several explanations. Darwin, pointing to the large canine teeth possessed by some men as a case of atavism, remarks: "He who rejects with scorn the belief that the shape of his own canines, and their occasional great development in other men, are due to our early forefathers having been provided with these formidable weapons, will probably reveal, by sneering, the line of his own descent".

Atavism is appealed to by modern criminologists to explain certain moral aberrations, that are looked upon as having been at one time normal to the race. Accepting the doctrine that man has, by slow progress, come up to his present civilized state from brute conditions, all that is brutish in the conduct of criminals (also of the insane), is explained by atavism. According to this theory degeneracy is a case of atavism. The explanation offered for the sudden reappearance of remote ancestral characters is so intimately connected with the whole question of heredity that it is impossible to do more than indicate that most writers on heredity seek this explanation in the transmission from generation to generation of unmodified heredity-bearing parts, gemmules (Darwin); pangenes (De Vries); determinants (Weismann). (See HEREDITY.)

JOS. C. HERRICK.

**ATHABASCA, VICARIATE APOSTOLIC OF** (North-west Territories).—Suffragan of Saint Boniface; erected

8 April, 1862, by Pius IX. Bounded on the north by the Vicariate of Mackenzie; on the east and south-east by the Vicariate of Saskatchewan; on the south by 55° N. lat.; on the west by the Rocky Mountains. The first vicar Apostolic was Bishop Henri Faraud, O.M.I., b. at Gigondas, France, 17 March, 1828; d. at Saint Boniface, 26 Sept., 1890; ordained priest at Saint Boniface, 8 March, 1847; elected 8 May, 1862; consecrated at Tours, France, 30 Nov., 1864, titular Bishop of Anamur. He was succeeded by Bishop Emile Grouard, O.M.I., titular Bishop of Ibora; b. at Brulon, Mans, 2 Feb., 1840; ordained priest at Boucherville, 3 May, 1862, elected Bishop of Ibora, 18 Oct., 1890; consecrated at Saint Boniface, 1 Aug., 1891, and appointed vicar Apostolic. The Oblates of Mary Immaculate serve all the missions of Athabasca. There are 11 stations, 23 priests, 28 Secours de la Providence, 6 Secours Grises. Catholics, about 5,000. (See SAINT BONIFACE.)

JOHN J. A'BECKET.

**Athanasian Creed, THE**, one of the symbols of the Faith approved by the Church and given a place in her liturgy, is a short, clear exposition of the doctrines of the Trinity and the Incarnation, with a passing reference to several other dogmas. Unlike most of the other creeds, or symbols, it deals almost exclusively with these two fundamental truths, which it states and restates in terse and varied forms so as to bring out unmistakably the trinity of Persons in God, and the twofold nature in the one Divine Person of Jesus Christ. At various points the author calls attention to the penalty incurred by those who refuse to accept any of the articles therein set down. The following is the Marquess of Bute's English translation of the text of the Creed:—

Whosoever will be saved, before all things it is necessary that he hold the Catholic Faith. Which Faith except everyone do keep whole and undefiled, without doubt he shall perish everlastingly. And the Catholic Faith is this, that we worship one God in Trinity and Trinity in Unity. Neither confounding the Persons, nor dividing the Substance. For there is one Person of the Father, another of the Son, and another of the Holy Ghost. But the Godhead of the Father, of the Son and of the Holy Ghost is all One, the Glory Equal, the Majesty Co-Eternal. Such as the Father is, such is the Son, and such is the Holy Ghost. The Father Uncreate, the Son Uncreate, and the Holy Ghost Uncreate. The Father Incomprehensible, the Son Incomprehensible, and the Holy Ghost Incomprehensible. The Father Eternal, the Son Eternal, and the Holy Ghost Eternal and yet they are not Three Eternals but One Eternal. As also there are not Three Uncreated, nor Three Incomprehensibles, but One Uncreated, and One Incomprehensible. So likewise the Father is Almighty, the Son Almighty, and the Holy Ghost Almighty. And yet they are not Three Almighties but One Almighty.

So the Father is God, the Son is God, and the Holy Ghost is God. And yet they are not Three Gods, but One God. So likewise the Father is Lord, the Son Lord, and the Holy Ghost Lord. And yet not Three Lords but One Lord. For, like as we are compelled by the Christian verity to acknowledge every Person by Himself to be God and Lord, so are we forbidden by the Catholic Religion to say, there be Three Gods or Three Lords. The Father is made of none, neither created, nor begotten. The Son is of the Father alone; not made, nor created, but begotten. The Holy Ghost is of the Father, and of the Son.

neither made, nor created, nor begotten, but proceeding.

So there is One Father, not Three Fathers; one Son, not Three Sons; One Holy Ghost, not Three Holy Ghosts. And in this Trinity none is afore or after Other, None is greater or less than Another, but the whole Three Persons are Co-eternal together, and Co-equal. So that in all things, as is aforesaid, the Unity in Trinity, and the Trinity in Unity is to be worshipped. He therefore that will be saved, must thus think of the Trinity.

Furthermore, it is necessary to everlasting Salvation, that he also believe rightly the Incarnation of our Lord Jesus Christ. For the right Faith is, that we believe and confess, that our Lord Jesus Christ, the Son of God, is God and Man.

God, of the substance of the Father, begotten before the worlds; and Man, of the substance of His mother, born into the world. Perfect God and Perfect Man, of a reasonable Soul and human Flesh subsisting. Equal to the Father as touching His Godhead, and inferior to the Father as touching His Manhood. Who, although He be God and Man, yet He is not two, but One Christ. One, not by conversion of the Godhead into Flesh, but by taking of the Manhood into God. One altogether, not by confusion of substance, but by Unity of Person. For as the reasonable soul and flesh is one Man, so God and Man is one Christ. Who suffered for our salvation, descended into Hell, rose again the third day from the dead. He ascended into Heaven, He sitteth on the right hand of the Father, God Almighty, from whence he shall come to judge the quick and the dead. At whose coming all men shall rise again with their bodies, and shall give account for their own works. And they that have done good shall go into life everlasting, and they that have done evil into everlasting fire. This is the Catholic Faith, which except a man believe faithfully and firmly, he cannot be saved.

For the past two hundred years the authorship of this summary of Catholic Faith and the time of its appearance have furnished an interesting problem to ecclesiastical antiquarians. Until the seventeenth century, the "Quicunque vult", as it is sometimes called, from its opening words, was thought to be the composition of the great Archbishop of Alexandria whose name it bears. In the year 1644, Gerard Voss, in his "De Tribus Symbolis", gave weighty probability to the opinion that St. Athanasius was not its author. His reasons may be reduced to the two following: first, no early writer of authority speaks of it as the work of this doctor; and secondly, its language and structure point to a Western, rather than to an Alexandrian, origin. Most modern scholars agree in admitting the strength of these reasons, and hence this view is the one generally received to-day. Whether the Creed can be ascribed to St. Athanasius or not, and most probably it cannot, it undoubtedly owes its existence to Athanasian influences, for the expressions and doctrinal colouring exhibit too marked a correspondence, in subject-matter and in phraseology, with the literature of the latter half of the fourth century and especially with the writings of the saint, to be merely accidental. These internal evidences seem to justify the conclusion that it grew out of several provincial synods, chiefly that of Alexandria, held about the year 361, and presided over by St. Athanasius. It should be said, however, that these arguments have failed to shake the conviction of some Catholic authors, who refuse to give it an earlier origin than the fifth century.

An elaborate attempt was made in England,

in 1871, by E. C. Ffoulkes to assign the Creed to the ninth century. From a passing remark in a letter written by Alcuin he constructed the following remarkable piece of fiction. The Emperor Charlemagne, he says, wished to consolidate the Western Empire by a religious, as well as a political, separation from the East. To this end he suppressed the Nicene Creed, dear to the Oriental Church, and substituted a formulary composed by Paulinus of Aquileia, with whose approval and that of Alcuin, a distinguished scholar of the time, he ensured its ready acceptance by the people, by affixing to it the name of St. Athanasius. This gratuitous attack upon the reputation of men whom every worthy historian regards as incapable of such a fraud, added to the undoubted proofs of the Creed's having been in use long before the ninth century, leaves this theory without any foundation.

Who, then, is the author? The results of recent inquiry make it highly probable that the Creed first saw the light in the fourth century, during the life of the great Eastern patriarch, or shortly after his death. It has been attributed by different writers variously to St. Hilary, to St. Vincent of Lérins, to Eusebius of Vercelli, to Vigilius, and to others. It is not easy to avoid the force of the objections to all of these views, however, as they were men of world-wide reputation, and hence any document, especially one of such importance as a profession of faith, coming from them would have met with almost immediate recognition. Now, no allusions to the authorship of the Creed, and few even to its existence, are to be found in the literature of the Church for over two hundred years after their time. We have referred to a like silence in proof of a non-Athanasian authorship. It seems to be similarly available in the case of any of the great names mentioned above. In the opinion of Father Sidney Smith, S.J., which the evidence just indicated renders plausible, the author of this Creed must have been some obscure bishop or theologian who composed it, in the first instance, for purely local use in some provincial diocese. Not coming from an author of wide reputation, it would have attracted little attention. As it became better known, it would have been more widely adopted, and the compactness and the lucidity of its statements would have contributed to make it highly prized wherever it was known. Then would follow speculation as to its author, and what wonder, if, from the subject-matter of the Creed, which occupied the great Athanasius so much, his name was first affixed to it and, unchallenged, remained.

The "damnatory", or "minatory clauses", are the pronouncements contained in the symbol, of the penalties which will follow the rejection of what is there proposed for our belief. It opens with one of them: "Whosoever will be saved, before all things it is necessary that he hold the Catholic Faith". The same is expressed in the verses beginning: "Furthermore, it is necessary" etc., and "For the right Faith is" etc., and finally in the concluding verse: "This is the Catholic Faith, which except a man believe faithfully and firmly, he cannot be saved". Just as the Creed states in a very plain and precise way what the Catholic Faith is concerning the important doctrines of the Trinity and the Incarnation, so it asserts with equal plainness and precision what will happen to those who do not faithfully and steadfastly believe in these revealed truths. They are but the credal equivalent of Our Lord's words: "He that believeth not shall be condemned", and apply, as is evident, only to the culpable and the wilful rejection of Christ's words and teachings. The absolute necessity of accepting the revealed word of God, under the stern penalties here threatened, is so intolerable to a powerful

class in the Anglican church, that frequent attempts have been made to eliminate the Creed from the public service of that Church. The Upper House of Convocation of Canterbury has already affirmed that these clauses, in their *prima facie* meaning, go beyond what is warranted by Holy Scripture. In view of the words of Our Lord quoted above, there should be nothing startling in the statement of our duty to believe what we know is the testimony and teaching of Christ, nor in the serious sin we commit in wilfully refusing to accept it, nor, finally, in the punishments that will be inflicted on those who culpably persist in their sin. It is just this last that the damnable clauses proclaim. From a dogmatic standpoint, the merely historical question of the authorship of the Creed, or of the time it made its appearance, is of secondary consideration. The fact alone that it is approved by the Church as expressing its mind on the fundamental truths with which it deals, is all we need to know.

JAMES J. SULLIVAN.

**Athanasius, SAINT**, Bishop of Alexandria; Confessor and Doctor of the Church; born c. 296; d. 2 May, 373. [No accepted emblem has been assigned to him in the history of western art; and his career, in spite of its picturesque diversity and extraordinary wealth of detail, seems to have furnished little, if any, material for distinctive illustration. Mrs. Jameson tells us that according to the Greek formula, "he ought to be represented old, baldheaded, and with a long white beard" (Sacred and Legendary Art, I, 339).] Athanasius was the greatest champion of Catholic belief on the subject of the Incarnation that the Church has ever known and in his lifetime earned the characteristic title of "Father of Orthodoxy", by which he has been distinguished ever since. While the chronology of his career still remains for the most part a hopelessly involved problem, the fullest material for an account of the main achievements of his life will be found in his collected writings and in the contemporary records of his time. He was born, it would seem, in Alexandria, most probably between the years 296 and 298. An earlier date, 293, is sometimes assigned as the more certain year of his birth; and it is supported apparently by the authority of the "Coptic Fragment" (published by Dr. O. von Lemm among the *Mémoires de l'Académie impériale des sciences de St. Pétersbourg*, 1888) and corroborated by the undoubted maturity of judgment revealed in the two treatises "Contra Gentes" and "De Incarnatione", which were admittedly written about the year 318, before Arianism as a movement had begun to make itself felt. It must be remembered, however, that in two distinct passages of his writings (Hist. Ar., lxiv, and De Syn., xviii) Athanasius shrinks from speaking as a witness at first hand of the persecution which had broken out under Maximian in 303; for

in referring to the events of this period he makes no direct appeal to his own personal recollections, but falls back, rather, on tradition. Such reserve would scarcely be intelligible, if, on the hypothesis of the earlier date, the Saint had been then a boy fully ten years old. Besides, there must have been some semblance of a foundation in fact for the charge brought against him by his accusers in after-life (Index to the Festal Letters) that at the time of his consecration to the episcopate in 328 he had not yet attained the canonical age of thirty years. These considerations, therefore, even if they are found to be not entirely convincing, would seem to make it likely that he was born not earlier than 296 nor later than 298.

It is impossible to speak more than conjecturally of his family. Of the claim that it was both prominent and well-to-do, we can only observe that the tradition to that effect is not contradicted by such scanty details as can be gleaned from the saint's writings. Those writings undoubtedly betray evidences of the sort of education that was given, for the most part, only to children and youths of the better class. It began with grammar, went on to rhetoric, and received its final touches under some one of the more fashionable lecturers in the philosophic schools. It is possible, of course, that he owed his remarkable training in letters to his saintly predecessor's favour, if not to his personal care. But Athanasius was one of those rare personalities that derive incomparably more from their own native gifts of intellect and character than from the fortuitousness of descent or environment. His career almost personifies a crisis in the history of Christianity; and he may be said rather to have shaped the events in which he took part than to have been shaped by them. Yet it would be misleading to urge that he was in no notable sense a debtor to the time and place of his birth. The Alexandria of his boyhood was an epitome, intellectually, morally, and politically, of that ethnically many-coloured Græco-Roman world, over which the Church of the fourth and fifth centuries was beginning at last, with undismayed consciousness, after nearly three hundred years of unwearying propagandism, to realize its supremacy. It was, moreover, the most important centre of trade in the whole empire; and its primacy as an emporium of ideas was more commanding than that of Rome or Constantinople, Antioch or Marseilles. Already, in obedience to an instinct of which one can scarcely determine the full significance without studying the subsequent developments of Catholicism, its famous "Catechetical School", while sacrificing no jot or tittle of that passion for orthodoxy which it had imbibed from Pantænus, Clement, and Origen, had begun to take on an almost secular character in the comprehensiveness of its interests, and had counted pagans of influence among its serious auditors (Eusebius Hist. Eccl., VI, xix).

To have been born and brought up in such an atmosphere of philosophizing Christianity was, in spite of the dangers it involved, the timeliest and most liberal of educations; and there is, as we have intimated, abundant evidence in the saint's writings to testify to the ready response which all the better influences of the place must have found in the heart and mind of the growing boy. Athanasius seems to have been brought early in life under the immediate supervision of the ecclesiastical authorities of his native city. Whether his long intimacy with Bishop Alexander began in childhood, we have no means of judging; but a story which pretends to describe the circumstances of his first introduction to that prelate has been preserved for us by Rufinus (Hist. Eccl., I, xiv). The bishop, so the tale runs, had invited a number of brother prelates to meet him at breakfast after a great religious function on the anniversary of the martyrdom of St. Peter, a recent predecessor

in the See of Alexandria. While Alexander was waiting for his guests to arrive, he stood by a window, watching a group of boys at play on the seashore below the house. He had not observed them long before he discovered that they were imitating, evidently with no thought of irreverence, the elaborate ritual of Christian baptism. (Cf. Bunsen's "Christianity and Mankind", London, 1854, VI, 465; Denzinger, "Ritus Orientalium" in verb.; Butler's "Ancient Coptic Churches", II, 268 et sqq.; "Baptême chez les Coptes", "Dict. Théol. Cath.", Col. 244, 245). He therefore sent for the children and had them brought into his presence. In the investigation that followed it was discovered that one of the boys, who was no other than the future Primate of Alexandria, had acted the part of bishop, and in that character had actually baptized several of his companions in the course of their play. Alexander, who seems to have been unaccountably puzzled over the answers he received to his inquiries, determined to recognize the make-believe baptisms as genuine; and decided that Athanasius and his playfellows should go into training in order to fit themselves for a clerical career. The Bollandists deal gravely with this story; and writers as difficult to satisfy as Archdeacon Farrar and the late Dean Stanley are ready to accept it as bearing on its face "every indication of truth" (Farrar, "Lives of the Fathers", I, 337; Stanley, "East. Ch.", 264). But whether in its present form, or in the modified version to be found in Socrates (I, xv), who omits all reference to the baptism and says that the game was "an imitation of the priesthood and the order of consecrated persons", the tale raises a number of chronological difficulties and suggests even graver questions.

Perhaps a not impossible explanation of its origin may be found in the theory that it was one of the many floating myths set in movement by popular imagination to account for the marked bias towards an ecclesiastical career which seems to have characterized the early boyhood of the future champion of the Faith. Sozomen speaks of his "fitness for the priesthood", and calls attention to the significant circumstance that he was "from his tenderest years practically self-taught". "Not long after this," adds the same authority, the Bishop Alexander "invited Athanasius to be his commensal and secretary. He had been well educated, and was versed in grammar and rhetoric, and had already, while still a young man, and before reaching the episcopate, given proof to those who dwelt with him of his wisdom and acumen" (Soz., II, xvii). That "wisdom and acumen" manifested themselves in a various environment. While still a levite under Alexander's care, he seems to have been brought for a while into close relations with some of the solitaires of the Egyptian desert, and in particular with the great St. Anthony, whose life he is said to have written. The evidence both of the intimacy and for the authorship of the life in question has been challenged, chiefly by non-Catholic writers, on the ground that the famous "Vita" shows signs of interpolation. Whatever we may think of the arguments on the subject, it is impossible to deny that the monastic idea appealed powerfully to the young cleric's temperament, and that he himself in after years was not only at home when duty or accident threw him among the solitaires, but was so monastically self-disciplined in his habits as to be spoken of as an "ascetic" (Apol. c. Arian., vi). In fourth-century usage the word would have a definiteness of connotation not easily determinable to-day. (See ASCETICISM.)

It is not surprising that one who was called to fill so large a place in the history of his time should have impressed the very form and feature of his personality, so to say, upon the imagination of his contemporaries. St. Gregory Nazianzen is not the

only writer who has described him for us (Orat. xxi, 8). A contemptuous phrase of the Emperor Julian's (Epist., li) serves unintentionally to corroborate the picture drawn by kindlier observers. He was slightly below the middle height, spare in build, but well-knit, and intensely energetic. He had a finely shaped head, set off with a thin growth of auburn hair, a small but sensitively mobile mouth, an aquiline nose, and eyes of intense but kindly brilliancy. He had a ready wit, was quick in intuition, easy and affable in manner, pleasant in conversation, keen, and, perhaps, somewhat too unsparing in debate. (Besides the references already cited, see the detailed description given in the January *Μηναιον* quoted in the Bollandist life. Julian the Apostate, in the letter alluded to above sneers at the diminutiveness of his person—*μηδὲ ἀνὴρ, ἀλλ' ἀνθρωπίσκος εὐτελής*, he writes.) In addition to these qualities, he was conspicuous for two others to which even his enemies bore unwilling testimony. He was endowed with a sense of humour that could be as mordant—we had almost said as sardonic—as it seems to have been spontaneous and unfailing; and his courage was of the sort that never falters, even in the most disheartening hour of defeat. There is one other note in this highly gifted and many-sided personality to which everything else in his nature literally ministered, and which must be kept steadily in view, if we would possess the key to his character and writing and understand the extraordinary significance of his career in the history of the Christian Church. He was by instinct neither a liberal nor a conservative in theology. Indeed the terms have a singular inappropriateness as applied to a temperament like his. From first to last he cared greatly for one thing and one thing only; that one thing was the integrity of his Catholic creed. The religion it engendered in him was obviously—considering the traits by which we have tried to depict him—of a passionate and consuming sort. It began and ended in devotion to the Divinity of Jesus Christ. He was scarcely out of his teens, and certainly not in more than deacon's orders, when he published two treatises, in which his mind seemed to strike the key-note of all its riper after-utterances on the subject of the Catholic Faith. The "Contra Gentes" and the "Oratio de Incarnatione"—to give them the Latin appellations by which they are more commonly cited—were written some time between the years 318 and 323. St. Jerome (De Viris Illust.) refers to them under a common title, as "Adversum Gentes Duo Libri", thus leaving his readers to gather the impression, which an analysis of the contents of both books certainly seems to justify, that the two treatises are in reality one.

As a plea for the Christian position, addressed chiefly to both Gentiles and Jews, the young deacon's apology, while undoubtedly reminiscent in methods and ideas of Origen and the earlier Alexandrians, is, nevertheless, strongly individual and almost pietistic in tone. Though it deals with the Incarnation, it is silent on most of those ulterior problems in defence of which Athanasius was so soon to be summoned by the force of events and the fervour of his own faith to devote the best energies of his life. The work contains no explicit discussion of the nature of the Word's Sonship, for instance; no attempt to draw out the character of Our Lord's relation to the Father; nothing, in short, of those Christological questions upon which he was to speak with such splendid and courageous clearness in a time of shifting formularies and undetermined views. Yet those ideas must have been in the air (Soz., I, xv) for, some time between the years 318 and 320, Arius, a native of Libya (Epiph. Haer., lxix) and priest of the Alexandrian Church, who had already fallen under censure for his part in the Meletian troubles which broke out during the

episcopate of St. Peter, and whose teachings had succeeded in making dangerous headway, even among "the consecrated virgins" of St. Mark's see (Epiph. Haer., lxi; Soc., Hist. Eccl., I, vi), accused Bishop Alexander of Sabellianism. Arius, who seems to have presumed on the charitable tolerance of the primate, was at length deposed (Apol. c. Ar., vi) in a synod consisting of more than one hundred bishops of Egypt and Libya (Depositio Ar., 3). The condemned heresiarch withdrew first to Palestine and afterwards to Bithynia, where, under the protection of Eusebius of Nicomedia and his other "Collucianists", he was able to increase his already remarkable influence, while his friends were endeavouring to prepare a way for his forcible reinstatement as priest of the Alexandrian Church. Athanasius, though only in deacon's orders, must have taken no subordinate part in these events. He was the trusted secretary and adviser of Alexander, and his name appears in the list of those who signed the encyclical letter subsequently issued by the primate and his colleagues to offset the growing prestige of the new teaching, and the momentum it was beginning to acquire from the ostentatious patronage extended to the deposed Arius by the Eusebian faction. Indeed, it is to this party and to the leverage it was able to exercise at the emperor's court that the subsequent importance of Arianism as a political, rather than a religious, movement seems primarily to be due.

The heresy, of course, had its supposedly philosophic basis, which has been ascribed by authors, ancient and modern, to the most opposite sources. St. Epiphanius characterizes it as a kind of revived Aristoteleanism (Haer., lxxvii and lxxvi); and the same view is practically held by Socrates (Hist. Eccl., II, xxxv), Theodoret (Haer. Fab., IV, iii), and St. Basil (Adv. Eunom., I, ix). On the other hand, a theologian as broadly read as Petavius (De Trin., I, viii, 2) has no hesitation in deriving it from Platonism; Newman in turn (Arians of the Fourth Cent., 4 ed., 109) sees in it the influence of Jewish prejudices rationalized by the aid of Aristotelean ideas; while Robertson (Sel. Writ. and Let. of Ath. Proleg., 27) observes that the "common theology", which was invariably opposed to it, "borrowed its philosophical principles and method from the Platonists." These apparently conflicting statements could, no doubt, be easily adjusted; but the truth is that the prestige of Arianism never lay in its ideas. From whatever school it may have been logically derived, the sect, as a sect, was cradled and nurtured in intrigue. Save in some few instances, which can be accounted for on quite other grounds, its prophets relied more upon curial influence than upon piety, or Scriptural knowledge, or dialectics. That must be borne constantly in mind, if we would not move distractedly through the bewildering maze of events that make up the life of Athanasius for the next half century to come. It is his peculiar merit that he not only saw the drift of things from the very beginning, but was confident of the issue down to the last (Apol. c. Ar., c.). His insight and courage proved almost as efficient a bulwark to the Christian Church in the world as did his singularly lucid grasp of traditional Catholic belief. His opportunity came in the year 325, when the Emperor Constantine, in the hope of putting an end to the scandalous debates that were disturbing the peace of the Church, met the prelates of the entire Catholic world in council at Nicæa.

The great council convoked at this juncture was something more than a pivotal event in the history of Christianity. Its sudden, and, in one sense, almost unpremeditated adoption of a quasi-philosophic and non-Scriptural term—*ὁμοούσιος*—to express the character of orthodox belief in the Person of the historic Christ, by defining Him to be identical in substance, or

co-essential, with the Father, together with its confident appeal to the emperor to lend the sanction of his authority to the decrees and pronouncements by which it hoped to safeguard this more explicit profession of the ancient Faith, had consequences of the gravest import, not only to the world of ideas, but to the world of politics as well. By the official promulgation of the term *homousion*, theological speculation received a fresh but subtle impetus which made itself felt long after Athanasius and his supporters had passed away; while the appeal to the secular arm inaugurated a policy which endured practically without change of scope down to the publication of the Vatican decrees in our own time. In one sense, and that a very deep and vital one, both the definition and the policy were inevitable. It was inevitable in the order of religious ideas that any break in logical continuity should be met by inquiry and protest. It was just as inevitable that the protest, to be effective, should receive some countenance from a power which up to that moment had affected to regulate all the graver circumstances of life (cf. Harnack, Hist. Dog., III, 146, note; Buchanan's tr.). As Newman has remarked: "The Church could not meet together in one, without entering into a sort of negotiation with the powers that be; whose jealousy it is the duty of Christians, both as individuals and as a body, if possible, to dispel" (Arians of the Fourth Cent., 4 ed., 241). Athanasius, though not yet in priest's orders, accompanied Alexander to the council in the character of secretary and theological adviser. He was not, of course, the originator of the famous *homousion*. The term had been proposed in a non-obvious and illegitimate sense by Paul of Samosata to the Fathers at Antioch, and had been rejected by them as savouring of materialistic conceptions of the Godhead (cf. Athan., "De Syn.", xliii; Newman, "Arians of the Fourth Cent.," 4 ed., 184-196; Petav., "De Trin.," IV, v, § 3; Robertson, "Sel. Writ. and Let. Athan. Proleg.," 30 sqq.).

It may even be questioned whether, if left to his own logical instincts, Athanasius would have suggested an orthodox revival of the term at all ("De Decretis", 19; "Orat. c. Ar.", ii, 32; "Ad Monachos" 2). His writings, composed during the forty-six critical years of his episcopate, show a very sparing use of the word; and though, as Newman (Arians of the Fourth Cent., 4 ed., 236) reminds us, "the authentic account of the proceedings" that took place is not extant, there is nevertheless abundant evidence in support of the common view that it had been unexpectedly forced upon the notice of the bishops, Arian and orthodox, in the great synod by Constantine's proposal to accept the creed submitted by Eusebius of Cæsarea, with the addition of the *homousion*, as a safeguard against possible vagueness. The suggestion had in all probability come from Hosius (cf. "Epist. Eusebii.", in the appendix to the "De Decretis", § 4; Soc., "Hist. Eccl.", I, viii; III, vii; Theod. "Hist. Eccl.", I, Athan.; "Arians of the Fourth Cent.", 6, n. 42; *ὁὐτος τῇ ἐν Νικαίᾳ πλὴν ἐξέθετο*, says the saint, quoting his opponents); but Athanasius, in common with the leaders of the orthodox party, loyally accepted the term as expressive of the traditional sense in which the Church had always held Jesus Christ to be the Son of God. The conspicuous abilities displayed in the Nicæan debates and the character for courage and sincerity he won on all sides made the youthful cleric henceforth a marked man (St. Greg. Naz., Orat., 21). His life could not be lived in a corner. Five months after the close of the council the Primate of Alexandria died; and Athanasius, quite as much in recognition of his talents, it would appear, as in deference to the death-bed wishes of the deceased prelate, was chosen to succeed him. His election, in spite of his extreme youth and the opposite

of a remnant of the Arian and Meletian factions in the Alexandrian Church, was welcomed by all classes among the laity ("Apol. c. Arian", vi; Soz., "Hist. Eccl.", II, xvii, xxi, xxii).

The opening years of the saint's rule were occupied with the wonted episcopal routine of a fourth-century Egyptian bishop. Episcopal visitations, synods, pastoral correspondence, preaching and the yearly round of church functions consumed the bulk of his time. The only noteworthy events of which antiquity furnishes at least probable data are connected with the successful efforts which he made to provide a hierarchy for the newly planted church in Ethiopia (Abyssinia) in the person of St. Frumentius (Rufinus I, ix; Soc., I, xix; Soz., II, xxiv), and the friendship which appears to have begun about this time between himself and the monks of St. Pachomius. But the seeds of disaster which the saint's piety had unflinchingly planted at Nicæa were beginning to bear a disquieting crop at last. Already events were happening at Constantinople which were soon to make him the most important figure of his time. Eusebius of Nicomedia, who had fallen into disgrace and been banished by the Emperor Constantine for his part in the earlier Arian controversies, had been recalled from exile. After an adroit campaign of intrigue, carried on chiefly through the instrumentality of the ladies of the imperial household, this smooth-mannered prelate so far prevailed over Constantine as to induce him to order the recall of Arius likewise from exile. He himself sent a characteristic letter to the youthful Primate of Alexandria, in which he bespoke his favour for the condemned heresiarch, who was described as a man whose opinions had been misrepresented. These events must have happened some time about the close of the year 330. Finally the emperor himself was persuaded to write to Athanasius, urging that all those who were ready to submit to the definitions of Nicæa should be re-admitted to ecclesiastical communion. This Athanasius stoutly refused to do, alleging that there could be no fellowship between the Church and one who denied the Divinity of Christ.

The Bishop of Nicomedia thereupon brought various ecclesiastical and political charges against Athanasius, which, though unmistakably refuted at their first hearing, were afterwards refurbished and made to do service at nearly every stage of his subsequent trials. Four of these were very definite, to wit: that he had not reached the canonical age at the time of his consecration; that he had imposed a linen tax upon the provinces; that his officers had, with his connivance and authority, profaned the Sacred Mysteries in the case of an alleged priest named Ischyrras; and lastly that he had put one Arsenius to death and afterwards dismembered the body for purposes of magic. The nature of the charges and the method of supporting them were vividly characteristic of the age. The curious student will find them set forth in picturesque detail in the second part of the Saint's "Apologia", or "Defense against the Arians", written long after the events themselves, about the year 350, when the retraction of Ursacius and Valens made their publication triumphantly opportune. The whole unhappy story at this distance of time reads in parts more like a specimen of late Greek romance than the account of an inquisition gravely conducted by a synod of Christian prelates with the idea of getting at the truth of a series of odious accusations brought against one of their number. Summoned by the emperor's order after protracted delays extending over a period of thirty months (Soz., II, xxv), Athanasius finally consented to meet the charges brought against him by appearing before a synod of prelates at Tyre in the year 335. Fifty of his suffragans went with him to vindicate his good name; but the complexion

of the ruling party in the synod made it evident that justice to the accused was the last thing that was thought of. It can hardly be wondered at, that Athanasius should have refused to be tried by such a court. He, therefore, suddenly withdrew from Tyre, escaping in a boat with some faithful friends who accompanied him to Byzantium, where he had made up his mind to present himself to the emperor.

The circumstances in which the saint and the great catechumen met were dramatic enough. Constantine was returning from a hunt, when Athanasius unexpectedly stepped into the middle of the road and demanded a hearing. The astonished emperor could hardly believe his eyes, and it needed the assurance of one of the attendants to convince him that the petitioner was not an impostor, but none other than the great Bishop of Alexandria himself. "Give me", said the prelate, "a just tribunal, or allow me to meet my accusers face to face in your presence." His request was granted. An order was peremptorily sent to the bishops, who had tried Athanasius and, of course, condemned him in his absence, to repair at once to the imperial city. The command reached them while they were on their way to the great feast of the dedication of Constantine's new church at Jerusalem. It naturally caused some consternation; but the more influential members of the Eusebian faction never lacked either courage or resourcefulness. The saint was taken at his word; and the old charges were renewed in the hearing of the emperor himself. Athanasius was condemned to go into exile at Trèves, where he was received with the utmost kindness by the saintly Bishop Maximinus and the emperor's eldest son, Constantine. He began his journey probably in the month of February, 336, and arrived on the banks of the Moselle in the late autumn of the same year. His exile lasted nearly two years and a half. Public opinion in his own diocese remained loyal to him during all that time. It was not the least eloquent testimony to the essential worth of his character that he could inspire such faith. Constantine's treatment of Athanasius at this crisis in his fortunes has always been difficult to understand. Affecting, on the one hand, a show of indignation, as if he really believed in the political charge brought against the saint, he, on the other, refused to appoint a successor to the Alexandrian See, a thing which he might in consistency have been obliged to do had he taken seriously the condemnation proceedings carried through by the Eusebians at Tyre.

Meanwhile events of the greatest importance had taken place. Arius had died amid startlingly dramatic circumstances at Constantinople in 336; and the death of Constantine himself had followed, on the 22nd of May the year after. Some three weeks later the younger Constantine invited the exiled primate to return to his see; and by the end of November of the same year Athanasius was once more established in his episcopal city. His return was the occasion of great rejoicing. The people, as he himself tells us, ran in crowds to see his face; the churches were given over to a kind of jubilee; thanksgivings were offered up everywhere; and clergy and laity accounted the day the happiest in their lives. But already trouble was brewing in a quarter from which the saint might reasonably have expected it. The Eusebian faction, who from this time forth loom large as the disturbers of his peace, managed to win over to their side the weak-minded Emperor Constantius to whom the East had been assigned in the division of the empire that followed on the death of Constantine. The old charges were refurbished with a graver ecclesiastical accusation added by way of rider. Athanasius had ignored the decision of a duly authorized synod. He had returned to his see without the summons of ecclesiastical authority (Apol. c. Ar., *loc. cit.*). If

the year 340, after the failure of the Eusebian malcontents to secure the appointment of an Arian candidate of dubious reputation named Pistus, the notorious Gregory of Cappadocia was forcibly intruded into the Alexandrian See, and Athanasius was obliged to go into hiding. Within a very few weeks he set out for Rome to lay his case before the Church at large. He had made his appeal to Pope Julius, who took up his cause with a whole-heartedness that never wavered down to the day of that holy pontiff's death. The pope summoned a synod of bishops to meet in Rome. After a careful and detailed examination of the entire case, the primate's innocence was proclaimed in the Christian world.

Meanwhile the Eusebian party had met at Antioch and passed a series of decrees framed for the sole purpose of preventing the saint's return to his see. Three years were passed at Rome, during which time the idea of the cenobitical life, as Athanasius had seen it practised in the deserts of Egypt, was preached to the clerics of the West (St. Jerome, *Epistle cxxvii*, 5). Two years after the Roman synod had published its decision, Athanasius was summoned to Milan by the Emperor Constans, who laid before him the plan which Constantius had formed for a great reunion of the bishops of both the Eastern and Western Churches. Now began a time of extraordinary activity for the Saint. Early in the year 343 we find the undaunted exile in Gaul, whither he had gone to consult the saintly Hosius, the great champion of orthodoxy in the West. The two together set out for the Council of Sardica which had been summoned in deference to the Roman pontiff's wishes. At this great gathering of prelates the case of Athanasius was taken up once more; and once more was his innocence reaffirmed. Two conciliar letters were prepared, one to the clergy and faithful of Alexandria, the other to the bishops of Egypt and Libya, in which the will of the Council was made known. Meanwhile the Eusebian party had gone to Philipopolis, where they issued an anathema against Athanasius and his supporters. The persecution against the orthodox party broke out with renewed vigour, and Constantius was induced to prepare drastic measures against Athanasius and the priests who were devoted to him. Orders were given that if the Saint attempted to re-enter his see, he should be put to death. Athanasius, accordingly, withdrew from Sardica to Naïssus in Mysia, where he celebrated the Easter festival of the year 344. After that he set out for Aquileia in obedience to a friendly summons from Constans, to whom Italy had fallen in the division of the empire that followed on the death of Constantine. Meanwhile an unexpected event had taken place which made the return of Athanasius to his see less difficult than it had seemed for many months. Gregory of Cappadocia had died (probably by violence) in June, 345. The embassy which had been sent by the bishops of Sardica to the Emperor Constantius, and which had at first met with the most insulting treatment, now received a favourable hearing. Constantius was induced to reconsider his decision, owing to a threatening letter from his brother Constans and the uncertain condition of affairs on the Persian border, and he accordingly made up his mind to yield. But three separate letters were needed to overcome the natural hesitation of Athanasius. He passed rapidly from Aquileia to Trèves, from Trèves to Rome, and from Rome by the northern route to Adrianople and Antioch, where he met Constantius. He was accorded a gracious interview by the vacillating Emperor, and sent back to his see in triumph, where he began his memorable ten years' reign, which lasted down to the third exile, that of 356. These were full years in the life of the Bishop; but the intrigues of the Eusebian, or Court, party were soon renewed. Pope Julius had

died in the month of April, 352, and Liberius had succeeded him as Sovereign Pontiff. For two years Liberius had been favourable to the cause of Athanasius; but driven at last into exile, he was induced to sign an ambiguous formula, from which the great Nicene test, the *homoousion*, had been studiously omitted. In 355 a council was held at Milan, where in spite of the vigorous opposition of a handful of loyal prelates among the Western bishops, a fourth condemnation of Athanasius was announced to the world. With his friends scattered, the saintly Hosius in exile, the Pope Liberius denounced as acquiescing in Arian formularies, Athanasius could hardly hope to escape. On the night of 8 February, 356, while engaged in services in the Church of St. Thomas, a band of armed men burst in to secure his arrest (*Apol. de Fuga*, 24). It was the beginning of his third exile.

Through the influence of the Eusebian faction at Constantinople, an Arian bishop, George of Cappadocia, was now appointed to rule the see of Alexandria. Athanasius, after remaining some days in the neighbourhood of the city, finally withdrew into the deserts of upper Egypt, where he remained for a period of six years, living the life of the monks and devoting himself in his enforced leisure to the composition of that group of writings of which we have the result in the "Apology to Constantius", the "Apology for his Flight", the "Letter to the Monks", and the "History of the Arians". Legend has naturally been busy with this period of the Saint's career; and we may find in the "Life of Pachomius" a collection of tales brimful of incidents, and enlivened by the recital of "deathless 'scapes in the breach." But by the close of the year 360 a change was apparent in the complexion of the anti-Nicene party. The Arians no longer presented an unbroken front to their orthodox opponents. The Emperor Constantius, who had been the cause of so much trouble, died 4 November, 361, and was succeeded by Julian. The proclamation of the new prince's accession was the signal for a pagan outbreak against the still dominant Arian faction in Alexandria. George, the usurping Bishop, was flung into prison and murdered amid circumstances of great cruelty, 24 December (*Hist. Aceph.*, VI). An obscure presbyter of the name of Pistus was immediately chosen by the Arians to succeed him, when fresh news arrived that filled the orthodox party with hope. An edict had been put forth by Julian (*Hist. Aceph.*, VIII) permitting the exiled bishops of the "Galileans" to return to their "towns and provinces". Athanasius received a summons from his own flock, and he accordingly re-entered his episcopal capital on 22 February, 362. With characteristic energy he set to work to re-establish the somewhat shattered fortunes of the orthodox party and to purge the theological atmosphere of uncertainty. To clear up the misunderstandings that had arisen in the course of the previous years, an attempt was made to determine still further the significance of the Nicene formularies. In the meanwhile, Julian, who seems to have become suddenly jealous of the influence that Athanasius was exercising at Alexandria, addressed an order to Ecdicius, the Prefect of Egypt, peremptorily commanding the expulsion of the restored primate, on the ground that he had never been included in the imperial act of clemency. The edict was communicated to the bishop by Pythodorus Trico, who, though described in the "*Chronicon Athanasianum*" (xxxv) as a "philosopher", seems to have behaved with brutal insolence. On 23 October the people gathered about the proscribed bishop to protest against the emperor's decree; but the saint urged them to submit, consoling them with the promise that his absence would be of short duration. The prophecy was curiously fulfilled. Julian terminated

his brief career 26 June, 363; and Athanasius returned in secret to Alexandria, where he soon received a document from the new emperor, Jovian, reinstating him once more in his episcopal functions. His first act was to convene a council which reaffirmed the terms of the Nicene Creed. Early in September he set out for Antioch, bearing a synodal letter, in which the pronouncements of this council had been embodied. At Antioch he had an interview with the new emperor, who received him graciously and even asked him to prepare an exposition of the orthodox faith. But in the following February Jovian died; and in October, 364, Athanasius was once more an exile.

With the turn of circumstances that handed over to Valens the control of the East this article has nothing to do; but the accession of that emperor gave a fresh lease of life to the Arian party. He issued a decree banishing the bishops who had been deposed by Constantius, but who had been permitted by Jovian to return to their sees. The news created the greatest consternation in the city of Alexandria itself, and the prefect, in order to prevent a serious outbreak, gave public assurance that the very special case of Athanasius would be laid before the emperor. But the saint seems to have divined what was preparing in secret against him. He quietly withdrew from Alexandria, 5 October, and took up his abode in a country house outside the city. It was during this period that he is said to have spent four months in hiding in his father's tomb (Soz., "Hist. Eccl.", VI, xii; Soc., "Hist. Eccl.", IV, xii). Valens, who seems to have sincerely dreaded the possible consequences of a popular outbreak, gave orders within a very few weeks for the return of Athanasius to his see. And now began that last brief period of comparative repose which unexpectedly terminated his strenuous and extraordinary career. He spent his remaining days, characteristically enough, in re-emphasizing the view of the Incarnation which had been defined at Nicea and which has been substantially the faith of the Christian Church from its earliest pronouncement in Scripture down to its last utterance through the lips of Pius X in our own times. "Let what was confessed by the Fathers of Nicæa prevail", he wrote to a philosopher-friend and correspondent in the closing years of his life (Epist. lxxi, ad Max.). That that confession did at last prevail in the various Trinitarian formularies that followed upon that of Nicæa was due, humanly speaking, more to his laborious witness than to that of any other champion in the long teachers' roll of Catholicism. By one of those inexplicable ironies that meet us everywhere in human history, this man, who had endured exile so often, and risked life itself in defence of what he believed to be the first and most essential truth of the Catholic creed, died not by violence or in hiding, but peacefully in his own bed, surrounded by his clergy and mourned by the faithful of the see he had served so well. His feast in the Roman Calendar is kept on the anniversary of his death.

All the essential materials for the Saint's biography are to be found in his writings, especially in those written after the year 350, when the *Apologia contra Arianos* was composed. Supplementary information will be found in St. EPIPHANIUS, *Hæc.*, loc. cit.; in St. GREGORY OF NAZIANZUS, *Orat.*, xxi; also RUFINUS, SOCRATES, SOZOMEN, and THEODORET. The *Historia Acaphala*, or *Maffiean Fragment* (discovered by Maffei in 1738, and inserted by GALLANDI in *Bibliotheca Patrum*, 1769), and the *Chronicon Athanasianum*, or *Index to the Festal Letters*, give us data for the chronological problem. All the foregoing sources are included in MIGNÉ, *P. G.*, and P. L. The great PAPERBROCK's *Life* is in the *Acta SS.*, May, I. The most important authorities in English are: NEWMAN, *Arians of the Fourth Century*; and Saint Athanasius, BRIGHT, *Dictionary of Christian Biography*; ROBERTSON, *Life*, in the *Prolegomena to the Select Writings and Letters of Saint Athanasius* (re-edited in *Library of the Nicene and post-Nicene Fathers*, New York, 1903); GWATKIN, *Studies of Arianism* (2d ed., Cambridge, 1900); MÖHLER, *Athanasius der Grosse*; HERGENROTHER and HEFEL.

CORNELIUS CLIFFORD.

**Atheism** (a privative, and *Θεός*, God, i. e. without God) is that system of thought which is formally opposed to theism. Since its first coming into use the term *atheism* has been very vaguely employed, generally as an epithet of accusation against any system that called in question the popular gods of the day. Thus, while Socrates was accused of atheism (Plato, *Apol.*, 26 c.), and Diagoras called an atheist by Cicero (*Nat. Deor.*, I, 23), Democritus and Epicurus were styled in the same sense impious (without respect for the gods) on account of the trend of their new atomistic philosophy. In this sense, too, the early Christians were known to the pagans as atheists, because they denied the heathen gods; while, from time to time, various religious opinions and philosophical systems have, for similar reasons, been deemed atheistic. Though atheism, historically considered, has meant no more in the past than a critical or sceptical denial of the theology of those who have employed the term as one of reproach, and has consequently no one strict philosophical meaning; though there is no one consistent system in the exposition of which it has a definite place; yet, if we consider it in its broad meaning as merely the opposite of theism, we shall be able to frame such divisions as will make possible a grouping of definite systems under this head. And in so doing we shall at once be adopting both the historical and the philosophical view. For the common basis of all systems of theism as well as the cardinal tenet of all popular religion at the present day is indubitably a belief in the existence of a personal God, and to deny this tenet is to invite the popular reproach of atheism. The need of some such definition as this was felt by Mr. Gladstone when he wrote (*Contemporary Review*, June, 1876): "By the Atheist I understand the man who not only holds off, like the sceptic, from the affirmative, but who drives himself, or is driven, to the negative assertion in regard to the whole unseen, or to the existence of God." Moreover, the breadth of comprehension in such a use of the term admits of divisions and cross-divisions being framed under it; and at the same time limits the number of systems of thought to which, with any propriety, it might otherwise be extended. Also, if the term is thus taken, in strict contradistinction to theism, and a plan of its possible modes of acceptance made, these systems of thought will naturally appear in clearer proportion and relationship.

Theism, defined as a doctrine, or theory, or philosophy formally opposed to theism, atheism can only signify the teaching of those schools, whether cosmological or moral, which do not include God either as a principle or as a conclusion of their reasoning. The most trenchant form which atheism could take would be the positive and dogmatic denial of the existence of any spiritual and extra-mundane First Cause. This is sometimes known as dogmatic, or positive theoretic, atheism; though it may be doubted whether such a system has ever been, or could ever possibly be seriously maintained. Certainly Bacon and Dr. Arnold voice the common judgment of thinking men when they express a doubt as to the existence of an atheist belonging to such a school. Still, there are certain advanced phases of materialistic philosophy that, perhaps, should rightly be included under this head. Materialism, which professes to find in matter its own cause and explanation, may go farther, and positively exclude the existence of any spiritual cause. That such a dogmatic assertion is both unreasonable and illogical needs no demonstration, for it is an inference not warranted by the facts nor justified by the laws of thought. But the fact that certain individuals have left the sphere of exact scientific observation for speculation, and have thus dogmatized negatively, calls for their inclusion in this specific type. Materialism is the one dogmatic explanation of the universe

which could in any sense justify an atheistic position. But even materialism, however its advocates might dogmatize, could do no more than provide an inadequate theoretic basis for a negative form of atheism. Pantheism, which must not be confused with materialism, in some of its forms can be placed also in this division, as categorically denying the existence of a spiritual First Cause above or outside the world.

A second form in which atheism may be held and taught, as indeed it has been, is based either upon the lack of physical data for theism or upon the limited nature of the intelligence of man. This second form may be described as a negative theoretic atheism; and may be further viewed as cosmological or psychological, according as it is motived, on the one hand, by a consideration of the paucity of actual data available for the arguments proving the existence of a super-sensible and spiritual God, or, what amounts to the same thing, the attributing of all cosmic change and development to the self-contained potentialities of an eternal matter; or, on the other hand, by an empiric or theoretic estimate of the powers of reason working upon the data furnished by sense-perception. From whichever cause this negative form of atheism proceeds, it issues in agnosticism or materialism; although the agnostic is, perhaps, better classed under this head than the materialist. For the former, professing a state of nescience, more properly belongs to a category under which those are placed who neglect, rather than explain, nature without a God. Moreover, the agnostic may be a theist, if he admits the existence of a being behind and beyond nature, even while he asserts that such a being is both unprovable and unknowable. The materialist belongs to this type so long as he merely neglects, and does not exclude from his system, the existence of God. So, too, does the positivist, regarding theological and metaphysical speculation as mere passing stages of thought through which the human mind has been journeying towards positive, or related empirical, knowledge. Indeed any system of thought or school of philosophy that simply omits the existence of God from the sum total of natural knowledge, whether the individual as a matter of fact believes in Him or not, can be classed in this division of atheism, in which, strictly speaking, no positive assertion or denial is made as to the ultimate fact of His being.

There are two systems of practical or moral atheism which call for attention. They are based upon the theoretic systems just expounded. One system of positive moral atheism, in which human actions would neither be right nor wrong, good nor evil, with reference to God, would naturally follow from the profession of positive theoretic atheism; and it is significant of those to whom such a form of theoretic atheism is sometimes attributed, that for the sanction of moral actions they introduce such abstract ideas as those of duty, the social instinct, or humanity. There seems to be no particular reason why they should have recourse to such sanctions, since the morality of an action can hardly be derived from its performance as a duty, which in turn can be called and known as a "duty" only because it refers to an action that is morally good. Indeed an analysis of the idea of duty leads to a refutation of the principle in whose support it is invoked, and points to the necessity of a theistic interpretation of nature for its own justification. The second system of negative practical or moral atheism may be referred to the second type of theoretic atheism. It is like the first in not relating human actions to an extra-mundane, spiritual, and personal lawgiver; but that, not because such a lawgiver does not exist, but because the human intelligence is incapable of so relating them. It must not be forgotten, however, that either negative theoretic atheism or negative practical atheism is, as a system, strictly speaking

compatible with belief in a God; and much confusion is often caused by the inaccurate use of the terms, *belief, knowledge, opinion*, etc.

Lastly, a third type is generally, though perhaps wrongly, included in moral atheism. "Practical atheism is not a kind of thought or opinion, but a mode of life" (R. Flint, *Anti-theistic Theories*, Lect. I). This is more correctly called, as it is described, godlessness in conduct, quite irrespective of any theory of philosophy, or morals, or of religious faith. It will be noticed that, although we have included agnosticism, materialism, and pantheism, among the types of atheism, strictly speaking this latter does not necessarily include any one of the former. A man may be an agnostic simply, or an agnostic who is also an atheist. He may be a scientific materialist and no more, or he may combine atheism with his materialism. It does not necessarily follow, because the natural cognoscibility of a personal First Cause is denied, that His existence is called in question: nor, when matter is called upon to explain itself, that God is critically denied. On the other hand, pantheism, while destroying the extra-mundane character of God, does not necessarily deny the existence of a supreme entity, but rather affirms such as the sum of all existence and the cause of all phenomena whether of thought or of matter. Consequently, while it would be unjust to class agnostics, materialists, or pantheists as necessarily also atheists, it cannot be denied that atheism is clearly perceived to be implied in certain phases of all these systems. There are so many shades and gradations of thought by which one form of a philosophy merges into another, so much that is opinionative and personal woven into the various individual expositions of systems, that, to be impartially fair, each individual must be classed by himself as atheist or theist. Indeed, more upon his own assertion or direct teaching than by reason of any supposed implication in the system he advocates must this classification be made. And if it is correct to consider the subject from this point of view, it is surprising to find to what an exceedingly small number the supposed atheistic ranks dwindle. In company with Socrates, nearly all the reputed Greek atheists strenuously repudiated the charge of teaching that there were no gods. Even Bion, who, according to Diogenes Laertius (*Life of Aristippus*, XIII, Bohn's tr.), adopted the scandalous moral teaching of the atheist Theodorus, turned again to the gods whom he had insulted, and when he came to die demonstrated in practice what he had denied in theory. As Laertius says in his "*Life of Bion*", he "who never once said, 'I have sinned but spare me'—

Then did this atheist shrink and give his neck  
To an old woman to hang charms upon;  
And bound his arms with magic amulets;  
With laurel branches blocked his doors and windows,  
Ready to do and venture anything  
Rather than die."

Epicurus, the founder of that school of physics which limited all causes to purely natural ones and consequently implied, if he did not actually assert, atheism, is spoken of as a man whose "piety towards the gods and (whose) affection for his country was quite unspeakable" (ib., *Life of Epicurus*, V). And though Lucretius Carus speaks of the downfall of popular religion which he wished to bring about (*De Rerum Natura*, I, 79-80), yet, in his own letter to Henaeceus (Laert., *Life of Epicurus*, XXVII), he states plainly a true theistic position: "For there are gods: for our knowledge of them is indistinct. But they are not of the character which people in general attribute to them." Indeed, this one citation perfectly illustrates the fundamental historic meaning of the term, atheism.

The naturalistic pantheism of the Italian Giordano Bruno (1548-1600) comes near to, if it is not actually a profession of, atheism; while Tomaso Campanella (1568-1639), on the contrary, in his nature-philosophy finds in atheism the one impossibility of thought. Spinoza (1632-77), while defending the doctrine that God certainly exists, so identifies Him with finite existence that it is difficult to see how he can be defended against the charge of atheism even of the first type. In the eighteenth century, and especially in France, the doctrines of materialism were spread broadcast by the Encyclopedists. La Mettrie, Holbach, Feuerbach, Fleurens are usually classed among the foremost materialistic atheists of the period. Voltaire, on the contrary, while undoubtedly helping on the cause of practical atheism, distinctly held its theoretic contrary. He, as well as Rousseau, was a deist. Comte, it will be remembered, refused to be called an atheist. In the last century Thomas Huxley, Charles Darwin, and Herbert Spencer, with others of the evolutionistic school of philosophy, were, quite erroneously, charged with positive atheism. It is a charge which can in no way be substantiated; and the invention and rapid coming into general use of the term agnosticism, used first by Huxley in 1859, shows the long-felt want of a word more definitely defined than atheism to designate a phase of thought either critically or sceptically concerned with the process by which the common tenet of theism is maintained. The fundamental formula is not a denial of the existence of God, but an assertion that the Absolute is unknowable. In Germany, the materialism of Karl Vogt, Jacob Moleschott, Ludwig Büchner, culminating in the monism of Ernst Hæckel, goes far towards forming an atheistic system of philosophy. But even the last named admits that there may be a God, though so limited and so foreign to the deity of theists that his admission can hardly remove the system from the first category of theoretic atheism.

Among the unscientific and unphilosophical there have from time to time been found dogmatic atheists of the first type. Here again, however, many of those popularly styled atheists are more correctly described by some other title. There is a somewhat rare tract, "Atheism Refuted in a Discourse to prove the Existence of God by T. P."—British Museum Catalogue, "Tom Paine", who was at one time popularly called an atheist. And perhaps, of the few who have upheld an indubitable form of positive theoretic atheism, none has been taken seriously enough to have exerted any influence upon the trend of philosophic or scientific thought. Robert Ingersoll might be instanced, but though popular speakers and writers of this type may create a certain amount of unlearned disturbance, they are not treated seriously by thinking men, and it is extremely doubtful whether they deserve a place in any historical or philosophical exposition of atheism.

FRANCIS AVELING.

**Athelney**, THE ABBEY OF, in the County of Somerset, England, was founded by King Alfred, A. D. 888, as a religious house for monks of the Order of St. Benedict. Originally Athelney was a small island

in the midst of dangerous morasses in what is now the parish of East Ling. It possessed scarcely more than two acres of firm land; was covered with alders and infested by wild animals, and was inaccessible except by boat (William of Malmesbury). Here Alfred found a refuge from the Danes; here he built the abbey dedicated to our Blessed Saviour, St. Peter, St. Paul, and St. Egelwine. He peopled it with foreign monks, drawn chiefly from France, with John of Saxony (known as Scotus) as their abbot. The original church was a small structure consisting of four piers supporting the main fabric and surrounded by four circular chancels. Little is known of the history of the abbey from the eleventh century up to the time of its dissolution except that the monks of Glastonbury attempted to annex it or have it placed under the Glastonbury jurisdiction. It was not a rich community. An indulgence of thirty days was given in 1321 for those who should assist in the rebuilding of the church, and the monks humbly petitioned Edward I to remit "corrod" for which they were unable to find the means of payment. The last abbot was Robert Hamlyn. With eight monks of his community, he surrendered 8 February, 1540, receiving a pension of £50 per annum and retaining his prebend of Long Sutton. The revenues (26 Hen. VII) were £209. 0s. 3d.

FRANCIS AVELING.

**Athenagoras**, a Christian apologist of the second half of the second century of whom no more is known than that he was an Athenian philosopher and a convert to Christianity. Of his writings there have been preserved but two genuine pieces:—his "Apology" or "Embassy for the Christians" and a "Treatise on the Resurrection". The only allusions to him in early Christian literature are the accredited quotations from his "Apology" in a fragment of Methodius of Olympus (d. 312) and the untrustworthy biographical details in the fragments of the "Christian History" of Philip of Side (c. 425). It may be that his treatises, circulating anonymously, were for a time considered as the work of another apologist. His writings bear witness to his erudition and culture, his power as a philosopher and rhetorician, his keen appreciation of the intellectual temper of his age, and his tact and delicacy in dealing with the powerful opponents of his religion. The "Apology", the date of which is fixed by internal evidence as late in 176 or 177, was not, as the title "Embassy" (*πρεσβηλα*) has suggested, an oral defence of Christianity, but a carefully written plea for justice to the Christians made by a philosopher, on philosophical grounds, to the Emperors Marcus Aurelius and his son Commodus, conquerors, "but above all, philosophers". He first complains of the illogical and unjust discrimination against the Christians and of the calumnies they suffer (i-iii), and then meets the charge of atheism (iv). He establishes the principle of monotheism, citing pagan poets and philosophers in support of the very doctrines for which Christians are condemned (v-vi), and demonstrates the superiority of the Christian belief in God to that of pagans (vii-viii). This first strongly reasoned demonstration of the unity of God in Christian literature is supplemented by an able exposition of the Trinity (x). Assuming then the defensive, the apologist justifies the Christian abstention from worship of the national deities (xiii-xiv) on grounds of its absurdity and indecency, quoting at length the pagan poets and philosophers in support of his contention (xv-xxx). Finally, he meets the charges of immorality by exposing the Christian ideal of purity, even in thought, and the inviolable sanctity of the marriage bond. The charge of cannibalism is refuted by showing the

high regard for human life which leads the Christian to detest the crime of abortion (xxxix-xxxvi). The treatise on the "Resurrection of the Body", the first complete exposition of the doctrine in Christian literature, was written later than the "Apology", to which it may be considered as an appendix. Athenagoras brings to the defence of the doctrine the best that contemporary philosophy could adduce. After meeting the objections common to his time (i), he demonstrates the possibility of a resurrection in view either of the power of the Creator (ii-iii), or of the nature of our bodies (iv-viii). To exercise such powers is neither unworthy of God nor unjust to other creatures (ix-xi). He shows that the nature and end of man demand a perpetuation of the life of body and soul.

MARCH and OWEN, *Douglas's Series of Christian, Greek and Latin Writers* (New York, 1876), IV; HARNACK *History of Dogma*, tr. BUCHANAN (Boston, 1903), II, 188-190. An English translation is found in *Ante-Nicene Fathers* (New York, 1903), II, 129-162; in vol. X, pp. 36-38, is an extensive bibliography (to 1890). The best editions are those of OTTO, *Corpus Apologetarum* (Jena, 1857), VII, and the Benedictine MARANUS in P. G. (Paris, 1857), VI, 889-1024. JOHN B. PETERSON.

**Athenry**, a small inland town in the county Galway, Ireland, anciently called Athnere, from *Ath-na-Riagh*, the king's ford, or the abode of the king. It was the first town established by the Anglo-Norman invaders of Connaught, and at a remote period became a place of importance. A Dominican monastery was completed there in 1261 on a site granted by Meyler de Bermingham. In time it became extensive and wealthy and was used as the chief burial place of the Earls of Ulster and the principal families of the adjoining territory. Indulgences for the benefit of the monastery were granted by the pope in 1400. The church was burned in 1423, and in 1427 two subordinate houses were established. In 1445 Pope Eugenius IV renewed the decree of Pope Martin V to encourage the repairing of the church, at which time there were thirty inmates in the monastery. A Franciscan friary was also founded there in 1464 by Thomas, Earl of Kildare, and chapels erected by his wife and the Earls of Desmond and O'Tully. The place was sacked in 1577 during the Elizabethan wars, but repaired in 1585. The northern Irish burned the town in 1596 but the abbey escaped. The Dominican establishment was revived in 1644 as a university, the town, however, never regained its ancient prestige. The Cromwellian period ruined the ecclesiastical buildings, of which the tower and east window remained in good condition to tell of the ancient extent and beauty of the foundation. The Board of Works in 1893 made extensive repairs to the ruins to preserve them.

LEWIS, *Topographical Dictionary of Ireland* (Dublin, 1839).

THOMAS F. MEEHAN.

**Athens, CHRISTIAN.**—Christianity was first preached in Athens by St. Paul. He came to Athens from Berea of Macedonia, coming probably by water and landing in the Peiræus, the harbour of Athens. This was about the year 53. Having arrived at Athens, he at once sent for Silas and Timotheos who had remained behind in Berea. While awaiting the coming of these he tarried in Athens, viewing the idolatrous city, and frequenting the synagogue; for there were already Jews in Athens. He also frequented the *agora*, and there met and conversed with the men of Athens, telling them of the new truths which he was promulgating. Finally, at the Areopagos, he spoke to them the sermon which is preserved in the seventeenth chapter of the Acts. The Athenians did not enthusiastically accept this first preaching of Christianity. The Acts mention,

however, that a few believed in Paul's teaching. Amongst these were Dionysios, a member of the Areopagite court, and Damaris, or Thamar possibly, who may have been a Jewess. A tradition asserts that St. Paul wrote from Athens his two letters to the Christians of Thessalonika. Even if this be so, his stay in Athens was not a protracted one. He departed by sea, and went to Korinth by way of Kenchree, its eastern harbour. It seems that a Christian community was rapidly formed, although for a considerable time it did not possess a numerous membership. The commoner tradition names the Areopagite as the first head and bishop of the Christian Athenians. Another tradition, however, gives this honour to Hierotheos the Thesmothete. The successors of the first bishop were not all Athenians by lineage. They are catalogued as Narkissos, Publius, and Quadratus. Narkissos is stated to have come from Palestine, and Publius from Malta. In some lists Narkissos is omitted. Quadratus is revered for having contributed to early Christian literature by writing an apology, which he addressed to the Emperor Hadrian. This was on the occasion of Hadrian's visit to Athens. Another Athenian who defended Christianity in writing at a somewhat later time was Aristeides. His apology was directed to the Emperor Marcus Aurelius. Athenagoras also wrote an apology. In the second century there must have been a considerable community of Christians in Athens, for Hygeinos, Bishop of Rome, is said to have written a letter to the community in the year 139. It is probable that the early Church of Athens did not have many martyrs, although Dionysios himself graces the martyrs' list. Under Decius, we find recorded in the catalogue of martyrs the names of Herakleios, Benedimos, Pavlinos, and Leonides with his followers, the holy woman Charissa, and her companions. One reason why the martyrs were few is that the Christians were also few. Besides, the spirit of the Athenian pagans and philosophers was not one of blood; and it is probable that the persecutions in Athens were rather of the social and scholastic kind. This would account for the writings of the apologists who thus would defend themselves by weapons similar to those which their opponents used. The philosophers of the Athenian schools did not indeed admire Christianity, as they understood it; nevertheless there is some ground for believing that amongst the teachers who occupied the official and historic chairs of philosophy at Athens there later was at least one who was a Christian, Prohæresios, the sophist. Be this as it may, it is certain that the teaching of the philosophers was not rudely anti-Christian. Otherwise the presence of Christians amongst the students could not be understood. Sixtus II, or Xystos, who suffered martyrdom in Rome about A. D. 258, also may have studied in Athens and is called "the son of an Athenian philosopher". But the most noted men who frequented the schools here were Basil from Kæsareia, and Gregory from Nazianzos, about the middle of the fourth century. These schools of philosophy kept paganism alive for four centuries, but by the fifth century the ancient religion of Elevis and Athens had practically succumbed. In the Council of Nikæa there was present a bishop from Athens. In 520 the schools of philosophy were closed. From that date Christianity had no rival in Athens.

Down to the time of Constantine, and later, there were no large Christian temples in Athens. Like the Jews, whose synagogues in pagan towns were small and unpretentious, the first Christians did not erect sumptuous temples. With their worship they did not associate splendour of temple and sanctuary as indispensable. In the time of Basil and Gregory, there were surely numerous church edifices in Athens, but they were not spacious temples. They are called

*lepoi oikoi*, and probably were not much larger than the ordinary dwelling-houses of the inhabitants. The first magnificent churches in Athens were, therefore, the Greek temples which, after the disappearance of paganism, were transferred to the use of the Christian rites. It must have been about Justinian's time when the most of the ancient temples were converted into churches. Churches or ruins of churches have been frequently found on the sites where pagan shrines or temples originally stood. This is in part due to the fact that the sites were first sanctified for Christian tradition by these pagan temples or sanctuaries being made into churches. It is also to some extent true that sometimes the saint whose aid was to be invoked at the Christian shrine bore some outward analogy to the deity previously hallowed in that place. Thus in Athens the shrine of the healer Asklepios, situated between the two theatres on the south side of the Akropolis, when it became a church, was made sacred to the two saints whom the Christian Athenians invoked as miraculous healers, Kosmas and Damian. Amongst the temples converted into churches were the Parthenon and the Erechtheion on the Akropolis, and the yet well-preserved Hephæsteion (or "temple of Theseus", as it is incorrectly called) near the ancient *agora*. The Hephæsteion was, in later times, sacred to St. George. Pittakis, a noted epigraphist of Athens in the early half of the last century, published an inscription which purports to state that in the year 630 the Parthenon was consecrated under the title of "the church of Divine Wisdom" (τῆς Ἁγίας Σοφίας). But Pittakis was very careless or credulous at times in the copying of inscriptions. So we do not know with certainty what was the original title of this church. Possibly, from its first conversion the Parthenon had been dedicated to the Panagia. At least we learn from Michael Akominatos that in the twelfth century it was sacred to the Mother of God. On the columns of this church, and on its marble walls, especially around the doors, are numerous *graffiti* inscriptions which record various events, many of them important for sacred and profane history, such as the names and deaths of bishops, and public calamities. In these *graffiti* inscriptions, this church is called "the great church", "the church of Athens", and the cathedral church, or *καθολικὴ ἐκκλησία*. All these appellations show that it was the metropolitan church of the city. In Greek usage, the name *καθολικόν* or *καθολικὴ ἐκκλησία*, was a title applied to churches which were the sees of bishops or archbishops.

That the Parthenon was a church as far back as the sixth century is proven by the cemetery which lay along its south side. This region was filled with Christian graves, in some of which were found coins of a date as early as the reign of Justinian. In order to fit the Parthenon for a church, changes had to be made in it; an apse was built at the east end, and a great entrance door was placed in the west end. The interior walls were covered with fresco paintings of saints. After the conversion of these Greek temples into churches, perhaps two or three centuries elapsed before the Athenians found it necessary to lavishly add to the number of large church edifices by erecting many new ones. Then they followed the styles of ecclesiastical architecture which had been developed elsewhere, and had become prevalent throughout so much of the empire. From about the end of the eighth century they erected new churches more frequently. Perhaps the Empress Eirene, who was an Athenian, gave some impulse to this tendency. As years went on, Athens and the surrounding villages of Attika, and the fields were filled with churches, many of them veritable gems of Byzantine comeliness. The churches which were built in Athens and vicinity during the Middle Ages numbered hundreds.

Likewise many monasteries were founded, both in Athens itself and in the country of Attika, especially on the slopes of the surrounding mountains of Hymettos, and Pentelikos, and Parnes. A complete list of the Bishops of Athens could not be made. But as time goes on, and seals and manuscripts and inscriptions are deciphered, the list of names will grow. Pistos, Bishop of Athens, was present at the Council of Nikæa in 325. Bishop Modestus was at the Council of Ephesos in 431. John, Bishop of Athens, was amongst the Fathers who signed the Acts of the Sixth Ecumenical Council. He was present as "Legate of the Apostolic See of ancient Rome". From the *graffiti* on the Parthenon a number of other names and dates are already known. In these *graffiti* we read names of bishops prior to the exaltation of Athens to the rank of an archbishopric, then the names of archbishops, and finally those of metropolitans. The time of the elevation of this see to an archbishopric cannot yet be fixed. Gregory II, who was pastor of the Athenians during the first patriarchate of Photios, bore the title of archbishop. But it is not known whether or not he was the first who had that title. This was about 857-867. Shortly afterwards the archbishops received the higher title of metropolitan. Niketas who took part in the Eighth Ecumenical Council under Basil the Makedonian, which closed 28 February, 870, and who signed the acts of that council as "Niketas by the grace of God, Metropolitan of Athens", on his seals, or leaden bulls, simply places the inscription "Niketas, Bishop of Athens". Amongst the signatures to the acts of this council, that of Niketas stands twenty-second in order. But in a full assembly of metropolitans he would not rank so high. According to the list made by Emperor Leon the Wise (886-911), a list intended to show the relative rank of each ecclesiastical dignitary under the Patriarch of Constantinople, the Metropolitan of Athens is relegated to the twenty-eighth place. Just what sees were under the Archbishop of Athens prior to Photios is not easy to discover. After the changes brought about by Photios and his successors, the sees that were suffragan to Athens varied in number from time to time. But in general it may be stated that all of Attika belonged directly to the Archbishop of Athens, after the abolishing of the See of Marathon, about the middle of the ninth century. And under Athens were, besides other bishoprics, the Sees of Evripas, Oreos, Karystos, and Porthmos in Evboea; Avlon; Diavleia in Phokis, and Koroneia in Boeotia; Andros, Skyros, Syros, and Seriphos of the islands; and, later, Keos and Ægina.

From Photios down to the Franks the Metropolitans of Athens were all of the Greek rite, naturally. Likewise their sympathies were rather with Constantinople than with older Rome. Their metropolitan church continued to be the ancient Parthenon. It seems that the residence of the bishops was on the Akropolis, in the great Portals, or Propylæa, and that in these Propylæa they had a private episcopal chapel. In these days education was not held in very general esteem in Athens. No special erudition characterized the clergy. Even the inscriptions which decorated the seals and bulls of bishops and abbots were often most childishly misspelled. From the time of Photios to the Franks the most noted ecclesiastic was probably the last bishop, Michael Akominatos. He, however, was Athenian neither by birth nor by education. He came to Athens expecting great things in the city of ancient wisdom, but was disappointed. Still it is wrong to say that Athens of the Middle Ages produced no scholars and noted personages. Athenais, who became queen to Theodosios in 421, and Eirene, who became empress in 780, were Athenians. From the sixth to the thirteenth century Athens was out and

out a provincial town, exercising no influence on the world at large, and almost unheard of in the politics of the day. Nevertheless, the Emperor Konstas on his way to Sicily in 662 spent the winter in Athens; and after his victories over the Bulgarians in 1018, Basil II visited this city to celebrate his triumphs. When, under Constantine, the Empire was divided into governmental dioceses, the close relations which then were created between the Church and the State caused the ecclesiastical divisions to be often identical with the civil. By this system all of Achaia, wherein was Athens, was included within the Diocese of Eastern Illyria, of which Thessalonika was the capital. All of this Diocese of Eastern Illyria was under the direct jurisdiction of the Bishop of Rome. And so it remained until the reign of Leo the Isaurian. This emperor, incensed at Pope Gregory III, because of his strong opposition to Leo's iconoclastic passion, retorted against the pope by transferring these countries of the Illyrian diocese from the jurisdiction of the Bishop of Rome to that of the See of Constantinople. This occurred in the year 732. In this great struggle between the iconoclasts and the adherents to the use of the icons, the Athenians placed themselves on the side of iconolatry. While accepting without any recorded protest their transference to the jurisdiction of the Eastern patriarch, they retained the images in their churches and continued to venerate them. All the inhabitants of Greece north of the Korinthiac Gulf, who then were called Helladikoi, or Helladians, were opposed to the iconoclasts. And their opposition was so determined that they fitted out an expedition and manned a fleet, intending to attack Constantinople, depose Leo, and place their leader, Kosmas, on the throne. In this expedition, in which the Athenians doubtlessly had an important part, assistance was given by the inhabitants of the Kyklad islands, who probably furnished most of the ships. The attempt, however, was futile. The fleet was easily destroyed by the imperial ships in April, 727. The mutual bitterness which was evinced in Constantinople by the contending parties of Photians and Anti-Photians was reflected here in Athens. Gregory II was archbishop when Ignatios was restored to his throne as Patriarch of Constantinople. Ignatios deposed him as being an adherent of Photios. His successor, Kosmas, was also later deposed. Then Niketas, a Byzantine, came to Athens as archbishop with the title of metropolitan. This Niketas was a supporter of Ignatios. His successor, Anastasios, was a follower of Photios. Sabbas, who succeeded Anastasios, was likewise a Photian and was one of those who signed the acts of the synod which closed in May, 880, by which Photios was again recognized as patriarch. A bull of his still exists, wherein he designates himself as "Metropolitan of Athens".

Throughout the East there was a peculiar type of *Panagia*-icon, copies of which might be seen in monasteries and churches in many places. This was the *Panagia Gorgoepekoos*. This *Panagia Gorgoepekoos* seems to have been originally an Athenian icon, and was probably identical with an icon which was called the *Panagia Athenaiotissa*. The *Athenaiotissa* was the Madonna of the church in the Parthenon. This icon is mentioned by Michael Akominatos.

After the conquest of the Byzantine Empire by the Europeans of the Fourth Crusade, in the partitionment which followed, Athens and the rest of Greece were given to Boniface, King of Thessalonika. Boniface gave Athens to one of his followers, Otho de la Roche. At their coming to Athens the Franks found it small and insignificant. They chose Thebes to be the seat of civil power rather than Athens. Thebes was a more important

trade centre than was Athens. Athens, however, was considered important enough to be continued as an archbishopric. It thus was ranked in equal dignity with the other larger cities of Greece, such as Thebes, within de la Roche's dominion, and Patrae and Korinth in the Morea. The conquest of Greece was accomplished in 1204 and 1205. The first Latin archbishop introduced the Latin ritual into the cathedral, the Parthenon, in the year 1206. This was Archbishop Berard. Thus after a lapse of centuries from the time of Leo the Isaurian, Greece and Athens were again placed under the jurisdiction of the Bishop of Rome. During the Frankish rule the archbishops of Athens were without exception of the Latin Rite, and were of Western lineage. Likewise the canons of the cathedral, in the Parthenon, were of Latin Rite, and were Franks. Their number was fixed by Cardinal Benedict, papal legate in Thessalonika, by order of Pope Innocent III. But the ritual of the common priests was not disturbed. The people continued to enjoy their own rites, celebrated by Greek priests in the Greek language. These Greek priests had, however, at least outwardly, to acknowledge the jurisdiction of the Latin archbishop. Amongst the sees which were suffragan to the Archbishop of Athens were those of Chalkis, Thermopylae (or Bodonitsa) Davleia, Avlon, Zorkon, Karystos, Koroneia, Andros, Skyros, Kea, and Megara. The last bishop of the Greek Rite was the learned Michael Akominatos, who, when the Franks came, retired to the Island of Keos, after first visiting the cardinal legate of the pope in Thessalonika to impetrate certain favours for those formerly under his charge who wished to adhere to the Greek form of worship. In Keos he lived as a monk in the monastery of St. John the Baptist. To support the Latin archbishop, and the canons, and the cathedral church, a number of possessions were given to him. Amongst these was the monastic property of Kassarane, and the island of Belbina, which Pope Innocent III gave to the Archbishop of Athens in 1208. The Frankish cavaliers lived in splendour in Thebes and Athens. The dignitaries of the Church lived in ease. Along with the coming of the Franks and the Latin Church there came also Latin monks. The Cistercians established themselves near Athens in 1208 in the beautiful monastery of Daphne, which previously was in the possession of Greek Basilian Fathers. The Franciscans were the most active religious order in Greece during this period. There were also Dominican convents.

In the year 1311 another great change came over Athens. The Franks were defeated by the Catalans in the swamps of the Kephisos in Boeotia. Athens, with Thebes, became their possession. Under their sway, which lasted more than seventy-five years, the higher dignitaries of the Church continued naturally to be Latins. In these days there were fourteen suffragan sees under the Archbishopric of Athens, and at the cathedral there were eleven or twelve canons. In 1387 another change overtook Athens. The Catalan possessions came under the ownership of the Acciajoli, Florentines who had risen to eminence as bankers. The Acciajoli retained possession of Athens until driven out by Omar Pasha, who in June of 1456 entered the city and, in 1458, took possession of the Akropolis for his Sultan, Mohammed II. The only notable change in ecclesiastical matters under the Acciajoli was that they permitted two archbishops to reside in Athens, a Greek dignitary for the Catholics of the Greek Rite, and a Latin for the Franks. In this way the defection of the Greeks of Athens from Roman jurisdiction was again a fact. The Latin archbishop lived in the *Castro*, that is, on the Akropolis, and the Greek prelate had his residence in the lower city. Franco Acciajoli was the last Duke of Athens. The last

Latin archbishop was Nicholas Protimus. He died in 1483. After his death Rome continued to appoint titular Latin archbishops to the See of Athens. Under Turkish domination the Church and all its property again became Greek. All the suffragan sees were again filled by Greek bishops, and the monasteries were again occupied by Greek monks. The Parthenon, however, was appropriated by the conquerors, who converted it into a mosque. The Greek bishops continued to live in the lower town, and during the latter half of the Turkish supremacy they usually resided near the church of the Panagia Gorgoepekoos, which they used as a private chapel. They lived elsewhere at times, however, for Father Babin mentions Archbishop Anthimos as living near the church of St. Dionysios, which was at the foot of the Areopagos Hill. In Turkish times, as previously, the sees under Athens were not always the same in number. Nor were they all identical with those that had been under the Latin archbishops. Some of them were Koroneia, Salona, Bodonitsa, Davleia, Evripos, Oreos, Karystos, Porthmos, Andros, Syra, and Skyros.

Amongst the religious orders that lived in Athens under Turkish rule were the Franciscans. They were there as early as 1658. But they had already been in Greece under the Franks. The Franciscans are to be mentioned with the Dominicans as being the first Western Europeans who sent students to Athens and other places in the East for the purpose of studying the language and literature of the Greeks. Another fact to the credit of the Franciscans of Athens is that, although not primarily interested in antiquities, they fruitfully contributed to the awakening of our interest in such studies. There appeared in Paris in the second half of the seventeenth century, a book by Guillet or "de la Guilletière", which is entirely based on information received from the Franciscans of Athens. Franciscans sketched the first plan of modern Athens. Considering how suspicious the Turks were of any kind of description of their possessions and castles, it was quite a feat for the Franciscans to have made so good a plan as they did. It was published by Guillet in his book, "Athènes, anciennes et nouvelles", 1675. In those days the Capuchins had a comfortable monastery in Athens, which they built on ground bought from the Turks in 1658, behind the choragic monument of Lysikrates. The monument itself served them as their little library. In this monastery many a traveller found hospitality. It was destroyed by fire in 1821, and the site is now owned by the French Government. The Jesuits were also active in Athens. They came in 1645. It must be noted that it was Father Babin, a Jesuit, who wrote the first careful account of the modern condition of the ruins of ancient Athens. This he did in a letter to the Abbé Pécoil, canon of Lyons. This letter was written 8 October, 1672. It was published with a commentary by Spon in 1674 under the title of "Relation de l'état présent de la ville d'Athènes". The Jesuits finally withdrew from Athens, leaving the entire field to the Franciscans. The Franciscans remained until the beginning of the war of the revolution. In the time of Babin and Spon there were about two hundred churches in Athens, all of the Greek Rite, except the chapels in the monasteries of the western monks. With the war of the insurrection, in 1821, ends the history of the older Church of Athens. A new Latin archbishopric has again its residence in Athens. (See ATHENS, MODERN DIOCESE OF.) Since 1833 the Church of the Greek Rite has undergone serious changes of jurisdiction, for it no longer recognizes the leadership of the Patriarch of Constantinople, but is a national autocephalous church.

DANIEL QUINN.

**Athens, MODERN DIOCESE OF.**—The Greeks have long regarded their religion as a national affair. This notion is so deep-rooted that they cannot understand how a citizen can well be a true Greek if he gives his allegiance to any religion which is not that of the Greek Church. At the present time the majority of Catholics who live within the Diocese of Athens are therefore foreigners, or of foreign descent. Of the foreigners who are Catholics, the greater part are of Italian nationality. Most of those who are of foreign descent have come into Athens and other portions of this diocese from the islands of the Aegean and Ionian seas. The Catholics of these islands are largely descendants of the Western conquerors who held possession of the islands for two or three centuries, or even longer, beginning with the Fourth Crusade. As a rule, they are of Venetian and Genoese descent. In these islands some of the native Greeks, on account of the higher social and political standing of the foreign element, accepted the Catholic Faith and obedience. From these converted Greeks some Catholics in the Diocese of Athens are now descended. On three or four of the islands, outside of the Diocese of Athens, there are many such Catholics who are pure Greeks, being descended from converts to Catholicism in the time of the foreign feudal governments. These Catholics from the islands are the nucleus of the future prosperity of Catholicism in Greece, for gradually they are identifying themselves with the good of the country and its worthier ideals. Although they are still conscious of their foreign extraction, or former foreign sympathies, they now feel that their residence of centuries in Greek territory has made them Greeks. The real foreign element is made up of those Catholics who have migrated into Greece since it has become a free country. These are chiefly Italians and Maltese. Most of them are labourers who came to find employment on the railroads and other public works, or to live as fishermen or boatmen in the larger seaport towns. The exact number of Catholics cannot easily be estimated. Possibly in the entire Diocese of Athens there are about 10,000, of whom about one-fourth attend church regularly. From amongst the members of the Greek Church no converts are made to Catholicity. At least, they are extremely rare. It is against the positive and explicit law of the State for any other church to make proselytes from the established Greek or Orthodox Church. In the first National Assembly, which was held at Epidavros in 1822, it was declared that the Orthodox Church is the State Church. This declaration was repeated in the Assembly at Trezen in 1827. Such has been the strict law ever since. But, except that propaganda is severely prohibited, the Catholic Church is perfectly free, is fairly treated, and highly respected.

Otho of Bavaria, the first king of regenerated Greece, was a Catholic. In his reign the Catholics were few. But arrangements were made that the Catholics could have a place of worship wherever they existed in sufficient numbers. After Athens became the seat of government, in 1834, an abandoned Turkish mosque was given to the Catholics as a place of worship. It is still used as a church, and is attended chiefly by Maltese and Italians who live in

and around the Old Market, near the Tower of the Winds. Mass is said there on Sundays and Holy Days by a priest from the cathedral. After the lapse of some years, in 1876, an archbishopric was established in Athens. Those who have occupied this see are Archbishops Marangos, Zaffino, De Angelis, and Delendas. De Angelis was an Italian; Zaffino a native of Corfu; all the other archbishops were born in the Aegean Islands. Within the Diocese of Athens there are now eight churches. Of these two are in Athens, and there is one in each of the towns of Peiræus (the harbour of Athens); Patræ, the chief town of the Peloponnesos; Volos, the seaport of Thessaly; Lavrion (Ergasteria), in the silver mines of Attica; Herakleion, a Bavarian settlement in Attika; and Navplion in the Argolid. Most of the Catholics, however, are concentrated at Athens, Peiræus, and Patræ. Of the two churches in Athens, one is the ancient mosque which Otho donated to the Catholics, and the other is the cathedral of St. Dionysios. It is a stone structure in basilica style, with a portico in front supported by marble columns. The interior is divided into three naves separated from each other by rows of columns of Tenian marble. The apse has been frescoed. This cathedral was built with money sent from abroad, especially from Rome. Besides the regular parishes there are missions here and there. Some years ago there were missions at Kalamata, Pyrgos, and Kalamaki. The only considerable one at present is at Lamia. Within the Diocese of Athens there are at present eleven priests engaged in parochial work: four at the cathedral in Athens, two at Patræ, and one at each of the churches of Peiræus, Lavrion, Volos, Herakleion, and Navplion. All of them are secular priests.

French sisters conduct schools for girls in Athens and at the Peiræus, and Italian sisters have schools for girls at Patræ. They have boarders as well as day scholars. In the town of the Peiræus there is a good school for boys conducted by French Salesian Fathers. Boarders and day scholars are accommodated, and both classical and commercial courses are given. But the most important school of the diocese is the Leonteion at Athens, founded by Pope Leo XIII, to supply ordinary and theological education for all Greek-speaking Catholics. It embraces a preparatory department, an intermediate or "hellenic" school, a gymnasium or college, and an ecclesiastical seminary. The average number of pupils and students for the past five years is about 175. The faculty consists of both priests and laymen. In its character as seminary, the Leonteion receives students from other dioceses as well as from that of Athens. Previous to the establishment of the Leonteion, candidates for the priesthood were educated chiefly in the Propaganda, at Rome, and in a diocesan seminary which existed in the Aegean town of Syra. The seminary at Syra has been closed, and it is now intended that all clerical training be given in the Leonteion and the Propaganda.

The only publication of note for the Catholics of this diocese is the "Harmonia", a periodical devoted to Catholic interests. The "Harmonia" is supported chiefly by a subsidy from Rome. One does not expect to find a large number of noted scholars in so small a Catholic community. But all the clergy are men of wide education. Every one of them, with other accomplishments, speaks two or three other languages as well as the vernacular Greek of the country. Amongst the laymen special mention should be made of the brothers Kyparissos Stephanos and Klon Stephanos. Kyparissos, a mathematician whose fame extended far beyond the confines of Greece, was made a professor in the National University. His brother Klon, an anthropologist of repute, engaged in special historical, archaeological, and anthropological researches, became director of

the Anthropological Museum of Athens. There are in Greece no Uniat Greek Catholics. All are of the Latin Rite. This is because most of these Catholics are from the West, either by descent or by birth, and they have kept their own Western rite. It might be better for Catholicism in Greece if the Catholics were to adopt the native rite, and to have their liturgy in the liturgical language of the country. But many of the Catholics of Athens would never willingly accept such a change, which they would regard rather from a national than from a religious point of view, and would consider a denial of their Italian, or other Western, origin.

DANIEL QUINN.

**Athias, JOSEPH**, b. in Spain, probably in Cordova, at the beginning of the seventeenth century; d. at Amsterdam, 12 May, 1700. In 1661 and 1667 he issued two editions of the Hebrew Bible. Though carefully printed, they contain a number of mistakes in the vowel points and the accents. But as they were based on the earlier editions compared with the best manuscripts, they were the foundation of all the subsequent editions. The copious marginal notes added by Jean de Leusden, professor at Utrecht, are of little value. The 1667 edition was bitterly attacked by the Protestant savant, Samuel Desmarets; Athias answered the charges in a work whose title begins: "Cæcus de coloribus". He published, also, some other works of importance, such as the "Tikkun Sepher Torah", or the "Order of the Book of the Law", and a Judæo-German translation of the Bible. The latter involved Athias in a competition with Uri Phœbus, a question that has been discussed but cannot be fully cleared up at this late date.

**Athos, MOUNT.**—Athos is a small tongue of land that projects into the Aegean Sea, being the easternmost of the three strips in which the great mountainous peninsula of Chalcidice ends. It is almost cut off from the mainland, to which it is bound only by a narrow isthmus dotted with lakes and swamps

MONASTERY OF ESPHIGMENON, MOUNT ATHOS

interspersed with alluvial plains. It has been well called "a Greece in miniature", because of the varied contour of its coasts, deep bays and inlets, bold cliffs and promontories, steep wooded slopes, and valleys winding inland. Several cities existed here in pre-Christian antiquity, and a sanctuary of Zeus (Jupiter) is said to have stood on the mountain. The isthmus was famous for the canal (3,950 feet in length) which Xerxes had dug across it, in order to avoid the perilous turning of the limestone peak immemorially known as Mount Athos, in which the small peninsula ends, and which rises to a height of some 6,000 feet. From the summit of this peak on a clear day

are visible the coasts of Macedonia and Thrace, even the entire Ægean from Mount Olympus in Thessaly to Mount Ida in Asia Minor. It is the mountain that the architect Dinocrates offered to turn into a statue of Alexander the Great with a city in one hand and in the other a perennially flowing spring. Medieval Greek tradition designated it as the "high mountain" from which Satan tempted Our Lord. Its chief modern interest lies in the fact that at least from the beginning of the Middle Ages it has been the home of a little monastic republic that still retains almost the same autonomy granted a thousand years ago by the Christian emperors of Constantinople. In 1905 the many fortified monasteries and hermitages of Athos contained 7,553 monks (including their numerous male dependents), members of the Orthodox Greek Church: Greeks, 3,207; Russians, 3,615; Bulgarians, 340; Rumanians, 288; Georgians, 53; Servians, 18; other nationalities 32. The principal monasteries bear the following names: Laura, Iviron, Vatopedi, Chilandarion, St. Dionysius, Coutloumoussi, Pantocrator, Xiropotamos, Zographu, Docheiarion, Caracalla, Philotheos, Simopetra, St. Paul, Stauroiniceta, Xenophon, Gregorios, Esphigmenon, St. Panteleimon, St. Anna (Roessicon), and Karyæes.

**HISTORY.**—The origins of monastic life on Mount Athos are obscure. It is probable that individual hermits sought its lonely recesses during the fourth and fifth centuries, and were numerous in the ninth century at the time of the first certain attempts at monastic organization. The nearest episcopal see was that of Hierissus, and in conformity with ancient law and usage its bishop claimed jurisdiction over the monks of the little peninsula. In 885 Emperor Basil the Macedonian emancipated them from the jurisdiction of the monastery of St. Colobos near Hierissus, and allotted to them Mount Athos as their property. Soon after, the oldest of the principal monasteries, Xiropotamos, was built and adopted the rule of St. Basil. Saracen pirates disturbed the monks in the ninth and tenth centuries, but imperial generosity always came to the aid of this domestic "holy land" of the Greeks. About 960 a far-reaching reform was introduced by the Anatolian monk Athanasius of Trebizond, later known as Athonites. With several companions from Asia Minor he founded by the seashore the monastery since known as Laura, where he raised the monastic life to a high degree of perfection. Eventually the new settlement was accepted as a model. With the help of the imperial authority of John Tzimiscēs (969-976) all opposition was set aside and the cœnobitic or community life imposed on the hermits scattered in the valleys and forests. Athanasius was made abbot general or superior (*Protos*) of the fifty-eight monastic communities then on the mountain. From this period date the monasteries known as Iviron (Iberians), Vatopedi, and Esphigmenon. At this time, also, there arose a cause of internal conflict that has never been removed. Hitherto only one nationality, the Greek, was represented among the monks. Henceforth Slavic faith and generosity, and later on Slavic interests, had to be considered. The newly converted Slavs sought and obtained admission into the recently opened monasteries; before long their princes in the Balkan Peninsula began to found independent houses for Slavic monks. In this way arose during the reign of Alexius I (1081-1118) the strictly Slavic monasteries of Chilandarion and Zographu. The Byzantine emperors never ceased to manifest their interest in the little monastic republic and even profited politically by the universal esteem that the religious brotherhood enjoyed throughout the Christian world.

With the aid of the Patriarch of Constantinople, in 1046, Constantine Monomachos regulated the domestic government of the monasteries, the ad-

ministration of their temporal possessions, and their commercial activity. By the imperial document (*typicon*) which he issued, women are forbidden the peninsula, a prohibition so strictly observed since that time that even the Turkish *aga*, or official, who resides at Karyæes (Cariez) may not take his harem with him. About the year 1100 the monasteries of Mount Athos were 180 in number, and sheltered 700 monks, with their dependents. At this time there came into general use the term *Hagion Oros* (Holy Mountain, *ἅγιος ὄρος*, *Monte Santo*). Alexius I granted the monasteries immunity from taxation, freed them from all subjection to the Patriarch of Constantinople, and placed them under his immediate protection. They still depended, however, on the neighbouring Bishop of Hierissus for the ordination of their priests and deacons. Alexius also chose to be buried on the Holy Mountain among the brethren (1118). A century later, after the capture of Constantinople (1204), the Latin Crusaders abused the monks, who thereupon appealed to Innocent III; he took them under his protection and in his letters (xiii, 40; xvi, 168) paid a tribute to their monastic virtues. However, with the restoration of Greek political supremacy the monks returned (1313) to their old allegiance to Constantinople.

In the fourteenth century a pseudo-spiritualism akin to that of the ancient Eucharites or Messalians, culminating in the famous Hesychast controversies (see *HESYCHASM*; *PALAMAS*), greatly disturbed the mutual harmony of Greek monasteries, especially those of Mount Athos, one of whose monks, Callistus, had become Patriarch of Constantinople (1350-54) and in that office exhibited great severity towards the opponents of Hesychasm. Racial and national discord between the Greeks and the Servians added fuel to the flames, and for a while the monks were again subjected to the immediate supervision of the Bishop of Hierissus. In the meantime the Palæologi emperors at Constantinople and the Slav princes and nobles of the Balkan Peninsula continued to enrich the monasteries of Mount Athos, which received the greater part of their landed wealth during this period. Occasionally a Byzantine emperor took refuge among the monks in the hope of forgetting the cares and responsibilities of his office. Amid the political disasters of the Greeks, during the fourteenth century, Mount Athos appears as a kind of Holy Land, a retreat for many men eminent in Church and State, and a place where the spirit of Greek patriotism was cherished when threatened elsewhere with ruin (Krumbacher, 1058-59). This period was also marked by the attempts of the monastery of Karyæes to secure a pre-eminence over the others, the final exclusion of the Bishop of Hierissus from the peninsula, fresh attacks from freebooters of all kinds, and the foundation of several new monasteries: Simopetra, Castamonitu, St. Paul, and St. Dionysius. The Fall of Constantinople (1453) brought no modification of the conditions on the Holy Mountain. The monks, who had stubbornly opposed all attempts at reunion with the Apostolic See, submitted at once to the domination of the Osmanli, and, with rare exceptions, have never been interfered with by the Turkish authorities. The hospodars of Wallachia remained as ever their friends and benefactors. Though the monks sympathized with the Greeks in the War of Independence (1822-30), their estates on the Greek mainland were secularized by Capo d'Istria and a similar fate has overtaken their properties in the Danubian principal cities. They still hold numerous farms and properties in certain islands of the Archipelago and on the mainland (Kaulen in *Kirchenlex.*, I, 1557-59; Bayet in *Grande Encycl.*, s. v. Athos).

**CONSTITUTION AND GOVERNMENT.**—This monastic republic is governed by an assembly of 20 members,

one representative from each of the 20 principal monasteries; from among these is elected annually, and in due rotation, a committee of 4 presidents. The great seal of the united monasteries is in four pieces and is divided among the members of this committee. One of the members is chosen as chairman, or *Protos*. Meetings of the assembly are held weekly (Saturday), at Karyaes, and the assembly acts as a supreme parliament and tribunal, with appeal, however, to the patriarch at Constantinople.

MONASTERY OF HAGIOS PAVLOS, OR ST. PAUL, MOUNT ATHOS

The Turkish Government is represented by an agent at Karyaes, the diminutive capital of the peninsula and the landing-place for visitors. A detachment of Christian soldiers is usually stationed there, and no one may land without permission of the monastic authorities. The monks have also an agent at Saloniki and another at Constantinople. Almost the only source of contention among them is the rivalry between the Greeks, inheritors of old traditions and customs, and the Russians of the great monastery of Rossicon (St. Anna), representative of the wealth, power, and interests of their church and country, and generously supported from St. Petersburg. In its present form the constitution of the monasteries dates from 1783.

**MONASTIC LIFE.**—Each of the twenty great monasteries (twenty-one, including Karyaes) possesses its own large church and numerous chapels within and without its enclosure, which is strongly fortified, recalling the feudal burghs of the Middle Ages. The high walls and strong towers are reminders of the troubled times of the fourteenth and fifteenth centuries when corsairs abounded and self-defence was imperative. All of the great monasteries are on the Holy Mountain proper, and are most picturesquely situated from sea to summit, amid dense masses of oak, pine, and chestnut, or on inaccessible crags. To each of these monasteries is attached a certain number of minor monasteries (*σκήτται, asceteria*), small monastic settlements (*καθίσματα*), and hermitages (*κελλία, cellæ*). Every monastic habitation must be affiliated to one or the other of the great monasteries and is subject to its direction or supervision. All monasteries are dedicated to the Mother of God, the larger ones under some specially significant title. The ancient Greek Rule of St. Basil is still followed by all.

In the observance of the Rule, however, the greater monasteries are divided into two classes, some following strictly the *cœnobitic* life, while others permit a larger personal freedom. The latter are called "idiorythmic"; in them the monks have a right of personal ownership and a certain share in the government of the monastery (Council of Elders); they take their meals apart, and are subject to less severe regulations. In the former, known as "*cœno-*

*bitic*" (*κοινόβιον, cœnobium*, common life), there is a greater monastic rigour. The superior, or *hegoumenos* (*ἡγούμενος*), has absolute authority, and all property is held in common. The chief occupation of the monks is that of solemn public prayer, by night and by day, i. e. recitation of the Divine Office, corresponding to the solemn choir-service of the Latin Church. (See GREEK RITE, BREVARY, PSALMODY.) This leaves little time for agricultural, industrial, or intellectual labour. Some fish, or practise minor industries in aid of the common support, or administer the monastic estates located elsewhere; others go abroad occasionally to collect a part of the yearly tribute (about two dollars and a half) that each monk must pay to the Turkish Government. A portion of this is collected from the monks themselves; the rest is secured by the revenue of their farms or other possessions, and by contributions from affiliated monasteries in the Balkan Peninsula, Georgia, and Russia. The generosity of the Greek faithful is also a source of revenue, for Mount Athos is one of the most sacred pilgrimage sites of the entire Greek Church, and the feasts of the principal monasteries are always celebrated with great pomp. It may be added that the monks practise faithfully the monastic virtue of hospitality. The usual name for the individual monk here, as elsewhere in the Greek Orient, is *Kalogeros* (good old man). In their dress the monks do not differ from other communities of Greek Basilians.

**ARCHITECTURE AND THE ARTS.**—Most of the buildings of Mount Athos are comparatively modern. Yet, because of the well-known conservative character of the monks, these edifices represent with much fidelity the Byzantine architecture, civil and religious, of the tenth to the fourteenth century. The churches are very richly adorned with columns and pavements of marble, frescoed walls and cupolas, decorated screens, etc.; there are not many mosaics. Some of the smaller oratories are said to be the oldest extant specimens of private architecture in the West, apart from the houses of Pompeii. The ecclesiastical art of the Greek Orient is richly represented here, with all its religious respect, though also with all its immobile conservatism and its stern refusal to interpret individual feeling in any other forms than those made sacred by a long line of almost nameless monastic painters like Panselinos and confided by his disciples to the famous "Painters' Book of Mount Athos" (see Didron, *Manuel d'iconographie chrétienne*, Paris, 1858). Though there is not in the 935 churches of the peninsula any art-work older than the sixteenth century (Bayet) their frescoes, small paintings on boards, gilt and jewelled metal work, represent with almost unswerving accuracy the principles, spirit, and details of medieval Byzantine art as applied to religious uses.

**LIBRARIES.**—Each monastery possesses its own library, and the combined treasures make up a unique collection of ancient manuscripts (Montfaucon, *Palaographia Græca*, Paris, 1748, 441 sqq.). By far the richest in this respect is the Russian monastery of Saint Anna (Rossicon). Some of the more valuable classical Greek manuscripts have been purchased or otherwise secured by travellers (Naumann, "Serapeum", X, 252; Duchesne, "Mémoire sur une mission au Mont Athos", Paris, 1876; Lambros, "Catalogue of the Greek Manuscripts on Mount Athos", Cambridge, 1895, 1900). It was in this way that the text of Ptolemy first reached the West. Similarly, the oldest manuscript of the second-century Christian text known as "The Shepherd of Hermas" came from Mount Athos. The manuscripts now in possession of the monks have chiefly an ecclesiastical value; their number is said to be about 8,000. There are also in the library and archives of each monastery a great many documents

(donations, privileges, deeds, charters) in Greek, Georgian, and Old-Slavonic, beginning with the ninth century, some of which are important for the historian of Byzantine law and of the medieval Greek Church (Miklosich and Müller, *Zachariä von Lingenthal, Uspenski*). The monks of Mount Athos are somewhat indifferent towards these treasures; nothing has been done to make them accessible, except the unsuccessful attempt of Archbishop Bulgari of Corfu to found at Mount Athos, towards the close of the eighteenth century, a school of the classical languages. The monasteries conduct a few elementary schools for the teaching of reading and writing; nowhere, perhaps, is the intellectual stagnation of the Greek Schism more noticeable. The monks are chiefly devoted to the splendour of their religious services; the solitaires still cherish Hesychast ideas and an apocalyptic mysticism, and the whole monastic republic represents just such an intellectual decay as must follow on a total exclusion of all outside intercourse and a complete neglect of all intellectual effort (Kaulen).

THOMAS J. SHAHAN.

**Atienza**, JUAN DE, b. at Tordehumos, near Valladolid, in Spain, in the year 1546, eldest son of the royal Councillor of Castile, Bartolomé de Atienza, a very distinguished juriconsult under Charles V. He studied law in the celebrated University of Salamanca, but in 1564 forsook the legal career in order to become a Jesuit. While in Spain, he already occupied distinguished positions. He was Prefect of the College of Avila, Procurator of the Province of his order, founder of the College of Villa García, its rector and master of novices, and rector of the College of Valladolid. While thus honourably placed in his mother country, he became informed of a call for fifty Jesuits, to be sent to Peru in the interests of religion and of the Indians. Father Atienza at once asked permission to become one of their number. He reached Lima in 1581 and found there his appointment as rector of the College of San Pablo. In that capacity he was surrogate to the Provincial, Father Baltasar de Piñas, and founded, under the direction of the Company of Jesus, the College of San Martín, the first school of secular learning established at Lima. The foundation of that school was confirmed by Pope Sixtus V, in 1588, and Father Atienza became its first rector. In 1585 he was made Provincial of the Jesuits in Peru. He at once began to foster and extend the missions in Ecuador, the Gran Chaco, Tucuman, and Paraguay. Out of these efforts the province of Paraguay was born in 1607. During that period a printing press was established by the Jesuits at the Indian village of Julí. Jointly with Father José de Acosta he directed the publication of catechisms and textbooks of Christian doctrine for the use of the Indians. These religious "primers" were printed between the years 1583 and 1590, at Lima. They are in Spanish, Quichua, and Aymará.

I; TORRES SALDAMANDO, *Los Antiguos Jesuitas del Perú* (Lima, 1882); BERNABÉ COBO, *Historia de la fundación de Lima* (1639; Lima, 1882).

AD. F. BANDELIER.

**Atkinson**, JAMES, Catholic confessor, tortured to death in Bridewell prison in 1595. His pathetic and romantic story tells us nothing of his early life, but he is found in the Bridewell prison, one of the worst in London, and delivered over to Topcliffe, the notorious priest-hunter, who was trying to wring out from him, by torture, evidence on which he might accuse his master, Mr. Robert Barnes, who then held Mapledurham House, of having entertained priests, and in particular the future martyr, Venerable John Jones, O. S. F. Yielding to torment, Atkinson accused his master of having done so, but shortly after repented, and was lost in despair, knowing on the one hand that Topcliffe would torture him again, perhaps unto death, and on the other fearing that no priest could possibly come to confess and absolve him before his conflict. Unknown to him, however, a Jesuit Father happened to be in the same prison. This was Father William Baldwin (or Bawden), a man who afterwards filled important positions in his order. He had been arrested on suspicion while on shipboard, and had assumed the part of an Italian merchant unacquainted with the English language, and with such success that he was on the point of being exchanged for an English officer who had been captured by the Spaniards on board the Dainty. Atkinson's despair put Father Baldwin into a quandary. It was evident that he was at best a weakling, perhaps a traitor in disguise. To speak to such a one in English, and much more to own to him that he was a priest, would be to endanger his life. So he tried to comfort him, at first through a fellow-prisoner who knew Latin, and finally offered to bring him a priest. The poor sufferer's joy was so great that the missionary ventured to creep to his bedside that night and tell him that he was a priest. Then Atkinson held back, either out of suspicion or because, as he said, he was not prepared. Father Baldwin's fears were reawakened, but next night the penitent made his confession with evident contrition, was soon again tortured, and died under or shortly after the torment. Atkinson's cause has been proposed for Beatification, but evidence for his final perseverance, though very necessary, is naturally hard to find.

CHALLONER, *Missionary Priests* (1864), II, 189; DODD, *Church History* (TIERNY ed.), III, ap. 204; FOLEY, *Records S. J.*, III, 503; RECORD OFFICE, *Treasurer of the Chamber's accounts for 1594*, roll 190b.

J. H. POLLEN.

**Atkinson**, NICHOLAS, priest and martyr, is probably to be identified with Venerable Thomas Atkinson. Dodd, who mentions Nicholas's death as having taken place at York in 1610, does not mention Thomas at all; yet all the facts which he relates of the one are certainly true of the other, while there is no corroboration for Dodd's date of Nicholas's martyrdom. It seems probable, however, that there was an old Marian priest named Nicholas, or "Ninny", Atkinson (Gillow, 85).

DODD, *Church History*, II, 376.

J. H. POLLEN.

**Atkinson**, PAUL OF ST. FRANCIS.—One of the notable confessors of the English Church during the age which succeeded the persecution of blood. Having been condemned to perpetual imprisonment for his priesthood, about the year 1699, he died in confinement after having borne its pains for more than thirty years. He was of a Yorkshire family and was called Matthew in baptism. He joined the English Franciscan Convent at Douai in 1673, and had served with distinction on the English mission for twelve years, when he was betrayed by a maid-servant for the £100 reward. One governor of his prison, Hurst Castle on the Solent, allowed him to walk outside the prison walls; but complaint was made of this and the leave was revoked.

Correspondence of BISHOP MILNER in the *Gentleman's Magazine*, LX, 234, 332, 412; OLIVER, *Collections Illustrating History of the Catholic Religion in Cornwall*, 565; COOPER in *Dict. Nat. Biog.*, II, 224; GILLOW, *Bibl. Dict. Eng. Cath.*, I, 84.  
J. H. POLLEN.

**Atkinson, SARAH**, philanthropist and biographer, b. at Athlone, Ireland, 13 October, 1823; d. Dublin, 8 July, 1893. She was the eldest daughter of John and Anne Gaynor, who lived on the western bank of the Shannon, in that part of Athlone which is in the County Roscommon. At the age of fifteen, she removed with her family to Dublin, where her education was completed. At twenty-five, she married Dr. George Atkinson, part proprietor of the "Freeman's Journal". The loss of her only child in his fourth year so deeply affected Mrs. Atkinson that she resolved to spend the rest of her life in charitable and other good works. With her friend, Mrs. Ellen Woodlock, she interested herself in the female paupers of the South Dublin Union, and opened a home to which many were transferred and were made useful members of society. Her house in Drumcondra soon became the rendezvous for the charitably disposed. It was even more a literary salon. Here she prepared her life of Mary Aikenhead which Mr. W. E. H. Lecky has warmly commended, and here she wrote her many valuable essays. For many years she translated into English the French "Annals of the Propagation of the Faith". Much of her time was devoted to visiting the hospitals and poor people at their homes, and to other beneficent purposes. To her is largely due the success of the Childrens' Hospital, Temple Street, Dublin. The management of the Sodality of the Children of Mary, attached to the Church of St. Francis Xavier, was one of her particular pleasures. To the Hospice for the Dying, at Harold's Cross, she was a constant benefactress. Even her writings were made to serve the great objects of her life. In Duffy's "Hibernian Magazine", 1860-64, "The Month", 1864-65, "The Nation", 1869-70, the "Freeman's Journal", 1871, and in the "Irish Monthly" after its inception are to be found many important essays by her, chiefly biographical and historical. Some of her earliest and longest essays appeared in the "Irish Quarterly Review"; the best of them are included in her volume of "Essays" (Dublin, 1895). Her "Life of Mary Aikenhead", modestly published with her initial only, appeared in 1879, and is one of the best Catholic biographies in English. Her "Essays" include complete and learned dissertations on such divergent subjects as "St. Fursey's Life and Visions", "The Geraldines", "The Dittamondo", "Devorgilla", "Eugene O'Curry", "Irish Wool and Woolens", "St. Bridget", and excellent biographies of the sculptors John Henry Foley and John Hogan, the best accounts yet written of those great artists. Indeed most of these essays are the best studies we have on the various subjects. Her "Citizen Saint" (St. Catherine of Siena) occupies a hundred pages, and is a most able summary.

MULHOLLAND, in the *Freeman's Journal* files (Dublin, July, 1893), and prefatory memoir in the *Essays*; TYNAN, *Irish Independent*, files (Dublin, July, 1893); *The Irish Monthly* (Dublin, November, 1893)—a full list of her writings.  
D. J. O'DONOGHUE.

**Atkinson, THOMAS, VEN.** martyred at York, 11 March, 1616. He was b. in the East Riding of Yorkshire, was ordained priest at Reims, and returned to his native country in 1588. We are told that he was unwearied in visiting his flock, especially the poor, and became so well known that he could not safely travel by day. He always went afoot until, having broken his leg, he had to ride a horse. At the age of seventy he was betrayed, and carried to York with his host, Mr. Vavasour of Willitof, and some members of the family. A pair of beads, and the form of an in-

dulgence were found upon him, and he was condemned to be hanged, drawn, and quartered. He suffered "with wonderful patience, courage, and constancy, and signs of great comfort".  
CHALLONER, *Missionary Priests*, II, 51; GILLOW, *Bibl. Dict. of Engl. Cath.*, I, 86.

PATRICK RYAN.

**Atom.**—(Gr.  $\alpha$  privative, and  $\tau\epsilon\mu\omega$ , cut; indivisible). Primarily, the smallest particle of matter which can exist; the ultimate and smallest division of matter; in physics, sometimes the smallest particle to which a substance can theoretically be reduced; in chemistry, the smallest particle of matter that can exist in combination with other atoms building up or constituting molecules. Two opposite doctrines of the constitution of matter were held by the ancient philosophers. One was that matter was infinitely divisible without losing its distinctive and individual properties. This is the doctrine of continuity or homœomery. Anaxagoras is given as the founder of this view of the constitution of things. According to it any substance, such as wood or water, can by no process of subdivision, however far it might be carried, be made to be anything but a mass of wood or water. Infinite subdivision would not reach its limit of divisibility. Democritus and others held that there were ultimate particles of matter which were indivisible, and these were called atoms. This is the doctrine of atomicity, upheld by Epicurus, and enlarged on by Lucretius in his "De Rerum Naturâ". The early atomists held that the atoms were not in contact, but that voids existed between them, claiming that otherwise motion would be impossible. Among the moderns, Descartes and Spinoza adhered to continuity. Leibnitz upheld atomicity, and Boscovich went to the last extreme of the theory, and defined atoms as centres of force, denying them the attribute of impenetrability.

**MOLECULE AND ATOM.**—Modern science holds that matter is not infinitely divisible; that there is an ultimate particle of every substance. If this particle is broken up, that particular form of matter will be destroyed. This particle is the molecule. It is composed of another division of matter called the atom. Generally, probably always, a molecule consists of several atoms. The atoms unite to form molecules and cannot exist except as constituents of molecules. If a molecule of any substance were broken up, the substance would cease to exist and its constituent atoms would go to form or to enter into some other molecule or molecules. There is a tendency to consider the molecule of modern science as identical with the atom of the old philosophers; but the modern atomic theory has given the molecule a different status from that of the old-time atom. Atom, as used in natural science, has a specific meaning based upon the theory of chemistry. This meaning is modified by recent work in the field of radio-activity, but the following will serve as a definition. It is the smallest particle of an element which can exist in a compound. An atom cannot exist alone as such. Atoms combine with each other to form molecules. The molecule is the smallest particle of matter which can exist without losing its distinctive properties. It corresponds pretty closely to the old Epicurean atom. The modern atom is an entirely new conception. Chemistry teaches that the thousands of forms of matter upon the earth, almost infinite in variety, can be resolved into about eighty substances, unalterable by chemical processes and possessing definite spectra. These substances, are called elements. The metals, iron, gold, silver, and others, sulphur, and carbon are familiar examples of elements. A mass of an element is made up of a collection of molecules. Each molecule of an element as a rule is composed of two atoms. Elements combine to form compound substances of various

numbers of atoms in the molecule. Water is an example of a compound substance, or chemical compound. Its molecule contains three atoms; two atoms of hydrogen, and one atom of oxygen. If a quantity of these two elements were mixed, the result would be a mechanical mixture of the molecules of the two. But if heat, or some other adequate cause were made to act, chemical action would follow, and the molecules, splitting up, would combine atom with atom. Part of a molecule of oxygen—one atom—would combine with part of two molecules of hydrogen—two atoms. The result would be the production of a quantity of molecules of water. Each water molecule contains one atom of oxygen and two atoms of hydrogen. The splitting-up of the elemental molecules into atoms is synchronous with their combining into molecules, so that an atom never exists alone. The molecules of the elements, oxygen and hydrogen, have disappeared, and in their places are molecules of water. There are about eighty kinds of atoms known, one kind for each element, and out of these the material world is made.

**INVARIABILITY OF COMPOSITION.**—The invariability of composition by weight of chemical compounds is a fundamental law of chemistry. Thus water under all circumstances consists of 88.88% of oxygen and 11.11% of hydrogen. This establishes a relation between the weights of the atoms of hydrogen and oxygen in the water molecule, which is 1 : 8. Oxygen and hydrogen are gaseous under ordinary conditions. If water is decomposed, and the gases are collected and measured, there will always be two volumes of hydrogen to one of oxygen. This illustrates another fundamental law—the invariability of composition by gaseous volume of chemical compounds. From the composition by volume of water its molecule is taken as composed of two atoms of hydrogen and one of oxygen, on the assumption that in a given volume of any gas there is the same number of molecules. As there are two atoms in the molecules of both of these elements, the above may be put in a more popular way thus: the atoms of hydrogen and oxygen occupy the same space. The ratio spoken of above, of 1 : 8, is therefore the ratio of two atoms of hydrogen to one of oxygen. It follows that the ratio of one atom of hydrogen to one atom of oxygen is 1 : 16. The numbers 1 and 16 thus determined, are the atomic weights of hydrogen and oxygen respectively. Strictly speaking they are not weights at all, only numbers expressing the relation of weights. Atomic weights are determined for all the elements, based on several considerations, such as those outlined for the atoms of oxygen and hydrogen. Thus the term *atom* indicates not only the constituents of molecules, but has a quantitative meaning, the proportional part of the element which enters into compounds. The sum of the weights of the atoms in a molecule is the molecular weight of the substance. Thus the molecular weight of water is the sum of the weights of two hydrogen atoms, which is two, and of one oxygen atom, which is sixteen, a total of eighteen. If we divide the molecular weight of a compound into the atomic weight of the atoms of any element in its molecule, it will give the proportion of the element in the compound. Taking water again, if we divide its molecular weight, 18, into the weight of the atoms of hydrogen in its molecule, 2, we obtain the fraction  $\frac{1}{9}$ , which expresses the proportion of hydrogen in water. The same process gives the proportion of oxygen in water as  $\frac{8}{9}$ .

Every element has its own atomic weight, and the invariability of chemical composition by weight is explained by the invariability of the atomic weights of the elements. Tables of the atomic weights of the elements are given in all chemical

text-books. The relations of the atomic weights to each other are several. The atom of lowest weight is the hydrogen atom. It is usually taken as one, which is very nearly its exact value if oxygen is taken as sixteen. On this basis one quarter of the other elements will have atomic weights that are whole numbers. This indicates a remarkable simplicity of relationship of weights, which is carried out by the close approach of the rest of the elements to the same condition, as regards their atomic weights. The range of the atomic weights is a narrow one. That of hydrogen is 1.008—that of uranium 238.5. The latter is the heaviest of all. Between these all the other atomic weights lie. Many of the elements resemble each other in their chemical relations. It might appear that those nearest to each other in atomic weight should be of similar properties. This is not the case. If the elements are written down in the order of their atomic weights, beginning with the lightest and ending with the heaviest, it will be found that the position of an element in the series will indicate pretty clearly its properties. The elements will be found to be so arranged in the list that any element will be related as regards its chemical properties to the element eight places removed from it. This relationship may be thus expressed: the properties of an element are a periodic function of its atomic weight.

**MENDELÉEFF'S TABLE.**—This relation is called Mendeléeff's Law, from one of two chemists who independently developed it. The elements may, as before said, be written down in the order of their atomic weights, but in eight vertical columns. Along the top line the eight elements of lightest atomic weights are written in the order of their weights, followed on the second line by the next eight, also in the order of their atomic weights. This arrangement, obviously, when carried out brings the elements eight atomic weights apart, into vertical columns. It will be found that all the elements in any vertical column are of similar chemical properties. When Mendeléeff made out his table it was supposed that several elements were as yet undiscovered. The table also brought out clearly certain numerical relations of the atomic weights. These together with other factors caused him to leave blank spaces in his table, which none of the known elements could fill. For these places hypothetical elements were assumed, whose general properties and atomic weights were stated by him. One by one these elements have been discovered, so that Mendeléeff's Law predicted the existence of elements later to be discovered. These discoveries of predicted elements constitute one of the greatest triumphs of chemical science. Up to within a very recent period the atom was treated as the smallest division of matter, although the possibility of the transmutation of the elements in some way, or in some degree, has long been considered a possibility. It was conjectured that all the elements might be composed of some one substance, for which a name, *protyle*, meaning first material, was coined. This seemed to conflict with the accepted definition of the atom, as *protyle* indicated something anterior to or preceding it. The idea rested in abeyance, as there was little ground for building up a theory to include it. Recent discoveries have reususcated this never quite abandoned theory; *protyle* seems to have been discovered, and the atom has ceased to hold its place as the ultimate division of matter.

**CORPUSCULES.**—The most recent theory holds that the atom is composite, and is built up of still minuter particles, called corpuscles. As far as the ordinary processes of chemistry are concerned the atom remains as it was. But investigations in the field of radio-activity, largely physical and partly chemical, go to prove that the atom, built up of

corpuscles as said above, depends for its atomic weight upon the number of corpuscles in it, and these corpuscles are all identical in nature. In these corpuscles we have the one first material, or protyle. It follows that the only difference between atoms of different elements is in the number of corpuscles they contain. Any process which would change the number of corpuscles in the atoms of an element would change the element into another one, thus carrying out the transmutation of elements. So far, one transmutation is accepted as effected. Experiments in radio-activity go to prove that some elements, notably radium, project particles of inconceivable minuteness into space. These particles have sometimes one-half the velocity of light. They are called corpuscles. The corpuscule is sometimes defined as a particle of negative electricity, which, in the existing state of electrical knowledge, is a very imperfect definition. They are all negatively electrified, and therefore repel each other. The condition of equilibrium of groups of such particles, if held near to each other by another external force, has been investigated by Prof. J. J. Thomson, and his investigations establish a basis for a theory of the constitution of atoms. Thus, assume an atom to consist of a number of corpuscles, not touching each other, all negatively electrified so that they repel one another, and held within the limits of the atom by what may be termed a shell of attractive force. Professor Thomson shows that such particles, under the conditions outlined above, arrange themselves into groups of various arrangement, the latter depending on their number. If the number of particles in a group be progressively increased, a periodic recurrence of groupings will occur. Assume a group of five particles. These will form a group of definite shape. If more particles are added to the group, the first additions will cause the five group to disappear, other groups taking its place, until the number reaches fifteen, when the original grouping of five will reappear, surrounded by the other ten particles. On adding more particles, the five and ten group disappear, to be succeeded by others, until the number of thirty is reached. At this point the original five group and the ten group reappear, with a new group of fifteen. The same recurrence of groupings takes place with forty-seven and sixty-seven particles. This gives the outlines of an explanation of the periodic law. If any number of particles be taken they will show groupings, characteristic of the number, and subject to periodical reappearance as the number is increased. This reappearance of groupings is exactly comparable to the phenomena of the periodic law. It is the reappearance of similar properties at periodic intervals. The corpuscular theory also accounts for the variation of the elements in atomic weight. Corpuscles are supposed to be all alike, so that the weight of an atom would depend on how many corpuscles were required to form it. Thus an atom of oxygen would contain sixteen times as many corpuscles as would an atom of hydrogen, weighing only one-sixteenth as much. The weight of an atom of hydrogen has been approximately calculated as expressed by the decimal, 34 preceded by thirteen ciphers, of a gram. This means that thirty-four thousand millions of millions of atoms of hydrogen would weigh in the aggregate one gram. These calculations are based on determination of the electric charge of corpuscles. Corpuscles are calculated as being about one-thousandth of the mass of an atom of hydrogen. Professor Oliver Lodge gives the following comparison: if a church of ordinary size represent an atom, a thousand grains of sand dashing about its interior with enormous velocity would represent its constituent corpuscles. When atoms unite to form molecules, they are said to saturate each other.

Elements vary in the saturating power of their atoms. The saturating power is called atomicity or valency. Some elements have a valency of one, and are termed monads. A monad can saturate a monad. Others are termed dyads, have a valency of two, two monads being required to saturate one dyad, while one dyad can saturate another dyad. Valencies run on through triads, tetrads, pentads, hexads, heptads, and octads, designating valencies of three, four, five, six, seven, and eight respectively.

**Atomism**, [a privative and *τέμνω* to cut, i.e. indivisible] is the system of those who hold that all bodies are composed of minute, indivisible particles of matter called atoms. We must distinguish between (1) atomism as a philosophy and (2) atomism as a theory of science.

Atomism as a philosophy originated with Leucippus. Democritus (b. 460 B.C.), his disciple, is generally considered the father of atomism, as practically nothing is known of Leucippus. The theory of Democritus may be summed up in the following propositions: 1. All bodies are composed of atoms and spaces between the atoms. 2. Atoms are eternal, indivisible, infinite in number, and homogeneous in nature; all differences in bodies are due to a difference in the size, shape or location of the atoms. 3. There is no purpose or design in nature, and in this sense all is ruled by chance. 4. All activity is reduced to local motion. The formation of the universe is due to the fact that the larger atoms fall faster, and by striking against the smaller ones combine with them; thus the whole universe is the result of the fortuitous concurrence of atoms. Countless worlds are formed simultaneously and successively. Epicurus (342-270 B.C.) adopted the theory of Democritus, but corrected the blunder, pointed out by Aristotle, that larger atoms fall faster than smaller ones *in vacuo*. He substituted a power in the atoms to decline a little from the line of fall. Atomism is defended by Lucretius Carus (95-51 B.C.) in his poem, "De Rerum Natura." With the exception of a few alchemists in the Middle Ages, we find no representatives of atomism until Gassendi (1592-1655) renewed the atomism of Epicurus. Gassendi tried to harmonize atomism with Christian teaching by postulating atoms finite in number and created by God. With the application of atomism to the sciences, philosophic atomism also revived, and became for a time the most popular philosophy. Present-day philosophic atomism regards matter as homogeneous and explains all physical and chemical properties of bodies by a difference in mass of matter and local motion. The atom itself is inert and devoid of all activity. The molecule, taken over from the sciences, is but an edifice of unchangeable atoms. Philosophic atomism stands entirely on the basis of materialism, and, though it invokes the necessary laws of matter, its exclusion of final causes makes it in the last analysis a philosophy of chance.

The atomic theory was first applied to chemistry by Dalton (1808), but with him it meant little more than an expression of proportions in chemical composition. The theory supplied a simple explanation of the facts observed before him: that elements combine in definite and multiple proportions. The discovery in the same year by Gay-Lussac of the law that gases under the same pressure and temperature have equal volumes was at the same time a confirmation and an aid in determining atomic weights. Avogadro's law (1811) that gases under the same conditions of pressure and temperature have an equal number of molecules, and the law of Petit and Dulong that the product of the specific heat and the atomic weight of an element gives a constant number were further confirmations and aids. The atomic

theory was soon applied to physics, and is to-day the basis of most of the sciences. Its main outlines are: Matter is not continuous but atomically constituted. An atom is the smallest particle of matter that can enter a chemical reaction. Atoms of like nature constitute elements, those of unlike nature constitute compounds. The elements known to-day are about 76 in number and differ from one another in weight and physical and chemical properties. Atoms combine to form molecules, which are the smallest quantities of matter that can exist in a free state, whether of an element or a compound. Some believe that the atom retains its individuality in the molecule, whilst others consider the molecule homogeneous throughout. The theoretic formulas of structure of Frankland suppose them to remain. The spaces between the atoms are filled with an imponderable matter called ether. Upon the nature of ether the greatest differences of opinion exist. The adoption by scientists of Maxwell's theory of light seems to render the ether-hypothesis with its many contradictions superfluous. At all events it is quite independent of the atomic theory.

The results obtained by the Hungarian Lenard, the English physicist J. J. Thomson, and many others, by means of electric discharges in rarified gases, the discovery of Hertzian waves, a better understanding of electrolysis, and the discovery of radium by Madame Curie have made necessary a modification of the atomic theory of matter. The atom, hitherto considered solid and indivisible, is now believed to break up into ions or electrons. This new theory, however, must not be considered as opposed to the atomic theory; it comes rather as an extension of it. In chemistry, the principal field of the atomic theory, the atom will still remain as the chemically indivisible unit. The hypothesis of sub-atoms is, moreover, not entirely new; it was proposed by Spencer as early as 1872 ("Contemporary Rev.", June, 1872) and defended by Crookes in 1886.

The physico-chemical theory of atomism, though not a demonstrated truth, offers a satisfactory explanation of a great number of phenomena, and will, no doubt, remain essentially the same, no matter how it may be modified in its details. In chemistry, it does not stop arbitrarily in the division of matter, but stops at chemical division. If another science demands a further division, or if philosophy must postulate a division of the atom into essential principles, that is not the concern of chemistry. Science has no interest in defending the indivisible atom of Democritus.

Scholastic philosophy finds nothing in the scientific theory of atomism which it cannot harmonize with its principles, though it must reject the mechanical explanation, often proposed in the name of science, which looks upon the atom as an absolutely inert mass, devoid of all activities and properties. Scholastic philosophers find in the different physical and chemical properties of the elements an indication of specifically different natures. Chemical changes are for them substantial changes, and chemical formulas indicate the mode in which the elements react on one another in the production of the compound. They are not a representation of the molecular edifice built up of unchangeable atoms. Some would accept even this latter view and admit that there are no substantial changes in inanimate nature (Gutberlet). This view can also be harmonized more easily with the facts of stereo-chemistry. As regards the phenomena observed in radio-activity, a generalization, either in the materialistic sense, that all matter is homogeneous, or in the scholastic sense, that all elements can be changed into one another, is in the present state of science premature.

**Atonement, DAY OF.**—The rites to be observed on the Day of Atonement [Hebrew יוֹם הַכִּפּוּרִים *Yom Hakkippurim*. Vulgate, *Dies Expiationum*, and *Dies Propitiationis* (Leviticus, xxiii, 27, 28)] are fully set forth in the sixteenth chapter of Leviticus (cf. Exodus, xxx, 10; Leviticus, xxiii, 27-31, xxv, 9; Numbers, xxix, 7-11). It was a most solemn fast, on which no food could be taken throughout the whole day, and all servile works were forbidden. It was kept on the nineteenth day of the seventh month, *Tischri*, which falls in September—October. The sacrifices included a calf, a ram, and seven lambs (Numbers, xxix, 8-11). But the distinctive ceremony of the day was the offering of the two goats. "He [Aaron] shall make the two buck-goats to stand before the Lord, in the door of the tabernacle of the testimony: and casting lots upon them both, one to be offered to the Lord, and the other to be the emissary-goat: That whose lot fell to be offered to the Lord, he shall offer for sin: But that whose lot was to be the emissary-goat he shall present alive before the Lord, that he may pour out prayers upon him, and let him go into the wilderness. . . . After he hath cleansed the sanctuary, and the tabernacle, and the altar, let him offer the living goat: And putting both hands upon his head, let him confess all the iniquities of the children of Israel, and all their offences and sins, and praying that they may light on his head, he shall turn him out by a man ready for it, into the desert. And when the goat hath carried all their iniquities into an uninhabited land, and shall be let go into the desert, Aaron shall return into the tabernacle of the testimony" (Leviticus, xvi, 7-10, 20-23). The general meaning of the ceremony is sufficiently shown in the text. But the details present some difficulty. The Vulgate *capere emissarium*, "emissary, goat", represents the obscure Hebrew word, אִזָּזִל (*Azazel*), which occurs nowhere else in the Bible. Various attempts have been made to interpret its meaning. Some have taken it for the name of a place where the man who took the goat away used to throw it over a precipice, since its return was thought to forbode evil. Others, with better reason, take it for the name of an evil spirit; and in fact a spirit of this name is mentioned in the Apocryphal "Book of Henoch", and later in Jewish literature. On this interpretation, which, though by no means new, finds favour with modern critics, the idea of the ceremony would seem to be that the sins were sent back to the evil spirit to whose influence they owed their origin. It has been noted that somewhat similar rites of expiation have prevailed among heathen nations. And modern critics, who refer the above passages to the Priestly Code, and to a post-Exilic date, are disposed to regard the sending of the goat to Azazel as an adaptation of a pre-existing ceremonial. The significant ceremony observed on this solemn Day of Atonement does but give a greater prominence to that need of satisfaction and expiation which was present in all the ordinary sin-offerings. And all these sacrifices for sin, as we learn from the teaching of the Epistle to the Hebrews, were figures of the great Sacrifice to come. In like manner these Jewish rites of atonement speak to us of the Cross of Christ, and of the propitiatory Sacrifice which is daily renewed in a bloodless manner on the Eucharistic Altar. For this reason it may be of interest to note, with Provost Maltzew, that the Jewish prayers used on the Day of Atonement fore-

shadow the common commemoration of the saints and the faithful departed in our liturgies (Die Liturgien der orthodox-katholischen Kirche des Morgenlandes, 252).

The subject is treated by the commentators on Leviticus, notably CALMET and LAPIDE, who give the interpretation of the Fathers. A more exhaustive treatment will be found in SPENCER's monumental work, *De Legibus Hebraeorum ritualibus*, III, diss. 8, cf. *De Hircio Emisario et precipuis expiationis judaicae ceremoniis* (Tübingen, 1732). For modern views on the subject, see the articles on *Day of Atonement*, and *Asazel*, by DRIVER and WHITE in *Dictionary of the Bible*. In the Talmud the treatise *Yōma* (The Day) deals with the Day of Atonement.

W. H. KENT.

**Atonement, DOCTRINE OF THE.**—The word *atonement*, which is almost the only theological term of English origin, has a curious history. The verb "atone", from the adverbial phrase "at one" (M. E. *at oon*), at first meant to reconcile, or make "at one"; from this it came to denote the action by which such reconciliation was effected, e. g. satisfaction for an offence or an injury. Hence, in Catholic theology, the Atonement is the Satisfaction of Christ, whereby God and the world are reconciled or made to be at one. "For God indeed was in Christ, reconciling the world to himself" (II Cor., v, 19). The Catholic doctrine on this subject is set forth in the Sixth Session of the Council of Trent, chapter ii. Having shown the insufficiency of Nature, and of the Mosaic Law, the Council continues: "Whence it came to pass, that the heavenly Father, the Father of mercies and the God of all comfort (II Cor., i, 3), when that blessed fullness of the time was come (Gal., iv, 4) sent unto men Jesus Christ, His own Son, who had been, both before the Law and during the time of the Law, to many of the holy fathers announced and promised, that He might both redeem the Jews, who were under the Law and that the Gentiles who followed not after justice might attain to justice, and that all men might receive the adoption of sons. Him God hath proposed as a propitiator, through faith in His blood (Rom., iii, 25), for our sins, and not for our sins only, but also for those of the whole world (I John, ii, 2)." More than twelve centuries before this, the same dogma was proclaimed in the words of the Nicene Creed, "who for us men and for our salvation, came down, took flesh, was made man; and suffered." And all that is thus taught in the decrees of the councils may be read in the pages of the New Testament. For instance, in the words of Our Lord, "Even as the son of man is not come to be ministered unto, but to minister, and to give His life a redemption for many" (Matt., xx, 28); or of St. Paul, "Because in him, it hath well pleased the Father that all fulness should dwell; and through him to reconcile all things unto himself, making peace through the blood of his cross, both as to the things that are on earth, and the things that are in heaven." (Coloss., i, 19, 20).

The great doctrine thus laid down in the beginning was further unfolded and brought out into clearer light by the work of the Fathers and theologians. And it may be noted that in this instance the development is chiefly due to Catholic speculation on the mystery, and not, as in the case of other doctrines, to controversy with heretics. At first we have the central fact made known in the Apostolic preaching, that mankind was fallen and was raised up and redeemed from sin by the blood of Christ. But it remained for the pious speculation of Fathers and theologians to enter into the meaning of this great truth, to inquire into the state of fallen man, and to ask how Christ accomplished His work of Redemption. By whatever names or figures it may be described, that work is the reversal of the Fall, the blotting out of sin, the deliverance from bondage, the reconciliation of mankind with God. And it is brought to pass by the Incarnation, by the life, the

sufferings, and the death of the Divine Redeemer. All this may be summed up in the word Atonement. This is, so to say, the starting point. And herein all are indeed at one. But, when it was attempted to give a more precise account of the nature of the Redemption and the manner of its accomplishment, theological speculation took different courses, some of which were suggested by the various names and figures under which this ineffable mystery is adumbrated in Holy Scripture. Without pretending to give a full history of the discussions, we may briefly indicate some of the main lines on which the doctrine was developed, and touch on the more important theories put forward in explanation of the Atonement.

(a) In any view, the Atonement is founded on the Divine Incarnation. By this great mystery, the Eternal Word took to Himself the nature of man and, being both God and man, became the Mediator between God and men. From this, we have one of the first and most profound forms of theological speculation on the Atonement, the theory which is sometimes described as Mystical Redemption. Instead of seeking a solution in legal figures, some of the great Greek Fathers were content to dwell on the fundamental fact of the Divine Incarnation. By the union of the Eternal Word with the nature of man all mankind was lifted up and, so to say, deified. "He was made man", says St. Athanasius, "that we might be made gods" (*De Incarnatione Verbi*, 54). "His flesh was saved, and made free the first of all, being made the body of the Word, then we, being concorporeal therewith, are saved by the same" (*Orat.*, II, *Contra Arianos*, lxi). And again, "For the presence of the Saviour in the flesh was the price of death, and the saving of the whole creation" (*Ep. ad Adelphium*, vi). In like manner St. Gregory of Nazianzus proves the integrity of the Sacred Humanity by the argument, "That which was not assumed is not healed; but that which is united to God is saved" (*τὸ γὰρ ἀπρόσληπτον, ἀθεράπευτον ὁ δὲ ἥνωται τῷ θεῷ, τοῦτο καὶ σώζεται*). This speculation of the Greek Fathers undoubtedly contains a profound truth which is sometimes forgotten by later authors who are more intent on framing juridical theories of ransom and satisfaction. But it is obvious that this account of the matter is imperfect, and leaves much to be explained. It must be remembered, moreover, that the Fathers themselves do not put this forward as a full explanation. For while many of their utterances might seem to imply that the Redemption was actually accomplished by the union of a Divine Person with the human nature, it is clear from other passages that they do not lose sight of the atoning sacrifice. The Incarnation is, indeed, the source and the foundation of the Atonement, and these profound thinkers have, so to say, grasped the cause and its effects as one vast whole. Hence they look on to the result before staying to consider the means by which it was accomplished.

(b) But something more on this matter had already been taught in the preaching of the Apostles and in the pages of the New Testament. The restoration of fallen man was the work of the Incarnate Word. "God was in Christ reconciling the world to himself" (II Cor., v, 19). But the peace of that reconciliation was accomplished by the death of the Divine Redeemer, "making peace through the blood of His cross" (Coloss., i, 20). This redemption by death is another mystery, and some of the Fathers in the first ages are led to speculate on its meaning, and to construct a theory in explanation. Here the words and figures used in Holy Scripture help to guide the current of theological thought. Sin is represented as a state of bondage or servitude, and fallen man is delivered by being

redeemed, or bought with a price. "For you are bought with a great price" (1 Cor., vi, 20). "Thou art worthy, O Lord, to take the book, and to open the seals thereof; because thou wast slain, and hast redeemed us to God, in thy blood" (Apoc., v, 9). Looked at in this light, the Atonement appears as the deliverance from captivity by the payment of a ransom. This view is already developed in the second century. "The mighty Word and true Man reasonably redeeming us by His blood, gave Himself a ransom for those who had been brought into bondage. And since the Apostasy unjustly ruled over us, and, whereas we belonged by nature to God Almighty, alienated us against nature and made us his own disciples, the Word of God, being mighty in all things, and failing not in His justice, dealt justly even with the Apostasy itself, buying back from it the things which were His own" (Irenæus, *Adversus Hæreses*, V, i). And St. Augustine says in well-known words: "Men were held captive under the devil, and served the demons, but they were redeemed from captivity. For they could sell themselves, but they could not redeem themselves. The Redeemer came, and gave the price; He poured forth His blood and bought the whole world. Do you ask what He bought? See what He gave, and find what He bought. The blood of Christ is the price. How much is it worth? What but the whole world? What but all nations?" (Enarratio in Psalm xcv, n. 5).

It cannot be questioned that this theory also contains a true principle. For it is founded on the express words of Scripture, and is supported by many of the greatest of the early Fathers and later theologians. But unfortunately, at first, and for a long period of theological history, this truth was somewhat obscured by a strange confusion, which would seem to have arisen from the natural tendency to take a figure too literally, and to apply it in details which were not contemplated by those who first made use of it. It must not be forgotten that the account of our deliverance from sin is set forth in figures. Conquest, captivity, and ransom are familiar facts of human history. Man, having yielded to the temptations of Satan, was like to one overcome in battle. Sin, again, is fitly likened to a state of slavery. And when man was set free by the shedding of Christ's precious Blood, this deliverance would naturally recall (even if it had not been so described in Scripture) the redemption of a captive by the payment of a ransom. But, however useful and illuminating in their proper place, figures of this kind are perilous in the hands of those who press them too far, and forget that they are figures. This is what happened here. When a captive is ransomed the price is naturally paid to the conqueror by whom he is held in bondage. Hence, if this figure were taken and interpreted literally in all its details, it would seem that the price of man's ransom must be paid to Satan. The notion is certainly startling, if not revolting. Even if grave reasons pointed in this direction, we might well shrink from drawing the conclusion. And this is in fact so far from being the case that it seems hard to find any rational explanation of such a payment, or any right on which it could be founded. Yet, strange to say, the bold flight of theological speculation was not checked by these misgivings. In the above-cited passage of St. Irenæus, we read that the Word of God "dealt justly even with the Apostasy itself [i. e. Satan], buying back from it the things which were His own". This curious notion, apparently first mooted by St. Irenæus, was taken up by Origen in the next century, and for about a thousand years it played a conspicuous part in the history of theology. In the hands of some of the later Fathers and medieval writers, it takes

various forms, and some of its more repulsive features are softened or modified. But the strange notion of some right, or claim, on the part of Satan is still present. A protest was raised by St. Gregory of Nazianzus in the fourth century, as might be expected from that most accurate of the patristic theologians. But it was not till St. Anselm and Abelard had met it with unanswerable arguments that its power was finally broken. It makes a belated appearance in the pages of Peter Lombard.

(c) But it is not only in connexion with the theory of ransom that we meet with this notion of "rights" on the part of Satan. Some of the Fathers set the matter in a different aspect. Fallen man, it was said, was justly under the dominion of the devil, in punishment for sin. But when Satan brought suffering and death on the sinless Saviour, he abused his power and exceeded his right, so that he was now justly deprived of his dominion over the captives. This explanation is found especially in the sermons of St. Leo and the "Morals" of St. Gregory the Great. Closely allied to this explanation is the singular "mouse-trap" metaphor of St. Augustine. In this daring figure of speech, the Cross is regarded as the trap in which the bait is set and the enemy is caught. "The Redeemer came and the deceiver was overcome. What did our Redeemer do to our Captor? In payment for us He set the trap, His Cross, with His blood for bait. He [Satan] could indeed shed that blood; but he deserved not to drink it. By shedding the blood of One who was not his debtor, he was forced to release his debtors" (Serm. cxxx, § 2).

(d) These ideas retained their force well into the Middle Ages. But the appearance of St. Anselm's "Cur Deus Homo?" made a new epoch in the theology of the Atonement. It may be said, indeed, that this book marks an epoch in theological literature and doctrinal development. There are not many works, even among those of the greatest teachers, that can compare in this respect with the treatise of St. Anselm. And, with few exceptions, the books that have done as much to influence and guide the growth of theology are the outcome of some great struggle with heresy; while others, again, only summarize the theological learning of the age. But this little book is at once purely pacific and eminently original. Nor could any dogmatic treatise well be more simple and unpretending than this luminous dialogue between the great archbishop and his disciple Boso. There is no parade of learning, and but little in the way of appeal to authorities. The disciple asks and the master answers; and both alike face the great problem before them fearlessly, but at the same time with all due reverence and modesty. Anselm says at the outset that he will not so much show his disciple the truth he needs, as seek it along with him; and that when he says anything that is not confirmed by higher authority, it must be taken as tentative, and provisional. He adds that, though he may in some measure meet the question, one who is wiser could do it better; and that, whatever man may know or say on this subject, there will always remain deeper reasons that are beyond him. In the same spirit he concludes the whole treatise by submitting it to reasonable correction at the hands of others.

It may be safely said that this is precisely what has come to pass. For the theory put forward by Anselm has been modified by the work of later theologians, and confirmed by the testimony of truth. In contrast to some of the other views already noticed, this theory is remarkably clear and symmetrical. And it is certainly more agreeable to reason than the "mouse-trap" metaphor, or the notion of purchase money paid to Satan. Anselm's answer to the question is simply the need of satis-

faction for sin. No sin, as he views the matter, can be forgiven without satisfaction. A debt to Divine justice has been incurred; and that debt must needs be paid. But man could not make this satisfaction for himself; the debt is something far greater than he can pay; and, moreover, all the service that he can offer to God is already due on other titles. The suggestion that some innocent man, or angel, might possibly pay the debt incurred by sinners is rejected, on the ground that in any case this would put the sinner under obligation to his deliverer, and he would thus become the servant of a mere creature. The only way in which the satisfaction could be made, and men could be set free from sin, was by the coming of a Redeemer who is both God and man. His death makes full satisfaction to the Divine Justice, for it is something greater than all the sins of all mankind. Many side questions are incidentally treated in the dialogue between Anselm and Boso. But this is the substance of the answer given to the great question, "Cur Deus Homo?" Some modern writers have suggested that this notion of deliverance by means of satisfaction may have a German origin. For in the old Teutonic laws, a criminal might pay the wergild instead of undergoing punishment. But this custom was not peculiar to the Germans, as we may see from the Celtic *erig*, and, as Rivière has pointed out, there is no need to have recourse to this explanation. For the notion of satisfaction for sin was already present in the whole system of ecclesiastical penance, though it had been left for Anselm to use it in illustration of the doctrine of the Atonement. It may be added that the same idea underlies the old Jewish "sin-offerings" as well as the similar rites that are found in many ancient religions. It is specially prominent in the rites and prayers used on the Day of Atonement. And this, it may be added, is now the ordinary acceptance of the word; to "atone" is to give satisfaction, or make amends, for an offence or an injury.

(c) Whatever may be the reason, it is clear that this doctrine was attracting special attention in the age of St. Anselm. His own work bears witness that it was undertaken at the urgent request of others who wished to have some new light on this mystery. To some extent, the solution offered by Anselm seems to have satisfied these desires, though, in the course of further discussion, an important part of his theory, the absolute necessity of Redemption and of satisfaction for sin, was discarded by later theologians, and found few defenders. But meanwhile, within a few years of the appearance of the "Cur Deus Homo?" another theory on the subject had been advanced by Abelard. In common with St. Anselm, Abelard utterly rejected the old, and then still prevailing, notion that the devil had some sort of right over fallen man, who could only be justly delivered by means of a ransom paid to his captor. Against this he very rightly urges, with Anselm, that Satan was clearly guilty of injustice in the matter and could have no right to anything but punishment. But, on the other hand, Abelard was unable to accept Anselm's view that an equivalent satisfaction for sin was necessary, and that this debt could only be paid by the death of the Divine Redeemer. He insists that God could have pardoned us without requiring satisfaction. And, in his view, the reason for the Incarnation and the death of Christ was the pure love of God. By no other means could men be so effectually turned from sin and moved to love God. Abelard's teaching on this point, as on others, was vehemently attacked by St. Bernard. But it should be borne in mind that some of the arguments urged in condemnation of Abelard would affect the position of St. Anselm also, not to speak of later Catholic theology.

In St. Bernard's eyes it seemed that Abelard, in

denying the rights of Satan, denied the "Sacrament of Redemption" and regarded the teaching and example of Christ as the sole benefit of the Incarnation. "But," as Mr. Oxenham observes, "he had not said so, and he distinctly asserts in his 'Apology' that 'the Son of God was incarnate to deliver us from the bondage of sin and yoke of the Devil, and to open to us by His death the gate of eternal life.' And St. Bernard himself, in this very Epistle, distinctly denies any absolute necessity for the method of redemption chosen, and suggests a reason for it not so very unlike Abelard's. 'Perhaps that method is the best, whereby in a land of forgetfulness and sloth we might be more powerfully and vividly reminded of our fall, through the so great and so manifold sufferings of Him who repaired it.' Elsewhere, when not speaking controversially, he says still more plainly: 'Could not the Creator have restored His work without that difficulty? He could; but He preferred to do it at His own cost, lest any further occasion should be given for that worst and most odious vice of ingratitude in man' (Bern., *Serm.* xi, in *Cant.*). What is this but to say, with Abelard, that 'He chose the Incarnation as the most effectual method for eliciting His creature's love'?" (The Catholic Doctrine of the Atonement, 85, 86).

(f) Although the high authority of St. Bernard was thus against them, the views of St. Anselm and Abelard, the two men who in different ways were the fathers of Scholasticism, shaped the course of later medieval theology. The strange notion of the rights of Satan, against which they had both protested, now disappears from the pages of our theologians. For the rest, the view which ultimately prevailed may be regarded as a combination of the opinions of Anselm and Abelard. In spite of the objections urged by the latter writer, Anselm's doctrine of satisfaction was adopted as the basis. But St. Thomas and the other medieval masters agree with Abelard in rejecting the notion that this full satisfaction for sin was absolutely necessary. At the most, they are willing to admit a hypothetical or conditional necessity for the Redemption by the death of Christ. The restoration of fallen man was a work of God's free mercy and benevolence. And, even on the hypothesis that the loss was to be repaired, this might have been brought about in many and various ways. The sin might have been remitted freely, without any satisfaction at all, or some lesser satisfaction, however imperfect in itself, might have been accepted as sufficient. But on the hypothesis that God had chosen to restore mankind, and at the same time, to require full satisfaction as a condition of pardon and deliverance, nothing less than the Atonement made by one who was God as well as man could suffice as satisfaction for the offence against the Divine Majesty. And in this case Anselm's argument will hold good. Mankind cannot be restored unless God becomes man to save them.

In reference to many points of detail the Schoolmen, here as elsewhere, adopted divergent views. One of the chief questions at issue was the intrinsic adequacy of the satisfaction offered by Christ. On this point the majority, with St. Thomas at their head, maintained that, by reason of the infinite dignity of the Divine Person, the least action or suffering of Christ had an infinite value, so that in itself it would suffice as an adequate satisfaction for the sins of the whole world. Scotus and his school, on the other hand, disputed this intrinsic infinitude, and ascribed the all-sufficiency of the satisfaction to the Divine acceptance. As this acceptance was grounded on the infinite dignity of the Divine Person, the difference was not so great as might appear at first sight. But, on this point at any rate, the simpler teaching of St. Thomas is more generally accepted by later theologians. Apart from this

question, the divergent views of the two schools on the primary motive of the Incarnation naturally have some effect on the Thomist and Scotist theology of the Atonement. On looking back at the various theories noticed so far, it will be seen that they are not, for the most part, mutually exclusive, but may be combined and harmonized. It may be said, indeed, that they all help to bring out different aspects of that great doctrine which cannot find adequate expression in any human theory. And in point of fact it will generally be found that the chief Fathers and Schoolmen, though they may at times lay more stress on some favourite theory of their own, do not lose sight of the other explanations.

Thus the Greek Fathers, who delight in speculating on the Mystical Redemption by the Incarnation, do not omit to speak also of our salvation by the shedding of blood. Origen, who lays most stress on the deliverance by payment of a ransom, does not forget to dwell on the need of a sacrifice for sin. St. Anselm, again, in his "Meditations", supplements the teaching set forth in his "Cur Deus Homo?" Abelard, who might seem to make the Atonement consist in nothing more than the constraining example of Divine Love, has spoken also of our salvation by the Sacrifice of the Cross, in passages to which his critics do not attach sufficient importance. And, as we have seen, his great opponent, St. Bernard, teaches all that is really true and valuable in the theory which he condemned. Most, if not all, of these theories had perils of their own, if they were isolated and exaggerated. But in the Catholic Church there was ever a safeguard against these dangers of distortion. As Mr. Oxenham says very finely, "The perpetual priesthood of Christ in heaven, which occupies a prominent place in nearly all the writings we have examined, is even more emphatically insisted upon by Origen. And this deserves to be remembered, because it is a part of the doctrine which has been almost or altogether dropped out of many Protestant expositions of the Atonement, whereas those most inclining among Catholics to a merely juridical view of the subject have never been able to forget the present and living reality of a sacrifice constantly kept before their eyes, as it were, in the worship which reflects on earth the unending liturgy of heaven" (p. 38).

The reality of these dangers and the importance of this safeguard may be seen in the history of this doctrine since the age of the Reformation. As we have seen, its earlier development owed comparatively little to the stress of controversy with heretics. And the revolution of the sixteenth century was no exception to this rule. For the Atonement was not one of the subjects directly disputed between the Reformers and their Catholic opponents. But from its close connexion with the cardinal question of Justification, this doctrine assumed a very special prominence and importance in Protestant theology and practical preaching. Mark Pattison tells us in his "Memoirs" that he came to Oxford with his "home Puritan religion almost narrowed to two points, fear of God's wrath and faith in the doctrine of the Atonement". And his case was possibly no exception among Protestant religionists. In their general conception of the Atonement the Reformers and their followers happily preserved the Catholic doctrine, at least in its main lines. And in their explanation of the merit of Christ's sufferings and death we may see the influence of St. Thomas and the other great Schoolmen. But, as might be expected from the isolation of the doctrine and the loss of other portions of Catholic teaching, the truth thus preserved was sometimes insensibly obscured or distorted. It will be enough to note here the presence of two mistaken tendencies. (1) The first is indicated in the above words of Pattison in which

the Atonement is specially connected with the thought of the wrath of God. It is true of course that sin incurs the anger of the Just Judge, and that this is averted when the debt due to Divine Justice is paid by satisfaction. But it must not be thought that God is only moved to mercy and reconciled to us as a result of this satisfaction. This false conception of the Reconciliation is expressly rejected by St. Augustine (In Joannem, Tract. cx, § 6). God's merciful love is the cause, not the result of that satisfaction. (2) The second mistake is the tendency to treat the Passion of Christ as being literally a case of vicarious punishment. This is at best a distorted view of the truth that His Atoning Sacrifice took the place of our punishment, and that He took upon Himself the sufferings and death that were due to our sins.

This view of the Atonement naturally provoked a reaction. Thus the Socinians were led to reject the notion of vicarious suffering and satisfaction as inconsistent with God's justice and mercy. And in their eyes the work of Christ consisted simply in His teaching by word and example. Similar objections to the juridical conception of the Atonement led to like results in the later system of Swedenborg. More recently Albrecht Ritschl, who has paid special attention to this subject, has formulated a new theory on somewhat similar lines. His conception of the Atonement is moral and spiritual, rather than juridical; and his system is distinguished by the fact that he lays stress on the relation of Christ to the whole Christian community. We cannot stay to examine these new systems in detail. But it may be observed that the truth which they contain is really found in the Catholic theology of the Atonement. That great doctrine has been faintly set forth in figures taken from man's laws and customs. It is represented as the payment of a price, or a ransom; or as the offering of satisfaction for a debt. But we can never rest in these material figures as though they were literal and adequate. As both Abelard and Bernard remind us, the Atonement is the work of love. It is essentially a sacrifice, the one supreme sacrifice of which the rest were but types and figures. And, as St. Augustine teaches us, the outward rite of sacrifice is the sacrament, or sacred sign, of the invisible sacrifice of the heart. It was by this inward sacrifice of obedience unto death, by this perfect love with which He laid down His life for His friends, that Christ paid the debt to justice, and taught us by His example, and drew all things to Himself; it was by this that He wrought our Atonement and Reconciliation with God, "making peace through the blood of His Cross".

The Catholic theology of the Atonement may be studied in the works of the Fathers and Schoolmen quoted above, notably in St. Athanasius and in St. Anselm; in the Scholastic commentaries on the *Third Book of Sentences*, and on the *Third Part of the Summa* of St. Thomas; and in later treatises *De Incarnatione*, e. g. that of CARDINAL FRANZELIN. Two modern works may be mentioned as worthy of special attention. These are OXENHAM, *The Catholic Doctrine of the Atonement: An Historical Inquiry into its Development in the Church. With an Introduction on the Principle of Theological Developments* (London, 1885); and RIVIÈRE, *Le dogme de la Rédemption. Essai d'étude historique* (Paris, 1905). Taken together, these two books, each admirable in its way, give a full view of the history of the doctrine. Much use has been made of them in this article. For modern non-Catholic theology, see RITSCHL's great work on Justification and Reconciliation, *Die christliche Lehre von der Rechtfertigung und Versöhnung* (Bonn, 1870-74). The first volume, containing the history of the doctrine, was translated into English in 1872; the third, in which the author's own view is found, was translated in 1900 (Clark, Edinburgh); the second volume, giving the Biblical matter, has not been done into English. Some account of recent non-Catholic literature on the Atonement will be found in FERRIES, *The Growth of Christian Faith* (Edinburgh, 1905). Like the Catholic works of Oxenham and Rivière, this book is a monograph on the doctrine of the Atonement. See also SIMPSON in *Dict. of Christ and the Gospels* (New York, 1906) s. v.

W. H. KENT.

**Atri**, DIOCESE OF. See CIVITA DI PENNE.

**Atrib**, a titular see of Lower Egypt (Atribites) whose episcopal list (325-479) is given in Gams (p. 461).

LEQUIEN, *Oriens Christ.* (1740), II, 553-556.

**Atrium**.—I. An open place or court before a church. It consisted of a large quadrangle with colonnaded walks on its four sides forming a portico or cloister. It was situated between the porch or vestibule and the body of the church. In the center of the atrium was a fountain or well, where the worshippers washed their hands before entering the church. A remnant of this custom still survives in the use of the holy-water font, or basin, usually placed near the inner entrances of churches. In the atrium those that were not suffered to advance farther, and more particularly the first class of penitents, stood to solicit the prayers of the faithful as they went into the church. It was also used as a burying-ground, at first only for distinguished persons, but afterwards for all believers. The covered portion next the church was called the *narthex* and was the place for penitents. The basilicas at Ravenna seem usually to have had a closed *narthex*; while those of Rome were open to the West. A mosaic in S. Apollinare Nuovo, Ravenna, shows an open *narthex* closed by curtains. The atrium existed in some of the largest of the early Christian churches, such as old St. Peter's at Rome in the fourth century, and Sancta Sophia at Constantinople, in the sixth. In the residences (*palatia*, *domus*) of the Roman aristocracy, where the Roman Christians first worshipped, there was a threefold division; first, on entering, a court called the *atrium*; then, farther in, another colonnaded court called the *peristyle*; and then the *tablinum*, where the altar was probably placed, and services conducted. (See BASILICA.) So large a fore-court to a church required an area of land costly and difficult to obtain in a large city. For this reason the old Roman atrium survived only occasionally in Eastern and Western churches. Typical examples may be seen in the churches of St. Clement, at Rome, and St. Ambrose, at Milan; also in the seventh-century churches of Novara and Parenzo.

II. In secular architecture the atrium was the principal entrance-hall and apartment in a Roman house, and formed the reception-room. It was lighted by an opening in the roof, called the *compluvium*, the roof sloping so as to throw the rain-water into a cistern in the floor called the *impluvium*. In large houses it was surrounded by a colonnade.

THOMAS H. POOLE.

**Attainder**.—A Bill of Attainder may be defined to be an Act of Parliament for putting a man to death or for otherwise punishing him without trial in the usual form. Thus by a legislative act a man is put in the same position as if he had been convicted after a regular trial. It is an act whereby the judicature of the entire Parliament is exercised, and may be contrasted with the procedure by impeachment in which the accusation, presented by the Commons acting as a grand jury of the whole realm, is tried by the Lords, exercising at once the functions of a high court of justice and of a jury. In a strictly technical sense it may be said that a Bill of Attainder is a legislative act inflicting the punishment of death without a trial, and that a Bill of Pains and Penalties is such an act inflicting a milder punishment. In the popular sense, however, the term "Bill of Attainder" embraces both classes of acts, and in that sense it is evidently used in the Constitution of the United States, as the Supreme Court has declared in *Fletcher v. Peck*, 6 Cranch, 138, that "A bill of attainder may affect the life of an individual, or may confiscate his property, or both". Such a bill deals with the merits of a particular case and inflicts penalties, more or less severe, *ex post facto*, without trial in the

usual form. While bills of attainder were used in England as early as 1321 in the procedure employed by Parliament in the banishment of the two Despensers (1 St. tr. pp. 23, 38), it was not until the period of passion engendered by the civil war that the summary power of Parliament to punish criminals by statute was for the first time perverted and abused. Then it was that this process was first freely used, not only against the living, but sometimes against the dead, the main object in the latter case being, of course, the confiscation of the estate of the attained person. In the flush of victory which followed the battle of Towton, Edward IV obtained the passage of a sweeping bill of attainder through which the crown was enriched by forfeiture of the estates of fourteen lords and more than a hundred knights and esquires. In the seventeenth year of that reign was passed the Act of Attainder of the Duke of Clarence in which, after an oratorical preface setting out at length the offences imputed to him, it is enacted "that the said George Duke of Clarence be convicted, and atteynted of high treason". Then follows the appointment of the Duke of Buckingham as lord high steward for that occasion to do execution. It is a remarkable fact that during a period of one hundred and sixty-two years (1459-1621) there is no record of a parliamentary impeachment either in the rolls of Parliament or in the Lords' journal. After the impeachment of Lord Stanley in 1459, for not sending his troops to the battle of Bloreheath, there was not another impeachment until that of Sir Giles Mompesson and Sir Francis Mitchell in 1621. During the interval, covering a little more than the reigns of the house of Tudor, enemies of the State were disposed of either by bills of attainder, by trials in the Star Chamber, or by trials for treason in the courts of common law. In the reign of Henry VIII Bills of attainder were often used instead of impeachments, as in the cases of Wolsey, Thomas Cromwell, Queen Katharine Howard, the Duke of Norfolk, and the Earl of Surrey. During that reign religious persecution was carried on rather through the legal machinery devised for the punishment of high treason as defined by the Act of Supremacy than by bills of attainder. By the Act of Supremacy, the King was declared Head of the Church with "the title and style thereof"; by the penal act which followed as a corollary thereto, it was declared that any attempt to deprive him "of the dignity, title, or name" of his royal estate should constitute high treason; under the special act providing the amended oath, it was possible to call upon anyone to declare his belief in the validity of the new title, and a failure to do so was sufficient evidence of guilt. By that legal machinery were dashed to pieces the Charterhouse monks of London, who are admitted on every hand to have been the noblest and purest of all churchmen. Even Froude admits that they were "gallant men, whose high forms, in the sunset of the old faith, stand transfigured on the horizon, tinged with the light of its dying glory". The legal proceedings through which the Bishop of Rochester and Sir Thomas More were brought to the block were but a repetition of what had been gone through with in the case of the Carthusians. After the Tudor time the most remarkable bills of attainder are those that were directed against Lord Strafford, Lord Danby, the Duke of Monmouth, and Sir John Fenwick. As instances of bills of pains and penalties, reference may be made to those against Bishop Atterbury and Queen Caroline, usually referred to as the last instances of such legislation. When Queen Caroline returned to England, in July, 1830, all the ministers, except Canning, were induced to consent to the introduction in the House of Lords of a bill of pains and penalties, providing for the dissolution of her marriage with the King, upon the ground of adultery,

and for her degradation. When the charges contained in the preamble came on to be heard, Brougham and Denman, by their bold and brilliant defence of the Queen, so aroused popular sympathy in her favour, by holding her up as a deserted and persecuted woman, that the ministry deemed it wise to drop the bill after the majority in its favour in the Lords had dwindled to nine. Reference is made to this case as an illustration of the nature of the procedure upon such bills. "The proceedings of parliament in passing bills of attainder, and of pains and penalties, do not vary from those adopted in regard to other bills. They may be introduced in either house, but ordinarily commence in the House of Lords: they pass through the same stages; and when agreed to by both houses they receive the royal assent in the usual form. But the parties who are subjected to these proceedings are admitted to defend themselves by counsel and witnesses, before both houses; and the solemnity of the proceedings would cause measures to be taken to enforce the attendance of members upon their service in parliament" (May, *Parl. Practice*, 744). It thus appears that, in its modern form, procedure by attainder admits the right of proof and argument. Entirely apart from the judicature of Parliament, attainder is defined by the common law of England to be the stain or corruption of blood which follows as an immediate and inseparable consequence of a death sentence. Such attainder took place after judgment of death, or upon such circumstances as were equivalent to such a judgment, such as a judgment of outlawry on a capital crime, pronounced for absconding from justice. Conviction without judgment was not followed by attainder. The consequences of attainder were: first, forfeiture; second, corruption of blood. The extent of the forfeiture depended upon the nature of the crime for which the criminal was convicted; and by corruption of blood, "both upwards and downwards," the attainted person could neither inherit nor transmit lands. After it was clear beyond dispute that the criminal was no longer fit to live, he was called attaint, stained, or blackened, and before 6 and 7 Vict., c. 85, §. 1, could not be called as a witness in any court. The doctrine of attainder has, however, ceased to be of much practical importance since 33 and 34 Vict., c. 23, wherein it was provided that henceforth no confession, verdict, inquest, conviction, or judgment of or for any treason or felony, or *felo-de-se* shall cause any attainder or corruption of blood or any forfeiture or escheat.

HANNIS TAYLOR.

**Attala**, SAINT, b. in the sixth century in Burgundy; d. 627. He first became a monk at Lérins, but, displeased with the loose discipline prevailing there, he entered the monastery of Luxeuil which had just been founded by St. Columban. When Columban was expelled from Luxeuil by King Theodoric II, Attala was to succeed him as abbot, but preferred to follow him into exile. They settled on the banks of the river Trebbia, a little north-east of Genoa, where they founded the celebrated Abbey of Bobbio. After the death of St. Columban in 615, Attala succeeded him as Abbot of Bobbio. He and his monks suffered many hardships at the hands of the Arian King Ariowald. As abbot, Attala insisted on strict discipline and when a large number of his monks rebelled, declaring his discipline too rigorous, he permitted them to leave the monastery. When, however, some of these perished miserably, the others, considering their death a punishment from God, returned to the monastery. Attala was buried in Bobbio where his feast is celebrated on 10 March. MONTALEMBERT, *The Monks of the West* (Boston), I, 582; LECHNER, *Martyrolog. des Benediktiner Ordens* (Augsburg, 1855); STADLER, *Heiligen-Lexikon* (Augsburg, 1858), I, 341.

MICHAEL OTT.

**Attalia**, also **ATTALEIA**, a titular metropolitan see of Pamphylia in Asia Minor. Its episcopal list (431-879) is given in Gams (450). It is probably identical with the present Adalia, the chief port and largest place on the southern coast of Asia Minor. Remains of sculptured marbles are abundant in the vicinity. It is mentioned in Acts, xiv, 24-25, as the seaport whence Paul and Barnabas set sail for Antioch, at the close of their missionary journey through Pisidia and Pamphylia. Another city of the same name existed in Lydia, Asia Minor; its episcopal list (431-879) is given in Gams (447).

THOMAS J. SHAHAN.

**Attaliates**, MICHAEL, Byzantine statesman and historian, probably a native of Attalia in Pamphylia, whence he seems to have come to Constantinople between 1130 and 1140. He acquired in the royal city both wealth and position and was rapidly advanced, under successive emperors, to the highest offices, among others to that of judge of the supreme court of the empire. He compiled (1072) for the Emperor Michael Parapinakes a compendium of Byzantine law which supplements in a useful way the "*Libri Basilici*". In addition to this he also drew up an "Ordinance for the Poor House and Monastery", which he founded at Constantinople in 1077. This work is of value for the history of Byzantine life and manners in the eleventh century. It contains a catalogue of the library of his monastery. About 1079 or 1080 he published an account of Byzantine history from 1034 to 1079, a vivid and reliable presentation of the palace revolutions and female domination that characterize this period of transition from the great Macedonian dynasty to the Comneni. Attaliates writes as an eyewitness and contemporary. Though his style is not free from the usual affectations of Byzantine historians, it is more flowing and compact than that of his predecessors. Krumbacher praises his accurate judgment and sense of equity; in both respects he is superior to his continuator, the panegyrist and courtier Psellos. The law-manual of Attaliates was first edited by M. Freher (*Juris Græco-Romani Tomi Duo*, Frankfurt, 1596, II, 1-79); the "Ordinance", or *Διάταξις*, is found in Miklosich and Müller, "*Acta et Diplomata Græca Medii Ævi*" (1887), V, 293-327; the "History" was edited by I. Bekker, in the "*Corpus Script. Byz.*" (Bonn, 1853).

THOMAS J. SHAHAN.

**Attention.** See CONSCIOUSNESS.

**Atticus**, Patriarch of Constantinople (406-425), b. at Sebaste in Armenia; d. 425. He was educated in the vicinity of his native town by Macedonian monks, whose mode of life and errors he embraced. When still young he went to Constantinople, abjured his heretical tenets, and was raised to the priesthood. He and another ambitious priest, Arsacius, were the chief accusers of St. Chrysostom in the notorious Council of the Oak, which deposed (405) the holy patriarch. On the death (406) of the intruder Arsacius, he succeeded him in the See of Constantinople, and at first strove hard, with the help of the civil power, to detach the faithful from the communion of their lawful pastor. But finding that, even after the death of St. Chrysostom, they continued to avoid his own spiritual ministrations, he re-inserted the name of his holy predecessor in the diptychs of the churches. This change of attitude and his charity to the poor gradually made him less unpopular, and he at length managed to have himself recognized as patriarch by Innocent I. Intent

upon enlarging the prerogatives of his see, he obtained from Theodosius the Younger two rescripts which placed Bithynia and Illyria under his jurisdiction. Rome resisted these encroachments, and the rescripts, thanks to the intervention of Honorius, were recalled. Atticus in some measure atoned for his ambition and the irregularity of his promotion by his zeal in the cause of orthodoxy. He drove the Messalians from Pamphylia, and his opposition to the Pelagians caused him to be praised by Celestine I as "a true successor of St. Chrysostom".

VENABLES in *Dict. Christ. Biog.*, I, 207-209; VERSCHAFFEL in *Dict. de théol. cath.* (Paris, 1903), s. v.; TILLEMONT, *Mémoires*, XII, 416, 31, 672.

A. J. B. VUIBERT.

**Attigny, COUNCILS OF.**—In 765, St. Chrodegang of Metz and thirty-seven other bishops mutually promised in an assembly held at the royal residence of Attigny near Vouziers (Ardennes) that after the death of each the survivors would cause the psalter to be said one hundred times and would have one hundred Masses celebrated for the repose of the soul of the departed. Each one would also say thirty Masses for the same intention. In 785, Charlemagne held a council at Attigny. Widukind and Aboin, two conquered Saxon kings, presented themselves for instruction and were baptized. In 822, Pope Paschal I was present at a Council of Attigny, convened for the reconciliation of the Emperor Louis the Pious with his three younger brothers, Hugo, Drogo, and Theodoric, whom he had caused to be violently tortured and whom he had intended to put to death. In the council he confessed publicly his wrong-doing; also the violence practised by him on his nephew, Bernard, King of Italy, and his brother, the Abbot Adelard Wala, and proposed to perform public penance in imitation of the Emperor Theodosius I. He also exhibited an earnest desire to correct abuses arising from the negligence of the bishops and the nobles, and confirmed the rule (*Aquensis Regula*) that the Council of Aachen had drawn up (816) for canons and monks. In 870, thirty bishops and six archbishops met at Attigny, to pass judgment on Karlmann, the king's son, made an ecclesiastic at an early age, and accused by his father of conspiring against his life and throne. He was deprived of his abbey and imprisoned at Senlis. In the council of 875, Hincmar, Bishop of Laon, appealed to the pope from his uncle, Hincmar, Archbishop of Reims.

THOMAS J. SHAHAN.

**Attila**, king and general of the Huns; d. 453. Succeeding in 433 to the kingship of Scythian hordes disorganized and enfeebled by internal discords, Attila soon made of his subjects a compact and formidable people, the terror of Europe and Asia. An unsuccessful campaign in Persia was followed in 441 by an invasion of the Eastern Roman Empire, the success of which emboldened Attila to invade the West. He passed unhindered through Austria and Germany, across the Rhine into Gaul, plundering and devastating all in his path with a ferocity unparalleled in the records of barbarian invasions, and compelling those he overcame to augment his mighty army. In 451 he was met on the Plains of Châlons by the allied Romans under Aetius and the Visigoths under Theodoric and Thorismond, who overcame the Huns and averted the peril that menaced Western civilization. Turning then to Italy, Attila, in the spring of 452, laid waste Aquileia and many Lombard cities, and was approaching Rome, whither Valentinian III had fled before him, when he was met near Mantua by an embassy, the most influential member of which was Pope Leo I, which dissuaded Attila from sacking the city. Attila

died shortly after. Catholic interest in Attila centers chiefly in his relations with those bishops of France and Italy who restrained the Hunnish leader in his devastating fury. The moral power of these bishops, and particularly of the pope, during the dissolution of the empire, is evidenced as well by the confidence in which the faithful looked to them for succour against the terrible invader as by the influence they sometimes exerted in staying that invader's destroying hand. St. Agnan of Orleans sustained the courage of his people and hastened the reinforcements that saved his apparently doomed city; at Troyes, St. Lupus prevailed upon Attila to spare the province of Champagne, and gave himself as a hostage while the Hunnish army remained in Gaul; when Rome seemed destined to meet the fate of the Lombard cities which Attila had pillaged, it was Pope Leo the Great who, by his eloquence and commanding personality, overawed the conqueror and saved the city. The terror which for centuries after clung to the name of Attila, "the Scourge of God", as he came to be called, and the gratitude of the people to their deliverers combined in time to encumber medieval hagiography with legends of saints reputed to have overcome Attila by their imposing presence, or stayed his progress by their prayers. But these fictions serve to emphasize the import of the facts which inspired them. They enable us to appreciate how widespread must have been that sentiment expressed in the recently discovered appeal of Eusebius of Dorylaeum to Pope Leo I: "Curavit desuper et ab exordio consuevit thronus apostolicus iniqua perferentes defensare . . . et humi jacentes erigere, secundum possibilitatem quam habetis" [see Harnack, "History of Dogma" (Boston, 1903), II, 168]. National pride, too, came in time to invest the person of Attila with a halo of fiction. Most European countries have their legends of the Hunnish leader, who is diversely depicted, according as the vanity of nations would represent Attila as a friend who had contributed to their greatness or as a foe to whose superhuman strength it had been no discredit to succumb. Of these legends the best known is the story of Etzel (Attila) in the "Nibelungen-lied".

THIERRY, *Histoire d'Attila* (Paris, 1864); GIBBON, *Roman Empire* (New York, 1902), xxxiv, xxxv, III, 518-589, contains abundant references to sources; in SMITH and WACE, *Dict. Christ. Biog.* (London, 1877), I, the legendary and the historical elements of ecclesiastical tradition are not sufficiently distinguished. *Acta SS.*, s. v. *St. Lupus*, XXXIV, 75-90; and *St. Leo I*, XI, 18. JOHN B. PETERSON.

**Attiret, JEAN DENIS**, painter, b. at Dole, France, 31 July, 1702; d. at Pekin, 8 December, 1768. He made serious artistic studies in Rome and after returning to his native country achieved considerable reputation as a portrait painter. He entered the Jesuit novitiate as a lay brother and has left some specimens of his work in the Cathedral of Avignon and the Sodality chapel which he painted while a novice. The Jesuits had many of their men in China employed as painters. Attiret joined them in 1737 and was easily the superior of all. He was honoured with the title of Painter to the Emperor, who visited his studio daily and finally made him a mandarin in spite of the brother's unwillingness to accept the honour. As all the work was done not for art but for the sake of pleasing the emperor, every suggestion he made was carefully attended to. Oil was not agreeable, so aquarelles and distemper were resorted to. The Emperor did not like shading, for he thought it

was a blot, so that disappeared. It all ended in Attiret becoming altogether Chinese in his tastes and his methods, so that he no longer painted like a European. He made portraits of all the distinguished court-personages, but most of his work was done on glass or silk and represented trees, and fruits, and fishes, and animals, etc. When, however, the emperor had beaten back the Tatars, he ordered the battles to be painted. Four Jesuit brothers, among whom was Attiret, made sixteen tableaux, which were engraved in France in 1774. When the collection arrived from France, however, Attiret was dead. The emperor manifested great concern at his loss, bore the expenses of the obsequies, and sent a special representative to show his sorrow at the tomb. Attiret is credited with at least 200 portraits.

(Paris)*; SOMMERVOEL, *Bibl. de la c. de J.: Lettres Edificantes* (ed. 1780), XXII, 490, 528; (ed. 1843), III, 786, 795; XXVII; STÖCKLEIN, *Welt Bibl.*, XXXIX, n. 679; BEAUMONT, *Act. of the Emperor of China's Garden* (London, 1752); *North China Herald*, 3 Nov. 1860; *Précis historiques*, 1856, 437, 461, 435; *Journal des savants*, June, 1771.

T. J. CAMPBELL.

**Atto**, a faithful follower of Gregory VII in his conflict with the simoniac clergy, b. probably at Milan, made Cardinal of San Marco, assisted (1079) at the retraction of Berengarius in the Roman synod of that year, and signed the decrees of the synod of 1081. He may have been Bishop of Præneste. Cardinal Mai published under his name (SS. Vet. nova coll., VI, 2, 60 sqq.), from a Vatican manuscript, a "Breviarium Canonum", or miscellaneous collection of moral and canonical decrees, genuine and forged, from Pope Clement I to Gregory the Great. It deals particularly with clerical rights and duties, ecclesiastical acts, the administration of the sacraments, censures, jurisdiction, etc. Other cardinals of the name are mentioned in the anonymous (eighteenth-century) "Diatriba de Attonibus" published by Cardinal Mai (op. cit.; cf. P.L., CXXXIV, 902).

Bauck in *Kirchenlex.*, I, 1566, 1567.

THOMAS J. SHAHAN.

**Atto of Pistoia**, b. at Badajoz in Spain, 1070; d. 22 May, 1155. He became Abbot of Vallombrosa (Tuscany) in 1105, and in 1135 was made Bishop of Pistoia. He wrote lives of St. John Gualbert and of St. Bernard of Vallombrosa, Bishop of Parma. In 1145 he transferred to Pistoia certain relics of St. James of Compostella. His correspondence on that occasion is found in Ughelli, "Italia Sacra", VII, 296.

THOMAS J. SHAHAN.

**Atto of Vercelli**, a learned theologian and canonist of the tenth century, son of the Viscount Aldegarius, and Bishop of Vercelli (924-961). In 933 he became Grand Chancellor of Lothaire II, King of France, and obtained from the royal gratitude donations and privileges for his see of Vercelli (Ughelli, *Italia Sacra*, IV, 769). Several of his writings were first published by the Benedictine D'Achery (1655-77) in his "Spicilegium" VIII, 1-137; 2d ed., 1723, I, 401-442, e. g. "Epistolæ, Libellus de pressuris ecclesiasticis", and "Canones rursus statutaque Vercellensis ecclesiæ". A complete edition was executed by Baronzo del Signore, in two folio volumes (Vercelli, 1768; P. L., CXXXIV, 27-834), inclusive of his lengthy commentary on the Epistles of St. Paul. In 1832 Cardinal Mai published eighteen sermons of Atto, and his curious "Polypiticum", or "Perpendiculum", an abridgment of moral philosophy, "written in a mysterious and enigmatic way". In his history of early medieval literature Ebert transfers to some Spaniard the authorship of this work, but Hauck defends the traditional view (Realencyk. f. prot. Theol., II, 214). His "Can-

ones" are in great part a compilation of earlier ecclesiastical legislation, including the False Decretals. They contain, also, certain provisions of his own and are of value for the study of contemporary ecclesiastical life and manners in Northern Italy. He is sometimes known as Atto II; an earlier homonymous bishop of Vercelli flourished about the middle of the eighth century.

THOMAS J. SHAHAN.

**Attracta** (OR ARAGHT), SAINT, a contemporary of St. Patrick from whom she received the veil. She is known as the foundress of several churches in the counties of Galway and Sligo, Ireland. Colgan's account of her life is based on that written by Augustine Magraidin in the last years of the fourteenth century, and abounds in improbable statements. However, the fact of St. Attracta receiving the veil from St. Patrick is corroborated by Tirechán, in the "Book of Armagh", as is evident from the following passage in the "Documenta de S. Patricio" (ed. Edmund Hogan, S.J.): "Et ecclesiam posuit in cella Adrachtæ, filiæ Talain, et ipsa accepit pallium de manu Patricii." A native of the County Sligo, she resolved to devote herself to God, but being opposed by her parents, fled to South Connacht and made her first foundation at Drumconnell, near Boyle, County Roscommon, whence she removed to Greagraighe, or Coolavin, County Sligo. At Killaraght, St. Attracta established a hospice for travellers, which existed as late as 1539. Her fame was so great that numerous places were named after her, e. g. Killaraght (Cill Attracta), Toberaraght, Cloghan Araght, etc., and a large village which grew up around her oratory at Killaraght in Coolavin. Colgan gives an account of the Cross of St. Attracta which was famed during the Middle Ages, and of which the O'Mochain family were hereditary keepers. A striking confirmation of the existence of this relic in the early years of the fifteenth century is afforded by an entry in the "Calendar of Papal Letters" (VI, 451), from which we learn that in 1413 the cross and cup of St. Attracta (Crux ac Cuach Aracht) were then venerated in the church of Killaraght, in the Diocese of Achonry. By an Indult of 28 July, 1864, Pius IX authorized the Office and Mass of St. Attracta, which had lapsed into desuetude, to be again celebrated in the Irish Church. The feast of St. Attracta, on 11 August, is given special honour in the Diocese of Achonry, of which she is the patroness. The prayers and proper lessons for her Office were drawn up by Cardinal Moran.

GRATTAN FLOOD, *Irish Saints; Acta SS.* (1658), 2 Feb., 296-297; *Bibl. Hagiogr. Lat.* (1801), 1156; COLGAN, *Acta SS. Hibern.* (1645), I, 277-282; O'HANLON, *Lives of Irish Saints*, VIII (11 Aug.).

W. H. GRATTAN FLOOD.

**Attributes, DIVINE.**—In order to form a more systematic idea of God, and, as far as possible, to unfold the implications of the truth, God is All-Perfect, this infinite Perfection is viewed, successively, under various aspects, each of which is treated as a separate perfection and characteristic inherent to the Divine Substance, or Essence. A certain group of these, of paramount import, is called the Divine Attributes.

I. KNOWLEDGE OF GOD MEDIATE AND SYNTHETIC.—Our natural knowledge of God is acquired by discursive reasoning upon the data of sense and introspection, "For the invisible things of Him, from the creation of the world, are clearly seen, being understood by the things that are made; His eternal power also, and Divinity" (St. Paul, Romans, i, 20). Created things, by the properties and activities of their natures, manifest, as in a glass, darkly,

the powers and perfections of the Creator. But these refracted images of Him in finite things cannot furnish grounds for any adequate idea of the Infinite Being. Hence, in constructing a synthetic idea of God, before one can apply to the Divinity any concept or term expressing a perfection found in created being, it must be subjected to rigorous correction. The profound disparity between the Divine perfection and the intimations of it presented in the world-copy may be broadly laid down under two heads. (1) Number.—The perfections of creatures are innumerable, the Divine perfection is one. (2) Diversity.—Created perfections differ endlessly in kind and degree; the Divine perfection is uniform, simple. It is not a totality of various perfections; absolutely simple, the Divine perfection answers to every idea of actual or conceivable perfection, without being determined to the particular mode of any. Hence, when any attribute expressing modes characteristic of the world of being that falls within the range of our experience is applied to God its signification ceases to be identical with that which it has in every other case. Yet it retains a real meaning in virtue of the ratio which exists between the finite being and its Infinite analogue. In philosophical phrase, this use of terms is called analogical predication, in contradistinction to univocal, in which a word is predicated of two or more subjects in precisely the same sense. (See ANALOGY.)

II. SOURCE OF OUR NATURAL KNOWLEDGE OF GOD.—To correct, as far as possible, the inadequate character of the concepts through which we must formulate our idea of God, the first step is to distinguish created perfection into two kinds, viz., mixed perfections and pure perfections. A pure perfection is one whose exact concept does not include any note formally expressive of defect or limitation; the content of the idea is entirely positive. The idea of a mixed perfection, on the contrary, formally or directly connotes, along with what is positive in the perfection, some privation or deficiency. Examples of the former are power, truthfulness, will; as an instance of the latter, materiality may be offered. For, though the reality that belongs to matter is, of course, a participation of existence and activity, yet the concept of it connotes the imperfections of that particular kind of existence which is composite and subject to disintegration. Again, personality is a pure perfection; for, as Catholic philosophy teaches, though the finite character of human personality comes into play in the awakening of self-consciousness, yet limitation is not an essential constituent of personality. All terms that stand for pure perfections are predicated analogically of God, and are designated attributes in the wide sense of the word. When terms which signify mixed perfections are predicated of God, the analogy becomes so faint that the locution is a mere metaphor.

III. INDUCTIVE DEVELOPMENT OF ATTRIBUTES.—The elaboration of the idea of God is carried out along three converging lines: (1) The positive way of causality.—In virtue of the principle that whatever excellence is contained in an effect is represented in the efficiency of the cause, reason affirms that every positive perfection of created being has its transcendental analogue in the first cause. Hence, from the existence of an intelligent being, man, in the cosmos, we rightly infer that God is intelligent, that is to say, His infinite perfection is superabundantly adequate to all the operations of intellect. (2) The negative way.—If we fix our attention precisely on the Infinity of God, then, focusing the negation not upon the positive content of any created perfection, but upon the fact that, because it is finite it is determined in kind and limited in degree, we may affirm that it is not found in God. We may say, e. g., that He is not intelligent. The

meaning of the statement is not that God lacks intelligence, but that in Him there is not intelligence exactly as we know it. Again, since there is no imperfection in God, every concept of defect, privation, and limitation must be negated of God. Many negative names, it is true, are applied to God; as when, for instance, He is said to be immutable, uncaused, infinite. It should, however, be carefully observed that some attributes, which, from the etymological point of view, are negative, convey, nevertheless, a positive meaning. Failure to perceive this obvious truth has been responsible for much empty dogmatism on the impossibility of forming any concept of the Infinite. The basic note in the idea of the Infinite is existence, actuality, perfection; the negative note is subordinate. Furthermore, since the force of the latter note is to deny any and all limitations to the actuality represented by the former, its real import is positive, like the cancellation of a minus sign in an algebraic formula; or, it discharges the function of an exponent and raises actuality to the  $n$ th power. (3) Way of eminence.—The concept of a perfection derived from created things and freed of all defects, is, in its application to God, expanded without limit. God not only possesses every excellence discoverable in creation, but He also possesses it infinitely. To emphasize the transcendence of the Divine perfection, in some cases an abstract noun is substituted for the corresponding adjective; as, God is Intelligence; or, again, some word of intensive, or exclusive, force is joined to the attribute; as, God alone is good, God is goodness itself, God is all-powerful, or supremely powerful.

IV. DEDUCTIVE DEVELOPMENT.—Having established the existence of God from metaphysical, physical, and moral arguments, the theologian selects some one of the attributes which these proofs authorize him to predicate of the Divinity and, by unfolding its implications, reaches a number of other attributes. For instance, if God is Pure Actuality, that is, free from all static potency, it follows that, since change implies a transition from an antecedent potential condition to a subsequent condition in which the potentiality is realized, God is immutable. Here we reach the point where the term Attribute is employed in its strict sense.

V. ESSENCE AND ATTRIBUTES.—Transcendentally one, absolutely free from composition, the Divine Being is not, and may not be conceived as, a fundamental substrate in which qualities or any other modal determinations inhere. The reality to which the various attributes are ascribed is one and indivisible.—“*Quæ justitia,*” says St. Augustine, “*ipsa bonitas; quæ bonitas, ipsa beatitudo.*”—In this respect, the relation of the attributes to the Divine nature might be illustrated by the various reflections of one and the same object from a concave, a convex, and a plane mirror. Nevertheless, to systematize the idea of God, and to draw out the rich content of the knowledge resulting from the proofs of God's existence, some primary attribute may be chosen as representing one aspect of the Divine perfection from which the others may be rigorously deduced. Then arises a logical scheme in which the derivative attributes, or perfections, stand towards one another in a relation somewhat similar to that of the essence and the various properties and qualities in a material substance. In this arrangement the primary perfection is termed the metaphysical essence, the others are called attributes. The essence, too, may be regarded as that characteristic which, above all others, distinguishes the Deity from everything else. Upon the question, which attribute is to be considered primary, opinions differ. Many eminent theologians favour the conception of pure actuality (*Actus Purus*) from which simplicity and infinity are directly de-

duced. Most modern authors fix on aseity (*Aseitas*;  $\alpha$ ="from"  $\sigma\epsilon$ ="himself"), or self-existence; for the reason that, while all other existences are derived from, and depend on, God, He possesses in Himself, absolutely and independently, the entire reason of His uncaused, infinite Being. In this, the most profound and comprehensive distinction between the Divinity and everything else, all other distinctions are implicitly expressed. Whether, and in what way, the distinctions between the attributes and the metaphysical essence, and among the attributes themselves, have an ontological basis in the Divine nature itself, was a subject which divided Nominalists and Realists, Thomists and Scotists, in the age of Scholasticism (cf. Vacant, *Dict. de théol. cathol.*, I, 2230-34).

VI. DIVISION OF ATTRIBUTES.—Taking as the basis of classification the ways by which the attributes are developed, they are divided into positive and negative. Among the negative attributes are simplicity, infinity, immutability. The chief positive attributes are unity, truth, goodness, beauty, omnipotence, omnipresence, intellect and will, personality. Some authors divide them into incommunicable and communicable. The former class comprises those which belong to God alone (e. g., all-wise, self-existent, omnipotent) to the latter belong those which are predicable, analogically, of God and creatures; as good, just, intelligent. Again, the divine nature may be considered either as static, or as the source of activity; hence another division into quiescent and active. Finally, some perfections involve a relation to things distinct from God, while others do not; and from this standpoint theologians divide the attributes into absolute and relative. The various classifications adopted by modern Protestant theologians are due partly to the results of philosophical speculation and partly to new conceptions of the nature of religion. Schleiermacher, e. g., derives the attributes of God from our three-fold consciousness of absolute dependence, of sin, and of grace. Others, with Lipsius, distinguish the metaphysical attributes from the psychological and the ethical. A simpler division groups omnipotence, omnipresence, eternity, omniscience, and unity as the metaphysical predicates, justice and goodness as the moral attributes. The fundamental attribute is, according to Ritschl, love; according to Professor Royce, omniscience. The main difficulty with these writers centres about the idea of God as a personal being.

VII. REVELATION.—The supernatural knowledge of God given in revelation is apprehended through the medium of conceptions that belong to natural knowledge. Therefore, the same principles of attribution that govern the one hold good also for the other.

VIII. HISTORICAL DEVELOPMENT.—In the fourth century Aetius and Eunomius maintained that, because the Divine nature is simple, excluding all composition or multiplicity, the various terms and names applied to God are to be considered synonymous. Otherwise they would erroneously imply composition in God. This opinion was combated by St. Cyril of Alexandria, St. Basil, and St. Gregory of Nyssa (In Eunom., P. G., XLV). The principle of attribution received more precise statement at the hands of St. Augustine, in his investigation of the conditions of intellectual knowledge (*De Genesi ad Litteram*, IV, 32). In the ninth century, John Scotus Erigena, who was largely influenced by Neo-Platonism, transmitted through the works of the Pseudo-Dionysius, contributed to bring into clearer relief the analogical character of predication (*De Divinâ Naturâ*, Lib. I). The Nominalists revived the views of Eunomius, and the opposition of the Realists was carried to the other extreme by

Gilbert de la Porrée, who maintained a real, ontological distinction between the Divine Essence and the attributes. His opinion was condemned by the Council of Reims (1148). St. Thomas definitively expressed the doctrine which, after some controversies between Scotists and Thomists upon minor points and subtleties, and with some divergence of opinion upon unimportant details, is now the common teaching of Catholic theologians and philosophers. It may be summarized as follows: The idea of God is derived from our knowledge of finite beings. When a term is predicated of the finite and of the Infinite, it is used, not in a univocal, but in an analogical sense. The Divine Perfection, one and invisible, is, in its infinity, the transcendental analogue of all actual and possible finite perfections. By means of an accumulation of analogous predicates, methodically co-ordinated, we endeavour to form an approximate conception of the Deity who, because He is Infinite, cannot be comprehended by finite intelligence. Modern philosophy presents a remarkable gradation, from Pantheism, which finds God in everything, to Agnosticism, which declares that He is beyond the reach of knowledge. Spinoza conceives God as "a substance consisting of infinite attributes each of which expresses eternal and infinite essence". The two attributes manifested to us are thought and extension. At the other extreme we find Agnostics of the school of Herbert Spencer (see AGNOSTICISM) and some followers of Hegel, who hold that the nature of God, or, to use their favourite term, "the Absolute", is utterly unknowable, and its existence not determined to any mode; therefore, to predicate of it various attributes, expressive of determinations, is idle and misleading. Between the finite and the Infinite there is no common ground of predication; hence, words which signify finite perfections can have no real meaning when predicated of God; they become mere empty symbols. All theological attempts to elaborate an idea of God are vain, and result in complete absurdity when they conceive God after man's image and likeness (see ANTHROPOMORPHISM), and circumscribe the Infinite in terms borrowed from human psychology. Criticism of this kind indicates that its authors have never taken the trouble to understand the nature of analogical predication, or to consider fairly the rigorous logical process of refining to which terms are subjected before being predicated of God. It often happens, too, that writers, after indulging liberally in eloquent denunciation of theological anthropomorphism, proceed, on the next page, to apply to the Infinite, presumably in a strictly univocal sense, terms such as "energy", "force", and "law", which are no less anthropomorphic, in an ultimate analysis, than "will" and "intelligence". The position of the Catholic Church, declared in the Fourth Lateran Council (1215), is again clearly stated in the following pronouncement of the Vatican Council:

"The Holy Catholic Apostolic Roman Church believes and professes that there is one living and true God, Creator and Lord of heaven and earth, omnipotent, eternal, immense, incomprehensible, infinite in intellect and will and in all perfection; Who, being One, singular, absolutely simple and unchangeable spiritual substance, is to be regarded as distinct really and in essence from the world, most blessed in and from Himself, and unspeakably elevated above all things that exist, or can be conceived, except Himself."

JAMES J. FOX.

**Attrition, or IMPERFECT CONTRITION** (Lat. *attero*, "to wear away by rubbing"; p. part. *attritus*).—The Council of Trent (Sess. XIV, Chap. iv) has defined contrition as "sorrow of soul, and a hatred of sin committed, with a firm purpose of not sinning in the future". This hatred of sin may arise from various motives, may be prompted by various causes. If the detestation of sin arise from the love of God, Who has been grievously offended, then contrition is termed perfect; if it arise from any other motive, such as loss of heaven, fear of hell, or the heinousness of guilt, then it is termed imperfect contrition, or attrition. That there exists such a disposition of soul as attrition, and that it is a goodly thing, an impulse of the Spirit of God, is the clear teaching of the Council of Trent (Sess. XIV, iv). "And as to that imperfect contrition which is called attrition, because it is commonly conceived either from the consideration of the turpitude of sin, or from the fear of hell and of punishment, the council declares that if with the hope of pardon, it excludes the wish to sin, it not only does not make man a hypocrite and a greater sinner, but that it is even a gift of God, and an impulse of the Holy Spirit, who does not indeed as yet dwell in the penitent, but who only moves him; whereby the penitent, being assisted, prepares a way for himself unto justice, and although this attrition cannot of itself, without the Sacrament of Penance, conduct the sinner to justification, yet does it dispose him to receive the grace of God in the Sacrament of Penance. For smitten profitably with fear, the Ninivites at the preaching of Jonas did fearful penance and obtained mercy from the Lord." Wherefore anent attrition, the council in Canon v, Sess. XIV, declares: "If any man assert that attrition . . . is not a true and a profitable sorrow; that it does not prepare the soul for grace, but that it makes a man a hypocrite, yea, even a greater sinner, let him be anathema." This doctrine of the council is in accord with the teaching of the Old and the New Testament. The Old Testament writers praise without hesitation that fear of God which is really "the beginning of wisdom" (Ps. cx). One of the commonest forms of expression found in the Hebrew scriptures is the "exhortation to the fear of the Lord" (Ecclus., i, 13; ii, 19 sqq.). We are told that "without fear there is no justification" (ibid., i, 28; ii, 1; ii, 19). In this fear there is "confidence of strength" and it is "a fountain of life" (Prov., xiv, 26, 27); and the Psalmist prays (Ps. cxviii, 120): "Pierce thou my flesh with thy fear: for I am afraid of thy judgments."

**NEW TESTAMENT.**—Even when the law of fear had given way to the law of love, Christ does not hesitate to inculcate that we must "fear him who can destroy both soul and body into hell" (Matt., x, 28). Certainly, too, the vivid account of the destruction of Jerusalem, typical of the final destruction of the world, was intended by Jesus to strike terror into the hearts of those who heard, and those who read; nor can one doubt that the last great judgment as portrayed by Matthew, xxv, 31 sqq., must have been described by Christ for the purpose of deterring men from sin by reason of God's awful judgments. The Apostle appears not less insistent when he exhorts us to work out "our salvation in fear and trembling" lest the anger of God come upon us (Phil., ii, 12). The Fathers of the earliest days of Christianity have spoken of fear of God's punishments as a goodly virtue that makes for salvation. Clement of Alex-

andria (Strom., VII) speaks of righteousness which comes of love and righteousness arising from fear, and in the Strom., II, ch. vii, he speaks at length on the utility of fear, and answers all objections brought forward against his position. The most striking sentence is the one wherein he says: "cautious fear is therefore shown to be reasonable, from which arises repentance of previous sins", etc. St. Basil (4th interrogatory on the Rule) speaks of the fear of God and of His judgments, and he asserts that for those who are beginning a life of piety "exhortation based on fear is of greatest utility", and he quotes the wise man asserting, "The fear of God is the beginning of wisdom" (P. G., XXXI). St. John Chrysostom may be quoted in the same sense (P. G., XLIX, 154). St. Ambrose, in the fifteenth sermon on the Psalm cxviii speaks at large on godly fear which begets charity, begets love: *Hunc timorem sequitur caritas* (P. L., xv, 1424), and his disciple, St. Augustine, treats fully the godliness of fear as a motive to repentance. In the 161st of his sermons (P. L., XXXVIII, 882 sqq.) he speaks of refraining from sin for fear of God's judgments, and he asks: "Dare I say such fear is wrong?" He replies that he dare not, for the Lord Christ urging men to refrain from wrongdoing suggested the motive of fear. "Fear not those who kill the body", etc. (Matt., x). True, what follows in St. Augustine has been subject to much dispute, but the general doctrine of the godliness of fear is here propounded, and the difficulty, if aught there be, touches the other question hereinafter treated anent "Initial Love".

The word itself, attrition, is of medieval origin. Father Palmieri (De Pœnit., 345) asserts, on the authority of Aloysius Mingarelli, that the word is thrice found in the works of Alanus of Lille, who died at an advanced age in the year 1203; but its use in the school is contemporaneous with William of Paris, Alexander of Hales, and Blessed Albert. Even with these men its meaning was not so precise as in after years; though they all agreed that of itself it did not suffice to justify the sinner in God's sight. (See the Scholastic traditions in article ABSOLUTION, and Palmieri, loc. cit.). This fear is godly, since it excludes not only the will to sin, but also the affection for sin. There would perhaps have been little difficulty on this point if the distinction were kept in mind between that fear which is termed *servilis*, which touches will and heart, and that fear known as *serviliter servilis*, which though it makes man refrain from performing the sinful act, leaves the will to sin and the affection thereto.

**ATTRITION IN THE SACRAMENT OF PÉNANCE.**—The Church not only regards the godliness of fear as a motive to repentance, but expressly defines that attrition, though it justifies not without the Sacrament of Penance, nevertheless disposes the sinner to receive grace in the sacrament itself (Sess. XIV, iv). This particular phase of the doctrine of contrition in penance is first taught with clearness by the Schoolmen of the twelfth century, and particularly by St. Thomas, who gathered into a united whole the jarring opinions of his predecessors (See the Scholastic in article ABSOLUTION). Though some still preferred to follow the Lombards who insisted on perfect contrition, after St. Thomas there was little division in the schools up to the time of the Council of Trent. At the council there was some opposition to a clear definition, some of the Fathers insisting on the necessity of perfect contrition, and it was perhaps for this reason that the decree was couched as above, leaving it still possible to doubt whether attrition was a proximate, or only a remote, disposition for justification in the sacrament. To-day the common teaching is that the council simply intended to define the sufficiency of attrition (Vacant, Dict. de théol., col. 2246-47). And this would seem reasonable,

because it is the clear teaching of the Church that perfect contrition justifies the sinner even without the Sacrament of Penance. If perfect contrition, then, were always necessary, why did Christ institute a particular sacrament, since justification would always be imparted independently of the sacramental ceremony? If attrition is sufficient for justification in the Sacrament of Penance, then there seems no reason to deny its sufficiency when there is question of remitting sin through baptism, for the reason given above will apply equally in this place. The question has also been asked apropos of attrition, when one receives a sacrament of the living in mortal sin, of which sin he is not conscious, will attrition with the sacrament suffice unto justification? The answer is generally given in the affirmative. See St. Thomas, *Summa Theol.*, III, 2, a. 7 ad 2<sup>am</sup>, 7ed., 2; Billot, *De Pœnit.*, p. 152.

CONDITIONS.—That attrition may make for justification, it must be interior, supernatural, universal, and sovereign. (See *Conditions* in article CONTRITION.) Interior, for the Council of Trent requires that it should exclude the will to sin. Supernatural, for Innocent XI condemned the proposition, "Probabile est sufficere attritionem naturalem modo honestam". Universal, for the motives of attrition (fear of hell, loss of heaven, etc.) are of such a nature as to embrace all sins. Sovereign, for here again the ordinary motives of attrition (fear of hell, etc.) make one hate sin above all other evil. It has been questioned whether this would be true if the motive were fear of temporal punishments (Genicot, T. 11, n. 274; Billot, *De Pœnit.*, 159 sq.). The Reformers denied the honesty and godliness of attrition, and held that it simply made man a hypocrite. (Bull of Leo X, *Exurge Domine*, prop. VI; Council of Trent, Sess. XIV, can. iv.) They were followed by Baius, Jansen, and his disciples, who taught that fear without charity was bad, since it proceeded not from the love of God, but love of self (see prop. 7, 14, 15, condemned by Alexander VIII, 7 December, 1690; also 44, 61, 62, condemned by Clement X, "Unigenitus", 8 September, 1717. Also Bull of Pius VI, "Auctorem Fidei", prop. 25).

Catholic writers in the seventeenth century questioned, whether attrition must of necessity be accompanied at least by the beginning of the love of God, and, that granted, whether such love was a disinterested love of God for His own sake, or whether it might not be that love termed *concupiscentia*, or love of God because He is our great good. Some held that in every real act of attrition there must be the beginning of love; others denied categorically this position, exacting only that sorrow which excludes affection for sin, and hope of pardon; others insisted that there must be at least a beginning of that love which has been termed above *concupiscentia*; while still others exact only that love which begets hope. On these opinions see Vacant, *Dict. de théol.*, s. v. Attrition, cols. 2252, 2253, 2254, etc. On the controversy, particularly in Belgium, see Dollinger and Reusch (*Dict.*, col. 2219). The controversy waxed so warm that Alexander VII issued a decree, 6 May, 1667, in which he declares his distress at the almost scandalously bitter disputes waged by certain scholastic theologians as to whether the act of attrition which is conceived through fear of hell, but excludes the will of sinning and counts on obtaining the mercy of recovering grace through the Sacrament of Penance, requires in addition some act of love of God, and then "enjoins on all of whatever rank, under pain of incurring the severest ecclesiastical penalties, not to presume in future when discussing the aforesaid act of attrition to brand with any mark of theological censure, or wrong, or contempt, either one or the other of the two opinions; that denying the necessity of some sort of love of God

[*negantem necessitatem aliqualis dilectionis Dei*] in the attrition conceived through fear of hell, which today (1667) seems the one more generally held by scholastic theologians, or that affirming the necessity of the said love, until something shall have been defined in this matter by this Holy See." The authoritative statement of Alexander VII leaves the question still open as Benedict XIV teaches in "De Synodo", Bk. VII, xiii, n. 9. Still it is clear that Alexander considered as more probable the opinion stating attrition as sufficient for justification in the Sacrament of Penance even if it included not the beginning of love. The censure *latae sententiae* was omitted in the "Apostolicæ Sedis". On the formula, "*Ex attrito fit contritus*", cf. Vacant, *Dict. de théol.*, col. 2256 sqq.

EDWARD J. HANNA.

**Attuda**, a titular see of Phrygia in Asia Minor, whose episcopal list (431-879) is given in Gams (446). LEQUIEN, *Oriens Christ.* (1740), I, 825-826; SMITH, *Dict. of Greek and Roman Geogr.*, I, 336.

**Aubarède, JEAN-MICHEL-D'ASTORG**, canon regular, and Vicar Capitular of Pamiers; b. 1639; d. 4 August, 1692. He was educated at Toulouse (France), entered the Seminary of Pamiers, and later joined the canons regular, who formed the cathedral chapter of that diocese. After the death of the bishop, François Caulet, Aubarède was chosen vicar capitular. As administrator of the diocese, he took up and carried on vigorously the resistance of Caulet to the royal demands in the matter of the Regalia. He refused to recognize royal nominations to local ecclesiastical benefices, and excommunicated the canons appointed by the king, when they attempted to exercise their office. He was arrested by royal order, and imprisoned for six years at Caen, where he died. His courageous resistance is remarkable at a time when ecclesiastical servility in France had reached its acme. B. Jungmann remarks (in Herder, K. L., I, 1567) that the well-known Jansenistic rigorism of Caulet and his clergy was partly responsible for their stubborn defiance of Louis XIV; they rightly feared that the nominees of the king would not belong to their faction.

QUÉRIN, *L'Assemblée du clergé de France de 1682*.

THOMAS J. SHAHAN.

**Aubermont, JEAN-ANTOINE D'**, of Bois-le-Duc, theologian, d. 22 November, 1686. He joined the Dominicans in 1633, taught philosophy and theology in several convents of his order, was made doctor of theology at Louvain in 1652, and president of the local Dominican college in 1653. His theological writings are mostly in defence of papal infallibility (1682) and against the Gallican teachings of the Declaration of 1682. Shortly before his death he defended against Papebroch St. Thomas of Aquin's authorship of the Mass for Corpus Christi.

THOMAS J. SHAHAN.

**Aubery, JOSEPH**, Jesuit missionary in Canada, b. at Gisors in Normandy, 10 May, 1673; d. at St. François, Canada, 2 July, 1755. At the age of seventeen he entered the Society of Jesus, and for four years studied in Paris. He arrived in Canada in 1694 and completed his studies at Quebec, where he was also instructor for five years, and where he was ordained in 1700. Assigned to the Abnaki mission, he re-established in 1701 the mission at Medoctec on the St. John River, which appears to have been abandoned by the Franciscans about a year earlier. In 1708 he was given charge of the Abnaki reduction at St. François, and exercised the apostolate in that single mission for nearly half a century. Aubery is said to have been an able linguist, but unfortunately his numerous MSS., with

the mission registers, were destroyed by fire in 1759. He also wrote several memorials in opposition to the claims of the English in Acadia, and sent them to the French Government, urging that the boundaries between the French and English possessions should be determined by mutual agreement. To these memorials he added a map, giving the boundaries as defined by the treaty of Utrecht. His plan, however, was not accepted. These valuable documents are still preserved in the Paris archives. Chateaubriand reproduces the life-story of Father Aubery in the character of the missionary in his "Atala".

THWAITES, *Jesuit Relations* (Cleveland, 1900), LXVI, 344; ROCHEMONTIEL, *Les Jésuites* (Paris, 1895-96); MAURALT, *Histoire des Abénakis* (Quebec, 1886); BRUNS, *Hist. Colls.*, I, 1896.

EDWARD P. SPILLANE.

**Aubignac**, FRANÇOIS HÉDELIN, ABBÉ D', grammarian, poet, preacher, archæologist, philologist, b. at Paris, 4 August, 1604; d. at Nemours, 27 July, 1676. He took his name from an abbey that was granted him. After completing his classical and theological studies, he was appointed by Cardinal Richelieu instructor to the latter's nephew, the young Duc de Fronsac, to whose gratitude he owed a pension of 4,000 *livres*. This appointment, as well as his own inclination, led him to devote his time to literary studies, especially to the classics. He was drawn into the controversy between the ancients under the leadership of Boileau, and the moderns under Perrault, his philological views being used by the latter for the support of their cause. The drama had a special attraction for d'Aubignac, who wrote not only a tragedy, "Zénobie", but also a work entitled "Pratique du Théâtre".

The abbé interests modern scholars chiefly because of his attitude on what is known as the "Homeric Question". He was one of the first to doubt the existence of Homer; he even propounded the theory that the *Iliad* is made up of a number of independent ballads gathered and put together by a compiler not very much later than the supposed date of Homer, whom he took to be Lycurgus. This first compilation, however, was not final, as the poem continued to be handed down by the recitation of rhapsodists who again divided the work into separate songs, Pisistratus making the final redaction. These views were based partly on statements in the Greek historians, partly on reasons drawn from the poem itself. D'Aubignac dwelt on the impossibility of transmitting so long a poem without the aid of writing which he, as did Wolf, believed to be unknown to Homer. He drew arguments from the construction of the epic, its lack of unity and its multiplicity of themes, the quarrel of Achilles being treated of in only a few books. The name *Iliad* he considered a misnomer, since Troy is not the subject of the story. The *Iliad*, he contended, has no suitable ending; the reader's curiosity remains unsatisfied. It contains many cantos that might be omitted, not only without detriment but with positive advantage to the action of the story. Besides these general considerations, he adduced numerous details which constitute flaws in the poem as we possess it, but which would be entirely justified in separate ballads. In short, there are few objections made to the *Iliad* by modern scholars on æsthetical and rhetorical grounds which are not touched upon by the French humanist. The arguments against a single author, drawn from the character of the language, the intermixture of the dialects and the like, d'Aubignac could not present, because linguistic studies in his day had not advanced sufficiently to enable him to appreciate the "Homeric Question" from this point of view. Though the abbé had on many occasions set forth in writing his opinions on Homer, it was only shortly before his death that he wrote

an extended work on the theme, entitled "Conjectures académiques, ou dissertation sur l'*Illiade*". He died before he was able to make the final revision, and it was not published until 1715, forty years after his death. The work was known to Wolf, and though the French scholar anticipated many of his own views he does him scant justice. A German critic declares that d'Aubignac's arguments are substantially as strong as Wolf's, in some respects stronger, and that if Wolf's "Prolegomena" produced greater and more lasting results, this is due less to the character of his arguments than to the greater skill with which they are set forth.

FINSLER, *Die Conjectures académiques des Abbé d'Aubignac in Neue Jahrbücher für das klassische Altertum und für Pädagogik* (Leipzig, 1905) XV.

CHARLES G. HERBERMANN.

**Aubigné**, JEAN-HENRI MERLE D'. See REFORMATION.

**Aubusson**, PIERRE D', Grand Master of the Order of St. John of Jerusalem, b. 1423; d. 1503. He made his first campaigns against the Turks, and fought next under the French Dauphin in a war against the Swiss (1444). It was on his return from this last expedition that he obtained from Charles VII permission to join the Hospitallers. The year 1460 found him Castellan of Rhodes, and he soon after became captain-general of the city, which had been the seat of the order since 1309, and was now the chief obstacle to Ottoman supremacy in the Mediterranean. Mahomet II therefore resolved to subdue it. D'Aubusson, who had been raised (1476) to the Grand Mastership, foresaw the sultan's design, and lost no time in making what preparations he could for the defence. A letter to the houses of his order brought him whatever men and money they could spare. Additional sums came from Sixtus IV and Louis XI, together with some of the bravest soldiers of Italy and France. Yet with all his exertions he was able to muster no more than 450 knights and 2,000 auxiliaries. The Turkish armament, which appeared before Rhodes 23 May, 1480, was overwhelmingly superior in numbers, and was furnished with the best artillery then obtainable. But the example of d'Aubusson's good right arm, and his omnipresence, made heroes of all the defenders. After three months of almost incessant fighting, which cost him 25,000 of his best warriors, the Turkish commander was forced to raise the siege. For this brilliant achievement d'Aubusson received a cardinal's hat, and was revered by all Christendom as "the Shield of the Church". In his subsequent efforts to form a league that would drive the Turks from Constantinople, he failed.

A. J. B. VUIBERT.

**Auch** (AUGUSTA AUSCORUM), ARCHDIOCESE OF, comprises the Department of Gers in France. Before the Revolution it had ten suffragan sees: Acqs (Dax) and Aire, afterwards united as the Diocese of Aire; Lectoure, later reunited with the Archdiocese of Auch; Couserans, afterwards united with the Diocese of Pamiers; Oloron, Lescar, and Bayonne, united later as the Diocese of Bayonne; Bazas, afterwards united with the Archdiocese of Bordeaux; Comminges, united later with the Archdiocese of Toulouse; and Tarbes. Up to 1789 the Archbishops of Auch bore the title of Primate of Aquitaine, though for centuries there had been no Aquitaine. The Archdiocese of Auch, re-established in 1882, was made up of the former archdiocese of the same name and the former Dioceses of Lectoure, Condom, and Lombez. Condom was previously a suffragan of Bordeaux, and Lombez of Toulouse; thenceforth the suffragans of Auch were Aire, Tarbes,

and Bayonne. A local tradition that dates back to the beginning of the twelfth century tells us that Taurinus, fifth Bishop of Eauze (Elusa), abandoned his episcopal city, which had been destroyed by the Vandals, and transferred his see to Auch. Eauze, in fact, probably remained a metropolitan see till about the middle of the ninth century, at which time, owing to the invasions of the Northmen, it was reunited to the Diocese of Auch, which had existed since the fifth century at least and then became an archdiocese. The first Bishop of Auch known to history is the poet, St. Orientius (first half of the fifth century), in honour of whom a famous abbey was founded in the seventh century. Cardinal Melchior de Polignac, author of the "Anti-Lucrèce," was Archbishop of Auch from 1725 to 1741. The cathedral of Sainte Marie, a Gothic structure with a Byzantine façade, is, in spite of this incongruity, very imposing; its fifteenth-century windows are said to be the most beautiful in France. The ancient episcopal sees of Condom and Lombez had a monastic origin. Bossuet was non-resident Bishop of Condom for two years (1668-71). At the end of the year 1905 the Archdiocese of Auch contained 238,448 inhabitants; 29 parishes, 478 succursal or mission churches, and 61 vicariates.

GEORGES GOTAU.

**AUCH, COUNCILS OF.** In 1068 a council of Auch decreed that, with a few exceptions, all churches should pay to the Cathedral of Auch one quarter of their tithes. At a council held in 1077 (near Clivempopulania) William, Archbishop of Auch, was deposed by Gerald, legate of Gregory VII. In 1276 a council was held at Auch in defence of ecclesiastical jurisdiction and immunities. In 1851 a provincial council of Auch drew up a number of decrees concerning faith and doctrine, the hierarchy, public worship, and ecclesiastical studies.

**Auckland, DIOCESE OF,** comprises the Provincial District of Auckland (New Zealand), with its islets, and the Kermadec Group. Area, 21,665 square miles. On Trinity Sunday, 1835, the Vicariate Apostolic of the Western Pacific was erected by Pope Gregory XVI. The Abbé Jean Baptiste François Pompallier was chosen as its first vicar. The territory under his jurisdiction comprised all New Zealand, the present Vicariates Apostolic of Fiji, Central Oceania, British New Guinea, Dutch New Guinea, New Pomerania, (part of) Gilbert Islands New Caledonia, Navigators' Islands, New Hebrides, and the Prefectures Apostolic of North Solomon Islands and Northern New Guinea. The new vicar was consecrated in Rome, 30 June, and sailed from Havre, 24 December, 1836, accompanied by the Marist Fathers Servant and Bataillon (Lyons), Chanel and Bret (Belley), and three lay-brothers. Father Bret died on the voyage. Father Bataillon (afterwards Vicar Apostolic of Central Oceania) was left at Wallis Island, and Father Chanel (Blessed Peter Chanel, Protomartyr of Australasia) at Futuna. Dr. Pompallier and Father Servant reached Hokianga (Auckland Province) 10 January, 1838, and were provided for by an Irish Catholic, Thomas Poynton. At that time there were probably fewer than 100 white Catholics in all New Zealand. Other Marist Fathers arrived in 1839 and subsequent years. The missions to the aborigines (Maoris) became very successful, despite grave calumnies propagated by Wesleyan trader-missionaries. By April, 1846, about

5,000 had been baptized, "and there were about five or six times as many catechumens." In 1845 Dr. Pompallier changed his headquarters to Auckland. In 1848 Auckland and Wellington were erected into sees. The Marist Fathers were withdrawn to the Wellington diocese in 1850. The Rev. James McDonald then became the principal missionary to the Auckland Maoris. The Maori missions in New Zealand were paralyzed by the series of native wars between 1843 and 1869. They were taken up in the Auckland diocese by the Mill Hill Fathers, in 1886. The Sisters of Mercy were introduced in 1850. In 1868 Dr. Pompallier went to France, resigned, and died in 1870. He was succeeded by Dr. Thomas William Croke (1870-74), afterwards Archbishop of Cashel. After five years, Father Walter Bisschop Steins, S.J., was appointed to Auckland (1879-81). He was succeeded by Dr. John Edmund Luck, O.S.B. (1882-96). The Right Rev. George Michael Lenihan, consecrated 15 November, 1896, succeeded him.

**STATISTICS.**—At the census of 1901, the white population of the Auckland Provincial District was 175,938 (of whom 27,246 were Catholics); Maoris, 21,291. The population of the Kermadecs was eight, all non-Catholics. The official estimate of the total white population of the Auckland Provincial District, 31 December, 1906, was 211,233; Catholic population of Auckland Provincial District (which is coterminous with the Diocese of Auckland if the Kermadec Islands be included), 32,272; population of the Kermadec Islands, five, all non-Catholics. According to "New Zealand Statistics, 1904", p. 503, there were in the Auckland Provincial District, at the close of 1904, 37 Catholic schools, with 96 teachers and 2,393 pupils. The following were the ecclesiastical statistics for April, 1906: secular clergy, 26; Mill Hill Fathers, for native population, 9; for whites and natives, 7; Catholic Maoris, about 5,000; parochial districts, 29; churches, 79; Religious Brothers, Marists, 12; Sisters of Mercy, 97; Sisters of St. Joseph, 36; Sisters of the Mission, 30; Little Sisters of the Poor, 8; colleges and high schools, 13; parochial schools, 25; orphanages, 2; home for the aged poor, 1; hospital, 1; children in Catholic schools, 2,600.

HENRY W. CLEARY.

**Auctorem Fidei**, a Bull issued by Pius VI, 28 August, 1794, in condemnation of the Gallican and Jansenist acts and tendencies of the Synod of Pistoia (1786). To understand its bearing, it is well to observe that Leopold II, Grand duke of Tuscany (1765-90), pursued the ecclesiastical policy of his brother, Joseph II of Austria; i. e. he practically arrogated to himself supreme authority over all ecclesiastical matters within his dominions. In 1785 he sent fifty-seven articles to each bishop in the grand duchy, with orders to consider them in a diocesan synod, as a preliminary to a national synod, in which they were finally to be discussed. Scipio de' Ricci, Bishop of Pistoia, held his diocesan synod, and approved not only the fifty-seven articles drawn up by order of Leopold, but added a number of others of similar import. Among them were the following: All ecclesiastical authority comes directly from the members of the Church at large, whose commissioned ministers the pastors are. The pope is only ministerially head of the Church. Bishops do not depend on the pope for any jurisdiction in the government of their diocese. In diocesan synods parish priests have the same right of voting and deciding as the bishop. Reserved cases should be abolished. Excommunication has only an external effect. It is superstition

to have more devotion towards one sacred image than towards another. Civil rulers have the right of making impediments diriment of matrimony and of dispensing from them. Bishops are not bound to make an oath of obedience to the pope before their consecration. All religious orders should live under the same rule and wear the same habit. Each church should have only one altar; the liturgy should be in the vernacular, and only one Mass should be celebrated on Sundays. Leopold caused a national synod to be held at Florence in 1787, but he did not find the other bishops as pliant as Scipio de' Ricci. Nevertheless he continued assuming all ecclesiastical authority, prohibited all appeals to the pope, and even appointed bishops, to whom the pope of course refused canonical institution. Finally, the Bull "Auctorem Fidei" was published, in which eighty-five articles taken from the Synod of Pistoia were catalogued and condemned. After the publication of the Bull, Scipio de' Ricci submitted. In 1805 he took occasion of the presence of Pius VII in Florence, on his way to Rome from his exile in France, to ask in person for pardon and reconciliation. He died repentant, 1810, in the Dominican convent of San Marco at Florence.

M. O'RIORDAN.

**Audians.** See ANTHROPOMORPHISM.

**Audiences, PONTIFICAL,** the receptions given by the pope to cardinals, sovereigns, princes, ambassadors, and other persons, ecclesiastical or lay, having business with or interest in the Holy See. Such audiences form an important part of the pope's daily duties. Bishops of every rite in communion with the Holy See, and from every nation, come to Rome, not only to venerate the tombs of the Apostles, but also to consult the supreme pastor of the Church. The master of the chamber (*Maestro di Camera*), whose office corresponds to that of grand chamberlain in royal courts, is the personage to whom all requests for an audience with the pope are made, even those which the ambassadors and other members of the Diplomatic Corps present through the cardinal secretary of state. He is one of the four Palatine Prelates who are in frequent relations with the pope, and his office is regarded as leading to the cardinalate. The pope receives every day the cardinal prefect of one or other of the sacred congregations. At these audiences decrees are signed or counsel given by the pope, and hence, by their very nature, they are of no slight importance to the practical work of the Church. Prelates connected with other institutions either in Rome or abroad, generals and procurators of religious orders, are also received at regular intervals and on stated days. The days and hours of regular audiences are specified on a printed form which is distributed to all cardinals and persons whose duty and privilege it is to have such audience. This printed form is changed every six months, as the hours of audience vary according to the season. Audiences to sovereigns or princes travelling under their own names and titles are invested with special ceremonies. When the pope was a temporal ruler the master of the chamber, notified beforehand by the secretary of state of the proximate arrival in Rome of a sovereign, went, accompanied by the secretary of ceremonial, several miles beyond the city gates to meet him. Returning to Rome, he notified the pope of the event, and visited the sovereign to acquaint him with the day and hour of the pontifical audience. Sovereigns

of the highest rank, being considered as equal to the pope, sit near him during audience, under the same baldachin or canopy. The attendance of guards and chamberlains and court officials is always doubled when such audiences are given. In the ordinary audiences given to priests and lay persons the general practice is that they present a letter of recommendation from the bishop of their diocese, which is presented to the rector of the national college in Rome of the country from which they come. The rector procures from the master of the chamber the necessary card of admission. Amongst the instructions printed on this card are those regulating the dress to be worn on such occasion: for priests the cassock with a large black mantle (*ferraiolone*), such as Roman secular priests wear; for lay men, evening dress with white cravat; for ladies, a black dress with black lace veil on the head. On these occasions it is forbidden to present to the pope for his signature written requests for indulgences, faculties, privileges, or the like. Since the election of Pope Pius X there has been some concession in the matter of dress for the laity in public audience; apparently, in order that every "man of good-will", non-Catholic as well as Catholic, who desires to see the pope may have his wish fulfilled. This has increased the number of persons received in audience, but it has lessened occasions for the pope's utterances on various aspects of the tendencies of the time, which distinguished the audiences of Leo XIII and of the latter years of Pius IX, and which were statements that awakened profound interest.

HUMPHREY, *Urbs et Orbis, or the Pope as Bishop and Pontiff* (London, 1899); *L'Eglise catholique à la fin du XIX<sup>e</sup> siècle* (Paris, 1900).

P. L. CONNELLAN.

**Audiffredi, GIOVANNI BATTISTA**, b. at Saorgio, near Nice, in 1734; d. at Rome, July, 1794. He entered the Dominican Order, and soon attracted attention by his taste for books and his talent for the exact sciences. After being occupied in various houses as professor and bibliographer, he was at length transferred to the Dominican house of studies (S. Maria sopra Minerva), and was placed in charge (1765) of the great Bibliotheca Casanatensis, founded in 1700 by Cardinal Girolamo Casanata. Audiffredi published a bibliographical work in four folio volumes entitled "Catalogus bibliothecæ Casanatensis librorum typis impressorum, 1761-1788". The work remains unfinished, not proceeding beyond the letter L, and contains a list of his own publications. Similar works were the "Catalogus historico-criticus Romanarum editionum sæculi XV" (Rome, 1785, quarto), and the more extensively planned "Catalogus historico-criticus editionum Italicarum sæculi XV" (ibid., 1794), which was to give an account of books printed in twenty-six Italian cities. Audiffredi did not live to complete the work. The first part, extending to the letter G, contains a short biography of the author introduced by the publisher. Audiffredi's position enabled him to become an expert antiquarian, and he found time to cultivate his mathematical talent and to devote himself to astronomy. He built a small observatory, and at intervals busied himself with observation. The eighteenth century was much occupied with the problem of solar parallax. In 1761 and 1769 transits of Venus were observed, and Audiffredi contributed to the work in his publication, "Phænomena celestia observata—investigatio parallaxis solis. Exercitatio Dadei Ruffi" (anagram for Audiffredi). The predicted reappearance in the middle of the century of Halley's comet intensified scientific interest in cometic orbits. The epoch was favoured with a number of brilliant objects of this kind, and that of 1769 distinguished itself by its great nucleus and by the tail which stretched over more than half

the sky. Audifredi took observations of the positions of the comet and published his results under the title, "Dimostrazione della stazione della cometa, 1769" (1770). A general taste and capacity for the natural sciences distinguished this learned Dominican, but, like that of many savants, Audifredi's life was one of retirement and obscurity.

#### H. DE LAAR.

**Audin, J.-M.-VINCENT**, b. at Lyons in 1793; d. in Paris, 21 February, 1851. He first studied theology in the seminary of Argentière, and afterwards pursued the study of law. He passed his law examination but never practised his profession, having decided to enter on a literary career. His first publications were: "La lanterne magique" (1811); "Blanc, bleu et rouge" (1814); "Tableau historique des événements qui se sont accomplis depuis le retour de Bonaparte jusqu'au rétablissement de Louis XVIII" (1815). He also contributed to the "Journal de Lyon" founded by Ballanche. He soon left his native city and settled in Paris where he opened a bookstore and at the same time was active with his pen. He first published articles of a political cast, and historical tales in the style of the time, such as "Michel Morin et la Ligue"; "Florence ou la Religieuse"; "Le Régicide"; and others. He then took up historical writing, his first work of this kind being "Le Concordat entre Léon X et François I<sup>er</sup>" (1821), which is, for the most part, a translation of that document. This was followed by his "Histoire de la St. Barthélemy" (2 vols., 1826). These two works were fairly well received although some ecclesiastical critics accused him of being too favourable to the Protestants. Audin publicly defended himself against this imputation, and asserted his firm belief in the doctrines of the Catholic Church. He now began his most important work, the history of the Protestant Reformation, which he published from 1839 to 1842 in four books, as follows: (1) "Histoire de la vie, des ouvrages et de la doctrine de Luther" (2 vols., Paris, 1839; 2d ed., 3 vols., 1850); (2) "Histoire de la vie, des ouvrages et de la doctrine de Calvin" (2 vols., 1841; 2d ed., 1851); (3) "Histoire de Léon X et de son siècle" (2 vols., 1844; 2d ed., 1851); (4) "Histoire de Henri VIII et du schisme d'Angleterre" (2 vols., 1847; 2d ed., 1862). The author claims to have based his statements upon researches which he made in the archives of various European cities, especially in the archives of the Vatican. The work shows that this assertion cannot be accepted in its entirety. The volumes are written in a romantic manner, and contain many particulars which sober criticism has long proved to be false. Dollinger says of the work on Luther: "Audin's work is written with an extraordinary, and at times almost naive ignorance of Luther's writings and contemporary literature, and of the general condition of Germany at that period" (Kirchenlex., s. v. Luther).

*La Grande Encyclopédie*, IV, 611.

#### J. P. KIRSCH.

**Audisio, GUGLIELMO**, b. at Bra, Piedmont, Italy, 1801; d. in Rome, 27 September, 1882. He was professor of sacred eloquence in the episcopal seminary of Bra, appointed presiding officer of the Academy of Superga (Turin) by King Charles Albert, but was expelled from this office because he was opposed to the irreligious politics of the Piedmontese Government. He then went to Rome, where Pius IX appointed him professor of natural and popular rights in the Roman University, and Canon of the Vatican Basilica.

Audisio was a pious and charitable priest, and spent large sums in benevolent works. He was an excellent teacher of sacred eloquence, and his manual on the subject was translated into many languages

and frequently quoted approvingly. He also devoted himself to historical studies, especially in illustration of the papacy, bringing to them absolutely good intentions, assiduous industry, and much just and acute observation, such as was not then common in the circle which surrounded him. Nevertheless these historical labours had no great intrinsic value, especially at a time when so large a number of documents were being published. For this reason they are no longer sought after by students.

Audisio had no deep insight into theology and law, and often displayed deplorable lapses on these subjects in his writings and his lectures. At the time of the Vatican Council he was accused of Gallicanism, to the great grief of his patron Pius IX, and his work on political and religious society in the nineteenth century was condemned by the Church. Audisio, however, was profoundly Catholic in feeling, and not only did he fully submit to the condemnation of his book, but he warmly protested against the accusation of heterodoxy and disobedience. He was a fervent upholder of papal and Catholic rights against the political liberalism of Piedmont. He was one of the founders of the Catholic *intransigent* paper, the "Armonia" of Turin. It was for this reason that he fell a victim to the anti-clerical influence which had deprived him of his post at Superga.

But in Rome Audisio united himself with that clique of liberal Italian ecclesiastics (such as Monsignor Liverani) who advocated reforms and concessions not always just and often premature, and who professed doctrines of little weight, sometimes false, often inexact. In this environment Audisio compromised himself, but his figure remains that of an extremely religious and charitable priest and of an eager student devoted to the Holy See and to the Church. Some pages of his works on the popes still merit consultation.

The works of Audisio are: "Lezioni di Eloquenza Sacra" (several editions); "Juris Naturæ et Gentium Publici Fundamenta" (Rome, 1852); "Idea storica della diplomazia ecclesiastica" (Rome, 1864); "Storia religiosa e civile dei papi" (5 vols., Rome, 1860); "Sistema politica e religiosa di Federico II e di Pietro della Vigna" (1866); "Della società politica e religiosa rispetto al secolo XIX" (Florence, 1876), condemned by decree of the Holy Office, April, 1877; "Vita di Pio IX".

#### U. BENIGNI.

**Auditor**, the designation of certain officials of the Roman Curia, whose duty it is to hear (Lat. *audire*) and examine the causes submitted to the pope. They cannot, however, give a decision unless they receive delegated jurisdiction. They are, therefore, not judges in the strict sense of the term. These officials have been part of the Roman Curia since the Middle Ages. Amongst the principal dignitaries bearing this title are: (1) *Auditor Pape*. This official was at first the adviser of the pope in consistorial and theological matters, but he afterwards received also judicial power in civil and criminal cases. Since 1831, however, his duties are restricted to certain ecclesiastical affairs, such as assisting at the examinations of episcopal candidates for Italy and the transaction of matters relating to favours, etc. (2) *Auditor Camere* or *Auditor General*. This official originally had very extended powers, such as judging appeals against the decisions of bishops, and proceeding against bishops themselves in important cases and even punishing them without a special commission from the pope. He could also take cognizance of all cases of civil, criminal, and mixed jurisdiction in the States of the Church. Nearly all these and similar powers have now been withdrawn, and the tribunal of the *Camera Apostolica* is at present limited almost entirely to ex-

pediting commissions in certain well-defined cases. (3) *Auditors of the Rota* were originally chaplains of the pope. By degrees they were constituted into a tribunal, and are said to have derived their name from the round table (Lat. *rota*) at which they sat. Important cases laid before the Holy See by sovereigns and nations were referred to the Rota for judgment, and its decisions became precedents for all other tribunals. It also served as a supreme court for civil cases in the States of the Church. At present, however, the Auditors of the Rota are restricted practically to giving deliberative opinions in processes of beatification or canonization and deciding questions of precedence between ecclesiastical dignitaries. They are generally also attached as Consultors to various Roman Congregations.

WILLIAM H. W. FANNING.

**Audran**, the family name of four generations of distinguished French artists, natives of Paris and Lyons, which included eight prominent engravers and two painters. They flourished in the seventeenth and eighteenth centuries, and some of their productions rank among the finest examples of the art of the burin.

CHARLES, b. in Paris, 1594; d. 1674, was the elder of two brothers, some say cousins (the other being Claude the First), who attained reputation as engravers. Charles, who reached by far the greater eminence, after receiving some instruction in drawing, went as a young man to Rome to study further the engraver's art, and while there produced some plates which attracted attention. He engraved in pure line, and took the work of Cornelius Bloemart, with whom he studied, as his model. On his return from Italy the engraver lived for some years in Lyons before settling in Paris. Among his two hundred or more plates are several original portraits, including one of Henry II, Prince of Condé, and reproductions of works by Titian, the Caracci, Domenichino, Palma the Younger, Albano and Lesueur.

CLAUDE the FIRST, b. in Paris, 1597; d. at Lyons, 1677, studied with Charles, but in his portrait and allegorical plates, which were not many, adopted a somewhat different manner. He became professor of engraving in the Academy of Lyons, and left, to perpetuate his branch of the family and its artistic reputation, three sons: Germain, Claude the Second, and Gérard, the last of whom became the most famous artist among the Audrans.

GERMAIN, the eldest son of Claude the First, b. at Lyons, 1631; d. 1710, was a pupil of his uncle Charles and worked both in Paris and Lyons. Among his plates are portraits of Richelieu and Charles Emmanuel of Savoy (the latter after F. de la Monce), landscapes after Poussin, and fancies and ornamental designs, after Lebrun among others. His four sons were Claude the Third, Benoit the Elder, Jean, and Louis.

CLAUDE the SECOND, son of Claude the First, b. at Lyons, 1639; d. in Paris, 1684, was the first painter in the family. After receiving instruction in drawing from his uncle Charles, he went to study painting in Rome. On his return to Paris he entered the studio of the celebrated historical painter Charles Lebrun, on whose style he formed his own. Audran was Lebrun's assistant in the painting, among others of his works, of the "Battle of Arbela" and the "Passage of the Granicus". He painted in fresco with much skill, under the direction of his master, the grand gallery of the Tuileries, the great staircase at Versailles, and the chapel near by, at Sceaux, of the château of that enlightened patron of art, Prime Minister Colbert.

GÉRARD, third son of Claude the First, b. at Lyons,

1640; d. in Paris, 1703, went to Paris, after being taught engraving by his father and his uncle, to receive instruction from the painter Lebrun, who gave him some of his paintings to reproduce. He worked in Paris four years, and in 1665 went to Rome, where he remained three years and, it is said, became a pupil of Carlo Maratta. He etched as well as engraved, and produced in Rome some plates—notably, a portrait of Pope Clement IX which brought him much admiration. At the suggestion of Colbert, Louis XIV sent for the artist and made him engraver to, and pensioner of the king, with apartments at the factory of the Gobelins. This recognition of his great ability spurred Audran to even greater endeavours, in which he was further encouraged by his former patron, Lebrun, more of whose paintings he reproduced, notably the "Battles of Alexander". In November, 1681, he was made a member of the Council of the Royal Academy of Painting. The first productions of Gérard Audran were stiff and dry, and his subsequent original and vigorously brilliant style is credited to the counsels of Maratta, Ciro Ferri, and, notably, of his lifelong friend Lebrun. A second visit to Rome was made, where was signed the plate after "The Four Cardinal Virtues", by Domenichino, which is in the church of San Carlo ai Catinari. Among the original works of this famous engraver are the portrait of the Rospigliosi Pope, already alluded to, those of Samuele Sorbiere, Andrea Argoli of Padua, the Capuchin Benoit Langlois, the Bishop of Angers Henri Arnauld, and the sculptor François du Quesnoy, called Flamingo, "Wisdom and Abundance above two Genii", and the vignette, "St. Paul preaching at Athens". Particularly esteemed among the plates of Gérard Audran are two after cartoons of Raphael "The death of Ananias" and "Paul and Barnabas at Lystra", "The Martyrdom of St. Agnes", after Domenichino, and "Cicero" after Poussin. Among the other painters whose works he reproduced are Titian, Rubens, Giulio Romano, Annibale Carracci, Pietro da Cortona, Guercino, Guido Reni, Palma the Younger, Lanfranco, Mignard, Coypel, Leueur, Bourguignon, Lafage, and Girardon. He was at times assisted by his nephews, Benoit the Elder and Jean. In 1683 Gérard published a work called "The Proportions of the Human Body measured by the most Beautiful Figures of Antiquity", which has been translated into English.

CLAUDE the THIRD, son of Germain, and the second painter of the family, b. at Lyons, 1658; d. in Paris, 1734, was notable as being the master of the famous Watteau. He studied with his father as well as under his uncles, Germain and Claude the Second. Chosen cabinet painter to the king, he was also for nearly thirty years keeper of the palace of the Luxembourg, where he died. He executed considerable work in oil and fresco in various royal residences.

BERNOIT the ELDER, third son of Germain, b. at Lyons, 1661; d. 1721, in the vicinity of Sens, was first taught the family art by his father and then by his uncle Gérard. He made an excellent reputation by his reproduction of portraits and historical works. Among his best productions are "The Seven Sacraments", after Poussin, and "The Bronze Serpent", after Lebrun. He became a Member of the Academy and engraver to the king.

JEAN, fourth son of Germain, b. at Lyons, 1667; d. 1756, became, next to his celebrated uncle Gérard, the best engraver of the family. He studied first under his father and then with his uncle. He had already distinguished himself at the early age of twenty. He was rewarded for his subsequent successes by being made (in 1707) engraver to the king, with the regular pension and the Gobelins apartments. This was followed next year by membership in the Academy. Jean Audran worked until

he was eighty. His masterpiece is considered to be "The Rape of the Sabines", after Poussin. Among his plates are portraits after Gobert—those of Louis XV, Vandyke, Coypel, Largillière, Rigaud, Trevisani, and Vivien—and compositions after, among others, Raphael, Rubens, the Caracci, Guido Reni, Domenichino, Pietro da Cortona, Albano, Maratta, Philippe de Champagne, Marot, Poussin, and Nattier. His son was Benoit the Younger.

LOUIS, the youngest son of Germain, b. at Lyons, 1670; d. in Paris, c. 1712, studied with his father and his uncle Gérard. He assisted his brothers, and did few original plates. A work of his to be noted is "The Seven Acts of Mercy", after Bourdon.

BENOIT the Younger, b. in Paris, 1698; d. in the same place, 1772, was the last of the remarkable family to have any historical importance artistically. He was a pupil of his father and did plates after, among others, Veronese, Poussin, Watteau, Lancret, and Natoire.

PROSPER GABRIEL, a grandson of Jean, b. in Paris, 1744; d. 1819; he studied with his uncle, Benoit the Younger, and etched some heads. He gave up art for the law and became professor of Hebrew in the Collège de France.

#### AUGUSTUS VAN CLEEF.

**Auenbrugger** (or VON AUENBRUGG), LEOPOLD, an Austrian physician, b. 19 Nov., 1722; d. 17 May, 1807. He was the inventor of percussion in physical diagnosis and is considered one of the small group of men to whose original genius modern medicine owes its present position. He was a native of Graz in Styria, an Austrian province. His father, a hotel-keeper, gave his son every opportunity for an excellent preliminary education in his native town and then sent him to Vienna to complete his studies at the university. Auenbrugger was graduated as a physician at the age of twenty-two and then entered the Spanish Military Hospital of Vienna where he spent ten years. His observations and experimental studies enabled him to discover that by tapping on the chest with the finger much important information with regard to diseased conditions within the chest might be obtained.

Ordinarily, the lungs when percussed, give a sound like a drum over which a heavy cloth has been placed. When the lung is consolidated, as in pneumonia, then the sound produced by the tapping of the finger is the same as when the fleshy part of the thigh is tapped. Auenbrugger found that the area over the heart gave a modified, dull sound, and that in this way the limits of heart-dullness could be determined. This gave the first definite information with regard to pathological changes in the heart. During his ten years of patient study, Auenbrugger confirmed these observations by comparison with post-mortem specimens, and besides made a number of experimental researches on dead bodies. He injected fluid into the pleural cavity, and showed that it was perfectly possible by percussion to tell exactly the limits of the fluid present, and thus to decide when and where efforts should be made for its removal.

His later studies during this ten-year period were devoted to tuberculosis. He pointed out how to detect cavities of the lungs, and how their location and size might be determined by percussion. He also recognized that information with regard to the contents of cavities in the lungs, and the conditions of lung tissue might be obtained by placing the hand on the chest and noting the vibration, or *fremitus*, produced by the voice and the breath. These observations were published in a little book now considered one of the most important classics of medicine. It was called "Inventum Novum", the full English

title running, "A New Discovery that Enables the Physician from the Percussion of the Human Thorax to Detect the Diseases Hidden Within the Chest".

Like most medical discoveries, Auenbrugger's method of diagnosis at first met with neglect. Before his death, however, it had aroused the attention of Laennec, who, following up the ideas suggested by it, discovered auscultation. Since then, Auenbrugger has been considered one of the great founders of modern medicine. He lived to a happy old age, especially noted for his cordial relations with the younger members of his profession, and for his kindness to the poor and to those suffering from tuberculosis. He is sometimes said to have died in the typhus epidemic of 1798, but the burial register of the parish church in Vienna, of which he had been for half a century a faithful member, shows that he did not die until 1807.

JAMES J. WALSH.

**Aufsees**, JOBST BERNHARD VON, canon of Bamberg and Würzburg, b. 28 March, 1671, on the family estate of Mengersdorf; d. 2 April, 1738. He was baptized a Lutheran, but educated (1683-90) as a Catholic through the efforts of his uncle Carl Sigmund, canon of Bamberg and Würzburg. He was soon advanced to the same dignity in both churches, was provost of Bamberg in 1723, and held other offices of distinction in both cities. After 1709 he devoted the revenues of his benefices to the establishment of a house of studies at Bamberg: in 1728 he bestowed upon it the sum of 400,000 gulden (about \$200,000). This Aufsees Seminary, or Institute, was destined for the reception of poor boys from the Dioceses of Bamberg and Würzburg. They were to be supported there during the entire time of their studies at the public academies. He originally intended to place the Jesuits in charge, but by his last will (17 February, 1738) turned it over to the care of the cathedral chapters of Bamberg and Würzburg. It was opened in 1741, and continued its beneficent career until the beginning of the nineteenth century, when the secularization of the property of the ecclesiastical principalities took place. The edifice was then turned over to the hospital for incurables, and the revenues applied in part to scholarships (*Stipendien*). King Ludwig I reopened it as a house of studies (*Königliches Studienseminar*) under governmental supervision. The director and the prefects are priests, but the Government appoints holders of the 42 free places and the 20 places for youths who pay, also the officers of the institute, and administers its revenues.

WITTMANN in *Kirchenlex.*, I, 1615.

THOMAS J. SHAHAN.

**Auger**, EDMOND, b. 1530, near Troyes; d. at Como, Italy, 31 January, 1591, one of the great figures in the stormy times in France, when the Calvinists were striving to get possession of the throne. He entered the Society of Jesus while St. Ignatius was still living, and was regarded as one of the most eloquent men of his time. Mathieu calls him the "Chrysostom of France". Wherever he went, throngs flocked to hear him, and the heretics themselves were always eager to be present, captivated as they were by the charm of his wisdom and the delicacy of his courtesy in their regard. His entrance into France as a priest was in the city of Valence, where the bishop had just apostatized, and the Calvinists were then in possession. The efforts of Auger to address the people were followed by his being seized and sentenced to be burned to death. While standing on the pyre, he harangued

the multitude, and so won their good will that they asked for his deliverance. Viret, especially, the chief orator of the Calvinists, wanted to have a public discussion with him to convert him. Auger was consequently sent to prison for the night, but the Catholics rescued him before the conference took place. We find him afterwards in Lyons, during a pestilence, devoting himself to the plague-stricken. When the pest had ceased, in consequence of a vow he made, the authorities, in gratitude, established a college of the Society to which Auger asked, much to their astonishment, that the children of the Calvinists might be admitted. His whole life was one of constant activity, preaching and administering the responsible offices of Provincial, Rector, etc. that were entrusted to him. He was present in at least two battles, and was remarkable for his influence over the soldiers. He was finally made confessor of King Henry III, the first Jesuit to have that troublesome charge put upon him. The difficulty of his position was increased by the fact that the League was just then being formed by the Catholic succession. Its principles and methods were thought to trench on the royal prerogative; but Sixtus V was in favour of it. Several Jesuits, notably the Provincial, Mathieu, who was deposed by Acquaviva, were its staunch upholders. Auger's position was intolerable. Loyal to the king, he was detested by the leaguers, who at Lyons, the city that he had saved, threatened to throw him into the Rhone. They compromised by expelling him from the city. The general commanded him to relinquish the post of confessor, but the king secured the pope's order for him to stay. Finally, Auger prevailed on the monarch to release him, and he withdrew to Como in Italy, where he died. Shortly afterwards Henry was assassinated. Like Canisius in Germany, Auger published a Catechism for France. It appeared at first in Latin, and later he published it in Greek. He wrote a work on the Blessed Eucharist, instructions for soldiers, translations, some literary compositions, and also drew up the statutes for congregations, especially one in which the king was interested, called the Congregation of Penitents. There is a letter by him called "Spiritual Sugar", though he did not give it that title. He had written an address to the people of Toulouse to console them in the distress brought on by the calamities of the civil war. It so took the popular fancy that the authorities of the city published it under this curious caption.

T. J. CAMPBELL.

**Augila**, or **AUGILA**, a titular see of Cyrenaica in Northern Africa. It was situated in an oasis in the Libyan desert which is still one of the chief stations (Audjelah, Aoudjila) on the caravan route from Cairo to Fezzan. Its forests of date-palms were famous in the time of Herodotus (IV, 172); they still crown the three small hills that rise out of an unbroken desert of red sand which in the near vicinity is strongly impregnated with salts of soda. The Moslem population is now about 10,000 and is governed by an official of the Bey of Tripoli who draws from the oasis an annual revenue of \$12,000.

THOMAS J. SHAHAN.

**Augsburg, CONFESSION OF.** See CONFESSIONS OF FAITH, PROTESTANT.

**Augsburg, DIOCESE OF**, in the Kingdom of Bavaria, Germany, suffragan of the Archdiocese of Munich-Freising, embracing the entire government district of Swabia and Neuburg, the western part

of the government district of Upper Bavaria, and a small part of the government district of Central Franconia.

**I. HISTORY.** (1) *Early Period.*—The present city of Augsburg appears in Strabo as Damasia, a stronghold of the Licatii; in 14 B. C. it became a Roman colony known as Augusta Vindelicorum, received the rights of a city from Hadrian and soon became of great importance as an arsenal and the point of junction of several important trade routes. The beginnings of Christianity within the limits of the present diocese are shrouded in obscurity; its teachings were probably brought thither by soldiers or merchants. According to the acts of the martyrdom of St. Afra, who with her handmaids suffered at the stake for Christ, there existed in Augsburg, early in the fourth century, a Christian community under Bishop Narcissus; St. Dionysius, uncle of St. Afra, is mentioned as his successor.

(2) *Medieval Period.*—Nothing authentic is known about the history of the Augsburg Church during the

SOUTH DOOR OF THE CATHEDRAL, AUGSBURG

centuries immediately succeeding, but it survived the collapse of Roman power in Germany and the turbulence of the great migrations. It is true that two catalogues of the Bishops of Augsburg, dating from the eleventh and twelfth centuries, mention several bishops of this primitive period, but the first whose record has received indubitable historical corroboration is St. Wikterp (or Wichpert) who was bishop about 739 or 768. He took part in several synods convened by St. Boniface in Germany; in company with St. Magnus, he founded the monastery of Füssen; and with St. Boniface he dedicated the monastery at Benediktbeuren. Under either St. Wikterp or his successor, Tazzo (or Tozzo), about whom little is known, many monasteries were established. e. g. Wessobrunn, Ellwangen, Polling, Ottobeuren. At this time, also, the see, hitherto suffragan to the Patriarchate of Aquileia, was placed among the suffragan sees of the newly founded Archdiocese of Mainz (746) St. Sintpert (c. 810), hitherto Abbot of the monastery of Murbach, and a relative of Charlemagne, reno-

vated many churches and monasteries laid waste in the wars of the Franks and Bavarians, and during the incursions of the Avari; he built the first cathedral of Augsburg in honour of the Most Blessed Virgin; and obtained from the Emperor Charlemagne an exact definition of his diocesan limits. His jurisdiction extended at that time from the Iller eastward over the Lech, north of the Danube to the Alb, and south to the spurs of the Alps. Moreover, various estates and villages in the valley of the Danube, and in the Tyrol, belonged to the diocese. Among the bishops of the following period a certain number are especially prominent, either on account of the offices they filled in the Empire, or for their personal qualifications; thus Witgar (887-87), Chancellor and Archchaplain of Louis the German; Adalbero (887-910), of the line of the Counts of Dillingen, confidant and friend of Emperor Arnulf, who entrusted Adalbero with the education of his son, the German King Louis the Child, distinguished for generosity to the monasteries. The See of Augsburg reached the period of its greatest splendour under St. Ulrich (923-973); he raised the standard of training and discipline among the clergy by the reformation of existing schools and the establishment of new ones, and by canonical visitations and synods; he provided for the poor, and rebuilt decayed churches and monasteries. During the incursion of the Hungarians and the siege of Augsburg (955), he sustained the courage of the citizens, compelled the Hungarians to withdraw, and contributed much to the decisive victory on the Lechfeld (955). He built churches in honour of St. Afra and St. John, founded the monastery of St. Stephen for Benedictine nuns, and undertook three pilgrimages to Rome. The diocese suffered much during the episcopate of his successor, Henry I (973-982), for he sided with the foes of Emperor Otto II, and remained for several months in prison. After his liberation he renounced his former views and bequeathed to his church his possessions at Geisenhausen. The diocese attained great splendour under Bishop Bruno (1006-29), brother of Emperor Henry II; he restored a number of ruined monasteries, founded the church and college of St. Maurice, placed Benedictine monks in the collegiate church of St. Afra, and added to the episcopal possessions by the gift of his own inheritance of Straubing. Under Bishop Henry II (1047-63), the guardian of Henry IV, the diocese secured the right of coinage and was enriched by many donations; under Embrico (or Emmerich, 1063-77) the cathedral was dedicated (1065), and the canonicate and church of St. Peter and St. Felicitas were built. During the last years of this episcopate occurred the quarrel of Emperor Henry IV with the papacy in which Embrico took the imperial side and only temporarily yielded to the papal legate. The struggle continued under his successors; four anti-bishops were set up in opposition to Siegfried II (1077-96). Hermann, Count von Vohburg (1096 or 1097-1132) supported with treachery and cunning his claim to the see he had purchased, violently persecuted the Abbot of St. Afra, and expelled him from the city. Only after the conclusion of the Concordat of Worms (1122) did Hermann obtain the confirmation of the pope and relief from excommunication. The political disturbances resulting from the dissensions between the popes and the German emperors reacted on the Church of Augsburg. There were short periods of rest, during which ecclesiastical life received a forward impulse, as, for instance, under Bishop Walther II, Count Palatine von Dillingen (1133-52), under whom the possessions of the diocese were again consolidated and increased by his own inheritance; under Udalskalk (1184-1202), who with great ceremony placed the recently discovered bones of St. Ulrich in the new church of Sts. Ulrich and Afra. These days of peace alternated with

periods of conflict into which the Bishops of Augsburg were drawn, often against their will, in their capacity as Princes of the Empire, and the life of the Church accordingly suffered decline. Under Siboto von Lechfeld (1227-47) monasteries of the newly founded mendicant orders were first established in Augsburg. A celebrated member of the Franciscans was David of Augsburg, and of the Dominicans, Albertus Magnus of Lauingen. Additional causes of conflict were the troubles that arose between the Bishops of Augsburg and the city authorities. During the struggles between the popes and emperors, Augsburg, like other large cities throughout the greater part of Germany, attained enormous wealth, owing to the industrial and commercial activity of the citizens. From time to time efforts were made to restrict as much as possible the ancient civil rights of the bishops and their stewards, and even to abrogate them entirely. From a state of discontent the citizens passed to open violence under the Bishop Hartmann von Dillingen (1248-86), and wrung from the bishops many municipal liberties and advantages. A characteristic instance is the confirmation by Emperor Rudolph of Habsburg at the Reichstag held in Augsburg (1276) of the *Stadtbuch*, or municipal register, containing the ancient customs, episcopal and municipal rights, etc., specified in detail; on the same occasion Augsburg was recognized as a Free City of the Empire. Hartmann bequeathed to the Church of Augsburg his paternal inheritance, including the town and castle of Dillingen. Peace reigned under the succeeding bishops, of whom Frederick I (1309-31) acquired for his see the castle and stronghold of Füssen; Ulrich II, von Schöneck (1331-37), and his brother Henry III (1337-48) remained faithful to Emperor Louis the Bavarian; Markward I, von Randeck (1348-65), again redeemed the mortgaged property of the diocese, and by the favour of Emperor Charles IV was made Patriarch of Aquileia (1365). New dissensions between the Bishop and the city arose under Burkhard von Ellerbach (1373-1404), whose accession was marked by grave discord growing out of the overthrow of the *Patrizier*, or aristocratic government, and the rise in municipal power of the crafts or guilds. Irritated by Burkhard's support of the nobility in their struggle with the Swabian cities, the inhabitants of Augsburg plundered the dwellings of the canons, drove some of the clergy from the city (1381), destroyed, after a short interval of respite (1388), the episcopal stronghold, the deanery, and the mint, and became almost completely independent of the bishop. Burkhard proceeded with great energy against the heresy of the Wyclifites who had gained a foothold in Augsburg, and condemned to the stake five persons who refused to abjure. After the death of Eberhard II (1404-13), a quarrel arose in 1413 because the city of Augsburg declined to recognize the lawful Bishop, Anselm von Nenningen (1413-23), and set up in opposition Friedrich von Grafeneck who had been presented by Emperor Sigismund. This trouble was settled by Pope Martin V, who compelled both bishops to resign, and on his own authority replaced them by Peter von Schauenberg, Canon of Bamberg and Würzburg (1423-69).

Peter was endowed by the Pope with extraordinary faculties, made cardinal and legate *a latere* for all Germany. He worked with zeal and energy for the reformation of his diocese, held synods and made episcopal visitations in order to raise the decadent moral and intellectual life of the clergy; he restored the discipline and renewed the fallen splendour of many monasteries, canonries, and collegiate churches. He completed the rebuilding of the cathedral in Gothic style, consecrated it in 1431, and in 1457 laid the cornerstone of the new church of Sts. Ulrich and Afra. Succeeding prelates carried on the reformation of the diocese with no less solicitude and zeal.

Among them were Johann II, Count of Werdenberg (1469-86), tutor to the emperor's son, afterwards Emperor Maximilian I, who convened a synod in Dillingen, and encouraged the recently invented art of printing; Friedrich von Zollern (1486-1505) pupil of the great preacher Geiler von Kaysersberg, and founder of a college in Dillingen, who held a synod in the same city, promoted the printing of liturgical books, and greatly enriched the possessions of the diocese; Henry IV, von Lichtenau (1505-17), a great friend and benefactor of monasteries and of the poor, and patron of the arts and sciences. During the episcopate of these bishops Augsburg acquired, through the industry of its citizens, a world-wide commerce. Some members of its families, e. g. the Fuggers and the Welsers, were the greatest merchants of their time; they lent large sums of money to the emperors and princes of Germany, conducted the financial enterprises of the papacy, and even extended their operations to the newly discovered continent of America. Among the citizens of Augsburg famous at that time in literature and art were the humanist Conrad Peutinger; the brothers Bernard and Conrad Adelman von Adelmansfelden; Matthias Lang, secretary to Emperor Frederick III, and later Cardinal and Archbishop of Salzburg; the distinguished painters Holbein the elder, Burgkmair and others. With wealth, however, came a spirit of worldliness and cupidity. Pride and a super-refinement of culture furnished the rank soil in which the impending religious revolution was to find abundant nourishment.

(3) *Reformation Period.*—The Reformation brought disaster on the Diocese of Augsburg. It included 1,050 parishes with more than 500,000 inhabitants. Besides the cathedral chapter it could boast eight collegiate foundations, forty-six monasteries for men, and thirty-eight convents for women. Luther, who was summoned to vindicate himself in the presence of the papal legate before the Reichstag at Augsburg (1518), found enthusiastic adherents in this diocese among both the secular and regular clergy, but especially among the Carmelites, in whose convent of St. Anne he dwelt; he also found favour among the city councillors, burghers, and tradesmen. Bishop Christopher von Stadion (1517-43) did all in his power to arrest the spread of the new teachings; he called learned men to the pulpit of the cathedral, among others Urbanus Rhegius, who, however, soon went over to Luther; he convened a synod at Dillingen, at which it was forbidden to read Luther's writings; he promulgated throughout his diocese the Bull of Leo X (1520) against Luther; he forbade the Carmelites, who were spreading the new doctrine, to preach; he warned the magistrates of Augsburg, Memmingen, and other places not to tolerate the reformers, and he adopted other similar measures. Despite all this, the followers of Luther obtained the upper hand in the city council, and by 1524, various Catholic ecclesiastical usages, notably the observance of fast days, had been abolished in Augsburg. The apostate priests, many of whom, after Luther's example, had taken wives, were supported by the city council, and the Catholics were denied the right of preaching. The Anabaptists also gained a strong following and added fuel to the fire of the Peasants' War, in which many monasteries, institutions, and castles were destroyed. At the Diet of Augsburg in 1530, at which the so-called Augsburg Confession was delivered to Emperor Charles V in the chapel of the episcopal palace, the emperor issued an edict according to which all innovations were to be abolished, and Catholics reinstated in their rights and property. The city council, however, set itself up in opposition, recalled (1531) the Protestant preachers who had been expatriated, suppressed Catholic services in all churches except the cathedral (1534), and

in 1537 joined the League of Smalkald. At the beginning of this year a decree of the council was made, forbidding everywhere the celebration of Mass, preaching, and all ecclesiastical ceremonies, and giving to the Catholic clergy the alternative of enrolling themselves anew as citizens or leaving the city. An overwhelming majority of both secular and regular clergy chose banishment; the bishop withdrew with the cathedral chapter to Dillingen, whence he addressed to the pope and the emperor an appeal for the redress of his grievances. In the city of Augsburg the Catholic churches were seized by Lutheran and Zwinglian preachers; at the command of the council pictures were removed, and at the instigation of Bucer and others a disgraceful storm of popular iconoclasm followed, resulting in the destruction of many splendid monuments of art and antiquity. The greatest intolerance was exercised towards the Catholics who had remained in the city; their schools were dissolved; parents were compelled to send their children to Lutheran institutions; it was even forbidden to hear Mass outside the city under severe penalties.

Under Otto Truchsess von Waldburg (1543-73) the first signs of improvement were noted in the attitude towards Catholics. At the outbreak of hostilities (1546) between the emperor and the League of Smalkald, Augsburg, as a member of the league, took up arms against Charles V, and Bishop Otto invested and plundered Füssen, and confiscated nearly all the remaining possessions of the diocese. After the victory at Mühlberg (1547), however, the imperial troops marched against Augsburg, and the city was forced to beg for mercy, surrender twelve pieces of artillery, pay a fine, restore the greater number of churches to the Catholics, and reimburse the diocese and the clergy for the property confiscated. In 1547 the Bishop, Otto von Truchsess, who had meanwhile been created cardinal, returned to the city with the cathedral chapter, followed shortly afterwards by the emperor. At the Diet held at Augsburg in 1548 the so-called "Augsburg Interim" was arranged. After a temporary occupation of the city and the suppression of Catholic services by the Elector, Prince Maurice of Saxony (1552), the "Religious Peace of Augsburg" was concluded at the Diet of 1555; it was followed by a long period of peace. The disturbances of the Reformation were more disastrous in their results throughout the diocese and adjoining lands than within the immediate precincts of Augsburg. Thus, after many perturbations and temporary restorations of the Catholic religion, the Protestants finally gained the upper hand in Würtemberg, Oettingen, Neuburg, the free cities of Nördlingen, Memmingen, Kaufbeuren, Dinkelsbühl, Donauwörth, Ulm, in the ecclesiastical territory of Feuchtwangen and elsewhere. Altogether during these years of religious warfare the Diocese of Augsburg lost to the Reformation about 250 parishes, 24 monasteries, and over 500 benefices. Although the religious upheaval brought with it a great loss of worldly possessions, it was not without beneficial effect on the religious life of the diocese. Bishop Christopher von Stadion, while trying to protect Catholicism from the inroads of the Reformation, had sought to strengthen and revive ecclesiastical discipline, which had sadly declined, among both the secular and the regular clergy. The work was carried on even more energetically by Bishop Otto Truchsess, who achieved a fruitful counter-reformation. By frequent visitations he sought to become familiar with existing evils, and by means of diocesan synods and a vigorous enforcement of measures against ignorant and dissolute clerics, secular and regular, he endeavoured to remedy these conditions. He advanced the cause of education by founding schools; he summoned the Jesuits to his diocese, among others Blessed

Peter Canisius, who from 1549, in the capacity of cathedral preacher, confessor, and catechist, exercised a remarkably fruitful and efficacious ministry. In 1549 Bishop Otto founded a seminary in Dillingen for the training of priests, obtained from the pope (1554) a decree raising it to the rank of a university, and in 1564 gave the direction of the new university to the Jesuits, for whom he had built a college in Dillingen. It is due to his untiring labours and those of Canisius that much larger portions of the diocese were not lost to the Church. Under the immediate successors of Otto the revival instituted by him progressed rapidly, and many excellent decrees were formulated. Under Marquard II von Berg (1575-91) a pontifical boarding school (*alumnatus*) was founded in Dillingen, colleges were established by the Jesuits in Landsberg, and, through the bounty of the Fugger family, in Augsburg (1580). Heinrich von Knöringen, made bishop at the early age of twenty-eight, took especial interest in the University and the Seminary of Dillingen, both of which he enriched with many endowments; he convened several synods, converted Duke Wolfgang of Neuburg to Catholicism, and during his long episcopate (1598-1646) reconciled many Protestant cities and parishes to the Catholic Church, being aided in a particular manner by the Jesuits, for whom he founded establishments in Neuburg, Memmingen, and Kaufbeuren. By means of the Edict of Restitution of Emperor Ferdinand II (1629), vigorously and even too forcefully executed by the bishop, the Thirty Years' War first accomplished an almost complete restoration of the former possessions of the Diocese of Augsburg. The occupation of Augsburg by Gustavus Adolphus of Sweden (1632) restored temporarily the balance of power to the Protestants. Until the relief of the city by the imperial troops (1635) the Catholics were hard pressed and were forced to give up all they had gained by the Edict of Restitution. Finally, the Treaty of Westphalia (1648) established equality between Catholics and Protestants, and was followed by a long period of internal peace. On account of the losses entailed on the diocese by the treaty, a solemn protest was laid before the imperial chancery by Bishop Sigmund Franz, Archduke of Austria (1646-65). This bishop, on account of his youth, ruled the diocese through administrators, and later resigned his office. His successor, Johann Christopher von Freiberg (1665-90), was particularly desirous of liquidating the heavy burden of debt borne by the chapter, but was nevertheless generous towards churches and monasteries. His successor, Alexander Sigmund (1690-1737), son of the Palatine Elector, guarded the purity of doctrine in liturgical books and prayerbooks. Johann Friedrich von Stauffenberg (1737-40) founded the Seminary of Meersburg and introduced missions among the people. Joseph, Landgrave of Hesse-Darmstadt (1740-68) exhumed with great ceremony the bones of St. Ulrich and instituted an investigation into the life of Crescentia Höss of Kaufbeuren, who had died in the odour of sanctity. Klemens Wenzeslaus, Prince of Saxony and Poland (1768-1812), made a great number of excellent disciplinary regulations, and took measures for their execution; after the suppression of the Society of Jesus he afforded its members protection and employment in his diocese; he made a vigorous resistance to the rapidly spreading Rationalism and infidelity, and was honoured by a visit from Pope Pius VI (1782).

(4) *French Revolution and Secularization.*—During this episcopate began the world-wide upheaval inaugurated by the French Revolution. It was destined to put an end to the temporal power of the Church in Germany, and to bring about the fall of Augsburg from the dignity of a principality of the Empire. In 1802, by act of the Delegation of the Imperial Diet (*Reichsdeputationsrecess*), the territory of the

Diocese of Augsburg was given to the Elector of Bavaria, who took possession 1 December, 1802. The cathedral chapter, together with forty canonicates, forty-one benefices, nine colleges, twenty-five abbeys, thirty-four monasteries of the mendicant orders, and two convents were the victims of this act of secularization. Unfortunately, owing to the inconsiderate conduct of the commissioners appointed by the Bavarian minister, Montgelas, innumerable artistic treasures, valuable books, and documents were destroyed. For five years after the death of the last bishop of princely rank (1812) the episcopal see remained vacant; the parts of the diocese lying outside of Bavaria were separated from it and annexed to other dioceses. It was not until 1817 that the Concordat between the Holy See and the Bavarian government reconstructed the Diocese of Augsburg, and made it subject to the Metropolitan of Munich-Freising. In 1821 the territory subject to the ecclesiastical authority of Augsburg was increased by the addition of sections of the suppressed See of Constance, and the present limits were then defined.

(5) *The Nineteenth Century.*—As the new bishop, Franz Karl von Hohenlohe-Schillingsfürst, died (1819) before assuming office, and Joseph Maria von Fraunberg was soon called to the archiepiscopal See of Bamberg, there devolved upon their successors the important task of rearranging the external conditions and reanimating religious life, which had suffered sorely. Ignatius Albert von Riegg (1824-36) was successful in his endeavours to further the interests of souls, to raise the standard of popular education through the medium of numerous ordinances and frequent visitations. He assigned the administration and direction of studies in the Lyceum to the monks of the Benedictine Abbey of St. Stephen in Augsburg, founded by King Ludwig (1834). Petrus von Richarz (1837-55) displayed energy and persistent zeal in promoting the interests of his diocese and the Catholic Church in general, and encouraged the giving of missions to the people, the establishment of many religious institutions for the care of the sick and for educational purposes, and carefully superintended the training of the clergy. The same spirit characterized the labours of the succeeding bishops: Michael von Deinlein (1856-58), who after a short episcopate was raised to the Archbishopric of Bamberg; Pankratius von Dinkel (1858-94), under whom both seminaries and the deaf and dumb asylum were established in Dillingen, and many monastic institutions were founded; Petrus von Hötzel (1895-1902) whose episcopate was marked by the attention paid to social and intellectual pursuits, and the number of missions given among the people as well as by the solemn celebration of the beatification of the pious nun Crescentia Höss. He was succeeded by Maximilian von Lingg, b. at Nesselwang, 8 March, 1842; ordained priest, 22 July, 1865; appointed bishop, 18 March, 1902, consecrated, 20 July, 1902.

II. *RELIGIOUS STATISTICS.*—According to the census of 1 December, 1900, the Diocese of Augsburg contained 777,958 Catholics and about 100,000 of other beliefs; at present there are about 818,074 Catholics. Socially, the population is chiefly of the middle class; recently, however, on account of the great growth of the industrial arts in the city of Augsburg, in Lechhausen, Memmingen, and other places, the working classes are increasing in numbers. Leaving out of consideration the larger cities, in which the various denominations are well represented, it may be said that the southern part of the diocese, Algäu and the adjoining parts of Altbayern (Bavaria proper), are almost entirely Catholic, while in the northern part a mixture of creeds predominates. That small portion of Mittelfranken (Central Franconia) which belongs to the diocese is overwhelm-

ingly Protestant. The relations between the various religious denominations are in general friendly and peaceable. For the work of sacred ministry the diocese is divided into 40 deaneries (1 city deanery at Augsburg, and 39 rural deaneries), with 862 parishes, 31 parochial curacies, 16 curacies, 226 benefices, 6 preaching-offices (*Prädikaturen*), 227 chaplaincies. In general each parish is complete and independent, but in the mountainous southern section there are many parishes to which are attached from fifty to a hundred dependent churches (*Filiakirchen*). The cathedral chapter consists of the provost of the cathedral, a dean of the cathedral, 8 canons, and 6 vicars. In 1907 the clergy of the diocese numbered 1,439: 815 parish priests and parochial curates, 49 parochial vicars, 11 curates, 73 beneficed clergymen, 53 vicars of benefices, 180 chaplains and assistant priests, 49 prebendaries and clerical professors (not including the professors of the Benedictine Abbey of St. Stephen in Augsburg); 74 priests temporarily stationed in the diocese, 95 regulars, 40 priests engaged in other dioceses or on missions. Of the religious orders of men there are the following establishments: Benedictines, 3 (Augsburg, Andechs, Ottobeuren), with 33 priests, 6 clerics, 56 lay brothers; Mission Society of St. Benedict, 1 (St. Ottilien), with 36 priests (12 at present outside the diocese), 31 clerics, 117 lay brothers; Franciscans, 3, with 7 priests and 22 lay brothers; Capuchins, 5, with 28 priests, 18 clerics, and 37 lay brothers; Brothers of Mercy, 6, with 4 priests and 54 lay brothers. Altogether there are 18 establishments conducted by the male orders, with 108 priests, 55 clerics, and 286 lay brothers. Far more numerous are the female orders and religious congregations; they number 226 establishments and branches, with 2,815 members. They are: Sisters of Mercy of St. Vincent de Paul, 59 houses, with 392 sisters; Franciscans, with their mother-houses at Augsburg, Dillingen, Kaufbeuren, and Mindelheim, 71 establishments, with 735 sisters; *Arme Franziskanerinnen* with mother-house at Mallersdorf, 34 establishments, with 171 sisters; *Englische Fräulein* (English Ladies), 11 convents with 311 ladies, 160 lay sisters, and 43 novices; Dominican nuns, 11 convents with 271 choir sisters, 17 lay sisters, and 36 novices; Poor School Sisters, 21 foundations with 166 sisters, *Elisabetherinnen* (Sisters of St. Elizabeth), 4 foundations with 41 sisters and 5 novices; Sisters of the Most Holy Redeemer with their mother-house at Oberbronn in Alsace, 61 foundations with 24 sisters; Cistercian nuns, 1 convent with 29 choir nuns, 15 lay sisters, and 2 novices; Mission Sisters of St. Benedict, 1 convent with 65 sisters and 9 novices; Sisters of St. Joseph of Ursberg, 7 foundations with 231 sisters and 92 novices.

III. EDUCATION.—As the primary schools in Bavaria are the property of the local civic corporation and under State control, there are no parochial schools in the strict sense of the word. According to the Bavarian Constitution of 1818 nothing more is assured to the Church than the direction of religious instruction and the surveillance of religious life in the school. She exercises this right in 1,074 primary schools of the Diocese of Augsburg, by means of 6 ecclesiastical county (*Bezirk*) school-inspectors and 50 ecclesiastical district school-inspectors. However, in many of the girls' schools (*Mädchenschulen*) the direction of studies is confined entirely to religious societies under State inspection. Thus the Poor School Sisters have charge of the studies in 19 schools, the Franciscans in 35, the Dominican nuns in 11, the Sisters of St. Joseph of Ursberg in 3; the English Ladies are excellent teachers for the higher education of women, and conduct 11 institutes for girls. For the training of priests there are the Lyceum and the Diocesan Seminary for ecclesiastics at Dillingen; the Diocesan Seminary for boys at Dillingen; St. Stephen's Catholic House of Studies at Augsburg, under the direction of the Benedictines, which includes a Lyceum, a classical Gymnasium, a royal seminary of studies and an institute for higher education; there are besides about forty students of the Diocese of Augsburg who dwell in the Georgianum at Munich and attend the courses of the University. The state, or communal, institutions of higher studies for boys number 28 in the Diocese of Augsburg; 5 gymnasia, 1 *Realgymnasium*, 1 seminary of studies, 5 *Progymnasien*, 2 Latin schools, 7 *Realschulen*, 3 agricultural winter schools, 1 *Realschule* with Latin, 1 normal school, and 2 preparatory schools. We must also mention the Cassianum in Donauwörth, a Catholic institute of pedagogy, which includes a training-school, a publishing house for books and periodicals, a printing press, and other appurtenances. In all of these institutions Catholic instruction is given to Catholic students by Catholic clergymen.

IV. CHARITABLE INSTITUTIONS.—The charitable institutions of the diocese are for the most part the property of the civic parishes or the unions (*Vereine*), or local associations; they are administered, however, mostly by religious communities to whom is also confided the care of the sick, or children, and of the aged. There are 37 hospitals, 24 infirmaries, 12 protectories, 2 asylums for children, 8 orphanages, 3 institutions for the deaf and dumb, 12 houses for the poor and orphans, 3 poorhouses, 1 hospital for priests, 1 home for invalids, 3 institutions for servants under the patronage of the Blessed Virgin (*Marienanstalten*), 1 House of St. Anne (*Annastift*) for the factory girls in Augsburg, 1 House of St. Elizabeth for incurables, 5 institutions for various other purposes (e.g. the Kneippianum in Wörishofen). One Catholic institution of Augsburg deserves special mention: the Fuggerei, founded in 1519 by three brothers (Ulrich, Georg, and Jakob) of the Fuggers. It consists of an extensive block of 53 houses with 106 apartments; in accordance with the conditions of the foundation these must be let at a very small rent to indigent people. It is a noble and durable memorial of the spirit of Christian charity that abounded in the Catholic Middle Ages. In recent times other works of Christian charity have been inaugurated. The good priest and superintendent of studies (*Regens*), Father Wagner of Dillingen, established many institutions for the deaf, dumb, and blind; Father Ringelsen, parish priest of Ursberg, established there the Sisters of St. Joseph for the exercise of every form of charity. For aged and infirm priests there exists a fund with 1,277 subscribers and a reserve of 1,550,000 marks (\$387,500). There is also an association for the support of infirm priests, with 792 members and a fund of 26,000 marks (\$6,500). Prominent among the numerous social-political and religious associations of the diocese are 16 Catholic apprentices' unions (*Lehrlingsvereine*), the local union in Augsburg maintaining its own home for apprentices; 49 Catholic journeymen's unions (*Gesellenvereine*), 4 Unions of St. Joseph; 52 Catholic workmen's unions; 19 Catholic students' clubs; 3 Catholic clubs for working women, with 504 members; 7 Catholic "Patronages" for working people; the Ulrich-union for the support of seminaries; the Men's Catholic Association, the Christian Peasants' League; the Cecilian Club; St. Mary's Protectory for girls; the Young Women's Association, and the Association of Christian Mothers. Annual pilgrimages give visible evidence of the vigorous religious life of the diocese. Such pilgrimages are those of the Holy Cross (11 May) and to the tomb of St. Ulrich at Augsburg (4 July). There are also processions to the holy mountain of Andechs during the rogation days, and to the monastery of Lechfeld since the year of the cholera (1854). Other pilgrimages are those to the

relics of St. Rasso at Grafrath, to the church of the Holy Sepulchre (*Unsers Herrn Ruh*) near Friedberg, and to Maria Siebeneich.

**V. ECCLESIASTICAL ART AND MONUMENTS.**—Among the ecclesiastical monuments of the Diocese of Augsburg the cathedral holds first place. It was begun in the Roman style in 994, dedicated 1010, and remodeled, 1331–1431, into a Gothic church with five naves; it was then that the lofty east choir with its circle of chapels was added. The towers were increased in height in 1488–89 and 1564. Among the innumerable art treasures of the cathedral may be mentioned the vestments of St. Ulrich; the four altars with paintings by the elder Holbein illustrating the life of the Blessed Virgin; the celebrated bronze doors of the left lateral nave, adorned with remarkable reliefs, and dating from the first half of the eleventh century; the ancient stained windows, some of which go back to the eleventh and twelfth centuries; the interesting tombs and slabs of the fourteenth and succeeding centuries, both in the cathedral itself and in the adjoining cloister, and many other objects of value and interest. The church of Sts. Ulrich and Afra, built 1467–1594, in the Gothic style, contains the tomb of St. Ulrich, the stone sarcophagus of St. Afra, the Fugger chapel with the memorial to Hans Fugger, and three magnificent altars in rococo style. The Late Gothic church of the Holy Cross was renovated, early in the eighteenth century, in florid Roman rococo style, and is a favourite place of pilgrimage. Among the chief ecclesiastical edifices outside the city of Augsburg are the Romanesque basilicas of Altenstadt, Ursberg, Thierhaupten; the Gothic churches of Kaisheim, Dinkelsbühl, Donauwörth, Landsberg; the ancient abbey-churches of Andechs (very rich in relics and costly reliquaries), Benediktbeuren, Disen, Füssen, Kempten, Ottobeuren, and Wessobrunn, all restored and ornamented in sumptuous barocco or rococo style.

JOSEPH LINS.

**Augsburg, RELIGIOUS PEACE OF.** See REFORMATION.

**Augsburg, SYNODS OF.**—From the time of St. Boniface (d. 754), especially during periods of earnest revival of religious and ecclesiastical life, synods were frequently convened by the bishops of Germany, and sometimes by those of individual ecclesiastical provinces. As the German bishops were, on the one hand, princes of the empire, and the emperor was, on the other, the superior protector of the Roman Church, these synods came to have no little im-

portance in the general ecclesiastical and political development of Western Christendom. Two general imperial synods were held in Augsburg. The first, convened in August, 952, through the efforts of Emperor Otto the Great, provided for the reform of abuses in civil and ecclesiastical life. Frederick, Archbishop of Mainz, presided, and three archbishops and twenty bishops of Germany and northern Italy took part. Eleven canons were promulgated concerning ecclesiastical life and other matters of church discipline. A similar synod, convened by Anno, Archbishop of Cologne (27 October, 1062), was occupied with the internal conditions of the empire and the attitude of the Church of Germany towards the schism of Cadalus, anti-pope during the reign of Alexander II. The diocesan synods of Augsburg correspond as a rule with the synodal system as carried out in other parts of Germany. We find in this diocese, as elsewhere in Germany, the *synodi per villas*, convened under the influence of the Carolingian capitularies. They were visitation-synods, held by the bishop assisted by the archdeacon and the local lord or baron (*Gaugraf*). Their purpose was inquisitorial and judicial. After the time of St. Ulrich (923–973), and in close relation to the system of provincial councils, diocesan synods were held at stated times, chiefly in connection with matters of ecclesiastical administration (legalizing of important grants and privileges, etc.), and the settlement of disputes. After the thirteenth century these diocesan synods assumed more of a legislative character; decrees were issued regulating the lives of both ecclesiastics and laymen, and church discipline was secured by the publication of diocesan statutes. The earliest extant are of Bishop Friedrich (1309–31). These diocesan synods fell into decay during the course of the fourteenth century.

In consequence of decrees of the Council of Basle the synods of the Diocese of Augsburg rose again to importance, so that after the middle of the fifteenth century they were once more frequently held, as for example: by the able Bishop Peter von Schauenburg (1424–69) and his successor, Johann von Werdenburg, also by Friedrich von Zollern (1486) and Heinrich von Liechtenau (1506). The two Bishops Christopher von Stadion (1517–43) and Otto Truchsess von Waldburg (1543–73) made use of diocesan synods (1517, 1520, 1543 in Dillingen, and 1536 in Augsburg) for the purpose of checking the progress of the Reformation through the improvement of ecclesiastical life. At a later period there were but few ecclesiastical assemblies of this kind; as early as 1567, the synod of that year, convened for the purpose of carrying out the reforms instituted by the Council of Trent, shows signs of the decline of the synod as a diocesan institution. The Bishops of Augsburg were, moreover, not only the ecclesiastical superiors of their diocese, but after the tenth century possessed the *Regalia*, the right of holding and administering royal fiefs with concomitant jurisdiction. The right of coinage was obtained by St. Ulrich. At a later period disputes were frequent between the bishops and the civic authorities, which culminated in an agreement (1389) by which the city was made practically independent of the episcopal authority. (See AUGSBURG.)

THOMAS J. SHAHAN.

**Augustin von Alfeld** (ALVELDT, or ALVELDIANUS), one of the earliest and most aggressive opponents of Luther, b. in the village of Alfeld, near Hildesheim, from which he took his surname; d. probably in 1532. Nothing is known of his parentage, youth, and early training. He first comes into prominence as a Franciscan of the Regular Observance, belonging to the Saxon Province of the Holy Cross. The absence of his name on the matriculation rosters of the philosophical and theological universities of Erfurt, Rostock, Leipzig, and Wittenberg, usually frequented by the members of the above-named province, leaves the presumption that he made his studies in one of the monastic schools. At the solicitation of Adolf of Anhalt, Bishop of Merseburg, in 1520, being already Lector of Holy Writ at Leipzig, he entered the theological arena to controvert the Lutheran heresy (Mencken, *Scriptores rer. Ger.*, II, 56). On 20 January, 1521, he presided at the public theological disputation held at Weimar, between Lange, Mechler, and the Franciscans, on the merit of monastic vows and life (Kapp, *Kleinere Nachlese nützlicher Urkunden zur Erläuterung der Reformationsgeschichte*, II, 514, Leipzig, 1727), the result of which has not been handed down, though it called forth a satirical poem at the time (ib., 520). In 1523 he became Guardian of the monastery at Halle, in which position he is still found in 1528. In 1529 he was elected Provincial of the Saxon Province of the Holy Cross.

Alfeld was a man of fine linguistic attainments, a fluent Latinist, familiar with the ancient classics, conversant with Greek and Hebrew, and well acquainted with the humanistic writings of his day. His theology was that of medieval scholasticism, in which he proved "that the old theological training did not leave the antagonists of Luther helpless and unprepared in combating the novel, and to the theologically disciplined mind contradictory, assertions" (Otto, *Johannes Cochläus*, 132, Breslau, 1874). As Lector of Holy Writ, he devoted much attention and thought to the Bible, so that he can state that "from my childhood I have devoted my time and life to it" (*Super Apostolicâ Sede*, etc., iii a). In the textual studies of the Greek and Hebrew versions, the translation of Erasmus, the exegetical writings of Faber Stapulensis (Lefèvre d'Étaples) and the Complutensians, he shows a keen, analytical mind and sound judgment. His memory and reputation, however, rest on his polemical activity and writings. The latter are marred at times by a tone of bitterness and sarcasm that detract from their intrinsic worth and gave his opponents, notably Lonicus, Luther's amanuensis (*Biblia nova Alfeldensis Wittenbergæ Anno MDXX*) opportunity to censure the catalogued epithets flung at Luther (*Cyprian, Nützliche Urkunden zur Erläuterung der Reformationsgeschichte*, II, 158). If it be remembered that Luther calls him *bos Lipsicus* (De Wette, *Briefe, Sendschreiben*, etc., I, 446); *asinus* (op. cit., 451, 453, 533); *Lipsiensis onager* (op. cit., 446); *Lipsiensis asinus* (op. cit., 471, 475, 542), merely to single out a few controversial amenities, his literary style may be measurably condoned.

LAMMENS, *Pater Augustin von Alfeld* (Freiburg, 1899); FLOSS

in *Kirchenlex.*, I, 1682. The former gives a comprehensive résumé of Alfeld's writings.

HENRY A. GANSS.

**Augustine, Rule of Saint.**—The title, Rule of St. Augustine, has been applied to each of the following documents: (1) Letter ccxi addressed to a community of women; (2) Sermons ccclv and ccclvi, entitled "De vitâ et moribus clericorum suorum"; (3) a portion of the Rule drawn up for clerks or *Consortia monachorum*; (4) a Rule known as *Regula secunda*; and (5) another Rule called: "De vitâ eremiticâ ad sororem liber." The last is a treatise on eremitical life by Blessed Ælred, Abbot of Rievaulx, England, who died in 1166 and, as the two preceding rules are of unknown authorship, it follows that none but Letter ccxi and Sermons ccclv and ccclvi were written by St. Augustine. Letter ccxi is addressed to nuns in a monastery that had been governed by the sister of St. Augustine, and in which his cousin and niece lived. His object in writing it was merely to quiet troubles incident to the nomination of a new superior, and meanwhile he took occasion to expatiate upon some of the virtues and practices essential to the religious life. He dwells upon chastity, poverty, obedience, detachment from the world, the apportionment of labour, the mutual duties of superiors and inferiors, fraternal charity, prayer in common, fasting and abstinence proportionate to the strength of the individual, care of the sick, silence, reading during meals, etc. In his two sermons "De vitâ et moribus clericorum suorum" Augustine seeks to dispel the suspicions harboured by the faithful of Hippo against the clergy leading a monastic life with him in his episcopal residence. The perusal of these sermons discloses the fact that the bishop and his priests observed strict poverty and conformed to the example of the Apostles and early Christians by using their money in common. This was called the Apostolic Rule. St. Augustine, however, dilated upon the religious life and its obligations on other occasions. Aurelius, Bishop of Carthage, was greatly disturbed by the conduct of monks who indulged in idleness under pretext of contemplation, and at his request St. Augustine published a treatise entitled "De opere monachorum" wherein he proves by the authority of the Bible, the example of the Apostles, and even the exigencies of life, that the monk is obliged to devote himself to serious labour. In several of his letters and sermons is to be found a useful complement to his teaching on the monastic life and the duties it imposes. These are easy of access in the Benedictine edition, where the accompanying table may be consulted under the words: *monachi, monacha, monasterium, monastica vita, sandimoniales*.

The letter written by St. Augustine to the nuns at Hippo (423), for the purpose of restoring harmony in their community, deals with the reform of certain phases of monasticism as it is understood by him. This document, to be sure, contains no such clear, minute prescriptions as are found in the Benedictine Rule, because no complete rule was ever written prior to the time of St. Benedict; nevertheless, the Bishop of Hippo is a law-giver and his letter is to be read weekly, that the nuns may guard against or repent any infringement of it. He considers poverty the foundation of the religious life, but attaches no less importance to fraternal charity, which consists in living in peace and concord. The superior, in particular, is recommended to practise this virtue although not, of course, to the extreme of omitting to chastise the guilty. However, St. Augustine leaves her free to determine the nature and duration of the punishment imposed, in some cases it being her privilege even to expel nuns that have become incorrigible. The superior shares the duties of her office with certain members of her community, one

of whom has charge of the sick, another of the cellar, another of the wardrobe, while still another is custodian of the books which she is authorized to distribute among the sisters. The nuns make their own habits, which consist of a dress, a cincture and a veil. Prayer, in common, occupies an important place in their life, being said in the chapel at stated hours and according to prescribed forms, and comprising hymns, psalms, and readings. Certain prayers are simply recited while others, especially indicated, are chanted; but as St. Augustine enters into no minute details, it is to be supposed that each monastery conformed to the liturgy of the diocese in which it is situated. Those sisters desiring to lead a more contemplative life are allowed to follow special devotions in private. The section of the Rule that applies to eating, although severe in some respects, is by no means strict beyond observance and the Bishop of Hippo tempers it most discreetly. Fasting and abstinence are recommended only in proportion to the physical strength of the individual, and when the saint speaks of obligatory fasting he specifies that such as are unable to wait for the evening or ninth hour meal may eat at noon. The nuns partake of very frugal fare and, in all probability, abstain from meat. However, the sick and infirm are objects of the most tender care and solicitude, and certain concessions are made in favour of those who, before entering religion, led lives of luxury. During meals some instructive matter is to be read aloud to the nuns. Although the Rule of St. Augustine contains but few precepts, it dwells at great length upon religious virtues and the ascetic life, this being characteristic of all primitive rules. In his sermons cccv and cccvi the saint discourses on the monastic observance of the vow of poverty. Before making their profession the nuns divest themselves of all their goods, their monastery being responsible for supplying their wants, and whatever they may earn or receive is turned over to a common fund, the monasteries having the right of possession. In his treatise, "De opere monachorum", he inculcates the necessity of labour, without, however, subjecting it to any rule, the gaining of one's livelihood rendering it indispensable. Monks of course, devoted to the ecclesiastical ministry observe, *ipso facto*, the precept of labour, from which observance the infirm are legitimately dispensed. These, then, are the most important monastic prescriptions found in the rule and writings of St. Augustine.

**MONASTIC LIFE OF ST. AUGUSTINE.**—Augustine was a monk; this fact stands out unmistakably in the reading of his life and works. Although a priest and bishop, he knew how to combine the practices of the religious life with the duties of his office, and his episcopal house in Hippo was for himself and some of his clergy, a veritable monastery. Several of his friends and disciples elevated to the episcopacy imitated his example, among them Alypius at Tagaste, Possidius at Calama, Profuturus and Fortunatus at Cirta, Evodius at Uzalis, and Boniface at Carthage. There were still other monks who were priests and who exercised the ministry outside of the episcopal cities. All monks did not live in these episcopal monasteries; the majority were laymen whose communities, although under the authority of the bishops, were entirely distinct from those of the clergy. There were religious who lived in complete isolation, belonging to no community and having no legitimate superior; indeed, some wandered aimlessly about, at the risk of giving disedification by their vagabondage. The fanatics known as *Circumcelliones* were recruited from the ranks of these wandering monks, and St. Augustine often censured their way of living.

The religious life of the Bishop of Hippo was, for a long time, a matter of dispute between the Canons Regular and the Hermits of St. Augustine, each of

these two families claiming him exclusively as its own. It was not so much the establishing of an historical fact as the settling of a claim of precedence that caused the trouble, and as both sides could not be in the right, the quarrel would have continued indefinitely had not Pope Sixtus IV put an end to it by his Bull "Summum silentium" (1484). The silence thus imposed, however, was not perpetual, and in the seventeenth and eighteenth centuries controversies were resumed between the Canons and the Hermits, but all to no avail. Pierre de Saint-Trond, Prior of the Canons Regular of St. Martin of Louvain, tells the story of these quarrels in the preface to his "Examen Testamenti S. Augustini" (Louvain, 1564). Gabriel Pennot, Nicolas Desnos, and Le Large uphold the thesis of the Canons; Gandolfo, Lupus, Giles of the Presentation, and Noris sustain that of the Hermits. The Bollandists withhold their opinion. St. Augustine followed the monastic or religious life as it was known to his contemporaries, and neither he nor they even thought of establishing among those who had embraced it any distinction whatever as to congregations or orders. This idea was conceived in a subsequent epoch, hence St. Augustine cannot be said to have belonged to any particular order. He made laws for the monks and nuns of Roman Africa, it is true, and he helped to increase their numbers, while they, in turn, revered him as their father, but they cannot be classed as members of any special monastic family.

**ST. AUGUSTINE'S INFLUENCE ON MONACHISM.**—When we consider Augustine's great prestige, it is easy to understand why his writings should have so influenced the development of Western monachism. His Letter cxxi was read and re-read by St. Benedict, who borrowed several important texts from it for insertion in his own rule. St. Benedict's chapter on the labour of monks is manifestly inspired by the treatise "De opere monachorum", that has done so much towards furnishing an accurate statement of the doctrine commonly accepted in religious orders. The teaching concerning religious poverty is clearly formulated in the sermons "De vitâ et moribus clericorum suorum" and the authorship of these two works is sufficient to earn for the Bishop of Hippo the title of Patriarch of monks and religious. The influence of Augustine, however, was nowhere stronger than in southern Gaul in the fifth and sixth centuries. Lérins and the monks of that school were familiar with Augustine's monastic writings, which, together with those of Cassianus, were the mine from which the principal elements of their rules were drawn. St. Cæsarius, Archbishop of Arles, the great organizer of religious life in that section, chose some of the most interesting articles of his rule for monks from St. Augustine, and in his rule for nuns quoted at length from Letter cxxi. Sts. Augustine and Cæsarius were animated by the same spirit which passed from the Archbishop of Arles to St. Aurelian, one of his successors, and, like him, a monastic lawgiver. Augustine's influence also extended to women's monasteries in Gaul, where the Rule of Cæsarius was adopted either wholly or in part, as, for example, at Sainte-Croix of Poitiers, Juxamontier of Besançon, and Chamalières near Clermont.

But it was not always enough merely to adopt the teachings of Augustine and to quote him; the author of the *regula Tarnatensis* (an unknown monastery in the Rhone valley) introduced into his work the entire text of the letter addressed to the nuns, having previously adapted it to a community of men by making slight modifications. This adaptation was surely made in other monasteries in the sixth or seventh centuries, and in his "Codex regularum" St. Benedict of Aniane published a text similarly modified. For want of exact information we cannot

say in which monasteries this was done, and whether they were numerous. Letter cexi, which has thus become the Rule of St. Augustine, certainly constituted a part of the collections known under the general name of "Rules of the Fathers" and used by the founders of monasteries as a basis for the practices of the religious life. It does not seem to have been adopted by the regular communities of canons or of clerks which began to be organized in the eighth and ninth centuries. The rule given them by St. Chrodegang, Bishop of Metz (742-766), is almost entirely drawn from that of St. Benedict, and no more decided traces of Augustinian influence are to be found in it than in the decisions of the Council of Aachen (817), which may be considered the real constitutions of the Canons Regular. For this influence we must await the foundation of the clerical or canonical communities established in the eleventh century for the effective counteracting of simony and clerical concubinage. The Council of Lateran (1059) and another council held at Rome four years later approved for the members of the clergy the strict community life of the Apostolic Age, such as the Bishop of Hippo had caused to be practised in his episcopal house and had taught in his two sermons heretofore cited. The first communities of canons adopted these sermons as their basis of organization. This reform movement spread rapidly throughout Latin Europe and brought about the foundation of the regular chapters so numerous and prosperous during the Middle Ages. Monasteries of women or of canonesses were formed on the same plan, but not according to the rules laid down in the sermons "De vitâ et moribus clericorum". The letter to virgins was adopted almost immediately and became the rule of the canons and canonesses; hence it was the religious code of the Premonstratensians, of the houses of Canons Regular, and of canonesses either gathered into congregations or isolated, of the Friars Preachers, of the Trinitarians and of the Order of Mercy, both for the redemption of captives, of hospital communities, both men and women, dedicated to the care of the sick in the hospitals of the Middle Ages, and of some military orders.

J. M. BESSE.

**Augustine of Canterbury**, SAINT, first Archbishop of Canterbury, Apostle of the English; date of birth unknown; d. 26 May, 604. Symbols: cope, pallium, and mitre as Bishop of Canterbury, and pastoral staff and gospels as missionary. Nothing is known of his youth except that he was probably a Roman of the better class, and that early in life he became a monk in the fa-

mous monastery of St. Andrew erected by St. Gregory out of his own patrimony on the Cælian Hill. It was thus amid the religious intimacies of the Benedictine Rule and in the bracing atmosphere of a recent foundation that the character of the future missionary was formed. Chance is said to have furnished the opportunity for the enterprise which was destined to link his name for all time with that of his friend and patron, St. Gregory, as the "true beginner" of one of the most important Churches in Christendom and the medium by which the authority of the Roman See was established over men of the English-speaking race. It is unnecessary to dwell here upon Bede's well-known version of Gregory's casual encounter with English slaves in the Roman market place (H. E., II, i), which is treated under Gregory the Great (q. v.).

Some five years after his elevation to the Roman See (590) Gregory began to look about him for ways and means to carry out the dream of his earlier days. He naturally turned to the community he had ruled more than a decade of years before in the monastery on the Cælian Hill. Out of these he selected a company of about forty and designated Augustine, at that time Prior of St. Andrew's, to be their representative and spokesman. The appointment, as will appear later on, seems to have been of a somewhat indeterminate character; but from this time forward until his death in 604 it is to Augustine as "strengthened by the confirmation of the blessed Father Gregory" (*roboratus confirmatione beati patris Gregorii*, Bede, H. E., I, xxv) that English, as distinguished from British, Christianity owes its primary inspiration.

The event which afforded Pope Gregory the opportunity he had so long desired of carrying out his great missionary plan in favour of the English happened in the year 595 or 596. A rumour had reached Rome that the pagan inhabitants of Britain were ready to embrace the Faith in great numbers, if only preachers could be found to instruct them. The first plan which seems to have occurred to the pontiff was to take measures for the purchase of English captive boys of seventeen years of age and upwards. These he would have brought up in the Catholic Faith with the idea of ordaining them and sending them back in due time as apostles to their own people. He accordingly wrote to Candidus, a presbyter entrusted with the administration of a small estate belonging to the patrimony of the Roman Church in Gaul, asking him to secure the revenues and set them aside for this purpose. (Greg., Epp., VI, vii in Migne, P. L., LXXXVII.) It is possible, not only to determine approximately the dates of these events, but also to indicate the particular quarter of Britain from which the rumour had come. Æthelberht became King of Kent in 559 or 560, and in less than twenty years he succeeded in establishing an overlordship that extended from the borders of the country of the West Saxons eastward to the sea and as far north as the Humber and the Trent. The Saxons of Middlesex and of Essex, together with the men of East Anglia and of Mercia, were thus brought to acknowledge him as Bretwalda, and he acquired a political importance which began to be felt by the Frankish princes on the other side of the Channel. Charibert of Paris gave him his daughter Bertha in marriage, stipulating, as part of the nuptial agreement, that she should be allowed the free exercise of her religion. The condition was accepted (Bede, H. E., I, xxv) and Luidhard, a Frankish bishop, accompanied the princess to her new home in Canterbury, where the ruined church of St. Martin, situated a short distance beyond the walls, and dating from Roman-British times, was set apart for her use (Bede, H. E., I, xxvi). The date of this marriage, so important in its results to the future fortunes of Western Christianity, is of course largely a matter of conjecture; but from the evidence fur-

nished by one or two scattered remarks in St. Gregory's letters (Epp., VI) and from the circumstances which attended the emergence of the kingdom of the Jutes to a position of prominence in the Britain of this period, we may safely assume that it had taken place fully twenty years before the plan of sending Augustine and his companions suggested itself to the pope.

The pope was obliged to complain of the lack of episcopal zeal among Æthelberht's Christian neighbours. Whether we are to understand the phrase *ex vicinis* (Greg., Epp., VI) as referring to Gaulish prelates or to the Celtic bishops of northern and western Britain, the fact remains that neither Bertha's piety, nor Luidhard's preaching, nor Æthelberht's toleration, nor the supposedly robust faith of British or Gaulish neighbouring peoples was found adequate to so obvious an opportunity until a Roman pontiff, distracted with the cares of a world supposed to be hastening to its eclipse, first exhorted forty Benedictines of Italian blood to the enterprise. The itinerary seems to have been speedily, if vaguely, prepared; the little company set out upon their long journey in the month of June, 596. They were armed with letters to the bishops and Christian princes of the countries through which they were likely to pass, and they were further instructed to provide themselves with Frankish interpreters before setting foot in Britain itself. Discouragement, however, appears early to have overtaken them on their way. Tales of the uncouth islanders to whom they were going chilled their enthusiasm, and some of their number actually proposed that they should draw back. Augustine so far compromised with the waverers that he agreed to return in person to Pope Gregory and lay before him plainly the difficulties which they might be compelled to encounter. The band of missionaries waited for him in the neighbourhood of Aix-en-Provence. Pope Gregory, however, raised the drooping spirits of Augustine and sent him back without delay to his faint-hearted brethren, armed with more precise, and as it appeared, more convincing authority.

Augustine was named abbot of the missionaries (Bede, H. E., I, xxiii) and was furnished with fresh letters in which the pope made kindly acknowledgment of the aid thus far offered by Protasius, Bishop of Aix-en-Provence, by Stephen, Abbot of Lérins, and by a wealthy lay official of patrician rank called Arigius [Greg., Epp., VI (indic. xiv) num. 52 sqq.; sc. 3, 4, 5 of the Benedictine series]. Augustine must have reached Aix on his return journey some time in August; for Gregory's message of encouragement to the party bears the date of July the twenty-third, 596. Whatever may have been the real source of the passing discouragement no more delays are recorded. The missionaries pushed on through Gaul, passing up through the valley of the Rhone to Arles on their way to Vienne and Autun, and thence northward, by one of several alternative routes which it is impossible now to fix with accuracy, until they came to Paris. Here, in all probability, they passed the winter months; and here, too, as is not unlikely, considering the relations that existed between the family of the reigning house and that of Kent, they secured the services of the local presbyters suggested as interpreters in the pope's letters to Theodoric and Theodebert and to Brunichilda, Queen of the Franks.

In the spring of the following year they were ready to embark. The name of the port at which they took ship has not been recorded. Boulogne was at that time a place of some mercantile importance; and it is not improbable that they directed their steps thither to find a suitable vessel in which they could complete the last and not least hazardous portion of their journey. All that we know for certain is that they landed somewhere on the Isle of Thanet (Bede, H. E., I, xxv) and that they waited there in obedience to

King Æthelberht's orders until arrangements could be made for a formal interview. The king replied to their messengers that he would come in person from Canterbury, which was less than a dozen miles away. It is not easy to decide at this date between the four rival spots, each of which has claimed the distinction of being the place upon which St. Augustine and his companions first set foot. The Boarded Groin, Stonar, Ebbsfleet, and Richborough—the last named, if the present course of the Stour has not altered in thirteen hundred years, then forming part of the mainland—each has its defenders. The curious in such matters may consult the special literature on the subject cited at the close of this article. The promised interview between the king and the missionaries took place within a few days. It was held in the open air, *sub divo*, says Bede (H. E., I, xxv), on a level spot, probably under a spreading oak in deference to the king's dread of Augustine's possible incantations. His fear, however, was dispelled by the native grace of manner and the kindly personality of his chief guest who addressed him through an interpreter. The message told "how the compassionate Jesus had redeemed a world of sin by His own agony and opened the Kingdom of Heaven to all who would believe" (Ælfric, ap. Haddan and Stubbs, III, ii). The king's answer, while gracious in its friendliness, was curiously prophetic of the religious after-temper of his race. "Your words and promises are very fair" he is said to have replied, "but as they are new to us and of uncertain import, I cannot assent to them and give up what I have long held in common with the whole English nation. But since you have come as strangers from so great a distance, and, as I take it, are anxious to have us also share in what you conceive to be both excellent and true, we will not interfere with you, but receive you, rather, in kindly hospitality and take care to provide what may be necessary for your support. Moreover, we make no objection to your winning as many converts as you can to your creed". (Bede, H. E., I, xxv.)

The king more than made good his words. He invited the missionaries to take up their abode in the royal capital of Canterbury, then a barbarous and half-ruined metropolis, built by the Kentish folk upon the site of the old Roman military town of Durovernum. In spite of the squalid character of the city, the monks must have made an impressive picture as they drew near the abode "over against the King's Street facing the north", a detail preserved in William Thorne's (c. 1397) "Chronicle of the Abbots of St. Augustine's Canterbury" p. 1759, assigned them for a dwelling. The striking circumstances of their approach seem to have lingered long in popular remembrance; for Bede, writing fully a century and a third after the event, is at pains to describe how they came in characteristic Roman fashion (*more suo*) bearing "the holy cross together with a picture of the Sovereign King, Our Lord Jesus Christ and chanting in unison this litany", as they advanced: "We beseech thee, O Lord, in the fulness of thy pity that Thine anger and Thy wrath be turned away from this city and from Thy holy house, because we have sinned: Alleluia!" It was an anthem out of one of the many "Rogation" litanies then beginning to be familiar in the churches of Gaul and possibly not unknown also at Rome. (Martène, "De antiquis Ecclesiæ ritibus", 1764, III, 189; Bede, "H. E.", II, xx; Joannes Diac., "De Vita Gregorii", II, 17 in Migne, P. L., LXXV; Duchesne's ed., "Liber Pontificalis", II, 12.) The building set apart for their use must have been fairly large to afford shelter to a community numbering fully forty. It stood in the Stable Gate, not far from the ruins of an old heathen temple; and the tradition in Thorn's day was that the parish church of St. Alpheg approximately marked the site (Chr. Aug. Abb., 1759). Here Augus-

tine and his companions seem to have established without delay the ordinary routine of the Benedictine rule as practised at the close of the sixth century; and to it they seem to have added in a quiet way the apostolic ministry of preaching. The church dedicated to St. Martin in the eastern part of the city which had been set apart for the convenience of Bishop Luidhard and Queen Bertha's followers many years before was also thrown open to them until the king should permit a more highly organized attempt at evangelization.

The evident sincerity of the missionaries, their single-mindedness, their courage under trial, and, above all, the disinterested character of Augustine himself and the unworlly note of his doctrine made a profound impression on the mind of the king. He asked to be instructed and his baptism was appointed to take place at Pentecost. Whether the queen and her Frankish bishop had any real hand in the process of this comparatively sudden conversion, it is impossible to say. St. Gregory's letter written to Bertha herself, when the news of the king's baptism had reached Rome, would lead us to infer, that, while little or nothing had been done before Augustine's arrival, afterwards there was an endeavour on the part of the queen to make up for past remissness. The pope writes: "Et quoniam, Deo volente, aptum nunc tempus est, agite, ut divinâ gratiâ co-operante, cum augmento possitis quod neglectum est reparare". [Greg., Epp., XI (indic., iv), 29.] The remissness does seem to have been atoned for, when we take into account the Christian activity associated with the names of this royal pair during the next few months. Æthelberht's conversion naturally gave a great impetus to the enterprise of Augustine and his companions. Augustine himself determined to act at once upon the provisional instructions he had received from Pope Gregory. He crossed over to Gaul and sought episcopal consecration at the hands of Virgilius, the Metropolitan of Arles. Returning almost immediately to Kent, he made preparations for that more active and open form of propaganda for which Æthelberht's public baptism had prepared a way. It is characteristic of the spirit which actuated Augustine and his companions that no attempt was made to secure converts on a large scale by the employment of force. Bede tells us that it was part of the king's uniform policy "to compel no man to embrace Christianity" (H. E., I, xxvi) and we know from more than one of his extant letters what the pope thought of a method so strangely at variance with the teaching of the Gospels. On Christmas Day, 597, more than ten thousand persons were baptized by the first "Archbishop of the English". The great ceremony probably took place in the waters of the Swale, not far from the mouth of the Medway. News of these extraordinary events was at once dispatched to the pope, who wrote in turn to express his joy to his friend Eulogius, Bishop of Alexandria, to Augustine himself, and to the king and queen. (Epp., VIII, xxx; XI, xxviii; *ibid.*, lxvi; Bede, H. E., I, xxxi, xxxii.) Augustine's message to Gregory was carried by Lawrence the Presbyter, afterwards Archbishop of Canterbury, and Peter one of the original colony of missionary monks. They were instructed to ask for more Gospel labourers, and, if we may trust Bede's account in this particular and the curious group of letters embodied in his narrative, they bore with them a list of *dubia*, or questions, bearing upon several points of discipline and ritual with regard to which Augustine awaited the pope's answer.

The genuineness of the document or *libellus*, as Bede calls it (H. E., II, i), in which the pope is alleged to have answered the doubts of the new archbishop has not been seriously called in question; though scholars have felt the force of the objection which St. Boniface, writing in the second quarter of the eighth century, urges, viz. that no trace of it could be found in

the official collection of St. Gregory's correspondence preserved in the registry of the Roman Church. (Haddan and Stubbs, III, 336; Dudden, "Gregory the Great", II, 130, note; Mason, "Mission of St. Augustine", preface, pp. viii and ix; Duchesne, "Origines", 3d ed., p. 99, note.) It contains nine *responsa*, the most important of which are those that touch upon local differences of ritual, the question of jurisdiction, and the perpetually recurring problem of marriage relationships. "Why", Augustine had asked "since the faith is one, should there be different usages in different churches; one way of saying Mass in the Roman Church, for instance, and another in the Church of Gaul?" The pope's reply is, that while "Augustine is not to forget the Church in which he has been brought up", he is at liberty to adopt from the usage of other Churches whatever is most likely to prove pleasing to Almighty God. "For institutions", he adds, "are not to be loved for the sake of places; but places, rather, for the sake of institutions". With regard to the delicate question of jurisdiction Augustine is informed that he is to exercise no authority over the churches of Gaul; but that "all the bishops of Britain are entrusted to him, to the end that the unlearned may be instructed, the wavering strengthened by persuasion and the perverse corrected with authority". [Greg., Epp., XI (indic., iv), 64; Bede, H. E., I, xxvii.] Augustine seized the first convenient opportunity to carry out the graver provisions of this last enactment. He had already received the pallium on the return of Peter and Lawrence from Rome in 601. The original band of missionaries had also been reinforced by fresh recruits, among whom "the first and most distinguished", as Bede notes, "were Mellitus, Justus, Paulinus, and Ruffinianus". Of these Ruffinianus was afterwards chosen abbot of the monastery established by Augustine in honour of St. Peter outside the eastern walls of the Kentish capital. Mellitus became the first English Bishop of London; Justus was appointed to the new see of Rochester, and Paulinus became Metropolitan of York.

Æthelberht, as Bretwalda, allowed his wider territory to be mapped out into dioceses, and exerted himself in Augustine's behalf to bring about a meeting with the Celtic bishops of Southern Britain. The conference took place in Malmesbury, on the borders of Wessex, not far from the Severn, at a spot long described in popular legend as Austin's Oak. (Bede, H. E., II, ii.) Nothing came of this attempt to introduce ecclesiastical uniformity. Augustine seems to have been willing enough to yield certain points; but on three important issues he would not compromise. He insisted on an unconditional surrender on the Easter controversy; on the mode of administering the Sacrament of Baptism; and on the duty of taking active measures in concert with him for the evangelization of the Saxon conquerors. The Celtic bishops refused to yield, and the meeting was broken up. A second conference was afterwards planned at which only seven of the British bishops convened. They were accompanied this time by a group of their "most learned men" headed by Dinoh, the abbot of the celebrated monastery of Bangor-iscoed. The result was, if anything, more discouraging than before. Accusations of unworthy motives were freely bandied on both sides. Augustine's Roman regard for form, together with his punctiliousness for personal precedence as Pope Gregory's representative, gave umbrage to the Celts. They denounced the Archbishop for his pride, and retired behind their mountains. As they were on the point of withdrawing, they heard the only angry threat that is recorded of the saint: "If ye will not have peace with the brethren, ye shall have war from your enemies; and if ye will not preach the way of life to the English, ye shall suffer the punishment of death at their hands".

Popular imagination, some ten years afterwards, saw a terrible fulfilment of the prophecy in the butchery of the Bangor monks at the hands of Æthelfrid the Destroyer in the great battle won by him at Chester in 613.

These efforts towards Catholic unity with the Celtic bishops and the constitution of a well-defined hierarchy for the Saxon Church are the last recorded acts of the saint's life. His death fell in the same year says a very early tradition (which can be traced back to Archbishop Theodore's time) as that of his beloved father and patron, Pope Gregory. Thorn, however, who attempts always to give the Canterbury version of these legends, asserts—somewhat inaccurately, it would appear, if his coincidences be rigorously tested—that it took place in 605. He was buried, in true Roman fashion, outside the walls of the Kentish capital in a grave dug by the side of the great Roman road which then ran from Deal to Canterbury over St. Martin's Hill and near the unfinished abbey church which he had begun in honour of Sts. Peter and Paul and which was afterwards to be dedicated to his memory. When the monastery was completed, his relics were translated to a tomb prepared for them in the north porch. A modern hospital is said to occupy the site of his last resting place. [Stanley, "Memoirs of Canterbury" (1906), 38.] His feast day in the Roman Calendar is kept on 28 May; but in the proper of the English office it occurs two days earlier, the true anniversary of his death.

CORNELIUS CLIFFORD.

**Augustine of Hippo**, SAINT, Doctor of the Church, b. 13 November, 354; d. 28 August, 430;—"a philosophical and theological genius of the first order, dominating, like a pyramid, antiquity and the succeeding ages . . . Compared with the great philosophers of past centuries and modern times, he is the equal of them all; among theologians he is undeniably the first, and such has been his influence that none of the Fathers, Scholastics, or Reformers has surpassed it".—The extraordinary part played by the great Bishop of Hippo, and thus eulogized by Philip Schaff in his "History of the Christian Church", accounts for the length of this article treating I. His Life; II. His Works; III. His Function as a Doctor of the Church; IV. His System of Grace; V. Augustinism in History.

I. HIS LIFE.—Augustine's life is unfolded to us in documents of unrivalled richness, and of no great character of ancient times have we information comparable to that contained in the "Confessions", which relate the touching story of his soul, the "Retractions", which give the history of his mind, and the "Life of Augustine", written by his friend Possidius, telling of the saint's apostolate. We will confine ourselves to sketching the three periods of this great life: (1) the young wanderer's gradual return to the Faith; (2) the doctrinal development of the Christian philosopher to the time of his episcopate; and (3) the full development of his activities upon the episcopal throne of Hippo.

(1) Augustine was born at Tagaste, now Souk-

Ahras, about 60 miles from Bona (ancient Hippo-Regius), and at that time a small free city of pro-consular Numidia which had recently been converted from Donatism. Although eminently respectable, his family was not rich, and his father, Patricius, one of the *curiales* of the city, was still a pagan. However, the admirable virtues that made Monica the ideal of Christian mothers at length brought her husband the grace of baptism and of a holy death, about the year 371. Augustine received a Christian education. His mother had him signed with the cross and enrolled among the catechumens. Once, when very ill, he asked for baptism, but, all danger being soon passed, he deferred receiving the sacrament, thus yielding to a deplorable custom of the times. His association with "men of prayer" left three great ideas deeply engraven upon his soul: a Divine Providence, the future life with terrible sanctions, and, above all, Christ the Saviour. "From my tenderest infancy, I had in a manner sucked with my mother's milk that name of my Saviour, Thy Son; I kept it in the recesses of my heart; and all that presented itself to me without that Divine Name, though it might be elegant, well written, and even replete with truth, did not altogether carry me away" (Confessions, I, iv).

But a great intellectual and moral crisis stifled for a time all these Christian sentiments. The heart was the first point of attack. Patricius, proud of his son's success in the schools of Tagaste and Madaura determined to send him to Carthage to prepare for a forensic career. But, unfortunately, it required several months to collect the necessary means, and Augustine had to spend his sixteenth year at Tagaste in an idleness which was fatal to his virtue; he gave himself up to pleasure with all the vehemence of an ardent nature. At first he prayed, but without the sincere desire of being heard, and when he reached Carthage, towards the end of the year 370, every circumstance tended to draw him from his true course: the many seductions of the great city that was still half pagan, the licentiousness of other students, the theatres, the intoxication of his literary success, and a proud desire always to be first, even in evil. Before long he was obliged to confess to Monica that he had formed a sinful liaison with the person who bore him a son (372), "the son of his sin"—an entanglement from which he only delivered himself at Milan after fifteen years of its thralldom. Two extremes are to be avoided in the appreciation of this crisis. Some, like Mommsen, misled perhaps by the tone of grief in the "Confessions", have exaggerated it: in the "Realencyklopädie" (3d ed., II, 268) Loofs reproves Mommsen on this score, and yet he himself is too lenient towards Augustine, when he claims that in those days, the Church permitted concubinage. The "Confessions" alone prove that Loofs did not understand the 17th canon of Toledo. However, it may be said that, even in his fall, Augustine maintained a certain dignity and felt a compunction which does him honour, and that, from the age of nineteen, he had a genuine desire to break the chain. In fact, in 373, an entirely new inclination manifested itself in his life, brought about by the reading of Cicero's "Hortensius" whence he imbibed a love of the wisdom which Cicero so eloquently praises. Thenceforward Augustine looked upon rhetoric merely as a profession; his heart was in philosophy.

Unfortunately, his faith, as well as his morals, was to pass through a terrible crisis. In this same year, 373, Augustine and his friend Honoratus fell into the snares of the Manichæans. It seems strange that so great a mind should have been victimized by Oriental vapourings, synthesized by the Persian Mani (215-276) into a coarse, material dualism, and introduced into Africa scarcely fifty years previously.

Augustine himself tells us that he was enticed by the promises of a free philosophy unbridled by faith; by the boasts of the Manichæans, who claimed to have discovered contradictions in Holy Writ; and, above all, by the hope of finding in their doctrine a scientific explanation of nature and its most mysterious phenomena. Augustine's inquiring mind was enthusiastic for the natural sciences, and the Manichæans declared that nature withheld no secrets from Faustus, their doctor. Moreover, being tortured by the problem of the origin of evil, Augustine, in default of solving it, acknowledged a conflict of two principles. And then, again, there was a very powerful charm in the moral irresponsibility resulting from a doctrine which denied liberty and attributed the commission of crime to a foreign principle.

Once won over to this sect, Augustine devoted himself to it with all the ardour of his character; he read all its books, adopted and defended all its opinions. His furious proselytism drew into error his friend Alypius and Romanianus, his Mæcenas of Tagaste, the friend of his father who was defraying the expenses of Augustine's studies. It was during this Manichæan period that Augustine's literary faculties reached their full development, and he was still a student at Carthage when he embraced error. His studies ended, he should in due course have entered the *forum litigiosum*, but he preferred the career of letters, and Possidius tells us that he returned to Tagaste to "teach grammar". The young professor captivated his pupils, one of whom, Alypius, hardly younger than his master, loath to leave him, after following him into error, was afterwards baptized with him at Milan, eventually becoming Bishop of Tagaste, his native city. But Monica deeply deplored Augustine's heresy and would not have received him into her home or at her table but for the advice of a saintly bishop, who declared that "the son of so many tears could not perish". Soon afterwards Augustine went to Carthage, where he continued to teach rhetoric. His talents shone to even better advantage on this wider stage, and by an indefatigable pursuit of the liberal arts his intellect attained its full maturity. Having taken part in a poetic tournament, he carried off the prize, and the Proconsul Vindicianus publicly conferred upon him the *corona agonistica*. It was at this moment of literary intoxication, when he had just completed his first work on aesthetics, now lost, that he began to repudiate Manichæism. Even when Augustine was in his first fervour, the teachings of Mani had been far from quieting his restlessness, and although he has been accused of becoming a priest of the sect, he was never initiated or numbered among the "elect", but remained an "auditor"—the lowest degree in the hierarchy. He himself gives the reason for his disenchantment. First of all there was the fearful depravity of Manichæan philosophy—"They destroy everything and build up nothing"; then, the dreadful immorality in contrast with their affectation of virtue; the feebleness of their arguments in controversy with the Catholics, to whose Scriptural arguments their only reply was: "The Scriptures have been falsified". But, worse than all, he did not find science among them—science in the modern sense of the word—that knowledge of nature and its laws which they had promised him. When he questioned them concerning the movements of the stars, none of them could answer him. "Wait for Faustus", they said, "he will explain everything to you". Faustus of Mileve, the celebrated Manichæan bishop, at last came to Carthage; Augustine visited and questioned him, and discovered in his responses the vulgar rhetorician, the utter stranger to all scientific culture. The spell was broken, and, although Augustine did not immediately abandon

the sect, his mind rejected Manichæan doctrines. The illusion had lasted nine years.

But the religious crisis of this great soul was only to be resolved in Italy, under the influence of Ambrose. In 383 Augustine, at the age of twenty-nine, yielded to the irresistible attraction which Italy had for him, but his mother suspected his departure and was so reluctant to be separated from him that he resorted to a subterfuge and embarked under cover of the night. He had only just arrived in Rome when he was taken seriously ill; upon recovering he opened a school of rhetoric, but, disgusted by the tricks of his pupils, who shamelessly defrauded him of their tuition fees, he applied for a vacant professorship at Milan, obtained it, and was accepted by the prefect, Symmachus. Having visited Bishop Ambrose, the fascination of that saint's kindness induced him to become a regular attendant at his preachings. However, before embracing the Faith, Augustine underwent a three years' struggle during which his mind passed through several distinct phases. At first he turned towards the philosophy of the Academics, with its pessimistic scepticism; then neo-Platonic philosophy inspired him with genuine enthusiasm. At Milan he had scarcely read certain works of Plato and, more especially, of Plotinus, before the hope of finding the truth dawned upon him. Once more he began to dream that he and his friends might lead a life dedicated to the search for it, a life purged of all vulgar aspirations after honours, wealth, or pleasure, and with celibacy for its rule (Confessions, VI). But it was only a dream; his passions still enslaved him. Monica, who had joined her son at Milan, prevailed upon him to become betrothed, but his affianced bride was too young, and although Augustine dismissed the mother of Adeodatus, her place was soon filled by another. Thus did he pass through one last period of struggle and anguish. Finally, through the reading of the Holy Scriptures light penetrated his mind. Soon he possessed the certainty that Jesus Christ is the only way to truth and salvation. After that, resistance came only from the heart. An interview with Simplicianus, the future successor of St. Ambrose, who told Augustine the story of the conversion of the celebrated neo-Platonic rhetorician, Victorinus (Confessions, VIII, i, ii), prepared the way for the grand stroke of grace which, at the age of thirty-three, smote him to the ground in the garden at Milan (September, 386). A few days later Augustine, being ill, took advantage of the autumn holidays and, resigning his professorship, went with Monica, Adeodatus, and his friends to Cassiciacum, the country estate of Verecundus, there to devote himself to the pursuit of true philosophy which, for him, was now inseparable from Christianity.

(2) (*From 386 to 396*).—Augustine gradually became acquainted with Christian doctrine, and in his mind the fusion of Platonic philosophy with revealed dogmas was taking place. The law that governed this change of thought has of late years been frequently misconstrued; it is sufficiently important to be precisely defined. The solitude of Cassiciacum realized a long-cherished dream. In his books "Against the Academics", Augustine has described the ideal serenity of this existence, enlivened only by the passion for truth. He completed the education of his young friends, now by literary readings in common, now by philosophical conferences to which he sometimes invited Monica, and the accounts of which, compiled by a secretary, have supplied the foundation of the "Dialogues". Licentius, in his "Letters", would later on recall these delightful philosophical mornings and evenings, at which Augustine was wont to evolve the most elevating discussions from the most commonplace incidents. The favourite topics at their conferences

were truth, certainty (Against the Academics), true happiness in philosophy (On a Happy Life), the Providential order of the world and the problem of evil (On Order) and finally God and the soul (Soliloquies, On the Immortality of the Soul).

Here arises the curious question propounded by modern critics: Was Augustine a Christian when he wrote these "Dialogues" at Cassiciacum?—Until now no one had doubted it; historians, relying upon the "Confessions", had all believed that Augustine's retirement to the villa had for its twofold object the improvement of his health and his preparation for baptism. But certain critics nowadays claim to have discovered a radical opposition between the philosophical "Dialogues" composed in this retirement and the state of soul described in the "Confessions". According to Harnack, in writing the "Confessions" Augustine must have projected upon the recluse of 386 the sentiments of the bishop of 400. Others go farther and maintain that the recluse of the Milanese villa could not have been at heart a Christian, but a Platonist; and that the scene in the garden was a conversion not to Christianity, but to philosophy, the genuinely Christian phase beginning only in 390. But this interpretation of the "Dialogues" cannot withstand the test of facts and texts. It is admitted that Augustine received baptism at Easter, 387; and who could suppose that it was for him a meaningless ceremony? So too, how can it be admitted that the scene in the garden, the example of the recluses, the reading of St. Paul, the conversion of Victorinus, Augustine's ecstasies in reading the Psalms with Monica were all invented after the fact? Again, as it was in 388 that Augustine wrote his beautiful apology "On the Holiness of the Catholic Church", how is it conceivable that he was not yet a Christian at that date? To settle the argument, however, it is only necessary to read the "Dialogues" themselves. They are certainly a purely philosophical work—a work of youth, too, not without some pretension, as Augustine ingeniously acknowledges (Confessions, IX, iv); nevertheless, they contain the entire history of his Christian formation. As early as 386, the first work written at Cassiciacum reveals to us the great underlying motive of his researches. The object of his philosophy is to give authority the support of reason, and "for him the great authority, that which dominates all others and from which he never wished to deviate, is the authority of Christ"; and if he loves the Platonists it is because he counts on finding among them interpretations always in harmony with his faith (Against the Academics, III, c. x). To be sure such confidence was excessive, but it remains evident that in these "Dialogues" it is a Christian, and not a Platonist, that speaks. He reveals to us the intimate details of his conversion, the argument that convinced him (the life and conquests of the Apostles), his progress in the Faith at the school of St. Paul (ibid., II, ii), his delightful conferences with his friends on the Divinity of Jesus Christ, the wonderful transformations worked in his soul by faith, even to that victory of his over the intellectual pride which his Platonic studies had aroused in him (On the Happy Life, I, ii), and at last the gradual calming of his passions and the great resolution to choose wisdom for his only spouse (Soliloquies, I, x).

It is now easy to appreciate at its true value the influence of neo-Platonism upon the mind of the great African Doctor. It would be impossible for anyone who has read the works of St. Augustine to deny the existence of this influence; to be convinced, it suffices to glance at the passages from Plotinus and from Augustine arranged in parallel columns by M. Grandgeorge (Saint Augustin et le Néoplatonisme, 1896, 117-147). However, it would be a great exaggeration of this influence to pretend that it

at any time sacrificed the Gospel to Plato. The same learned critic thus wisely concludes his study: "So long, therefore, as his philosophy agrees with his religious doctrines, St. Augustine is frankly neo-Platonist; as soon as a contradiction arises, he never hesitates to subordinate his philosophy to religion, reason to faith. He was, first of all, a Christian; the philosophical questions that occupied his mind constantly found themselves more and more relegated to the background" (op. cit., 155). But the method was a dangerous one; in thus seeking harmony between the two doctrines he thought too easily to find Christianity in Plato, or Platonism in the Gospel. More than once, in his "Retractions" and elsewhere, he acknowledges that he has not always shunned this danger. Thus he had imagined that in Platonism he discovered the entire doctrine of the Word and the whole prologue of St. John. He likewise disavowed a good number of neo-Platonic theories which had at first misled him—the cosmological thesis of the universal soul, which makes the world one immense animal—the Platonic doubts upon that grave question: Is there a single soul for all or a distinct soul for each? But on the other hand, he had always reproached the Platonists, as Schaff very properly remarks (Saint Augustine, New York, 1886, p. 51), with being ignorant of, or rejecting, the fundamental points of Christianity: "first, the great mystery, the Word made flesh; and then love, resting on the basis of humility". They also ignore grace, he says, giving sublime precepts of morality without any help towards realizing them.

It was this Divine grace that Augustine sought in Christian baptism. Towards the beginning of Lent, 387, he went to Milan and, with Adeodatus and Alypius, took his place among the *competentes*, being baptized by Ambrose on Easter Day, or at least during Easter-tide. The tradition maintaining that the Te Deum was sung on that occasion by the bishop and the neophyte alternately is groundless. (See TE DEUM, THE.) Nevertheless this legend is certainly expressive of the joy of the Church upon receiving as her son him who was to be her most illustrious doctor. It was at this time that Augustine, Alypius, and Evodius resolved to retire into solitude in Africa. Augustine undoubtedly remained at Milan until towards autumn, continuing his works: "On the Immortality of the Soul" and "On Music". In the autumn of 387, he was about to embark at Ostia, when Monica was summoned from this life. In all literature there are no pages of more exquisite sentiment than the story of her saintly death and Augustine's grief (Confessions, IX). Augustine remained several months in Rome, chiefly engaged in refuting Manichæism. He sailed for Africa after the death of the tyrant Maximus (August, 388) and after a short sojourn in Carthage, returned to his native Tagaste. Immediately upon arriving there, he wished to carry out his idea of a perfect life, and began by selling all his goods and giving the proceeds to the poor. Then he and his friends withdrew to his estate, which had already been alienated, there to lead a common life in poverty, prayer, and the study of sacred letters. Book of the "LXXXIII Questions" is the fruit of conferences held in this retirement, in which he also wrote "De Genesi contra Manichæos", "De Magistro", and, "De Vera Religione".

Augustine did not think of entering the priesthood, and, through fear of the episcopacy, he even fled from cities in which an election was necessary. One day, having been summoned to Hippo by a friend whose soul's salvation was at stake, he was praying in a church when the people suddenly gathered about him, cheered him, and begged Valerius, the bishop, to raise him to the priesthood. In spite of his tears Augustine was obliged to yield to their entreaties,

and was ordained in 391. The new priest looked upon his ordination as an additional reason for resuming religious life at Tagaste, and so fully did Valerius approve that he put some church property at Augustine's disposal, thus enabling him to establish a monastery—the second that he had founded. His priestly ministry of five years was admirably fruitful, Valerius had bidden him preach, in spite of the deplorable custom which in Africa reserved that ministry to bishops. Augustine combated heresy, especially Manichæism, and his success was prodigious. Fortunatus, one of their great doctors, whom Augustine had challenged in public conference, was so humiliated by his defeat that he fled from Hippo. Augustine also abolished the abuse of holding banquets in the chapels of the martyrs. He took part, 8 October, 393, in the Plenary Council of Africa, presided over by Aurelius, Bishop of Carthage, and, at the request of the bishops, was obliged to deliver a discourse which, in its completed form, afterwards became the treatise "De Fide et symbolo".

(3) (From 396 to 430).—Enfeebled by old age, Valerius, Bishop of Hippo, obtained the authori-

But he was above all the defender of truth and the shepherd of souls. His doctrinal activities, the influence of which was destined to last as long as the Church itself, were manifold: he preached frequently, sometimes for five days consecutively, his sermons breathing a spirit of charity that won all hearts; he wrote letters which scattered broadcast through the then known world his solutions of the problems of that day; he impressed his spirit upon divers African councils at which he assisted, for instance, those of Carthage in 398, 401, 407, 419 and of Mileve in 416 and 418; and lastly struggled indefatigably against all errors. To relate these struggles were endless; we shall, therefore, select only the chief controversies and indicate in each the doctrinal attitude of the great Bishop of Hippo.

(a) *The Manichaean Controversy and the Problem of Evil*.—After Augustine became bishop the zeal which, from the time of his baptism, he had manifested in bringing his former co-religionists into the true Church, took on a more paternal form without losing its pristine ardour—"Let those rage against us who know not at what a bitter cost truth is at-

ST. AUGUSTINE ON THE SEA-SHORE (Pinturicchio)

zation of Aurelius, Primate of Africa, to associate Augustine with himself as coadjutor. Augustine had to resign himself to consecration at the hands of Megalius, Primate of Numidia. He was then forty-two, and was to occupy the See of Hippo for thirty-four years. The new bishop understood well how to combine the exercise of his pastoral duties with the austerities of the religious life, and although he left his convent, his episcopal residence became a monastery where he lived a community life with his clergy, who bound themselves to observe religious poverty. Was it an order of regular clerics or of monks that he thus founded?—This is a question often asked, but we feel that Augustine gave but little thought to such distinctions. Be that as it may, the episcopal house of Hippo became a veritable nursery which supplied the founders of the monasteries that were soon spread all over Africa and the bishops who occupied the neighbouring sees. Possidius (*Vita S. August.*, xxii) enumerates ten of the saint's friends and disciples who were promoted to the episcopacy. Thus it was that Augustine earned the title of patriarch of the religious, and renovator of the clerical, life in Africa.

tained. . . . As for me, I should show you the same forbearance that my brethren had for me when I, blind, was wandering in your doctrines" (*Contra Epistolam Fundamenti*, iii). Among the most memorable events that occurred during this controversy was the great victory won in 404 over Felix, one of the "elect" of the Manichæans and the great doctor of the sect. He was propagating his errors in Hippo, and Augustine invited him to a public conference the issue of which would necessarily cause a great stir; Felix declared himself vanquished, embraced the Faith, and, together with Augustine, subscribed the acts of the conference. In his writings Augustine successively refuted Mani (397), the famous Faustus (400), Secundinus (405), and (about 415) the fatalistic Priscillianists whom Paulus Orosius had denounced to him. These writings contain the saint's clear, unquestionable views on the eternal problem of evil, views based on an optimism proclaiming, like the Platonists, that every work of God is good and that the only source of moral evil is the liberty of creatures (*De Civitate Dei*, XIX, c. xiii, n. 2). Augustine takes up the defence of free will, even in man as he is, with such ardour that his works against

the Manichæans are an inexhaustible storehouse of arguments in this still living controversy.

In vain have the Jansenists maintained that Augustine was unconsciously a Pelagian and that he afterwards acknowledged the loss of liberty through the sin of Adam. Modern critics, doubtless unfamiliar with Augustine's complicated system and his peculiar terminology, have gone much farther. In the "Revue d'histoire et de littérature religieuses" (1899, p. 447), M. Margival exhibits St. Augustine as the victim of metaphysical pessimism unconsciously imbued from Manichæan doctrines. "Never", says he, "will the Oriental idea of the necessity and the eternity of evil have a more zealous defender than this bishop". Nothing is more opposed to the facts. Augustine acknowledges that he had not yet understood how the first good inclination of the will is a gift of God (Retractions, I, xxiii, n. 3); but it should be remembered that he never retracted his leading theories on liberty, never modified his opinion upon what constitutes its essential condition, that is to say, the full power of choosing or of deciding. Who will dare to say that in revising his own writings on so important a point he lacked either clearness of perception or sincerity?

(b) *The Donatist Controversy and the Theory of the Church.*—The Donatist schism was the last episode in the Montanist and Novatian controversies which had agitated the Church from the second century. While the East was discussing under varying aspects the Divine and Christological problem of the Word, the West, doubtless because of its more practical genius, took up the moral question of sin in all its forms. The general problem was the holiness of the Church; could the sinner be pardoned, and remain in her bosom? In Africa the question especially concerned the holiness of the hierarchy. The bishops of Numidia, who, in 312, had refused to accept as valid the consecration of Cæcilian, Bishop of Carthage, by a *traditor*, had inaugurated the schism and at the same time proposed these grave questions: Do the hierarchical powers depend upon the moral worthiness of the priest? How can the holiness of the Church be compatible with the unworthiness of its ministers?

At the time of Augustine's arrival in Hippo, the schism had attained immense proportions, having become identified with political tendencies—perhaps with a national movement against Roman domination. In any event, it is easy to discover in it an undercurrent of anti-social revenge which the emperors had to combat by strict laws. The strange sect known as "Soldiers of Christ", and called by Catholics *Circumcelliones* (brigands, vagrants), resembled the revolutionary sects of the Middle Ages in point of fanatic destructiveness—a fact that must not be lost sight of, if the severe legislation of the emperors is to be properly appreciated.

The history of Augustine's struggles with the Donatists is also that of his change of opinion on the employment of rigorous measures against the heretics; and the Church in Africa, of whose councils he had been the very soul, followed him in the change. This change of views is solemnly attested by the Bishop of Hippo himself, especially in his Letters, xciii (in the year 408). In the beginning, it was by conferences and a friendly controversy that he sought to re-establish unity. He inspired various conciliatory measures of the African councils, and sent ambassadors to the Donatists to invite them to re-enter the Church, or at least to urge them to send deputies to a conference (403). The Donatists met these advances at first with silence, then with insults, and lastly with such violence that Possidius, Bishop of Calamet, Augustine's friend, escaped death only by flight, the Bishop of Bagala was left covered with horrible wounds, and the life of

the Bishop of Hippo himself was several times attempted (Letter lxxxviii, to Januarius, the Donatist bishop). This madness of the *Circumcelliones* required harsh repression, and Augustine, witnessing the many conversions that resulted therefrom, thenceforth approved rigid laws. However, this important restriction must be pointed out: that St. Augustine never wished heresy to be punishable by death—*Vos rogamus ne occidatis* (Letter c, to the Proconsul Donatus). But the bishops still favoured a conference with the schismatics, and in 410 an edict issued by Honorius put an end to the refusal of the Donatists. A solemn conference took place at Carthage, in June, 411, in presence of 286 Catholic, and 279 Donatist bishops. The Donatist spokesmen were Petilian of Constantine, Primian of Carthage, and Emeritus of Cæsarea; the Catholic orators, Aurelius and Augustine. On the historic question then at issue, the Bishop of Hippo proved the innocence of Cæcilian and his consecrator Felix, and in the dogmatic debate he established the Catholic thesis that the Church, as long as it is upon earth, can, without losing its holiness, tolerate sinners within its pale for the sake of converting them. In the name of the emperor the Proconsul Marcellinus sanctioned the victory of the Catholics on all points. Little by little Donatism died out, to disappear with the coming of the Vandals.

So amply and magnificently did Augustine develop his theory on the Church that, according to Specht, "he deserves to be named the Doctor of the Church as well as the 'Doctor of Grace'; and Möhler (Dogmatik, 351) is not afraid to write: 'For depth of feeling and power of conception nothing written on the Church since St. Paul's time, is comparable to the works of St. Augustine'. He has corrected, perfected, and even excelled the beautiful pages of St. Cyprian on the Divine institution of the Church, its authority, its essential marks, and its mission in the economy of grace and the administration of the sacraments. The Protestant critics, Dörner, Biedermann, Böhringer and especially Reuter, loudly proclaim, and sometimes even exaggerate, this rôle of the Doctor of Hippo; and while Harnack does not quite agree with them in every respect he does not hesitate to say (History of Dogma, II, c. iii): 'It is one of the points upon which Augustine specially affirms and strengthens the Catholic idea. . . . He was the first (!) to transform the authority of the Church into a religious power, and to confer upon practical religion the gift of a doctrine of the Church.' He was not the first, for Dörner acknowledges (Augustinus, 88) that Optatus of Mileve had expressed the basis of the same doctrines. Augustine, however, deepened, systematized, and completed the views of St. Cyprian and Optatus. But it is impossible here to go into detail. (See Specht, Die Lehre von der Kirche nach dem hl. Augustinus, Paderborn, 1892.)

(c) *The Pelagian Controversy and the Doctor of Grace.*—The close of the struggle against the Donatists almost coincided with the beginnings of a very grave theological dispute which not only was to demand Augustine's unremitting attention up to the time of his death, but was to become an eternal problem for individuals and for the Church. Farther on we shall enlarge upon Augustine's system; here we need only indicate the phases of the controversy. Africa, where Pelagius and his disciple Celestius had sought refuge after the taking of Rome by Alaric, was the principal centre of the first Pelagian disturbances; as early as 412 a council held at Carthage condemned Pelagians for their attacks upon the doctrine of original sin. Among other books directed against them by Augustine was his famous "*De naturâ et gratiâ*". Thanks to his activity the condemnation of these innovators, who had succeeded in deceiving a synod convened at Diospolis in Palest-

tine, was reiterated by councils held later at Carthage and Mileve and confirmed by Pope Innocent I (417). A second period of Pelagian intrigues developed at Rome, but Pope Zosimus, whom the stratagems of Celestius had for a moment deluded, being enlightened by Augustine, pronounced the solemn condemnation of these heretics in 418. Thenceforth the combat was conducted in writing against Julian of Eclanum, who assumed the leadership of the party and violently attacked Augustine. Towards 426 there entered the lists a school which afterwards acquired the name of Semipelagian, the first members being monks of Hadrumetum in Africa, who were followed by others from Marseilles, led by Cassian, the celebrated abbot of Saint-Victor. Unable to admit the absolute gratuitousness of predestination, they sought a middle course between Augustine and Pelagius, and maintained that grace must be given to those who merit it and denied to others; hence goodwill has the precedence, it desires, it asks, and God rewards. Informed of their views by Prosper of Aquitaine, the holy Doctor once more expounded, in "De Prædestinatione Sanctorum", how even these first desires for salvation are due to the grace of God, which therefore absolutely controls our predestination.

(d) *Struggles against Arianism and Closing Years.*—In 426 the holy Bishop of Hippo, at the age of seventy-two, wishing to spare his episcopal city the turmoil of an election after his death, caused both clergy and people to acclaim the choice of the deacon Heraclius as his auxiliary and successor, and transferred to him the administration of externals. Augustine might then have enjoyed some rest had Africa not been agitated by the undeserved disgrace and the revolt of Count Boniface (427). The Goths, sent by the Empress Placidia to oppose Boniface, and the Vandals, whom the latter summoned to his assistance, were all Arians. Maximinus, an Arian bishop, entered Hippo with the imperial troops. The holy Doctor defended the Faith at a public conference (428) and in various writings. Being deeply grieved at the devastation of Africa, he laboured to effect a reconciliation between Count Boniface and the empress. Peace was indeed re-established, but not with Genseric, the Vandal king. Boniface, vanquished, sought refuge in Hippo, whither many bishops had already fled for protection and this well fortified city was to suffer the horrors of an eighteen months' siege. Endeavouring to control his anguish, Augustine continued to refute Julian of Eclanum; but early in the siege he was stricken with what he realized to be a fatal illness, and, after three months of admirable patience and fervent prayer, departed from this land of exile, in the seventy-sixth year of his age.

II. HIS WORKS.—Augustine was one of the most prolific geniuses that humanity has ever known, and is admired not only for the number of his works, but also for the variety of subjects, which traverse the whole realm of thought. The form in which he casts his work exercises a very powerful attraction on the reader. Bardenhewer praises his extraordinary suppleness of expression and his marvellous gift of describing interior things, of painting the various states of the soul and the facts of the spiritual world. His latinity bears the stamp of his age. In general, his style is noble and chaste; but, says the same author, "in his sermons and other popular writings he purposely drops to the language of the people". A detailed analysis is impossible here. We shall merely indicate his principal writings and the date (often approximative) of their composition.

(1) *Autobiography and Correspondence.*—The "Confessions" are the history of his heart; the "Retractions", of his mind; while the "Letters" show his activity in the Church.

(a) The "Confessions" (towards A. D. 400) are, in the Biblical sense of the word *confiteri*, not an avowal or an account, but the praise of a soul that admires the action of God within itself. Of all the works of the holy Doctor none has been more universally read and admired, none has caused more salutary tears to flow. Neither in respect of penetrating analysis of the most complex impressions of the soul, nor communicative feeling, nor elevation of sentiment, nor depth of philosophic views, is there any book like it in all literature. (b) The "Retractions" (towards the end of his life, 426–428) are a revision of the works of the saint in chronological order, explaining the occasion and dominant idea of each. They are a guide of inestimable price for seizing the progress of Augustine's thought. (c) The "Letters", amounting in the Benedictine collection to 270 (53 of them from Augustine's correspondents), are a treasure of the greatest value, for the knowledge of his life, influence and even his doctrine.

(2) *Philosophy.*—These writings, for the most part composed in the villa of Cassiciacum, from his conversion to his baptism (386–387), continue the autobiography of the saint by initiating us into the researches and Platonic hesitations of his mind. There is less freedom in them than in the Confessions. They are literary essays, writings whose simplicity is the acme of art and elegance. Nowhere is the style of Augustine so chastened, nowhere is his language so pure. Their dialogue form shows that they were inspired by Plato and Cicero. The chief ones are: "Contra Academicos" (the most important of all); "De Beatâ Vitâ"; "De Ordine"; the two books of "Soliloquies", which must be distinguished from the "Soliloquies" and "Meditations" which are certainly not authentic; "De Immortalitate animæ"; "De Magistro" (a dialogue between Augustine and his son Adeodatus); and six curious books (the sixth especially) on *Music*.

(3) *General Apology.*—(a) In the "City of God" (begun in 413, but the books XX–XXII are of 426) Augustine answers the pagans, who attributed the fall of Rome (410) to the abolition of pagan worship. Considering this problem of Divine Providence with regard to the Roman Empire, he widens the horizon still more and in a burst of genius he creates the philosophy of history, embracing as he does with a glance the destinies of the world grouped around the Christian religion, the only one which goes back to the beginning and leads humanity to its final term. "The City of God" is considered as the most important work of the great bishop. The other works chiefly interest theologians; but it, like the "Confessions", belongs to general literature and appeals to every soul. The "Confessions" are theology which has been lived in the soul, and the history of God's action on individuals, while "The City of God" is theology framed in the history of humanity, and explaining the action of God in the world. (b) Other apologetic writings, like the "De Verâ Religione" (a little masterpiece composed at Tagaste, 389–391), "De Utilitate Credendi" (391), "Liber de fide rerum quæ non videntur" (400), and the "Letter CXX to Consentius", constitute Augustine the great theorist of the Faith, and of its relations to reason. "He is the first of the Fathers", says Harnack (*Dogmengeschichte*, III, 97) "who felt the need of forcing his faith to reason". And indeed he, who so repeatedly affirms that faith precedes the intelligent apprehension of the truths of revelation—he it is who marks out with greater clearness of definition and more precisely than anyone else the function of the reason in preceding and verifying the witness's claim to credence, and in accompanying the mind's act of adhesion. (Letter to Consentius, n. 3, 8, etc.) What would not have been the stupefaction of Augustine if anyone had told him that

faith must close its eyes to the proofs of the divine testimony, under the penalty of its becoming science!—Or if one had spoken to him of faith in authority giving its assent, without examining any motive which might prove the value of the testimony!—It surely cannot be possible for the human mind to accept testimony without known motives for such acceptance, or, again, for any testimony, even when learnedly sifted out, to give the science—the inward view—of the object.

(4) *Controversies with Heretics.*—(a) Against the Manichæans; "De Moribus Ecclesiæ Catholicæ et de Moribus Manichæorum" (at Rome, 368); "De Duabus Animabus" (before 392); "Acts of the Dispute with Fortunatus the Manichæan" (392); "Acts of the Conference with Felix" (404); "De Libero Arbitrio"—very important on the origin of evil; various writings "Contra Adimantum"; against the Epistle of Mani (the foundation); against Faustus (about 400); against Secundinus (405), etc. (b) Against the Donatists: "Psalmus contra partem Donati" (about 395), a purely rhythmic song for popular use (the oldest example of its kind); "Contra epistolam Parmeniani" (400); "De Baptismo contra Donatistas" (about 400), one of the most important pieces in this controversy; "Contra litteras Parmeniani", "Contra Cresconium", etc.—a good number of letters, also, relate to this debate. (c) Against the Pelagians, in chronological order, we have: 412, "De peccatorum meritis et remissione" (On merit and forgiveness); same year, "De spiritu et litterâ" (On the spirit and the letter); 415, "De Perfectione justitiæ hominis"—important for understanding Pelagian impeccability; 417, "De Gestis Pelagii"—a history of the Council of Diospolis, whose acts it reproduces; 418, "De Gratia Christi et de peccato originali"; 419, "De nuptiis et concupiscentiâ"; and other writings (420–428); "Against Julian of Eclanum"—the last of this series, interrupted by the death of the saint. (d) Against the Semipelagians: "De correptione et gratiâ" (427); "De prædestinatione Sanctorum" (428); "De dono Perseverantiæ" (429).—(e) Against Arianism: "Contra sermonem Arianorum" (418) and "Collatio cum Maximino Arianorum episcopo" (the celebrated conference of Hippo in 428).

(5) *Scriptural Exegesis.*—Augustine in the "De Doctrinâ Christianâ" (begun in 397 and ended in 426) gives us a genuine treatise of exegesis, historically the first (for St. Jerome wrote rather as a controversialist). Several times he attempted a commentary on Genesis. The great work "De Genesi ad litteram" was composed from 401 to 415. The "Enarrationes in Psalmos" are a masterpiece of popular eloquence, with a swing and a warmth to them which are inimitable. On the New Testament: the "De Sermone Dei in Monte" (during his priestly ministry) is especially noteworthy; "De Consensu Evangelistarum" (Harmony of the Gospels—400); "Homilies on St. John" (416), generally classed among the chief works of Augustine; the "Exposition of the Epistle to the Galatians" (324), etc. The most remarkable of his Biblical works illustrate either a theory of exegesis (one generally approved) which delights in finding mystical or allegorical interpretations, or the style of preaching which is founded on that view. His strictly exegetical work is far from equalling in scientific value that of St. Jerome. His knowledge of the Biblical languages was insufficient: he read Greek with difficulty; as for Hebrew, all that we can gather from the recent studies of Schanz and Rottmanner is that he was familiar with Punic, a language allied to Hebrew. Moreover, the two grand qualities of his genius—ardent feeling and prodigious subtlety—carried him away into interpretations that were violent or more ingenious than solid.

But the hermeneutics of Augustine merit great praise, especially for their insistence upon the stern law of extreme prudence in determining the meaning of Scripture: *We must be on our guard against giving interpretations which are hazardous or opposed to science, and so exposing the word of God to the ridicule of unbelievers* (De Genesi ad litteram, I, xix, xxi, especially n. 39). An admirable application of this well-ordered liberty appears in his thesis on the simultaneous creation of the universe, and the gradual development of the world under the action of the natural forces which were placed in it. Certainly the instantaneous act of the Creator did not produce an organized universe as we see it now. But, in the beginning, God created all the elements of the world in a confused and *nebulous* mass (the word is Augustine's—*Nebulosa species apparet*; "De Genesi ad litt.", I, n. 27), and in this mass were the mysterious germs (*rationes seminales*) of the future beings which were to develop themselves, when favourable circumstances should permit. Is Augustine, therefore, an Evolutionist?—If we mean that he had a deeper and wider mental grasp than other thinkers had of the forces of nature and the plasticity of beings, it is an incontestable fact; and from this point of view. Father Zahm (Bible, Science, and Faith, pp. 58–66, French tr.) properly felicitates him on having been the precursor of modern thought. But if we mean that he admitted in matter a power of differentiation and of gradual transformation, passing from the homogeneous to the heterogeneous, the most formal texts force us to recognize that Augustine proclaimed the fixity of species, and did not admit that "from one identical primitive principle, or from one germ, different realities can issue". This judgment of the Abbé Martin in his very searching study on this subject (St. Augustin, p. 314) must correct the conclusion of Father Zahm. "The elements of this corporeal world have also their well defined force, and their proper quality, from which depends what each one of them can or cannot do, and what reality ought or ought not to issue from each one of them. Hence it is that from a grain of wheat a bean cannot issue, nor wheat from a bean, nor a man from a beast, nor a beast from a man" (De Genesi ad litt., IX, n. 32).

(6) *Dogmatic and Moral Exposition.*—(a) The fifteen books "De Trinitate", on which he worked for fifteen years, from 400 to 416, are the most elaborate and profound work of St. Augustine. The last books on the analogies which the mystery of the Trinity have with our soul are much discussed. The saintly author himself declares that they are only analogous and are far-fetched and very obscure. (b) The "Enchiridion", or handbook, on Faith, Hope, and Love, composed, in 421, at the request of a pious Roman, Laurentius, is an admirable synthesis of Augustine's theology, reduced to the three theological virtues. Father Faure has given us a learned commentary of it, and Harnack a detailed analysis (Hist. of dogmas, III, 205, 221). (c) Several volumes of miscellaneous questions, among which "Ad Simplicianum" (397) has been especially noted. (d) Numberless writings of his have a practical aim: two on "Lying" (374 and 420), five on "Contenance", "Marriage", and "Holy Widowhood", one on "Patience", another on "Prayer for the Dead" (421).

(7) *Pastorals and Preaching.*—The theory of preaching and religious instruction of the people is given in the "De Catechizandis Rudibus" (400) and in the fourth book "De Doctrinâ Christianâ". The oratorical work alone is of vast extent. Besides the Scriptural homilies, the Benedictines have collected 363 sermons which are certainly authentic; the brevity of these suggests that they are stenographic, often revised by Augustine himself. If

the Doctor in him predominates over the orator, if he possesses less of colour, of opulence, of actuality, and of Oriental charm than St. John Chrysostom, we find, on the other hand, a more nervous logic, bolder comparisons, greater elevation and greater profundity of thought, and sometimes, in his bursts of emotion and his daring lapses into dialogue-form, he attains the irresistible power of the Greek orator. The oratorical merit of Augustine has recently been placed in strong relief by Rottmanner in "Historisches Jahrbuch", 1898, p. 894; and H. Pope, O. P., in "The Ecclesiastical Review", September, 1906.

*Editions of St. Augustine's works.*—The best edition of his complete works is that of the Benedictines, eleven tomes in eight folio volumes (Paris, 1679-1700). It has been often reprinted, e. g. by Gaume (Paris, 1836-39), in eleven octavo volumes, and by Migne, P. L., XXXII-XLVII. The last volume of the Migne reprint contains a number of important earlier studies on St. Augustine—Vivès, Noris, Merlin, particularly the literary history of the editions of Augustine from Schönemann's "Bibl. hist. lit. patrum Lat." (Leipzig, 1794). For critical remarks on the Benedictine, or Maurist, edition, see R. Kukula and O. Rottmanner in the reports of the Vienna Academy of Science for 1890, 93, 98. Since 1887 a new edition of St. Augustine has been appearing in the "Corpus Scriptorum Eccl. Latinarum" of the Vienna Academy—the "Confessiones" by P. Knöll (XXXIII), the "De Civitate Dei", by E. Hoffmann (XL), etc. The principal tractates of St. Augustine are also found in the collection of H. Hurter, "SS. PP. Opuscula selecta" (Innsbruck, 1868 sqq.).—*English translations.*—Dr. Pusey's "Library of the Fathers" (Oxford, 1839-55) contains translations of many works of St. Augustine—the "Confessions", sermons, treatises, expositions on the Psalms, and "Homilies on John". It is well supplemented by the "Augustinian Library" of Marcus Dods (Edinburgh, 1872-76, 15 vols., 8vo), which contains a great number of translations, from the pens of Cunningham, Findlay, Salmond, Holmes, Wallis, and others—the "City of God", the "Confessions", the Anti-Donatist, Anti-Pelagian, and Anti-Manichean works, "On the Trinity", "Sermon on the Mount", "Harmony of the Gospels", "On Christian Doctrine", the "Enchiridion", "On the Faith and the Creed", "On Catechizing the Ignorant". These volumes, enriched with other translations and introductory discourses, were reprinted under the editorial direction of Dr. Philip Schaff (New York, 1886-88, 8 vols.). Dr. Pusey's translation of the "Confessions", he says himself, is a revision of the version of W. Watts (London, 1650), with addition of a lengthy preface and notes; the same translation, reprinted at Boston (1843), and then reputed anonymous, furnished Dr. W. G. T. Shedd (Andover, 1860) with the text for his "excellent original introduction in which he clearly and vigorously characterizes the Confessions and draws a comparison between them and the Confessions of Rousseau" (Schaff, Hist. of the Christian Church, 5th ed., New York, 1903, p. 1005). The earliest English translation of the "De Civitate Dei" bears the title: "Of the Citie of God with the learned comments of Jo. L. Vivès, Englished first by J. H(ealey), London, 1610". There is a German (Catholic) translation of several works of St. Augustine in the "Kempten Bibliothek der Kirchenväter" (1871-79, 8 vols.).

III. HIS FUNCTION AS A DOCTOR OF THE CHURCH.—When the critics endeavour to determine Augustine's place in the history of the Church and of civilization, there can be no question of exterior or political influence, such as was exercised by St. Leo, St. Gregory, or St. Bernard. As Reuter justly observes, Augustine was bishop of a third-rate city and had scarcely

any direct control over politics, and Harnack adds that perhaps he had not the qualifications of a statesman. If Augustine occupies a place apart in the history of humanity, Eucken and men of his calibre agree that it is as a thinker, his influence being felt even outside the realm of theology, and playing a most potent part in the orientation of Western thought. It is now universally conceded that, in the intellectual field, this influence is unrivalled even by that of Thomas Aquinas, and Augustine's teaching marks a distinct epoch in the history of Christian thought. The better to emphasize this important fact we shall try to determine: (1) the rank and degree of influence that must be ascribed to Augustine; (2) the nature, or the elements, of his doctrinal influence; (3) the general qualities of his doctrine; and (4) the character of his genius.

(1) *The greatest of the Doctors.*—It is first of all a remarkable fact that the great critics, Protestant as well as Catholic, are almost unanimous in placing St. Augustine in the foremost rank of Doctors and proclaiming him to be the greatest of the Fathers. Such, indeed, was also the opinion of his contemporaries, judging from their expressions of enthusiasm gathered by the Bollandists. The popes attributed such exceptional authority to the Doctor of Hippo that, even of late years, it has given rise to lively theological controversies. Peter the Venerable accurately summarized the general sentiment of the Middle Ages when he ranked Augustine immediately after the Apostles; and in modern times Bossuet, whose genius was most like that of Augustine, assigns him the first place among the Doctors, nor does he simply call him "the incomparable Augustine", but "the Eagle of Doctors", "the Doctor of Doctors". If the Jansenistic abuse of his works and perhaps the exaggerations of certain Catholics, as well as the attack of Richard Simon, seem to have alarmed some minds, the general opinion has not varied. In the nineteenth century Stöckl expressed the thought of all when he said, "Augustine has justly been called the greatest Doctor of the Catholic world".

And the admiration of Protestant critics is not less enthusiastic. More than this, it would seem as if they had in these latter days been quite specially fascinated by the great figure of Augustine, so deeply and so assiduously have they studied him (Bindemann, Schaff, Dörner, Reuter, A. Harnack, Eucken, Scheel, and so on) and all of them agree more or less with Harnack when he says: "Where, in the history of the West, is there to be found a man who, in point of influence, can be compared with him?" Luther and Calvin were content to treat Augustine with a little less irreverence than they did the other Fathers, but their descendants do him full justice, although recognizing him as the Father of Roman Catholicism. According to Bindemann, "Augustine is a star of extraordinary brilliancy in the firmament of the Church. Since the Apostles he has been unsurpassed". In his "History of the Church" Dr. Kurtz calls Augustine "the greatest, the most powerful of all the Fathers, him from whom proceeds all the doctrinal and ecclesiastical development of the West, and to whom each recurring crisis, each new orientation of thought brings it back". Schaff himself (Saint Augustine, Melancthon and Neander, p. 98) is of the same opinion: "While most of the great men in the history of the Church are claimed either by the Catholic or by the Protestant confession, and their influence is therefore confined to one or the other, he enjoys from both a respect equally profound and enduring". Rudolf Eucken is bolder still, when he says: "On the ground of Christianity proper a single philosopher has appeared and that is Augustine". The English writer, W. Cunningham, is no less appreciative of the extent and perpetuity of this extraordinary influence: "The whole life of the medieval

Church was framed on lines which he has suggested: its religious orders claimed him as their patron; its mystics found a sympathetic tone in his teaching; its polity was to some extent the actualization of his picture of the Christian Church; it was in its various parts a carrying out of ideas which he cherished and diffused. Nor does his influence end with the decline of medievalism: we shall see presently how closely his language was akin to that of Descartes, who gave the first impulse to and defined the special character of modern philosophy." And after having established that the doctrine of St. Augustine was at the bottom of all the struggles between Jansenists and Catholics in the Church of France, between Arminians and Calvinists on the side of the Reformers, he adds: "And once more in our own land when a reaction arose against rationalism and Erastinianism it was to the African Doctor that men turned with enthusiasm: Dr. Pusey's edition of the *Confessions* was among the first-fruits of the Oxford Movement".

But Adolf Harnack is the one who has oftenest emphasized the unique rôle of the Doctor of Hippo. He has studied Augustine's place in the history of the world as reformer of Christian piety and his influence as Doctor of the Church. In his study of the "Confessions" he comes back to it: "No man since Paul is comparable to him"—with the exception of Luther, he adds.—"Even to-day we live by Augustine, by his thought and his spirit; it is said that we are the sons of the Renaissance and the Reformation, but both one and the other depend upon him".

(2) *Nature and different aspects of his doctrinal influence.*—This influence is so varied and so complex that it is difficult to consider under all its different aspects. First of all, in his writings the great bishop collects and condenses the intellectual treasures of the old world and transmits them to the new. Harnack goes so far as to say: "It would seem that the miserable existence of the Roman empire in the West was prolonged until then, only to permit Augustine's influence to be exercised on universal history". It was in order to fulfil this enormous task that Providence brought him into contact with the three worlds whose thought he was to transmit: with the Roman and Latin world in the midst of which he lived, with the Oriental world partially revealed to him through the study of Manichæism, and with the Greek world shown to him by the Platonists. In philosophy he was initiated into the whole content and all the subtleties of the various schools, without, however, giving his allegiance to any one of them. In theology it was he who acquainted the Latin Church with the great dogmatic work accomplished in the East during the fourth century and at the beginning of the fifth; he popularized the results of it by giving them the more exact and precise form of the Latin genius.

To synthesis of the past, Augustine adds the incomparable wealth of his own thought, and he may be said to have been the most powerful instrument of Providence in development and advance of dogma. Here the danger has been not in denying, but in exaggerating, this advance. Augustine's dogmatic mission (in a lower sphere and apart from inspiration) recalls that of Paul in the preaching of the Gospel. It has also been subject to the same attacks and occasioned the same vagaries of criticism. Just as it was sought to make of Paulinism the real source of Christianity as we know it—a system that had smothered the primitive germ of the Gospel of Jesus—so it was imagined that, under the name of Augustinianism, Augustine had installed in the Church some sort of syncretism of the ideas of Paul and of neo-Platonism which was a deviation from ancient Christianity, fortunate according to some,

but according to others utterly deplorable. These fantasies do not survive the reading of the texts, and Harnack himself shows in Augustine the heir to the tradition that preceded him. Still, on the other hand, his share of invention and originality in the development of dogma must not be ignored, although here and there, on special questions, human weaknesses crop out. He realized, better than any of the Fathers, the progress so well expressed by Vincent of Lérins, his contemporary, in a page that some have turned against him.

In general, all Christian dogmatics are indebted to him for new theories that better justify and explain revelation, new views, and greater clearness and precision. The many struggles with which he was identified, together with the speculative turn of his mind, brought almost every question within the scope of his research. Even his way of stating problems so left his impress upon them that there is no problem, one might almost say, in considering which the theologian does not feel the study of Augustine's thought to be an imperative obligation. Certain dogmas in particular he so amply developed, so skilfully unsheathing the fruitful germ of the truths from their envelope of tradition, that many of these dogmas (wrongly, in our opinion) have been set down as "Augustinianism". Augustine was not their inventor, he was only the first to put them in a strong light. They are chiefly the dogmas of the Fall, the Atonement, Grace, and Predestination. Schaff (op. cit., 97) has very properly said: "His appearance in the history of dogma forms a distinct epoch, especially as regards anthropological and soteriological doctrines, which he advanced considerably further, and brought to a greater clearness and precision, than they had ever had before in the consciousness of the Church". But he is not only the Doctor of Grace, he is also the Doctor of the Church: his twenty years' conflict with Donatism led to a complete exposition of the dogmas of the Church, the great work and mystical Body of Christ, and true Kingdom of God, of its part in salvation and of the intimate efficacy of its sacraments. It is on this point, as the very centre of Augustinian theology, that Reuter has concentrated those "Augustinische Studien" which, according to Harnack, are the most learned of recent studies on St. Augustine. Manichæan controversies also led him to state clearly the great questions of the Divine Being and of the nature of evil, and he might also be called the Doctor of Good, or of good principles of all things. Lastly, the very idiosyncrasy of his genius and the practical, supernatural, and Divine imprint left upon all his intellectual speculations have made him the Doctor of Charity.

Another step forward due to the works of Augustine is in the language of theology, for, if he did not create it, he at least contributed towards its definite settlement. It is indebted to him for a great number of epigrammatic formulæ, as significant as they are terse, afterwards singled out and adopted by Scholasticism. Besides, as Latin was more concise and less fluid in its forms than Greek, it was wonderfully well suited to the work. Augustine made it the dogmatic language *par excellence*, and Anselm, Thomas Aquinas, and others followed his lead. At times he has even been credited with the pseudo-Athanasian creed which is undoubtedly of later date, but those critics were not mistaken who traced its inspiration to the formulæ in "De Trinitate". Whoever its author may have been, he was certainly familiar with Augustine and drew upon his works. It is unquestionably this gift of concise expression, as well as his charity, that has so often caused the celebrated saying to be attributed to him: "In essentials unity, in non-essentials liberty, in all things charity".

Augustine stands forth, too, as the great inspirer of religious thought in subsequent ages. A whole volume would not be sufficient to contain the full account of his influence on posterity; here we shall merely call attention to its principal manifestations. It is, in the first place, a fact of paramount importance that, with St. Augustine, the centre of dogmatic and theological development changed from East to West. Hence, from this view-point again, he makes an epoch in the history of dogma. The critics maintain that up to his time the most powerful influence was exerted by the Greek Church, the East having been the classic land of theology, the great workshop for the elaboration of dogma. From the time of Augustine, the predominating influence seems to emanate from the West, and the practical, realistic spirit of the Latin race supplants the speculative and idealistic spirit of Greece and the East. Another fact, no less salient, is that it was the Doctor of Hippo who, in the bosom of the Church, inspired the two seemingly antagonistic movements, Scholasticism and Mysticism. From Gregory the Great to the Fathers of Trent, Augustine's theological authority, indisputably the highest, dominates all thinkers and is appealed to alike by the Scholastics Anselm, Peter Lombard, and Thomas Aquinas, and by Bernard, Hugh of St. Victor, and Tauler, exponents of Mysticism, all of whom were nourished upon his writings and penetrated with his spirit. There is not one of even the most modern tendencies of thought but derives from him whatever it may have of truth or of profound religious sentiment. Learned critics, such as Harnack, have called Augustine "the first modern man", and in truth, he so moulded the Latin world that it is really he who has shaped the education of modern minds. But, without going so far, we may quote the German philosopher, Eucken: "It is perhaps not paradoxical to say that if our age wishes to take up and treat in an independent way the problem of religion, it is not so much to Schleiermacher or Kant, or even Luther or St. Thomas, that it must refer, as to Augustine. . . . And outside of religion, there are points upon which Augustine is more modern than Hegel or Schopenhauer".

(3) *The dominating qualities of his doctrine.*—The better to understand St. Augustine's influence, we must point out in his doctrine certain general characteristics which must not be lost sight of, if, in reading his works, one would avoid troublesome misapprehensions. First, the full development of the great Doctor's mind was progressive. It was by stages, often aided by the circumstances and necessities of controversy, that he arrived at the exact knowledge of each truth and a clean-cut perception of its place in the synthesis of revelation. He also requires that his readers should know how to "advance with him". It is necessary to study St. Augustine's works in historical order and, as we shall see, this applies particularly to the doctrine of grace.

Augustinian doctrine is, again, essentially theological, and has God for its centre. To be sure Augustine is a great philosopher, and Fénelon said of him: "If an enlightened man were to gather from the books of St. Augustine the sublime truths which this great man has scattered at random therein, such a compendium [extraît], made with discrimination, would be far superior to Descartes' *Meditations*". And indeed just such a collection was made by the Oratorian ontologist, André Martin. There is then a philosophy of St. Augustine, but in him philosophy is so intimately coupled with theology as to be inseparable from it. Protestant historians have remarked this characteristic of his writings. "The world", says Eucken, "interests him less than the action of God in the world and especially in ourselves. God and the soul are the only subjects the knowledge of which ought to fire us with enthusiasm. All

knowledge becomes moral, religious knowledge, or rather a moral, religious conviction, an act of faith on the part of man, who gives himself up unreservedly". And with still greater energy Böhringer has said: "The axis on which the heart, life, and theology of Augustine move is God". Oriental discussions on the Word had forced Athanasius and the Greek Fathers to set faith in the Word and in Christ, the Saviour, at the very summit of theology; Augustine, too, in his theology, places the Incarnation at the centre of the Divine plan, but he looks upon it as the great historic manifestation of God to humanity—the idea of God dominates all: of God considered in His essence (On the Trinity), in His government (The City of God), or as the last end of all Christian life (Enchiridion and On the Christian Combat).

Lastly, Augustine's doctrine bears an eminently Catholic stamp and is radically opposed to Protestantism. It is important to establish this fact, principally because of the change in the attitude of Protestant critics towards St. Augustine. Indeed, nothing is more deserving of attention than this development so highly creditable to the impartiality of modern writers. The thesis of the Protestants of olden times is well known. Attempts to monopolize Augustine and to make him an ante-Reformation reformer, were certainly not wanting. Of course Luther had to admit that he did not find in Augustine justification by faith alone, that generating principle of all Protestantism; and Schaff tells us that he consoled himself with exclaiming (op. cit., p. 100): "Augustine has often erred, he is not to be trusted. Although good and holy, he was yet lacking in true faith as well as the other Fathers." But in general, the Reformation did not so easily fall into line, and for a long time it was customary to oppose the great name of Augustine to Catholicism. Article 20 of the Confession of Augsburg dares to ascribe to him justification without works, and Melancthon invokes his authority in his "Apologia Confessionis". In the last thirty or forty years all has been changed, and the best Protestant critics now vie with one another in proclaiming the essentially Catholic character of Augustinian doctrine. In fact they go to extremes when they claim him to be the founder of Catholicism. It is thus that H. Reuter concludes his very important studies on the Doctor of Hippo: "I consider Augustine the founder of Roman Catholicism in the West. . . . This is no new discovery, as Kattenbusch seems to believe, but a truth long since recognized by Neander, Julius Köstlin, Dorner, Schmidt, . . . etc.". Then, as to whether Evangelicalism is to be found in Augustine, he says: "Formerly this point was reasoned out very differently from what it is nowadays. . . . The phrases so much in use from 1830 to 1870: *Augustine is the Father of evangelical Protestantism and Pelagius is the Father of Catholicism*, are now rarely met with. They have since been acknowledged to be untenable, although they contain a *particula veri*". Philip Schaff reaches the same conclusion; and Dorner says, "It is erroneous to ascribe to Augustine the ideas that inspired the Reformation". No one, however, has put this idea in a stronger light than Harnack. Quite recently, in his 14th lesson on "The Essence of Christianity", he characterized the Roman Church by three elements, the third of which is Augustinianism, the thought and the piety of St. Augustine. "In fact Augustine has exerted over the whole inner life of the Church, religious life and religious thought, an absolutely decisive influence." And again he says, "In the fifth century, at the hour when the Church inherited the Roman Empire, she had within her a man of extraordinarily deep and powerful genius: from him she took her ideas, and to this present hour she has been unable to break away from them". In his "History of Dogma" (English tr.,

V, 234, 235) the same critic dwells at length upon the features of what he calls the "popular Catholicism" to which Augustine belongs. These features are (a) the Church as a hierarchical institution with doctrinal authority; (b) eternal life by merits, and disregard of the Protestant thesis of "salvation by faith"—that is, salvation by that firm confidence in God which the certainty of pardon produces; (c) the forgiveness of sins in the Church and by the Church; (d) the distinction between commands and counsels—between grievous sins and venial sins—the scale of wicked men and good men—the various degrees of happiness in heaven according to one's deserts; (e) Augustine is accused of "outdoing the superstitious ideas" of this popular Catholicism—the infinite value of Christ's satisfaction—salvation considered as enjoyment of God in heaven—the mysterious efficacy of the sacraments (*ex opere operato*)—Mary's virginity even in childbirth—"the idea of her purity and her conception, unique in their kind". Harnack does not assert that Augustine taught the Immaculate Conception, but Schaff (op. cit., p. 98) says unhesitatingly: "He is responsible also for many grievous errors of the Roman Church . . . he anticipated the dogma of the immaculate conception of the Virgin Mary, and his ominous word, *Roma locuta est, causa finita est*, might almost be quoted in favour of the Vatican decree of papal infallibility".

Nevertheless, it were a mistake to suppose that modern Protestants relinquish all claim upon Augustine; they will have it that, despite his essential Catholicism, it was he who inspired Luther and Calvin. The new thesis, therefore, is that each of the two Churches may claim him in turn. Burke's expression quoted by Schaff (*ibid.*, p. 102) is characteristic: "In Augustine ancient and modern ideas are melted and to his authority the papal Church has as much right to appeal as the Churches of the Reformation". No one notes this contradiction more clearly than Loofs. After stating that Augustine has accentuated the characteristic elements of Western (Catholic) Christianity, that in succeeding ages he became its Father, and that "the Ecclesiasticism of Roman Catholicism, Scholasticism, Mysticism, and even the claims of the papacy to temporal rule, are founded upon a tendency initiated by him", Loofs also affirms that he is the teacher of all the reformers and their bond of union, and concludes with this strange paradox: "The history of Catholicism is the history of the progressive elimination of Augustinism". The singular aptitude of these critics for supposing the existence of flagrant contradictions in a genius like Augustine is not so astonishing when we remember that, with Reuter, they justify this theory by the reflection: "In whom are to be found more frequent contradictions than in Luther?" But their theories are based upon a false interpretation of Augustine's opinion, which is frequently misconstrued by those who are not sufficiently familiar with his language and terminology.

(4) *The character of his genius.*—We have now to ascertain what is the dominating quality which accounts for his fascinating influence upon posterity. One after another the critics have considered the various aspects of this great genius. Some have been particularly impressed by the depth and originality of his conceptions, and for these Augustine is the great sower of the ideas by which future minds are to live. Others, like Jungmann and Stöckl, have praised in him the marvellous harmony of all the mind's higher qualities, or, again, the universality and the compass of his doctrine. "In the great African Doctor", says the Rev. J. A. Zahm (Bible, Science and Faith, Fr. tr., p. 56), "we seem to have found united and combined the powerful and penetrating logic of Plato, the deep scientific conceptions

of Aristotle, the knowledge and intellectual suppleness of Origen, the grace and eloquence of Basil and Chrysostom. Whether we consider him as philosopher, as theologian, or as exegetist . . . he still appears admirable . . . the unquestioned Master of all the centuries." Philip Schaff (op. cit., p. 97) admires above all "such a rare union of the speculative talent of the Greek and of the practical spirit of the Latin Church as he alone possessed". In all these opinions there is a great measure of truth; nevertheless we believe that the dominating characteristic of Augustine's genius and the true secret of his influence are to be found in his heart—a heart that penetrates the most exalted speculations of a profound mind and animates them with the most ardent feeling. It is at bottom only the traditional and general estimate of the saint that we express; for he has always been represented with a heart for his emblem, just as Thomas Aquinas with a sun. Mgr. Bougaud thus interpreted this symbol: "Never did man unite in one and the same soul such stern rigour of logic with such tenderness of heart". This is also the opinion of Harnack, Böhringer, Nourisson, Storz, and others. Great intellectuality admirably fused with an enlightened mysticism is Augustine's distinguishing characteristic. Truth is not for him only an object of contemplation; it is a good that must be possessed, that must be loved and lived by. What constitutes Augustine's genius is his marvellous gift of embracing truth with all the fibres of his soul; not with the heart alone, for the heart does not think; not with the mind alone, for the mind grasps only the abstract or, as it were, lifeless truth. Augustine seeks the living truth, and even when he is combating certain Platonic ideas he is of the family of Plato, not of Aristotle. He belongs indisputably to all ages because he is in touch with all souls, but he is pre-eminently modern because his doctrine is not the cold light of the School; he is living and penetrated with personal sentiment. Religion is not a simple theory, Christianity is not a series of dogmas; it is also a life, as they say nowadays, or, more accurately, a source of life. However, let us not be deceived. Augustine is not a sentimentalist, a pure mystic, and heart alone does not account for his power. If in him the hard, cold intellectuality of the metaphysician gives place to an impassioned vision of truth, that truth is the basis of it all. He never knew the vaporous mysticism of our day, that allows itself to be lulled by a vague, aimless sentimentalism. His emotion is deep, true, engrossing, precisely because it is born of a strong, secure, accurate dogmatism that wishes to know what it loves and why it loves. Christianity is life, but life in the eternal, unchangeable truth. And if none of the Fathers has put so much of his heart into his writings, neither has any turned upon truth the searchlight of a stronger, clearer intellect.

Augustine's passion is characterized not by violence, but by a communicative tenderness; and his exquisite delicacy experiences first one and then another of the most intimate emotions and tests them; hence the irresistible effect of the "Confessions". Feuerlein, a Protestant thinker, has brought out in relief (exaggeratedly, to be sure, and leaving the marvellous powers of his intellect in the shade) Augustine's exquisite sensibility—what he calls the "feminine elements" of his genius. He says: "It was not merely a chance or accidental part that his mother, Monica, played in his intellectual development, and therein lies what essentially distinguishes him from Luther, of whom it was said: 'Everything about him bespeaks the man'". And Schlösser, whom Feuerlein quotes, is not afraid to say that Augustine's works contain more genuine poetry than all the writings of the Greek Fathers. At least it cannot be denied that no

thinker ever caused so many and such salutary tears to flow. This characteristic of Augustine's genius explains his doctrinal work. Christian dogmas are considered in relation to the soul and the great duties of Christian life, rather than to themselves and in a speculative fashion. This alone explains his division of theology in the "Enchiridion", which at first sight seems so strange. He assembles all Christian doctrine in the three theological virtues, considering in the mysteries the different activities of the soul that must live by them. Thus, in the Incarnation, he assigns the greatest part to the moral side, to the triumph of humility. For this reason, also, Augustine's work bears an imprint, until then unknown, of living personality peeping out everywhere. He inaugurates that literature in which the author's individuality reveals itself in the most abstract matters, the "Confessions" being an inimitable example of it. It is in this connexion that Harnack admires the African Doctor's gift of psychological observation and a captivating facility for portraying his penetrating observations. This talent, he says, is the secret of Augustine's originality and greatness. Again, it is this same characteristic that distinguishes him from the other Doctors and gives him his own special temperament. The practical side of a question appealed to the Roman mind of Ambrose, too, but he never rises to the same heights, nor moves the heart as deeply as does his disciple of Milan. Jerome is a more learned exegetist, better equipped in respect of Scriptural erudition; he is even purer in his style; but, despite his impetuous ardour, he is less animated, less striking, than his correspondent of Hippo. Athanasius, too, is subtle in the metaphysical analysis of dogma, but he does not appeal to the heart and take hold of the soul like the African Doctor. Origen played the part of initiator in the Eastern Church, just as Augustine did in the Western, but his influence, unfortunate in more ways than one, was exercised rather in the sphere of speculative intelligence, while that of Augustine, owing to the qualities of his heart, extended far beyond the realm of theology. Bossuet, who of all geniuses most closely resembles Augustine by his elevation and his universality, is his superior in the skilfulness and artistic finish of his works, but he has not the alluring tenderness of soul; and if Augustine fulminates less, he attracts more powerfully, subjugating the mind with gentleness.

Thus may Augustine's universal influence in all succeeding ages be explained: it is due to combined gifts of heart and mind. Speculative genius alone does not sway the multitude; the Christian world, apart from professional theologians, does not read Thomas Aquinas. On the other hand, without the clear, definite idea of dogma, mysticism founders as soon as reason awakes and discovers the emptiness of metaphors: this is always the fate of vague pietism, whether it recognize Christ or not, whether it be extolled by Schleiermacher, Sabatier, or their disciples. But to Augustine's genius, at once enlightened and ardent, the whole soul is accessible, and the whole Church, both teachers and taught, is permeated by his sentiments and ideas. A. Harnack, more than any other critic, admires and describes Augustine's influence over all the life of Christian people. If Thomas Aquinas is the Doctor of the Schools, Augustine is, according to Harnack, the inspirer and restorer of Christian piety. If Thomas inspires the canons of Trent, Augustine, besides having formed Thomas himself, inspires the inner life of the Church and is the soul of all the great reforms effected within its pale. In his "Essence of Christianity" (14th lesson, 1900, p. 161) Harnack shows how Catholics and Protestants live upon the piety of Augustine. "His living has been incessantly relived in the course of the fifteen hun-

dred years that have followed. Even to our days interior and living piety among Catholics, as well as the mode of its expression, has been essentially Augustinian: the soul is permeated by his sentiment, it feels as he felt and rethinks his thoughts. It is the same with many Protestants also, and they are by no means among the worst. And even those to whom dogma is but a relic of the past proclaim that Augustine's influence will live forever."

This genuine emotion is also the veil that hides certain faults from the reader or else makes him oblivious of them. Says Eucken: "Never could Augustine have exercised all the influence he has exercised if it had not been that, in spite of the rhetorical artifice of his utterance, absolute sincerity reigned in the inmost recesses of his soul." His frequent repetitions are excused because they are the expression of his deep feeling. Schaff says: "His books, with all the faults and repetitions of isolated parts, are a spontaneous outflow from the marvellous treasures of his highly-gifted mind and his truly pious heart". (St. Augustine, p. 96.) But we must also acknowledge that his passion is the source of exaggerations and at times of errors that are fraught with real danger for the inattentive or badly disposed reader. Out of sheer love for Augustine certain theologians have endeavoured to justify all he wrote, to admire all, and to proclaim him infallible, but nothing could be more detrimental to his glory than such excess of praise. The reaction already referred to arises partly from this. We must recognize that the passion for truth sometimes fixes its attention too much upon one side of a complex question; his too absolute formule, lacking qualification, false in appearance now in one sense now in another. "The oratorical temperament that was his in such a high degree", says Becker, very truly (*Revue d'histoire ecclésiastique*, 15 April, 1902, p. 379), "the kind of exaltation that befitted his rich imagination and his loving soul, are not the most reliable in philosophical speculations". Such is the origin of the contradictions alleged against him and of the errors ascribed to him by the predestinarians of all ages. Here we see the rôle of the more frigid minds of Scholasticism. Thomas Aquinas was a necessary corrective to Augustine. He is less great, less original, and, above all, less animated; but the calm didactics of his intellectualism enable him to castigate Augustine's exaggerations with rigorous criticism, to impart exactitude and precision to his terms—in one word, to prepare a dictionary with which the African Doctor may be read without danger.

IV. HIS SYSTEM OF GRACE.—It is unquestionably in the great Doctor's solution of the eternal problem of freedom and grace—of the part taken by God and by man in the affair of salvation—that his thought stands forth as most personal, most powerful, and most disputed. *Most personal*, for he was the first of all to synthesize the great theories of the Fall, grace, and free will; and moreover it is he who, to reconcile them all, has furnished us with a profound explanation which is in very truth his, and of which we find no trace in his predecessors. Hence, the term *Augustinism* is often exclusively used to designate his system of grace. *Most powerful*, for, as all admit, it was he above all others who won the triumph of liberty against the Manichæans, and of grace against the Pelagians. His doctrine has, in the main, been solemnly accepted by the Church, and we know that the canons of the Council of Orange are borrowed from his works. *Most disputed, also*.—Like St. Paul, whose teachings he develops, he has often been quoted, often not understood. Friends and enemies have exploited his teaching in the most diverse senses. It has not been grasped, not only by the opponents of liberty, and hence by the Re-

formers of the sixteenth century, but even to-day, by Protestant critics the most opposed to the cruel predestinationism of Calvin and Luther, who father that doctrine on St. Augustine. A technical study would be out of place here; it will be sufficient to enunciate the most salient thoughts, to enable the reader to find his bearings.

(1) It is regarded as incontestable to-day that the system of Augustine was complete in his mind from the year 397—that is, from the beginning of his episcopate, when he wrote his answers to the "Quæstiones Diversæ" of Simplician. It is to this book that Augustine, in his last years, refers the Semipelagians for the explanation of his real thought. This important fact, to which for a long time no attention was paid, has been recognized by Neander and established by Gangaut, and also by recent critics, such as Loofs, Reuter, Turmel, Jules Martin (see also Cunningham, St. Austin, 1886, pp. 80 and 175). It will not, therefore, be possible to deny the authority of these texts on the pretext that Augustine in his old age adopted a system more antagonistic to liberty.

(2) The system of Pelagius to-day is better understood than heretofore. Pelagius doubtless denied original sin, and the immortality and integrity of Adam; in a word, the whole supernatural order. But the parent idea of his system, which was of stoic origin, was nothing else than the complete "emancipation" of human liberty with regard to God, and its limitless power for good and for evil. It depended on man to attain by himself, without the grace of God, a stoic impeccability and even insensibility, or the absolute control of his passions. It was scarcely suspected, even up to our time, what frightful rigorism resulted from this exaggeration of the powers of liberty. Since perfection was possible, it was of obligation. There was no longer any distinction between precepts and counsels. Whatever was good was a duty. There was no longer any distinction between mortal and venial sin. Every useless word merited hell, and even excluded from the Church the children of God. All this has been established by hitherto unedited documents which Caspari has published (Briefe, Abhandlungen, und Predigten, Christiania, 1890).

(3) The system of St. Augustine in opposition to this rests on three fundamental principles: (a) God is absolute Master, by His grace, of all the determinations of the will; (b) man remains free, under the action of grace; (c) the reconciliation of these two truths rests on the manner of the Divine government.

(a) The first principle, viz., that of the absolute sovereignty of God over the will, in opposition to the emancipation of Pelagius, has not always been understood in its entire significance. We think that numberless texts of the holy Doctor signify that not only does every meritorious act require supernatural grace, but also that every act of virtue, even of infidels, should be ascribed to a gift of God, not indeed to a supernatural grace (as Baius and the Jansenists pretend), but to a specially efficacious providence which has prepared this good movement of the will (Retractations, I, ix, n. 6). It is not, as theologians very wisely remark, that the will *cannot* accomplish that act of natural virtue, but it is a fact that without this providential benefit it *would not*. Many misunderstandings have arisen because this principle has not been comprehended, and in particular the great medieval theology, which adopted it and made it the basis of its system of liberty, has not been justly appreciated. But many have been afraid of these affirmations which are so sweeping, because they have not grasped the nature of God's gift, which leaves freedom intact. The fact has been too much lost sight of that Augustine distinguishes very explicitly two orders of grace: the grace of natural virtues (the simple gift of Providence, which

prepares efficacious motives for the will); and grace for salutary and supernatural acts, given with the first preludes of faith. The latter is the grace of the sons, *gratia filiorum*; the former is the grace of all men, a grace which even strangers and infidels (*fili concubinarum*, as St. Augustine says) can receive (De Patientiâ, xxvii, n. 28).

(b) The second principle, the affirmation of liberty even under the action of efficacious grace, has always been safeguarded, and there is not one of his anti-Pelagian works even of the latest, which does not positively proclaim a complete power of choice in man; "not but what it does not depend on the free choice of the will to embrace the faith or reject it, but in the elect this will is prepared by God" (De Prædest. SS., n. 10). The great Doctor did not reproach the Pelagians with requiring a power to choose between good and evil; in fact he proclaims with them that without that power there is no responsibility, no merit, no demerit; but he reproaches them with exaggerating this power. Julian of Eclanum, denying the sway of concupiscence, conceives free will as a balance in perfect equilibrium. Augustine protests: this absolute equilibrium existed in Adam; it was destroyed after original sin; the will has to struggle and react against an inclination to evil, but it remains mistress of its choice (*Opus imperfectum contra Julianum*, III, cxvii). Thus, when he says that we have lost freedom in consequence of the sin of Adam, he is careful to explain that this lost freedom is not the liberty of choosing between good and evil, because without it we could not help sinning, but the perfect liberty which was calm and *without struggle*, and which was enjoyed by Adam in virtue of his original integrity.

But is there not between these two principles an irremediable antinomy? On the one hand, there is affirmed an absolute and unreserved power in God of directing the choice of our will, of converting every hardened sinner, or of letting every created will harden itself; and on the other hand, it is affirmed that the rejection or acceptance of grace or of temptation depends on our free will. Is not this a contradiction? Very many modern critics, among whom are Loofs and Harnack, have considered these two affirmations as irreconcilable. But it is because, according to them, Augustinian grace is an irresistible impulse given by God, just as in the absence of it every temptation inevitably overcomes the will. But in reality all antinomy disappears if we have the key of the system; and this key is found in the third principle: the Augustinian explanation of the Divine government of wills, a theory so original, so profound, and yet absolutely unknown to the most perspicacious critics, Harnack, Loofs, and the rest.

Here are the main lines of this theory: The will never decides without a motive, without the attraction of some good which it perceives in the object. Now, although the will may be free in presence of every motive, still, as a matter of fact it takes different resolutions according to the different motives presented to it. In that is the whole secret of the influence exercised, for instance, by eloquence (the orator can do no more than present motives), by meditation, or by good reading. What a power over the will would not a man possess who could, at his own pleasure, at any moment, and in the most striking manner, present this or the other motive of action?—But such is God's privilege. St. Augustine has remarked that *man is not the master of his first thoughts*; he can exert an influence on the course of his reflexions, but he himself cannot determine the objects, the images, and, consequently, the motives which present themselves to his mind. Now, as chance is only a word, it is God who determines at His pleasure these first perceptions of men,

either by the prepared providential action of exterior causes, or interiorly by a Divine illumination given to the soul.—Let us take one last step with Augustine: Not only does God send at His pleasure those attractive motives which inspire the will with its determinations, but, before choosing between these illuminations of the natural and the supernatural order, *God knows the response which the soul, with all freedom, will make to each of them.* Thus, in the Divine knowledge, there is for each created will an indefinite series of motives which *de facto* (but very freely) win the consent to what is good. God, therefore, can, at His pleasure, obtain the salvation of Judas, if He wishes, or let Peter go down to perdition. No freedom, as a matter of fact, will resist what He has planned, although it always keeps the power of going to perdition. Consequently, it is God alone, in His perfect independence, who determines, by the choice of such a motive or such an inspiration (of which he knows the future influence), whether the will is going to decide for good or for evil. Hence, the man who has acted well must thank God for having sent him an inspiration which was foreseen to be efficacious, while that favour has been denied to another. *A fortiori*, every one of the elect owes it to the Divine goodness alone that he has received a series of graces which God saw to be infallibly, though freely, bound up with final perseverance.

Assuredly we may reject this theory, for the Church, which always maintains the two principles of the absolute dependence of the will and of freedom, has not yet adopted as its own this reconciliation of the two extremes. We may ask where and how God knows the effect of these graces. Augustine has always affirmed the fact; he has never inquired about the mode; and it is here that Molinism has added to and developed his thoughts, in attempting to answer this question. But can the thinker, who created and until his dying day maintained this system which is so logically concatenated, be accused of fatalism and Manichæism?

It remains to be shown that our interpretation exactly reproduces the thought of the great Doctor. The texts (indicated in Vacant's "Dict. de théologie catholique", I, col. 2390 sqq.) are too numerous and too long to be reproduced here. But there is one work of Augustine, dating from the year 397, in which he clearly explains his thought—a work which he not only did not disavow later on, but to which in particular he referred, at the end of his career, those of his readers who were troubled by his constant affirmation of grace. For example, to the monks of Adrumetum who thought that liberty was irreconcilable with this affirmation, he addressed a copy of this book "*De Diversis questionibus ad Simplicianum*", feeling sure that their doubts would be dissipated. There, in fact, he formulates his thoughts with great clearness. Simplician had asked how he should understand the Epistle to the Romans ix, on the predestination of Jacob and Esau. Augustine first lays down the fundamental principle of St. Paul, that *every good will comes from grace*, so that no man can take glory to himself for his merits, and this grace is so sure of its results that human liberty will never in reality resist it, although it has the power to do so. Then he affirms that this *efficacious* grace is not necessary for us to be able to act well, but because, in fact, without it *we would not wish to act well.* From that arises the great difficulty: How does the power of resisting grace fit in with the certainty of the result? And it is here that Augustine replies: There are many ways of inviting faith. Souls being differently disposed, *God knows what invitation will be accepted*, what other will not be accepted. Only those are the elect for whom God chooses the invitation which is foreseen to be efficacious, but God could convert them all: "*Cujus autem miseretur,*

*sic eum vocat, quomodo scit ei congruere ut vocanten non respuat*" (op. cit., I, q. ii, n. 2, 12, 13).

Is there in this a vestige of an *irresistible grace* or of that impulse against which *it is impossible to fight*, forcing some to good, and others to sin and hell? It cannot be too often repeated that this is not an idea flung off in passing, but a fundamental explanation which if not understood leaves us in the impossibility of grasping anything of his doctrine; but if it is seized Augustine entertains no feelings of uneasiness on the score of freedom. In fact he supposes freedom everywhere, and reverts incessantly to that knowledge on God's part which precedes predestination, directs it, and assures its infallible result. In the "*De Dono perseverantiae*" (xvii, n. 42), written at the end of his life, he explains the whole of predestination by the choice of the vocation which is foreseen as efficacious. Thus is explained the chief part attributed to that external providence which prepares, by ill health, by warnings, etc., the good thoughts which it knows will bring about good resolutions. Finally, this explanation alone harmonizes with the moral action which he attributes to victorious grace. Nowhere does Augustine represent it as an irresistible impulse impressed by the stronger on the weaker. It is always an appeal, an invitation which attracts and seeks to persuade. He describes this attraction, which is without violence, under the graceful image of dainties offered to a child, green leaves offered to a sheep (In Joannem, tract. xxvi, n. 5). And always the infallibility of the result is assured by the Divine knowledge which directs the choice of the invitation.

(4) The Augustinian predestination presents no new difficulty if one has understood the function of this Divine knowledge in the choice of graces. The problem is reduced to this: Does God in his creative decree and, before any act of human liberty, determine by an immutable choice the elect and the reprobate?—Must the elect during eternity thank God only for having rewarded their merits, or must they also thank Him for having, prior to any merit on their part, chosen them to the meriting of this reward? One system, that of the Semipelagians, decides in favour of man: God predestines to salvation all alike, and gives to all an *equal measure of grace*; human liberty alone decides whether one is lost or saved; from which we must logically conclude (and they really insinuated it) that the number of the elect is not fixed or certain. The opposite system, that of the Predestinationists (the Semipelagians falsely ascribed this view to the Doctor of Hippo), affirms not only a privileged choice of the elect by God, but at the same time (a) the predestination of the reprobate to hell and (b) the absolute powerlessness of one or the other to escape from the *irresistible impulse* which drags them either to good or to evil. This is the system of Calvin.

Between these two extreme opinions Augustine formulated (not invented) the Catholic dogma, which affirms these two truths at the same time: (a) the eternal choice of the elect by God is very real, very gratuitous, and constitutes the grace of graces; (b) but this decree does not destroy the Divine will to save all men, which, moreover, is not realized except by the human liberty that leaves to the elect full power to fall and to the non-elect full power to rise. Here is how the theory of St. Augustine, already explained, forces us to conceive of the Divine decree: Before all decision to create the world, the infinite knowledge of God presents to Him all the graces, and different series of graces, which He can prepare for each soul, along with the consent or refusal which would follow in each circumstance, and that in millions and millions of possible combinations. Thus He sees that if Peter had received such another grace, he would not have been converted; and if or

the contrary such another Divine appeal had been heard in the heart of Judas, he would have done penance and been saved. Thus, for each man in particular there are in the thought of God, limitless possible histories, some histories of virtue and salvation, others of crime and damnation; and God will be free in choosing such a world, such a series of graces, and in determining the future history and final destiny of each soul. And this is precisely what He does when, among all possible worlds, by an absolutely free act, He decides to realize the actual world with all the circumstances of its historic evolutions, with all the graces which in fact have been and will be distributed until the end of the world, and consequently with all the elect and all the reprobate who God foresaw would be in it if *de facto* He created it.

Now in the Divine decree, according to Augustine, and according to the Catholic Faith on this point, which has been formulated by him, the two elements pointed out above appear: (a) The certain and gratuitous choice of the elect—God decreeing, indeed, to create the world and to give it such a series of graces with such a concatenation of circumstances as should bring about freely, but infallibly, such and such results (for example, the despair of Judas and the repentance of Peter), decides, at the same time, the name, the place, the number of the citizens of the future heavenly Jerusalem. The choice is immutable; the list closed. It is evident, indeed, that only those of whom God knows beforehand that they will wish to co-operate with the grace decreed by Him will be saved. It is a *gratuitous* choice, the gift of gifts, in virtue of which even our merits are a gratuitous benefit, a gift which precedes all our merits. No one, in fact, is able to merit this election. God could, among other possible worlds, have chosen one in which other series of graces would have brought about other results. He saw combinations in which Peter would have been impenitent and Judas converted. It is therefore *prior* to any merit of Peter, or any fault of Judas, that God decided to give them the graces which saved Peter and not Judas. God does not wish to give paradise *gratuitously* to any one; but He gives *very gratuitously* to Peter the graces with which He knows Peter will be saved.—Mysterious choice! Not that it interferes with liberty, but because to this question: Why did not God, seeing that another grace would have saved Judas, give it to him? Faith can only answer, with Augustine: O Mystery! O Altitude! (De Spiritu et littera, xxxiv, n. 60).—(b) But this decree includes also the second element of the Catholic dogma: the very sincere will of God to give to all men the power of saving themselves and the power of damning themselves. According to Augustine, God, in his creative decree, has expressly excluded every order of things in which grace would deprive man of his liberty, every situation in which man would not have the power to resist sin, and thus Augustine brushes aside that predestinationism which has been attributed to him. Listen to him speaking to the Manichæans: "All can be saved if they wish"; and in his "Retractions" (I, x), far from correcting this assertion, he confirms it emphatically: "It is true, entirely true, that all men can, if they wish". But he always goes back to the providential preparation. In his sermons he says to all: "It depends on you to be elect" (In Ps. cxx, n. 11, etc.); "Who are the elect?—You, if you wish it" (In Ps. lxxiii, n. 5). But, you will say, according to Augustine, the lists of the elect and reprobate are closed. Now if the non-elect can gain heaven, if all the elect can be lost, why should not some pass from one list to the other? You forget the celebrated explanation of Augustine: When God made His plan, He knew *infallibly*, before His choice, what would be the response of the wills

of men to His graces. If, then, the lists are definitive, if no one will pass from one series to the other, it is not because *anyone cannot* (on the contrary, all can), it is because God knew with infallible knowledge that *no one would wish to*. Thus I cannot effect that God should destine me to another series of graces than that which He has fixed, but, with this grace, if I do not save myself it will not be because I am not able, but because I do not wish to.

Such are the two essential elements of Augustinian and Catholic predestination. This is the dogma common to all the schools, and formulated by all theologians: *predestination in its entirety is absolutely gratuitous (ante merita)*. We have to insist on this, because many have seen in this immutable and gratuitous choice only a hard thesis peculiar to St. Augustine, whereas it is pure dogma (barring the mode of conciliation, which the Church still leaves free). With that established, the long debates of theologians on special predestination to glory *ante* or *post merita* are far from having the importance that some attach to them. (For a fuller treatment of this subtle problem see the "Dict. de théol. cath., I, coll. 2402 sqq.") I do not think St. Augustine entered that debate; in his time, only dogma was in question. But it does not seem historically permissible to maintain, as many writers have, that Augustine first taught the milder system (*post merita*), up to the year 416 (In Joan. evang., tract. xii, n. 12), and that afterwards, towards 418, he shifted his ground and went to the extreme of harsh assertion, amounting even to predestinationism. We repeat, the facts absolutely refute this view. The ancient texts, even of 397, are as affirmative and as categorical as those of his last years, as critics like Loofs and Reuter have shown. If, therefore, it is shown that at that time he inclined to the milder opinion, there is no reason to think that he did not persevere in that sentiment.

(5) The part which Augustine had in the doctrine of Original Sin has been brought to light and determined only recently.

In the first place, it is no longer possible to maintain seriously, as was formerly the fashion (even among certain Catholics, like Richard Simon), that Augustine invented in the Church the hitherto unknown doctrine of original sin, or at least was the first to introduce the idea of punishment and sin. Dorner himself (Augustinus, p. 146) disposed of this assertion, which lacks verisimilitude. In this doctrine of the primal fall Augustine distinguished, with greater insistency and clearness than his predecessors, the *punishment* and the *sin*—the chastisement which strips the children of Adam of all the original privileges—and the fault, which consists in this, that the crime of Adam, the cause of the fall is, without having been committed personally by his children, nevertheless in a certain measure imputed to them, in virtue of the moral union established by God between the head of the human family and his descendants.

To pretend that in this matter Augustine was an innovator, and that before him the Fathers affirmed the punishment of the sin of Adam in his sons, but did not speak of the fault, is a historical error now proved to demonstration. We may discuss the thought of this or that pre-Augustinian Father, but, taking them as a whole, there is no room for doubt. The Protestant R. Seeberg (Lehrbuch der Dogmengeschichte, I, p. 256), after the example of many others, proclaims it by referring to Tertullian, Commodian, St. Cyprian, and St. Ambrose. The expressions, *fault, sin, stain (culpa, peccatum, macula)* are repeated in a way to dispel all doubt. The truth is that original sin, while being sin, is of a nature essentially different from other faults, and does not exact a *personal act* of the will of the children of Adam in order to be responsible for the fault of their father

which is morally imputed to them. Consequently, the Fathers—the Greeks especially—have insisted on its penal and afflictive character, which is most in evidence, while Augustine was led by the polemics of the Pelagians (and only by them) to lay emphasis on the moral aspect of the fault of the human race in its first father.

With regard to Adam's state before the fall Augustine not only affirmed, against Pelagius, the gifts of immortality, impassibility, integrity, freedom from error, and, above all, the sanctifying grace of Divine adoption, but he emphasized its absolutely gratuitous and supernatural character. Doubtless, considering the matter historically and *de facto*, it was only the sin of Adam that inflicted death on us—Augustine repeats it again and again—because God had safeguarded us against the law of our nature. But *de jure* neither immortality nor the other graces were our due, and Augustine recognized this in affirming that God could have made the condition in which we were actually born the primitive condition of our first parents. That assertion alone is the very reverse of Jansenism. It is, moreover, formally confirmed in the "Retractations" (I, ix, n. 6).

(6) Does this mean that we must praise everything in St. Augustine's explanation of grace?—Certainly not. And we shall note the improvements made by the Church, through her doctors, in the original Augustinianism. Some exaggerations have been abandoned, as, for instance, the condemnation to hell of children dying without baptism. Obscure and ambiguous formulæ have been eliminated. We must say frankly that Augustine's literary method of emphasizing his thought by exaggerated expressions, issuing in troublesome paradoxes, has often obscured his doctrine, aroused opposition in many minds, or led them into error. Also, it is above all important, in order to comprehend his doctrine, to compile an Augustinian dictionary, not *a priori*, but after an objective study of his texts. The work would be long and laborious, but how many prejudices it would dispel!

The Protestant historian Ph. Schaff (St. Augustine, p. 102) writes: "The great genius of the African Church, from whom the Middle Ages and the Reformation have received an impulse alike powerful, though in different directions, has not yet fulfilled the work marked out for him in the counsels of Divine Wisdom. He serves as a bond of union between the two antagonistic sections of Western Christendom, and encourages the hope that a time may come when the injustice and bitterness of strife will be forgiven and forgotten, and the discords of the past be drowned forever in the sweet harmonies of perfect knowledge and perfect love". May this dream be realized!

V. AUGUSTINISM IN HISTORY.—The influence of the Doctor of Hippo has been so exceptional in the Church, that, after having indicated its general characteristics (see above), it is proper to indicate the principal phases of the historical development of his doctrine. The word *Augustinism* designates at times the entire group of philosophical doctrines of Augustine, at others, it is restricted to his system of grace. Hence, (1) philosophical Augustinism; (2) theological Augustinism on grace; (3) laws which governed the mitigation of Augustinism.

(1) *Philosophical Augustinism*.—In the history of philosophical Augustinism we may distinguish three very distinct phases. First, the period of its almost exclusive triumph in the West, up to the thirteenth century. During the long ages which were darkened by the invasion of the barbarians, but which were nevertheless burdened with the responsibility of safeguarding the sciences of the future, we may say that Augustine was the Great Master of the West. He was absolutely without a rival, or if there was one,

it was one of his disciples, Gregory the Great, who, after being formed in his school, popularized his theories. The rôle of Origen, who engrafted neo-Platonism on the Christian schools of the East, was that of Augustine in the West, with the difference, however, that the Bishop of Hippo was better able to detach the truths of Platonism from the dreams of Oriental imagination. Hence, a current of Platonic ideas was started which will never cease to act upon Western thought. This influence shows itself in various ways. It is found in the compilers of this period, who are so numerous and so well deserving of recognition—such as Isidore, Bede, Alcuin—who drew abundantly from the works of Augustine, just as did the preachers of the sixth century, and notably St. Cæsarius. In the controversies, especially in the great disputes of the ninth and twelfth centuries on the validity of Simoniacal ordinations, the text of Augustine plays the principal part. Carl Mirbt has published on this point a very interesting study: "Die Stellung Augustins in der Publizistik des gregorianischen Kirchenstreits" (Leipzig, 1888). In the pre-Thomistic period of Scholasticism, then in process of formation, namely, from Anselm to Albert the Great, Augustine is the great inspirer of all the masters, such as Anselm, Abelard, Hugo of St. Victor, who is called by his contemporaries, another Augustine, or even the soul of Augustine. And it is proper to remark, with Cunningham (Saint Austin, p. 178), that from the time of Anselm the cult of Augustinian ideas exercised an enormous influence on English thought in the Middle Ages. As regards Peter Lombard, his Sentences are little else than an effort to synthesize the Augustinian theories.

While they do not form a system as rigidly bound together as Thomism, yet Father Mandonnet (in his learned study of Siger de Brabant) and M. de Wulf (on Gilles de Lessines) have been able to group these theories together. And here let us present a summary sketch of those theses regarded in the thirteenth century as Augustinian, and over which the battle was fought. First, the fusion of theology and philosophy; the preference given to Plato over Aristotle—the latter representing rationalism, which was mistrusted, whilst the idealism of Plato exerted a strong attraction—wisdom regarded rather as the philosophy of the Good than the philosophy of the True. As a consequence, the disciples of Augustine always have a pronounced tinge of mysticism, while the disciples of St. Thomas may be recognized by their very accentuated intellectualism. In psychology the illuminating and immediate action of God is the origin of our intellectual knowledge (at times it is pure ontologism); and the faculties of the soul are made substantially identical with the soul itself. They are its functions, and not distinct entities (a thesis which was to keep its own partisans in the Scholasticism of the future and to be adopted by Descartes); the soul is a substance even without the body, so that after death, it is truly a person. In cosmology, besides the celebrated thesis of *rationes seminales*, which some have recently attempted to interpret in favour of evolutionism, Augustinism admitted the multiplicity of substantial forms in compound beings, especially in man. But especially in the impossibility of creation *ab æterno*, or the essentially temporal character of every creature which is subject to change, we have one of the ideas of Augustine which his disciples defended with greater constancy and, it would appear, with greater success.

A second period of very active struggles came in the thirteenth century, and this has only lately been recognized. Renan (Averroes, p. 259) and others believed that the war against Thomism, which was just then beginning, was caused by the infatuation of the Franciscans for Averroism; but if the Franciscan Order showed itself on the whole opposed to

St. Thomas, it was simply from a certain horror at philosophical innovations and at the neglect of Augustinism. The doctrinal revolution brought about by Albert the Great and Thomas Aquinas in favour of Aristotle startled the old School of Augustinism among the Dominicans as well as among the Franciscans, but especially among the latter, who were the disciples of the eminent Augustinian doctor, St. Bonaventure. This will explain the condemnations, hitherto little understood, of many propositions of St. Thomas Aquinas three years after his death, on the 7th of March, 1277, by the Bishop of Paris, and on the 18th of March, 1277, by the Archbishop of Canterbury, Robert Kilwardby, a Dominican. The Augustinian school represented tradition; Thomism, progress. The censure of 1277 was the last victory of a too rigid Augustinism. The happy fusion of the two methods in the two orders of Franciscans and Dominicans little by little brought about an agreement on certain points without excluding differences on others which were yet obscure (as, for instance, the unity or the multiplicity of forms), at the same time that it made for progress in all the schools. We know that the canonization of St. Thomas caused the withdrawal of the condemnations of Paris (14 February, 1325). Moreover, the wisdom or the moderation of the new school contributed powerfully to its triumph. Albert the Great and St. Thomas, far from being adversaries of St. Augustine, as they were reported to be, placed themselves in his school, and while modifying certain theories, took over into their system the doctrine of the African bishop. How many articles in the "Summa" of St. Thomas have no other object than to incorporate in theology this or the other theory which was cherished by St. Augustine (to take only one example, that of exemplar ideas in God). Hence, there was no longer any school strictly Augustinian, because every school was such. They all eliminated certain special points and retained the same veneration for the master.

From the third period of the fifteenth century to our days we see less of the special progress of philosophical Augustinism than certain tendencies of an exaggerated revival of Platonism. In the fifteenth century Bessarion (1472) and Marsilio Ficino (1499) used Augustine's name for the purpose of enthroning Plato in the Church and excluding Aristotle. In the seventeenth century, it is impossible to deny certain resemblances between Cartesianism and the philosophy of St. Augustine. Malebranche was wrong in ascribing his own ontologism to the great Doctor, as were also many of his successors in the nineteenth century.

(2) *Theological Augustinism*.—The history of Augustine's system of grace seems to blend almost indistinguishably with the progressive developments of this dogma. Here it must suffice, first, to enumerate the principal phases; secondly, to trace the general laws of development which mitigated Augustinism in the Church.

After the death of Augustine, a whole century of fierce contests (430-529) ended in the triumph of moderate Augustinism. In vain had Pope St. Celestine (431) sanctioned the teachings of the Doctor of Hippo. The Semipelagians of the south of France could not understand the predilection of God for the elect, and in order to attack the works of St. Augustine they made use of the occasionally exaggerated formulæ of St. Fulgentius, or of the real errors of certain isolated predestinationists, as, for example, Lucidus, who was condemned in the Council of Arles (475). Happily, Prosper of Aquitaine, by his moderation, and also the unknown author of "*De Vocatione omnium gentium*", by his consoling thesis on the appeal addressed to all, opened the way to an agreement. And finally, St. Cæsarius of Arles obtained from Pope Felix IV a series of *Capitula* which were

solemnly promulgated at Orange, and gave their consecration to the triumph of Augustinism (529). In the ninth century, a new victory was gained over the predestinationism of Gottschalk in the assemblies of Savonnières and Toucy (859-860). The doctrine of the Divine will to save all men and the universality of redemption was thus consecrated by the public teaching of the Church. In the Middle Ages these two truths are developed by the great Doctors of the Church. Faithful to the principles of Augustinism, they place in especial relief his theory on Divine Providence, which prepares at its pleasure the determinations of the will by exterior events and interior inspirations.

In the fourteenth century a strong current of predestinationism is evident. To-day it is admitted that the origin of this tendency goes back to Thomas Bradwardin, a celebrated professor of Oxford, who died Archbishop of Canterbury (1349), and whom the best critics, along with Loofs and Harnack, recognize to have been the inspirer of Wyclif himself. His book "*De causâ Dei contra Pelagium*" gave rise in Paris to disputes on Augustinian "*predetermination*", a word which, it had been thought, was invented by Banes in the sixteenth century. In spite of the opposition of theologians, the idea of absolute determinism in the name of St. Augustine was adopted by Wyclif (1324-87), who formulated his universal fatalism, the necessity of good for the elect and of evil for the rest. He fancied that he found in the Augustinian doctrine the strange conception which became for him a central doctrine that overthrew all morality and all ecclesiastical, and even civil, government. According as one is predestined or not, everything changes its nature. The same sins are mortal in the non-elect which are venial in the predestined. The same acts of virtue are meritorious in the predestined, even if he be actually a wicked man which are of no value in the non-elect. The sacraments administered by one who is not predestined are always invalid; more than that, no jurisdiction exists in a prelate, even a pope, if he be not predestined. In the same way, there is no power, even civil or political, in a prince who is not one of the elect, and no right of property in the sinner or the non-elect. Such is the basis on which Wyclif established the communism which aroused the socialist mobs in England. It is incontestable that he was fond of quoting Augustine as his authority; and his disciples, as we are assured by Thomas Netter Waldensis (*Doctrinale*, I, xxxiv, § 5), were continually boasting of the profound knowledge of their great Doctor, whom they called with emphasis "*John of Augustine*". Shirley, in his introduction to "*Zizaniorum Fasciculi*", has even pretended that the theories of Wyclif on God, on the Incarnation, and even on property, were the purest Augustinian inspiration, but even a superficial comparison, if this were the place to make it, would show how baseless such an assertion is. In the sixteenth century the heritage of Wyclif and Hus, his disciple, was always accepted in the name of Augustinism by the leaders of the Reformation. Divine predestination from all eternity separating the elect, who were to be snatched out of the mass of perdition, from the reprobate who were destined to hell, as well as the irresistible impulse of God drawing some to salvation and others to sin—such was the fundamental doctrine of the Reformation. Calvinism even adopted a system which was "logically more consistent, but practically more revolting", as Schaff puts it (St. Augustine, p. 104), by which the decree of reprobation of the non-elect would be independent of the fall of Adam and of original sin (*Supralapsarianism*). It was certain that these harsh doctrines would bring their reaction, and in spite of the severities of the Synod of Dordrecht, which it would be interesting

to compare with the Council of Trent in the matter of moderation, Arminianism triumphed over the Calvinistic thesis.

We must note here that even Protestant critics, with a loyalty which does them honour, have in these latter times vindicated Augustine from the false interpretations of Calvin. Dörner, in his "Gesch. der prot. Theologie", had already shown the instinctive repugnance of Anglican theologians to the horrible theories of Calvin. W. Cunningham (Saint Austin, p. 82 sqq.) has very frankly called attention to the complete doctrinal opposition on fundamental points which exists between the Doctor of Hippo and the French Reformers. In the first place, as regards the state of human nature, which is, according to Calvin, totally depraved, for Catholics it is very difficult to grasp the Protestant conception of original sin which, for Calvin and Luther, is not, as for us, the moral degradation and the stain imprinted on the soul of every son of Adam by the fault of the father which is imputable to each member of the family. It is not the deprivation of grace and of all other supernatural gifts; it is not even concupiscence, understood in the ordinary sense of the word, as the struggle of base and selfish instincts against the virtuous tendencies of the soul; it is a profound and complete subversion of human nature; it is the physical alteration of the very substance of our soul. Our faculties, understanding, and will, if not entirely destroyed, are at least mutilated, powerless, and chained to evil. For the Reformers, original sin is not a sin, it is *the* sin, and the permanent sin, living in us and causing a continual stream of new sins to spring from our nature, which is radically corrupt and evil. For, as our being is evil, every act of ours is equally evil. Thus, the Protestant theologians do not ordinarily speak of the *sins* of mankind, but only of *the sin*, which makes us what we are and defiles everything. Hence arose the paradox of Luther: that even in an act of perfect charity a man sins mortally, because he acts with a vitiated nature. Hence that other paradox: that this sin can never be effaced, but remains entire, even after justification, although it will not be any longer imputed; to efface it, it would be necessary to modify physically this human being which is sin. Calvin, without going so far as Luther, has nevertheless insisted on this total corruption. "Let it stand, therefore, as an indubitable truth which no engines can shake", says he (Institution II, v, § 19), "that the mind of man is so entirely alienated from the righteousness of God that he cannot conceive, desire, or design anything but what is weak, distorted, foul, impure, or iniquitous, that his heart is so thoroughly environed by sin that it can breathe out nothing but corruption and rottenness; that if some men occasionally make a show of goodness, their mind is ever interwoven with hypocrisy and deceit, their soul inwardly bound with the fetters of wickedness". "Now", says Cunningham, "this doctrine, whatever there may be to be said for it, is not the doctrine of Saint Austin. He held that sin is the defect of a good nature which retains elements of goodness, even in its most diseased and corrupted state, and he gives no countenance, whatever to this modern opinion of total depravity". It is the same with Calvin's affirmation of the irresistible action of God on the will. Cunningham shows that these doctrines are irreconcilable with liberty and responsibility, whereas, on the contrary, "St. Austin is careful to attempt to harmonize the belief in God's omnipotence with human responsibility" (St. Austin, p. 86). The Council of Trent was therefore faithful to the true spirit of the African Doctor, and maintained pure Augustinism in the bosom of the Church, by its definitions against the two opposite excesses. Against Pelagianism it reaffirmed original sin and the absolute necessity of grace

(Sess. VI, can. 2); against Protestant predestinationism it proclaimed the freedom of man, with his double power of resisting grace (*posse dissentire si velit*—Sess. VI, can. 4) and of doing good or evil, even before embracing the Faith (can. 6 and 7).

In the seventeenth century Jansenism adopted, while modifying it, the Protestant conception of original sin and the state of fallen man. No more than Luther did the Jansenists admit the two orders, natural and supernatural. All the gifts which Adam had received—immortality, knowledge, integrity, sanctifying grace—are absolutely required by the nature of man. Original sin is, therefore, again regarded as a profound alteration of human nature. From which the Jansenists conclude that the key to St. Augustine's system is to be found in the essential difference of the Divine government and of grace, before and after the Fall of Adam. Before the Fall Adam enjoyed complete liberty, and grace gave him the power of resisting or obeying; after the Fall there was no longer in man liberty properly so called; there was only spontaneity (*libertas a coactione*, and not *libertas a necessitate*). Grace, or delectation in the good, is essentially efficacious, and necessarily victorious once it is superior in degree to the opposite concupiscence. The struggle, which was prolonged for two centuries, led to a more profound study of the Doctor of Hippo and prepared the way for the definite triumph of Augustinism, but of an Augustinism mitigated in accordance with laws which we must now indicate.

(3) *Laws which governed the mitigation of Augustinism.*—In spite of what Protestant critics may have said, the Church has always been faithful to the fundamental principles defended by Augustine against the Pelagians and Semipelagians, on original sin, the necessity and gratuity of grace, the absolute dependence on God for salvation. Nevertheless, great progress was made along the line of gradual mitigation. For it cannot be denied that the doctrine formulated at Trent, and taught by all our theologians, produces an impression of greater suavity and greater clarity than this or that passage in the works of St. Augustine. The causes of this softening down, and the successive phases of this progress were as follows:—

First, theologians began to distinguish more clearly between the natural order and the supernatural, and hence the Fall of Adam no longer appeared as a corruption of human nature in its constituent parts; it is the loss of the whole order of supernatural elevation. St. Thomas (Summa, I, Q. lxxxv, a. 1) formulates the great law of the preservation, in guilty Adam's children, of all the faculties in their essential integrity: "Sin (even original) neither takes away nor diminishes the natural endowments". Thus the most rigorist Thomists, Alvarez, Lemos, Contenson, agree with the great Doctor that the sin of Adam has not enfeebled (*intrinsece*) the natural moral forces of humanity.

Secondly, such consoling and fundamental truths as God's desire to save all men, and the redeeming death of Christ which was really offered and accepted for all peoples and all individuals—these truths, which Augustine never denied, but which he left too much in the background and as it were hidden under the terrible formulas of the doctrine of predestination, have been placed in the full light, have been developed, and applied to infidel nations, and have at last entered into the ordinary teaching of theology. Thus our Doctors, without detracting in the least from the sovereignty and justice of God, have risen to the highest idea of His goodness: that God so sincerely desires the salvation of all as to give absolutely to all, immediately or mediately, the means necessary for salvation, and always with the desire that man should consent to employ those

means. No one falls into hell except by his own fault. Even infidels will be accountable for their infidelity. St. Thomas expresses the thought of all when he says: "It is the common teaching that if a man born among the barbarous and infidel nations really does what lies in his power, God will reveal to him what is necessary for salvation, either by interior inspirations or by sending him a preacher of the Faith" (In Lib. II Sententiarum, dist. 23, Q. viii, a. 4, ad 4<sup>am</sup>). We must not dissemble the fact that this law changes the whole aspect of Divine Providence, and that St. Augustine had left it too much in the shade, insisting only upon the other aspect of the problem: namely, that God, while making a sufficing appeal to all, is nevertheless not bound to choose always that appeal which shall in fact be efficacious and shall be accepted, provided that the refusal of consent be due to the obstinacy of the sinner's will and not to its lack of power. Thus the Doctors most eagerly approved the axiom, *Facienti quod in se est Deus non denegat gratiam*—God does not refuse grace to one who does what he can.

Thirdly, from principles taught by Augustine consequences have been drawn which are clearly derived from them, but which he had not pointed out. Thus it is incontestably a principle of St. Augustine that no one sins in an act which he cannot avoid—"Quis enim peccat in eo quod caveri non potest?" This passage from "De libero arbitrio" (III, xviii, n. 50) is anterior to the year 395; but far from retracting it he approves and explains it, in 415, in the "De naturâ et gratiâ", lxvii, n. 80. From that pregnant principle theologians have concluded, first, that grace sufficient to conquer temptations never fails anyone, even an infidel; then, against the Jansenists, they have added that, to deserve its name of *sufficient grace*, it ought to give a real power which is complete, even relatively to the actual difficulties. No doubt theologians have groped about, hesitated, even denied; but to-day there are very few who would dare not to recognize in St. Augustine the affirmation of the possibility of not sinning.

Fourthly, certain secondary assertions, which enumerated, but did not make part of the dogma, have been lopped off from the doctrine of Augustine. Thus the Church, which, with Augustine, has always denied entrance into Heaven to unbaptized children, has not adopted the severity of the great Doctor in condemning such children to bodily pains, however slight. And little by little the milder teaching of St. Thomas was to prevail in theology and was even to be vindicated against unjust censure when Pius VI condemned the pseudo-synod of Pistoja. At last Augustine's obscure formulæ were abandoned or corrected, so as to avoid regrettable confusions. Thus the expressions which seemed to identify original sin with concupiscence have given way to clearer formulæ without departing from the real meaning which Augustine sought to express.

Discussion, however, is not yet ended within the Church. On most of those points which concern especially the manner of the Divine action Thomists and Molinists disagree, the former holding out for an irresistible predetermination, the latter maintaining, with Augustine, a grace whose infallible efficacy is revealed by the Divine knowledge. But both of these views affirm the grace of God and the liberty of man. The lively controversies aroused by the "Concordia" of Molina (1588) and the long conferences *de auxiliis* held at Rome, before Popes Clement VIII and Paul V, are well known. There is no doubt that a majority of the theologian-consultors thought they discovered an opposition between Molina and St. Augustine. But their verdict was not approved, and (what is of great importance in the history of Augustinism) it is certain that they asked for the con-

demnation of doctrines which are to-day universally taught in all the schools. Thus, in the project of censure reproduced by Serry ("Historia Congregationis de Auxiliis", append., p. 166) the first proposition is this: "In statu naturæ lapsæ potest homo, cum solo concursu generali Dei, efficere opus bonum morale, quod in ordine ad finem hominis naturalem sit veræ virtutis opus, referendo illud in Deum, sicut referri potest ac debet in statu naturali" (In the state of fallen nature man can with only the general *concursus* of God do a good moral work which may be a work of true virtue with regard to the natural end of man by referring it to God, as it can and ought to be referred in the natural state). Thus they sought to condemn the doctrine held by all the Scholastics (with the exception of Gregory of Rimini), and sanctioned since then by the condemnation of Proposition lvii of Baius. For a long time it was said that the pope had prepared a Bull to condemn Molina; but to-day we learn from an autograph document of Paul V that liberty was left to the two schools until a new Apostolic decision was given (Schneeman "Controversiarum de Div. grat.", 1881, p. 289). Soon after, a third interpretation of Augustinism was offered in the Church, that of Noris, Belleli, and other partisans of moral predetermination. This system has been called *Augustinianism*. To this school belong a number of theologians who, with Thomassin, essayed to explain the infallible action of grace without admitting either the *scientia media* of the Molinists or the physical predetermination of the Thomists. A detailed study of this interpretation of St. Augustine may be found in Vacant's "Dictionnaire de théologie catholique", I, cols. 2485-2501; here I can only mention one very important document, the last in which the Holy See has expressed its mind on the various theories of theologians for reconciling grace and liberty. This is the Brief of Benedict XIV (13 July, 1748) which declares that the three schools—Thomist, Augustinian (Noris), and Molinist—have full right to defend their theories. The Brief concludes with these words: "This Apostolic See favours the liberty of the schools; none of the systems proposed to reconcile the liberty of man with the omnipotence of God has been thus far condemned (op. cit., col. 2555).

In conclusion we must indicate briefly the official authority which the Church attributes to St. Augustine in the questions of grace. Numerous and solemn are the eulogies of St. Augustine's doctrine pronounced by the popes. For instance, St. Gelasius I (1 November, 493), St. Hormisdas (13 August, 520) Boniface II and the Fathers of Orange (529), John II (534), and many others. But the most important document, that which ought to serve to interpret all the others, because it precedes and inspires them, is the celebrated letter of St. Celestine I (431), in which the pope guarantees not only the orthodoxy of Augustine against his detractors, but also the great merit of his doctrine: "So great was his knowledge that my predecessors have always placed him in the rank of the masters", etc. This letter is accompanied by a series of ten dogmatic *capitula* the origin of which is uncertain, but which have always been regarded, at least since Pope Hormisdas, as expressing the faith of the Church. Now these extracts from African councils and pontifical decisions end with this restriction: "As to the questions which are more profound and difficult, and which have given rise to these controversies, we do not think it necessary to impose the solution of them".—In presence of these documents emanating from so high a source, ought we to say that the Church has adopted all the teaching of St. Augustine on grace so that it is never permissible to depart from that teaching? Three answers have been given: (a) For some, the authority of St. Augustine is absolute and irrefragable. The

Jansenists went so far as to formulate, with Havermans, this proposition, condemned by Alexander VIII (7 December, 1690): "Ubi quis invenerit doctrinam in Augustino clare fundatam, illam absolute potest tenere et docere, non respiciendo ad ullam pontificis bullam" (Where one has found a doctrine clearly based on St. Augustine, he can hold and teach it absolutely, without referring to any pontifical Bull). This is inadmissible. None of the pontifical approbations has a meaning so absolute, and the *capitula* make an express reservation for the profound and difficult questions. The popes themselves have permitted a departure from the thought of St. Augustine in the matter of the lot of children dying without baptism (Bull "Auctorem Fidei" 28 August, 1794). (b) Others again have concluded that the eulogies in question are merely vague formulæ leaving full liberty to withdraw from St. Augustine and to blame him on every point. Thus Launo, Richard Simon, and others have maintained that Augustine had been in error on the very gist of the problem, and had really taught predestinationism. But that would imply that for fifteen centuries the Church took as its guide an adversary of its faith. (c) We must conclude, with the greater number of theologians, that Augustine has a real *normative* authority, hedged about, however, with reserves and wise limitations. In the capital questions which constitute the faith of the Church in those matters the Doctor of Hippo is truly the authoritative witness of tradition; for example, on the existence of original sin, the necessity of grace, at least for every salutary act; the gratuitousness of the gift of God which precedes all merit of man because it is the cause of it; the predilection for the elect and, on the other hand, the liberty of man and his responsibility for his transgressions. But the secondary problems, concerning the mode rather than the fact, are left by the Church to the prudent study of theologians. Thus all schools unite in a great respect for the assertions of St. Augustine.

At present this attitude of fidelity and respect is all the more remarkable as Protestants, who were formerly so bitter in defending the predestination of Calvin, are to-day almost unanimous in rejecting what they themselves call "the boldest defiance ever given to reason and conscience" (Grétilat, "Dogmatique", III, p. 329). Schleiermacher, it is true, maintains it, but he adds to it the Origenist theory of universal salvation by the final restoration of all creatures, and he is followed in this by Farrar, Lobstein, Pfister, and others. The Calvinist dogma is to-day, especially in England, altogether abandoned, and often replaced by pure Pelagianism (Beyschlag). But among Protestant critics the best are drawing near to the Catholic interpretation of St. Augustine, as, for example, Grétilat, in Switzerland, and Stevens, Bruce, and Mozley (On the Augustinian Doctrine of Predestination), in England. Sanday (Romans, p. 50) also declares the mystery to be unfathomable for man yet solved by God—"And so our solution of the problem of Free-will, and of the problems of history and of individual salvation, must finally lie in the full acceptance and realization of what is implied by the infinity and the omniscience of God". These concluding words recall the true system of Augustine and permit us to hope that at least on this question there may be a union of the two Churches in a wise Augustinism.

WORKS ON THE LIFE OF ST. AUGUSTINE.—The chief original sources are his own *Confessions* and his life (*Vita S. Aurelii Augustini*) by his friend POSSIDIUS, in Vol. XI of the Benedictine edition (P. L., XXXII); for learned illustration of the text of Possidius see the Bollandists CUPER and STRILING in *Acta SS.* (1743), August, VI.—Among the principal modern biographies of the saint the following are worthy of mention: *Vita S. Aug. ex ejus potissimum scriptis concinnata* (by his Benedictine editors, very accurate, based on the notes of TILLEMONT; P. L., XXXII); KLOTH, *Der hl. Kirchenlehrer, S. Augustin* (Aachen, 1840); FOUJOLAT, *Histoire de S. Augustin, sa vie, ses œuvres, son siècle* (Paris, 1845-46); BINDEMANN,

*Der hl. Augustin* (Berlin, Leipzig, Greifswald, 1844-69); MORIARTY, *The Life of St. Augustine, Bishop, Confessor, and Doctor of the Church* (Philadelphia, 1879); BOURKE, *Life and Labours of St. Augustine* (Dublin and London, 1880); COLLETTE, *St. Augustine, a Sketch of his Life and Writings as Affecting his Controversy with Rome* (London, 1882); SCHAFF, *Saint Augustine, Melancthon, Neander* (New York, 1886); SPALDING, *The Influence of St. Augustine's Teaching* (New York, 1886); CUNNINGHAM, *St. Austin and His Place in the History of Christian Thought* (London, 1886); BURTON, *St. Augustine: an Historical Study* (Dublin, 1888); CUTTS, *St. Augustine* (London, 1880); SHEEHAN, *Recent Writings on St. Augustine in Dub. Rev.* (1888), XX, 88-107; WOLFSGRUBER, *Augustinus* (Paderborn, 1898), from the notes of RAUSCHER, an excellent study, see ROTTMANNER, *Hist. Jahrb.* (1898), 892-898; VON HERTLING, *Augustin* (Münch., 1902); HERGENROTHER in *Kirchenlex.*, I, 1869-78; LOOPS in *Realencyclopädie* (3d. ed., Leipzig, 1897), II; DORNER in SCHAFF'S *Encyclop. of Relig. Knowledge* (Edinburgh, 1883); FARRAR, *Lives of the Fathers* (London, 1889), II, 298-460; DE PRESENSE in *Dict. of Christian Biogr.*, I, 216-225; HERGENROTHER-KIRSCH, *Kircheng.* (4th ed., 1902), I, 531 sqq.

PATROLOGIES AND HISTORIES OF DOGMA.—FESSLER-JUNGSMANN, *Institut. Patrol.* (Innsbruck, 1890-96), II; BARDEHEWER, *Patrologie* (Freiburg, 1901), 416-447; SCHWANE, *Dogmengesch.* (ibid., 1894), II; HARNACK, *Dogmengeschichte* (ibid., 1897).

HISTORIES OF PHILOSOPHY.—STÖCKL, RITTER, PRANTL, and among the histories of Latin literature, EBERT, *Gesch. der Literatur des Mittelalters* (Leipzig, 1889); VILLEMANT, *Tableau de l'époque chrétienne au quatrième siècle* (Paris, 1849).—The conversion of St. Augustine is the subject of several works, e. g. NAVILLE, *St. Augustin, Etude sur le développement de sa pensée, jusqu'à son ordination* (Geneva, 1872); WÖRTER, *Die Geistesentwicklung des hl. Augustinus bis zu seiner Taufe* (Paderborn, 1892); HARNACK, *Augustinus Confessionen* (Giessen, 1895); BOISSIER, *La Conversion de St. Augustin in Revue des Deux Mondes* (1888), 43-69.—There is a very exhaustive bibliography of St. Augustine in CHEVALIER, *Rép. des sources hist. du moyen âge, Bio-bibliographie* (2nd ed., Paris, 1905), col. 371-381; see the bibliography in McCABE, *St. Augustine* (London, 1902); SCHAFF, *Hist. of the Christian Church* (New York, 5th ed., 1903), 1038-39 sqq.; also the present writer's bibliography in *Dict. de théol. cath.*, I, 2284, 2471, and *passim*. On the *Confessions* of St. Augustine see more particularly *Dub. Rev.* (1839), VII, 430; DOVAIS, *Les Confessions de St. Augustin* (Paris, 1893).

SPECIAL WORKS ON HIS DOCTRINE.—The best general works on St. Augustine are the extensive studies of TILLEMONT, *Mémoires*, etc. (Paris, 1710), XIII 1-1079 and CEILLIER, *Hist. des auteurs ecclésiastiques* (Paris, 1774), XI, and in the second edition (1861), IX. See also ALTICCOZZI, *Summa Augustiniana ex collectis disputatis explicatae sententia D. A. Augustini* (Rome, 1775), a very profound study on the teachings of St. Augustine concerning grace, the Church, the p-p; GANGADY, *Des hl. Augustinus speculative Lehre von Gott dem dreieinigen* (Augsburg, 1866), and *Die metaphysische Psychologie des hl. Augustinus* (ibid., 1882); HEWITT, *Studies in St. Augustine* (New York, 1868).—Among Protestant writers, apart from the already quoted works of BINDEMANN, LOOPS, and HARNACK, we may mention: REUTER, *Augustinische Studien* (Gotha, 1887); DORNER, *Augustinus, sein theologisches System und seine religionsphilosophische Anschauung* (Gotha, 1898); EUCKEN, *Die Lebensanschauungen der grossen Denker* (Leipzig, 1902), 210-245.—For the philosophy of Augustine see NOUTRISSON, *La Philosophie de S. Augustin* (2nd ed. Paris, 1866); VERCELLONE, *Philosophy of St. Augustine and Modern Philosophy in Catholic World* (1870), X, 481; RICKABY, *St. Augustine and Scientific Unbelief in The Month* (1876), XXVIII, 195; STORZ, *Die Philosophie des hl. Augustinus* (Freiburg, 1882); FERRAZ, *De la philosophie de S. Augustin* (Paris, 1862); MARTIN, *S. Augustin* (Paris, 1901); TURNER, *History of Philosophy* (Boston, 1903), 223-233.—For his teaching on the Church see RIBBECK, *Donatus und Augustinus* (Elberfeld, 1858); SPECHT, *Die Lehre von der Kirche nach dem hl. Augustinus* (Paderborn, 1892), an excellent work; BURTON, *St. Augustine and the Donatists in Dub. Rev.* (1893), 379-419; see also *ibid.* (1890), XXIV, 89-109.—On the Scriptural exegesis of St. Augustine see CLAUSEN, *Augustinus sacra Scriptura interpret* (Copenhagen, 1827); LENFANT, *Biblia Augustiniana* (Paris, 1661, 2 vols. folio), a useful concordance of the Scriptural commentaries of St. Augustine according to the order of the Biblical books; IDEM, *Concordantia Augustiniana, sive collectio omnium sententiarum quas sparsim reperitur in S. Aug. operibus* (Paris, 1656, 2 vols. folio); MOIRAN, *Notion Augustinienne de l'herméneutique* (Clermont, 1906); DOVAIS, *St. Augustin et la Bible in Revue Biblique* for 1893-94.—On grace and on Pelagianism: see the seven erudite dissertations of GARNIER added to his edition of MARTINUS MERCATOR (Paris, 1673; P. L., XLVIII); PETAVIUS, *De Pelagianorum et Semipelagianorum heresi* (Paris, 1643); NORIS, *Historia Pelagiana, . . . additis Vindictis Augustiniani* (Padua, 1673); MERLIN, *Véritable clef des ouvrages de S. Augustin contre les Pélagiens in Refutation des critiques, etc.*, de M. Bayle sur S. Augustin (Paris, 1732), F. L., XLV; WIGGAS, *Frugmatische Darstellung des Augustinismus und Pelagianismus* (in two parts; Berlin, 1821, and Hamburg, 1833), the first part tr. by EMERSON (Andover, 1840); WARFIELD, *Two Studies in the History of Doctrine: Augustine and the Pelagian Controversy. The Development of the Doctrine of Infant Salvation* (New York, 1898); ROTTMANNER, *Der Augustinismus* (Münch., 1892); PORTALIS in *Dict. de théol. cath.*, I, 2268-2472, especially

3275-2408; CHEVALIER, *Répertoire des sources hist. du moyen âge* (Bio-bibliographie, Paris, 1905), col. 371-381.

ON AUGUSTINIANISM IN HISTORY.—For philosophical Augustinianism see, besides the above quoted works of MANDONNET and DE WULF, WERNER, *Die Augustinische Psychologie in ihrer mittelalterlichen Einkleidung und Gestaltung* (Vienna, 1882); IDEM, *Der Augustinismus in der Scholastik des späteren Mittelalters* (Vienna, 1883), also other studies of the same author on *Bede*, *Alcuin*, *Guillaume d'Auvergne*, *St. Thomas Aquinas*, *Suarez*; EHRLICH, *Der Augustinismus und der Aristotelismus in der Scholastik gegen Ende des XIII. Jahrhunderts*, in *Archiv für Literatur und Kircheng. des Mittelalters* (1889). For theological Augustinianism see all doctrine-histories. Modern theologians usually exhibit the history of errors concerning Divine grace, e. g. the Thomists LEMOS and BILLUAT, the Molinist SUAREZ, the Sorbonnist Tournely, particularly SCIPIONE MAFEI, *Istoria teologica delle dottrine e delle opinioni corse ne' cinque primi secoli della Chiesa in proposito della divina grazia, del libero arbitrio, e della predestinazione* (Trent, 1742; Latin, Frankfurt, 1756). Cf. also GAILLIARD, *Etude sur l'histoire de la doctrine de la grâce depuis S. Augustin* (Lyons-Paris, 1897); THOMASSIN, *Mémoires sur la grâce, où l'on représente les sentiments de S. Augustin, de S. Thomas, et de presque tous les théologiens jusqu'au concile de Trente, et depuis ce concile des plus célèbres docteurs des universités de l'Europe* (Louvain, 1668), in Latin, *Consensus scholarum de gratia in his Dogmata Theologica* (Paris, 1680), III, or (1870), VI; DUCHESNE, *Le Prédestinarianisme* (Paris, 1724); MOZLEY, *St. Augustine's Doctrine of Predestination* (London, 1855), see *Dub. Rev.* (1856), XL, 67 sqq.; BURTON, *The Augustinian System*, *Dub. Rev.* (1891), XXVI, 48-68; KOCH, *Die Autorität des hl. Augustin in der Lehre von der Gnade und Prädestination in Tub. theol. Quartalschrift* (1891); IDEM, *Der heilige Faustus von Riez* (Stuttgart, 1895).

EUGÈNE PORTALIÉ.

**Augustinian Canons and Canonesses.** See CANONS AND CANONESSES, REGULAR.

**Augustinians of the Assumption, or ASSUMPTIONISTS.**—This congregation had its origin in the College of the Assumption, established in Nîmes, France, in 1843, by the Rev. Emmanuel d'Alzon, vicar-general of that diocese, some account of whose life and work is given at the end of this article. Although it was organized in 1847, the members did not take their first vows until 1850; they took their public vows at Christmas of the next year. A second house was established in Paris, and they continued their work there, encouraged by the Holy See. The congregation was formally approved by a Brief of 26 November, 1864. The chief objects of the congregation are to combat the spirit of irreligion in Europe and the spread of schism in the East. To this end the Assumptionists have devoted themselves to the work of Catholic higher and secondary education, to the spread of truth by means of the Press, to the conduct of pilgrimages, and to missionary work in the East. In addition to their college at Nîmes they established Apostolic schools where poor students were educated for the priesthood without expense to themselves. They established "La Bonne Presse", which issued periodicals, pamphlets, and books in great numbers, the chief publication, "La Croix", appearing simultaneously in several different cities. Their activities provoked the resentment of the French Government, and in 1900 the congregation was suppressed within French territory, this action being based on the charge that they were accumulating a fund to be used in a royalist movement to overthrow the Republic. Many of the Assumptionists left France after this, but some remained as secular priests under the authority of various bishops.

At the time of their suppression the Assumptionists maintained twenty Apostolic schools which in twenty-five years gave more than 500 priests to the secular clergy. These schools have all been closed, but the congregation has taken up the work in other quarters. Similar schools have been established in Italy, Belgium, England, and the United States. "La Bonne Presse" was purchased at the time of the suppression by Paul Féron-Vrau, a wealthy manufacturer of Lisle, and all its publications have been continued without any change of policy. Much of the good accomplished by the Assumptionists was effected through this medium. They entered into competition with the irreligious press in

family circles, in workshops, and places where workmen congregate, with excellent results. The Catholic papers established by them have a greater circulation than many famous non-Christian papers. Until recently no popular Catholic paper has reached a degree of circulation equal to that of "La Croix" or of "Le Pèlerin". These two papers are issued at the rate of three million per week; Saturdays this is increased to four million copies. To this must be added the circulation of 600,000 copies of "The Lives of the Saints", 70,000 of the "Les Contemporains", besides the many copies of the "Revue scientifique", "Cosmos"; "Questions actuelles"; "Les Echos de l'Orient"; the "Petit Bleu", and many others. In Chile, where these Fathers have been for thirteen years, they publish in Spanish "Echos from the Sanctuary of Lourdes". In their journalistic work they were aided by the Oblate Sisters of the Assumption, an order established by them to assist in their Oriental missions, but whose activities are not confined to that field. Until the suppression they directed the women's section in the publishing rooms of the "Christian Press" as well as the hospitals, orphan asylums, and schools.

Among other works carried on by the Assumptionists in France prior to their suppression was that of the "Association of Our Lady of Salvation", a society devoted to prayer, almsgiving, and setting a good example for the reformation of the working class. This society was established in eighty dioceses, and it succeeded in drawing the higher classes of society more closely to the workingmen. It encouraged everywhere social prayer, and social and national expiation, and discouraged human respect, social apostasy, and isolation in piety. It raised funds to convey workmen, pilgrims, paupers, and sick poor to Lourdes, to the number of a thousand each year; it was zealous in the cause of workmen's clubs, and of Catholic schools, and was active in the movement in favour of the keeping of Sunday as a day of rest. Another field of missionary labour was found among the Newfoundland fishermen. Every year 12,000 or 15,000 fishermen leave the coasts of France, Belgium, and Ireland, to go to the Banks of Newfoundland for codfish. The Protestants have long maintained a flotilla of hospital ships, with which they go to the aid of these unfortunate men and, while ministering to their material needs, draw their souls to heresy. The Assumptionists found here a field for their activity and zeal. They have organized the most prominent Catholic sailors into a committee and have been encouraged to equip two Catholic hospital ships, which now succour the unfortunate fishermen. The vessels have already been wrecked twice, but have been replaced, and the Assumptionists have continued their labours.

The Assumptionists have been active missionaries in the Orient, where at the present time 300 of the congregation, Fathers and Brothers, and nearly 400 Sisters are engaged. Their labours take them from the Balkans to the Dead Sea. They have established there twenty-two permanent residences, thirty regular missionary stations, and fifteen institutions entrusted to the Oblates of the Assumption. In the schools in Turkey in Europe and Turkey in Asia the Assumptionists have 2,500 scholars. Here the Oblates have opened a hospital, an orphanage, and nine gratuitous dispensaries, where they care for about 30,000 sick every year. Of the twenty-two public churches of the congregation in the East twelve are parishes, and in four of them the Offices are held in the rites of the Orient (Greek, or Slav). These rites the Assumptionists have embraced to render the teaching of the Gospel more fruitful. The Orientals, whether from love of their legitimate traditions, or from ignorance, make of the

exterior form of the rites a question of supreme importance. Called in 1862 to work for the conversion of the Bulgarians to Catholic unity, the Assumptionists founded in the Turkish quarter of Adrianople, and in Karagatch the European quarter, a residence with a Slav church and a Latin church, a hospital, three schools and a Bulgarian seminary of the Greek and Slav Rites, in which forty young men receive their maintenance and are prepared for the office of the sacred ministry. A similar work is being done at Philippopoli, the cradle of the Oriental missions of the Assumptionists. There is also a primary school, attended by 200 scholars, and an educational institute, many of the former pupils of which occupy important official positions in Eastern Rumelia. The Assumptionists have also churches and schools of different rites at Yamboli and Varna.

At the instance of Cardinal Vincenzo Vannutelli, when he was Apostolic delegate, the Assumptionists went to Constantinople and established themselves in the Turkish quarter at Koum-Kapou. The animosity of the Turks and the jealousy of the Greeks and Armenians caused the new missionaries to be very badly received. To escape persecution they worked on their building at night, doing their masonry, carpentry and painting themselves. By this stratagem they constructed their church of Anastasia, the first church consecrated to Catholic worship in this quarter since 1453. This church, to favour the conversion of the schismatics, was consecrated to the Greek Rite and dedicated by the Apostolic delegate himself. The congregation possesses other Greek churches at Kadikoi (Chalcedon), on the Asiatic bank of the Bosphorus, and at Gallipoli. In order to prepare a native clergy, the Assumptionists have opened at Stamboul (Constantinople) a *petit séminaire*, where sixty young men are instructed in the Greek Rite. At Kadikoi, in the great Leonine seminary, they follow with the ordinary theological course special lessons in preparation for the pastoral ministry. They are also given instructions in liturgy, history, canon law and in the Greek, Turkish, and Slav languages. At the day of its opening this seminary had thirty scholars and eight professors. At Stamboul, as at Kadikoi, there are flourishing schools for boys and girls, with more than 700 scholars in attendance. They do not suffice for receiving all the scholars who present themselves. To the labours of teaching are united those of the apostleship, in behalf of the natives as well as foreigners. At Stamboul and at Kadikoi, the priests preach and hear confessions in Italian, French, German, Greek, and Turkish. In the various houses established throughout the empire at least ten living languages are spoken. Greeks, Latins, and Orientals unite for the conferences of St. Vincent de Paul, and the Sisters visit and care for the sick to the number of 10,000 annually.

Their knowledge of the Oriental languages has been of great service to the Assumptionist Fathers in their journalistic labours. Twelve of the Fathers who are the most skilled in these studies write in the Oriental Review. They have their special bulletin, "Les Echos de l'Orient", which circulates among Greeks and Orientals. Because of the Oriental love of splendour in external worship the feasts of the Blessed Sacrament are celebrated with great pomp. With the consent of the authorities, and under the protection of a corps of soldiers, the processions of the Blessed Sacrament are conducted through all the streets around Santa Sophia. The Catholic funerals solemnized with reverential pomp produce also a great effect upon the impressionable natives. In 1890 the Congregation of the Propaganda confided to the Assumptionists the territory in Asia Minor extending from Broussa to Angora. It practically embraces the ancient Bithynia. Already six residences have been established there;

in the city of Broussa, with its population of 100,000 they have established a large college and two churches, one of which is the Latin parish. The towns of Eski-Chehir, Ismid, Sultan Eschoir, Koniah (Iconium), Fanaraki have each a residence for the priests with a public church; the Oblate Sisters are also established in these places. At Jerusalem the Assumptionists have erected the Hostelry of Our Lady of France for the reception of pilgrims, annexed to which is a scholasticate of forty religious. They have established there also the Society of the Croisés of Purgatory, and they have a church in which to receive the Latin pilgrims. The Eucharistic Congress at Jerusalem in 1893 was held in the Hostelry of Our Lady of France.

Emmanuel-Joseph-Marie-Maurice d'Alzon, founder and first Superior General of the Augustinians of the Assumption was born at Le Vigan, France, 30 August, 1810, and died at Nîmes, 21 November, 1880. He was a member of a noble family, and, being an only son, encountered strong opposition when he decided to enter the clerical state. He studied at the seminary of Montpellier and later at Rome, where he was ordained priest 26 December, 1834. On his return to France the next year he was appointed Vicar-General of the Diocese of Nîmes, which position he held for forty-five years, serving under four bishops. Among his earliest notable works was the establishment at Nîmes in 1843 of the College of the Assumption, for the education of the children of the aristocracy. This college later became the cradle of his congregation. He was associated with Guéranger, Louis Veuillot, and other champions of the Catholic cause. With the "Revue de l'enseignement chrétien", which he founded and directed, he restored the Christian spirit in classical studies. To combat Protestantism in southern France he established the Association of St. Francis de Sales. He also suggested the idea of the ecclesiastical caravan, formed by the priests at Nîmes, who by request of Mgr. Plantier came to Rome to visit the sovereign pontiff. This was the beginning of the great French pilgrimages called the national pilgrimages, the directors of which were for many years the religious of the order founded by Père d'Alzon. By his "alumnats", or Apostolic schools, he supplied the education of the poor children called to the priesthood, who, owing to lack of means, could not be admitted to the seminaries. The Fathers of the Assumption opened fifteen of these houses which in twenty-five years gave more than 500 priests to the secular clergy. To sustain this work of charity, Père d'Alzon founded the Association of Our Lady of Vocations, enriched with numerous indulgences, by Pius IX and Leo XIII. The brotherhood, by a decree of the Holy See, has been canonically established in the chapel of the College of Nîmes, and has received the approbation of many bishops. Père d'Alzon was much esteemed by the Popes Gregory XVI and Pius IX. The latter in 1863 sent him to Constantinople to found in the East the missions of the Congregation of the Assumption. More than once he was proposed for the episcopate, but he always declined the honour, preferring to devote himself to the work of his congregation. THOMAS GAFFNEY TAAFFE.

**Augustinus**, ANTONIUS, historian of canon law and Archbishop of Tarragona in Spain, b. at Saragossa 26 Feb., 1517, of a distinguished family; d. at Tarragona, 31 May, 1586. After finishing his studies at Alcalá and Salamanca, he went to Bologna (1536), to Padua (1537), and to Florence (1538) in which latter place he examined the famous "Codex Florentinus" of the Pandects and made the acquaintance of such learned men of the new historical school as Andrea Alciati, to whom he owed a confirmation of his pronounced bent towards a positive and critical

treatment of the ancient materials of canonical jurisprudence. In 1541 he took his degree of Doctor of Civil and Canon Law and in 1544, at the request of the Emperor Charles V, he was made Auditor of the Rota by Paul III. In 1555 he was sent by Paul IV to England, with a message of congratulation for Queen Mary and as Counsellor to Cardinal Pole. In 1556 he was made Bishop of Alife, in the Kingdom of Naples, and in 1561 was transferred to Lerida in his native Spain. He assisted during three years at the Council of Trent and urged ardently the reformation of the clergy. "It is our fault," he said in the council, "that so great an agitation has arisen in France and Germany. We must begin with the reformation of the clergy. It is your business, O Fathers, to save by your decrees the common weal of the Church that is now threatened." In 1576 he was promoted by Gregory XIII to the archiepiscopal See of Tarragona.

Augustinus is one of the foremost figures of the Catholic Counter-Reformation that set in with so much vigour and success in the latter half of the sixteenth century. His chosen field was the *fontes*, or original sources of ecclesiastical law both papal and conciliar. The basis of the medieval canon law was the "Decretum" of Gratian, a useful codification of the middle of the twelfth century, the ecclesiastical law-book of the schools and the universities, of great academic authority, but never formally approved by the popes as church legislation. Its materials, never hitherto critically illustrated as to their prominence and form, and often badly corrupted as to their text, stood in need of judicious sifting and elucidation. It was to this task that the young Augustinus addressed himself from 1538 to 1543. In the latter year he published at Venice the first critical study on Gratian, "Emendationum et Opinionum libri IV", the result of four years' labour at the text of the old medieval Benedictine of Bologna. This text remained his life-long study; towards the close of his career, after important services rendered during ten years to the "Correctores Romani" in their edition of Gratian (Rome, 1582), he finished his own magisterial examination of the work; it was not, however, published until after his death, "De Emendatione Gratiani dialogi (30) libri II" (Tarragona, 1587).

Other important publications of the sources of civil and ecclesiastical law occupied his pen. Thus he published in 1567 an edition of the Byzantine imperial constitutions, in 1576 his "IV Antiquæ Collectionis Decretalium", in 1582 a treatise on the "Penitential Canons" together with a "Pœnitentiale Romanum" discovered by him. From 1557 he sought earnestly for the necessary patronage, papal or regal, to enable him to publish the hitherto unedited Greek text of the ancient ecclesiastical councils, and for that purpose examined many archives in Italy and Germany; the fruits of his labours were reaped at a later date by others. Among the more valuable of his posthumous publications, and appealing strongly to modern historical tastes, is a critical examination of several early medieval collections of canon law that served as original material for the "Decretum" of Gratian. This work, that Maassen and von Scherer speak of with respect, is entitled "De quibusdam veteribus Canonum Ecclesiasticorum Collectionibus Judicium et censura", and was published at Rome (1611) with the second and third parts of his "Juris Pontificii Veteris Epitome" (to Innocent III, 1198-1216), the first part of which appeared at Tarragona in 1587. It contains biographical and text-critical notes on a number of collectors of ecclesiastical laws, from the sixth to the twelfth century. In this work he treats progressively of the pseudo-Isidorian Decretals, and while he did not dispose of sufficient material to demonstrate thoroughly their spurious character or to attempt to fix

the time and place of their compilation, it is clear that he did not believe them earlier than the time of Pope Damasus (366-384) or even of the seventh century "Collectio Hispana". His notes on the correlated "Capitula Hadriani" (Angilramni) were published at Cologne in 1618. His powerful genius was truly universal. Classical philology, epigraphy, numismatics, above all the history of civil and ecclesiastical law found in him an investigator whose boldness and insight were extraordinary for that period of incipient historico-critical research. Death surprised him at the patriotic task of an edition of the works of the Spanish writer, St. Isidore of Seville. The works of Augustinus were printed in eight volumes at Lucca (1775-74); his life by Siscarius is in the second volume 1-121.

**Augustinus-Verein**, THE, an association organized in 1878 to promote the interests of the Catholic press, particularly the daily press, of Germany. The society proposes to attain its end (1) by giving its moral support to the establishment of Catholic papers; (2) by furnishing trustworthy information and authentic news to the daily papers; (3) by training Catholic journalists, and giving assistance to the members of the profession in need of it; (4) by representing the interests of the profession; (5) by securing positions and giving information and assistance in all matters connected with journalism, free of charge; and finally (6) by endeavouring to bring about the harmonious co-operation of Catholic publishers, as well as uniformity in treating the questions of the day. The lack of organization on the part of the Catholic Press first became obvious at an early stage of the *Kulturkampf*; several unsuccessful attempts were made to supply the deficiency, among others the formation of a society of publishers. The first feasible steps were taken at the Catholic Convention at Würzburg; at subsequent gatherings plans were matured, and at Düsseldorf, 15 May, 1878, a programme was drawn up which is substantially followed out in the present Augustinus-Verein. Düsseldorf became the centre of the Verein, which, now that it has spread throughout Germany, is divided into ten groups, corresponding to geographical divisions, each, to a large extent autonomous. A general assembly is held annually. The Verein has its own organ, the "Augustinusblatt", published at Krefeld. It also conducts a literary bureau, a beneficial society, a parliamentary correspondence association of the Centre Party, in Berlin, and an employment agency. In 1904 the society had a regular membership of 850, in addition to the associate membership.

**Augustow**, DIOCESE OF. See SENJY.

**Augustus.**—The name by which CAIUS JULIUS CÆSAR OCTAVIANUS, the first Roman Emperor, in whose reign Jesus Christ was born, is usually known; b. at Rome, 62 B. C.; d. A. D. 14; It is the title which he received from the Senate 27 B. C., in gratitude for the restoration of some privileges of which that body had been deprived. The name was afterwards assumed by all his successors. Augustus belonged to the *gens Octavia* and was the son of Caius Octavius, a prætor. He was the grand-nephew of (Caius) Julius Cæsar, and was named in the latter's will as his principal heir. After the murder of Julius Cæsar, the young Octavianus proceeded to Rome to gain possession of his inheritance. Though originally in league with the republican party, he eventually allied himself with Mark Antony. Through his own popularity, and in opposition to the will of the senate he succeeded (43 B. C.) in obtaining the consulate. In the same year he entered into a pact with Antony and Lepidus by which it was agreed that for five years they would control the affairs of Rome. This (second) Triumvirate (*tresviri reipublicæ constituendæ*) so apportioned the Roman dominions that Lepidus received Spain; Antony, Gaul; and Augustus, Africa, Sicily, and Sardinia. The first concerted move of the Triumvirate was to proceed against the murderers of Cæsar and the party of the Senate under the leadership of Brutus and Cassius. A crushing defeat was inflicted on the latter at the battle of Philippi (42 B. C.), after which the fate of Rome rested practically in the hands of two men. Lepidus, always treated with neglect, sought to obtain Sicily for himself, but Augustus soon won over his troops, and, on his submission, sent him to Rome where he spent the rest of his life as *pontifex maximus*.

A new division of the territory of the Republic between Antony and Augustus resulted, by which the former took the East and the latter the West. When Antony put away his wife Octavia, the sister of Augustus, through infatuation for Cleopatra, civil war again ensued, whose real cause is doubtless to be sought in the conflicting interests of both, and the long-standing antagonism between the East and the West. The followers of Antony were routed in the naval battle of Actium (31 B. C.), and Augustus was left, to all intents and purposes, the master of the Roman world. He succeeded in bringing peace to the long-distracted Republic, and by his moderation in dealing with the senate, his munificence to the army, and his generosity to the people, he strengthened his position and became in fact, if not in name, the first Emperor of Rome. His policy of preserving intact the republican forms of administration and of avoiding all semblance of absolute power or monarchy did not diminish his authority or weaken his control. Whatever may be said in regard to the general character of his administration and his policy of centralization, it cannot be denied that he succeeded effectually in strengthening and consolidating the loosely organized Roman state into a close and well-knit whole. He was a patron of art, letters, and science, and devoted large sums of money to the embellishment and enlargement of Rome. It was his well-known boast that he "found it of brick and left it of marble". Under his management, industry and commerce increased. Security and rapidity of intercourse were obtained by means of many new highways. He undertook to remove by legislation the disorder and confusion in life and morals brought about, in great measure, by the civil wars. His court life, was simple and unostentatious. Severe laws were made for the purpose of encouraging marriages and increasing the birth-rate. The immorality of the games and the theatres was curbed, and new laws introduced to regulate the status of freedmen and slaves. The changes wrought

by Augustus in the administration of Rome, and his policy in the Orient are of especial significance to the historian of Christianity. The most important event of his reign was the birth of Our Lord (Luke, ii, 1) in Palestine. The details of Christ's life on earth, from His birth to His death, were very closely interwoven with the purposes and methods pursued by Augustus. The Emperor died in the seventy-sixth year of his age (A. D. 14). After the battle of Actium, he received into his favour Herod the Great, confirmed him in his title of King of the Jews, and granted him the territory between Galilee and the Trachonitis, thereby winning the gratitude and devotion of Herod and his house. After the death of Herod (750, A. U. C.), Augustus divided his kingdom between his sons. One of them, Archelaus, was eventually banished, and his territory, together with Idumæa and Samaria, were added to the province of Syria (759, A. U. C.). On this occasion, Augustus caused a census of the province to be taken by the legate, Sulpicius Quirinius, the circumstances of which are of great importance for the right calculation of the birth of Christ. See ROMAN EMPIRE; LUKE, GOSPEL OF.

The chief sources for the life of Augustus are the Latin writers, SÆTONTIUS, TACITUS, VELLEIUS PATERCULUS, and CICERO (in his *Epistles* and *Philippics*); the Greek writers, NICHOLAS OF DAMASCUS, DIO CASSIUS, and PLUTARCH. See also his official autobiography, the famous *Monumentum Ancyranum*, ed. by MOMMSEN (Berlin, 1883), and by FAIRLEY (Philadelphia, 1898), with tr.: TILLEMONT, *Histoire des empereurs*, etc. (Brussels, 1732); MÉRIVALE, *History of the Romans under the Empire* (London, 1850-52); SMITH, *Dict. of Greek and Roman Biography* (London, 1890), I, 424-431; TAYLOR, *A Constitutional and Political History of Rome* (London, 1899); XVI-XVIII; RAMSAY, *Was Christ born at Bethlehem?* (New York and London, 1898); *The Church under the Roman Empire* (ibid., 1893); GARDTHAUSEN, *Augustus und seine Zeit* (Leipzig, 1891), the standard work on the subject. For the origin and character of the legends that, at an early date, made Augustus one of the "prophets of Christ", see GRAF, *Roma nella memoria e nelle immaginazioni del Medio Evo* (Turin, 1882), I, ix, 308, 331. Cf. also GRAY in HASTINGS, *Dict. of Christ and the Gospels* (New York, 1906) s. v. *Augustus*, I, 143-46.

PATRICK J. HEALY.

**Aumbry**, variously written AMBRY, or AUMBRYE, is a derivative through the French of the classical *armarium*, or medieval Latin *almarium*. Its original meaning was a cupboard and it has never lost this more general sense, but even in classical Latin it had acquired in addition the special signification of a cupboard for holding books. This limited meaning was widely prevalent in the Middle Ages. Thus in the tenth-century rule of Cluny the library is called *armarium* and the official who had charge of it *armarius*, while by an arrangement which was long and widely observed both in Benedictine and in other monastic houses, this *armarius*, or librarian, was usually identical with the precentor. In Ælfric's Anglo-Saxon glossary, compiled at the beginning of the eleventh century, the Anglo-Saxon word *bochord* (book-board, i. e. library), is interpreted *bibliotheca vel armarium vel archivum*. Similarly it was a common proverb in religious houses, which meets us as early as 1170, that *claustrum sine armario est quasi castrum sine armamentario* (a monastery without a library is like a fortress without an arsenal). Besides this, owing to the number of cupboards and presses needed for storing vestments, church plate, etc., the word *armarium* was also not unfrequently used for the sacristy, though this may also be due to the fact that the books were themselves in many cases kept in the sacristy. In German the word *Almerei*, a derivative of *armarium*, has the meaning of sacristy.

HERBERT THURSTON.

**Aunarius** (OR AUNACHARIUS), SAINT, Bishop of

**Auxerre** in France, b. 573, d. 603. Being of noble birth, he was brought up in the royal court, but evinced a desire to enter the clerical state, was ordained priest by St. Syagrius of Autun, and eventually was made Bishop of Auxerre. His administration is noted for certain important disciplinary measures that throw light on the religious and moral life of the Merovingian times. He caused solemn litanies to be said daily in the chief centres of population, by rotation, and on the first day of each month in the larger towns and monasteries. He enforced a regular daily attendance at the Divine Office on the part both of regular and secular clergy. He held (581 or 585) an important synod of four bishops, seven abbots, thirty-five priests, and four deacons, for the restoration of ecclesiastical discipline and the suppression of popular pagan superstitions, and caused the lives of his predecessors Amator and Germanus to be written. He was buried at Auxerre, where he has always been held in veneration. His remains were later enclosed in a golden chest, but were partially dispersed by the Huguenots in 1567. A portion, however, was placed in the hollow pillar of a crypt, and saved. His feast is celebrated 25 September.

THOMAS J. SHAHAN.

**Aurea** (Golden), a title given to certain works and documents: *Bulla*, the charter of Emperor Charles IV, establishing (10 January, 1356), in union with the estates of the empire, the law of future imperial elections. *Catena*, a collection of Scriptural commentaries made by St. Thomas Aquinas. *Legenda*, a collection of lives of saints (*legendæ*) by Jacopo da Voragine, Archbishop of Genoa in the thirteenth century. *Summa Hostiensis*, also *Summa Archiepiscopi*, a famous exposition of the principal parts of the Decretals of Gregory IX, by Henricus de Segusio, Cardinal of Ostia (d. 1271). *Tabula*, an index to the "Summa Theologica" of St. Thomas Aquinas prepared by Pietro da Bergamo.

**Aurelian** (LUCIUS DOMITIUS AURELIANUS), Roman Emperor, 270-275, b. of humble parents, near Sirmium in Pannonia, 9 September, 214; d. 275. At the age of twenty he entered the military service, in which, because of exceptional ability and remarkable bodily strength, his advancement was rapid. On the death of Claudius he was proclaimed Emperor by the army at Sirmium, and became sole master of the Roman dominions on the suicide of his rival Quintillus, the candidate of the Senate. When Aurelian assumed the reins of government the Roman world was divided into three sections: the Gallo-Roman Empire, established by Postumus, comprising Gaul and Britain; the kingdom of Palmyra, which held sway over the entire Orient, including Egypt and the greater part of Asia Minor, and the Roman Empire, restricted to Italy, Africa, the Danubian Provinces, Greece, and Bithynia. On the upper Danube, Rhetia and Northern Italy were overrun by the Juthungi, while the Vandals were preparing to invade Pannonia. The internal affairs of Rome were equally deplorable. The anarchy of the legions and the frequent revolutions in preceding reigns had shattered the imperial authority; the treasury was empty and the monetary system ruined. With no support but that afforded by the army of the Danube, Aurelian undertook to restore the material and moral unity of the Empire, and to introduce whatever reforms were necessary to give it stability. Enormous as this project was, in the face of so many obstacles, he succeeded in accomplishing it in less than five years. When he died, the frontiers were all restored and strongly defended, the unity of the Empire was established, the administration was reorganized, the finances of the Empire placed on a sound footing, and

the monetary system thoroughly revised. His scheme for the complete unification of the Empire led him to attempt to establish the worship of the sun as the supreme god of Rome. During the early years of his reign Aurelian exhibited remarkable justice and tolerance towards the Christians. In 272, when he had gained possession of Antioch, after defeating Zenobia in several battles, he was appealed to by the Christians to decide whether the "Church building" in Antioch belonged to the orthodox bishop Domnus, or to the party represented by the favourite of Zenobia, Paul of Samosata, who had been deposed for heresy by a synod held three or four years before. His decision, based probably on the Edict of Gallienus, was that the property belonged to those who were in union with the bishops of Italy and of the city of Rome (Eus., *Hist. Eccl.*, VII, xxvii-xxx). As this act was based on political motives, it cannot be construed into one of friendliness for the Christians. As soon as he was at liberty to carry out his schemes for internal reform Aurelian revived the policy of his predecessor Valerian, threatened to rescind the Edict of Gallienus, and commenced a systematic persecution of the followers of Christ. The exact date of the inauguration of this policy is not known. It is likely, however, that an edict was issued in the summer of 275 and despatched to the governors of the provinces, but Aurelian was slain before he could put it into execution. Tradition refers to his reign a large number of *Acta Martyrum*, none of which is considered to be authentic (Dom Butler, "Journal of Theological Studies", 1906, VII, 306). His biographer, Vopiscus, says (c. xx) that he once reproached the Roman Senate for neglecting to consult the Sibylline Books in an hour of imminent peril. "It would seem", he said, "as if you were holding your meetings in a church of the Christians instead of in a temple of all the gods"; from which statement it has been rightly inferred that "the decline of the old faith was caused by the progress of the new, and that the buildings then used for the worship of the Christians were becoming more and more conspicuous".

**Aurelius**, Archbishop of Carthage from 388 to 423. From the time of St. Cyprian, Carthage was one of the foremost sees in Christendom. Its bishop, though not formally bearing the title of Primate, confirmed the episcopal nominations in all the provinces of Africa, convoked and presided at the plenary councils, which were held almost yearly, and signed the synodal letters in the name of all the participants. Such a post Aurelius occupied with distinction at a time when Africa held the intellectual leadership in the Church. His episcopate coincided with the last great effort made by the Donatists to uphold a losing cause, and with the first appearance of Pelagianism. Both these crises Aurelius met with equal decision and wisdom. A man of conciliating disposition, and a great lover of peace, his tendency to an indulgent treatment of repentant Donatists was conspicuous in the synodal acts of his own church, and in the plenary councils over which he presided he consistently upheld the same moderate policy. But when the Donatists resorted to rebellion and wholesale mur-

Jer, he joined his colleagues in appealing to the secular power. He was the first to unmask and denounce Pelagianism. In 412 he excommunicated and drove from Carthage Cælestius, the disciple of Pelagius. In 416 he condemned them both, in a synod of sixty-eight bishops of the Proconsulate, and induced Innocent I to brand their two principal errors by defining the necessity of grace and of infant baptism. When Pope Zosimus allowed himself to be deceived by Pelagius's lying professions, he held (417) a plenary council of his African brethren, and in their names warned the pontiff, who in turn (418) condemned the heresiarchs. Aurelius is mentioned in the African martyrology on 20 July.

A. J. B. VUIBERT.

**Aurelius Antoninus, MARCUS**, Roman Emperor, A. D. 161-180, b. at Rome, 26 April, 121; d. 17 March, 180. His father died while Marcus was yet a boy, and he was adopted by his grandfather, Annianus Verus. In the first pages of his "Meditations" (I, i-xvii) he has left us an account, unique in antiquity, of his education by near relatives and by tutors of distinction; diligence, gratitude, and hardness seem to have been its chief characteristics. From his earliest years he enjoyed the friendship and patronage of the Emperor Hadrian, who bestowed on him the honour of the equestrian order when he was only six years old, made him a member of the Salian priesthood at eight, and compelled Antoninus Pius immediately after his own adoption to adopt as sons and heirs both the young Marcus and Ceionius Commodus, known later as the Emperor Lucius Verus. In honour of his adopted father he changed his name from M. Ælius Aurelius Verus to M. Aurelius Antoninus. By the will of Hadrian he espoused Faustina, the daughter of Antoninus Pius. He was raised to the consulship in 140, and in 147 received the "tribunician power". (See ROMAN EMPEROR.) In all the later years of the life of Antoninus Pius, Marcus was his constant companion and adviser. On the death of the former (7 March, 161) Marcus was immediately acknowledged as emperor by the Senate. Acting entirely on his own initiative, he at once promoted his adopted brother Lucius Verus to the position of colleague, with equal rights as emperor. With the accession of Marcus the great *Pax Romana* that made the era of the Antonines the happiest in the annals of Rome, and perhaps of mankind, came to an end, and with his reign the glory of the old Rome vanished. Younger peoples, untainted by the vices of civilization, and knowing nothing of the inanition which comes from over-refinement and over-indulgence, were preparing to struggle for the lead in the direction of human destiny. Marcus was scarcely seated on the throne when the Picts commenced to threaten in Britain the recently erected Wall of Antoninus. The Chatti and Chauci attempted to cross the Rhine and the upper reaches of the Danube. These attacks were easily repelled. Not so with the outbreak in the Orient, which commenced in 161 and did not cease until 166. The destruction of an entire legion (XXII *Deiotariana*) at Elegeia aroused the emperors to the gravity of the situation. Lucius Verus took command of the troops in 162 and, through the valour and skill of his lieutenants in a war known officially as the *Bellum Armeniacum et Parthicum*, waged over the wide area of Syria, Cappadocia, Armenia, Mesopotamia, and Media, was able to celebrate a glorious triumph in 166. For a people so long accustomed to peace as the Romans were, this war was wellnigh fatal. It taxed all their resources, and the withdrawal of the legions from the Danubian frontier gave an opportunity to the Teutonic tribes to pene-

trate into a rich and tempting territory. People with strange-sounding names, the Marcomanni, Varistæ, Hermanduri, Quadi, Suevi, Jazyges, Vandals, collected along the Danube, crossed the frontiers, and became the advance-guard of the great migration known as the "Wandering of the Nations", which four centuries later culminated in the overthrow of the Western Empire. The war against these invaders commenced in 167, and in a short time had assumed such threatening proportions as to demand the presence of both emperors at the front.

Lucius Verus died in 169, and Marcus was left to carry on the war alone. His difficulties were immeasurably increased by the devastation wrought by the plague carried westward by the returning legions of Verus, by famine and earthquakes, and by inundations which destroyed the vast granaries of Rome and their contents. In the panic and terror caused by these events the people resorted to the extremes of superstition to win back the favour of the deities through whose anger it was believed these visitations were inflicted. Strange rites of expiation and sacrifice were resorted to, victims were slain by thousands, and the assistance of the gods of the Orient sought for as well as that of the gods of Rome. During the war with the Quadi in 174 there took place the famous incident of the Thundering Legion (*Legio Fulminatrix, Fulminea, Fulminata*) which has been a cause of frequent controversy between Christian and non-Christian writers. The Roman army was surrounded by enemies, with no chance of escape, when a storm burst. The rain poured down in refreshing showers on the Romans, while the enemy were scattered with lightning and hail. The parched and famishing Romans received the saving drops first on their faces and parched throats, and afterwards in their helmets and shields, to refresh their horses. Marcus obtained a glorious victory as a result of this extraordinary event, and his enemies were hopelessly overthrown. That such an event did really happen is attested both by pagan and Christian writers. The former attribute the occurrence either to magic (Dion Cassius, LXXI, 8-10) or to the prayers of the emperor (Capitolinus, "Vita Marci", XXIV; Themistius, "Orat. XV. ad Theod."; Claudian, "De Sext. Cons. Hon.", V, 340 sqq.; "Sibyl. Orac.", ed. Alexandre, XII, 196 sqq. Cf. Bellori, "La Colonne Antonine", and Eckhel, "Doctrina Nummorum", III, 64). The Christian writers attributed the fact to the prayers of the Christians who were in the army (Claudius Apollinaris in Euseb., "Hist. Eccl.", V, 5; Tertullian, "Apol.", v; ad Scap. c. iv), and soon there grew up a legend to the effect that in consequence of this miracle the emperor put a stop to the persecution of the Christians (cf. Euseb. and Tert. opp. cit.). It must be conceded that the testimony of Claudius Apollinaris (see Smith and Wace, "Dict. of Christ. Biogr.", I, 132-133) is the most valuable of all that we possess, as he wrote within a few years of the event, and that all credit must be given to the prayers of the Christians, though it does not necessarily follow that we should accept the elaborate detail of the story as given by Tertullian and later writers [Allard, op. cit. infra, pp. 377, 378; Renan, "Marc-Aurèle" (6th ed., Paris, 1891), XVII, pp. 273-278; P. de Smedt, "Principes de la critique hist." (1883), p. 133]. The last years of the reign of Marcus were saddened by the appearance of a usurper, Avidius Cassius, in the Orient, and by the consciousness that the empire was to fall into unworthy hands when his son Commodus should come to the throne. Marcus died at Vindobona or Sirmium in Pannonia. The chief authorities for his life are Julius Capitolinus, "Vita Marci Antonini Philosophi" (SS. Hist. Aug. IV); Dion Cassius, "Epitome of Xiphilinos"; Herodian; Fronto, "Epistolæ" and Aulus Gellius "Noctes Atticæ".

Marcus Aurelius was one of the best men of heathen antiquity. Apropos of the Antonines the judicious Montesquieu says that, if we set aside for a moment the contemplation of the Christian verities, we cannot read the life of this emperor without a softening feeling of emotion. Niebuhr calls him the noblest character of his time, and M. Martha, the historian of the Roman moralists, says that in Marcus Aurelius "the philosophy of Heathendom grows less proud, draws nearer to a Christianity which it ignored or which it despised, and is ready to fling itself into the arms of the Unknown God". On the other hand, the warm eulogies which many writers have heaped on Marcus Aurelius as a ruler and as a man seem excessive and overdrawn. It is true that the most marked trait in his character was his devotion to philosophy and letters, but it was a curse to mankind that "he was a Stoic first and then a ruler". His dilettanteism rendered him utterly unfitted for the practical affairs of a large empire in a time of stress. He was more concerned with realizing in his own life (to say the truth, a stainless one) the Stoic ideal of perfection, than he was with the pressing duties of his office.

Philosophy became a disease in his mind, and cut him off from the truths of practical life. He was steeped in the grossest superstition; he surrounded himself with charlatans and magicians, and took with seriousness even the knavery of Alexander of Abonoteichos. The highest offices in the empire were sometimes conferred on his philosophic teachers, whose lectures he attended even after he became emperor. In the midst of the Parthian war he found time to keep a kind of private diary, his famous "Meditations", or twelve short books of detached thoughts and sentences in which he gave over to posterity the results of a rigorous self-examination. With the exception of a few letters discovered among the works of Fronto (M. Corn. Frontonis Reliquiae, Berlin, 1816) this history of his inner life is the only work which we have from his pen. The style is utterly without merit and distinction, apparently a matter of pride, for he tells us he had learned to abstain from rhetoric, and poetry, and fine writing. Though a Stoic deeply rooted in the principles developed by Seneca and Epictetus, Aurelius cannot be said to have any consistent system of philosophy. It might be said, perhaps, in justice to this "seeker after righteousness", that his faults were the faults of his philosophy rooted in the principle that human nature naturally inclined towards evil, and needed to be constantly kept in check. Only once does he refer to Christianity (Medit., XI, iii), a spiritual regenerative force that was visibly increasing its activity, and then only to brand the Christians with the reproach of obstinacy (*παράστασις*), the highest social crime in the eyes of Roman authority. He seems also (ibid.) to look on Christian martyrdom as devoid of the serenity and calm that should accompany the death of the wise man. For the possible relations of the emperor with Christian bishops see Abercius of Hierapolis, and Melito of Sardis.

In his dealings with the Christians Marcus Aurelius went a step farther than any of his predecessors. Throughout the reigns of Trajan, Hadrian, and Antoninus Pius, the procedure followed by Roman authorities in their treatment of the Christians was that outlined in Trajan's rescript to Pliny, by which it was ordered that the Christians should not be sought out; if brought before the courts, legal proof of their guilt should be forthcoming. [For the much-disputed rescript "Ad conventum Asiae" (Eus., Hist. Eccl., IV, xiii), see ANTONINUS PIUS]. It is clear that during the reign of Aurelius the comparative leniency of the legislation

of Trajan gave way to a more severe temper. In Southern Gaul, at least, an imperial rescript inaugurated an entirely new and much more violent era of persecution (Eus., Hist. Eccl., V, i, 45). In Asia Minor and in Syria the blood of Christians flowed in torrents (Allard, op. cit. infra, pp. 375, 376, 388, 389). In general the recrudescence of persecution seems to have come immediately through the local action of the provincial governors impelled by the insane outcries of terrified and demoralized city mobs. If any general imperial edict was issued, it has not survived. It seems more probable that the "new decrees" mentioned by Eusebius (Hist. Eccl., IV, xxvi, 5) were local ordinances of municipal authorities or provincial governors; as to the emperor, he maintained against the Christians the existing legislation, though it has been argued that the imperial edict (Digests, XLVIII, xxix, 30) against those who terrify by superstition "the fickle minds of men" was directed against the Christian society. Duchesne says (Hist. Ancienne de l'Eglise, Paris, 1906, p. 210) that for such obscure sects the emperor would not condescend to interfere with the laws of the empire. It is clear, however, from the scattered references in contemporary writings (Celsus, "In Origen. Contra Celsum", VIII, 169; Melito, in Eus., "Hist. Eccl.", IV, xxvi; Athenagoras, "Legatio pro Christianis", i) that throughout the empire an active pursuit of the Christians was now undertaken. In order to encourage their numerous enemies, the ban was raised from the *delatores*, or "denouncers", and they were promised rewards for all cases of successful conviction. The impulse given by this legislation to an unrelenting pursuit of the followers of Christ rendered their condition so precarious that many changes in ecclesiastical organization and discipline date, at least in embryo, from this reign.

Another significant fact, pointing to the growing numbers and influence of the Christians, and the increasing distrust on the part of the imperial authorities and the cultured classes, is that an active literary propaganda, emanating from the imperial surroundings, was commenced at this period. The Cynic philosopher Crescens (see JUSTIN MARTYR) took part in a public disputation with St. Justin in Rome. Fronto, the preceptor and bosom friend of Marcus Aurelius, denounced the followers of the new religion in a formal discourse (Min. Felix, "Octavius", cc. ix, xxxi) and the satirist Lucian of Samosata turned the shafts of his wit against them, as a party of ignorant fanatics. No better proof of the tone of the period and of the widespread knowledge of Christian beliefs and practices which prevailed among the pagans is needed than the contemporary "True Word" of Celsus (see ORIGEN), a work in which were collected all the calumnies of pagan malice and all the arguments, set forth with the skill of the trained rhetorician, which the philosophy and experience of the pagan world could muster against the new creed. The earnestness and frequency with which the Christians replied to these assaults by the apologetic works (see ATHENAGORAS, MINUCIUS FELIX, THEOPHILUS OF ANTIOCH) addressed directly to the emperors themselves, or to the people at large, show how keenly alive they were to the dangers arising from these literary or academic foes.

From such and so many causes it is not surprising that Christian blood flowed freely in all parts of the empire. The excited populace saw in the misery and bloodshed of the period a proof that the gods were angered by the toleration accorded to the Christians; consequently, they threw on the latter all blame for the incredible public calamities. Whether it was famine or pestilence, drought or floods, the cry was the same (Tertull., "Apologeticum", V, xli): *Christianos ad leonem* (Throw the

Christians to the lion.) The pages of the Apologists show how frequently the Christians were condemned and what penalties they had to endure, and these vague and general references are confirmed by some contemporary "Acta" of unquestionable authority, in which the harrowing scenes are described in all their gruesome details. Among them are the "Acta" of Justin and his companions who suffered at Rome (c. 165), of Carpus, Papylus, and Agathonica, who were put to death in Asia Minor, of the Scillitan Martyrs in Numidia, and the touching Letters of the Churches of Lyons and Vienne (Eus., Hist. Eccl., V, i-iv) in which is contained the description of the tortures inflicted (177) on Blandina and her companions at Lyons. Incidentally, this document throws much light on the character and extent of the persecution of the Christians in Southern Gaul, and on the share of the emperor therein.

The Roman histories of GIBBON, DURUY, and MERIVALE deal at length with his personal history; SCHILLER, *Geschichte der römischen Kaiserzeit* (Gotha, 1883); ALLARD, *Histoire des persécutions pendant les premiers siècles* (2d ed., Paris, 1892), cc. vi-vii; REMAN, *Marc-Aurèle et la fin du monde antique* (6th ed., Paris, 1901); DILL, *Roman Society from Nero to Marcus Aurelius* (London, 1904), 506-511, and *passim*; FARRAR, *Marcus Aurelius in Seekers after God* (London, 1890.) His *Meditations* have been translated into English by GEORGE LONG (London, 1862); cf. also DE CHAMPAGNY, *Les Césars (les Antonins)* (Paris, 1863); DARTIGNE-PETRON, *Marc-Aurèle dans ses rapports avec le Christianisme* (Paris, 1897).

PATRICK J. HEALY.

**Aureola.** See NIMBUS.

**Aureoli** (AUREOLUS, d'AURIOL, ORIOL), PETRUS, a Franciscan philosopher and theologian, called on account of his eloquence *Doctor facundus*, b. 1280 at Toulouse (or Verberie-sur-Oise); d. 10 January, 1322 (Denifle; other dates assigned are 1330 and 1345). He entered the Order of Friars Minor, studied at Toulouse, taught theology there and at Paris and became (1319) provincial of his order (Province of Aquitaine). John XXII appointed him Archbishop of Aix (1321). He defended the doctrine of the Immaculate Conception in a public disputation at Toulouse (1314), in his "De Conceptione Mariæ Virginis" and "Repercussorium" (reply to opponents of the doctrine), in his "Sermons" and in his commentary on St. Bernard's teaching. His other principal works are the commentary on the "Sentences" of Peter Lombard (Rome, 1596-1605), "Quodlibeta", and "Breviarium Bibliorum", an introduction to the Scriptures with literal commentary, which appeared in numerous editions at Venice, Paris, and Louvain. A new edition by Seeboeck was published at Quaracchi in 1896. In philosophy Aureoli was a Conceptualist and a forerunner of Occam. He criticized the doctrine of St. Thomas and defended, though not in all points, the views of Scotus. His writings on the Immaculate Conception were published by Petrus de Alva in the "Monumenta Seraphica Imm. Concept".

**Aureus Codex.** See CODEX.

**Auricular Confession.** See CONFESSION.

**Auriesville**, the site of the Mohawk village, Montgomery Co., New York, U. S. A., in which Father Isaac Jogues and his companions, Goupil and Lalonde, were put to death for the Faith by the Indians. It is on the south bank of the Mohawk, about forty miles west of Albany. Auries was the name of the last Mohawk who lived there, and from this the present designation was formed. It was known among the Indians as Ossernenon, also Gandawaga and Caughnawaga, the latter being also

given to the settlement on the St. Lawrence opposite Lachine which was established for the Iroquois converts who wanted to withdraw from the corruption of their pagan kinsmen. To the village on the Mohawk Jogues and Goupil were brought in 1642 as prisoners, and, in 1646, Jogues again, with Lalonde. In 1644 Bressani was tortured there, and later on Poncet. In 1655-56-57 Le Moyne came as ambassador to make peace; and the year after the punitive expedition of the Marquis de Tracy a permanent mission was established (1667). There Father Boniface, James de Lamberville, Fremin Bruyas, Pierron, and others laboured until 1684, when the mission was destroyed. The famous Indian girl, Tegakwitha, was born there. From it she escaped to Canada. While the missionaries were in control of Ossernenon and the adjacent Indian towns, the Mohawk converts were remarkable for their exact Christian life, and in many instances for their exalted piety.

The exact location of this village, which is so intimately associated with the establishment of Christianity in New York, was for a time a subject of considerable dispute. The researches of John Gilmary Shea, whose knowledge of the history of the early mission was so profound, at first favoured the view that the old village was on the other side of the Mohawk at what is now Tribes Hill. More thorough investigations, however, aided by the conclusions of Gen. J. S. Clarke of Auburn, whose knowledge of Indian sites both in New York and Huronia is indisputable, have shown finally that the present Auriesville is the exact place in which Father Jogues and his companions suffered death. The basic evidence is the fact that, up to the time of their destruction by de Tracy, the villages were certainly on the south side of the Mohawk and west of the Schoharie—as is clear from contemporary maps, and from Jogues's, Bressani's, and Poncet's letters. Joliet, one of the most accurate cartographers of the time, puts the village of Ossernenon at the junction of the Schoharie and Mohawk. To further particularize it, Jogues said the village was on the top of the hill, a quarter of a league from the river. The ravine in which Goupil's body was found is also specified by Jogues, and he speaks of a watercourse and a rivulet uniting there—a feature still remaining. The distances from Andagaron and Tionontoguen given by Father Jogues also fix the exact locality.

Satisfied that the precise spot had been determined, ten acres of land on the hill were purchased in 1884 by the Rev. Joseph Loyzance, S. J., who was at that time parish priest of St. Joseph's, Troy, N. Y., and who had all his life been an ardent student of the lives of the early missionaries. Father Loyzance erected a small shrine on the hill, under the title of Our Lady of Martyrs, and he was the first to lead a number of pilgrims to the place, on the 15th of August of that year, which was the anniversary of the first arrival of Father Jogues as an Iroquois captive. Four thousand people went from Albany and Troy on that day. Other parishes subsequently adopted the practice of visiting Auriesville during the summer. Frequently there are as many as four or five thousand people present. The grounds have been since extended beyond the original limits, for the purpose of keeping the surroundings free from undesirable buildings. Many of the pilgrims come fasting and receive Holy Communion at the shrine. The entire day is passed in religious exercises, but anything which could in the least savour of any public cult of the martyrs is sedulously guarded against, as such anticipation of the Church's official action would seriously interfere with the cause of their canonization, which is now under consideration at Quebec. The present buildings on the site are only of a temporary nature. If the Church pronounces on the

reality of the martyrdom of the three missionaries, more suitable edifices will be erected.

T. J. CAMPBELL.

**Aurispa**, GIOVANNI, a famous Italian humanist and collector of Greek manuscripts, b. about 1369 at Noto, in Sicily; d. at Ferrara in 1459. It is not known where he first studied. In 1418 he went to Constantinople to learn Greek and to collect codices. So industrious was he that he was accused to the Greek emperor of despoiling the city of books. He returned to Venice in 1423 with 238 volumes of classical authors, purchased at Constantinople. Among his treasures were the celebrated "Codex Laurentianus" (seven plays of Sophocles, six of Æschylus, Apollonius's "Argonautica") of the tenth century, the Iliad, Demosthenes, Plato, Xenophon, etc. The next year Aurispa went to Bologna, where he became professor of Greek at the university. As a teacher he was not very successful. Thence he was invited to Florence, where he also held the chair of Greek. Later he went to Ferrara. In 1441 he was appointed secretary to Pope Eugene IV. Six years later Pope Nicholas V reappointed him to the same post. Besides being a tireless collector of manuscripts, Aurispa was a poet of some merit. His published works include letters, epigrams, and an elegy.

EDMUND BURKE.

**Aurora Lucis Rutilat.**—This is one of the so-called Ambrosian hymns, but its author is unknown. It has been revised and separated into three hymns for the Roman Breviary. The first sixteen lines form the hymn for Lauds from Low Sunday to the Ascension, and begin in the revised form, *Aurora Cælum Purpurat*. There are many English versions in use among Protestants. Dr. J. M. Neale's translation begins "Dawn purples all the east with light". The hymn "Tristes Erant Apostoli" (lines 17-32 of the original text) is in the Office, Common of Apostles and Evangelists for paschal time at the first and second Vespers and Matins. This hymn has also been translated into English. The Gregorian melody is in the third mode and may be found in the "Vesperale Romanum". Lines 33 to the end of the ancient hymn form "Paschale Mundo Gaudium," the hymn at Lauds in the Common of Apostles in paschal time. Among the English versions, besides Dr. Neale's, are those of J. A. Johnston in his "English Hymnal" (1852), "With sparkling rays morn decks the sky"; E. Caswall, "Lyra Catholica" (1849), "The dawn was purpling o'er the sky"; J. D. Chambers, "Lauda Syon" (1857), "Light's very morn its beams displays".

JOSEPH OTTEN.

**Ausculca Fili**, a letter addressed 5 December, 1301, by Pope Boniface VIII to Philip the Fair, King of France. Philip was at enmity with the pope. Under pretext of his royal rights, he conferred benefices, and appointed bishops to sees, regardless of papal authority. He drove from their sees those bishops who, in opposition to his will, remained faithful to the pope. This letter is couched in firm but paternal terms. It points out the evils the king has brought to his kingdom, to Church and State; invites him to do penance and to mend his ways. It was unheeded by the king, and was soon followed by the famous Bull "Unam Sanctam".

The complete text of this Bull is found in the *Bullarium Magnum* (Luxemburg, 1730), IX, 121 sqq.; cf. HEFFEL-KNÖPFLE, *Conciliengeschichte* (Freiburg, 1890), VI, 324-333;

TOERT, *Storia di Bonifacio VIII* (Monte Cassino, 1846); JUNG-MANN, *Dissertat. Selecta in Hist. eccl.* (Ratisbon, 1886), VI, *De notificatu Bonif. VIII.*; BOUTARIC, *La France sous Philippe le Bel* (Paris, 1861); FINKER, *Aus dem Tagen Bonifaz VIII* (Münster, 1902); cf. *Revue des quest. historiques* (Oct., 1903).

M. O'RiORDAN.

**Ausonius**, DECIMUS MAGNUS, a professor and poet b. about A. D. 310; d., probably, about A. D. 394. The son of a physician of Bordeaux, he studied first in that city, then at Toulouse, with his uncle Æmilius Magnus Arborius. The latter having gone to teach in Constantinople, Ausonius returned to Bordeaux, where he became professor of grammar, and later on of rhetoric. Between 364 and 368, Valentinian I invited him to Trier to teach his son Gratian. In 368 and 369 Ausonius accompanied the emperor on the expedition against the Alemanni, and received a young Swabian, Bissula, as his share of the booty. The emperors overwhelmed him with honours, and made him first Prefect of the Gauls, then Prefect of the West conjointly with his son Hesperius (between August, 378, and July, 379). In 379 he became consul. After the assassination of Gratian, his benefactor (383), Ausonius moved to Bordeaux, where he lived among many admiring friends, and wrote a great deal of poetry. He lived through almost the whole of the fourth century. The writings of Ausonius are generally short, and they form a miscellaneous collection which is divided into two groups:—

I. OCCASIONAL WORKS.—(1) "Epigrams": short poems on different subjects, often translated from the Greek Anthology. (2) "Parentalia": thirty eulogies on deceased relatives, with some occasional expressions of personal sentiment (about 379). (3) "Commemoratio professorum Burdigalensium": a collection like the preceding, giving an idea of a university in the fourth century (after 389). (4) "Mosella": a description of the River Moselle and the country through which it flows, written while travelling from Bingen to Trier (c. 371). This poem has a certain local and archaeological interest. (5) Charming poems relating to Bissula (after 368). (6) Many brief poems, which Ausonius called eclogues or "Epyllia"; paschal-time prayers (368); "Epicedion": dirge on his father's death (d. 378); advice to his grandson (about 380); "Cupido crucifixus": description of a painting in a dining-room at Trier, which represented Cupid as tormented in hell by the women who pursued him on earth, etc. (7) "Gratiarum actio dicta domino Gratiano Augusto", in which Ausonius expresses in prose his thanks for having been made consul. This was read at Trier in 379, and is made up of flowers of rhetoric and conventional flatteries. (8) "Ephemeris": the account of daily duties, from morning to night; a fragment (379). In this work is found a morning prayer composed of Biblical expressions in which the doctrine of the Trinity is set forth in detailed formulæ directed against the heresies of the times. (9) "Letters": twenty-five epistles, mostly in verse. The most interesting are addressed to St. Paulinus of Nola (393) and in them Ausonius bewails a conversion that deprives the State and literature of the benefit of such a brilliant mind, and tries to lead the saint back to worldly life at Rome. This correspondence lays before us two ideals of life; it expresses in clear colours the views which at that time were in conflict with each other, and divided society. (10) "Præfatiunculæ": prefaces and envois to poems.

II. SCHOOL EXERCISES AND FRAGMENTS.—These are chiefly mnemonic verse: "Cæsares", on the Roman emperors; consular annals; "Ordo nobilium urbium", eulogies on cities, beginning with Rome and ending with Bordeaux (after 388); "Eclogæ", a collection of mnemonic verses, treating of trees, the months, the calendar, weights, etc.; "Periochæ" (Contents), prose headings for the Iliad and the Odyssey. It is doubt-

ful whether Ausonius wrote these, but they were at least the work of a member of the circle to which he belonged; short poems on the labours of Hercules; on the Muses; on ethical subjects (translations of Greek originals, inspired by Pythagorean philosophy). Other writings are lectures by a professor; Epitaphs, eulogies on dead heroes of the Trojan War, modelled after the Greek, and epitaphs on Niobe, Diogenes, etc., translated from the Greek; Epyllia, various pieces, among others an enigma on the number three, a diversion of a courtier forced to go to war (368); "Cento nuptialis" (an ingenious conceit of the same origin, the result of a wager made with Valentinian), extracts from Virgil, the conclusion of which (*consummatio matrimonii*) is not very refined (368); "Technopægnion", a collection of verses in which each ends in a monosyllable; the authenticity of the Consul Ausonius's prayer, written in ropalic verse (verse composed successively of words of one, two, three, four, five syllables and so on) is doubtful; "Ludus septem sapientum"; this product of the seven sages is a kind of scholastic drama, in which, after a prologue, each sage recites a proverb; at the end, they invite the audience to applaud. It is a document interesting for the history of pedagogy and also for the medieval drama.

To appraise Ausonius justly it must be borne in mind that he represents the professor of the fourth century. Some of his works, therefore, written for the school and in the spirit of the school, frequently translations from the Greek, are unimportant. A versifier to whom any subject could appeal (the more difficult and the less poetical it was, the better), Ausonius knew by heart the works of his predecessors, but by his taste and metrical peculiarities showed himself a disciple rather of the poets of the new school (*neoterici*, poetic innovators of the time of the Severi) than of the classic poets. In this work the letters to Paulinus of Nola are an exception to the whole, which is almost void of ideas. Ausonius's attitude in regard to Christianity should be explained in the same way. The paganism of his works is the paganism of the schools, and, if one would base on that the doubt that he was a Christian, inversely, his literary manner of treating mythology should make it questionable whether he was a pagan. But the paschal prayer, and still more, the prayer of the "Ephemeris", could not have been written by a pagan. An orthodox Christian in his prayers, he was a pagan in the class-room. Hence his works, which are class-room productions, may very naturally seem pagan. It is said that after the edict of Julian (362) Ausonius had to give up teaching; but there is nothing to prove this, nor is there any proof to the contrary, as Julian died the following year. It is supposed that, like some of his contemporaries, Ausonius remained a catechumen for a long time. It is possible that he was not baptized until the time when we lose all trace of him, in the last silent and obscure days of his old age.

PAUL LEJAY.

**Austin, JOHN**, an English lawyer and writer, b. 1613 at Walpole, in Norfolk; d. London, 1669. He was a student of St. John's College, Cambridge, and of Lincoln's Inn, and about 1640 embraced the Catholic Faith. He was highly esteemed in his profession and was looked on as a master of English style. His time was entirely devoted to books and literary pursuits. He enjoyed the friendship of such scholars as the antiquary Blount, Christopher Davenport (Franciscus a Santa Clara), John Sergeant, and

others. Among his writings are: "The Christian Moderator; or Persecution for Religion condemned by the Light of Nature, by the Law of God, the Evidence of our own Principles, but not by the Practice of our Commissioners for Sequestrations—In Four Parts" (London, 1652, 4to.). It was published under the pseudonym of William Birchley, and in it he frequently disclaims the pope's deposing power. "In this work, Austin assuming the disguise of an independent, shows that Catholics did not really hold the odious doctrines vulgarly attributed to them, and makes an energetic appeal to the independents to extend to the adherents of the persecuted church such rights and privileges as were granted to other religious bodies" (Dict. of Nat. Biogr., II, 264). "The Catholic's Plea; or an Explanation of the Roman Catholic Belief, Concerning their Church, Manner of Worship, Justification, Civil Government, Together with a Catalogue of all the Penal Statutes against Popish Recusants, All which is humbly submitted to serious consideration, By a Catholic Gentleman" (London, 1659, 18mo.), also under the pseudonym of William Birchley; "Reflections upon the Oaths of Supremacy and Allegiance; or the Christian Moderator, The Fourth Part, By a Catholic Gentleman, an obedient son of the Church and loyal subject of his Majesty" (London, 1661); "A Punctual Answer to Doctor John Tillotson's book called 'The Rule of Faith'" (unfinished); "Devotions, First Part: In the Ancient Way of Offices, With Psalms, Hymns, and Prayers for every Day in the Week, and every Holiday in the Year". It is not known when and where the first edition appeared; the second, a duodecimo, is dated 1672. An edition printed at Edinburgh, 1789, contains a life of the author, presumably by Dodd. This work was adapted to the uses of the Anglican Church in Hicks's "Harmony of the Gospels", etc. (London, 1701), and has been often reprinted as a stock book under the title of Hicks's Devotions. "Devotions, Second Part, The Four Gospels in one, broken into Lessons, with Responsories, To be used with the Offices, Printed Anno Domini, 1675" (2 vols., Paris, 12mo), a posthumous work, divided into short chapters with a verse and prayer at the end of each. The prayers, says Gillow, "gave rise to offence under the impression that they favoured Blackloe's doctrine concerning the middle state of souls, and on account of this the work was not republished". A third part of the "Devotions" was never printed; it contained, according to the author's own statement "Prayers for all occasions framed by an intimate friend according to his (Austin's) directions, and overlooked by himself". He also wrote several anonymous pamphlets against the divines who sat in the Westminster Assembly.

**Australia** (also known as NEW HOLLAND till about 1817) is geographically the world's great island-continent. Politically, the mainland, with the adjoining island of Tasmania, forms the Commonwealth of Australia. This is under the British Crown and consists of the following six States, which were federated on 1 Jan., 1901, and are here named in the order in which they became separate colonies of the British Empire: New South Wales (1788); Tasmania (1803); Western Australia (1826); South Australia (1836); Victoria (1851); and Queensland (1859). The Commonwealth covers an area of 2,980,632 square miles. It is, territorially, about one-fourth

smaller than Europe, one-sixth larger than the United States (excluding Alaska), over once and a half the size of the Indian Empire, more than fourteen times larger than Germany or France, and about twenty-five times larger than the British Isles. At the census of 1901 the population of the six States was as follows: New South Wales, 1,359,943; Western Australia, 182,553; Victoria, 1,201,341; Queensland, 503,266; South Australia, 362,604; Tasmania, 172,475. This gave the Commonwealth in 1901 a total population of 3,782,182. The official estimate of the total population for December, 1905, was 4,002,893.

I. THE CONVICT SYSTEM.—The north and west coasts of Australia figure in the maps of Spanish and Portuguese navigators as far back as about the year 1530. But it was the War of American Independence that led to the settling of the white man on the shores of the great lone continent. At that time, and until the nineteenth century was well advanced, the maxim of Paley and of others of his school, that crime is most effectually prevented by a dread of capital punishment, held almost complete control of the legislative mind in Great Britain. "By 1809," says a legal authority in the "National History of England" (IV, 309), "more than six hundred different offences had been made capital—a state of law unexampled in the worst periods of Roman or Oriental despotism". Transportation was the ordinary commutation of, or substitute for, the slip-knot of the hangman. From 1718 to 1776 British convicts had been sent in considerable numbers annually, under contractors, into servitude on the American mainland. The traffic was stopped by the War of Independence. At the close of the struggle the British prisons and, later on, the prison-hulks overflowed. The colony of New South Wales (till 1826 synonymous with the whole Australian mainland) was established as a convict settlement by an Order in Council dated 6 December, 1785. On 13 May, 1787, "the first fleet", provisioned for two years, left England, with 1,030 souls on board, of whom 696 were convicts. They reached Botany Bay on 20 January, 1788. They abandoned it after a few days because of its shallow waters, and laid the foundations of Sydney on the shores of the noble and spacious harbour to which they gave the name of Port Jackson. The men who founded Sydney and the Commonwealth of Australia "may have been convicts", says Davitt, "but they were not necessarily 'criminals', such as we are familiar with to-day. Some account must be taken of what constituted a crime in those transportation days, and of the hideously unjust sentences which were inflicted for comparatively trivial offences" (Life and Progress in Australasia, 193-194).

Within the next decade, the ranks of the original convict population were swelled by a goodly percentage of the 1,300 unoffending Catholic peasants from the North and West of Ireland who were seized and deported by "Satanides" Carhampton and the Ulster magistrates during the Orange reign of terror in 1795-96, "without sentence", as Lecky says, "without trial, without even the colour of legality" (Ireland in the Eighteenth Century, III, 419; England in the Eighteenth Century, VIII, 250). After the insurrection of 1798, "a stream of Irish political prisoners was poured into the penal settlement of Botany Bay, and they played some part in the early history of the Australian colonies, and especially of Australian Catholicism" (Lecky, England in the Eighteenth Century, VIII, 250). In his "Catholic Mission in Australia" (1836), Dr. Ullathorne says of those early Irish political convicts: "Ignorance or violation of religious principle, the knowledge or habits of a criminal life, were scarcely to any extent recognizable features in this unhappy class of Irish political prisoners. On the contrary, the deepest and purest

sentiments of piety, a thorough comprehension of religious responsibility, and an almost impregnable simplicity of manner, were their distinctive virtues on their first consignment to the guardianship of the law. In many illustrious cases, a long and dangerous residence in the most depraved penal settlements was unable to extinguish these noble characteristics." During the first three decades of the nineteenth century the convict population was notably increased by the addition of many who had taken part in the agitations in connexion with tithes, the Charter and Reform movements, the Combination Laws, and the Corn Laws. During the first fifty years and more of the Australian penal settlements, convictions and sentences of deportation were matters of fearful facility. For no provision was made for the defence of prisoners unable to procure it for themselves; the right of defence throughout the entire trial was not recognized till 1837; jurors were allowed to act as witnesses; and, belonging, as they generally did, to "the classes", they were too prone to convict, and judges to transport, especially during periods of popular ferment, on weak or worthless evidence, or on the mere presumption of guilt (See National History of England, IV, 310).

Convictism endured in New South Wales from its first foundation in 1788 till 1840. Tasmania remained a penal colony till 1853. Transportation to Norfolk Island ceased in 1855. Moreton Bay (in the present State of Queensland) became a convict station in 1824 and remained one till 1839. Western Australia began as a penal settlement in 1826. It continued as such for only a very brief space. Owing to the dearth of free labour, convicts (among whom was the gifted John Boyle O'Reilly, a political prisoner) were reintroduced from 1849 till 1868, when the last shadow of "the system" was lifted from Australia. Two noted Catholic ecclesiastics (Dr. Ullathorne and Dr. Willson, first Bishop of Hobart) took a prominent and honoured part in the long, slow movement which led to the abolition of the convict system in New South Wales, Tasmania, and Norfolk Island. Almost from the dawn of the colonization of New South Wales and Tasmania, voluntary settlers went thither, at first as stragglers, but in a steady stream when the advantages of the country became known, when irresponsible military rule ceased (in 1824) and when free selection and assisted immigration were planks in the policy of the young Australian colonies. The first free settlers came to Queensland (known till its separation in 1859 as the Moreton Bay District of New South Wales) in 1824, just in advance of the convicts; to Victoria (known till its separation in 1851 as the Port Phillip District of New South Wales) in 1835, and to South Australia in 1836. The gold discoveries of the fifties brought a great inrush of population, chiefly to Victoria and New South Wales. Events have moved rapidly since then. The widened influences of religion, the influx of new blood, the development of resources, prosperity, education, and the play of free institutions have combined to rid the southern lands of the traces of a penal system which, within living memory, threatened so much permanent evil to the moral, social, and political progress of Australia. The dead past has buried its dead.

The reformation of the criminal formed no part of the convict system in Australia. "The body", says Bonwick, "rather than the soul, absorbed the attention of the governors" (First Twenty Years of Australia, 218). "Vengeance and cruelty", says Erskine May, "were its only principles; charity and reformation formed no part of its scheme" (Constitutional History of England, III, 401). For the convict, it was a beast-of-burden life, embittered by the lash, the iron

ball, the punishment-cell, the prison-hulk, the chain-gang, and the "hell". "The 'whipping-houses' of the Mississippi", says Dilke, "had their parallel in New South Wales; a look or word would cause the hurrying of a servant to the post or the forge, as a preliminary to a month in a chain-gang on the roads" (Greater Britain, 8th ed., 373). For idleness, for disobedience, for drunkenness, for every trivial fault, the punishment was "the lash!—the lash!—the lash!" (Dr. Ullathorne, in Cardinal Moran's History of the Catholic Church in Australasia, 156). And the "cat" was made an instrument of torture (Dilke, Greater Britain, 8th ed., 374). Matters were even worse in the convict "hells" of New Norfolk (established in 1788), and of Port Arthur and Macquarie Harbour in Tasmania. In 1835 Dr. Ullathorne went to New Norfolk to prepare thirty-nine supposed conspirators for an abrupt passage into eternity. Twenty-six of the condemned men were reprieved. They wept bitterly on receiving the news, "whilst those doomed to die, without exception, dropped on their knees and with dry eyes thanked God they were to be delivered from so horrid a place". They "manifested extraordinary fervour and repentance", received their sentence on their knees "as the will of God", and on the morning of their execution "they fell down in the dust and, in the warmth of their gratitude, kissed the very feet that had brought them peace" (Ullathorne in Moran, op. cit., 164).

For a long period Australian officials and ex-officials were to all intents and purposes a great "ring" of spirit-dealers. Rum became the medium of commerce, just as tobacco, and maize, and leaden bullets were in the early days of New England (History of New South Wales from the Records, II, 271-273). The cost of building the first Protestant church in Australia (at Sydney) was, as the pastor's balance sheet shows, in part paid in rum (op. cit., II, 66). "Rum-selling and rum-distilling debauched the convicts and their guards" (José, History of Australia, 21), and the moral depravity that grew up under the system is described by Dr. Ullathorne as "too frightful even for the imagination of other lands" (Moran, op. cit., pp. 8-11, and "Historical Records of New South Wales, II and III, *passim*). The Irish Catholic convicts—"most of whom", says Ullathorne (in Moran, op. cit., 152-153), "were transported for the infringement of penal laws and for agrarian offences and minor delinquencies"—had generally (according to the same eyewitness) a lively dread of the depravity of the prison hells of the system. Irish Catholic female convicts were also saved to a notable extent by their robust faith from the profligacy which, almost as a matter of course, overtook their less fortunate sisters from other countries (McCarthy, History of Our Own Times, ed. 1887, I, 467; Ullathorne, in Moran, 157-158). Long before, similar testimony was given by John Thomas Bigge, after he had spent three years (1819-22) in Australia as Special Commissioner from the British Government to investigate the working of the transportation system. In his final report (dated 6 May, 1822) he said: "The convicts embarked in Ireland generally arrive in New South Wales in a very healthy state, and are found to be more obedient and more sensible of kind treatment during the passage than any other class. Their separation from their native country is observed to make a stronger impression upon their minds, both on their departure and during the voyage."

II. PERIOD OF PERSECUTION.—The influences of religion were not allowed to remedy to any great extent the hard animalism and inhumanity of the convict system. Anglicanism was *de facto*, although not *de jure*, the established religion of the Australian penal colonies. But the Anglican chaplain, frequently a farmer, run-holder, and magistrate, was more conspicuously a civil than a religious function-

ary. Methodism (then a branch of the Anglican Establishment) made a feeble beginning in Australia in 1813; Presbyterianism in 1823; other Protestant denominations at later dates (Bonwick, First Twenty Years of Australia, 240). In 1836, when Dr. Ullathorne wrote his pamphlet, "The Catholic Mission in Australia", Catholic and other dissidents were still compelled to attend the more or less perfunctory services of the Anglican Church (in Moran, op. cit., 153). The penalties for refusal, provided at various times in General Orders, consisted in reduced rations, imprisonment, confinement in prison-hulks, the stocks, and the urgent pressure of the public flagellator's "cat-o'-nine-tails"—twenty-five lashes for the first offence, fifty for the second, and for the third, the road-gangs, or transportation to the "living death" of the convict hells. (See the official and other evidence in Moran, op. cit., 11-19.) As late as 5 March, 1843, a convict named Bernard Trainer was sentenced to fourteen days' imprisonment in Brighton jail for refusing to attend the Protestant service (Therry MSS., in Moran, 19). This abuse of power continued in Tasmania till 1844 (Hogan, The Irish in Australia, 3d ed., 257-258). Both in New South Wales and Tasmania, the children of Catholic convicts and all orphans under the care of the State were brought up in the profession of the dominant creed. In 1792 there were some three hundred Catholic convicts and fifty Catholic freemen (mancipists) in New South Wales. Nine years later, in 1801, there were 5,515 inhabitants in the penal settlement (Bonwick, First Twenty Years of Australia, 175-176). About one-third of these were Catholics; but no regular statistics of religious belief were kept at the time (Kenny, The Catholic Church in Australasia to the Year 1840, 20). Among the "little flock" there were three priests who had been unjustly transported on a charge of complicity in the Irish insurrection of 1798—Fathers James Harold, James Dixon, and Peter O'Neill. The last-mentioned priest had been barbarously scourged on a suborned charge of having abetted murder—a crime of which he was afterwards proved to be wholly innocent. Father Harold was the uncle of the Rev. Dr. William Vincent Harold, O.P., famous in the Hogan Schism in Philadelphia, and *en route* to Ireland in 1810, from Australia, he visited Philadelphia (Moran, op. cit., 33).

These priests were strictly forbidden the exercise of their sacred ministry. After repeated representations, Father Dixon was at length, by order of the Home Government, conditionally emancipated, and permitted to celebrate Mass once a month, under galling restrictions (see Historical Records of New South Wales, V, 110). He offered the Holy Sacrifice for the first time in New South Wales, 15 May, 1803. There was no altar-stone; the chalice, the work of a convict, was of tin; the vestments were made of parti-coloured old damask curtains sacrificed for the occasion, and the whole surroundings of this memorable event in the history of the Church in Australia bespoke the poverty of Bethlehem and the desolation of Calvary. After little more than a year, Father Dixon's precious privilege was withdrawn, and the last state of the Catholic convicts became worse than the first. Father O'Neill had in the meantime (1803) been restored to Ireland, with his character completely vindicated. In 1808 Father Dixon, broken down in health, was permitted to return to his native diocese. Two years later he was followed to Ireland by Father Harold, and till 1817 a deep spiritual desolation brooded over the infant Church in Australia. In the last-mentioned year there were some 6,000 Catholics in and about Sydney alone. The representations of the returned priestly exiles resulted at length in the appointment of Father Jeremiah Flynn, an Irish Cistercian, as Prefect Apostolic of New Holland. Obstacles were thrown in his way

by the Colonial Office. He placed the matter in the hands of the Rt. Rev. Dr. Poynter, and, relying on the known influence of his English friend, set sail in good faith for his distant field. On his arrival in Sydney, Governor Macquarie bluntly informed him that no "Popish missionary" would be allowed to intrude within the settlement, and that every person in the penal colony must be a Protestant.

Father Flynn ministered secretly to his flock wherever he could evade the watchful eyes of hostile officials. A few months after his arrival he was suddenly arrested without warrant or accusation, placed under lock and key in prison, and, without trial, shipped back to London as a prisoner by the first vessel homeward bound. Before his arrest he used secretly to celebrate the Sacred Mysteries in the house of a pious Catholic named Davis. There the Sacred Species were reserved for the sick and dying, in a cedar press, or tabernacle. Father Flynn vainly besought permission to return to the house. And there, for two years after his departure, the taper or lamp was ever kept alight, and, with pathetic devotion, the children of sorrow gathered in adoration around the Bread of Life. The "Holy House of Australia", with its small adjoining grounds and the sum of £1,000, was devoted to religion by Davis, and on its site now stands a fine church dedicated to God under the invocation of the national apostle of Ireland. Governor Macquarie's harsh and illegal treatment of Father Flynn created a stir in the British House of Commons. It opened up the whole scandalous story of the persecution of the Catholic convicts and settlers in Australia, created a healthy reaction, and led to the appointment of two Irish chaplains, Father Philip Connolly (who went to Hobart) and Father John Joseph Therry (who remained in Sydney), each with a slender yearly salary of £100. That was in May, 1821. With that day, to use the words of Archbishop Carr of Melbourne "what may be termed the period of the Church suffering ends, and that of the Church militant begins".

III. PERIOD OF PARTIAL TOLERATION.—The new era inaugurated by Fathers Connolly and Therry was, however, one of only partial toleration of the Catholic Faith. It extended from their arrival in Australia, and was marked by long and successful struggles against religious ascendancy, the partial cessation of convictism, and the beginnings of the present hierarchical organization. In 1821 New South Wales and Tasmania (the only places then colonized) contained a white population of 35,610 souls. Some 30 per cent of these were Catholics. At a census taken in 1828 there were in eastern Australia 36,598 whites, of whom 11,236 were Catholics. Serious restrictions were still placed upon the marriage of Catholic convicts. The chaplains were strictly forbidden to receive converts from any Protestant denomination, or to interfere with the old-standing abuse of bringing up all the children in State-aided institutions in the creed of the Church of England (Hogan, *The Irish in Australia*, 3d ed., 236-237). And through and over it all ran the constant effort to set up the Protestant Reformed Religion as the Established Church of the new south lands. A great stride in the direction of such an establishment was made when, on 17 July, 1825, Royal Letters set apart for the ruling creed one-seventh of the whole territory of New South Wales, without prejudice to previous grants bestowed upon it. It was in a great measure to Father Therry's energy and ardour that this crowning act of ascendancy owed its partial defeat. The Royal Grant was revoked in 1834, but in the meantime, 435,000 acres of the public domain had been alienated for the benefit of the Anglican Church. Father Therry's frequent collisions with abuses created a deadlock

with the Sydney officials. This, in turn, led to the appointment of Dr. Ullathorne, a distinguished English Benedictine, as Vicar-General of the Bishop of Mauritius, who exercised jurisdiction over Australia till 1834.

Dr. Ullathorne arrived in his new field of labour in 1833. In that year the white population of New South Wales (i. e. of the whole island continent except Western Australia) had risen to 60,794. Of these, some 36,000 were free. The Catholic body, numbering 17,179, and scattered over a vast area, was ministered to by four priests. There were on the Australian mainland four Catholic schools, and four churches under construction (one of them Old St. Mary's, Sydney). Tasmania (as we still call it by anticipation) had only one Catholic priest, no school, and its one church (at Hobart) was described by Dr. Ullathorne as "a mere temporary shed". Sir Richard Bourke, a broad-minded Irish Protestant, was at that time Governor of New South Wales. Through his exertions was passed the Church Act of 1836, which broke up the quasi-monopoly of State appropriations for the clergy and the denominational schools that had hitherto been enjoyed by the Church of England (Therry, *New South Wales and Victoria*, ed. 1863, 17; Flanagan, *History of New South Wales*, I, 512, 513). Despite its admitted shortcomings, this was, in the circumstances of the time and country, a notable measure. It ended forever the dream of a Protestant ascendancy on the Australian mainland, and is justly regarded as the first Charter of the country's religious liberties. A Church Act on similar lines was passed in Tasmania in 1837. During the governorship of Sir Richard Bourke Catholics (Roger, afterwards Sir Roger, Therry, and John Hubert Plunkett) were also, for the first time in the history of Australia, appointed to positions of any importance under the Crown. Under this administration the annual influx of free immigrants (some 3,000) equalled for the first time that of the convicts (Sutherland, *History of Australia*, 12th ed., 51, 52).

Australia was gradually rolling out of the sullen gloom of a penal settlement, and emerging into the condition of a freeman's country. The Catholic population increased rapidly. Their numbers and their distance from the immediate centre of their spiritual jurisdiction led, in 1834, to the formation of Australia, Tasmania, and the adjacent islands (including New Zealand) into a vicariate Apostolic. The Right Rev. John Bede Polding, an English Benedictine, was appointed its first bishop. In 1841 his vast diocese contained some 40,000 Catholics, ministered to by twenty-eight priests, and scattered over a territory nearly as large as Europe. The Australian mainland and Tasmania had in that year a population of 211,095 souls. At the census of that year, there were 35,690 of Bishop Polding's spiritual subjects in a total population of 130,856 in New South Wales (which then included the present States of Queensland and Victoria). Among the other scattered Catholics was a little group, poor labourers all, except one family, in a white population of some 15,000 souls in South Australia. This colony had been founded in 1836 as a free and "socially superior" Protestant settlement, from which "Papists and pagans" were to have been rigidly excluded. A few Catholics, however, crept in. They were ministered to by one priest (Father Benson) who lived among them in apostolic poverty from 1839 till the arrival of the first Bishop of Adelaide, Dr. Murphy, in 1842. In Western Australia there were 2,311 hard-pressed colonists at the census of 1840. There were very few Catholics among them, and no priest till 1845, when there arrived in the colony Dom Rudesind Salvado, a

Spanish Benedictine, afterwards founder and first Abbot of New Norcia. A closer hierarchical organization was needed. At Bishop Polding's earnest solicitations new dioceses were created by the Holy See: Hobart, in 1842; Adelaide, in 1843; Perth, in 1845; Melbourne, Maitland, and Port Victoria, in 1848. Sydney also became an archiepiscopal see. Dr. Willson, the first Bishop of Hobart, will be remembered for his successful opposition to the efforts made, despite the local Church Act of 1837, to have Anglicanism placed on the same official footing as in England. It was the last serious effort to establish a religious ascendancy in any part of Australasia. In New South Wales the first synod was held in 1844. Six years later, the first sod of the first railroad in Australasia was turned in the capital of the mother-colony. At the census of 1851, the Catholic body in the mother-colony had risen to 58,899 in a total population of 190,999. In the Moreton Bay District of New South Wales (now Queensland) there were few Catholics, and no resident priest till the Passionist Fathers opened their mission to the aborigines on Stradbroke Island, in 1843. In the Port Phillip District of New South Wales (now Victoria) there were, in 1851, 18,014 Catholics in a total population of 77,345, with six priests (in 1850) and thirteen State-aided primary schools. Dr. Gould was the first Bishop of the new see founded there in 1848.

IV. PERIOD OF COMPARATIVE CALM.—The discovery of rich gold in Victoria in 1851 had a profound and far-reaching effect on the history of Australia. There was a delirium of sudden prosperity. Population rushed into the new El Dorado. In 1851, the mainland and Tasmania had a joint population of 211,095, nearly double that of 1841. This rapid increase of inhabitants soon called for the erection of new episcopal sees. That of Brisbane was founded in 1859, the year in which Queensland became a separate colony. The Bishopric of Goulburn was established in 1864; Maitland (a titular see

since 1848) and Bathurst, in 1865; the abbacy *nullius* of New Norcia (aboriginal mission), in 1867; the See of Armidale, in 1869; and those of Ballarat and Sandhurst, in 1874. In the last-mentioned year Melbourne (since 1851 the capital of the separate colony of Victoria) became an archiepiscopal see. The Vicariate Apostolic of Cooktown was formed in 1876, and the Diocese of Rockhampton in 1882. Three years later, in 1885, Dr. Moran (successor to Dr. Vaughan in the Archiepiscopal See of Sydney) was raised to the purple as Australia's first cardinal. The Plenary Synod held in Sydney in the same year resulted in the formation, in 1887, of the Dioceses of Grafton (now called Lismore), Wilcannia, Sale, and Port Augusta, together with the Vicariates Apostolic of Kimberley (now under the jurisdiction of the Bishop of Geraldton), and of Queensland (for aborigines only), while Adelaide, Brisbane, and (in 1888) Hobart became archiepiscopal sees. The Plenary Synod of 1895 led to the formation of the Diocese of Geraldton in 1898. The occupant of that see is administrator of the Diocese of Port Victoria and Palmerston, which, founded in 1848, lost its whole European population in 1849. The latest Plenary Synod of the Church in the Commonwealth took place in 1905, and two important and highly successful Catholic Congresses were held, the first in Sydney in 1900, the second in Melbourne in 1904. In 1906, there were in the Australian Commonwealth six archbishops (one of them a cardinal, another a coadjutor), fifteen bishops (two of them coadjutors), one abbot *nullius*, and one vicar Apostolic; in all, a hierarchy of twenty-three prelates exercising episcopal jurisdiction.

V. RELIGIOUS STATISTICS.—The following table, compiled from official sources, shows the numerical strength of Catholics on the Australian mainland and in Tasmania for the years named, which have been chosen as being, in most instances, census years:—

Year	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Total Catholics	Total Population
1861	99,193	109,828	7,676	—	3,786	19,954	—	1,141,563
1871	147,627	170,620	31,822	28,271	7,282	22,657	408,279	1,650,471
1881	207,606	203,480	54,376	42,628	8,413	23,055	539,558	2,245,448
1891	286,915	248,585	92,766	47,179	12,602	25,800	713,846	3,159,085
1901	347,286	263,710	120,663	52,193	41,892	30,324	856,068	3,782,182

The Jews number 15,239 souls, and the minor Christian sects run in diminishing numbers to total memberships of mere hundreds. The following gen-

eral summary of ecclesiastical statistics is from a table in the "Australasian Catholic Directory" for 1906:—

State and Ecclesiastical Provinces	Districts	Churches	Secular Priests	Regular Priests	Religious Brothers	Nuns	Ecclesiastical Seminaries	Colleges (Boys)	Boarding Schools (Girls)	Superior Day Schools	Primary Schools	Charitable Institutions	Children in Catholic Schools
State of New South Wales (Prov. of Sydney)	175	541	294	108	217	2,288	2	8	59	89	346	36	43,281
State of Victoria (Prov. of Melbourne)	107	438	204	52	74	1,190	—	9	41	27	204	15	35,398
State of Tasmania (Prov. of Tasmania)	19	63	28	—	—	135	—	—	1	4	25	2	3,280
States of South and Western Australia (Prov. of Adelaide)	65	187	95	47	113	676	—	3	14	33	92	14	11,812
State of Queensland (Prov. of Brisbane)	55	106	80	13	25	356	—	4	18	9	66	9	12,064
Commonwealth of Australia	421	1,335	701	220	429	4,645	2	24	133	162	733	76	105,835

(Certain of the figures given above are the sums of incomplete diocesan returns.)

The religious statistics of South Australia were not tabulated in 1846, 1851, and 1861. There was no enumeration of religious denominations at the Tasmania census of 1881. The figures given below for that year are an estimate by T. A. Coghlan, Statistician of New South Wales. The Catholic body

in the Commonwealth is surpassed in numerical strength only by the adherents of the Church of England. The following table, compiled from the Australian Handbook for 1905, shows the numerical strength of the principal religious groups in the different States at the census of 1901:—

Religious Denominations	New South Wales	Victoria	Queensland	South Australia	Western Australia	Tasmania	Commonwealth
Church of England	623,131	423,914	184,078	106,987	75,654	83,815	1,497,579
Roman Catholic	347,286	263,708	120,405	52,193	41,893	30,314	855,799
Presbyterian	132,617	191,459	57,442	18,357	14,707	11,523	426,105
Methodist	137,638	180,263	46,574	90,125	24,540	24,909	504,139
Baptist	16,618	33,730	12,717	21,764	3,125	4,716	92,670
Congregational	24,834	17,141	8,300	13,338	4,404	5,544	73,561
Lutheran	7,387	13,934	25,170	26,140	1,703	387	74,721
Salvation Army	9,585	8,829	5,512	4,030	1,690	1,454	31,100
Total Population	1,299,096	1,132,978	460,198	332,934	167,716	162,752	3,555,674

VI. EDUCATION.—For a time all the colonies of the Australasian group followed the example initiated by New South Wales in according State aid to the clergy and the denominational schools of the principal religious bodies, Anglicans, Catholics, Presbyterians, and Methodists. These grants were withdrawn; at once or by gradually diminishing payments; by South Australia in 1851, after they had been in force only three years; by Queensland in 1860; by New South Wales in 1862; by Tasmania and Victoria, in 1875, and by Western Australia, in 1895. State grants to denominational schools ceased when the various secular systems took effect: in Victoria in 1872; in Queensland, in 1876; in South Australia, in 1878; in New South Wales, in 1879; and in Western Australia in 1896. In all the States of the Commonwealth primary education is compulsory. In Victoria, Queensland, South Australia, and Western Australia, it is also free. In New South Wales and Tasmania a small fee is charged, with free education for children whose parents cannot afford to pay for them. In Victoria fees are charged for such extra subjects as book-keeping, shorthand, Euclid, algebra, Latin, French, etc. Throughout the Commonwealth the rate of illiteracy is low. "Out of every 10,000 children between the ages of five and fifteen, there could read and write in 1861, 4,637; in 1871, 5,911; 1881, 7,058; 1891, 7,565" (Coghlan and Ewing, *Progress of Australasia in the Nineteenth Century*, p. 455). At the census of 1901, according to the "Victorian Year-Book" for 1903 (pp. 70-71), of the children of school age (6 to 13 years) in Victoria, 90.12 per cent were able to read and write; in Queensland, 84.42 per cent (Australian born children only); in Western Australia, 82.05 per cent; in South Australia, 82.00 per cent; in New South Wales, 80.35 per cent, and in Tasmania, 78.77 per cent. Hostility to the Catholic Church gave the chief impulse to the secularizing of public instruction in Victoria and New South Wales. In Victoria Mr. Stephen, Attorney-General, declared that the new Act was "to purge the colony of clericalism", and to lead the rising generation by sure but gradual steps to "worship in common at the shrine of one neutral-tinted deity, sanctioned by the State Department" (Moran, *op. cit.*, 882-883). In New South Wales Henry (afterwards Sir Henry) Parkes was even more outspoken. Holding aloft his Draft Bill on Public Instruction, at a public meeting, he said: "I hold in my hand what will be death to the calling of the priesthood of the Church of Rome" (Moran, *op. cit.*, 875). One of the first results of the withdrawal of the State grants in the various colonies was the closing of most of the Protestant primary schools. There was, on the other hand, everywhere a steady increase in the number of Catholic schools. The fol-

lowing figures, taken from official sources, show the growth of Catholic primary schools in Victoria from the passing of the secular Education Act till 1897:—

Year	Primary Schools	Children Attending
1881	180	20,337
1891	208	21,799
1897	226	24,066

No official returns appear in the Victorian census reports for 1901. The following extract from a table published by T. A. Coghlan (*Wealth and Progress of New South Wales, 1897-98, 762*) indicates the advance made by Catholic primary schools in the mother-state for twelve years after the date (1882) at which State assistance was withdrawn from denominational schools:—

Year	Schools	Teachers	Scholars on Roll	Average Attendance
1888	247	916	27,172	21,809
1891	250	1,242	30,691	23,788
1897	296	1,481	36,675	29,162

According to official returns, there were 41,112 children on the rolls of the Catholic schools in New South Wales in the December quarter, 1904, and 5,413 on the rolls of the Catholic schools of Western Australia on the last school week of 1903 (the latest Government figures available for that State). No official information appears in the census or reports of Tasmania, Queensland, or South Australia. The "Australasian Catholic Directory" for 1906 made what seems to be a somewhat conservative estimate when it set down as 105,835, the number of children attending Catholic schools throughout the Commonwealth.

VII. THE ABORIGINES.—The origin of the native tribes of Australia is one of the unsolved riddles of ethnology. An unknown number of these black-skinned people still live in their "wild" state, in small and scattered communities, over vast areas extending from Central Queensland almost to the coast of Western Australia. They have no acquaintance with metal, nor with the bow and arrow, and their weapons of war and chase are (with the exception of the boomerang) of a very rude kind, wooden spears and clubs, stone tomahawks, etc. They are extraordinarily keen and skilful hunters. They are polygamous, given at times to cannibalism and infanticide, and have no permanent dwellings, no pottery, and no idea of cultivation of the soil. They die out fast wherever they come in contact

with the white man and his vices. The last Tasmanian aboriginal died in 1876. In New South Wales and Victoria, the dwindling remnants of the native tribes are mostly settled upon reserves under State control. The most permanent and successful missions to the aborigines are those in the Dioceses of Perth and Geraldton (Western Australia).

VIII. CATHOLIC LITERATURE.—Under the penal slavery that long prevailed over a part of Australia, intellectual and moral advancement was subordinated to the two central ideas of punishment and money-getting. For some five decades from the date of the first colonization there was scarcely such a thing as a cultured class; the struggle for existence was generally keen among the free settlers in a virgin country; and education, seldom more than primary, was mainly in the hands of convict teachers and of convict tutors assigned to private families. The literary gloom of Australian penal servitude before the days of the '48 men was lit up by two non-Catholic Irish convicts, Edward O'Shaughnessy, a gifted poet and political writer, and George Waldron (better known as George Barrington), the prince of modern pickpockets, whose romantic career has found fame even in the pages of the "Dictionary of National Biography". To Australian Catholics, however, it is especially gratifying that one of the first contributions of a writer of their faith and country dealt a severe blow at the convict system; this work was Dr. Ullathorne's heart-rending pamphlet, "The Horrors of Transportation". Time, free immigration, prosperity, higher instruction, more extended educational facilities, and the play of representative institutions have since then combined to develop in the "Land of Dawning" a rich general literature, in many respects *sui generis*, and marked, especially on its "lighter" side, by a certain weird melancholy which, according to Marcus Clarke, is the predominant feature of Australian scenery. In the literary development of the Commonwealth Catholic writers have borne an honourable part. The following list is made up exclusively of works produced by Catholic authors having at the time of writing a domicile in Australia.

*History and Biography.*—Ullathorne, "The Horrors of Transportation"; and "The Australian Mission"; Kenny, "The Catholic Church in Australia to the Year 1840"; Therry, "Comparison of the Oratory of the House of Commons Thirty Years Ago and at the Present Day (1856)"; "Reminiscences of Thirty Years' Residence in New South Wales"; Flanagan, "History of New South Wales"; Tenison Woods, "History of the Discovery and Exploration of Australia"; Finn ("Garry-Owen"), "The Chronicles of Early Melbourne"; George Collingridge (whose brother Arthur originated the real art life of the mother-state by founding the Art Society of New South Wales and the classes connected therewith), "History of Australian Discovery"; Mennell, "Dictionary of Australian Biography"; Hogan, "The Irish in Australia"; Kelsh, "Mémorial of Bishop Willson". The principal work written by Cardinal Moran in Australia is his monumental "History of The Catholic Church in Australasia". Carr (Archbishop of Melbourne), "Fifty years of Progress"; Byrne, "History of the Catholic Church in South Australia" (two small vols. issued); Cleary, "The Orange Society"; Gray, "Australasia, Old and New"; Donohoe (Arthur Cayll), "History of Botany Bay".

*Apologetic and Ascetic Literature.*—The most noteworthy contributions to Australian Catholic apologetic literature are those of Cardinal Moran, "Letters on the Anglican Reformation", and "The Reunion of Christendom"; and of Archbishop Carr, "The Origin of the Church of England", "The Church and the Bible", "The Primacy of the Roman Pontiff", and "Letters in Reply to Dr. Rentoul", the charac-

teristic feature of which works is the frequency and effectiveness of their appeals to the writings of Protestant historians and divines; Hall, "Who translated the Bible?" A multitude of minor polemical publications on questions of history, missions, doctrine, statistics, socialism, education, medico-moral subjects, religion and science, etc., have appeared from time to time from the pens of Cardinal Moran, Archbishop Carr, Dr. Ullathorne ("Reply to Judge Barton"), Fathers W. Kelly, J. O'Malley, and E. J. Masterson, S.J., the Rev. W. Barry, D.D., the Rev. M. Watson, S.J., Benjamin Hoare, the Rev. P. O'Doherty, the Rev. M. Barrett, and others; Byrne, "True Wisdom" (translated from Thomas à Kempis); "Letters of a Mother to Her Children" and "Sketches of the Lives of Young Saints", books compiled by Loretto Nuns; Huault, "The Mother of Jesus". Devotional manuals have been published by the Fathers M. Watson and J. Ryan, S.J., and a prayerbook by the Australian Catholic Truth Society. This useful organization (established at the Second Australian Catholic Congress in 1904) is doing excellent service by its publications, which embrace nearly every department of Catholic literature. A place of honour in Australian apologetic and general literature is rightly due to the two volumes containing the Proceedings of the Australasian Catholic Congresses held at Sydney (1900) and Melbourne (1904).

*Physical Science, Law, Politics, etc.*—The foremost names in geological science in Australia are those of the Rev. Julian E. Tenison Woods, F.G.S., and the Rev. J. Milne Curran, F.G.S. Father Woods was author of "Geological Observations in South Australia", "Geology of Portland", and "North Australia and its Physical Geography". (Mennell says of this author: "His contributions to the pages of scientific journals and the proceedings of learned societies were numerous and valuable.") Father Curran is the author of "The Geology of Sydney and the Blue Mountains" and "Quantitative Analysis". T. A. Coghlan (Agent-General for New South Wales, Fellow of the Royal Statistical Society) is the Mulhall of Australian statistical science. The most important of his many publications while he was Statistician of New South Wales were: "The Wealth and Progress of New South Wales" and "The Seven Colonies of Australasia", both of which went through numerous editions. His successor as statistician of the mother-state is W. H. Hall, author of "The Official Year-Book of New South Wales". W. H. Archer, K.S.G.G., published sundry statistical works while Registrar-General of Victoria in its young and strenuous days, and for twenty-five years Dr. E. S. Hall compiled and published the vital statistics of Tasmania. Charles (afterwards Sir Charles) Gavan Duffy was the author of a "Guide to the Land Law of 1862", which law was passed by a coalition Ministry in which he held the portfolio of Lands. Other legal textbooks were written by Frank Gavan Duffy (son of Sir Charles), Judges Casey and Quinlan, M. Brennan, Bernard O'Dowd, N. G. Power, and J. Hood. Benjamin Hoare, author of "Preferential Trade", ranks high in political circles as an authority on protective tariffs. John D. Fitzgerald, an author of recognized ability on municipal reform, has written "Greater Sydney and Greater Newcastle". Frederick J. Bloomfield did the Australasian work in "Webster's Dictionary". Helen K. Jerome wrote a work on Japan. The Rev. Julian E. Tenison Woods compiled an "Australian Bibliography"; and useful educational works have issued from his pen and from those of Fathers P. J. O'Mara and W. Kelly, S.J., and of J. W. Foster-Rogers. Archbishop O'Reilly (Adelaide) has written pamphlets on music, a subject on which he is an authority of Australian reputation.

**Fiction.**—Daniel E. Deniehy, lawyer, statesman, journalist, will be best remembered for his clever skit, "How I Became Attorney-General of Barataria", which was famous in its day, and is still as readable as ever. James Francis Hogan published "An Australian Christmas Collection" of colonial stories and sketches. Ambrose Pratt is the author of "The Great Push Experiment", "Franks, Duellist", and "Three Years with Thunderbolt". Among other Australian Catholic writers of fiction whose work has appeared in book form are the following: Miss Tennyson, Roderick Quinn, Laura Archer (a collection of Queensland tales), F. M. Korner (pen name, "George Garnet"), a Loretto nun (author of "I Never Knew"), the Rev. P. Hickey ("Innisfail"). "Australian Wonderland" is a cleverly written book for children, in which two sisters (one of them a Sister of Mercy) collaborated. Newspaper and periodical literature has also been enriched with some excellent work in fiction by Australian Catholic writers.

**Poetry.**—Among the poets, two Irish singers, "Eva" of the Nation (Mrs. Kevin Izod O'Doherty) and "Thomasine", are now (1907) passing the evening of their lives in humble retirement in Queensland. Roderick Flanagan (the historian of New South Wales) published in his day a volume of verse. Victor J. Daley was a gifted and prolific verse-writer, but his only published work is "At Dawn and Dusk". John Farrell, for a time editor of the Sydney Daily Telegraph, was the author of "How He Died, and Other Poems". In 1897 he wrote a "Jubilee Ode" which was pronounced to be finer than Kipling's "Recessional" as a piece of national stock-taking. Roderick Quinn has written "The Higher Tide", and "The Circling Hearths"; Edwin J. Brady, a poet of the sea and wharveside, "The Way of Many Waters"; Bernard O'Dowd, "Dawnward" and "Darrawill of the Silent Land"; Cornelius Moynihan, "Feast of the Bunya, An Aboriginal Ballad", with a preface containing curious historical, legendary, and ethnological lore regarding the Queensland blacks; the Rev. W. Kelly, S.J., three convent dramas in blank verse; J. Hood, "Land of the Fern"; John B. O'Hara, "Songs of the South" (2d series), "Sonnets, Odes, and Lyrics"; the Rev. M. Watson, S.J., a series of seven handsomely illustrated Christmas booklets in verse which have gone through many editions. Volumes of verse have also been published by Marion Miller ("Songs From the Hills"), and Rena Wallace ("A Bush Girl's Songs"). Some meritorious work by Australian Catholic poetic writers (including various odes, etc., by the Rev. J. J. Malone) has not appeared in separate form.

**Catholic Journalism** in Australia had a long and thorny road to travel before it reached assured success. Beginning with "The Chronicle" (founded in Sydney, in 1839), the way was strewn with failures, which, however, helped to form the steps leading others to better things. The existing Catholic newspapers and periodicals of Australia, with their dates of foundation, are, *Weekly*: Sydney, N. S. W., "The Freeman's Journal" (the oldest existing newspaper in Australia, founded and first edited by Archdeacon McEncroe in 1850); and "The Catholic Press" (1895); Melbourne, Victoria, "The Advocate" (1868), "The Tribune" (1900); Brisbane, Queensland, "The Australian" (founded by Dr. O'Quinn in 1878), "The Age" (1892); Adelaide, South Australia, "The Southern Cross" (1889); Perth, W. A., "The W. A. Record" (1874); Launceston, Tasmania, "The Monitor" (founded in 1894 by amalgamating "The Catholic Standard" of Hobart, and "The Morning Star" of Launceston).—*Monthly*: Melbourne, "The Australian Messenger" (1887); "The Austral Light" (an ecclesiastical property since 1899); Sydney, "The Annals of Our Lady".—*Quarterly* and *Annual*: "The Australasian Catholic Record" (founded by Cardinal

Moran, in Sydney, in 1894); "The Madonna" (Melbourne, 1897); "The Garland of St. Joseph" (1906). A useful "Catholic Almanac and Family Annual" is published for the Diocese of Maitland. Illustrated scholastic annuals are also issued by most of the Catholic colleges for boys, and by some of the secondary schools for girls.—In size, literary quality, successful management, and influence, the Catholic newspapers and magazines of Australia easily outrival the rest of the religious press in the Commonwealth. Many Catholic names of note in the political, judicial, literary, and scientific history of Australia were, for a time at least, associated with the religious or secular press of the country. Among them may be mentioned: Sir Charles Gavan Duffy; the Right Hon. William Bede Dalley, P.C., Q.C.; the Hon. John Hubert Plunkett, Q.C., M.L.C.; Sir Roger Therry; Richard Sullivan (brother of A. M. and T. D. Sullivan); Judges Therry, Real, Power, O'Connor, Casey, Heydon, and Quinlan; the Hon. Edward Butler, Q.C., M.L.C., and his brother, Thomas Butler; E. W. O'Sullivan; Sir John O'Shannassy, K.C.M.G.; the Hon. Sir Patrick Jennings, K.C.M.G., LL.D., M.L.C.; Edward Whitty, the brilliant Anglo-Irishman, who ended his days in Melbourne; William A. Duncan, C.M.G.; Roderick Flanagan; Daniel E. Deniehy; Philip Mennell, F.R.G.S.; John Farrell; Victor J. Daley; the Rev. Julian E. Tenison Woods; the Hon. J. V. O'Loghlin; the Hon. Hugh Mahon; J. F. Hogan; Benjamin Hoare; Roderick and P. E. Quinn; F. J. Bloomfield; Ambrose Pratt; Helen K. Jerome; John Hughes, K.C.S.G.; John Gavan Duffy; Frank Leverrier (noted as a scientist); Kenneth McDonall;—Nicholson; Frank and Martin Donohoe; Ernest Hoben; C. Brennan; T. Courtney; and others. Phil May first won fame as a caricaturist in the columns of an illustrated weekly published in Sydney. A number of able lay and clerical writers are associated with the Catholic newspapers and periodicals of Australia.

*The Australian Handbook* (various dates); the *Year-Books* of the various States; COGHLAN, *Wealth and Progress of New South Wales* (various dates), and *The Seven Colonies of Australasia* (various dates); *Acta et Decreta* of the Australian Plenary Synods of 1885 and 1895; *Historical Records of New South Wales*; BENNETT, *South Australian Almanac* (1840); KENNY, *The Catholic Church in Australia to the Year 1840*; FLANAGAN, *History of New South Wales* (1862); THERRY, *New South Wales and Victoria* (1863); *The National History of England* (1877); MAY, *Constitutional History of England* (1882); *Epitome of the Official History of New South Wales* (1883); BONWICK, *The Port Phillip Settlement* (1883), and *The First Twenty Years of Australia* (1883); FENTON, *History of Tasmania* (1884); DILKE, *Greater Britain* (1885); MCCARTHY, *History of Our Own Times* (1887); HOGAN, *The Irish in Australia* (1888); SUTHERLAND, *History of Australia* (1888); LUMHOLTZ, *Among Cannibals* (1890); HUTCHINSON, *Australasian Encyclopedia* (1892); MENNELL, *Dictionary of Australian Biography* (1892); BRITTON, *History of New South Wales from the Records* (1894); MORAN, *History of the Catholic Church in Australasia*; HEATON, *Australasian Dictionary of Dates* (1897); DAVITT, *Life and Progress in Australasia* (1898); COGHLAN, *Statistics of the Seven Colonies of Australasia from 1861 to 1899* (1900); JOSE, *History of Australia* (1901); COGHLAN and EWING, *Progress of Australasia in the Nineteenth Century* (1903); HOWITT, *The Native Tribes of South-East Australia* (1904); SPENCER and GILLEN, *The Native Tribes of Central Australia* (1904), and *The Northern Tribes of Central Australia* (1904); HALL, *States of Australia and New Zealand* (1905); *The Australasian Catholic Directory for 1906*.  
HENRY W. CLEARY.

**Austrebertha**, SAINT, Virgin, born c. 630 at Therouane in the modern department of Pas-de-Calais in France; d. 10 February, 703 or 704. When her father desired to give her in marriage to a young nobleman, she fled from home and took the veil from the hands of Bishop Saint-Omer. Some time later she entered the monastery of Port on the Somme, where she was later elected prioress. Soon afterwards she was appointed first abbess of the newly erected convent of Pavilly in Lower Seine. Under her direction the nuns of Pavilly became so celebrated for sanctity that parents came from all sides to place their daughters under the guidance of Austrebertha. Her name is in the Roman martyrology and she is hon-

MICHAEL OTT.

**Austremonius**, SAINT, Apostle and Bishop of Auvergne (c. 314). All that is certainly known of Austremonius is deduced from a few brief sentences in the writings of St. Gregory of Tours (Hist. Franc., I, xxx, and De Glor. Confessorum, c. xxix). According to this authority he was one of the seven bishops sent from Rome into Gaul about the middle of the third century; he laboured in Auvergne and is said to have been the first Bishop of Clermont. But from a study of the episcopal lists as given by St. Gregory himself, St. Austremonius could hardly have antedated the commencement of the fourth century, since his third successor died in 385. It is more likely, therefore, that he was the contemporary of the three Bishops of Aquitaine who attended the Council of Arles in 314. He was not a martyr. His cult began about the middle of the sixth century, when Cantius, a deacon, saw a vision of angels about his neglected tomb at Issoire on the Couze. His body was afterwards translated to Volvic, and in 761 to the Abbey of Mauzac. Towards the middle of the ninth century, the head of the saint was brought to St.-Yvoine, near Issoire, and about 900 was returned to Issoire, the original place of burial.

FRANCIS P. HAVEY.

**Austria.** See AUSTRO-HUNGARIAN MONARCHY.

**Austro-Hungarian Monarchy**, THE.—By this name is designated the European monarchy whose dominions have for their main life-distributing artery the River Danube, in its course from Engelhartzell, near Passau, to Orsova. South of the Danube lie the Austrian Alpine provinces and the provinces of Carinthia and Carniola; north of the Danube are the Carpathian and Sudetic provinces.

**AREA AND POPULATION.**—The monarchy as a whole has an area of about 262,577 square miles (680,887 square kilometres), and a population of about 48,592,000. This gives it the second place in extent of territory, and the third place in respect to population, among the political divisions of Europe. The average density of its population is, approximately, 185 to the square mile. The monarchy holds away over: (a) the kingdoms and provinces represented in the Austrian Parliament, or Reichsrat, which have together an area of 115,695 sq. m. (300,008 sq. km.) and a population of 26,969,812; (b) the provinces of the Hungarian Crown which have a total area of 127,204 sq. m. (329,851 sq. km.) and a population of 19,885,465; (c) Bosnia and Herzegovina, with an area of 19,678 sq. m. (51,028 sq. km.) and a population of 1,737,000, occupied and administered by Austria-Hungary, though still theoretically a part of the Ottoman Empire. These populations include a great variety of races. In the Austrian territory there are: Germans, 9,171,000; Czechs, 5,955,000; Poles, 4,259,000; Ruthenians, 3,376,000; Slovenes, 1,193,000; Italians and Ladini-ans, 727,000. In Hungary the population is composed of: Magyars, 9,180,000; Rumanians, 2,867,000; Germans, 2,138,000; Slovaks, 2,055,000; Croats, 1,734,000; Serbs, 1,079,000; Ruthenians, 443,000. The inhabitants of Bosnia and Herzegovina are Servo-Croatians.

The capitals of the three main divisions are: Austria, Vienna, with 1,675,000 inhabitants; Hungary, Budapest, with 732,000 inhabitants; Bosnia and Herzegovina, Serajevo, with 38,000 inhabitants.

The only strip of coast land in Austria-Hungary lies on the Adriatic and has a length of 1,366 miles (2,200 km.). The countries which border on Austria-Hungary are: Italy, Switzerland, the principality of Liechtenstein, Bavaria, Saxony, Prussia, Russia, Rumania, Servia, Turkey, and Montenegro.

**CHURCH HISTORY.**—The Austro-Hungarian Monarchy was created by the union of the Germanic, Slavonic, and Hungarian provinces which now lie within its territory. This union took place in 1526. Upon the death of Louis II of Hungary and Bohemia at the battle of Mohács, in that year, Bohemia and Hungary were united to the Austrian possessions of Ferdinand I, of the Hapsburg family. This union was in accordance with the law of succession as well as the result of a free choice. Up to 1526 each of these three divisions of the present empire had its own separate religious history.

**A. Early Christianity.**—The Romans in the time of Augustus took possession of those provinces of the present Austria-Hungary which lie south of the Danube. In the course of time they built roads, founded cities, turned the territory into Roman provinces, and here and there converted the inhabitants to Christianity. The cities of Aquileia and Salona, episcopal sees from the middle of the first century, were centres of Christianity for Noricum and Pannonia. In the year 294 five Christian workmen were thrown from the marble bridges of Sirmium (Mitrowitz) into the Save and drowned. During the persecution of the Christians under the Emperor Diocletian, in 304, the soldier Florianus was thrown into the Enns at Lauriacum (Lorch). The house of Augustinian canons, at St. Florian, in Upper Austria, now stands on the spot where the body of this saint was buried. A tradition gives the same date for the martyrdom of the two bishops Victorinus of Petovia (Pettau in Southern Styria) and Quirinus of Siscia, who met death where the Kulpa empties into the Save. Even at this period Christianity must have had a large number of adherents in these districts, for already an established organization is found here. The bishops of Noricum were under the control of the Patriarch of Aquileia, while Pannonia was subject to the Metropolitan of Sirmium.

The last representative of Christian culture among the Roman inhabitants of the Danube district is St. Severinus. The story of his life, by his pupil Eugippius, is the only written document we have for the history of the Danubian provinces during the last years of Roman occupation. Severinus settled near the present city of Vienna, built a monastery for himself and his companions, and led so austere a life that even in winter, when the Danube was frozen, he walked up and down over the ice barefoot. His journeys upon the frozen river were errands of consolation to the despairing provincials, who saw themselves threatened on all sides by bands of marauding barbarians. In these journeys Severinus travelled as far as Castra Batava (Passau), and inland from the river up to Juvavum (Salzburg). God had granted him the gift of prophecy. When Odovakar (Odoacer), King of the Heruli, set out on his march against Rome, he came to the saint and asked for his blessing. Severinus spoke prophetically: "Go forward, my son. To-day thou art still clad in the worthless skins of animals, but soon shalt thou make gifts from the treasures of Italy." After Odovakar had overthrown the Roman Empire of the West, and had made himself master of Italy, he sent and invited Severinus to ask from him some favour. Severinus only asked the pardon of one who had been condemned to banishment. The Alamannic king, Gibold, also visited him in Castra Batava, and the saint begged as a personal grace that the king cease from ravaging the Roman territory. His usual

salutation was "Sit nomen Domini benedictum", corresponding to our "Praise be to Jesus". When Severinus lay dying the sobs of his disciples prevented their praying; he himself began to recite the last psalm, and with the closing words of this psalm, "Omnis spiritus laudet Dominum", he passed away (482). Six years later the Romans withdrew from this region, taking the body of the saint with them, and returned to Italy. Here he was buried with suitable honour in the castle of Luculanum, near Naples.

B. *The Middle Ages.*—During the period of migrations which followed the fall of the Roman Empire, Austria was the fighting-ground of the barbaric hordes which poured through it. Vindobona disappeared from the face of the earth; Pannonia was entirely laid waste by the Avars, a people related to the Huns. The same fate befell Styria, Carinthia, and Carniola, desolated by the Slovenes, who now took possession of those provinces. The land lying on the upper Drave has since borne the name of "Pustertal" (from the Slovenic *pust*, "waste"). The Croats and Serbs seized the country south of the Save. The Croats are the first-born sons of the Church among the Slavs. They were converted, about the year 650, by Roman priests. The Bajuvarii (Bavarians), a people from the West, spread themselves over the whole of Upper Austria. St. Rupert, Bishop of Worms, baptized the Bavarian duke, Theodo, at Regensburg (Ratisbon) and became the Apostle of the Austrian Bajuvarii. He travelled and preached nearly as far as Lauriacum, settled in Salzburg, and there erected a see and founded the monastery of St. Peter (c. 700). St. Peter's is the oldest Benedictine monastery which has had a continuous existence down to our own times, Monte Cassino having been repeatedly destroyed and deserted. The Benedictine cloister for women, Nonnberg, founded by Rupert's niece Ehrentraut, is also still standing. The Bavarian Duke Tassilo founded the Benedictine monasteries of Mondsee (748) and Kremsmünster (777). The Bishops of Salzburg brought the Christian Faith and German customs to the Slavs. A quarrel broke out, however, between the Carinthians and the Patriarch of Aquileia. Charlemagne raised the Carinthian see of Salzburg to an archbishopric in 798, settled the dispute with Aquileia by making the Drave the dividing line of the two provinces, and in 803 established the border territories known as the Mark of Friuli and the East Mark.

Moravia was won to Christianity by two brothers, Methodius and Constantine, Greek monks from Thessalonica, known in history as the Apostles of the Slavs. Constantine invented the Glagolitic alphabet, translated the Bible into Slavic, and composed the liturgy in that language. But, as Salzburg and Passau laid claim to the region in which the brothers worked, complaint was made against them by the German ecclesiastics. Pope Hadrian II, however, authorized the liturgy in the Slavic language. Constantine remained at Rome in a monastery and took the name of Cyril, while Methodius, after many fruitful labours as Archbishop of Pannonia and Moravia, died 6 April, 885, at Velehrad, on the River March. The Apostles of the Slavs are now (pursuant to a decree of Leo XIII) commemorated throughout the Catholic Church on the 5th day of July. The Latin Liturgy was reintroduced in Moravia by Swatopluk, the successor of Duke Ratislaus, and soon after his death the Magyars overthrew the empire of Great Moravia (906). When Moravia is again heard of in history (founding of the bishopric of Olmütz, 1063), it is a province of Bohemia.

Christianity was introduced into Bohemia from Moravia. Of the Slavic tribes which at the end of the fifth century controlled the interior of Bohemia

and drove the Germans to the outskirts of the country, the Czechs of Prague were the most important division. In A. D. 871 their prince, Borziwoy, and his wife, Ludmilla, consented to receive baptism from St. Methodius. From this time on the history of Bohemia is an account of the struggles between two contending parties, the Christian-Germanic and the National Heathen. At the instigation of the National Heathen party the saintly Duke Wenzel (Wenceslaus) I was murdered by his brother, Boleslaw I. But even Boleslaw had to rule according to the wishes of the Christian-Germanic party, and his son Boleslaw II founded the Bishopric of Prague (973). The new see was placed under the Archbishop of Mainz, and its first bishop was the Saxon Dithmar. His successor, St. Adalbert (Wojtech), met a martyr's death (997) at the hands of the heathen Slavs of Prussia, whom he sought to bring to the truth. The Benedictine Order came into Bohemia with the founding of the monastery of Borevnov by Boleslaw II, and Boleslaw's sister, Milada, was the first abbess of St. George, the Benedictine cloister for women in Prague. Duke Bretislav seized Gnesen and brought the body of St. Adalbert in triumph to Prague. Dabrowka, the daughter of Boleslaw I, married the Polish Duke Mieczyslaw, and the latter was baptized in 966. The son of Mieczyslaw laid the foundation of an enduring church-organization by forming the four bishoprics of Posen, Kolberg, Breslau, and Cracow, and placing them under the Archbishopric of Gnesen, which had been established in the year 1000.

The Magyars, a people from the Ural-Altai region, moved forward in 895 into the Avarian Wilderness on the Theiss. Attempts to convert them were made by the court of Byzantium as well as by St. Wolfgang, a monk of Maria Einsiedeln, by Pilgrim, Bishop of Passau, who, as successor of the Bishops of Lorch, wished to be Metropolitan of all Pannonia, and by Adalbert of Prague. Thus it was brought about that the Magyar ruler Géza, great grandson of Arpad, and his wife Sarolta were favourably inclined to Christianity. The real Apostle of the Magyars, however, was Géza's great son, St. Stephen. Stephen received a Christian education and was baptized by St. Adalbert. Upon the occasion of his marriage with Gisela, sister of the future emperor, St. Henry II, Stephen vowed to give his people the blessings of Christianity. One of the most important measures taken by him for the security of the new faith was the founding at Gran of an archbishopric with ten subordinate sees. As Stephen's patron saint in battle had been St. Martin, he founded the Benedictine monastery of Martinsberg. He also founded hospices for the reception of Hungarian pilgrims at Ravenna, Rome, and Jerusalem. Astricus, the Abbot of Martinsberg, obtained for him, from the pope, the title of king. Sylvester II sent Stephen a crown of gold and, according to a tradition (which, however, is not well founded) a Bull which decreed to the Kings of Hungary the privilege of the "Apostolic Majesty" (q. v.). Having a great devotion to the Blessed Virgin, Stephen caused himself to be crowned on the festival of the Assumption, the 15th day of August, in the year 1000, and church historians have given to Hungary the title of "Mary's Realm" (*Regnum Marianum*).

The gradual advance of Christianity in Austria towards the east is shown in the shifting of the abode of the early rulers of the Babenberg (Bamberg) line from Melk, on the Kahlenberg, to Vienna. One of this family, Leopold I, the Illustrious, had already founded at Melk an establishment of secular canons. These were replaced in 1089 by twelve Benedictine monks from Lambach. At the time when Leopold's youngest son, Adalbert I, the Victorious, was married, three youths left this region to go to Paris to

study. While on their way, they were obliged to spend a night in the open and fell to speaking of the future. Each wished to become a bishop, and each vowed that, if ever a bishop, he would found a monastery. One, Gebhard, became Archbishop of Salzburg and founded Admont and the Diocese of Gurk; another, Adalbero, Bishop of Würzburg, founded the monastery of Lambach; while the third, St. Altmann of Passau, founded Göttweig for twelve canons under the Rule of St. Augustine. The canons at Göttweig were replaced after the lapse of ten years by Benedictines from St. Blasien in the Black Forest. All three of these bishops remained true to Gregory VII in the controversy of investitures. The Crusades began during the reign of the Margrave Leopold II, the Saint, and many of the crusading armies traversed Austria. Leopold's mother, Ida, took part in a pilgrimage of which Thiemo, Archbishop of Salzburg, was the leader. The archbishop met the death of a martyr, and Ida was made a prisoner. Leopold erected a church on the Kahlenberg and founded the monasteries Klosterneuburg and Heiligenkreuz. His wife, Agnes, widow of the Hohenstaufen Duke Frederick, bore him eighteen children. Their third son, Otto, studied at Paris, entered the Cistercian monastery of Morimond, became Bishop of Freising, and wrote a chronicle, "*De Duabus Civitatibus*," and a second work, "*Libri Duo De Gestis Friderici I*." By reason of these two works he is the most noted German historian of the Middle Ages.

After a hard struggle, the saintly King Ladislaus (d. 1095) succeeded in regulating the ecclesiastical and civil affairs of Hungary. He founded the Bishopric of Grosswardein and summoned the dignitaries of the Church and the State to a diet at Szabolcs. This diet is often called a synod, on account of the many decisions arrived at in church matters. The priests were ordered to observe celibacy strictly, the laity were commanded to keep Sunday and feast-days and to abstain from immorality. Ladislaus conquered Croatia, whose duke, Zvonimir, had received from a legate of Gregory VII at Salona (1076) a banner, sword, crown, and sceptre, with the title of king, in return for which he had sworn fealty to the pope.

Henry II, Jasomirgott, was the first Duke of Austria. He built a residence for himself at Vienna (*Am Hof*), in which was the Pancraz chapel, and founded the Schottenkloster for Benedictine monks from St. Jacob's at Regensburg. Octavian Wolzner, an architect from Cracow, erected for the new duke the church of St. Stephen, to which the parish of St. Peter was added. Leopold V, the Virtuous, son of Henry II, took part in the Third Crusade and fought so bravely that, as we are told, his armour was stained blood red, and only the part under the sword belt remained white. However, Richard the Lionhearted tore down the Austrian banner at the storming of Ascalon and the enraged duke went home at once. While on his way to England, Richard was seized at Erdberg, and held a prisoner by the duke at Dürrenstein. Crusaders being under the protection of the pope, Celestine III put Leopold V under the ban. To this the duke paid no attention; but when he fell with his horse, at Graz, broke a leg, and found himself near death, his conscience smote him; he sent for Albert III, Archbishop of Salzburg, who was in the neighbourhood, and received absolution from him. Frederick I, the eldest son of Leopold V, ruled only six years and died while on a crusade. The reign of his brother, Leopold VI, the Glorious, was a brilliant one. He too went on a crusade and endeavoured first to capture Damietta, the key to Jerusalem, but was obliged to return home without having accomplished anything. He married a Byzantine princess and formed relations with men of Greek learning and culture. The duke built a

new castle for himself (Schweizerhof) and the church of St. Michael. The church was intended for the benefit of the duke's attendants, retainers, servants, and the townspeople who settled around the castle. The scheme to form a bishopric at Vienna was not carried out, but Eberhard II of Salzburg founded bishoprics at Seckau and Lavant, for Styria and Carinthia. Leopold's son and successor, Frederick II, the last of the Babenberg line, was knighted with much religious pomp at the feast of the Purification of the Virgin, 1232, in the castle church. Bishop Gebhard of Passau celebrated Mass and gave the consecrated sword to the duke, two hundred young nobles receiving knighthood at the same time. After the ceremony the young duke rode at the head of the newly made knights to Penzing, where jousts were held.

Within a short space of time the national dynasties of the countries under discussion died out in the male lines: the Babenberg Dynasty (Austria) in 1246, the Arpadian (Hungary) in 1301, and the Premyslian (Bohemia) in 1306. In 1282 the German Emperor, Rudolph of Hapsburg, gave Austria in fief to his son Albrecht. To Austria and Styria the dukes of the Hapsburg line soon added Carinthia, Carniola, the Tyrol, and the Mark of the Wends. The rulers of this line are deserving of great praise for their aid in developing church life in these territories. Albrecht I founded the court (*Hofburg*) chapel in his castle; Duke Rudolph IV in 1359 laid the corner-stone of the Gothic reconstruction of the church of St. Stephen. A hundred and fifty years elapsed before the great tower of the church was completed. With the consent of the pope the same duke founded the University of Vienna in 1365. The university was modelled on the one at Paris and possessed great privileges (freedom from taxation, right of administering justice). When part of the Council of Basle separated from Eugenius IV and set up Felix V as antipope, the theological faculty of the university, of which at that time the celebrated Thomas Eberdorffer of Haselbach was a member, sided with the antipope. But the papal legate, John Carvajal, and Æneas Sylvius Piccolomini, the emperor's governmental secretary, prevailed upon Frederick III to espouse the cause of Eugenius and to sign the Concordat of Vienna (1448). The concordat provided that the annates and the confirmation dues should be restored to the pope, that the pope should have the right to appoint to the canonries in the uneven months, and that the filling of ecclesiastical vacancies at Rome should be reserved to him. The concordat was gradually accepted by all of the German rulers, and up to the present time the relations between the German Church and the papacy are regulated by its provisions. In 1452 Frederick was crowned emperor at Rome, being the last emperor to be crowned in that city. In his reign the Bishoprics of Laibach (1462), Vienna, and Wiener-Neustadt (both the latter in 1469) were founded. During this period a great many monastic houses were founded in Austria, especially by the more recently established orders: Carthusian houses were founded at Mauerbach, Gaming, Agsbach; Franciscan at Vienna, Klosterneuburg, St. Pölten, Maria Enzersdorf, Popping; Dominican at Graz and Retz.

Under the Luxembourg line Bohemia attained a high degree of material and spiritual prosperity. Charles IV, before his reign began, succeeded in having Prague raised to an archbishopric (1344), and in this way made the country ecclesiastically independent of Germany. Charles had been a student at Paris, and immediately upon ascending the throne he founded the University of Prague (1348), the first university on German soil. Master Matthias of Anras and Peter Parler from Schwäbisch-Gmünd began the erection of the stately Cathedral of St.

Vitus which is now nearing completion. Parler also erected the Teynkirche (Teyn church) in Prague, and the church of St. Barbara in Kuttenberg, while Matthias of Anras built the fortress-castle of Karlstein. The crown jewels of Bohemia were preserved in the sumptuous chapel at Karlstein. But Bohemia had a sudden fall from the height it had attained. King Wenzel (Wenceslaus), son of Charles IV, had no control of his temper, and began a quarrel with the archbishop. The archbishop's vicar-general, John of Pomuk (St. John Nepomucene), refused to tell what he had heard in confession. He was first tortured and then, gagged and bound, was thrown at night into the River Moldau. At this time the first signs appeared in Bohemia of a religious agitation which was destined to bring the greatest sorrow both to Bohemia and to the adjoining countries. Jerome of Prague had become acquainted with the writings of Wyclif at Oxford. He returned home, bringing the teachings of Wyclif with him, and communicated them to his friend Hus. Hus came from Husinetz near Prachatitz. He was the child of a peasant, and had become professor of philosophy at the University of Prague, preacher in the Bohemian language at the Bethlehem chapel, and confessor to Queen Sophia. A complaint was brought in the university against Hus on account of his teaching. Of the four "Nations" (Saxons, Bavarians, Poles, and Bohemians), which had votes in the affairs of the university, only the Bohemians voted for Hus. Hus then turned a personal into a national affair. King Wenzel issued a command that henceforth the Bohemians should have three votes, and the other "Nations" only one vote. Upon this 5,000 students and the German professors withdrew and founded the University of Leipzig. The university was now simply a national one, and Hus without interference taught the following doctrines: the church consists only of the elect; no man is a temporal ruler, no man is a bishop, if he be in mortal sin; the papal dignity is an outcome of the imperial power; obedience to the church is the invention of men. Hus was suspended by Archbishop Zbinko; he appealed to the pope (Alexander V) and then to Jesus Christ. John XXIII placed Hus under the ban, Prague under an interdict, and called the Council of Constance. The Emperor Sigismund gave Hus a safe-conduct which protected him from acts of violence on the part of the indignant Germans through whose territory he must pass, but not from the verdict of the council. Hus was repeatedly examined before the council, but would not retract his opinions; the members of the council, therefore, unanimously condemned his errors and delivered him to the secular power, by which, in accordance with the law of the land at the time, he was condemned to death at the stake (1415). Jerome of Prague suffered the same death the next year. While at Constance Hus sanctioned the receiving of the sacrament in both kinds which had been introduced by Master Jacob of Miez (Calixtines). As a former monk, John of Selau, was leading a procession a stone was thrown at him from a window of the town hall. The throng, led by the knight John Zizka of Trocnov, attacked the town hall and threw the judge, the burgomaster, and several members of the town council out of the window into the street, where they were killed by the fall. This is known in history as the "First Defenestration of Prague". King Wenzel was so excited by the episode that he was struck with apoplexy and died. The Hussite wars caused fearful devastation not only in Bohemia, but in the adjacent countries as well. Fortunately, the Hussites divided into the more moderate Calixtines, under John of Rokyzana, and the "Taborites", so called from the city and mountain which they named Tabor. The Taborites were led by John Zizka and Procopius the Great,

who was also called the "Shaven" (*Iloly*) because he had been a monk. After Zizka's death the extreme radicals took the name of "Orphans" because no one was worthy to take Zizka's place. They were finally conquered, and an agreement, called the *Compactata* (Treaty of Iglau) based on the Four Articles of Prague, was made with the moderate party (1436). The *Compactata* provided: that in Bohemia everyone who demanded it should receive Holy Communion under both kinds; mortal sins should be punished, but only by the legal authorities; the Word of God should be freely expounded by clergy appointed for the purpose; ecclesiastics should manage their property according to the rules of the church. After this, Hussitism lived on in the "Bohemian Brethren", who elected a bishop at Lhota near Reichenau (1467), and were finally carried into the current of the Reformation.

In Hungary Christian culture flourished during the reign of the House of Anjou. Louis the Great founded universities at Alfofen and Fünfkirchen, and built the fine cathedral at Kaschau. When Constantinople was captured by the Turks (29 May, 1453), a cry of horror resounded throughout Europe, and the pope sent forth John Capistran to preach a crusade. The saintly monk came with an immense following from Italy to Germany, Bohemia, and Hungary. He preached in the open, as the churches could not hold his hearers. A stone pulpit with a statue of the saintly Capistran stands on the east side of St. Stephen's Cathedral, Vienna. A hundred thousand people crowded the square and the roofs of the houses to hear him. This was the more remarkable because Capistran preached in Latin. Yet all who saw and heard him were moved to their innermost souls. The Turks, in 1456, tried to capture Belgrad, the key to Hungary. The papal legate, John Carvajal, and John Capistran raised a crusading army with which John Hunyady was able to defeat, at Belgrad, a Turkish army much more numerous. This was called the "Battle of the Three Johns". Hunyady and Capistran died shortly afterwards from camp fever. Hunyady's son had been educated by John Vitez, Bishop of Grosswardein, afterwards Archbishop of Gran. This prelate instilled such a love of learning into his pupil that when the latter ascended the throne as Matthias Corvinus, he gathered learned men about him, re-established the decayed university at Ofen, and founded a new university at Pressburg. Thirty copyists were kept busy at Ofen transcribing the Greek and Latin classics. The volumes, which were beautifully illuminated and handsomely bound, were known as Corvinian books.

C. *Modern Times*.—If in analyzing church history Christian antiquity is taken to represent the period of the life and labours of the Church among the peoples influenced by Greek and Roman civilization, and the Middle Ages the period of the Church's life and labours among the Germans and the nations which came into contact with them, then the modern period of history must be taken as that in which the influence of the Church began to extend throughout the whole world. Modern times would, according to this theory, begin with the discovery of the New World. But if the beginning of the modern era is made, as it usually is, to coincide with the Reformation, then it is further marked by the rise of that monarchy which was formed by the union of the Austrian, Slavonian, and Hungarian provinces under the Hapsburgs in 1526.

Ferdinand of Hapsburg, the ruler of the German-Austrian crown provinces, had married, at Linz, Anna of Hungary and Bohemia. When Anna's brother, Louis II, was killed in the desperate battle of Mohács (1526), Ferdinand of Austria succeeded by right of inheritance and election as King of Bohemia

and Hungary. The new doctrine taught at Wittenberg was soon brought into the Austrian provinces. Miners were the first to spread the new teaching. Noble families frequently sent their sons to German universities, and even to Wittenberg, and these students often returned with Protestant ideas, and even brought Protestant preachers with them. The constant danger from the Turks in Austria was exceedingly opportune for the new religious movement. One of the first preachers of the new doctrine in Vienna was Paul of Spretten (Speratus), a Swabian, who had been driven out of Salzburg on account of his Lutheran views. The new doctrine entered Hungary and Transylvania through merchants who brought Lutheran books with them, and it took hold, more especially, among the German population of the Zipser region and among the Saxons of Transylvania. Mátyás Biro, known as Devay, from the place of his origin, Deva in Transylvania, has been called "the Luther of Hungary". Most of the Hungarian bishops had fallen at the battle of Mohács, and the subsequent disputes concerning the succession to the throne distracted the monarchy. For these reasons the new doctrines spread rapidly, and Devay was able to bring over to it such noble families as the Batthyány and Bpesskay. It was then that Calvinism began to be called in Hungary *Magyar hit* (Hungarian faith), Lutheranism *Nemes hit* (German faith), and Catholicism *Igaz hit* (Right faith). Equal success accompanied the preaching of John Gross of Cronstadt in Transylvania, despite the efforts of George Utyessenich to check him. Utyessenich (also called, after his mother, Martinuzzi) was prior of the Pauline monastery at Szenstochov near Cracow, and governed Transylvania as guardian of John Sigismund Zápolyas. Gross added *Honler* to his name in memory of his deliverance by an elder bush (in the Transylvanian dialect *honlert*) from death by drowning. In order to secure the crown for her son, John Sigismund Zápolyas, his mother, Isabella, was obliged to sanction the decisions of the diet which met at Thorenburg (Torda) near Klausenburg. These granted to adherents of the Augsburg Confession equal rights with the Catholics. In Bohemia and Moravia Lutheranism first found adherents among the Germans and especially among the sect of the Utraquists. — Just as the Hapsburg Dynasty showed itself at this period to be the shield of Christianity against the advance of Islam, so also it proved itself by its constancy and zeal to be the support of the Faith against the religious innovations. Pope Pius IV conceded the cup to the laity in the Archdioceses of Gran and Prague, a concession, however, withdrawn by St. Pius V. Ferdinand I sought in many ways to be of aid: by his mandates, by the inspection of convents and parishes, by his care in selecting competent ecclesiastics, by the introduction of the newly established Society of Jesus, and by proposals which were sent to the Council of Trent in support of reforms. The mandates of Ferdinand were of little use, but the inspections and the enforcement of the decisions of the Council of Trent had effect. The Bishops of Vienna, Fabri (Heigerlein), and Frederick Nausea (a Latinization of Grau; *Nausea*, horror, disgust) were unusual men. With unflinching zeal both preached on Sundays and feast days in the Cathedral of St. Stephen and took part in the religious movement by the publication of theological pamphlets. Nausea's sermons are characterized in a rude rhyme of the day:—

Viel tausend Menschen standen da  
Es predigt Bischof Nausea,  
Wie er denn pflegt zu aller Zeit  
Sein' Schäflein zgeben selbst die Weid.

"Many thousands gather where Bishop Nausea preaches, and himself, as his wont is, feeds his flock". — In the Austrian provinces the Jesuits were the

most important factor in the defence of the Faith and the elevation of Christian life. Ferdinand I obtained from St. Ignatius the founding of a Jesuit college in Vienna. The first two Jesuits came to Vienna in 1551. They were followed, the next year, by St. Peter Canisius, the first German member of the order, were assigned the abandoned Carmelite monastery Am Hof, obtained two chairs in the theological faculty, and founded a gymnasium with a theological seminary attached. St. Peter Canisius was named court preacher, and for a time was administrator of the Diocese of Vienna. He still influences the present day through his "Summa Doctrinæ Christianæ"; an abridgment of which, called the catechism of Canisius, is still in use. A few years later the Jesuits founded at Prague a gymnasium, a theological school, and a university for philosophical and theological studies, which in contradistinction to the "Carolinum" was called the "Clementinum". They also founded schools at Innsbruck and at Tyrnau. The tutor and court preacher of Maximilian II, Ferdinand's eldest son, was Sebastian Pfauser, a man of Protestant tendencies. It was feared that Maximilian would embrace the new creed, but the papal nuncio, Bishop Hosius of Ermland, pointed out to him those inconsistencies in the Protestant doctrine which prove its falsity. Maximilian II gave permission to lords and knights to follow the Augsburg Confession in their own castles, cities, and villages. David Chytráus of Rostock drew up for the Protestants a form of church service. In Bohemia the Evangelicals united with the Bohemian and Moravian Brethren, and called the new agreement the "Bohemian Confession". They had a consistory of fifteen to which the Evangelical clergy were subordinate. Maximilian's position in the part of Hungary controlled by them was a difficult one, because rebels concealed their political schemes under the cloak of a struggle for religious freedom. His brother Charles was master of the inner Austrian provinces, Styria, Carinthia, Carniola, and Görz. He summoned the Jesuits to Graz and, in the religious pacification of Brück, granted the free exercise of religion at Graz, Klagenfurt, Laibach, and Judenburg. In return he demanded that the Protestants should leave him and his coreligionists undisturbed in their faith, rights, and estates; besides this the Lutheran preachers and teachers were obliged to leave the cities, market towns, and estates under the personal rule of the archduke. In order to counterbalance the endowed schools of the Styrian provinces the Archduke Charles founded the University of Graz (Carolina) in 1586. Charles's son Ferdinand (later the Emperor Ferdinand II) was educated at Ingolstadt, and while there he declared, "I would rather give up land and people and go away in nothing but a shirt than sanction what might be injurious to religion". When he became ruler he appointed commissioners who cleared the land of these preachers (rangers). The bishops George Stobäus of Lavant and Martin Brenner of Seckau (the Hammer of the Heretics) were at the head of these reformatory commissions. But no blood was shed in this counter-reformation.

At the distribution of provinces Archduke Ferdinand, husband of Philippina Welser had received the Tyrol. The diet of 1570 decided the religious position of that province. The governor, Jacob of Pagrsbach, declared firmly that to grant the wishes of the Protestants would be contrary to the customs and ordinances of the land and, further, that it would be folly to rend religion, the strongest tie which binds hearts together. All classes agreed with him. Rudolph II, Maximilian's eldest son and successor, lived in the Hradschin at Prague, where he carried on his studies in alchemy and art. The Archduchy of Austria was ruled by his brother Ernst. Ernst

was aided by Melchior Khlesl, who brought about the counter-reformation in Austria. Khlesl was the child of Protestant parents; his father had been a baker in Vienna. He was converted by the court preacher, George Scherer. From the time of Scherer until the suspension of the order the court preachers were chosen in unbroken succession from the Jesuits. Khlesl became Provost of St. Stephen's, Chancellor of the university, and Bishop of Vienna. During the reigns of Ernst and his brother Matthias, Khlesl was all powerful. Rudolph II having shut himself up in Prague, the members of the Hapsburg family chose the Archduke Matthias to be their head. The Bohemians held to Rudolph II, but wrung from him a rescript (*Majestätsbrief*) in 1609. This confirmed the Bohemian Confession, granted the Protestants permission to use the university, and gave them the right to choose a consistory; it also allowed the three temporal estates of lords, knights, and cities having chartered rights to build Protestant churches and schools. Contrary to the provisions of this agreement, subjects of the Archbishop of Prague built a Protestant church at Klostergrab, and subjects of the Abbot of Braunau did the same at Braunau. The bishops ordered these to be closed, and when the Emperor Matthias supported them the result was (1620) the "Second Defenestration of Prague" with which the Thirty Years War began. The Elector Palatine Frederick V, the head of the Protestant League and of the German Calvinists, was elected King of Bohemia. The cathedral was altered to suit Calvinistic church services. The altars were demolished, the pictures destroyed, and Scultetus, the court preacher, arranged a church service. No ruler ever began to reign under more distressing conditions than Ferdinand II. The insurgents under Thurn stood before the gates of Vienna; those unfriendly to Catholicism within the city made common cause with the enemy. Ferdinand, however, never lost courage. Khlesl, Bishop of Vienna, proved to be too weak and was therefore confined first in the castle of Ambras and then in the castle of Sant' Angelo at Rome. He lived to have the satisfaction of being restored in state to his diocese. He founded in Vienna the Himmelspfortkloster, which commemorates the beautiful legend of the truant nun whose place as doorkeeper was taken during her absence by the Blessed Virgin.

After the battle of the White Mountain, Ferdinand took severe measures against the disturbers of the peace; they were driven out of the country, and finally the rescript, which had been the source of so much trouble, was annulled. A new constitution was published which, among other provisions, made the clergy the highest estate of the land. The emperor was obliged to give Upper Austria in pledge to Bavaria as security for the cost of the war. The cruelties of the Bavarian troops and Ferdinand's order, requiring the people either to leave the country or to return to the old belief, led to a peasant revolt under the leadership of Stephen Fadinger, the proprietor of a farm not far from St. Agatha, which was carried on until Fadinger died of a wound at Linz. The Catholic was now again the dominant religion and the Protestants retired into the little-frequented mountain districts. In Hungary the Government could not accomplish so much. However, Peter Pázmán laboured with success against the spread of the new religious doctrines. Pázmán was born at Grosswardein (Nagy Váradi) of Calvinistic parents. At sixteen he changed his creed, then entered the Society of Jesus and studied at Cracow, Vienna, and Rome. At Rome Bellarmine and Vasquez were among his teachers. When professor at Graz he published the "Imitatio Christi". He finally returned to Hungary, became Primate, and gained great influence for the Church through his eloquence, the

gentleness of his character, and his strong patriotic feeling. He brought about the return of fifty noble families to the mother church and was the author of the first Catholic polemic in the Hungarian language, a "Guide to Catholic Truth". He founded at Tyrnau a university which was later transferred to Budapest, and also the Hungarian College at Rome. Believing that the preservation of religion requires worthy servants he founded at Vienna, 1623, a college (Pazmaneum) for the training and instruction of clergy for all the dioceses of Hungary. Ferdinand II called Pázmán his friend. This emperor raised the bishops of Vienna to the rank of prince-bishops (1631). When the terrible religious war came to an end in the Peace of Westphalia, and the diplomats played with religious establishments and monasteries as boys play with nuts, and invented the term "secularization" to express the secular appropriation of the Church's estates, the Hapsburg princes were not willing to commit Austria to such a policy. At this crisis the Hapsburg Dynasty obeyed the directions of Providence. Had the house of Hapsburg then come forward as champions of the new doctrine which originated at Wittenberg, it would have been easy to renew the shattered imperial power in Germany and give to the crown of the Holy Roman Empire a lustre far exceeding that of any other European diadem. But reverence for God and Holy Church had greater weight with the emperors of this line than worldly advantage. For one hundred and twenty years they battled with the storms which the so-called Reformation had stirred up, while the armies of Islam attacked Vienna and the edge of the Ottoman Empire was pushed forward as far as Raab. Even when Louis XIV forced his way in from the West, bringing calamity in his train, and the war cry of the Osmanli was heard within the imperial citadel, the rulers of Austria still trusted in God. Innocent XI sent subsidies, and the saintly Father Marco D'Aviano aroused Christian enthusiasm by preaching a crusade. The feast of the Holy Name of Mary is a reminder that on the 12th of September, 1683, the power of Islam was forever broken before the walls of Vienna, and that the inheritance of St. Stephen was then freed from the Turkish yoke. God sent the rulers of Austria to do His work, and that they did it is an honour exceeding that of the quickly fading garlands which victory twines about the victor's chariot. During this period the Piarist and Ursuline orders were active in the work of education. New bishoprics were founded at Leitmeritz (1656) and Königgrätz (1664). Charles VI raised Vienna in 1722 to an archbishopric. While France at this time pointed with pride and reverence to its famous divines, the great preacher of Vienna was the always clever, but often eccentric, Augustinian, Father Abraham a Sanctâ Clarâ, whose family name was Ulrich Megerle. For example, preaching on the feast of the conversion of St. Paul (*Pauli*), he announced as his theme *Gauli*, *Mauli*, and *Fauli*. *Gauli* he interpreted to mean pride and sensuality (*Gaul*, "horse"); *Mauli*, gluttony, drunkenness, and wrangling (*Maul*, "mouth"); *Fauli*, indolence (*Jaul*, "lazy").

The fifty years preceding the French Revolution are known in history as the period of the "Enlightenment". The Rationalist writers of this period believed that by enlightenment, in their sense of the word, a cure could be found for the evils of the time, and a means of promoting the happiness of mankind. Men were led more and more away from the influence of the Church, the loftier aspirations of noble and pious souls were scorned, and only the claims of a refined sensuality deemed worthy of consideration. The new ideas made their way into Austria, and that country became the birthplace of Josephinism, so called from the Emperor Joseph II,

whose policy and legislation embodied these ideas. Maria Theresa forbade the sale of the book written by Febronius, but soon its sale to the learned and discreet was permitted. Urged by her council, Maria Theresa issued the "Placitum regium", made a stole-tax ordinance and obtained from Benedict XIV a reduction of the feast days. By this last regulation all the Apostles are commemorated on the feast of Sts. Peter and Paul, and all the martyrs in the Mass and Breviary on the feast of St. Stephen. The empress also abolished the convent prisons, and ordered that passages in the Breviary lessons for the feast of St. Gregory VII which are opposed to the increase of the secular power should be covered over with paper. She also put a stop to public excommunications and public penances. The last public penance (1769) was that of a merchant at Pyrawart in Lower Austria who had struck an ecclesiastic. He stood for an hour at the church door holding a black candle. When Clement XIV suppressed the Society of Jesus, the Archbishop of Vienna, Cardinal Migazzi, sought to save that order in Austria. "If the members of the order should be scattered, it would not be easy to fill their places; it would cost much expense and time to bring conditions back to the point at which these priests had left their work if they were forced to abandon it." Just twenty years later Migazzi begged the Emperor Francis II to re-establish the order. "I can prove to Your Majesty", he said, "that even the late French ambassador, who was certainly an unprejudiced witness, did not hesitate to say that but for the suppression of the Jesuits France would never have suffered from the Revolution, which brought such terrible results in its train. Three months before the death of Your Majesty's grandmother I heard her say, 'Oh, if I had only followed your advice and had availed myself of your statements!'" After the suppression of the Jesuits their property was converted into a fund for the aid of students, and the whole system of education was remodelled from top to bottom. Rautenstrauch, Abbot of Braunau, drew up a new scheme for a theological course, in which there should be "no squabbles of schools and scholastic chaos". Father Gratian Marx, of the Congregation of the Pious Schools, planned a Realgymnasium (high school without Greek) with six classes, which proved very successful. The common schools, which Maria Theresa had called a political necessity, were reorganized by Abbot John Ignaz Felbiger of Sagen in Prussian Silesia, each parish being given a primary school, each district a high school, and the capital of each province a normal school with which an institute for training teachers was connected. Felbiger wrote the necessary school books. The school at Kaplitz in southern Bohemia, under the supervision of the parish priest, Ferdinand Kindermann, was noted as a model school.

In ten years Joseph II published 6,200 laws, court regulations, and ordinances. Even those measures which were good and appropriate in themselves generally bore the evidences of precipitancy. His very first ordinances were directed against the government of the Catholic Church and aroused discontent by their interference with the affairs of the Church. The acceptance of papal decrees without the sanction of the Government was forbidden. The bishops were forbidden to apply for, or make use of, the quinquennial faculties of the Holy See, on the ground that they had full authority to act for themselves. On the other hand, they were not allowed to issue pastoral letters or instructions without the sanction of the Government. The Government soon began to close those monasteries which were not occupied with the spiritual care of a community, teaching, or nursing, and all the brotherhoods were suspended. About 738 religious houses were closed; 13 in Vienna

alone; 51 in Lower Austria. The property of these conventual institutions was turned into a fund for church expenses, which was to be administered by the several provinces. In Lower Austria alone 231 new parishes were formed. Much discontent was caused by the appointment of an "ecclesiastical court commission", which issued a number of arbitrary regulations concerning public worship: only one Mass was to be celebrated in a church, and that at the high altar; in parish churches, during the seasons of fasting, only two fast-day sermons, on Wednesday and Friday, must be preached; afternoon devotions, the Litany of Loretto, and the Rosary were forbidden; a requiem might be celebrated in a parish church upon the occasion of a death, but not upon the anniversary; it was forbidden to expose the Blessed Sacrament in a monstrance, the ciborium must be used instead; only when the Host was displayed could more than six candles be placed on the altar. A special regulation forbade the dressing of statues of the Virgin and ordered that the bodies of the dead should be buried in sacks and covered with quicklime. Further ordinances forbade the illumination and ornamentation of sacred pictures, the exhibition of relics, and pilgrimages. The Edict of Toleration (1781) granted the private exercise of their religion to Lutherans and Calvinists. The marriage law of 1783 runs: "Marriage in itself is regarded as a purely civil contract. Both this contract and the privileges and obligations arising from it are entirely dependent for their character and force on the secular laws of the land." In 1783, also, all schools, episcopal and monastic, for the training of the clergy were abolished, and general seminaries were founded at Vienna, Budapest, Pavia, and Louvain, with branches at Graz, Olmütz, Prague, Innsbruck, Freiburg, and Pressburg. This measure was intended to check the influence of the bishops in the training of ecclesiastics, and to obtain devoted servants of the State. The Minister of State, Van Swieten, took care that the new schools were supplied with suitable teachers and superintendents.

The first lodge of Freemasons, "Zu den drei Kanonen", was formed at Vienna in 1742; a lodge called "Zu den gekrönten Sternen und zur Redlichkeit" was formed soon after at Prague. Joseph II, however, had no alliance with Freemasons. "I know little about their secrets", he said, "as I never had the curiosity to take part in their mummeries". Still, his words, "The Freemason societies increase and are now to be found in the smallest cities", show the rapid growth of the order. Although many of the representatives of the Church failed to meet the new tendencies with force and courage, the Prince-Archbishop of Vienna, Cardinal Migazzi, attacked them boldly. He wrote vigorously and defended the Church with energy. He was well supported by the Primate of Hungary, Count Joseph Batthyányi, and in the lower provinces by the Cardinal Count von Frankenberg. But their efforts were in vain; the movement continued to grow. In this condition of affairs Pius VI felt it necessary to take some action, and he resolved to visit Vienna. This visit (1782) was very opportune for the emperor and the leaders of the new tendency in the empire. Eybel issued the libellous pamphlet, "Was ist der Papst?" The value of the pamphlet literature of the Josephinist movement is not in proportion to its amount. The roads traversed by the papal cortège were lined with the faithful who were eager to obtain the blessing of the Holy Father. The emperor met the pope at Wiener-Neustadt, and on the 22d of March the two heads of the Christian world entered the imperial city. The emperor showed the pope every attention, but his chancellor of state, Prince Kaunitz, was less considerate. At Easter the pope celebrated High Mass in the church of St. Stephen.

and afterwards blessed, from the balcony of the church facing Am Hof, the vast throng which filled the square. But the object of the pope's visit was gained only in part, although it may be said that the Josephinist fanaticism began to give place to a more sober mood. When the Holy Father left Vienna, 22 April, after a stay of just one month, the emperor accompanied him as far as Mariabrunn. Here, after praying in the church, the two parted. The next year the emperor visited Rome, where the Spanish ambassador, Azara, and Cardinal Bernis are said to have had a moderating effect upon him. There was no break with the Curia.

One work of lasting value which this emperor undertook was in connexion with diocesan boundaries. He took from the Diocese of Passau that part which lies in Austria and formed with it the See of Linz; the episcopal residence was transferred from Wiener-Neustadt to St. Pölten, Bregenz was made the seat of a vicar-general, and a bishopric was founded at Leoben. The worst blunder committed by Joseph II in his later years was his obstinate adherence, in spite of the warnings of Cardinal Frankenberg, to the scheme of erecting a general seminary at Louvain. Van Swieten put Stöger in charge of it. Stöger was one of the few Catholic priests who had committed themselves unreservedly to the "Enlightenment" movement. Maria Theresa had dismissed him from his position as teacher of church history, and his opinions were to be found in print in his compendium of church history. The career of Aurelius Fessler is a still more distressing example of the influence of the new spirit. Fessler was born in Hungary and came to Vienna as a Capuchin monk. There he became acquainted with Eybel, and as an offset to Eybel's "Was ist der Papst?" issued "Was ist der Kaiser?" Appointed professor of theology at Lemberg, he entered the Freemason lodge "Phönix zur runden Tafel", but was soon obliged to leave Lemberg "on account of debt and frivolous demeanour unsuited to his calling". He became a Lutheran, established himself in Berlin as legal counsellor in ecclesiastical and school cases, got a divorce in order to marry again, and accepted a professorship in the academy at St. Petersburg. Obligated to leave this position in a year's time "on account of atheistical opinions", he succeeded in becoming an Evangelical bishop, and died at St. Petersburg. His "Reminiscences of My Seventy Years' Pilgrimage" presents a melancholy picture of long and weary wanderings.

Although the reforms of Joseph II were well-intentioned, yet the independence of the Church suffered detriment through them. His enactments were drafted by Austrian canonists without any previous understanding with the authorities of the Church, and in violation of her rights (*jus circa sacra*). In many instances the tender germs of religion were killed, and a careless, frivolous way of thinking resulted.

Leopold II, the successor of Joseph II, entered Vienna, 12 March, 1790, and on the 21st of the same month Cardinal Migazzi presented a memorial concerning the painful position of the Austrian Church. As a result, the bishops received an intimation that they were at liberty to point out any serious defects in the existing ecclesiastical conditions. This they did, but, more especially, Cardinal Migazzi enumerated "thirteen grievances and their remedies" in his memorandum. Among these grievances were "the lack of monastic discipline, the general seminaries, the marriage laws, and the Ecclesiastical Commission which had assumed to be the judge of the bishops and their rights". Leopold II virtually suspended the general seminaries, permitted the bishops to have seminaries under their own control, and granted to the monasteries the right to give theological courses. Religious processions were

permitted "to a point not far distant", and Saturday evening devotions were also allowed (without Benediction, however), as well as the exposition of relics.

Francis II was a devout and conscientious Christian, and a ruler who wished to be a father to his people. Nevertheless, it was during his reign that what is called the Josephinist system struck firmer roots. In the first place, the struggle with France, which lasted over twenty years, demanded all the energies of the Government, and during this reign both clergy and people grew more accustomed to the Josephinist regulations. But in addition to this Francis I clung with a childlike devotion to the memory of his uncle Joseph II, whom he called his second father. And, furthermore, whenever any concession was made to the Church, the supporters of Josephinism raised an outcry. In 1793, for instance, the Government was informed that in the church of St. Stephen Mass was celebrated simultaneously at several altars, and that in several places, at the afternoon litanies, Benediction was given with the monstrance. A priest had been the informant. After repeated conferences the cardinal obtained permission to have two Masses said at the same time in the church of St. Stephen but "the Benediction could be given only once at the close of the service". The almost insurmountable difficulty in the way of reform was the ecclesiastical court commission. It was the only means of communication between a bishop and the emperor. Migazzi wished, above everything, to eliminate this difficulty. "I am in all things", he said, "Your Majesty's most dutiful subject. But in his ecclesiastical character the chief shepherd must say boldly that the placing of such fetters upon the guardians of the Church is an offence to all Catholics, and it is a still greater offence that this power is given to men of worldly or untrustworthy reputation, and even to men known to be dangerous or of notorious character." The emperor, indeed, sought to do away with the worst features of the system which had come down to him from his predecessors. He authorized the prayer, the solemn benediction of graves, and the pilgrimages to Mariazell (the first of which, in 1792, was led by Migazzi himself), and the draping of "the poor statues of the Mother of God".

Man cannot at will be stirred to activity or lulled to sleep. However, at the beginning of the nineteenth century a number of circumstances combined to bring about an increase of the religious spirit in Austria. In 1802, the emperor issued two circulars, the first on "the means of elevating the secular clergy" and the second on "the means of improving the regular clergy". To remedy the lack of priests, the first order increased the number of gymnasia, directed the establishment of a theological training-school, with a seminary attached, for each diocese, and granted stipends to divinity students. Ecclesiastics belonging to an order were to wear the habit of their order, and must not live alone; a profession might be made in the twenty-first year, instead of the twenty-fifth. Soon after this the emperor transferred to the bishops the supervision of religious instruction (1808) and the censorship of theological works (1814). Repeated commands to officials required them to attend Sunday church-services. A university service, with a university preacher, was founded for university students. Two days before his death the emperor directed his successor to "complete the work he had begun of rectifying those laws, principles, and methods of managing church affairs which had been introduced since 1780".

The Archbishops of Vienna acted in a manner worthy of their high office. Migazzi's successor, in 1803, was Sigismund Anton Count Hohenwarth, the instructor of the emperor, and a pastor zealous

for souls, who devoted himself especially to the theological schools. After him came Vincenz Eduard Milde (d. 1853) who had gained a good reputation as a theorist in pedagogics and as a practical teacher. An important part in arousing the Church was taken by the following court preachers of that period: Vincenz Darnaut, who prepared an Old Testament history; Frint, author of a compendium of religious knowledge (6 vols.), the man at whose suggestion the emperor in 1816 established the advanced school for secular clergy at St. Augustine, and the founder of the Vienna "Theologische Zeitschrift"; Vincenz Eduard Milde was the author of a textbook of the general theory of pedagogics (2 vols.); Johann Michael Leonhard, who published "Christian Doctrines" in four parts and textbooks for grammar schools; Johann Pletz, who continued Frint's periodical and published "Dogmatic Sermons"; Job, confessor to the queen mother, Caroline Augusta; Albert Schlör, who produced "Meditations upon the Entire Gospel for Ecclesiastics and Priests", a work still fruitful. The priests whom the emperor received into Austria after the secularization of the abbeys in the empire were also very active. Thirty-five monks who came from St. Blasien, in the Black Forest to St. Paul in Carinthia pursued serious studies; twenty-five from Wiblingen entered Austrian abbeys. Among these were Sebastian Zängerle, who, "praying, working, and bravely fighting", bequeathed his diocese of Seckau in excellent condition to his successor; and Gregor Thomas Ziegler, who, while professor of dogmatics at Vienna, wrote "On Theological Rationalism", "Foundation of the Catholic Faith", and a "Life of Job". Their efforts were aided by the converts Frederick von Schlegel and Zacharias Werner. Metternich was Schlegel's patron. Schlegel's lectures on modern history and on ancient and modern literature, delivered at Vienna, had a beneficial effect, and the "Konkordia", which he founded, advocated Catholic interests. Werner's conversion was finally effected by the confession of St. Peter. In reading the "Imitation of Christ" his eye happened to fall on the only words of Peter contained in the work (Im., III, liii, 1). He called the "Imitation of Christ" the "pith of all books". (*Tolle, lege.*) During the sessions of the Congress he preached at Vienna with such intense feeling that at times he wept as he recalled with remorse his youthful errors. For a while Hohenwarth entertained him in his palace and Dalberg gave him a gold pen which he presented to the shrine at Mariazell. Werner, who died eleven days after preaching a notable sermon on the feast of the Epiphany, in 1823, was buried at Maria Enzersdorf beside Blessed Clement Maria Hofbauer. Hofbauer was a man of saintly character and prayerful life who, as confessor and preacher, exercised an extraordinary influence over many and was a source of light and instruction for Vienna and Austria. He was born at Tasswitz in Moravia, entered the Redemptorist Order at Rome as its first German member, and was active in the order at Warsaw. He suffered for the Faith, being confined in the fortress of Küstrin, and after coming to Vienna was appointed assistant to the rector of the Italian church through the influence of Archbishop Hohenwarth. He was finally made confessor to the Ursulines. Without noisy effort he produced deep effects. Among his penitents were: Adam von Müller, court councillor and author, whose last words were "Only those facts are worthy of notice which the Catholic Church recognizes as true"; Schlegel; Zacharias Werner; the Princess Jablonowska and Princess Bretzenheim; Privy Councillor Francis de Paul Szechenyi; Professors Fourerius Ackermann, Zängerle, Ziegler; Bishops Rauscher and Baraga. He converted Silbert Klinkowström and Veith. Hofbauer learned on his death-bed that the emperor had recognized

the congregation as an order, and, filled with joy, he passed away, praising God, 15 March, 1820. Tendler, who followed in Hofbauer's footsteps, was born only six days after his death. Hofbauer was beatified in 1886. Cardinal Rauscher said of him: "Father Hofbauer made the final arrangement of the Concordat possible; he gave to the spirit of the time a better direction".

There were at this time, unfortunately, priests who instead of offering to their fellow-men the pure wheat of the truth sought to give them the chaff of fantastic dreams. Among others, Martin Boos taught that "the Saviour only demands from sinners that they believe in him and make his merits their own. For this reason the formation of a particular society of believers in the living faith is necessary". Boos supported his views by referring to Professor Sailer, but was imprisoned a whole year by the consistory at Augsburg. After this he had a parish at Gallenkirchen, in Upper Austria, but was obliged to resign his position. Thomas Pöschel, a curate, at Ampfelwang, in Upper Austria, received a heavenly revelation that the millennium had begun. This was to be preceded by the arrival of Antichrist, who had just appeared in the person of Napoleon. Pöschel died at Vienna in the infirmary for priests. The "Manharter" in Tyrol took the name of the peasant Manhart, who, influenced by the assistant curate Kaspar Hagleitner, maintained that the acts of the Tyrolese ecclesiastics who had sworn fealty to Napoleon were invalid. The Archbishop of Salzburg, Augustine Gruber, and Cardinal Cappellari (Gregory XVI) quieted the peasants.

In 1848, when, as was said at the bishops' conference at Würzburg, "the judgment of God was passed on thrones and peoples", the devastating storm broke out in Austria. Even Fuster, a professor of theology at the University of Vienna and a university preacher, led students astray. The Prince-Archbishop of Vienna, Vincenz Eduard Milde, issued a warning to the entire clergy "to keep within the limits of their calling". Nevertheless, the revolutionary spirit soon threatened the Church. Public demonstrations were made against Archbishop Milde and the papal nuncio, because Pius IX was said to have blessed the Italians who marched out to fight the Austrians. The Redemptorists were driven out of Vienna, and the Jesuits out of Graz. Ronge, whose followers abused the words *German* and *Catholic* by calling themselves "German-Catholic", preached in the Odeon at Vienna and in the taverns at Graz. Unfortunately, Ronge was joined by Hermann Pauli, assistant at Erdberg, and by Hirschberger, chaplain at the home for disabled soldiers. Pauli and Hirschberger came to a sad end: the former died in an insane asylum, the latter committed suicide.

With these exceptions, the clergy of Vienna behaved admirably. In May the curate, Sebastian Brunner, came to the defence of the Church against the hostile press by issuing the "Kirchenzeitung", and the bishops of various dioceses sent memorials and addresses to the ministry, the imperial diet and the emperor, such as: a statement of the bishops of the Archdiocese of Moravia drawn up by Kutschker; petition of the Prince-Bishop of Lavant to the Imperial Diet; petition of the Archbishop of Görz to the Ministry; "What are the Relations of Church and State? An Answer by the bishops of Bohemia"; memorial of the Archbishopric of Salzburg to the Imperial Diet; memorial of the Archdiocese of Vienna to the Diet; memorial of the bishops of the Archdiocese of the maritime district to the constitutional imperial diet at Kremsier. All these brochures sought the independence of the Church, the breaking of her fetters so that she might be free to raise her hand to bless.

As the appeals of individual bishops and dioceses had little effect, the minister of the interior, Count Stadion, summoned the Austrian bishops to Vienna in order to obtain a unanimous expression of their wishes. Hungary and the Lombardo-Venetian provinces were not included, as they were not yet pacified. This first conference of the Austrian bishops met, 29 April to 20 June, 1849, in the archiepiscopal palace. Sixty sittings were held. Schwarzenberg, the "German cardinal", presided, and the lately consecrated Bishop Rauscher was secretary. Hungary was represented by the Bishop of Pécs, Scitovsky. Among the theologians were Court Councillor Zenner, of Vienna; Professor Kutschker, of Olmütz; Canon Tarnoczy, of Salzburg; Canon Wiery, of Lavant; Professor Fessler, of Brixen; Canon Jablinsky, of Tarnow; and Canon Ranolder of Pécs. The voluminous memorials presented to the Government by the conference discussed marriage, the endowment funds for religion, school, and student-stipends, livings and endowments for church-services, instruction, the administration of the church, ecclesiastical offices and church services, monastic houses, ecclesiastical jurisdiction. In the resolutions, which cover 207 paragraphs, the bishops marked out for themselves a common course of action. The resolutions of this first conference of the bishops of Austria were the foundation on which the new structure of the Austrian Church has been built. Before the close of the conference an episcopal committee of five members was formed to press the settlement of the memorials, and to protect the interests of the Church. The chairman of the committee was Cardinal Schwarzenberg, the secretary was Prince-Bishop Rauscher of Seckau. Count Leo Thun, Minister of Instruction, presented the matter at last to His Majesty at two audiences, and the important imperial decrees of 18 and 23 April, 1850, were the result of these interviews. The first ordinance defined the relations of the Catholic Church to the State: Catholics "are at liberty to apply in spiritual matters to the pope"; bishops might issue regulations in matters pertaining to their office without previous permission from state officials; ecclesiastical authorities were allowed to order church punishments; careless administrators of church offices could be suspended. The ordinance of 23 April defined the relations of the Church to public instruction: teachers of religion and theological professors could not be appointed without the consent of the bishop, who could at any time withdraw his ratification; the bishop named one-half of the examining committee at theological examinations; a candidate for a theological doctorate had to subscribe to the Tridentine Confession of Faith in the presence of the bishop before obtaining his degree.

On the 14th of September, 1852, the Emperor Francis Joseph empowered Prince-Bishop Rauscher to act as his representative in drawing up a Concordat, and Pope Pius IX named as his representative, Viale Prelá, the papal nuncio in Vienna. In important questions Rauscher was to consult with the committee on the Church. This committee was composed of Thun, Minister of Instruction; Buol Schauenstein, Minister of Foreign Affairs; Bach, Minister of the Interior; R. von Salvotti, Member of the Imperial Diet; and Freiherr von Kübeck, President of the Imperial Diet. The results of the conferences were to be laid from time to time before the emperor for decision. The negotiations advanced very slowly. The Hungarian bishops presented special *desideria* (requests), the Patriarch of Venice presented *postulata et desideria* (demands and requests). In order to expedite matters, Rauscher spent seven consecutive months in Rome, busied with negotiations. The Concordat was at last signed on the emperor's birthday, 1855. It contains 36 articles. Arts. 5-8

regulate instruction: "All school instruction of Catholic children must be in accordance with the teachings of the Catholic Church; the bishops are to have charge of religious training; professors of theology are to be chosen from men whom the bishop holds to be most suited to the position: only Catholics shall be appointed professors in the gymnasia [middle schools] set aside for Catholic children; the bishops are to select the religious text-books". The bishops have the right to condemn books injurious to religion and morals, and to forbid Catholics reading them (Art. 8). The ecclesiastical judge decides matrimonial suits of an ecclesiastical character (Art. 10). The Holy See does not forbid ecclesiastics who have committed misdemeanours and crimes to be brought before the secular courts (Art. 14). The emperor, in exercising the Apostolic prerogative inherited from his ancestors, of nominating the bishops to be canonically confirmed by the Holy See, will in the future, as in the past, avail himself of the advice of the bishops, especially of the bishops of the archdiocese in which the vacant see lies (Art. 19). In all metropolitan churches the Holy Father appoints the highest dignitary. The emperor still appoints all other dignitaries and the canons of the cathedral (Art. 22). The Holy Father empowers the emperor and his successors to present to all canonries and parishes where the right of patronage is derived from the endowment fund for religious or educational foundations, but in such cases the appointee must be one of three candidates nominated by the bishop as suitable for the position (Art. 25). The bishops have the right to bring religious orders into their dioceses (Art. 28). The estates which form the endowment fund for religious and educational foundations are the property of the Church and are managed in its name, the bishops having the supervision of affairs; the emperor is to aid in making up what is lacking in the fund (Art. 31).

The Concordat was intended to be binding upon the entire monarchy, and to be carried out with uniformity in all parts. Thun, therefore, in the emperor's name, called the bishops of the entire empire to Vienna. On the 6th of April, 1856, the inhabitants of the imperial city saw 66 princes of the Church enter the Cathedral of St. Stephen in state. These ecclesiastics represented the Latin, Greek, and Oriental Rites; among them were German, Hungarian, Italian, and Polish bishops. The procession was closed by the pro-nuncio, Cardinal Viale Prelá. The assembly presented to the Government proposals, requests, and resolutions concerning schools, marriage, church estates, appointment to ecclesiastical benefices, monasteries, patronage of livings. The closing session was held 17 June. The emperor received the bishops in a farewell audience. On this occasion Cardinal Schwarzenberg said: "After God, our hope and trust rest on Your Majesty's piety, wisdom, and justice. When we have reached our dioceses we shall strive most zealously to extend the benefits of the agreement in all directions". In order to make the Concordat effectual, the bishops held synods in their dioceses: at Gran, 1858; Vienna, 1858; Prague, 1860; Kalocsa, 1863. Fresh life showed itself everywhere. It is now acknowledged that schools of all grades accomplished great things under the Concordat. The primary schools were excellently arranged, a course of study which is still in force was drawn up for the gymnasia, and the University of Vienna gained a world wide reputation under Thun, the author of the Concordat. In 1855 the Institute for Research in Austrian history was formed. Famous members of the medical faculty of the university were the professors: Skoda (percussion and auscultation); Rokitsansky (pathological anatomy); Oppolzer; Hebra; Stellwag; Hyrtl; Brücke, and Billroth, the last named being the leading sur-

geon of the century. Upon Rauscher's suggestion the number of professors in the department of dogmatic theology of the University of Vienna was increased, in order to ensure a more extended course in this branch. The new men called were, Father Philip Guidi, O.P., and Father Clemens Schrader, S.J., both from Rome. The lectures were obligatory on divinity students in any one year of the four years' course, and were intended also for priests desirous of instruction. The successful development of art during this period is shown in the church of Altlerchenfeld in Vienna, which was consecrated in 1861. This fine structure was built from the designs of the architect John George Müller, and was decorated with a series of mural paintings by Joseph Führich, professor at the Academy of Fine Arts in Vienna. These paintings combine art and true dogma most admirably, and Führich is in them a veritable teacher of the Faith. He was born at Krazau in Bohemia, studied art first at the academy in Prague, afterwards for two years at Rome, and coming to Vienna passed forty-two studious and fruitful years there (d. 1876). Among the large number of his religious paintings the most famous are: The Pater-noster; the Way of the Cross, in the church of St. John on the Prater, Vienna, copies of which can be found in all parts of the world; the Way to Bethlehem; illustrations of the Psalter and the Imitation of Christ; the Prodigal Son; the Book of Ruth. The manner in which Führich developed his scheme of thought in the series of pictures in the Altlerchenfeld church is extremely impressive. Pictures in churches, according to his view, were not merely decorative; through the senses they must unfold to the spirit that inner life of faith which finds its full development in the church. In the vestibule of the church, six pictures portray the work of creation, and a seventh sets forth the rest of the Creator on the Sabbath. The paintings in the two side aisles represent the Church of the Old Testament, which kept alive the longing for salvation and proclaimed its coming. The paintings of the middle aisle portray the fulfilment of the promise by scenes from the life of Christ. Between the historical pictures are placed at intervals the figure of the Saviour with appropriate historical emblems, such as Christ as a gardener, with a hoe on the shoulder. This is followed by a picture of the owner of the vineyard commanding the gardener to cut down the unfruitful tree. Then Christ as shepherd, followed by an allegorical picture of the transferring of the office of shepherd to Peter; Christ the wayfarer, followed by a representation of the man who fell among thieves; Christ the sower, followed by the approaching harvester with his sickle. These paintings, with those representing the Sermon on the Mount, decorate the church as far as the pulpit. The high altar is adorned with a picture of the Most Holy Trinity. The conception running through the whole series of paintings, from those in the vestibule to that of the high altar, is that the paradise lost by the first human beings is offered to us again by the second Adam in the new heaven.

At this moment of renewed energy in the church, Austria possessed bishops who would have excited the envy of little Cappadocia at the time of the three great Cappadocians. Among these Austrian bishops were: Cardinal Schwarzenberg (d. 1885) and Cardinal Rauscher (d. 1875; life by Wolfgruber); Francis Joseph Rudigier, Bishop of Linz (d. 1879; life by Meindl); Vincenz Gasser, Prince-Bishop of Brixen (d. 1879; life by Zobl); Joseph Fessler, Bishop of St. Pölten (d. 1872; life by Erdinger); John B. Zwergler, Prince-Bishop of Seckau (d. 1893; life by Oer). The description of this period would not be complete without mention of the foremost German preacher and most fruitful German theologian of the nine-

teenth century, John Emanuel Veith, and of the philosopher and priest, Anton Günther. Veith was born at Kuttenplan, in Bohemia, and was of Jewish parentage. When he was nine years old his spiritual struggles began. In his twenty-first year, led by Father Hofbauer, he found peace in the Church. He faithfully kept the vow he had made: "I will devote my entire life to the only thing that is eternal, and therefore, the only thing that is important." Veith became a priest, preached for fourteen years in the Cathedral of St. Stephen at Vienna and died in 1876. At the time of his last illness he was preparing a translation, with commentary, of the Cantic of Canticles. On the day of his death he wrote down the words of Sulamit:

Neu auch wollen wir dort oben  
Lieb und Treue ihm geloben.

"Afresh will we there above vow to him our faith and love." Then, putting the pen aside, he said, "It is finished", and breathed his last. (Life by Löwe.) Richness of thought and a classic elegance of speech characterized Veith's sermons. Among those published are: "Die Leidenswerkzeuge Christi"; "Denkbüchlein von der göttlichen Liebe"; "Das Friedensopfer"; "Lebensbilder aus der Passionsgeschichte"; "Die heiligen Berge" (2 vols.); "Homilienkranz" (5 vols.); "Der verlorne Sohn"; "Die Samaritin"; "Die Erweckung des Lazarus"; "Mater Dolorosa"; "Festpredigten" (2 vols.); "Homiletische Vorträge" (7 vols.); "Der Blindgeborene"; "Politische Passionspredigten"; "Eucharistie"; "Weltleben und Christentum"; "Charitas"; "Worte der Feinde Christi"; "Misericordia" (Psalm *Miserere*); "Das Vaterunser"; "Weg, Wahrheit, und Leben"; "Dodekatheon" (2 vols.); "Die Mächte des Unheils"; "Die Anfänge der Menschenwelt"; "Die Stufenpsalmen"; "Prophetie und Glaube"; "Homiletische Aehrenlese" (2 vols.); "Meditationen über den 118. Psalm"; "Hundert Psalmen"; "Der Leidenweg des Herrn"; "Stechpalmen"; "Dikaiosyne, Die Epistelreihe des Kirchenjahres". Karl Werner, the son of a teacher, was born at Hafnerbach in Lower Austria and died in 1888. He was first professor of moral theology at St. Pölten, then professor of higher exegesis at the University of Vienna. In Vienna he was appointed member of the advisory council of the minister of instruction, and was elected member of the Imperial Academy of Sciences. Among the many works of learned research Werner published are: "System der Ethik" (2 vols.); "Grundlinien der Philosophie"; "Der hl. Thomas von Aquino" (3 vols.); "Franz Suarez und die Scholastik der letzten Jahrhunderte" (2 vols.); "Geschichte der apologetischen und polemischen Literatur der christlichen Theologie"; "Geschichte der katholischen Theologie seit dem Trienter Konzil bis zur Gegenwart"; "Spekulative Anthropologie vom christlich-philosophischen Standpunkt"; "Beda der Ehrwürdige und seine Zeit"; "Alkuin und sein Jahrhundert"; "Gerbert von Aurillac, die Kirche und Wissenschaft seiner Zeit"; "Giambattista Vico als Philosoph und gelehrter Forscher"; "Johannes Duns Scotus"; "Geschichte der Scholastik des späteren Mittelalters" (5 vols.); "Geschichte der italienischen Philosophie des 19. Jahrh." Many of Werner's treatises are to be found in the reports of the sessions of the philosophico-historical section of the Imperial Academy of Sciences. Anton Günther, founder of the Guntherian school of philosophy, was born at Lindenau, near Leitmeritz, in Bohemia. He studied jurisprudence and philosophy at Prague, and came under the influence of the philosophical ideas of Kant, Fichte, and Jacobi. Blessed Clement Hofbauer led him back to the truth. Günther was consecrated priest, and became teacher of philosophy in noble families, especially in that to which Schwarzenberg, afterwards Cardinal, belonged. For many years he

filled the modest position of sacristan of St. Ruprecht, the oldest church in Vienna. After a life spent in philosophical study he died in 1876 (life by Knoedt). Günther's chief works are: "Vorschule zur spekulativen Theologie des Christentums"; "Peregrinus Gastmal"; "Süd- und Nordlichter am Horizont spekulativer Theologie"; "Janusköpfe für Philosophie und Theologie"; "Möhler der letzte Symboliker"; "Thomas a Scrupulis, zur Transfiguration der Persönlichkeits Pantheismen neuester Zeit"; "Die Justes-Milieux in der deutschen Philosophie gegenwärtiger Zeit"; "Eurystheus und Herakles"; "Lydia" (a philosophical annual, in collaboration with Veith). Honestly intending to defend faith against the philosophical doubtings which are constantly arising in modern times, Günther fell into the mistake of making the mysteries of faith dependent on their recognition by the understanding, so that knowledge was substituted for faith. A learned war broke out in Germany, in which Günther's position was damaged by the vagaries of his followers, and at the end of five years' examination the Congregation of the Index condemned his writings. After the first excitement had subsided Günther gave a proof of the honesty of opinion which had characterized his action from the start. The verdict of the Congregation of the Index was sent to him 23 January, 1857; on 10 February he handed Cardinal Rauscher his submission, to be forwarded to the Holy Father and to Cardinal Andrea, Prefect of the Congregation of the Index. The thought which consoled Günther in these days of trial was that God demanded of every man the sacrifice of his Isaac, and that this sacrifice was what he now made to God.

Goethe says that the subject of profoundest interest in the history of the world is the battle of disbelief against faith. This is still more true of the history of the Church. In 1860 Austria became a constitutional monarchy, and in the next year the foundations of a representative government were laid. The Imperial Parliament was to consist of a House of Peers, to which the archbishops and prince-bishop were to belong, and a House of Deputies. During the first session of the Parliament, Maager, a Protestant deputy, attacked the Concordat and demanded its revision. Upon this the members of the episcopacy in the Upper House and some other bishops met and prepared a memorial which was sent to the emperor. "Of all the party cries", it ran, "which are put to effective use in electioneering, none has so much prominence at present as the word *toleration*. True toleration is exercised by the Catholic Church, while the harshest intolerance is practised on all sides against the Catholic Church. All its ordinances and institutions are slandered and mistrusted, and every exhibition of Catholic conviction is overwhelmed with scorn and derision." The events just noted were merely the forerunners of a terrible storm which broke after the disastrous war of 1866. In July of the next year Deputy Herbst moved the preparation of three bills concerning marriage, schools, and the mutual relations of the different religious denominations. A conference of twenty-four bishops was held at Vienna, and a second memorial was sent to the emperor which contained the following: "A party has arisen which has chosen this time of distress for an attack on the religion to which Your Majesty, the Imperial family, and a great majority of the inhabitants of the land belong. We are in the presence of a spectacle which causes the enemies of Austria to smile derisively, and which fills Austria's sons with shame rather than with anxiety." Marriage without the blessing of the Church, schools without religion were demanded. In order to obtain suitable teachers for these schools it was proposed to found for the training of teachers institutions where contempt for all that is holy

should be instilled. It was not possible, however, to resist the liberal pressure. On the 21st of December, 1867, the new fundamental laws received the imperial approval. The first granted full freedom of faith and conscience and freedom in scientific opinion. The second declared: "All jurisdiction in the state is exercised in the name of the emperor". Thereby the Church's exclusive jurisdiction over marriage was impugned. The third law obliged all officials to take an oath to support the constitution. Two professors of dogmatics did not take the oath; these were Schrader, the Jesuit, and Hyacinth Pellegrinetti, the Dominican successor of Guidi. They were obliged to resign their professorships, and their places have not yet been filled.

During this same period the dual constitution was sanctioned, by which the Austro-Hungarian Monarchy as it now exists, was formed "of two distinct co-ordinate States having the same constitutional, legal, and administrative rights". After a long struggle the emperor signed, 25 May, 1868, the laws concerning marriage, schools, and the status of the several denominations. The first of these laws declares marriage to be a civil contract, makes the civil marriage obligatory, and takes from the Church the judicial power *pro foro externo* in matrimonial suits. The law concerning schools takes from the bishop any control of the management as well as the right of supervision. These powers are given to an official school committee of the district and town, of which committee ecclesiastics can be chosen members. The bishops select the books used by the catechist and instructors in religious doctrine. The third law grants everyone the right to choose his own religion on attaining the age of fourteen years, but a child between seven and fourteen years of age cannot change his or her religion even at the wish of the parents. As these laws infringed the Concordat in essentials, a secret consistory was held at Rome, 22 June, at which the pope declared: "Leges auctoritate Nostrâ apostolicâ reprobamus, damnamus et decreta ipsa irrita prorsus nulliusque roboris fuisse ac fore declaramus." ("By Our Apostolic authority we reprobate and condemn these laws, and declare that their purport was, and shall be, wholly invalid and of no force.") The bishops upon this issued pastorals. The joint letter of 3 June issued by the Bohemian bishops to the clergy and their joint pastoral of 24 June were condemned by the imperial civil courts of all three instances, on the ground that they were a disturbance of the public peace, and suppressed. Penal proceedings were not brought against Cardinal Schwarzenberg, but Bishop Francis Joseph Rudigier, of Linz, was prosecuted for his pastoral of 7 September. "On account of the misdemeanour committed in the pastoral letter"—of calling the law of 24 May a lie—he was brought before the Supreme Court, found guilty by the jury, and condemned to fourteen days' imprisonment with costs. The pastoral was ordered to be destroyed. Next day the emperor in a decree remitted the punishment and its legal consequences. The bishops disagreed as to whether the clergy should permit themselves to be chosen members of the school committees, but Rauscher and Schwarzenberg, who were for the permission, carried their point.

The definition of the pope's infallibility afforded von Stremayr, the Austrian Minister of Instruction, a pretext to demand the abrogation of the Concordat, on the plea that the pope, one of the contracting parties, had received from the definition a new character, which invalidated the original agreement. Beust, the Minister of Foreign Affairs, addressed to Palomba a note which declared: "The Concordat exists no longer; it is annulled." The abrogation of the Concordat produced a gap in religious legis-

lation. To remedy this four bills were introduced, January, 1874, for regulating the legal status of the Catholic Church, the taxing of the fund for the support of religion, the legal status of monasteries, and the recognition of new religious societies. The pope expressed, on the 7th of March, his grief at the attack on the rights of the Church, implied in the assertion that the supreme power in all matters concerning the external life belonged to the State. The bishops assembled again at Vienna and sent this statement to the Ministry and the Upper House: "We repeat that we are ready to agree to the demands which the State makes on us in the bill concerning the legal status of the Catholic Church as far as these demands are in harmony with the Concordat concerning these matters. We cannot and will not acquiesce in a proposition the consummation of which would endanger the welfare of the Church."

One of the chief causes of the scarcity of priests which now began to be marked was the new law of national defence. By this law youths in their twentieth year during their course at a gymnasium were subject to military duty. The bishops again and again begged for a relaxation of the provisions of the law. But they had, for the time being, no redress except to appeal in individual cases to the indulgence of the emperor. When the bills reached the upper house the bishops defended themselves bravely. Rauscher closed his address of 10 April with these words: "So-called progress no longer considers it necessary to conceal its real aim, and has unmasked its hate against God and eternal truth. But Providence has set a natural limit to all things. The destruction of Christianity is impossible, but Austria may be destroyed if the war against religion is not checked in good time." Yet, for all this, the first two bills became law, 7 May, 1874. Among other things, the law concerning the legal status of the Church declares that: In order to obtain any ecclesiastical appointment or living, a candidate's record of past conduct must be blameless when judged by the standard of the civil law (§ 1); if the Government finds that an ecclesiastical regulation respecting a public church service is not consistent with the public interest, the Government shall then forbid it (§ 17); the total number of Catholics living in the district of a parish form the parish community (§ 35); in order to cover the expenses of a parish a tax is to be laid on its members (§ 36); the ministry of public worship and instruction is authorized to oversee the management of the funds of the churches and church institutions (§ 38); the ministry of public worship and instruction is to take care that the ecclesiastical journals do not go beyond the sphere of their proper activity (§ 60). The law concerning contributions to the fund for the support of religion declares that: Assessments shall be made on incumbents of livings and the communities of the regular orders for the fund for the support of religion in order to meet the expenses of Catholic worship and especially in order to increase the incomes of pastors which have been until now very small (§ 1); the value of the entire property of the living or of the community shall be taken as the basis (of the assessment) (§ 2); the amount of the assessments shall be fixed every ten years for the next ten years (§ 9); and they were to be "one-half of one per cent on amounts up to 10,000 florins [\$4,000], one-and-a-half per cent on amounts from 10,000 florins to 20,000 florins [\$4,000 to \$8,000], and 10 per cent on all amounts over 20,000 florins [\$8,000 to \$36,000]". The law (signed 20 May) in regard to the legal recognition of religious societies "accepts in full" the principle of religious equality.

Since the passage of these three laws no further enactments have so far been made, with regard to the status of the various denominations in Austria. In the year following their passage Cardinal

Rauscher died (24 Nov., 1875). It was due to his wise moderation and caution that Austria escaped the evils of a *Kulturkampf* (religious conflict). In 1874, von Stremayr offered four projects for bills in the House of Deputies, one of which dealt with the legal status of monastic communities. Rauscher said that it "bore on its forehead unusual marks of mistrust, arbitrariness, and harshness. According to its provisions, the authority of the minister of worship of the time being would be sufficient to sweep from the earth a monastic house which had existed for a thousand years and to enforce the sequestration of its property." The bill reached the Upper House by the middle of January, 1876. But Cardinal Schwarzenberg succeeded, by means of a memorial of the Austrian archbishops and bishops, in inducing the emperor not to sign it, and the bill has not yet become law.

The parliamentary election of 1879 increased the number of conservative members so that the Right (*Hohenwart*) Party was in the majority. In 1882, the Karl Ferdinand University, at Prague, was divided into a German and a Czech university. Cardinal Schwarzenberg, however, would not consent to a division of the theological faculty. He wrote to the minister, Conrad von Eybelsfeld: "The Church does not wish the separation of the nations, but their union in one body, the head of which is Christ. She dedicates the blessings of her activity to all nations, she recognizes the right of every people to independence, she respects and supports the demands of a people for its own language and its own form of instruction. But the Church cannot give to the claims of nationality the first place, they must always be for her a secondary interest. The theological faculty must impress this idea upon their pupils and must not, therefore, drive them apart. They should not deepen and embitter the national differences by a separation; they should strive rather to compose these differences. This duty is above all necessary among the various nationalities of Bohemia. In this country it is a special duty of the priesthood to seek to soothe and unify." The separation took place, however, directly after Schwarzenberg's death.

An amendment to the school law which somewhat improved matters was laid before the Upper House in 1883. This amendment was the result of numerous memorials from the bishops to the Government and much effort of other kinds. During the debate on the amendment Cardinal Schwarzenberg said: "The bishops for whom I speak to-day recognize the value of the amendment and are ready to work for its passage. But this does not justify the presumption that we consider the amendment as remedying all defects of the school laws, and that our votes are a corroboration of these laws. Only a denominational system of common schools can satisfy the claims of the Church and of the Christian community. The present system is unsatisfactory. While we now give our support, we reserve the right to press our just demands by way of legislation in the future." The amendment made certain concessions to children who had attended school for six years, and permitted only such persons to be made the principals of schools as were competent to give instruction in the faith to which the majority of the scholars belonged.

Cardinal Schwarzenberg had presided over every meeting of the Austrian bishops since 1849, and had always fulfilled faithfully the duties of the cardinalate. At the meeting of the bishops at Vienna in 1885 he was unable, through illness, to preside at the 8th session. The next day he appeared, although unfit to attend. He was not able to be present again and died of pneumonia 27 March.

A bill called the Prince Alfred Liechtenstein school bill was introduced in October, 1888. It was in-

tended to give the Church greater power over the schools. But while the bishops pressed the demand of "Catholic schools for Catholic children", the social-democratic convention which met the same year at Hainburg, took its stand upon "common schools without religious teaching, the separation of Church and State, religious belief is a private matter". Gregor, of the Young Czech party, also declared in behalf of his party associates: "A Liechtenstein has come again to dig a grave for the Bohemian nation, the grave of ignorance and demoralization." This was an allusion to what had happened after the battle of the White Mountain (1620). Against such opposition the bill could not be carried.

In 1891 Leo XIII regulated the meetings of the Austrian bishops in a manner which has proved fruitful in blessings. A meeting is to be held in Vienna every year. These meetings are either special or general. At these special meetings committees prepare elaborate and exact reports which are laid before the general assembly that meets at least once every five years. These assemblies of the bishops decide the course of the Church. The Austrian bishops feel and act as a unit, as a harmonious episcopacy. Schwarzenberg's successor, Cardinal Count Schönborn, died in 1899. Cardinal Gruscha, Archbishop of Vienna, followed him at the head of the episcopacy. In reviewing the action of the bishops in their conferences since this time, it is clear that the matter which has chiefly occupied their attention has been the schools of every grade. In all their memorials to state officials, and in all their pastorals to the faithful, one thought continually appears like a vein of gold: a child should learn in school the duties of a Christian and a citizen. This end can be realized only when religion is made the central point of education from which everything radiates, to which everything returns. For this reason the bishops sought (1897, 1898) to obtain the consent of the ministry to an increase in the time given to religious instruction in the primary and secondary schools. Prizes were offered for the preparation of a Bible (1898). Two catechisms, a larger and a smaller one, were prepared after eight years' work. These were accepted by the bishops in 1897 and issued with explanatory directions. During this period religious instruction in the middle schools was rearranged, and religious exercises were again introduced. Religious societies (Sodalities of the Blessed Virgin Mary) were organized in 1897 and 1902. Religious instruction was introduced into the Sunday industrial schools (1898). Proposals were made as to the education of teachers of religion in the middle and normal schools (1901). The preparation of a correct textbook of psychology was urged (1894). Prizes were offered for textbooks on religion (1897). The bishops succeeded in obtaining a systematized course in philosophy for the theological schools (1892); they obtained, further, a rearrangement of theological studies and examinations. (Dissertations must be suitable for publication and three examinations are obligatory for a doctorate.) They complained of the spirit prevalent at the universities (1891) and of the unfair treatment of the student-societies composed of faithful Catholic students (1901).

During the reign of Maria Theresa an educational fund was created from confiscated property of the Jesuits. Under Joseph II a religious fund was created from the church property administered by the State only. But Joseph II acknowledged that the State was bound to pay the expenses of Catholic worship, for which the church revenues did not suffice. The salary of parish priests was fixed at 400 florins (\$160), that of the curates at 200 florins (\$80). The retiring pension was made 200 florins (\$80). These sums remained unchanged for one hundred years, although

the cost of living and the value of money had varied. The speech from the throne in 1871 and 1879 referred to the improvement of the material condition of the clergy as an object of solicitude on the part of the Government, and since 1872 state subventions have been granted for this purpose. In order to obtain the money for this subvention, a tax for the maintenance of the religious fund was created in 1874. But although a sum reaching ten per cent of the capital fund was demanded every ten years, few priests received from it assistance amounting to more than 100 florins (\$40). As this subvention was called an "advance" to the fund for the support of religion in the different provinces, the debts of the provinces grew every year, and the entire religious fund was in danger of being used up. The bishops, therefore, sent repeated appeals to the Government, praying for a suitable increase of the salaries of the clergy. In 1903 they agreed to demand for active pastors: (a) for curates a minimum salary of 1,000 crowns (\$200); for pastors of second-class parishes 1,600 crowns (\$320); for parish priests without curates, 2,000 crowns (\$400); for parish priests with curates, 2,200 crowns (\$440); (b) four retroactive decennial allowances to be reckoned from the date of the grant; the first allowance to be 100 crowns (\$20), the second, 200 crowns (\$40), the third and fourth to be each 250 crowns (\$50), in all 800 crowns (\$160). (c) Surplus of money destined for pastoral salaries is not to be drawn upon for the pensions of retired clergymen. For retired curates the bishops suggested a minimum pension of 100 crowns for curates, and of 1,900 crowns (\$380) for parish priests. In 1891 and 1894 the bishop requested from the Minister of Worship an exact list of all the debts due by the religious fund in the hands of the Government and of all pious foundations. In 1891 and 1897 they deliberated concerning the delicate question of clerical fees. After a ten years' trial (1893) the bishops pointed out the hardship of the tax on the religious fund, and pointed out where amendment should be made. The bishops repeatedly discussed (1898, 1899, 1900) the law which promised the formation of parishes. The difficult question of the patronage of livings was also taken up (1899). The Christian character of the family life, the education of the young, the duty of voting ("Vote, vote right") were repeatedly the subjects of joint pastoral letters (1891, 1901). The bishops discussed the question of founding and supporting a daily religious newspaper (1891, 1892). They assured the Holy Father of their agreement with his letter to Cardinal Guibert, Archbishop of Paris, concerning the disrespectful utterances of Catholic papers about ecclesiastical authorities. They discussed uniform action in carrying out the Apostolic constitution "Officiorum ac munerum" as applied to Catholic newspapers (1898).

As in our day large results are only obtained by association, the bishops have especially encouraged the formation of workmen's unions, of *Gesellenvereine*, the St. Boniface Society (March, 1901), the Holy Childhood Society, and benevolent societies (November, 1897). In these days much that is unsound rises to the surface. The bishops issued warnings against irreligion and national embitterment (1891). They encouraged lectures on Freemasonry (1897), complained of the destructive tendencies which are undoing the strength and force of Austria, and condemned the bad press, "the dangerous foe of faith" (December, 1901).

In 1897 a movement was set on foot which ten years before would have been held to be impossible. Its name, the *Los von Rom*, is an insult to Catholics, its existence a mortal blow to Austrians. Every possible misuse of speech and writing was employed to rob Catholics of their confidence in their priests, of their attachment to the holy sacraments, and even

to the Church. These ribald foes spread desolation over a good part of God's vineyard in Austria. The "Free from Rome" movement will remain a disgraceful stain, but not in the history of the Catholic Church. Filled with a sense of the sacredness of their duty as bishops and Austrians, the episcopacy warned the faithful in pastorals against the movement and its schemes (1899, 1901). They addressed an earnest memorial to the emperor on the subject (1901), as well as one to Körber, the head of the ministry (November, 1902).

In 1891 the bishops deliberated on cremation and funeral addresses by non-Catholic clergymen in Catholic cemeteries; in 1898 they drew up a form of reconciliation for duellists and their seconds. They exhorted Catholics "to observe faithfully the ordinances against duelling, whether issued by God, the Church, or the State". After due deliberations, they also adopted resolutions on the position of catechists and the admission of catechetical teachers into the ecclesiastical organization and arranged the manner in which erring ecclesiastics "should be led back to their calling and to the service of God by their fellow-clergymen". In 1891 they issued regulations concerning the social activity of the clergy, and in 1901 concerning clerical conventions and legal societies.

The bishops aided the several religious communities, and watched over the loyalty of the religious orders. In 1889 the relation of the bishops to the election and consecration of the abbots of new religious foundations was defined. In 1891, the pope granted permission to the strictly cloistered orders of women (Ursulines) to attend university lectures. The Austrian bishops celebrated the diamond jubilee of the consecration of Leo XIII to the priesthood and the golden jubilee of his consecration to the episcopacy by joint letters of veneration to the Holy Father and by joint pastorals to the faithful. In these letters they did not fail to express their regret on the subject of the so-called Roman question, of the offensive Giordano Bruno celebration, and of the 25th anniversary of the taking of Rome. In 1903 they sent a magnificent letter of congratulation to the Holy Father, Pius X.

We must go back five hundred years in the history of Austria to find another ruler who reigned fifty years. On the semi-centennial anniversary, 2 December, 1898, of the reign of the Emperor Francis Joseph, the bishops issued a joint pastoral and sent it with a dedication to the emperor. In the dedication they say: "The mysterious counsels of God have ordained that Your Majesty should spend this day in sorrow. [Empress Elizabeth was assassinated 10 September.] We all suffer with our gracious emperor and ruler. But our grief cannot silence our gratitude; our gratitude to our Lord God who has preserved Your Majesty for us, our gratitude to Your Majesty for fifty years of strong and fatherly protection, for fifty years of self-sacrificing love, for fifty years of exemplary devotion to Your Majesty's exalted but arduous calling."

Since 1851 all the provinces of the Austrian Crown have been under one uniform government. Since 1867, however, Hungary has been an independent part of the Hapsburg monarchy, enjoying equal rights with the rest. During the battle over the Concordat which raged in 1867, the Hungarian bishops did not appeal to the Concordat, for fear that the agitation might spread to Hungary. In point of fact, however, they held fast to the Concordat. John Simor, Primate of Hungary from 1866-91, preserved the peace of the Church in the kingdom. There was a conflict, however, respecting the laws concerning baptism. A law of 1868 enacted that in the case of mixed marriages the boys should be brought up in the faith of the father, the girls in that of the mother, even if this were contrary to

the desire of the parents. But, when parents so requested, Catholic priests baptized those children who according to the law should be brought up non-Catholic. This practice was called *Wegtaufen*. Even when, in 1879, the criminal code made the conferring of baptism under such circumstances punishable, the priests were not dismayed—"Go, baptize". Besides this, they were regularly acquitted by the court of last resort in the suits which were brought against them by the Protestant pastors. In 1890 "denunciation" of such baptisms was forbidden by Rome, and the excitement gradually subsided. Augustine von Roskovány, Bishop of Neutra, was the most learned man among the Hungarian bishops of this time. Von Roskovány was Doctor of Philosophy and Theology, secretary to Ladislaus Pyrker, Archbishop of Erlau, and died in 1892. His works are important authorities: "*De Matrimonii mixti*" (7 vols.); "*Monumenta pro independentia potestatis eccles. ab imperio civili*" (13 vols.); "*Celibatus et Breviarium*" (2 vols.); "*Beata Virgo Maria in suo Conceptu immaculata*" (9 vols.); "*Romanus Pontifex Primas ecclesie et Princeps civilis e monumentis omnium sæculorum*" (16 vols.); "*Matrimonium in ecclesia Catholica potestati ecclesiasticæ subjectum*" (4 vols.); "*Supplementa ad Collectiones Monumentorum et Literarum*" (10 vols.).

In 1893 the Hungarian Parliament began to meddle with religion. The head of the ministry, Wekerle, introduced three bills enacting that returns of marriages, births, and deaths should be made by a civil registrar; that the Jewish religion should be legally recognized, that permission should be given for its free exercise, and the right to enter or leave the Jewish faith should be granted. These bills were soon followed by others for the amendment of the marriage laws (civil marriage made compulsory) and concerning mixed marriages. Wekerle carried the first three bills, and they became law. Baron Desiderius Banffy was made the head of the ministry, January, 1895. In order to prevent the passage of the two remaining bills by Banffy, the papal nuncio, Agliardi, went to Hungary. But the Hungarian Parliament declared that such interference in the internal affairs of Hungary would not be permitted. Count Kalnoky, the Minister of Foreign Affairs, who had supported the nuncio, was replaced by Count Agenor Goluchowsky, and Agliardi was made a cardinal and recalled to Rome. The road was now clear. Count Ferdinand Zichy formed the Catholic people's party in opposition to Banffy's aims; but without avail. The two bills became law. The Lutz amendment on pulpits could not be passed during the lifetime of the primate, Simor, but after his death it was adopted (1899).

Article 26 of the Diet of 1790 guaranteed to the Protestants of Hungary the entire control of the affairs of their religion. The Government has hardly any power in regard to either their churches, their schools, or religious foundations. Since 1848 the Catholics have been endeavouring to obtain autonomy. The Catholic congress of 1870 prepared a bill to this end. The Catholic Autonomy Association, consisting of the bishops, the abbots, and certain elected members, clerical and lay, exists to represent the Church in regard to the faithful, on the one hand, and the Government, on the other, in all questions of schools, of church property, and especially (since the minister of public worship might happen to be a non-Catholic) to advise the king in the exercise of his prerogative of nominating bishops. It is plain that the advantage or disadvantage to the Church of autonomy would depend on the composition of the commission. For this reason a commission such as Wekerle wished to form in 1894 was rejected by the bishops, and Zichy's motion, made

on occasion of the Catholic congress of 1897, did not receive government approval. In order to strengthen the claim for autonomy, the bishops, with the exception of Bishop Count Maylath, and the heads of the orders, in 1903, accepted three propositions. These are: that the right to present to bishops shall remain in the hands of the minister of worship; that the school system shall remain unaltered; that the fund for the support of religion shall be controlled by the minister of instruction. In 1906 the turning-point in the history of the autonomy question was probably reached in the address from the throne. The Minister of Public worship and Instruction, Count Albert Apponyi, has already requested the primate to state the position of the bishops in regard to autonomy, so that the bill may be properly prepared.

**ECCLESIASTICAL ORGANIZATION.**—The Catholic Church in Austria-Hungary is administered on the system of archiepiscopal provinces with suffragan dioceses, as follows:—

(a) *In the territories represented in the Imperial (Austrian) Parliament* there are seven archiepiscopal provinces of the Latin Rite and one each of the Greek and Armenian Rites. These provinces comprise in the aggregate 34 sees. *Archdiocese of Vienna* (bishopric 1468, prince-bishopric 1631, prince-archbishopric 1722), with suffragan dioceses of *St. Pölten* (or *St. Hippolytus*; transferred from *Wiener-Neustadt*, 1784) and *Linz* (founded 1784). *Archdiocese of Salzburg* (founded c. 700, archbishopric 800), with suffragan dioceses of *Trent* (founded in second century), *Brixen* (transferred from *Säben* in tenth century) with the general vicariate of *Feldkirch* for *Vorarlberg*, *Gurk* (belonging to *Klagenfurt*, founded 1071), *Seckau* (belonging to *Graz*, founded 1219), and *Lavant* (belonging to *Marburg*, founded 1228). *Archdiocese of Prague* (973–1344 subject to *Mainz*, 1344 archbishopric), with suffragan dioceses of *Budweis* (founded 1785), *Königgrätz* (or *Regina Hradecensis*, founded 1664), and *Leitmeritz* (founded 1665). *Archdiocese of Olmütz* (founded 1063, archbishopric 1777), with suffragan diocese of *Brünn* (founded 1777). *Archdiocese of Görz* (transferred from *Aquileia* 1751), with suffragan dioceses of *Laibach* (founded 1461), *Triest* and *Capo d'Istria*, *Parenzo* and *Pola* (founded sixth century), *Veglia* (founded 990). *Archdiocese of Zara* (*Jadera*, founded fourth century, archbishopric 1146), with suffragan dioceses of *Sebenico* (founded 1298), *Spalato* and *Macarska* (*Spalato* erected into an archbishopric 650), *Lesina* (*Pharus*, founded in twelfth century), *Callaro* (founded in eleventh century), *Ragusa* (founded 990). *Archdiocese of Lemberg* (*Leopolis*, Latin Rite; transferred from *Halic* 1412), with suffragan dioceses of *Tarnów* (founded 1783, transferred to *Tyniec*, then to *Bochnia*, 1816), and *Przemysł* (founded 1340). The *Prince-Bishopric of Cracow* (founded about 700) is subject directly to the Holy See. The Catholics in *Silesia* are under the jurisdiction of the *Prince-Bishop of Breslau*, who has a vicar-general at *Teschen* and a summer residence at *Johannesberg*. The county of *Glatz* belongs to *Prague*. *Lemberg*, Greek-Ruthenian Rite (united in 1597, became an archbishopric in 1808), with suffragan dioceses of *Przemysł* (subject to *Lemberg* since 1818) and *Stanisławów* (founded 1882). *Lemberg*, Armenian Rite, was founded 1367.

(b) *In Hungary* there are four archdioceses of the Latin Rite, with 17 suffragan dioceses; and one archdiocese of the Greek Rite, with six suffragan dioceses, making altogether 28 sees. *Archdiocese of Esztergom* (*Strigonium*, *Gran*; founded 1000), the incumbent of which is Primate of Hungary and ex-officio Legate (*Legatus Natus*), with suffragan dioceses of *Nitra* (founded 1029), *Vác* (*Vacuum*, *Waitzen*; founded in eleventh century), *Győr* (*Jaurinum*, *Raab*; founded in eleventh century), *Veszprém*

(founded 1009), *Szombathely* (*Sabaria*, *Steinamanger*; founded 1777), *Besztercebánya* (*Neusohl*; founded 1776), *Székes-Fehérvár* (*Alba Regalis*, *Stuhlweissenburg*; founded 1777), *Pécs* (*Serbinum*, *Quinque Ecclesia*, *Fünfkirchen*; founded 1009), *Eperjes* (*Ruthenian Greek*; founded 1820), *Munkács* (*Munkaczinum*; *Ruthenian-Greek*; founded 1771). *Archdiocese of Kalocsa and Bács* (founded 1000), with suffragan dioceses of *Nagy-Váradi* (*Varadinum Majus*, *Grosswardein*; founded 1077), *Csanád* [*Chronadium* (*Magyarcsanak-Temesvár*); founded 1035], and *Erdely* [*Transylvania* (*Karlsburg*); founded in twelfth century]. *Archdiocese of Eger* (*Agria*, *Erlau*; founded 1000, archbishopric 1804), with suffragan dioceses of *Rosnyó* (*Rosnavia*, *Rosenau*; founded 1776), *Szathmár-Németi* (*Szathmarium*; founded 1804), *Szepes* (*Scepusia*, *Zips* (*Szepesváralja*); founded 1776], *Kassa* (*Cassovia*, *Kaschau*; founded 1804), and *Sabaria* (*Sacer Mons Pannonia*, *Martinsberg*; founded 997). *Archdiocese of Zagreb* (*Zagrabia*, *Agram*; founded 1093, archbishopric 1853), with suffragan dioceses of *Djakovdr* (founded 1781), *Zengg-Modrus* (founded 1460), and *Kriz* (*Crisium*, *Kreutz*, *Greek-Ruthenian Rite*; founded 1777). *Archdiocese of Fogaras*, of the Greek Rite (founded 1721, archbishopric 1854), has for suffragan dioceses *Nagy-Váradi* (*Varadinum Majus*, *Grosswardein*; founded 1777), *Lugos* (*Lugosium*; founded 1853), and *Szamos-Ujvár* (*Armenopolis*; founded 1777).

(c) *In Bosnia and Herzegovina* there is one archdiocese: *Serajevo* (founded 1881), with suffragan dioceses of *Banjaluca* (founded 1881), *Trebinje* (*Tribunium*; founded in ninth century), *Mostar* (*Mandatrium*; founded 1881). The Apostolic field-vicariate for the army and navy is directly under the control of the Holy See.

**STATISTICS OF RELIGIOUS ORDERS.**—The following table presents a summary of the parent and branch houses of the religious orders in Austria, together with the number of their inmates:—

Diocese	Male Orders		Female Orders	
	Houses	Inmates	Houses	Inmates
Vienna (Archd.) . . . . .	41 (62)	1,611	104 (195)	4,230
St. Pölten . . . . .	16	505	73 (94)	874
Linz . . . . .	29	670	124 (126)	1,765
Salzburg (Archd.) . . . . .	11	216	102	998
Trent . . . . .	35	817	130	1,527
Brixen and Vorarlberg . . . . .	43	1,171	222	2,656
Lavant . . . . .	9	163	13	181
Seckau . . . . .	31	825	67 (90)	1,359
Gurk . . . . .	12	230	22 (26)	357
Görz (Archd.) . . . . .	7	105	7	238
Laibach . . . . .	12	264	19 (24)	92
Veglia . . . . .	11	64	7 (8)	68
Pola . . . . .	1	21	6 (8)	132
Triest . . . . .	7	81	13	174
Prague (Archd.) . . . . .	16	704	76	1,517
Königgrätz . . . . .	12	88	48 (55)	442
Leitmeritz . . . . .	21	180	61	442

**DENOMINATIONAL STATISTICS.**—The forty-nine million inhabitants of the Austro-Hungarian monarchy are divided, as to their religious beliefs, as follows:—*Austrian Provinces.*

Catholics	{ Latin Rite..... 20,661,000 }	23,797,000
	{ Greek Rite..... 3,134,000 }	
	{ Armenian Rite.. 2,000 }	
Jews .....		1,225,000
Greeks (Eastern) .....		607,000
Evangelicals .....		491,000
Old-Catholics .....		13,000
Of no confession .....		6,000
Mohammedans .....		1,000
Of other confessions .....		8,000

*Hungarian Provinces.*

Catholics	{ Latin Rite..... 10,299,190 }	12,207,126
	{ Greek Rite..... 1,907,936 }	
Evangelicals .....		3,823,061
Greeks (Orthodox) .....		2,882,695
Jews .....		886,466
Unitarians .....		70,260
Of other confessions .....		15,837

*Bosnia and Herzegovina.*

Greeks (Eastern) .....	673,000
Mohammedans .....	549,000
Catholics .....	339,000
Jews .....	8,000
Of other confessions .....	4,000

**Authentic.**—The term is used in two senses. It is applied first to a book or document whose contents are invested with a special authority, in virtue of which the work is called *authentic*. In its second sense it is used as a synonym for "genuine", and therefore means that a work really emanates from

the author to whom it is ascribed. The article **VULGATE** explains the first sense of the word; the articles on the single books of Sacred Scripture illustrate the second. F. X. E. ALBERT.

**Authenticity of the Bible.**—The authenticity or authority of Holy Writ is twofold on account of its twofold authorship. First, the various books which make up the Bible are authentic because they enjoy all the human authority that is naturally due to their respective authors. Second, they possess a higher authenticity, because invested with a Divine, supernatural authority through the Divine authorship which makes them the inspired word of God. Biblical authenticity in its first sense must naturally be considered in the articles on the several books of Sacred Scripture; in its second sense, it springs from Biblical inspiration, for which see **INSPIRATION**.

F. X. E. ALBERT.

**Authority, CIVIL**, the moral power of command, supported (when need be) by physical coercion, which the State exercises over its members. We shall consider here the nature, sources, limits, divisions, origin, and the true and false theories of authority. Authority is as great a necessity to mankind as sobriety, and as natural. By "natural" here is meant, not what accrues to man without any effort of his own (teeth, for example), but what man must secure, even with an effort, because without it he cannot well be man. It is natural to man to live in civil society; and where there is civil society, there must be authority. Anarchy is the disruption of society. Speaking generally, we may say no man loves isolation, solitude, loneliness, the life of a hermit; on the other hand, while many dislike the authority under which they live, no man wishes for anarchy. What malcontents aim at is a change of government, to get authority into their own hands and govern those who now govern them. Even the professed anarchist regards anarchy as a temporary expedient, a preparation for his own advent to power. Authority, then, in the abstract, every man loves and cherishes; and rightly so, for it is his nature to live in society, and society is kept together by authority. The model of hermits was St. Simeon Stylites, so called from his living on the top of a style, or pillar. That was his special vocation; he was no ordinary man. But the political philosopher considers man as man ordinarily and normally is. Two things would strike a stranger from Mars looking down upon this planet: how men on earth love herding together, and how they love moving about. Ordinary man can no more afford to be solitary than he can afford to be stationary, though Simeon Stylites was both. Solitary confinement is the severest of punishments, next to death. It is hard to say whether the solitude or the confinement, proves the more irksome. This simple point, that man cannot live alone, must be insisted upon, for all errors in the theory of authority are rooted in the assumption that man's living in society, and thereby coming to be governed by social authority, is something purely optional and conventional, a fashion which man could very well discard if he would, as he might discard the wearing of green clothes. Men who would make society a conventional arrangement, and authority a fashion of the hour, have appealed to the noble savage as the standard of humanity proper, forgetting that the savage is no solitary, but a member of a horde, to separate from which would be death, and to ignore the control of which would be death also. Man must live in society, and, in point of historical fact, men have always lived in society; every human development is a social progress. It is natural to man to live in society, to submit to authority, and to be

governed by that custom of society which crystallizes into law.

And as it is natural to the individual, so is it natural also for the family to unite with others. Society cannot stop short at the family. As the individual is not self-sufficient, neither is the family. The family grows and then multiplies. We have a society of families; and that society grown great, and controlled as it needs to be controlled by some common authority, passes into a self-sufficient, autonomous society, otherwise called a State. Hence civil authority is defined as the moral power of command, supported (when need be) by physical coercion, which the State exercises over its constituent members. Civil authority is of God, not by any revelation or positive institution, but by the mere fact that God is the Author of Nature, and Nature imperatively requires civil authority to be set up and obeyed. Nature cannot tolerate intemperance, nor anarchy either. And what Nature absolutely requires, or absolutely refuses as incompatible with her well-being, God commands, or God forbids. God then forbids anarchy; and in forbidding anarchy He enjoins submission to authority. In this sense, God is at the back of every State, binding men in conscience to observe the behests of the State within the sphere of its competence. "Let every soul be subject to higher powers: for there is no power but from God: and those that are, are ordained of God. . . . Wherefore be subject of necessity, not only for wrath, but also for conscience' sake. . . . For they are the ministers of God. . . ." (Rom. xiii, 1, 5, 6).

Obedience, being a practical thing and not a speculation, cannot abstract from the concrete facts of the case; it is paid to the powers that be, to the authority actually in possession. Obedience is as disobedience; men are never disobedient except to the government of the day. But there are limits to civil obedience, and to the competence of civil authority. As domestic obedience is not to be carried to the extent of rebellion against the civil government, so neither is the State to be obeyed as against God. It is not within the competence of the State to command anything and everything. The State cannot command what God could not command, for instance, idolatry. The authority of the State is absolute, that is to say, full and complete in its own sphere, and subordinate to no other authority within that sphere. But the authority of the State is not arbitrary; it is not available for the carrying out of every whim and caprice. Arbitrary government is irrational government; now no government is licensed to set reason aside. The government of God Himself is not arbitrary; as St. Thomas says: "God is not offended by us except at what we do against our own good" (Contra Gentiles, III, 122). The arbitrary use of authority is called tyranny. Such is the tyranny of an absolute monarch, of a council, of a class, or of a majority. The liberty of the subject is based on the doctrine that the State is not omnipotent. Legally omnipotent every State must be, but not morally. A legal enactment may be immoral, and then it cannot in conscience be obeyed; or it may be *ultra vires*, beyond the competence of the authority that enacts it, in which case compliance with the law is not a matter of obedience, but of prudence. In either case the law is tyrannical, and "a tyrannical law, not being according to reason, is not, absolutely speaking, a law, but rather a perversion of law" (St. Thomas, Summa Theol., 1<sup>a</sup> 2<sup>ae</sup>, q. 92, art. 1, ad 4). Man is not all citizen. He is a member, a part of the State, and something else besides. "Man is not subservient to the civil community to the extent of his whole self, all that he is and all that he has" (St. Thomas, Summa Theol., 1<sup>a</sup> 2<sup>ae</sup>, q. 21, art. 4, ad 3). To say nothing of his eternal interests in

his relations with his Maker, man has even in this life his domestic interests in the bosom of his family. his intellectual and artistic interests, none of which can be called political interests. Social and political life is not the whole of human life. Man is not the servant of the State in his every action. The State, the majority, or the despot, may demand of the individual more than he is bound to give. Were human society a conventional arrangement, were man, being perfectly well off in isolation from his fellows, to agree by way of freak to live in community with them, then we could assign no antecedent limits to civil authority. Civil authority would be simply what was bargained for and prescribed in the arbitrary compact which made civil society. As it is, civil authority is a natural means to a natural end, and is checked by that end, in accordance with the Aristotelean principle that "the end in view sets limits to the means" (Aristotle, Politics, I, 9). The immediate end of civil authority is well set forth by Suarez (De legibus, III, xi, 7) as "the natural happiness of the perfect, or self-sufficient, human community, and the happiness of individuals as they are members of such a community, that they may live therein peaceably and justly, with a sufficiency of goods for the preservation and comfort of their bodily life, and with so much moral rectitude as is necessary for this external peace and happiness". Happiness is an attribute of individuals. Individuals are not made happy by authority, but authority secures to them that tranquillity, that free hand for helping themselves, that restful enjoyment of their own just winnings, which is one of the conditions of happiness. Nor does authority make men virtuous, except according to that rough-hewn, outline virtue, which is called "social virtue", and consists mainly of justice. When the ancients spoke of "virtue" being the concern of the State, they meant justice and efficiency. Neither the virtue nor the happiness of individuals is cared for by the State except "as they are members of the civil community". In this respect, civil differs from domestic, or paternal, authority. The father cares for the members of his household one by one, singly and individually. The State cares for its members collectively, and for the individual only in his collective aspect. Hence it follows that the power of life and death is inherent in the State, not in the family. A man is hanged for the common good of the rest, never for his own good.

This, then, is one measure of authority, the end which the State has in view. Another is the stage of development at which any given particular State has arrived. For there is not one measure of authority common to all States. As the State develops, it grows in unity, and greater unity means an ampler measure of central authority. There is far more authority in the England of to-day than in the England of the Heptarchy. There was more authority in an Anglo-Saxon kingdom than in a horde of savages. In early civil societies there is no legislative authority, and no law, but only immemorial custom. There is little judicial authority, but injured men, or their families after their death, right their own wrongs, murder is restrained, not by judge, jury, and executioner, but by blood-feud. On the other hand, in highly civilized societies, especially those of a democratic character, the will of the people continually thrusts new functions upon government, such as education, the care of public health, the carrying of letters, the sending of telegrams. The recognition of this fact has been called "the principle of voluntary control". By it civil authority may be enlarged beyond its natural and essential limits. Like other principles, "the principle of voluntary control" may be pushed too far. Pushed to the limit, it would involve Socialism.

Authority, though varying in amount, is as universal as man is everywhere. Man cannot live except under authority, as he cannot live out of civil society. It is by no convention, compact, or contract, that authority takes hold of him. It is a necessity of his nature. But while civil authority, or government, is natural and universal, the distribution of authority, otherwise called the form of government, or the constitution of the State, is a human convention, varying in various countries, and in the same country at different periods of its history. It is scarcely too much to say that there are as many various distributions of civil authority, or various forms of government, as there are varieties of vertebrate animals. They are classified as monarchies, aristocracies, democracies; but no two monarchies are quite alike, nor two democracies. Thus a democracy may be direct, as in ancient Athens, or representative, as in the United States. The monarchy of Edward VII is different from that of George III.

The one point fixed by nature, and by God, is that there must be authority everywhere, and that the authority existent for the time being, under such and such a form, be under that form obeyed; for since there is no actual authority in the country except under that form, to refuse to obey that is to refuse authority simply, and to revert to anarchy, which is against nature: just as a man having nothing but bread and cheese to eat, and refusing to eat his bread and cheese, under pretence that he much prefers mutton, condemns himself to starvation, which again is unnatural. But we must beware of saying of any particular form of authority, monarchy for example, or democracy either, what is true only of authority in the abstract, namely, that all nations are bound to live under it, and that never under any pretence can it be subverted. A country, once monarchical, is not eternally bound to monarchy; and circumstances are conceivable under which a republic might pass into monarchy, as Rome did under Augustus, much to its advantage. Authority rules by Divine right under whatsoever form it is established. No one form of government is more sacred and inviolate than another. Change of persons holding office is usually provided in the constitution, sometimes by rotation, sometimes by vote of the legislative assembly. No monarchical constitution provides for the change of the person of the monarch otherwise than by death or resignation. Change of the form of government can be effected constitutionally, but, as history shows, as often as not, it is brought about unconstitutionally. When the change is complete, the new government rules by right of accomplished fact. There must be authority in the country, and theirs is the only authority available.

**DIVISIONS.**—The progress of civilization subdivides authority into legislative, judicial, and executive, and the latter again into civil and military. The king, or president, is chief of the executive. Authority again is subdivided into imperial and local, the latter emanating from the former and subordinate to it.

**ORIGIN.**—The question of the origin of authority seems first to have been raised by the Roman lawyers. In their hands it assumed the concrete form of the origin of the imperial power. This power they argued to reside primarily in the Roman people; the people, however, did not exercise nor retain it, but transferred it by some implicit *lex regia*, or king-making ordinance, as a matter of course wholly, and irrevocably to each successive emperor at his accession. With the advent of Christianity, St. Paul's doctrine came into prominence, that authority is of God; yet in no clear way was it made out how it came of God until St. Thomas Aquinas showed that it was of God inasmuch as it was an essential of the

human nature which God has created, according to the doctrine of Aristotle above exposed. Before St. Thomas arose, some churchmen had shown a disposition to cry down the civil power. They could not deny that it was of God, but they regarded it as one of the consequences of the sin of Adam, and argued that, but for the Fall, man would have lived free from coercive jurisdiction. They rehearsed the legend of Romulus, and the asylum that he opened for robbers. States, they said, usually have their origin in rapine and injustice. Others invested the pope with the plenitude of secular as well as spiritual authority, by the gift of Christ, and argued that kings reigned only as his vicegerents, even in civil matters. The Aristoteleanism of St. Thomas was opposed to all this. On the other hand, the imperial and royal party made a pope of the king or emperor; the civil ruler was as much an institution of Christ as the pope himself, and, like the pope, enjoyed a God-given authority, no portion of which could validly be taken from him. This is the doctrine of "the divine right of kings". According to it, in its rigour, in a State once monarchical, monarchy is forever the only lawful government, and all authority is vested in the monarch, to be communicated by him, to such as he may select for the time being to share his power. This "divine right of kings" (very different from the doctrine that all authority, whether of king or of republic, is from God), has never been sanctioned by the Catholic Church. At the Reformation it assumed a form exceedingly hostile to Catholicism, monarchs like Henry VIII, and James I, of England, claiming the fullness of spiritual as well as of civil authority, and this in such inalienable possession that no jot or tittle of prerogative could ever pass away from the Crown. Against these monstrous pretensions were fought the battles of Marston Moor and Naseby.

Against the same pretensions a more pacific warfare was waged by Francis Suarez, S.J. Suarez argued against James I that spiritual authority is not vested in the Crown, and that even civil authority is not the immediate gift of God to the king, but is given by God to the people collectively, and by them bestowed on the monarch, according to the theory of the Roman lawyers above mentioned, and according to Aristotle and St. Thomas. Authority, he asserted, is an attribute of a multitude assembled to form a State. By their nature they must form a State, and a State must have authority. Authority, therefore, is natural to mankind collectively; and whatever is natural, and rational, and indispensable for human progress, is an ordinance of God. Authority must be, and God will have it to be; but there is no such natural necessity of authority being all centred in one person. Authority is a Divine institution, but kings are a human invention. The saying is a platitude in our time; three centuries ago, when Suarez wrote, it was a bold and startling pronouncement. Suarez saved his loyalty by the concession that the people having bestowed the supreme power on His Majesty's ancestors ages ago, their posterity could not now resume it, but it must descend, like an heirloom, from the king to the king's son for all time. This concession was not everywhere borne in mind by posterity. Indeed it would appear a restriction on the development of a State for the distribution of authority to be thus fixed forever. In England at any rate the restriction has been broken through, and the king is not what he was in Stuart times, nor the Parliament either.

**THEORIES.**—There have been two great outbreaks against excess of royal prerogative: one in England, in the middle of the seventeenth century; another in France, at the end of the eighteenth. Each of these two periods was marked by the appearance of a great political writer, Thomas Hobbes

in England, Jean Jacques Rousseau in France. Hobbes was a philosopher, Rousseau a rhetorician. Whoever knows Hobbes well can have little to learn from Rousseau. Hobbes is rigidly logical; such inconsistencies as appear in him come from a certain timidity in speaking out, and a humility that approaches nigh to hypocrisy. Rousseau always speaks boldly, makes no pretence to orthodoxy, and frequently contradicts himself. His brilliant style won him the ear of Europe; he popularized Hobbes. To the philosopher, Rousseau is contemptible, but Hobbes is an antagonist worthy of any man's steel. The best that can be said of Rousseau in philosophy is that he drew out of Hobbes's principles conclusions which Hobbes was afraid to formulate. Hobbes made of the king a despot; Rousseau showed that, on Hobbesian principles, a king is no better than the people's bailiff, unless indeed, by military force or otherwise, he can prevent the people from assembling and decreeing his deposition. Hobbes starts, and Rousseau after him, by contradicting Aristotle. According to Aristotle, man is "by nature a State-making animal"; the individual man, if he is to thrive at all, develops into the family, man, and the family man into the citizen; and wherever there is a city, or a nation, there must be self-government, or, in other words, civil authority, whether vested in one or in many. Authority is the very breath of man's nostrils, as he is a progressive being. Isolation and anarchy are fatal to human progress. Effort, without which man cannot thrive, though it be an effort, and not an initial endowment passively received, Aristotle calls "natural". The State-making effort is "natural" to man; so is authority "natural", and, as such, of God, adds Thomas Aquinas. But Hobbes took "natural" in quite another sense. That he held to be "natural" which man is, antecedently to all effort and arrangement on his part to make himself better. Further, his philosophy was tinged with the Calvinism of his day, and he took it that man is of himself "desperately wicked". What was natural, then, was bad, bad on the whole. Reason being an original endowment of man, Hobbes allowed reason to be natural. He allowed also, with Plato, that wickedness is irrational, by which concession Hobbesism is marked off from a celebrated theory stated at the beginning of the second book of Plato's Republic, to which theory in other respects it bears a strong resemblance; the theory being that right by nature is the interest of the stronger, and only by convention becomes the interest of the State.

This allowing of wickedness to be against reason is a weak point in the logic of Hobbes. But Hobbes would have it that reason is by nature utterly unable to contend with wickedness, that it is overborne by, and made subservient to, passion, and so is degraded into cunning, man becoming more wicked by his possession of reason. Of himself, in his "state of nature", Hobbesian man is a savage, solitary, sensual, and selfish. When two human beings meet, the natural impulse of each is to lord it over the other. By force, if he is strong, by stratagem, if he is weak, every man seeks to kill or enslave every other man that he meets. Man's life in this state of nature, says Hobbes, is "nasty, brutish, and short." So it would be, in an English fen, and in most other places. But Rousseau's imagination carried him to the Pacific Isles; he became enamoured of "the noble savage". He fell in with Hobbes's notion of the "natural", as being what man is and has antecedently to all human effort. But the "citizen of Geneva", as he called himself, was curiously free from Calvinistic bias, and believed enthusiastically in the primitive, unmade, natural goodness of man. In Hobbes's view, though not in Rousseau's, man had every reason for getting out of his "nasty" state of nature. This was done by a pact, or convention, of every

man with all the rest of mankind, to give up solitude with its charms, its independence, and its liberty of preying upon neighbours, and to live in society, the social body thus formed having all the rights of the individuals contributing to form it. This compact of man with man to quit solitude and live in society, to abandon nature and submit to convention, was called by Rousseau, "The Social Contract". The body formed by it, commonly called the State, Hobbes termed "The Leviathan", upon the text of Job, xli, 24, "there is no power upon earth that can be compared with him. . . ."

To Hobbes and to Rousseau the State is omnipotent, containing in its one self absolutely all the rights of the citizens who compose it. The wielder of this tremendous power is the General Will, measured against which the will of the individual citizen is not only powerless, but absolutely non-existent. The individual gave up his will when he made the Social Contract. "No rights against the State", is a fundamental principle with Hobbes and Rousseau. To live in the State at all means compliance with every decree of the General Will. But there is a difficulty in locating this General Will. Hobbes, with laudable perspicacity, seeing that tyranny is better wielded by one man than by a multitude, contemplates the multitude resigning all their power into the hands of a Single Person, and denying themselves the right of meeting without his calling them together; so that, by the simple expedient of never calling them together, the Single Person may incapacitate the people from ever resuming the power which is only theirs when they are all assembled. The General Will in that case is the will of the Single Person. Hobbes's location of the General Will is not lacking in clearness. But Rousseau would have the sovereign authority to be the inalienable right of the multitude—hence called the "Sovereign People". They may, if they will, employ a king, or even an emperor; but his majesty, in Rousseau's phrase, is "Prince" not "Sovereign", and at stated times, without his calling them together, the Sovereign People must meet and decide, first, whether they will continue to support a throne at all; secondly, whether the throne shall further be filled by the present occupant. Rousseau's location is also clear, so long as it is understood that the General Will is simply the will of the numerical majority of the Sovereign People. Such a General Will is ascertained by the simple process of counting heads. If in a State of 20,000 citizens, 15,000 vote aye, aye is the General Will, not the will of the majority only, but of the whole 20,000 together; for though 5,000 persons detest the proposal, such detestation lies only in the individual will, sometimes called the "casual will", and the individual will has ceased to exist by the Compact. Personally they detest the measure, but with their "Real Will" they approve it. Thus, as Rousseau says, they remain as free as the wild man in the woods, obey none but themselves, and follow their own will everywhere.

But a canker-worm lies at the root of this, as of all ultra-democratic doctrines. All originate in a manifestly false supposition, that one man is as good as another. In any sane polity, the predominant Intelligence must guide the counsels of the State, not the predominant Will, which may be no better than caprice. But intelligence is not necessarily attached to majorities. Rousseau himself falters in presence of this awkward truth, and re-states the General Will, as the will which the people have of good in general, albeit in a particular case they are mistaken in what they take to be good. Thus they will one thing, and vote for another. The Real Will in this case is not to be gathered from the actual vote of the majority. The Real Will is of that which the majority would have voted for, had they known

better. Rousseau's theory contemplates "a people of gods", so he assures us. Such a people would scarce require any government. The ideal, sylvan creatures whom his imagination brings together to form the Social Contract, if not all very intelligent, may be supposed to be all good listeners to intelligent teaching, and thus Intelligence will govern the majority, and the vote of the majority will be an ideally Real Will. Government is an easy matter on such optimistic presuppositions. The eye, however, glances back upon Hobbes's ruffian primeval, "brutish and nasty". Hobbes's view of human nature must check that of Rousseau. Both views are extreme, and the truth lies between them. The democratic rule of a numerical majority is not of universal application. One has to consider the character of the people, and peoples vary. If in one age or place the people approximate to the character of "a people of gods", or angels, in another country or another time they may be more like devils. "Force, devoid of counsel, of its own bulk comes to a crash", says Horace (*Odes*, III, 4). That is the danger of the General Will. Rousseau, with Hobbes to guide him, starts from a false supposition, that the natural state of man is savage solitude, not civil society; he proceeds through the false medium of the "Social Contract", false because society is not a thing of convention; false again, because out of all keeping with the evidence of history; and he is apt to end in the tyranny of a brute majority, trampling upon the rights and consciences of individuals; or again in anarchy, his disciples putting too literal a construction upon the promise that henceforth no man shall obey any other than himself.

The doctrines of Rousseau have not escaped the censure of the Church. Rousseau may be recognized in the following propositions, condemned in the Syllabus of Pius IX: "The State is the source and origin of all rights, and its rights are unlimited" (n. 39): "Authority is nothing else than numbers, and a sum of material forces" (n. 60): "It is allowable to refuse obedience to lawful princes, and even to rebel against them" (n. 63). Leo XIII, not content with condemning, teaches positive doctrine against Rousseau, to wit: the Aristotelean and Thomist doctrine already stated. Thus the Encyclical "Immortale Dei", of November, 1885: "Man's natural instinct moves him to live in civil society; for he can not, if dwelling apart, provide himself with the necessary requirements of life, nor procure the means of developing his faculties. Hence it is Divinely ordained that he should be born into the society and company of men, as well domestic as civil. Only civil society can ensure perfect self-sufficiency of life [an Aristotelean term]. But since no society can hold together unless there be some one over all, impelling individuals efficaciously and harmoniously to one common purpose, a ruling authority becomes a necessity for every civil commonwealth of men; and this authority, no less than society itself, is natural, and therefore has God for its author. Hence it follows that public power of itself cannot be otherwise than of God."

In the theory of Hobbes and Rousseau, Authority is the outcome of contract, not between people and prince, but of every man with every other man to relinquish solitude and its rights, and live in civil society. Rousseau is instant in pronouncing that between people and prince there can be no contract, but the prince is a tenant at will, who may be turned out of doors, with or without reason, any day that the Sovereign People assemble to vote upon him. But there is another theory of contract, centuries older than Hobbes, a theory greatly cherished by Locke and the English Whigs, who found in it the justification of the expulsion of James II in 1688. In this theory, the contract is said to lie between the

people and their ruler; the ruler is to be obeyed so long as he fulfils certain conditions, known as "the constitution". If he violates the constitution, he forfeits his authority and the people may cast him out. Thus ruler and subject are two "high contracting parties". The ruler has no superiority of status, but of contract only. On this it is to be observed, first, that such a contract lies not in the nature of things, and therefore is not to be taken for granted; but evidence in each particular case should be forthcoming of the contract having been made on those terms as a fact of history. Secondly, this asserted contract labours under the inconvenience that Job declared of old: "... in judgment. There is none that may be able to reprove both, and to put his hand between both" (*Job*, ix, 32, 33). The contract cannot be enforced at law, for lack of a judge; in case of dispute, each party pronounces in his own favour, and they are like to fight it out. The result is civil war, as between Charles I and his Parliament. But really ruler and subjects are not two "high contracting parties", as two nations are. The theory is prejudicial to the unity of the State, and countenances revolution. The theory was brought up to meet that delicate inquiry, "What is to be done when Government abuses its authority?" On which see "Moral Philosophy" (*Stonyhurst Series*), 338-343.

**Authorized Version, THE,** name given to the English translation of the Bible produced by the Commission appointed by James I, and in consequence often spoken of as "King James's Bible". It is in general use among English-speaking non-Catholics. In order to understand its origin and history, a brief survey is necessary of the earlier English translations of the Scriptures. From very early times portions of the Bible have been translated into English. It is well known that Venerable Bede was finishing a translation of St. John's Gospel on his death-bed. But the history of the English Bible as a whole does not go back nearly so far; it dates from the so-called Wyclif Version, believed to have been completed about the year 1380. The translation was made from the Vulgate as it then existed, that is before the Sixtine and Clementine revisions, and was well and accurately done. Abbot Gasquet contends confidently (*The Old English Bible*, 102 sqq.) that it was in reality of Catholic origin, and not due to Wyclif at all; at any rate it seems fairly certain that he had no share in any part of it except the Gospels, even if he had in these; and there is evidence that copies of the whole were in the hands of good Catholics, and were read by them. The version, however, undoubtedly derived its chief importance from the use made of it by Wyclif and the Lollards, and it is in this connexion that it is chiefly remembered. During the progress of the Reformation a number of English versions appeared, translated for the most part not from the Vulgate, but from the original Hebrew and Greek.

Of these the most famous were Tyndale's Bible (1525); Coverdale's Bible (1535); Matthews' Bible (1537); Cromwell's, or the "Great Bible" (1539), the second and subsequent editions of which were known as Cranmer's Bible; the Geneva Bible (1557-60); and the Bishops' Bible (1568). The art of printing being by this time known, copies of all these circulated freely among the people. That there was much good and patient work in them, none will deny; but they were marred by the perversion of many passages, due to the theological bias of the translators; and they were used on all sides to serve the cause of Protestantism.

In order to counteract the evil effects of these versions, the Catholics determined to produce one of their own. Many of them were then living at various centres on the Continent, having been forced to leave England on account of the Penal Laws, and the work was undertaken by the members of Allen's College, at Douai, in Flanders, which was for a time transferred to Reims. The result was the Reims New Testament (1582) and the Douay Bible (1609-10). The translation was made from the Vulgate, and although accurate, was sadly deficient in literary form, and so full of Latinisms as to be in places hardly intelligible. Indeed, a few years later, Dr. William Fulke, a well-known Puritan controversialist, brought out a book in which the text of the Bishops' Bible and the Reims Testament were printed in parallel columns, with the sole purpose of discrediting the latter. In this he did not altogether succeed, and it is now generally conceded that the Douay Bible contained much excellent and scholarly work, its very faults being due to over-anxiety not to sacrifice accuracy. In the meantime the Protestants were becoming dissatisfied with their own versions, and soon after his accession King James I appointed a commission of revision—the only practical outcome of the celebrated Hampton Court Conference. The commissioners, who numbered forty-seven, were divided into six companies, two of which sat at Oxford, Cambridge, and Westminster, respectively; each company undertook a definite portion of the Bible, and its work was afterwards revised by a select committee chosen from the whole body. The instructions for their procedure were, to take the Bishops' Bible, which was in use in the churches, as their basis, correcting it by a comparison with the Hebrew and Greek texts. They were also given a list of other English versions which they were to consult. The commissioners set to work in 1607, and completed their labours in the short period of two years and nine months, the result being what is now known as the "Authorized Version". Although at first somewhat slow in gaining general acceptance, the Authorized Version has since become famous as a masterpiece of English literature. The first edition appeared in 1611, soon after the Douay Bible, and nearly thirty years after the Reims Testament; and although this latter was not one of the versions named in the instructions to the revisers, it is understood that it had considerable influence on them (see Preface to Revised Version, i, 2. Also, J. G. Caletton, "Reims and the English Bible").

The Authorized Version was printed in the usual form of chapters and verses, and before each chapter a summary of its contents was prefixed. No other extraneous matter was permitted, except some marginal explanations of the meaning of certain Greek or Hebrew words, and a number of cross-references to other parts of the Scripture. At the beginning was placed a dedication to King James and a short "Address to the Reader". Books such as Ecclesiasticus, and Machabees, and Tobias, which are considered by Protestants to be apocryphal, were of course omitted. Although it was stated on the title-page that the Authorized Version was "ap-

pointed to be read in the Churches", in fact it came into use only gradually. For the Epistles and Gospels, it did not displace the Bishops' Version until the revision of the Liturgy in 1661; and for the Psalms, that version has been retained to the present day; for it was found that the people were so accustomed to singing it that any change was inadvisable, if not impossible. Considerable changes were made, from time to time, in the successive editions of the Authorized Version, in the notes and references, and some even in the text. A system of chronology based chiefly on the calculations of Archbishop Ussher was first inserted in 1701; but in many later editions both the dates and many, or even all, of the references or verbal notes have been omitted.

It is generally admitted that the Authorized Version was in almost every respect a great improvement on any of its predecessors. So much was this the case that when Bishop Challoner made his revision of the Douay Bible (1749-52), which is now commonly in use among English-speaking Catholics, he did not scruple to borrow largely from it. Indeed, Cardinal Newman gives it as his opinion (*Tracts Theol. and Eccles.*, 373) that Challoner's revision was even nearer to the Authorized Version than to the original Douay, "not in grammatical structure, but in phraseology and diction". Nevertheless, there remained in the Authorized Version here and there traces of controversial prejudice, as for example, in the angel's salutation to the Blessed Virgin Mary, the words "highly favoured" being a very imperfect rendering of the original. In such cases, needless to say, Challoner adhered to the Douay. Moreover, while in the Authorized Version the names of persons and places were usually given in an Anglicized form already in use, derived from the Hebrew spelling, Challoner nearly always kept the Vulgate names, which come originally from the Septuagint. It is partly due to this that the Authorized Version has an unfamiliar sound to Catholic ears. The Authorized Version remained in undisputed possession for the greater part of three centuries, and became part of the life of the people. In the latter half of the nineteenth century, however, it began to be considered that the progress of science called for a new version which should embrace the results of modern research. The work was set on foot by Convocation in 1870, and a Committee was formed, in which the Americans co-operated, resulting in the issue of the Revised Version (1881-84). The Revised Version has never received any definite ecclesiastical sanction, nor has it been officially introduced into church use. It has made its way simply on its merits. But although at the present day it is much used by students, for the general public (non-Catholic) the Authorized Version still holds its ground, and shows no sign of losing its popularity.

**Autocephali** (Gr., *αὐτοκέφαλοι*, independent), a designation in early Christian times of certain bishops who were subject to no patriarch or metropolitan, but depended directly on the triennial provincial synod or on the Apostolic See. In case of heresy, e. g., or other grave offences, they could only be judged by these tribunals. Such were the bishops of Cyprus (cf. Council of Ephesus, Act. VII; Trullan Council, can. 39), the Bishops of Iberia and Armenia as late as the time of Photius, those of Britain before the coming of St. Augustine, and for a while those of Ravenna. The extension of the patriarchal authority diminished their number. Quite similar were certain Oriental bishops in the Patriarchates

of Constantinople, Alexandria, and Antioch, who were subject directly to the patriarch of the civil (imperial) diocese to which they belonged, and who owed no obedience to their immediate metropolitans; they were not unlike the modern "exempt" bishops immediately subject to the Apostolic See. The most ancient list of them is given in the ninth-century "Notitia" of Leo the Wise, where they are entitled archbishops and metropolitans, though they had no suffragans. Occasionally priests were called "autocephali", e. g. the clergy of a patriarchal diocese. (See Soz., *Hist. Eccl.*, VI, 21, and Eus., *Hist. Eccl.*, V, 23, with the note of Valesius, also BISHOP, EXEMPTION, RAVENNA.)

THOMAS J. SHAHAN.

**Autos Sacramentales** (Sp. *auto*, act or ordinance; *sacramental*, sacramental, pertaining to a sacrament), a form of dramatic literature which is peculiar to Spain, though in some respects similar in character to the old Morality plays of England. The *auto sacramental* may be defined as a dramatic representation of the mystery of the Eucharist. At least this is the definition that would apply to the *auto* of the time of Calderón. It does not so well fit, however, those of the preceding century, many of which were sacramental in character only because they were presented during the feast of Corpus Christi. They are usually allegorical, the characters representing, for example, Faith, Hope, Air, Sin, Death, etc. There were some indeed, in which not a single human character appeared, but personifications of the Virtues, the Vices, the Elements, etc. As early as the thirteenth century religious exhibitions had been popular with the masses in Spain. These usually took the form of simple dialogue, and were presented during religious festivals, for instance, at Christmas and Easter. But it is not until the beginning of the sixteenth century that we have the first true *auto sacramental* having for its theme the mystery of the Eucharist. It was "El Auto de San Martín", by Gil Vicente. During the sixteenth and seventeenth centuries these *Autos* continued to appear, being gradually improved and elaborated until brought to their highest state of development by Calderón.

The *auto sacramental* was always presented in the streets in connexion with the celebration of the feast of Corpus Christi. It was preceded by a solemn procession through the principal streets of the city, the houses along the route being decorated in honour of the occasion. In the procession appeared the priests bearing the Host under a splendid canopy, followed by a devout throng, in which, in Madrid, often appeared the king and his court without distinction of rank, and last of all, in beautiful cars, came the actors from the public theatres who were to take part in the performance. The procession usually halted before the house of some dignitary while the priests performed certain religious ceremonies, the multitude kneeling meanwhile as if in church. At the conclusion of these, the *auto* was given. These performances, and the procession as well, were given with much splendour and at great expense, being limited only by the resources of the particular town in which they took place.

Of the better known writers of this kind of dramatic literature may be mentioned Juan de la Enzina and Gil Vicente, who wrote in the fifteenth and sixteenth centuries, while among those who wrote *autos* when they were at the height of their success was Lope de Vega, who composed no less than four hundred. Very few of these are now extant. Among his best are "The Harvest" and "The Wolf turned Shepherd." Then came Montalván, whose "Poly-

phemus" was his best known *auto*; Valdivielso, who wrote "The Prodigal Son"; and lastly, the most successful of all, Calderón. Although not as prolific as Lope de Vega, Calderón has left about seventy *autos*, the best known of which are "The Divine Orpheus", a work of considerable poetic merit, "The Devotion to the Mass", and "The Captivity of the Ark". These *autos sacramentales* produced a great effect on the people. From time immemorial, allegory of every kind had powerfully appealed to them, and these *autos* took a strong hold on the popular favour, coming as they did during religious festivals, with their music and their splendour, coupled with the fact that they were given at the public expense and with the sanction of the Church. In 1765, their public representation was forbidden by Charles III, but the habits of centuries could not be so easily overcome, and for many years afterward they continued to be presented in some of the smaller towns.

VENTURA FUENTES.

**Autpert**, AMBROSE, an early medieval writer and abbot of the Benedictine Order, b. in France, early in the eighth century; d. after an abbacy of little more than a year at his monastery of St. Vincent on the Volturno, near Beneventum, in Southern Italy, 778 or 779. Autpert, if forgotten to-day, was not without a name in his own century. Charlemagne made use of his talents; Pope Stephen IV protected him; and the monastery where he spent many years, and of which he died abbot was famous among the great monasteries of Italy. He has sometimes been confounded with another Autpert who was Abbot of Monte Cassino in the next century, and who left a collection of sermons besides a spiritual treatise. His chief work is "Expositio in Apocalypsim" (P. L., XXXV, col. 2417-8).

FRANCIS P. HAVEY.

**Autran**, JOSEPH, a French poet, b. at Marseilles 20 June, 1813; d. in the same city, 6 March, 1877. He pursued his classical studies in the Jesuit college of Aix. His father, however, having met with reverses, Autran, obliged to earn his own living, accepted a position as teacher in a religious school. Thus engaged, he published the first work which drew attention to his merits as a poet; this was an ode written on the occasion of Lamartine's departure for the Holy Land. "Le Départ pour l'Orient" was followed (1835) by a collection of poems entitled "La mer", remarkable for descriptive power and the charms of its versification. The favour with which it was received led him to publish a second series of the same subject, "Les Poèmes de la mer", which appeared in 1852. Meantime, he had written another volume of lyrics "Ludibria ventis", which served to increase his popularity as a singer; also a prose work, "Italie et la Semaine sainte à Rome" (1841), the fruit of a voyage to the Eternal City. The French conquest of Algiers suggested the subject of an epic poem, "Milianah", published in 1842. In 1848 "La Fille d'Achille", a tragedy in five acts, shared with Emile Augier's "Gabrielle" the *Prix Monthyon* awarded by the French Academy. This was followed by "Laboureurs et Soldats" (1845), "Vie rurale" (1856), crowned by the French Academy; "Eplures rustiques"; "Le poème des beaux jours" (1862); "Le Cyclope", a drama after Euripides (1869); "Les Paroles de Salomon"; "Sonnet Capricieux" (1873); "La Légende des Paladins" (1875). In 1868 Autran was elected a member of the French Academy to succeed Ponsard. In his later days he was stricken with blindness. Autran, though

not a poet of the first rank, is a writer whose noble sentiments, chaste imagination, and religious feeling will always endear him to lovers of pure and refreshing poetry. All his works are remarkable for their purity of expression, the music of their rhythm, and a profound feeling for the beauties of nature.

JEAN LE BARS.

**Autun** (AUGUSTODONUM), DIOCESE OF, comprises the entire Department of Saône et Loire in France. It was suffragan to the Archdiocese of Lyons under the old regime. The sees of Châlons-sur-Saône and Mâcon were united to Autun after the Revolution, and it then became suffragan to Besançon (1802), afterwards to Lyons (1822). Christian teaching reached Autun at a very early period, as we know from the famous Greek inscription of Pectorius which dates from the third century. It was found in 1839 in the cemetery of St. Peter l'Estrier at Autun and bears testimony to the antiquity and efficacy of baptism and the sacramental words of the Holy Eucharist. Local recensions of the "Passion" of St. Symphorianus of Autun exhibit St. Polycarp on the eve of the persecution of Septimius Severus, assigning to St. Irenæus two priests and a deacon (Sts. Benignus, Andochius, and Thyrsus), all three of whom depart for Autun. St. Benignus goes on to Langres, while the others remain at Autun. According to this legendary cycle, which dates from about the first half of the sixth century, it was not then believed at Autun that the city was an episcopal see in the time of St. Irenæus (c. 140-c. 211). St. Amator, whom Autun tradition designates as its first bishop, probably occupied the see about 250. The first bishop known to history is St. Reticius, an ecclesiastical writer, and contemporary of the Emperor Constantine (306-337). The Bishop of Autun enjoys the right of wearing the pallium, in virtue of a privilege accorded to the see in 599 by St. Gregory the Great (590-604). In the Merovingian period two Bishops of Autun figured prominently in political affairs; St. Syagrius, bishop during the second half of the sixth century, a contemporary of St. Germanus, Bishop of Paris (a native of Autun), and St. Leodegarius (Léger), bishop from 663 to 680, celebrated on account of his conflict with Ebrouin and put to death by order of Thierry III. Charles Maurice de Talleyrand-Périgord, the future diplomat, was Bishop of Autun from 1788 to 1790, when he resigned. The last bishop of this see, appointed in 1882 (d. 1906), was Cardinal Perraud, member of the French Academy. In 670, an important council was held at Autun for the purpose of regulating the discipline of the Benedictine monasteries. The present cathedral of Autun dates from the eleventh and twelfth centuries, and was formerly the chapel of the Dukes of Burgundy; their palace was the actual episcopal residence. In the Diocese of Autun are yet to be seen the ruins of the Benedictine Abbey of Tournay and the great Abbey of Cluny, to which 2,000 monasteries were subject, and which gave to the Church the great pope, Gregory VII (1073-85). Gelasius II (1118-19) died at Cluny, and there also was held the conclave that elected Calixtus II (1119-24). The devotion to the Sacred Heart originated in the Visitation Convent at Paray-le-Monial, founded in 1644, and now the object of frequent pilgrimages. At the end of the year 1905 the Diocese of Autun contained 618,227 inhabitants, 65 parishes, 458 succursals, or auxiliary, churches, and 68 vicariates.

GEORGES GOTAU.

**COUNCILS OF AUTUN.**—The first council, held in 663 (or 670) orders all ecclesiastics to learn by heart the Apostles' Creed and the Athanasian Creed, and this seems to be the earliest mention of the latter in France. Cardinal Pitra says in his "Histoire de St. Léger" that this canon may have been directed against Monothelitism, then seeking entrance into the Gallican churches, but condemned beforehand in the latter of these creeds. The Rule of St. Benedict was also prescribed as the normal monastic code. In the Council of 1065, Saint Hugues, Abbot of Cluny, accomplished the reconciliation of Robert, Duke of Burgundy, with the Bishop of Autun. In 1077 Hugues, Bishop of Die, held a council at Autun, by order of St. Gregory VII; it deposed Manasses, Bishop of Reims, for simony and usurpation of the see, and reproved other bishops for absence from the council. In 1094 Hugues, Archbishop of Lyons, and thirty-three other bishops renewed at Autun the excommunication of Henry IV of Germany, the Antipope Guibert, and their partisans, also that of King Philip of France, guilty of bigamy. Simony, ecclesiastical disorders, and monastic usurpations provoked other decrees, only one of which is extant, forbidding the monks to induce the canons to enter monasteries.

THOMAS J. SHAHAN.

**Auxentius**, name of several early Christian personages. —AUXENTIUS OF MILAN, native of Capadocia, ordained (343) to the priesthood by Gregory, the intruded Bishop of Alexandria. After the banishment of Dionysius of Milan in 355, Auxentius was made bishop of that see through Arian intrigue, though ignorant of the Latin tongue. Some of the principal Western bishops attempted, but in vain, to bring him to accept the Nicene Creed. He was publicly accused at Milan, in 364, by St. Hilary of Poitiers, and convicted of error in a disputation held in that city by order of the Emperor Valentinian. His submission was only apparent, however, and he remained powerful enough to compel the departure of St. Hilary from Milan. In 359 he forced many bishops of Illyricum to sign the creed of Rimini. Though St. Athanasius procured his condemnation by Pope Damasus at a Roman synod (369), he retained possession of his see until his death in 374, when he was succeeded by St. Ambrose. —AUXENTIUS, JUNIOR, originally Mercurinus, a Scythian, and a disciple of Ulfilas, or Wulfila, of whose life and death he wrote an account that the Arian bishop, Maximinus, included (383) in a work directed against St. Ambrose and the Synod of Aquileia, 381. This favourite of Justin was the anti-bishop set up in Milan by the Arians, on the occasion of the election of Ambrose. He challenged the latter in 386 to a public dispute in which the judges were to be the court favourites of the Arian empress; he also demanded for the Arians the use of the Basilica Portiana. The refusal to surrender this church brought about a siege of the edifice, in which Ambrose and a multitude of his faithful Milanese had shut themselves up. The empress eventually abandoned her favourite and made peace with Ambrose. (Baunard, *Saint Ambroise*, Paris, 1872, 332-348; Hefele, *History of the Councils*, I). —AUXENTIUS OF MOPSUESTIA (360). Baronius places this bishop in the Roman martyrology, because of the story told by Philostorgius (in Suidas) that he was at one time an officer in the army of Licinius, and gave up his commission rather than obey the imperial command to lay a bunch of grapes at the feet of a statue of Bacchus. Tillemont (*Mémoires*, VI, 786-7) is inclined to believe that

Auxentius was an Arian; his patronage of the heretic Aetius (Philostorgius, *Hist. Eccl.*, V, 1, 2), points to this conclusion.

VENABLES in *Dict. of Christ. Biogr.*, I, 233.

THOMAS J. SHAHAN.

**Auxerre, COUNCILS OF.**—In 585 (or 578) a Council of Auxerre held under St. Annacharius formulated forty-five canons, closely related in context to canons of the contemporary Councils of Lyons and Mâcon. They are important as illustrating life and manners among the newly-converted Teutonic tribes and the Gallo-Romans of the time. Many of the decrees are directed against remnants of heathen barbarism and superstitious customs; others bear witness to the persistence in the early Middle Ages in France of certain ancient Christian customs. The canons of the council of 695 or 697 are concerned chiefly with the Divine Office and ecclesiastical ceremonies.

THOMAS J. SHAHAN.

**Auxerre, DIOCESE AND SCHOOL OF.** See SENS.

**Auxiliary Bishop**, a bishop deputed to a diocesan who, capable of governing and administering his diocese, is unable to perform the pontifical functions; or whose diocese is so extensive that it requires the labours of more than one; or whose episcopal see has attached to it a royal or imperial office requiring protracted presence at court. According to the present ecclesiastical discipline no bishop can be consecrated without title to a certain and distinct diocese which he governs either actually or potentially. Actual government requires residence, potential does not. Hence, there are two principal classes of bishops, the residential, or diocesan or, local, or ordinary; and the non-residential, or titular. Diocesan bishops have and exercise (*de jure*) full power of order and jurisdiction, in and over the diocese committed to their exclusive care by the pope. Titulars, as such, have not, and do not exercise, power of order and jurisdiction, in and over their titular sees. All actual jurisdiction in titular sees the pope reserves to himself, and exercises through the Sacred Congregation of Propaganda. The jurisdiction of a diocesan is ordinary. Should a titular perform a jurisdictional function, he uses delegated jurisdiction.

Titular bishops are those who have been appointed by the Holy See to a see or diocese which, in former times, had been canonically established and possessed cathedral church, clergy, and laity, but at present, on account of pagan occupation and government, has neither clergy nor people. It is essential that the titular diocese did once exist, and did cease to exist through death or defection of clergy and faithful, or pagan settlement and government. No vestige of titulars, as defined, appears until the close of the thirteenth century. Evidently the host of wandering bishops without title or see—missionary, regionary, or exiled bishops—of whom historians make mention, cannot be classed with our titulars, who did not come into existence until the greater part of the East had passed under pagan rule, and the destruction or defection of the Christian flock and the death of their shepherds ensued. The episcopal succession in those dioceses was maintained as long as a hope remained of their rehabilitation, and their bishops were hospitably received, and frequently used by the diocesans as auxiliaries or vicars, in pontificals in their respective dioceses. Ecclesiastical authority placed some of them in temporary charge of vacant Western dioceses, on condition of their immediate return to their own sees when possible. Others were given the spiritual care of dioceses by civil princes who, avaricious of

the episcopal revenues, prevented the appointment of a diocesan bishop. In the fourteenth century, the great number of bishops without occupation, and their invasion of the rights and privileges of the diocesans brought about necessary legislation. Clement V (I, iii de elect. V, Clem.) prohibited the election and consecration of any cleric, without papal license, to any of those vacant sees (*sine clero populoque*).

The first mention of titular bishops occurs in the Lateran decree (sess. 9 de Cardinalibus), wherein Leo X permits the creation of titulars whom the cardinal-bishops may use as suffragans, or auxiliaries, in their respective dioceses. Afterwards, the privilege was extended for various reasons, principal among which were (a) to preserve from oblivion the memory of those once venerable and important, but now desolate, sees; (b) that the pope might have at hand efficient and capable assistants (without care of dioceses) in the discharge of the numerous and important ecclesiastical duties of the Apostolic ministry in and outside of the Roman Curia; (c) that suffragans might be given to bishops impeded by reason of infirmity, partial or entire, or of the great extent of their dioceses, or legitimate and protracted absence from performing their episcopal duties. Pius V, after the Council of Trent, decreed that suffragans were not to be given unless to cardinals, and to those bishops to whom it was customary to grant them, and who guaranteed a fixed salary to support the dignity of the auxiliary. He also decreed that such auxiliary should not, without papal permission, exercise the pontifical functions in any other diocese, save in that of the diocesan to whom he had been given. Gradually it was extended to other bishops who had solid reasons for assistance. The appointment of all titulars belongs exclusively to the Holy See (Clement, *ut supra*). Present usage requires an auxiliary, suffragan, and temporary coadjutor (used indiscriminately to mean almost the same office) to be also a titular bishop, yet the former antedated the latter by many centuries. They come down to us from Apostolic times; thus Linus and Cletus were vicars, or auxiliaries, to St. Peter at Rome; Ammianus, to St. Mark of Alexandria; Alexander, to Narcissus (aged 116 years) of Jerusalem; St. Gregory, the theologian, auxiliary in pontificals to St. Gregory, Bishop of Nazianzus; St. Augustine, coadjutor of Valerius of Hippo; so likewise those of the rural bishops (*chorepiscopi*), who had received episcopal consecration (there were many in the Orient from the third to the seventh, and, in the West, from the eighth to the tenth, centuries), and many exiled bishops, then in the West were auxiliaries to diocesan bishops even up to the Clementine law.

Though the terms auxiliary, suffragan, and coadjutor are used indiscriminately, yet there is a difference. Auxiliary bishop is as defined at the beginning of this article. Suffragan bishop is the name given to the auxiliaries of the Cardinal-Bishop of Ostia and Velletri and the Cardinal-Bishop of Sabina. Coadjutors are given to diocesans impeded from performance of their episcopal duties by old age, or bodily infirmity, or sickness, protracted and incurable, such as loss of speech, blindness, paralysis, and insanity. A coadjutor to an insane bishop has full jurisdiction and can exercise all episcopal duties, with the sole exception of disposing of ecclesiastical properties. There are coadjutors in temporals, or in spirituals, or in both temporals and spirituals. The first kind need not be a bishop; a cleric suffices. Coadjutors are also temporary and perpetual; the first has no succession, the latter has, and is called coadjutor with right of succession. Coadjutors with right of succession rarely are granted, and only when urgent necessity and an evident utility are superadded to

the above reasons; and then they must be made known to, and approved as such, by the pope. It is not the practice to force a perpetual coadjutor upon an unwilling diocesan, although the pope can do so. Such perpetual coadjutor cannot mix in the ecclesiastical administration, nor do aught but as he is told or permitted by the diocesan. Some of the Fathers of the Vatican Council proposed that, in the future, auxiliary bishops should be appointed instead of perpetual coadjutors. A coadjutor is granted to aid a diocesan in order and jurisdiction as far as is needed; the auxiliary is deputed to aid only in function of order. He may be made vicar-general, and then, by virtue of that office, he has power of jurisdiction. Since auxiliaryship, or temporary coadjutorship, is neither a title nor prelature, but an office, it is temporary, and ceases at the death, or suspension, or resignation, of the diocesan. The Holy See, for valid reasons, in the fifteenth century established permanent auxiliaryships in Prussia, Poland, Spain, and Portugal. Pius VII (16 July, 1821, *Constitut. De salute animar.*) confirmed such offices in Germany, etc. In these countries the office of auxiliary does not die with the diocesan, but continues under his successors. The auxiliary, *sede vacante*, however, cannot perform functions strictly episcopal. Successors to such auxiliaries are not given the same, but an entirely different, titular see. Perpetual coadjutorship is irrevocable, and its holder succeeds immediately to the vacant see; no further collation or election is necessary. Office of auxiliary, etc. is revocable at will of pope and diocesan; that of the perpetual coadjutor cannot be taken away unless for canonical causes. Auxiliaries and temporary coadjutors are appointed by the Holy Father at the request of the bishop in need of assistance. The pope (on petition of the Sacred Congregation of the Council, or of Propaganda) as a rule appoints the clergyman named by orator. The election or nomination for perpetual coadjutors is governed by the law for election or nomination (*sede vacante*) of a new diocesan. The same disposition of mind and body is required for auxiliary, etc. as for diocesan bishops. They must be thirty years complete, and have spent six months in Sacred orders prior to elevation to the episcopate, yet in the case of the auxiliaries, the most worthy has no rights over the merely worthy. For perpetual coadjutorship most worthy is demanded.

Rights and duties of auxiliaries must be considered from a twofold standpoint: i. e. titulars of a diocese, and auxiliaries of diocesan bishops. By right of consecration a titular auxiliary can validly, but not licitly, without permission of the residential, perform all the functions annexed to the episcopal order by Divine and ecclesiastical law. The Church could, but does not, require the diocesan's permission, for the validity of the latter functions. Having no actual jurisdiction, he cannot without express consent and permission of the ordinary perform pontifical functions in the city or diocese, nor can he do so, *sede vacante*, even with the permission of the chapter. Possessing only potential jurisdiction in his titular see, he cannot (a) hear, or grant faculties to hear, confession of a visiting subject from his titular see; (b) confirm or ordain him; (c) send a priest to preach, or to perform any priestly functions, in his titular see; (d) absolve, or grant faculty to a diocesan priest to absolve, a member of his own household; (e) assist at the marriage of a titular subject, a visitor where the Tridentine holds; (f) ordain his familiar of three years' standing, nor grant indulgences. Should at any time clergy or laity sufficiently numerous be found in his titular diocese, and no representative of the Holy See have supervision over it, he can immediately, without any other collation of the benefice, take possession of

his titular church. He then ceases to be titular and becomes diocesan. He may, and according to some must, be invited to General Councils, and once there he has decisive vote. A few were present at the Council of Trent and quite a number at the Vatican Council. Although he has not the right to take part in Provincial Councils, he may be invited to do so, but has no decisive vote, unless by unanimous consent and permission of the Provincial Fathers. He can wear everywhere the prelatial dress and ring (the sign of his spiritual union with his titular see), and use the pontifical vestments, ornaments, and insignia, when, by permission of the ordinary, he performs pontifical functions. In general councils and every meeting of bishops where the local prelate is not present, in Rome, and outside of Rome, the titular auxiliary, etc., takes precedence of all bishops (except assistant bishops at pontifical throne) of later consecration. In provincial councils, however, all suffragans outrank all titulars without regard to date of consecration. Titular auxiliaries, as well as diocesans, are obliged to receive episcopal consecration within three months from confirmation, unless this is morally impossible; to make profession of faith and take oath of loyalty and fidelity to the Roman Pontiff, and to go to his titular diocese, if ever it is rehabilitated. By reason of the spiritual union with his see, he cannot be elected, but only postulated, for another diocese. Only the Holy Father can dissolve the spiritual union with the titular see. An auxiliary never has the title of a titular archiepiscopal see: but a perpetual coadjutor often has. The titular archbishop-coadjutor is not bound to petition for the pallium or the use of it. Titular auxiliary is not bound (a) to make visit *ad limina Apostolorum* (some say he is); (b) to residence in his titular see, or in the cathedral city of the diocese in which he holds the office of auxiliary (the place of his residence is regulated by the diocesan); (c) to say Mass for the people.

The criminal and important causes relating to auxiliary bishops are reserved to the Holy See, those of lesser moment to the Congregation of Bishops and Regulars. By virtue of the office of auxiliary he has a perpetual right to a pension suitable to maintain the episcopal dignity. This is to be paid by the diocesan from the diocesan revenues. The amount of pension and source from which it is to be obtained is generally specified in the Apostolic Letters of appointment. He can hold any benefice he had before and acquire a new one after his consecration, as the office of auxiliary is not a benefice. He enjoys the same honorific privileges (with a few exceptions, viz. throne, cappa magna, mozzetta, and rochet worn without mantelletta, and crosier), pontifical ornaments, and titles, as does the diocesan. He can and must use the prelatial dress, as in the Roman Curia, to wit: rochet over the purple soutane with purple mantelletta, in his attendance in the cathedral, where he has precedence over all other canons and dignitaries, as to choir stall and functions. When he is celebrant in pontifical functions, the canons must assist, but in the usual canonical dress, except ministers in sacred vestments. Not all the canons are bound to meet him at the church door, as he enters to celebrate pontifical Mass. During the ceremony he is assisted by a canon as assistant priest, and deacon, and sub-deacon in sacred vestments. He has no right to the usual two canon-assistant deacons, nor to the seventh candlestick, nor to the usual reverences of the canons at Kyrie, etc., nor the use of the throne or crosier unless by special permission. He uses the faldistorium. He can use the crosier with the special permission of the diocesan, and when he officiates at ordinations, consecrations, and other pontifical functions, during which the rules of the Pontifical demand its use

(Cæremon. Epis., I, xvii; Decret. Bracharen. Sept. 1607). It is proper, however, that he impart the episcopal last blessing. He cannot bless publicly the people as he wends his way through the city. It is forbidden him to make visitation of the cloister of nuns without express permission and command of the local prelate. Canons are bound to kiss the auxiliary's hand when he gives them Holy Communion on Holy Thursday, and assist him in consecrating Holy Oils, conferring Holy orders, and in all sacred functions strictly episcopal, which he performs for his diocesan. If he be a canon, he is subject, as the other cathedral canons, to diocesan law and the penalties attached to its violation. If the diocesan and the auxiliary assist simultaneously at Mass, the sub-deacon must not give the latter the pax before the canon-assistants at the throne have received it from the bishop ordinary. When the diocesan assists at Mass, or Vespers, the auxiliary must leave his stall and join the other canons in making the prescribed reverences before the Kyrie, Gloria, etc. Should the celebrant be the diocesan, assisted by the chapter in sacred vestments, the auxiliary can wear a cope and a linen mitre (with consent of the local), which latter he must take off and put on by himself. It is expedient that he substitute another in his turn for the Missa Cantata, as he cannot use a faldistorium and pontifical vestments without consent of his diocesan.

P. M. J. ROCK.

**Auxilius of Naples**, the name (possibly fictitious, according to Hefele) of an ecclesiastic to whom we owe a series of remarkable writings (P. L., CXXIX, 1054 sqq.) that deal with the controversies concerning the succession and fate of Pope Formosus (891-896), and especially the validity of the orders conferred by him. Auxilius was a Frank, who was ordained a priest, or perhaps only a deacon, in Rome by Formosus, and lived later in lower Italy, apparently at Naples. On the death of Pope Formosus there began for the papacy a time of the deepest humiliation, such as it has never experienced before or since. After the successor of Formosus, Boniface VI, had ruled only fifteen days, Stephen VI (properly, VII), one of the adherents of the party of the Duke of Spoleto, was raised to the Papal Chair. In his blind rage, Stephen not only abused the memory of Formosus but also treated his body with indignity. Stephen was strangled in prison in the summer of 897, and the six following popes (to May, 904) owed their elevation to the struggles of the political parties. Christophorus, the last of them, was overthrown by Sergius III (May, 904-August, 911). Sergius had been a partisan of Stephen VI, and like the latter regarded the elevation of Formosus to the papacy as illegal and the orders conferred by him as null and void. Auxilius was a follower of Formosus, and in several works composed about 908-911, he made a courageous and learned defence, both of Formosus and of the validity of his orders and those of his adherents. Morinus was the first to publish two of these writings in his "De ecclesiasticis ordi-

nationibus" (Paris, 1665). They are entitled "Libellus de ordinationibus a papâ Formoso factis", and "Tractatus qui Infensor et Defensor dicitur".

A third work of Auxilius, of similar import, was found by Mabillon and published by him under the title: "Libellus super causâ et negotio Formosi papæ", in his "Vetera Analecta" (ed. 1723, IV, 28-32). In his "Auxilius und Vulgarius", quoted below, Dümmler published from a Bamberg manuscript two further writings of Auxilius, one of which is known as "In defensionem sacræ ordinationis papæ Formosi libellus prior et posterior", while the other bears in the manuscript itself the title: "Libellus in defensionem Stephani episcopi et præfatæ ordinationis". (Stephen, Bishop of Naples, had been consecrated by Pope Formosus.) Still another treatise of an unknown author on behalf of Formosus, published by Bianchini in his edition of the "Liber Pontificalis" (1735, IV) is considered by Hergenröther (Photius, II, 370, 373, note 9) to be an extract from the writings of Auxilius, while Dümmler attributes it (op. cit., 42) to Eugenius Vulgarius, an Italian priest and a defender of Formosus. Two other compositions of Eugenius Vulgarius are known: "De causâ Formosianâ", and "Eugenius Vulgarius Petro Diacono fratri et amico". All these writings are very important, not only as historical sources but also from a theological point of view, because they take the position that the orders conferred by sinful and excommunicated bishops are not in themselves invalid. In a necrology of the Abbey of Monte Cassino is noted on 25 January the death of an Auxilius, deacon and monk, author of a commentary on Genesis (Mai, Spicilegium Romanum, IX, Appendix; cf. Mabillon, Ann. Ord. S. Benedicti, III, 325). This Auxilius may possibly be identical with the author of the works described above.

J. P. KIRSCH.

**Ava**, a German poetess, the first woman known to have written in German and probably identical with a recluse of that name who died in Austria in the vicinity of Melk, A.D. 1127. Almost nothing is known of her life or personality. She herself tells us in a passage in her work that she was the mother of two sons who helped her in procuring the material for her poems. These poems are metrical versions of stories from the New Testament and consist of a "Life of Jesus", "Antichrist", "The Gifts of the Holy Ghost", "The Last Judgment", and "John the Baptist". They are preserved in two manuscripts, one at Verona, the other at Görlitz. The "John the Baptist" is found only in the latter manuscript. Ava's authorship of this poem, as well as that of the "Life of Jesus" has been questioned, but hardly on sufficient grounds. The poems are naive in tone and display deeply religious sentiments, but, except for occasional passages, they are destitute of poetic merit. Their technique is often crude, assonance taking the place of rhyme and alliteration being not infrequent. The chief source from which Ava drew her material was the New Testament, but she also made use of older German poems, and possibly other writings such as the Apocryphal Gospel of the Infancy of the Saviour by the Pseudo-Matthew.

The poems have been edited by DIEMER in *Deutsche Gedichte des 11. und 12. Jahrhunderts* (Vienna, 1849), 227 sqq., and by PIPER in *Zeitschrift für deutsche Philologie*, 19, 129 sq. For further information see LANGGUTH, *Untersuchungen über die Gedichte der Ava* (Budapest, 1880); PIPER, *Die geistliche Dichtung des Mittelalters*, part I, in KIRSCHNER's *Deutsche National Literatur*.

ARTHUR F. J. REMY.

**Avancini**, NICOLA, chiefly known as an ascetical writer, b. in the Tyrol, 1612; d. 6 December, 1686. He entered the Society of Jesus in 1677, and for some years held the chair of rhetoric and philosophy at Gratz, and subsequently that of theology at Vienna. He was rector of the Colleges of Passau, Vienna, and Gratz, Provincial of the Austrian Province, Visitor of Bohemia, and at his death Assistant for the German Provinces of the Society. In the midst of these onerous duties he found time to publish works on philosophy, theology, and sacred literature, none of which, however, have retained popularity except his "Meditations on the Life and Doctrines of Jesus Christ". This work, originally in Latin, was translated into the principal European languages and went through many editions. The meditations are considered dry by some, and the English version in use contains much additional matter drawn from the works of other authors. But these meditations, in their simple as well as their extended form, have assisted many most efficaciously in the difficult task of daily meditation. Avancini was also the author of sermons, or orations, and a large number of dramas, suitable for presentation by college students. For a complete list of his works see *Sommervogel*, I. In English we have the "Meditations on the Life and Doctrines of Jesus Christ. Translated from the German edition of the Rev. John E. Zollner, by T. E. Bazalgette, with a preface by the Rev. G. Porter, S.J." (London, 1875, 2 vols.). Another edition was issued in the Quarterly series by the Rev. H. J. Coleridge, S.J., in 1883. EDWARD P. SPILLANE.

**Avarice** (from Lat. *avarus*, "greedy"; "to crave") is the inordinate love for riches. Its special malice, broadly speaking, lies in that it makes the getting and keeping of money, possessions, and the like, a purpose in itself to live for. It does not see that these things are valuable only as instruments for the conduct of a rational and harmonious life, due regard being paid of course to the special social condition in which one is placed. It is called a capital vice because it has as its object that for the gaining or holding of which many other sins are committed. It is more to be dreaded in that it often cloaks itself as a virtue, or insinuates itself under the pretext of making a decent provision for the future. In so far as avarice is an incentive to injustice in the acquiring and retaining of wealth, it is frequently a grievous sin. In itself, however, and in so far as it implies simply an excessive desire of, or pleasure in, riches, it is commonly not a mortal sin. JOSEPH F. DELANT.

**Avatâr**, an Anglicized form of the Sanskrit, *avatāra*, "descent", from the root *tr*, "pass" (cf. Latin *in-trare*), and the preposition *ava*, "down". The word is used, in a technical sense, in the Hindu religion to denote the descent upon earth of a portion of the essence of a god, which then assumes some coarser material form, be it animal, monster, or man. Such descents are ascribed in the mythology of Hinduism to various gods, but those ascribed to Vishnu are by far the most important. They are believed to have taken place at different ages of the world, and to have consisted of different proportions of the essence of Vishnu. Their number is variously stated, ranging from ten to twenty-eight, finally becoming indefinitely numerous. Any remarkable man is liable to be regarded as a more or less perfect avatâr of Vishnu, and the consequence—one of the worst features of Hinduism—has been the offering of divine homage to men, especially the founders of religious sects and their successors.

The ten most famous avatârs are: (1) The Fish, *matsya*. The basis of this is the story told in the *Satapatha Brâhmana* of how Manu was saved from the Deluge by a great fish, which foretold him of

the danger, commanded him to build a boat, and finally towed this boat to a mountain top. The *Purânas* afterwards declare that this fish was an avatâr of Vishnu. (2) The Tortoise, *Kârma*. Vishnu in this form offers his back as the pivot on which rests Mt. Mandara, while the gods and demons churn with it various valuable objects from the ocean of milk. (3) The Boar, *Varâha*. Like the first, this avatâr is concerned with the rescue of the earth from a flood, the boar raising it from the water in which it had been submerged. (4) The Man-lion, *Nara-sinha*. Vishnu takes this form to deliver the world from a demon, who had obtained from Brahma the boon, that he should be slain neither by a god, a man, nor an animal. (5) The Dwarf, *Vâmana*. The world having fallen under the possession of another demon, Vishnu, in the form of a dwarf, begged for as much of it as he could cover in three steps. His request was granted, but, from the *Rig-Veda* on, the most prominent thing in connexion with Vishnu (originally a sun-god), was that in three strides he traverses the universe. Two strides now sufficing for the redemption of heaven and earth, compassion inspires him to leave the nether regions to the demon he has duped. (6) Râma with the axe, *Parasu-râma*. In the form of a hero, Râma, armed with an axe, Vishnu destroys the *Ksatriyas*, or warrior caste, in the interest of the priestly caste, the Brahmins. (7) Râma, the great hero of the Hindu *Odyssey*, the *Râmâ yana*, who is made into an avatâr of Vishnu. (8) Krsna, the Indian Hercules, as he is styled by Megasthenes, the most popular hero of India, is the most perfect avatâr of Vishnu. (9) Buddha, a curious result of the triumph of Hinduism over Buddhism. In one version it is explained that Vishnu's purpose was to destroy the wicked by leading them into a false religion. (10) Kalki. In this form Vishnu will descend when the world is wholly depraved, destroy utterly the wicked, and restore the happy conditions of the Age of Virtue.

The importance of this theory of avatârs to Hinduism is the way in which it has contributed to the wonderful adaptability of that religion. In the Buddha avatâr the fact is particularly patent, but, in the Râma and Krsna avatârs also, we clearly have the adoption into Hinduism of the cults of these heroes. It is a mere guess that similar compromises with some totemistic forms of religion are to be seen in the Fish, Boar, and Tortoise avatârs, and the same might be said of an attempt to see in the Man-lion and Dwarf avatârs, traces of the aboriginal religions. The resemblance of these avatârs to the doctrine of the Incarnation is most superficial, and, as the theory of the avatârs has a sufficient basis in Hindu philosophy, and several points of contact with the earlier mythology, it is unnecessary to suppose with Weber (*Indische Studien*, II, 169) that it is the result of an imitation of this dogma.

For bibliography see HINDUISM.

GEORGE MELVILLE BOLLING.

**Avaugour**, PIERRE DU BOIS, BARON D', d. 1664, was sixth Governor General of Canada. Born of an ancient family in Brittany, he served in the French army forty years; travelled in Persia, Russia, Poland, and Sweden, and took part in all the campaigns in Germany. This familiarity with camp life made his naturally eccentric character rough and unsocial as well. In 1661, he was chosen to succeed d'Argenson as Governor of New France, and arrived in Quebec on 31 August of that year. Utterly averse to pomp and ceremony, he refused the honours which the people of Canada wished to show him, and set out at once for Montreal, in order to familiarize himself with the state of the country. The result was embodied in a report which he sent to Colbert and the great Condé, wherein he advised

the fortification of Quebec and the approaches to it by outworks at Ile d'Orléans and at Lévis. He also recommended that the colony should be freed of its useless officials, to be replaced by soldiers who could hold the Iroquois in check, and prevent the Dutch from supplying them with arms. He formed a council, at the head of which he placed the Superior of the Jesuits. The sale of drink to the Indians was forbidden under pain of death, a penalty which the governor inflicted on several who had disobeyed his orders. He became embroiled in a quarrel with the bishop and the Jesuits, because they had begged the release of a poor widow whom he had caused to be imprisoned for selling brandy. He dissolved his council, in order to surround himself with more subservient advisers, and removed the prohibition imposed on the sale of liquor. Serious disorders ensued; the priests preached against misuse of authority, and an earthquake which shook the whole valley of the St. Lawrence was looked upon by the people as a Divine chastisement. Bishop Laval found it necessary to return to France to ask for the governor's recall. D'Avaugour was relieved of his command, and a royal commissioner was charged to make enquiries as to his conduct. The governor left Quebec, 23 July, 1663. On his arrival in France he submitted two statements to the king in regard to the measures to be taken for the colonization and defence of Canada; he advised the concentration of the troops at Quebec and the building of a fort at the head of the Richelieu river, also that the Dutch should be driven out of Fort Orange (Albany), and that the French should take possession of the Hudson River, in order to gain an exit to the sea. At a later date one of his suggestions was acted on, when veteran soldiers were sent to Canada with permission to settle as colonists. D'Avaugour asked to be allowed to resume active service, and was sent to Austria, where Louis XIV was aiding the rising of the Croats. He died a soldier's death while bravely defending the fortress of Zrin against the Turks.

*Papiers de Condé, series F, XXV (at the Castle of Chantilly); New York Colonial Documents, LX, 13-17, and 20, 21; FAULCON, Hist. col. franç. au Canada, III, 33-38 sqq.; 66 sqq. J. EDMOND ROY.*

**Ave Maria.** See HAIL MARY.

**Ave Maris Stella** (Hail, thou Star of Ocean), the first verse of an unrhymed, accentual hymn, of seven strophes of four lines each, assigned in the Roman Breviary to Vespers in the Common Office, the Office for Saturdays, and the Little Office (as well as for Feasts) of the Blessed Virgin. It has been ascribed wrongly to St. Bernard, but antedates him, being found in a St. Gall manuscript of the ninth century; and, also, without sufficient authority, to St. Venantius Fortunatus (d. 609). Its very frequent occurrence in the Divine Office made it most popular in the Middle Ages, many other hymns being founded upon it.

MONE, *Latinitische Hymnen*, etc., II, 216-220, for five paraphrases with notes; DANIEL, *Thesaurus Hymnol.*, I, 204-206, for text with variants, and IV, 136, for additional notes; *Analecta Hymnica*, I, 49-186; III, 40-41; IV, 49-50; VIII, 75; IX, 72; X, 103; XV, 114; XX, 142 sqq., Nos. 185-188; XXX, 282; XXXII, 33-34. An excellent study of its rhythmic features in connection with the plain-song melody of the first Mode was contributed by DOM POTIER to the *Revue du chant grégorien* (Grenoble, 1895), 83 sqq. (reprinted with additional comment, by GIULIO BAS in his *Rhythme Grégorien*, etc. (Rome, 1906), 15-19. There are seven translations into English, that of Father Caswall appearing in his *Lyra Catholica* as "Gentle Star of Ocean," and again in his *Hymns and Poems* in an altered form, and also in many collections of Catholic hymns, sometimes modified. It is found in the Marquess of Bute's Breviary as "Hail, thou Star of Ocean." The other translations are by BESTE, HEWITT, CHAMBERS, and MRS. CHARLES. H. T. HENRY.

**Ave Regina**, an antiphon so called from its first line, *Ave regina celorum* (Hail, Queen of Heaven).

It is one of the four Antiphons of the Blessed Virgin sung in the Divine Office in turn throughout the year, and is assigned thus from Compline of 2 February (even when the Feast of the Purification is transferred) to Holy Thursday exclusively. It comprises two stanzas of four lines each, followed by its own versicle and response and prayer. Its date of composition is uncertain, but the conjecture of Stella (*Inst. Liturg.*, Rome, 1895) that it antedates the fourth century seems to be without any warrant of external or internal evidence. It is found in the St. Alban's Book of the twelfth century; in a Munich MS. thought by Daniel to be of the thirteenth; in a Sarum Breviary of the fourteenth; and in York and Roman Breviaries of the fifteenth. Th. Bernard (*Le Bréviaire* (Paris, 1887), II, 454 sqq.) says it was introduced into the Divine Office by Clement VI in the fourteenth century. He gives a commentary, and thinks he can perceive in it elements of the "noble accents . . . aspirations of many Doctors, such as St. Athanasius, St. Ephrem, St. Ildephonsus". Said during Septuagesima, Lent, Passiontide, the time, namely, of preparation for Easter, it recalls the part Mary had in the drama of the reopening of Heaven to men, and shows her as reigning there, Queen of Angels. Its opening line was sometimes quoted as the first line of hymns and sequences in the fourteenth and fifteenth centuries (cf. Dreves and Blume, *Analecta Hymnica*, I, 94; X, 103; XXX, 238; XXXII, 43; XLVI, 136) which, however, had no other relation with the Antiphon, being sometimes meditations on the *Ave Maria*, sometimes distinct poetical compositions, for example:

Ave regina celorum,  
Pia virgo tenella,  
Maria (virgo), flos florum  
Christi (que) clausa cella.  
Gratia, quæ peccatorum  
Dira tulisti bella,

and so on, throughout the whole of the Angelical Salutation down to *ventris tui*, where the poem ends (MS. of fourteenth century) (loc. cit., XLVI, 136). Or, as a distinct hymn:

Ave, regina celorum,  
Ave, decus angelorum,  
Ave, gaudium sanctorum,  
Ave, solis regia,

in a MS. of the fifteenth century (loc. cit., XL, 98).

The *Ave Regina* has been translated by Caswall, "*Lyra Catholica*" (London, 1849, 1873, 1884; New York, 1851), whose version is used in the "*Manual of Prayers*" (Baltimore), 77: "Hail, O Queen of Heaven enthroned"; also by Beste, "*Church Hymns*" (1849): "Hail, thou mighty Queen of Heaven". The version in the Marquess of Bute's "Breviary" (Edinburgh, 1879, I, 177) begins: "Hail, O Mary, Queen of Heaven". Schlosser [*Die Kirche in ihren Liedern* (Freiburg, 1863), I, 251] gives a translation into German in the same metre. The plain-song melody in the 6th tone has also a simpler setting [*"Manuale Missæ et Officiorum"* (Rome and Tournai, 1903), 100, 103].

H. T. HENRY.

**Avellana Collectio.** See CANONS, COLLECTIONS OF ANCIENT.

**Avellino**, DIOCESE OF.—An Italian diocese in the Province of Naples, suffragan to Benevento. Avellino was founded by St. Sabinus, martyr, in the beginning of the second century. The list of bishops dates from 1124. The Diocese of Frigento, whose list is from 1080 to 1455, was united with that of Avellino from 9 May, 1466, until 27 June, 1818, when it was suppressed. Avellino was vacant from 1782 to 1792. It has 118,649 Catholics; 41 parishes, 243

secular priests, 11 regulars, 80 seminarians, 90 churches and chapels.

E. BUONAIUTI.

**Avempace** (IBN BADSHA, or IBN BADJA), called by the Scholastics AVEN-PACE and AVEMPACE), Arabian philosopher, physician, astronomer, mathematician, and poet, b. at Saragossa towards the end of the eleventh century; d. at Fez, 1138. In 1118 he was at Seville, where he wrote several treatises on logic. Later, he went to Granada and to Africa. He was, according to Arabian accounts, poisoned by rival physicians. He wrote treatises on mathematics, medicine, and philosophy, and commented on several of Aristotle's works, notably on the "Physics", "Meteorologica", "De Generatione et Corruptione", portions of "Historiæ Animalium" and "De Partibus Animalium". His works on philosophy included logical treatises, a work "On the Soul", "The Hermit's Guide" (Munk translates the title "Régime du Solitaire"), "On the Union of the Intellect with Man", and a "Valedictory Letter" (cited in Latin as "Epistola de Discessu" and "Epistola Expeditionis"). Avempace's logical treatises are said to exist in MSS. in the Escorial Library. His other writings are either lost or still undiscovered. Fortunately, however, a Jewish writer of the fourteenth century, Moses of Narbonne, has left us an account of "The Hermit's Guide", which supplements Averroes' unsatisfactory allusions to that work, and enables us to describe the doctrines it contains. The aim of the treatise is to show how man (the hermit) may, by the development of his own powers of mind, attain a union with the Active Intellect. (See ARABIAN SCHOOL OF PHILOSOPHY.) Avempace distinguishes two kinds of action: animal action, which is a product of the animal soul, and human action, which is a product of the human soul, that is of free will and reflection. The man who smashes a stone because it has hurt him performs an animal action; but he who smashes the stone so that it will not injure others performs a human action. Now, the first step in the moral education of the hermit is to teach himself to be ruled by will and reason, so that his actions may all be human. That, however, is only the first step. Having attained it, the hermit must strive to higher perfection, so that his actions may become divine. He must strive to come in contact with the spiritual forms, which ascend in increasing degrees of incorporeity from the ideas of the individual soul up to the Actual Intellect itself, above which are only the forms of celestial bodies, that is to say, spiritual substances which, while they have an important cosmic function, have no relation to moral excellence in man. Through ideas, therefore, to the ideas of ideas, through these to abstract ideas of things, and through these last, to the pure form of the Active Intellect—this, according to Avempace, is the way of perfection. The mind which has come into contact with the Active Intellect becomes itself an intellect, the Acquired Intellect (*Intellectus Adeptus*). It is in reference to this last point that the Schoolmen, notably Albert the Great and St. Thomas Aquinas, mention Avempace and his teaching. Their acquaintance with the author of "The Hermit's Guide" was made, probably, through his disciple and admirer Averroes, though certain passages in the "Contra Gentiles" would justify the surmise that St. Thomas had perhaps a firsthand acquaintance with the "Epistola Expeditionis".

A.* (Mainz, 1865), II, 68 sqq.

WILLIAM TURNER.

**Avendano**, FERNANDO, priest, b. at Lima, Peru either towards the end of the sixteenth, or in the beginning of the seventeenth, century; d. at Lima, in 1665, shortly after being appointed Bishop of Santiago de Chile. He was one of the most diligent investigators into survivals of the primitive rites and customs of the Peruvian Indians and left valuable notes on the subject, fragments of them being preserved in the work of Arriaga. Of great importance to linguistics are his "Sermones de los misterios de nuestra santa Fe católica", published in 1649 by order of the Archbishop of Lima, Pedro Villagomez. These sermons were delivered in Quichua, and are published with their translation into Spanish.

AD. F. BANDELIER.

**Aventinus**. See TURMAIR, JOHN.

**Averroes** (ABUL WALID MAHOMMED IBN AHMED, IBN MAHOMMED IBN ROSCHD), Arabian philosopher, astronomer, and writer on jurisprudence; b. at Cordova, 1126; d. at Morocco, 1198. Ibn Roschd, or Averroes, as he was called by the Latins, was educated in his native city, where his father and grandfather had held the office of *cadi* (judge in civil affairs) and had played an important part in the political history of Andalusia. He devoted himself to jurisprudence, medicine, and mathematics, as well as to philosophy and theology. Under the Caliphs Abu Jacob Jusuf and his son, Jacob Al Mansur, he enjoyed extraordinary favour at court and was entrusted with several important civil offices at Morocco, Seville, and Cordova. Later he fell into disfavour and was banished with other representatives of learning. Shortly before his death, the edict against philosophers was recalled. Many of his works in logic and metaphysics had, however, been consigned to the flames, so that he left no school, and the end of the dominion of the Moors in Spain, which occurred shortly afterwards, turned the current of Averroism completely into Hebrew and Latin channels, through which it influenced the thought of Christian Europe down to the dawn of the modern era. Averroes' great medical work, "Culliyat" (of which the Latin title "Colliget" is a corruption) was published as the tenth volume in the Latin edition of Aristotle's works, Venice, 1527. His "Commentaries" on Aristotle, his original philosophical works, and his treatises on theology have come down to us either in Latin or Hebrew translations. His "Commentaries", which earned for him the title of the Commentator, were of three kinds: a short paraphrase or analysis, a brief exposition of the text, and a more extended exposition. These are known as the Minor, the Middle, and the Major Commentary, respectively. None of them is of any value for the textual criticism of Aristotle, since Averroes, being unacquainted with Greek and Syriac, based his exposition on a very imperfect Arabic translation of the Syriac version of the Greek text. They were, however, of great influence in determining the philosophical and scientific interpretation of Aristotle. His original philosophical treatises include: a work entitled "Tehafot al Tehafot", or "Destructio Destructionis" (a refutation of Algazel's "Destructio Philosophorum") published in the Latin edition, Venice, 1497 and 1527; two treatises on the union of the Active and Passive Intellects, also published in Latin in the Venice edition; logical treatises on different parts of the "Organon", published in the Venice edition under the title "Quæsitæ in Libros Logicæ Aristotelis"; physical treatises based on Aristotle's "Physics" (also in the Venice edition); a treatise in refutation of Avicenna, and another on the agreement between philosophy and theology. Of the last two, only Hebrew and Arabic texts exist.

Averroes professed the greatest esteem for Aristotle. The word of the Stagirite was for him the highest expression of truth in matters of science and philosophy. In this exaggerated veneration for the philosopher he went farther than any of the Schoolmen. Indeed, in the later stages of Scholastic philosophy it was the Averroists and not the followers of Aquinas and Scotus who, when accused of subservience to the authority of a master, gloried in the title of "Aristotle's monkey". Averroes advocated the principle of twofold truth, maintaining that religion has one sphere and philosophy another. Religion, he said, is for the unlettered multitude; philosophy for the chosen few. Religion teaches by signs and symbols; philosophy presents the truth itself. In the mind, therefore, of the truly enlightened, philosophy supersedes religion. But, though the philosopher sees that what is true in theology is false in philosophy, he should not on that account condemn religious instruction, because he would thereby deprive the multitude of the only means which it has of attaining a (symbolical) knowledge of the truth. Averroes' philosophy, like that of all the other Arabians, is Aristoteleanism tinged with neo-Platonism. In it we find the doctrine of the eternity of matter as a positive principle of being; the concept of a multitude of spirits ranged hierarchically between God and matter and mediating between them; the denial of Providence in the commonly accepted sense; the doctrine that each of the heavenly spheres is animated; the notion of emanation or extraction, as a substitute for creation; and, finally, the glorification of (rational) mystical knowledge as the ultimate aspiration of the human soul—in a word, all the distinctively neo-Platonic elements which the Arabians added to pure Aristoteleanism.

What is peculiar in Averroes' interpretation of Aristotle is the meaning he gives to the Aristotelean doctrine of the Active and Passive Intellect. His predecessor, Avicenna, taught that, while the Active Intellect is universal and separate, the Passive Intellect is individual and inherent in the soul. Averroes holds that both the Active and the Passive Intellect are separate from the individual soul and are universal, that is, one in all men. He thinks that Alexander of Aphrodisias was wrong in reducing the Passive Intellect to a mere disposition, and that the "other Commentators" (perhaps Themistius and Theophrastus) were wrong in describing it as an individual substance endowed with a disposition; he maintains that it is, rather, a disposition in us, but belonging to an intellect outside us. The terms *Passive*, *Possible*, *Material* are successively used by Averroes to designate this species of intellect, which, in ultimate analysis, if we prescind from the dispositions of which he speaks, is the Active Intellect itself. In other words, the same intellect which, when in the act of actually abstracting intelligible species is called active, is called passive, possible, or material so far as it is acted upon, is potential, and furnishes that out of which ideas are fabricated. Besides, Averroes speaks of the Acquired Intellect (*intellectus acquisitus, adeptus*), by which he means the individual mind in communication with the Active Intellect. Thus, while the Active Intellect is numerically one, there are as many acquired intellects as there are individual souls with which the Active Intellect has come in contact. (The Scholastics speak of *continuatio* of the universal with the individual mind, translating literally the Arabic word which here means contiguity rather than union.) The sun, for instance, while it is and remains one source of light, may be said to be multiplied and to become many sources of light, in so far as it illuminates many bodies from which its light is distributed; so it is with the universal mind and

the individual minds which come in contact with it.

The weakness of this doctrine, as a psychological explanation of the origin of knowledge, is its failure to take account of the facts of consciousness, which, as the Scholastics were not slow to point out, indicate that not merely an individual disposition but an active individual principle enters into the action which one expresses by the words "I think". Another weakness of the doctrine of monopsychism, or the doctrine that there is but one mind, a weakness at least in the eyes of the Scholastics, is that it leaves unanswered the question of the immortality of the individual soul. Indeed, Averroes openly admitted his inability to hold on philosophic grounds the doctrine of individual immortality, being content to maintain it as a religious tenet. Averroes' greatest influence was as a commentator. His doctrines had a varying fortune in the Christian schools; at first they secured a certain amount of adherence, then, gradually, their incompatibility with Christian teaching became apparent, and finally, owing to the revolt of the Renaissance from everything Scholastic, they secured once more a temporary hearing. His commentaries, however, had immediate and lasting success. St. Thomas Aquinas used the "Grand Commentary" of Averroes as his model, being, apparently, the first Scholastic to adopt that style of exposition; and though he refuted the errors of Averroes, and devoted special treatises to that purpose, he always spoke of the Arabian commentator as one who had, indeed, perverted the Peripatetic tradition, but whose words, nevertheless, should be treated with respect and consideration. The same may be said of Dante's references to him. It was after the time of St. Thomas and Dante that Averroes came to be represented as "the arch-enemy of the faith".

AVERROES' works in the Venice edition, 1497, 1527, and, in part, in MUNK'S *Mélanges &c.* (Paris, 1859); MUNK, in *Dict. des sciences philosophiques* (Paris, 1844-52), art. *Ibn Roschd*; RENAN, *Averroès et l'Averroïsme* (Paris, 9th ed., 1882); MANDONNET, *Siger de Brabant et l'Averroïsme latin au XIII<sup>e</sup> siècle* (Fribourg, 1899); UEBERWEG-HEINZE, *Gesch. der Phil.*, (9th ed., Berlin, 1905), VI 250 sqq. WILLIAM TURNER.

**Aversa**, DIOCESE OF, comprising twenty-one towns in the Province of Caserta and twelve in the Province of Naples, is under the immediate jurisdiction of the Holy See. This city is of relatively recent origin. It arose in the eleventh century on the ruins of Atella, a city of the Oscians, famous for their piquant rallery, which furnished the basis for the licentious interludes called *Atellana*. The ruins of ancient Atella, destroyed during the invasions of the barbarians, are still to be seen in the neighbourhood of Arpino. On these ruins the Norman Duke, Robert Guiscard, built a fortification which in time became a city called Aversa. The same Duke Robert, becoming a vassal of the pope and supporting him in his struggle with the emperor, obtained permission from Leo IX to have the Bishopric of Atella transferred to Aversa. The city has many fine monuments in the Norman style. It contains 54 parishes; 177 churches, chapels, and oratories; 674 secular clergy, and a population of 130,100.

ERNESTO BUONAFUTI.

**Avesta**, THE, the sacred books of the Parsees, or Zoroastrians, and the main source of our knowledge concerning the religious and spiritual life of the ancient Persians. This collection of writings occupies the same place in the literature of Iran

(ancient Persia) that the Vedas do in India. The designation Zend-Avesta, which is often employed to denote the sacred code, is not strictly correct. It owes its origin to a mistaken inversion of the Pahlavi designation *Avistāk u Zand*, a term which probably means "Text and Commentary"; for the word *Zand* (in the Avesta itself, *Zainti*) signifies "explanation", and even in the Avesta is applied to the exegetical matter in the text. It is similarly used by the Parsee priests to denote the Pahlavi version and commentary, but not the original scriptures. Whether the term *Avistāk*, which is the Pahlavi form of the word *Avesta*, has the meaning of "text", "law", is not absolutely certain. Some scholars interpret it as "wisdom", "knowledge".

Little was known concerning the religion and customs of ancient Persia before the Avesta was brought to Europe in the eighteenth century. From the allusions in Greek and Roman writers, like Herodotus, Plutarch, Pliny, and others, it had long been surmised that such a body of scriptures existed. Scattered allusions in Arabic and Syriac writers strengthened this conviction. But the information to be extracted from these references was vague and meagre. The first scholar to make the language and the contents of the sacred books of the Parsees known to Europe was a young Frenchman, Anquetil du Perron, who in 1754 went to India for this very purpose. His enthusiasm and perseverance overcame the many obstacles he encountered on his journey to Hindustan and the difficulties he met during his stay in Surat. Success at last crowned his efforts, and on his return in 1771 he was able to give to the world the first translation of the Avesta. From the moment of its publication a bitter controversy arose concerning the authenticity of the work. Some scholars, like Sir William Jones, declared that it was a clumsy forgery of modern Parsee priests, and the question was disputed for half a century until the advance made in the study of Sanskrit and comparative philology decided the matter and vindicated the genuineness of the scriptures and the value of Anquetil's work, although his translation, as a first attempt, was necessarily imperfect in many respects.

**CONTENT AND DIVISIONS.**—Originally, the sacred scriptures of the Parsees were of far greater extent than would appear from the Avesta in the form in which we now possess it. Only a relatively small portion of the original has in fact been preserved, and that is collected from several manuscripts, since no single codex contains all the texts now known. In its present form, therefore, the Avesta is a compilation from various sources, and its different parts date from different periods and vary widely in character. Tradition tells us that the Zoroastrian scriptures consisted originally of twenty-one *nasks* (books); but only one of these, the *Vendidad*, had been completely preserved. The loss of the sacred books is attributed by the followers of Zoroaster to the invasion of Alexander, "the accursed Iskandar", as they call him, who burned the palace library at Persepolis, thus destroying one archetype copy of the text, and threw the other into the river near Samarkand, according to the statement of the Pahlavi records (Dinkard, bk. III; West, "Sacred Books of the East", XXXVII, pp. xxx, xxxi; and *Shahrīhā-i Airān*, 2-5). For wellnigh five hundred years after the Macedonian invasion the Parsee scriptures remained in a scattered condition, much being preserved only by memory, until the great Zoroastrian revival under the Sassanian dynasty (A. D. 226-651), when the texts were again collected, codified, translated into Pahlavi, and interpreted. A beginning in this direction had already been made under the last of the Parthian kings, but the great final redaction took

place in Sassanian times, under Shahpuhar II (309-379). Our present Avesta is essentially the work of this redaction, although important sections of the text have been lost since then, especially after the Arabs conquered Persia. This conquest (637-651) was fatal to the Iranian religion, and caused Zoroastrianism to be supplanted by Mohammedanism and the Avesta by the Koran. As already mentioned, great portions of the scriptures have since disappeared entirely; out of the original twenty-one *nasks*, the nineteenth alone (the *Vendidad*) has survived. Portions of other *nasks* are preserved, interspersed here and there among the *Yasna* and *Vispered*, or have come down to us as scattered fragments in Pahlavi works, or have been rendered into Pahlavi, like the *Bundahishn* (Book of Creation) and the *Shāyast-la-Shāyast* (Treatise on the Lawful and Unlawful). In this way we are able to make good some of our losses of the old scriptures; enough has been said, however, to explain the lack of coherence noticeable in certain parts of the Avestan code.

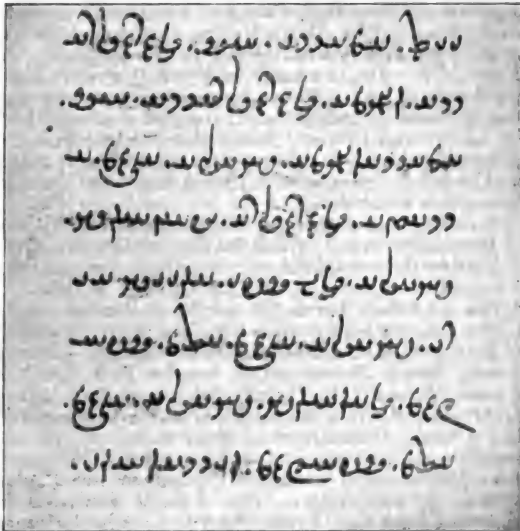

The Avesta, as we now have it, is usually divided into five sections, relating to the ritual, hymns of praise, the liturgy, and the law. These sections are: (1) the *Yasna*, including the *Gāthās*, or hymns; (2) *Vispered*; (3) *Yashts*; (4) minor texts, such as the *Nyāishes* (favourite prayers in daily use among the Parsees); and (5) *Vendidad*. Besides this there are some independent fragments preserved in Pahlavi books (*Hādōkt Nask*, etc.). The main divisions, when taken together, again fall into two groups, the one liturgical, comprising *Vendidad*, *Vispered* and *Yasna*, or the Avesta proper, the other general, called *Khorda Avesta* (Abridged Avesta) and comprising the minor texts and the *Yashts*. A brief characterization of the five divisions will now be given.

(1) The *Yasna* (Skt. *yajna*), "sacrifice", "worship", the chief liturgical portions of the sacred canon. It consists principally of prayers and hymns used in the ritual, and is divided into seventy-two *hā* or *hāiti* (chapters), symbolized by the seventy-two strands of the *kushti*, or sacred girdle with which the young Zoroastrian is invested on his being received into the Church. The middle third of the *Yasna* (Ys., 28-53), however, is not directly connected with the ritual, but contains the *Gāthās*, the holy psalms, songs which preserved the metrical sayings of Zoroaster himself as used in his sermons. This is the oldest portion of the Avesta and descends directly from the prophet and his disciples. These canticles are metrical in their structure and are composed in the so-called *Gāthā-dialect*, a more archaic form of language than is used in the rest of the Avesta. There are seventeen of these hymns, grouped into five divisions, each group taking its name from the opening words; thus *Ahūnavaiti*, *Ushnavaiti*, etc. Inserted in the midst of the *Gāthās* is the *Yasna Haptanghāiti* (the Seven-chapter *Yasna*) consisting of prayers and hymns in honour of the Supreme Deity, Ahura Mazda, the Angels, Fire, Water, and Earth. This selection also shows a more archaic type of language, and stands next to the *Gāthās* in point of antiquity. Its structure, though handed down in prose, may once have been metrical.

(2) The *Vispered* (*vispē ratavō*, "all the lords") is really a short liturgy, very similar in style and form to the *Yasna*, which it supplements in a briefer form. It owes its name to the fact that it contains invocations to "all the lords".

(3) The *Yashts* (*yeshti*, "worship by praise"), of which there are twenty-one, are hymns in honour of various divinities. These hymns are for the most part metrical in structure, and they show considerable poetic merit in certain instances,

which is not common in the Avesta. They are of especial interest historically on account of the glimpses they afford us of the great mythological and legendary material in the folklore of ancient Irān used so effectively by Firdausi in his great epic of the Persian kings, the "Shāh Nāmāh". Among

MANUSCRIPT OF ONE OF THE OLDEST YASHTS (A.D. 1600)  
Library of Columbia University, New York

the divinities to whom special yashts are devoted we find Ardvī Sūrā, the goddess of waters; Tishtrya, the star Sirius; Mithra, the divinity of light and truth; the Fravashis, or departed souls of the righteous, Verethragna, the genius of Victory and the Kavaya Hvarenah, "kingly glory", the divine light illuminating the ancient kings of Irān.

(4) The fourth division (minor texts) comprises brief prayers, like the five Nyāishes (to the Sun, Moon, Mithra, Water, and Fire), the *Gāhs*, *Sīrūzas*, and *Afringāns* (blessings). These selections form a manual of daily devotion.

(5) The fifth division, Vendīdād (from *vī daēva dāta*, "law against the demons"), is the religious law code of Zoroastrianism and comprises twenty-two *far-gards* (chapters). It begins with an account of Creation in which Ormuzd, the god, is thwarted by Ahriman, the devil; then it describes the occurrence of a destructive winter, a sort of Iranian deluge. The remainder of the book is largely devoted to elaborate prescriptions with regard to ceremonial purification, especially the cleansing from defilement incurred by contact with the dead, and to a list of special penances imposed as a means of atoning for impurity. The Vendīdād is an ecclesiastical code, not a liturgical manual. Its different parts vary widely in character and in age. Some parts may be comparatively recent in origin, although the greater part is very old.

The Avesta does not represent the whole of the sacred scriptures of the Parsees. It is supplemented by an extensive Pahlavi literature, consisting in part of translations from the sacred canon and in part of original matter. The most notable Pahlavi works belonging here are the *Dinkard* (Acts of Religion), dating from the ninth century of the Christian Era; *Bundahishn*, "Original Creation", finished in the eleventh or twelfth century of the Christian Era, but containing material as old as the Avesta itself, being in part a version of one of the original nasks; the *Mainog-i-Khrad* (Spirit of Wisdom), a re-

ligious conference on questions of faith, and the *Arda Vīrāf Nāmāh*, a sort of Zoroastrian "Divina Commedia", which is especially important because of its account of the Persian ideas concerning the future life. There is also some later Zoroastrian literature in modern Persian, comprising works like the *Zartushtnāmāh* (Book of Zoroaster), the *Sad-dar* (Hundred Doors, or Chapters), the *Rī-vāyats* (traditional treatises).

LANGUAGE.—The language of the Avesta is best designated simply as Avestan, not as Zend, for the reasons given in the beginning of this article. Nor is Old Bactrian a desirable term, since it is by no means proved that the language of the Avesta was spoken in ancient Bactria. The Avestan language is an Indo-Germanic tongue and belongs more specifically to the Iranian group, the other members being the Old Persian of the cuneiform inscriptions, the Pahlavi, and Pazend (or Middle Iranian), and the later dialects, New Persian, Kurdish, Afghan, etc. The Avestan speech is very closely related to Sanskrit; in fact, we are able to transpose any word from one language into the other by the application of special phonetic laws. The script employed in the Avestan texts, as we have them, is not so old as the language itself, but dates from the Sassanian period. It is read from right to left and can be traced ultimately to a Semitic source. It is not known in what script the original Avesta was recorded.

ZOROASTER.—It can no longer be doubted that Zoroaster was a real historical personage. The attempts of some scholars to represent him as a mythical being have failed, even though much that is related about his life is legendary, as in the case of Buddha. The man Zoroaster in the original texts appears as *Zarathushtra*, from which *Zoroaster*, our present form of the prophet's name, is derived through the Greek and Latin. The Avesta always writes *Zarathushtra*; the Pahlavi has *Zartusht*; the modern Persian, *Zardusht*. What the meaning of the name is, cannot be stated positively. All that we know is that the name is a compound, and that the second element, *ushtra*, means "camel"; the first part has been variously rendered as "old", "lively", "golden", "ploughing", etc. There has been much discussion as to the date when the prophet lived. The traditional date in the Pahlavi books places his era between the earlier half of the seventh and the sixth century B. C., or, more specifically, 660–583 B. C.; but many scholars assign him to a century, or even several centuries, earlier. There is also much uncertainty regarding his birthplace and the details of his life. He was undoubtedly born in Western Irān, but much of his ministry was in Eastern Irān. From Western Irān, more specifically Azerbaijan (the ancient Atropatene), he seems to have gone to Ragha (Rai) in Media, and when his mission did not meet with success in that region he turned to the East, to Bactria. There a certain king named Vishtāspa became converted to his creed, and through the generous patronage of this powerful defender of the faith the new religion soon gained a firm footing. Presumably, the faith was carried from Bactria to Media, whence it spread into Persia and was accepted in all probability by the great Achæmenian kings. In the case of Cyrus there is some doubt whether he was an adherent of Zoroastrian law, but Darius was a pronounced Mazda-worshipper and presumably, therefore, a true Zoroastrian, as we know that the last kings of the Achæmenian dynasty were genuine followers of the religion. If tradition can be believed, Zoroaster began his ministry at the age of thirty, made a convert, when he was forty-two, of King Vishtāspa, and was slain at the age of seventy-seven, when the Tura-

nians stormed Balkh. This account of the prophet's death is given, at least, by Firdausi.

Under the kings of the Achæmenian line the religion founded by Zoroaster became one of the great religions of the ancient East. But it shared the fate of the Persian monarchy; it was shattered, though not overthrown, by the conquest of Alexander and fell consequently into neglect under the Seleucid and Parthian dynasties. With the accession of the Sassanian dynasty it met with a great revival. The kings of the house of Sassan were zealous believers and did everything in their power to spread the faith as a national creed, so that its prosperity rose again to the zenith. Sectarian movements, to be sure, were not lacking. The heresy of Mazdak for a moment imperilled the union of the Zoroastrian Church and State, and Manichæism, that menace of early Christian orthodoxy, also threatened the ascendancy of the Iranian national faith, which was really its parent. These dangers, however, were only temporary and of minor importance as compared with the Arab conquest, which followed in the seventh century (651) and dealt the fatal blow from which Zoroastrianism never recovered. The victorious followers of Mohammed carried on their proselytizing campaign with relentless vigour. The few Zoroastrians who stood firmly by their faith were oppressed and persecuted. Some remained, and were scattered throughout their native land; but the majority took refuge in India, where their descendants, the Parsees, are found even at the present day. About 10,000 are here and there throughout Persia, chiefly at Yazd and Kirman, but the bulk of the Zoroastrians, upwards of 90,000 souls, constitute a prosperous community in India, chiefly at Bombay.

The standard edition of the Avesta texts is that of GELDNER (Stuttgart, 1885-96). A French tr. by DARMESTER appeared in the *Annales du musée Guimet* (Paris, 1892-93), XXI, XXII, XXIV, and an English tr. by DARMESTER and MILLS in the *Sacred Books of the East*, ed. MAX MÜLLER (Oxford, 1883-87), IV, XXIII, XXXI. Another French tr. was made by DE HARLEZ (2 ed., Paris, 1881).—The Pahlavi texts have been translated by WEST, in the *Sacred Books of the East*, V, XVIII, XXXVII, XLVII.—A good grammar for a study of the Avestan language is that of JACKSON (Stuttgart, 1892); an excellent dictionary that of BARTHOLOMÆ, *Altiranisches Wörterbuch* (Strasburg, 1904).—For information on all topics relating to the language and literature of Iran the articles in the *Grundriss der iranischen Philologie*, ed. GEIGER and KUHN (Strasburg, 1896-1902) should be consulted; on the Avesta, the article of GELDNER. WINDSCHMANN, *Zoroastriische Studien* (ed. SPIEGEL, Berlin, 1863); JACKSON, *Zoroaster, the Prophet of Ancient Iran* (New York, 1899).

A. F. J. REMY.

#### AVESTA, THE, THEOLOGICAL ASPECTS OF.—

I. GOD.—The name of the Supreme God of the Avestic system is *Ahura Mazda* (in the Achæmenid royal inscriptions, *Auramazda*), which probably signifies the All-Wise Lord. This divine name was later modified into the Pahlavi form *Auharmazd*, the modern Persian *Ormuzd* (Greek Ὀρμύζης). Hence the name of *Mazdeism* commonly applied to the Avestic religion. *Ahura Mazda* is a pure spirit; His chief attributes are eternity, wisdom, truth, goodness, majesty, power. He is the Creator (*dātār*) of all good creatures—not, however, of Evil, or evil beings. He is the supreme Lawgiver, the Rewarder of moral good, and the Punisher of moral evil. He dwells in Eternal Light; in the later literature light is spoken of as the clothing of *Ahura Mazda* or even His "body", i. e. a kind of manifestation of His presence, like the Old Testament שכינה. In this same patristic (Pahlavi) literature we find frequent enumerations of the attributes of *Ahura Mazda*; thus these are said to be "omniscience, omnipotence, all-sovereignty, all-goodness". Again He is styled "Supreme Sovereign, Wise Creator, Supporter, Protector, Giver of good things, Virtuous in act, Merciful, Pure Lawgiver, Lord of the good Creations".

II. DUALISM.—It has been remarked above that

*Ahura Mazda* is the Creator of all good creatures. This at once indicates the specific and characteristic feature of the Avestic theology generally known as "dualism". The great problem of the origin of evil, which has ever been the main stumbling-block of religious systems, was solved in the Zoroastrian Reform by the trenchant, if illogical, device of two separate creators and creations: one good, the other evil. Opposed to *Ahura Mazda*, or *Ormuzd*, is His rival, *Ahro Mainyus* (later, *Aharman*, *Ahriman*), the Evil Spirit. He is conceived as existing quite independently of *Ahura Mazda*, apparently from eternity, but destined to destruction at the end of time. Evil by nature and in every detail the exact opposite of *Ahura Mazda*, he is the creator of all evil, both moral and physical. Zoroaster in the *Gāthās* says (Ys., xlv, 2, Jackson's translation):—

Now shall I preach of the World's two primal Spirits,  
The Holier one of which did thus address the Evil:  
Neither do our minds, our teachings, nor our concepts,

Nor our beliefs, nor words, nor do our deeds in sooth,  
Nor yet our consciences, nor souls agree in aught.

It is here to be remarked that the specific name of *Ahura Mazda* in opposition to the Evil Spirit is *Spento Mainyus*, the Holy Spirit, and *Ahura Mazda* and *Spento Mainyus* are used as synonyms throughout the Avesta. The obviously illogical doctrine of two separate and supreme creators eventually led to certain philosophical attempts to reduce the double system to uniformity. One of these consisted in throwing back the Divine Unity to an anterior stage in which *Zrvāna Akarana*, "illimitable time", becomes the single, indifferent, primordial source from which both spirits proceed. Another solution was sought in attributing two spirits (faculties or functions) to *Ahura Mazda* himself, his *Spento Mainyus*, and his *Ahro Mainyus*, or his creative and destructive spirit—an idea probably borrowed from Indian philosophy. This seems the favourite doctrine of the modern Parsees of Bombay, as may be seen in Mr. Navroji Maneckji Kanga's article in the "Babylonian and Oriental Record" for May, 1900 (VIII, 224-28), and it is claimed to be strictly founded on the teaching of the *Gāthās*; but, although such a development of thought was inevitable in the necessary attempt to reconcile a real monotheism with the Zoroastrian dualism, these theories cannot really be called Avestic at all, except in so far as *Zrvāna Akarana* is an Avestic term. They are "patristic" or "scholastic".

The result of the dualistic conception of the universe is that of a continuous great warfare that has been going on even from the beginning between two hostile worlds or camps. All creatures belong to one or another of these camps, not only sentient and intelligent beings, like the spirits and man, but also the animal and even the vegetable worlds. All dangerous, noxious, poisonous animals and plants are evil by their very creation and nature. [We see here the primal germ of Manichæism. *Māni* was a heretic of the Mazdean faith (A. D. 258). This "heresy" is often reprobated in the Pahlavi religious books, together with Judaism and Christianity.] Hence—in sharp contrast to the Hindu *ahimsa*, a characteristic tenet of Buddhism, which prohibits the killing of any creature, even the smallest and most noxious insect—to kill as many as possible of the *Khrasras*, or noxious creatures of the Evil Spirit (such as wolves, serpents, snakes, locusts, intestinal worms, ants), is one of the most meritorious of religious actions. This great warfare, both spiritual and material, will go on to the end of time. It is to end in a final triumph of the Good and the annihilation (apparently) of Evil, including *Ahro Mainyus* himself. Such at least is the teaching in the later "patristic" literature.

III. ANGELOLOGY.—Dualism in its widest sense

seems to be an inherent and ineradicable tendency of the Iranian mind. Almost everything is conceived in pairs or doubles. Hence the constant reference to the "Two Worlds", the spiritual and the material. The doctrine of the Spirit World, whether belonging to the good or the evil creation, is highly developed in the Avesta and subsequent literature. Around Ahura Mazda is a whole hierarchy of spirits, corresponding very closely with our "angels". There is, however, this to be noted, that in the Zoroastrian system many of these creature-spirits are demonstrably old Aryan nature-deities who have been skilfully transformed into angels, and so fitted into a monotheistic framework, frequently enough, in hymns and other passages, by the simple interpolation of the epithet *Mazdadāta* (created by Mazda) before their names. Of the good spirits who surround Ahura, the most important are the *Amesha Spentas* ("Holy Immortals", or "Immortal Saints") generally reckoned as six (though Ahura Mazda himself is frequently included among them, and they are then called seven). These are the characteristic genii of the Gāthās, and their very names show that they are merely personified attributes of the Creator Himself. They are: *Vohu Manah* (Good Mind), *Asha Vahishta* (Best Holiness), *Khshathra Vairya* (Desirable Sovereignty), *Spenta Armaiti* (Holy Piety, a female spirit), *Haurvatāt* (Health), and *Ameretāt* (Immortality). In the Younger Avesta and later traditional literature these evident personifications, whose very names are but abstract nouns, become more and more concrete personages or genii, with varying functions; most of all *Vohu Manah* (Vohuman) rises to a position of unique importance. Dr. L. H. Gray, however, argues, in a very striking article, that even these are evolutions of original naturalistic deities [Archiv für Religionswissenschaft (Leipzig, 1904), VII, 345-372]. In later patristic literature *Vohu Manah* is conceived as the "Son of the Creator" and identified with the Alexandrine *Λόγος*. (See Casartelli, Philosophy of the Mazdayasnan Religion, 42-90.) *Asha*, also (the equivalent of the Sanskrit *Rta=Dharma*), is the Divine Law, Right, Sanctity (cf. Ps. cxviii), and occupies a most conspicuous position throughout the Avesta.

But besides the *Amesha Spentas*, there are a few other archangels whose rank is scarcely less, if it does not sometimes exceed theirs. Such is *Sraosha* ("Obedience"—i. e. to the Divine Law). With him are associated, in a trio, *Rashnu* (Right, Justice) and *Mithra*. This last is perhaps the most characteristic, as he is the most enigmatical, figure of the Iranian angelology. Undoubtedly in origin (like the Vedic *Mitra*) a Sun-deity of the primitive Aryan nature-worship, he has been taken over into the Avesta system as the Spirit of Light and Truth—the favourite and typical virtue of the Iranian race, as testified even by the Greek historians. So important is his position that he is constantly linked with Ahura Mazda himself, apparently almost as an equal, in a manner recalling some of the divine couples of the Vedas. It is well known how in later times the *Mithra* cult became a regular religion and spread from Persia all over the Roman Empire, even into Britain. [See, especially, Cumont's great work, "Monuments relatifs au culte de Mithra" (Paris, 1893).] Nor must mention be omitted of *Atars*, the Genius of Fire, on account of the particular importance and sanctity attached to fire as a symbol of the divinity and its conspicuous use in the cult (which has given rise to the entirely erroneous conception of Zoroastrianism as "Fire-worship", and of the Parsees as "Fire-worshippers"). Water, Sun, Moon, Stars, the sacred *Haoma* plant (Skt. *Soma*), and other natural elements all have their special spirits. But particular mention must be made of the

enigmatical *Fravashis*, the origin and nature of whom is still uncertain. Some writers [especially Söderblom, "Les Fravashis" (Paris, 1899); "La vie future" (Paris, 1901)] have seen in them the spirits of the departed, like the *dii manes*, or the Hindu *pūris*. But, as a matter of fact, their primal conception seems to approach nearest to the pre-existent 'Ideas' of Plato. Every living creature has its own *Fravashi*, existing before its creation; nay in some places inanimate beings, and, stranger still, Ahura Mazda Himself, have their *Fravashis*. They play an important rôle in both the psychology and the ritual cult of Mazdeism.

Face to face with the hierarchy of celestial spirits is a diabolical one, that of the *daēvas* (demons, Pahlavi and Mod. Persian *div*, or *dev*) and *druj's* of the Evil Spirit. They fill exactly the places of the devils in Christian and Jewish theology. Chief of them is *Aka Manah* (Pahlavi *Akōman*, "Evil Mind"), the direct opponent of *Vohu Manah*. Perhaps the most frequently mentioned of all is *Aēshma*, the Demon of Wrath or Violence, whose name has come down to us in the *Asmodeus* (*Aēshmo daēva*) of the Book of Tobias (iii, 8). The *Pairikds* are female spirits of seductive but malignant nature, who are familiar to us under the form of the *Peris* of later Persian poetry and legend.

IV. MAN.—In the midst of the secular warfare that has gone on from the beginning between the two hosts of Good and Evil stands Man. Man is the creature of the Good Spirit, but endowed with a free will and power of choice, able to place himself on the side of Ahura Mazda or on that of Anro Mainyus. The former has given him, through His prophet Zarathushtra (Zoroaster) His Divine revelation and law (*daēna*). According as man obeys or disobeys this Divine law his future lot will be decided; by it he will be judged at his death. The whole ethical system is built upon this great principle, as in the Christian theology. Moral good, righteousness, sanctity (*asha*) is according to the Divine will and decrees; Man by his free will conforms to, or transgresses, these. The Evil Spirit and his innumerable hosts tempt Man to deny or transgress the Divine law, as he tempted Zoroaster himself, promising him as reward the sovereignty of the whole world.—"No!" replied the Prophet, "I will not renounce it, even if body and soul and life should be severed!" (*Vendidad*, xix, 25, 26). It is well to emphasize this basis of Avestic moral theology, because it at once marks off the Avesta system from the fatalistic systems of India with their *karma* and innate pessimism. [See Casartelli, "Idée du péché chez les Indo-Eraniens" (Fribourg, 1898).] A characteristic note of Iranian religious philosophy is its essential optimism; if there is human sin, there is also repentance and expiation. In the later Pahlavi religious literature there is a proper confession of sin (*paēt*) and a developed casuistry. Asceticism, however, finds no place therein.

Divine worship, with elaborate ritual, is an essential duty of man towards his Creator. There is indeed no animal sacrifice; the leading rites are the offering of the quasi-divine *haoma* (the fermented juice of the sacred plant, a species of *Asclepias*), the exact counterpart of the Vedic *sōma*-sacrifice; the care of the Sacred Fire; the chanting of the ritual hymns and prayers, and passages of the Sacred Books (Avesta).

The moral teaching is closely akin to our own. Stress is constantly laid on the necessity of goodness in thought, word, and deed (*humata, hūkhata, hvarshata*) as opposed to evil thought, word, and deed (*dushmala, dushhūkhata, dushhvarshata*). Note the emphatic recognition of sin in thought. Virtues and vices are enumerated and estimated much as in Christian ethics. Special value is attributed to the virtues of religion, truthfulness, purity, and generosity to the

poor. Heresy, untruthfulness, perjury, sexual sins, violence, tyranny are specially reprobated. Zoroaster's reform being social as well as religious, agriculture and farming are raised to the rank of religious duties and regarded as spiritually meritorious. The same will account for the exaggerated importance, almost sanctity, attached to the dog. On the other hand, the one repulsive feature of Avestic morality is the glorification, as a religious meritorious act, of the *Khvāēva-datha*, which is nothing else than intermarriage between the nearest of kin, even brothers and sisters. In later times this practice was tempered down to marriage between cousins, and now is entirely repudiated by the modern Parsees.

V. ESCHATOLOGY.—After death the disembodied soul hovers around the corpse for three days. Then it sets off across the *Cinvat* bridge to meet its judgment and final doom in the world beyond the grave. The three judges of souls are Mithra, Sraosha, and

TOWER OF SILENCE, BOMBAY

Rashnu. The soul of the just passes safely over the bridge into a happy eternity, into heaven (*Aūhu vahishta*, *Garō nmāna*), the abode of Ahura and His blessed angels. The wicked soul falls from the fatal bridge and is precipitated into hell (*Duzh aūhu*). Of this abode of misery a lively description occurs in the later Pahlavi "Vision of Ardā Virāi", whose visit to the Inferno, with the realistic description of its torments, vividly recalls that of Dante. The state called *Hamēstakān*, or Middle State, does not appear in the Avesta itself, but is a development of the later patristic theology. It is not, however, conceived exactly as our Purgatory, but rather as an indifferent state for those whose good and evil deeds are found at death to be in perfect equilibrium. They are therefore neither in suffering nor in happiness. At the end of time, the approach of which is described in the Pahlavi literature in terms strikingly like those of our Apocalypse, will come the last great Prophet, Saoshyant (Saviour) under whom will occur the Resurrection of the Dead (*Frashokereti*), the General Judgment, the *ānōkardōtaois* or renewal of the whole world by the great conflagration of the earth and consequent flood of burning matter. According to the Pahlavi sources, this terrible flood will purify all creatures; even the wicked will be purified from all stains, and even hell will be cleansed and added to the "new heavens and new earth". Meanwhile a mighty combat takes place between Saoshyant and his followers and the demon hosts of the Evil Spirit, who are utterly routed and destroyed forever. (See Yasht, xix and xiii.)

VI. MAZEISM AND THE PERSIAN KINGS.—It is frequently asserted or assumed that the Avesta religion as above sketched was the religion of Cyrus

and Darius and the other Achæmenid Kings of Persia (549–336 B. C.). From the cuneiform inscriptions of these sovereigns (in the Old Persian language, a sister dialect of the Avestic Zend) we know pretty well what their religion was. They proclaim themselves Mazdeans (*Auramazdīya*, Darius, Behistun Column, IV, 56); their Supreme God is Auramazda, greatest of gods (*Mathishtha bagāndm*); He is Creator of all things—heaven, earth, and man;—all things happen by His will (*vashnā*); He sees and knows all things, man must obey His precepts (*framānā*), and follow the "good way" (*pathim rāstām*); man must invoke and praise Him; He hates sin, especially falsehood, which is denounced as the chief of sins, almost insubordination and despotism. Inferior spirits are associated with Him, "clan gods", and particularly Mithra and Anahita. Yet, with all these close similarities, we must hesitate to consider the two religious systems as identical. For in the Achæmenid inscriptions there is absolutely no trace of the dualism which is the characteristic and all-prevailing feature of the Avesta, and no allusion whatever to the great prophet Zoroaster, or to the revelation of which he was the mouthpiece. The exact relation between the two systems remains enigmatical.

SUMMARY.—"The highest religious result to which human reason unaided by revelation, can attain", is the deliberate verdict of a learned Jesuit theologian (Father Ernest Hull, S.J., in "Bombay Examiner", 28 March, 1903). This estimate does not appear exaggerated. The Avesta system may be best defined as monotheism modified by a physical and moral dualism, with an ethical system based on a Divinely revealed moral code and human free will. As it is now followed by the living descendants of its first votaries, the Parsees of India, it is virtually the same as it appears in the Avesta itself, except that its monotheism is more rigid and determined, and that it has shed such objectionable practices as the *Khvetūk-das* (*Khvāēva-datha*) and seeks to explain them away. A great revival in the knowledge of the old sacred languages (Zend and Pahlavi), which had become almost forgotten, has taken place during the past half-century under the stimulus of European scholarship, whose results have been widely adopted and assimilated. The religious cult is scrupulously maintained as of old. The ancient traditional and characteristically national virtues of truth and open-handed generosity flourish exceedingly in the small, but highly intelligent, community.

AVICEBRON, SALOMO BEN JEHUDA BEN GEBIROL (OR GABIROL), whom the Scholastics, taking him for an Arabian, called Avicēbrol (this form occurs in the oldest MSS.; the later MSS. have Avencebron, Avicembron, Avicebron, etc.); a Jewish religious poet, moralist, and philosopher, b. at Malaga in 1020 or 1021; d. at Saragossa, 1070. He was educated at Saragossa, where he spent the remainder of his life, devoting himself to moral and intellectual philosophy, and writing religious poetry. His principal philosophical work, written in Arabic, was translated into Hebrew in the thirteenth century by Falaquera, and entitled "Mekor Chajim" [this was discovered and edited with French translation by Munk, "Mélanges" etc., (Paris, 1857)], and into Latin in the twelfth century by Johannes Hispanus and Dominicus Gun-

dissalinus (edited by Bäumker, Münster, 1895) under the title "Fons Vitæ". His poems were published by Munk ("Mélanges", etc., Paris, 1857), and a Hebrew translation of his ethical writings (Riva, 1562, and Lunéville, 1840). Avicenna's philosophy united the traditional neo-Platonic doctrines with the religious teaching of the Old Testament. From the neo-Platonists, whom he knew chiefly through such apocryphal writings as the "Theologia Aristotelis" and the "Liber de Causis" (see ARABIAN SCHOOL OF PHILOSOPHY), he derived the doctrine of emanation, namely: that there emanated from God, in the first place, the Universal Intelligence, that from the Universal Intelligence there emanated the World-Soul, and that from the World-Soul there emanated Nature, which is the immediate principle of productivity of material things. From the same neo-Platonic sources he derived the doctrine that matter is of itself wholly inert and merely the occasion which is made use of by the Infinite Agent to produce natural effects (Occasionalism). On the other hand, he drew from Biblical sources the doctrine that the Supreme Principle in the production of the Universe was not the Thought of God, but the Divine Will, which, in Scriptural phrase, he calls the Word of God. In thus attempting to combine Jewish religious doctrine with neo-Platonism, the doctrine of creation with the notion of emanation, he introduced into his philosophy elements which are logically incompatible.

His most celebrated doctrine, however, the one by which he was best known to the Christian philosophers of the Middle Ages, was that of the universality of matter. All created things, he taught, are composed of matter and form. God alone is pure actuality. Everything else, even the highest among the angels, is made up of matter (not merely potency, but matter like that of terrestrial bodies) and form, just as man is composed of body and soul. The matter, however, of angelic bodies, while it is like terrestrial matter, is of a purer kind and is called spiritual matter. In other words, there are no created "separate substances", as the Schoolmen called them. Between the pure spirituality of God and the crude materiality of terrestrial bodies there mediate substances composed of matter and form, which range in ascending scale of spiritual-materiality from the soul of man to the highest angelic nature. This doctrine is mentioned by almost all the great scholastics, and referred by them to the "Fons Vitæ" for instance, by Albert the Great (Summa Totius Theol., I, q. xlii, art. 22), by St. Thomas (Quæst. Disp., De Animâ, art. 6; Opusculum De Subst. Separatis, passim), and Duns Scotus (De Re. Princ. VIII, 4). But, while the first two, in common with the other Dominican teachers, refuted the author of "Fons Vitæ" on this point, the last mentioned, together with Alexander of Hales and others of the Franciscan School, adopted his doctrine as part of their theory of the angelic nature.

WILLIAM TURNER.

**Avicenna** (ABN ALI AL HOSAIN IBN ABDALLAH IBN SINA, called by the Latins AVICENNA), Arabian physician and philosopher, b. at Kharmathen, in the province of Bokhara, 980; d. at Hamadan, in Northern Persia, 1037. From an autobiographical sketch which has come down to us we learn that he was a very precocious youth; at the age of ten he knew the Koran by heart; before he was sixteen he had mastered what was to be learned of physics, mathematics, logic, and metaphysics; at the age of

sixteen he began the study and practice of medicine; and before he had completed his twenty-first year he wrote his famous "Canon" of medical science, which for several centuries, after his time, remained the principal authority in medical schools both in Europe and in Asia. He served successively several Persian potentates as physician and adviser, travelling with them from place to place, and despite the habits of conviviality for which he was well known, devoted much time to literary labours, as is testified by the hundred volumes which he wrote. Our authority for the foregoing facts is the "Life of Avicenna," based on his autobiography, written by his disciple Jorjani (Sorsanus), and published in the early Latin editions of his works. Besides the medical "Canon," he wrote voluminous commentaries on Aristotle's works and two great encyclopedias entitled "Al Schefa", or "Al Chifa" (i. e. healing) and "Al Nadja" (i. e. deliverance). The "Canon" and portions of the encyclopedias were translated into Latin as early as the twelfth century, by Gerard of Cremona, Dominicus Gundissalinus, and John Aven- death; they were published at Venice, 1493-95. The complete Arabic texts are said to be in MS. in the Bodleian Library. An Arabic text of the "Canon" and the "Nadja" was published in Rome, 1593. Avicenna's philosophy, like that of his predecessors among the Arabians, is Aristoteleism mingled with Neo-Platonism, an exposition of Aristotle's teaching in the light of the Commentaries of Themistius, Simplicius, and other neo-Platonists. His Logic is divided into nine parts, of which the first is an introduction after the manner of Porphyry's "Isagoge"; then follow the six parts corresponding to the six treatises composing the "Organon"; the eighth and ninth parts consist respectively of treatises on rhetoric and poetry. Avicenna devoted special attention to definition, the logic of representation, as he styles it, and also to the classification of sciences. Philosophy, he says, which is the general name for scientific knowledge, includes speculative and practical philosophy. Speculative philosophy is divided into the inferior science (physics), and middle science (mathematics), and the superior science (metaphysics including theology). Practical philosophy is divided into ethics (which considers man as an individual); economics (which considers man as a member of domestic society); and politics (which considers man as a member of civil society). These divisions are important on account of their influence on the arrangement of sciences in the schools where the philosophy of Avicenna preceded the introduction of Aristotle's works. A favourite principle of Avicenna, which is quoted not only by Averroes but also by the Schoolmen, and especially by Albert the Great, was *intellectus in formis agit universalitatem*, that is, the universality of our ideas is the result of the activity of the mind itself. The principle, however, is to be understood in the realistic, not in the nominalistic sense. Avicenna's meaning is that, while there are differences and resemblances among things independently of the mind, the formal constitution of things in the category of individuality, generic universality, specific universality, and so forth, is the work of the mind. Avicenna's physical doctrines show him in the light of a faithful follower of Aristotle, who has nothing of his own to add to the teaching of his master. Similarly, in psychology, he reproduces Aristotle's doctrines, borrowing occasionally an explanation, or an illustration, from Alfarabi. On one point, however, he is at pains to set the true meaning, as he understands it, of Aristotle, above all the exposition and elaboration of the Commentators. That point is the question of the Active and Passive Intellect. (See ARABIAN SCHOOL OF PHILOSOPHY.) He teaches that the latter is the individual mind in the state of potency with regard to

knowledge, and that the former is the impersonal mind in the state of actual and perennial thought. In order that the mind acquire ideas, the Passive Intellect must come into contact with the Active Intellect. Avicenna, however, insists most emphatically that a contact of that kind does not interfere with the independent substantiality of the Passive Intellect, and does not imply that it is merged with the Active Intellect. He explicitly maintains that the individual mind retains its individuality and that, because it is spiritual and immaterial, it is endowed with personal immortality. At the same time, he is enough of a mystic to maintain that certain choice souls are capable of arriving at a very special kind of union with the Universal, Active, Intellect, and of attaining thereby the gift of prophecy. Metaphysics he defines as the science of supernatural (ultra-physical) being and of God. It is, as Aristotle says, the theological science. It treats of the existence of God, which is proved from the necessity of a First Cause; it treats of the Providence of God, which, as all the Arabians taught, is restricted to the universal laws of nature, the Divine Agency being too exalted to deal with singular and contingent events; it treats of the hierarchy of mediators between God and material things, all of which emanated from God, the Source of all sources, and Principle of all principles. The first emanation from God is the world of ideas. This is made up of pure forms, free from change, composition, or imperfection; it is akin to the Intelligible world of Plato, and is, in fact, a Platonic concept. Next to the world of ideas is the world of souls, made up of forms which are, indeed, intelligible, but not entirely separated from matter. It is these souls that animate and energize the heavenly spheres. Next to the world of souls is the world of physical forces, which are more or less completely embedded in terrestrial matter and obey its laws; they are, however, to some extent amenable to the power of intelligence in so far as they may be influenced by magic art. Lastly comes the world of corporeal matter; this, according to the Neo-Platonic conception which dominates Avicenna's thought in this theory of emanation, is of itself wholly inert, not capable of acting but merely of being acted upon (Occasionalism). In this hierarchical arrangement of beings, the Active Intellect, which, as was pointed out above, plays a necessary rôle in the genesis of human knowledge, belongs to the world of Ideas, and is of the same nature as the spirits which animate the heavenly spheres. From all this it is apparent that Avicenna is no exception to the general description of the Arabian Aristoteleans as neo-Platonic interpreters of Aristotle. There remain two other doctrines of a general metaphysical nature which exhibit him in the character of an original, or rather an Arabian, and not a neo-Platonic, interpreter. The first is his division of being into three classes: (a) what is merely possible, including all sublunary things; (b) what is itself merely possible but endowed by the First Cause with necessity; such are the ideas that rule the heavenly spheres; (c) what is of its own nature necessary, namely, the First Cause. This classification is mentioned and refuted by Averroes. The second doctrine, to which also Averroes alludes, is a fairly outspoken system of pantheism, which Avicenna is said to have elaborated in a work, now lost, entitled "Philosophia Orientalis". The Scholastics, apparently, know nothing of the special work on pantheism; they were, however, aware of the pantheistic tendencies of Avicenna's other works on philosophy, and were, accordingly, reluctant to trust to his exposition of Aristotle.

WILLIAM TURNER.

**Avignon.**—CITY.—Avignon, written in the form of *Avennio* in the ancient texts and inscriptions, takes its name from the House, or Clan, *Avennius* [d'Arbois de Jubainville, "Recherches sur l'origine de la propriété foncière et des noms des lieux habités en France" (Paris, 1890), 518]. Founded by the *Cavari*, who were of Celtic origin, it became the centre of an important Phœcean colony from Marseilles. Under the Roman occupation, it was one of the most flourishing cities of Gallia Narbonensis; later, and during the inroads of the barbarians, it belonged in turn to the Goths, the Burgundians, the Ostrogoths, and to the Frankish kings of Austrasia. In 736 it fell into the hands of the Saracens, who were driven out by Charles Martel. Boso having been proclaimed King of Provence, or of Arles, by the Synod of Mantaille, at the death of Louis the Stammerer (879), Avignon ceased to belong to the Frankish kings. In 1033, when Conrad II fell heir to the Kingdom of Arles, Avignon passed to the empire. The German rulers, however, being at a distance, Avignon took advantage of their absence to set up as a republic with a consular form of government, between 1135 and 1146. In addition to the emperor, the Counts of Forcalquier, Toulouse, and Provence exercised a purely nominal sway over the city; on two occasions, in 1125, and in 1251, the two latter divided their rights in regard to it, while the Count of Forcalquier resigned any that he possessed to the bishops and consuls in 1135. During the crusade against the Albigenses the citizens refused to open the gates of Avignon to Louis VIII and the legate, but capitulated after a three months' siege (10 June—13 September, 1226) and were forced to pull down the ramparts and fill up the moat of their city. Philip the Fair, who had inherited from his father all the rights of Alphonse de Poitiers, last Count of Toulouse, made them over to Charles II, King of Naples and Count of Provence (1290); it was on the strength of this donation that Queen Joan sold the city to Clement VI for 80,000 florins (9 June, 1348).

Avignon, which at the beginning of the fourteenth century was a town of no great importance, underwent a wonderful development during the residence there of nine popes, Clement V—Benedict XIII, inclusively. To the north and south of the rock of the Doms, partly on the site of the Bishop's Palace, which had been enlarged by John XXII, rose the Palace of the Popes, in the form of an imposing fortress made up of towers, linked one to another, and named as follows: De la Campanie, de Trouillas, de la Glacière, de Saint-Jean, des Saints-Anges (Benedict XII), de la Gâche, de la Garde-Robe (Clement VI), de Saint-Laurent (Innocent VI). The Palace of the Popes belongs, by its severe architecture, to the Gothic art of the South of France; other noble examples are to be seen in the churches of St. Didier, St. Peter, and St. Agricola, in the Clock Tower, and in the fortifications built between 1349 and 1368 for a distance of some three miles, and flanked by thirty-nine towers, all of which were erected or restored by popes, cardinals, and great dignitaries of the court. On the other hand, the execution of the frescoes which adorn the interiors of the papal palace and of the churches of Avignon was entrusted almost exclusively to artists from Sienna.

The popes were followed to Avignon by agents (*factores*) of the great Italian banking-houses, who settled in the city. They acted as money-changers, as intermediaries between the Apostolic Chamber and its debtors, living in the most prosperous quarters of the city, which was known as the Exchange. A crowd of traders of all kinds brought to market the

PALACE OF THE POPES, AVIGNON

products necessary to the maintenance of a numerous court and of the visitors who flocked to it; grain and wine from Provence, from the south of France, the Roussillon, and the country round Lyons. Fish was brought from places as distant as Brittany; cloths, rich stuffs, and tapestries came from Bruges and Tournai. We need only glance at the account-books of the Apostolic Chamber, still kept in the Vatican archives, in order to judge of the trade of which Avignon became the centre. The university founded by Boniface VIII in 1303, had a good many students under the French popes, drawn thither by the generosity of the sovereign pontiffs, who rewarded them with books or with benefices.

After the restoration of the Holy See in Rome, the spiritual and temporal government of Avignon was entrusted to a legate, the cardinal-nephew, who was replaced, in his absence by a vice-legate. When, however, Innocent XII abolished nepotism, he did away with the office of legate, and handed over the government of the Pontifical States to the Congregation of Avignon (1692), which resided at Rome, with the Cardinal Secretary of State as prefect, and exercised its jurisdiction through the vice-legate. This congregation, to which appeals were made from the decisions of the vice-legate, was united to the Congregation of Loretto; in 1774 the vice-legate was made president, thus depriving it of almost all authority. It was done away with under Pius VI.

The Public Council, composed of 48 councillors chosen by the people, four members of the clergy, and four doctors of the university, met under the presidency of the *viguier*, or chief magistrate, nominated, for a year, by the legate or vice-legate. Their duty was to watch over the material and financial interests of the city; their resolutions, however, were to be submitted to the vice-legate for approval before being put in force. Three consuls, chosen annually by the Council, had charge of the administration of the streets.

From the fifteenth century onward it became the policy of the Kings of France to unite Avignon to their kingdom. In 1476, Louis XI, annoyed that Giuliano della Rovere should have been made legate, rather than Charles of Bourbon, caused the city to be occupied, and did not withdraw his troops until after his favourite had been made a cardinal. In 1536 Francis I invaded the papal territory, in order to drive out Charles V, who held Provence. In return for the reception accorded him by the people of Avignon, Francis granted them the same privileges as those enjoyed by the French, that, especially, of being eligible to offices of state. Henry III made a fruitless attempt to exchange the Marquisate of Saluces for Avignon, but Gregory XIII would not agree to it (1583). In 1663, Louis XIV, in consequence of an attack, led by the Corsican Guard, on the attendants of the Duc de Créquy, his ambassador in Rome, seized Avignon, which was declared an integral part of the Kingdom of France by the Parliament of Provence. Nor was the sequestration raised until after Cardinal Chigi had made an apology (1664). Another attempt at occupation made in 1688, without success, was followed by a long period of peace, lasting till 1768.

Louis XV, dissatisfied at Clement XIII's action in regard to the Duke of Parma, caused the Papal States to be occupied from 1768 to 1774, and substituted French institutions for those in force. These met with the approval of the people of Avignon, and a French party grew up which, after the sanguinary massacres of La Glacière, carried all before it, and induced the Constituent Assembly to decree the union of Avignon and the Comtat (district) Venaissin with France (14 September, 1791). Article 5 of the Treaty of Tolentino (19 Feb., 1797) definitely sanctioned the annexation; it stated that "The

Pope renounces, purely and simply, all the rights to which he might lay claim over the city and territory of Avignon, and the Comtat Venaissin and its dependencies, and transfers and makes over the said rights to the French Republic." Consalvi made an ineffectual protest at the Treaty of Vienna, in 1815; Avignon was not restored to the Holy See.

DUHAMEL, *Les origines du palais des papes* (Tours, 1882); CHARPENNE, *Histoire des réunions temporaires d'Avignon et du comtat Venaissin à la France* (Paris, 1886); *Histoire de la Révolution dans Avignon et le Comtat Venaissin et de leur réunion définitive à la France* (Paris, 1892); EHRLÉ, *Historia Bibliotheca Romanorum Pontificum* (Rome, 1890); FANTONI CASTRUCCI, *Storia della Città d'Avignone e del contado Venaissino* (Venice, 1878); MOLLAT, *Jean XXII, fut-il un avare?*, in *Revue d'Histoire Ecclésiastique* (July, 1904, and Jan., 1905); MOLLAT and SAMARAN, *La fiscalité pontificale en France au XIV<sup>e</sup> siècle* (Paris, 1905); MÜNTZ, *Les Sources de l'histoire des arts dans la ville d'Avignon pendant le XIV<sup>e</sup> siècle*, in *Bulletin Archéologique de la Commission des travaux historiques* (1887). ARCHDIOCESE OF AVIGNON exercises jurisdiction over the territory embraced by the department of Vaucluse. Before the Revolution it had as suffragan sees, Carpentras, Vaison, and Cavaillon. By the Concordat of 1801 these three dioceses were united to Avignon, together with the Diocese of Apt, a suffragan of Aix. At the same time, however, Avignon was reduced to the rank of a bishopric and was made a suffragan see of Aix. The Archdiocese of Avignon was re-established in 1822, and received as suffragan sees the Diocese of Viviers (restored in 1822); Valence (formerly under Lyon); Nîmes (restored in 1822); and Montpellier (formerly under Toulouse). There is no evidence that St. Rufus, disciple of St. Paul (according to certain traditions the son of Simon the Cyrenean) and St. Justus, likewise held in high honour throughout the territory of Avignon, were venerated in antiquity as bishops of that see. The first bishop known to history is Nectarius, who took part in several councils about the middle of the fifth century. St. Agricola (Agricolus), bishop between 650 and 700, is the patron saint of Avignon. In 1475 Sixtus IV raised the Diocese of Avignon to the rank of an archbishopric, in favour of his nephew Giuliano della Rovere, who later became Pope Julius II. The memory of St. Eucherius still clings to three vast caves near the village of Beaumont, whither, it is said, the people of Lyons had to go in search of him when they sought him to make him their archbishop. As Bishop of Cavaillon, Cardinal Philippe de Cabasoles, Seigneur of Vaucluse, was the great protector of Petrarch. (For Avignon and its religious architecture see AVIGNON, CITY OF.) At the close of 1905 the Archdiocese of Avignon had 236,949 inhabitants, 29 cures, or parishes of the first class; 144 parishes of the second class, and 47 vicariates.

GEORGES GOYAU.

COUNCILS OF AVIGNON.—Nothing is known of the council held here in 1060. In 1080 a council was held under the presidency of Hugues de Dié, papal legate, in which Achard, usurper of the See of Arles, was deposed, and Gibelin put in his place. Three bishops elect (Lautelin of Embrun, Hugues of Grenoble, and Didier of Cavaillon) accompanied the legate to Rome and were consecrated there by Pope Gregory VII. In the year 1209 the inhabitants of Toulouse were excommunicated by a Council of Avignon (two papal legates, four archbishops, and twenty bishops) for failing to expel the Albigensian heretics from their city. The Count of Toulouse was forbidden, under threat of excommunication, to impose exorbitant burdens on his subjects and, as he persisted, was finally excommunicated. In the Council of 1270, presided over by Bertrand de Malferrat, Archbishop of Arles, the usurpers of

ecclesiastical property were severely threatened; unclaimed legacies were allotted to pious uses; the bishops were urged to mutual support; the individual churches were taxed for the support of the papal legate; and ecclesiastics were forbidden to convoke the civil courts against their bishops. The Council of 1279 was concerned with the protection of the rights, privileges, and immunities of the clergy. Provision was made also for the protection of those who had promised to join the Crusade ordered by Gregory X, but had failed to go. It was also decreed that to hear confessions, besides the permission of his ordinary or bishop, a monk must also have that of his superior. In the Council of 1282 ten canons were published, among them one urging the people to frequent more regularly the parochial churches, and to be present in their own parish churches at least on Sundays and feast days. The temporalities of the Church and ecclesiastical jurisdiction occupied the attention of the Council of 1327. The seventy-nine canons of the Council of 1337 are renewed from earlier councils, and emphasize the duty of Easter Communion in one's own parish church, and of abstinence on Saturday for beneficed persons and ecclesiastics, in honour of the Blessed Virgin, a practice begun three centuries earlier on the occasion of the Truce of God, but no longer universal. The Council of 1457 was held by Cardinal de Foix, Archbishop of Arles and legate of Avignon, a Franciscan. His principal purpose was to promote the doctrine of the Immaculate Conception, in the sense of the declaration of the Council of Basle. It was forbidden to preach the contrary doctrine. Sixty-four disciplinary decrees were also published, in keeping with the legislation of other councils. A similar number of decrees were published in 1497 by a council presided over by Archbishop Francesco Tarpuigi (afterwards Cardinal). The sponsors of the newly confirmed, it was decreed, were not obliged to make presents to them or to their parents. Before the relics of the saints two candles were to be kept lighted at all times. Disciplinary measures occupied the attention of the Council of 1509. The Council of 1596 was called for the purpose of furthering the observance of the decrees of the Council of Trent (1545-63), and for a similar purpose the Council of 1609. The Councils of 1664 and 1725 formulated disciplinary decrees; the latter proclaimed the duty of adhering to the Bull of Clement XI against the "Reflexions morales" of Quesnel. The Council of 1849 published, in ten chapters, a number of decrees concerning faith and discipline.

THOMAS J. SHAHAN.

UNIVERSITY OF AVIGNON (1303-1792), developed from the already existing schools of the city, was formally constituted in 1303, by a Bull of Boniface VIII. With Boniface, King Charles II of Naples should be considered as one of its first great protectors and benefactors. The faculty of law, both civil and ecclesiastical, existed for some time almost exclusively, and always remained the most important department of the university. Pope John XXIII erected (1413) a faculty of theology, the students of which were for a long time only few in number. The faculty of arts never acquired great importance; that of medicine developed especially only in the sixteenth and seventeenth centuries. The Bishop, since 1475 Archbishop, of Avignon was chancellor of the university. The vice-legate, generally a bishop, represented the civil power (in this case the pope) and was chiefly a judicial officer, ranking higher than the Primicerius (Rector). The latter was elected by the Doctors of Law, to whom, in 1503, were added four theologians and, in 1784, two Doctors of Medicine. The pope,

spiritual head and, after 1348, temporal ruler of Avignon, exercised in this double capacity great influence over the affairs of the university. John XXIII granted it (1413) extensive privileges, such as special university jurisdiction and exemption from taxes. Political, geographical, and educational circumstances forced the university, during the later period of its existence, to look to Paris rather than to Rome for favour and protection. It disappeared gradually during the French Revolution, and ceased to exist in 1792.

Avila (ABULA), DIOCESE OF, a suffragan of Valladolid in Spain. Its episcopal succession dates at least from the fourth century and claims an Apostolic origin. Suppressed in the course of the ninth, it was re-established early in the twelfth, century, after

CATHEDRAL OF AVILA

the expulsion of the Moors, and was a suffragan of Mérida until 1120; then of Compostella until 1857. The Catholic population is 189,926. There are 360 priests, 339 parishes, and about 500 churches and chapels. Avila is historically one of the most important cities in the medieval and modern history of Spain. In the fourth century the arch-heretic Priscillian was Bishop of Avila, and in later times many saints had Avila as their home, among them St. Teresa and John of Avila, the "Apostle of Andalusia". It was once one of the most flourishing cities of Spain, but its population has dwindled to 7,000. Its Moorish castle and ancient eleventh-century cathedral are monumental relics of the past.

TO TITR

THOMAS J. SHAHAN.

**UNIVERSITY OF AVILA (1550-1807).**—Under the patronage of Queen Isabella, the Dominicans established (1504) chairs of philosophy and theology in their College of St. Thomas at Avila, Spain. About 1550, the Papal Nuncio, Juan Poggio, raised the college to university rank. Gregory XIII, at the request of Philip II, ratified the nuncio's action by the Bull "In Apostolatus culmine", 4 April, 1576. Innocent X, in 1645, approved the statutes of the university and empowered it to grant degrees in arts, theology, medicine, and law. Its work, however, was mainly theological. Though it enjoyed the favour of the Spanish sovereigns, especially of Charles II, it never attracted a large number of students. It had no endowment, but depended upon tuition fees. As a result, it began to decline during the eighteenth century, and it was suppressed, along with several other minor universities, in 1807.

E. A. PACE.

**Avila, FRANCISCO DE**, curate or vicar in the province of Huarochiri of Peru, later curate at Huánaco, finally Canon of the Church of La Plata (now Sucre), in Bolivia. Born in Peru as a founding (*quorum parentes ignorantur* he says himself); date of demise unknown. He was one of the most active investigators of Indian rites and customs of his time. In 1608 he wrote a treatise of the "Errors, False Gods, and Other Superstitions of the Indians of the Province of Huarochiri, Mama, and Chacalla", of which unfortunately only the first six chapters are known to exist and have been translated into English. It is, even in its incomplete form, an invaluable contribution to the knowledge of the Peruvian Indians and their primitive lore. In 1611 Avila wrote an equally important report on the Indians of Huánaco in eastern Peru, of which the unpublished MS. is extant. Such writings greatly mitigate the charges which the destruction of fetiches and other objects of primitive worship of the Indians have called forth against the Church. (See ARRIAGA, PABLO JOSÉ.)

AD. F. BANDELIER.

**Avila, SANCHE DE**, b. at Avila of the Kings, in Old Castile, 1546, and named after the place of his birth; d. at Plasencia, in the same province, 6 or 7 December, 1625. He was of a distinguished family but was still more eminent for his saintliness, his vast knowledge, and his success as a preacher. He made his ecclesiastical studies and received his doctorate at the great University of Salamanca. He was afterwards consecrated bishop and held, at different times, the Sees of Murcia, Jaen in Andalusia, Sigüenza in Old Castile, in 1615, and, seven years later, Plasencia, where he remained until his death. He had been a confessor of St. Theresa. The following works of his in Spanish are worthy of note: "The Veneration Due to the Bodies and Relics of Saints" (Madrid, 1611); "Sermons" (Baeza, 1615); "The Sighs of St. Augustine", from the Latin (Madrid, 1601, 1626); and, in manuscript, the Lives of St. Augustine and St. Thomas.

WILLIAM DEVLIN.

**Avitus (ALCIMUS ECDICIUS), SAINT**, a distinguished Bishop of Vienne, in Gaul, from 490 to about 518, though his death is placed by some as late as 525 or 526. He was born of a prominent Gallo-Roman family closely related to the Emperor Avitus and other illustrious persons, and in which episcopal honours were hereditary. In difficult

times for the Catholic Faith and Roman culture in Southern Gaul, Avitus exercised a favourable influence. He pursued with earnestness and success the extinction of the Arian heresy in the barbarian Kingdom of Burgundy (443-532), won the confidence of King Gundobad, and converted his son, King Sigismund (516-523). He was also a zealous opponent of Semipelagianism, and of the Acacian Schism at Constantinople. Like his contemporary, Ennodius of Pavia, he was strenuous in his assertion of the authority of the Apostolic See as the chief bulwark of religious unity and the incipient Christian civilization. "If the pope", he says, "is rejected, it follows that not one bishop, but the whole episcopate threatens to fall" (*Si papa urbis vocatur in dubium, episcopatus videbitur, non episcopus, vacillare.*—Ep. xxxiv; ed. Peiper). The literary fame of Avitus rests on a poem of 2,552 hexameters, in five books, dealing with the Scriptural narrative of Original Sin, Expulsion from Paradise, the Deluge, the Crossing of the Red Sea. The first three books offer a certain dramatic unity; in them are told the preliminaries of the great disaster, the catastrophe itself, and the consequences. The fourth and fifth books deal with the Deluge and the Crossing of the Red Sea as symbols of baptism. Avitus deals freely and familiarly with the Scriptural events, and exhibits well their beauty, sequence, and significance. He is one of the last masters of the art of rhetoric as taught in the schools of Gaul in the fourth and fifth centuries. Ebert says that none of the ancient Christian poets treated more successfully the poetic elements of the Bible. His poetic diction, though abounding in archaisms and rhythmic redundancy, is pure and select, and the laws of metre are well observed. It is said that Milton made use of his paraphrase of Scripture in the preparation of "Paradise Lost". He wrote also 666 hexameters "De virginitate" or "De consolatoriam castitatis laude" for the comfort of his sister Fuscina, a nun. His prose works include "Contra Eutychanam Hæresim libri II", written in 512 or 513, and also about eighty-seven letters that are of considerable importance for the ecclesiastical and political history of the years 499-518. Among them is the famous letter to Clovis on the occasion of his baptism. There was once extant a collection of his homilies, but they have perished with the exception of two and some fragments and excerpts. In recent times Julien Havet has demonstrated (Questions mérovingiennes, Paris, 1885) that Avitus is not the author of the "Dialogi cum Gundobado Rege", a defence of the Catholic Faith against the Arians, purporting to represent the famous Colloquy of Lyons in 449, and first published by d'Achéry (1661) in his "Spicilegium" (V, 110-116). It is a forgery of the Oratorian, Jérôme Viguier, who also forged the letter of Pope Symmachus (13 Oct., 501) to Avitus. The works of Avitus are found in Migne, P. L., LIX, 191-398. There are two recent editions: one by R. Peiper (in Mon. Germ. Hist.: Auct. Antiq., VI, Berlin, 1883), the other by U. Chevalier (Lyons, 1890).

THOMAS J. SHAHAN.

**AVIZ, ORDER OF**, a military body of Portuguese knights.—The Kingdom of Portugal, founded in 1128, was not only contemporaneous with the Crusades but conducted one of its own against the Moors. Some crusaders were bound only by temporary vows, and when these expired they would sometimes return to their country although the war

was not ended. This accounts for the favour with which military orders were regarded beyond the Pyrenees, in Portugal as well as in Spain; for in them the vow of fighting against the infidels was perpetual, like other monastic vows. Knights Templars were found in Portugal as early as 1128, and received a grant from Queen Teresa in the year of the Council of Troyes, which confirmed their early statutes. A native order of this kind sprang up in Portugal about 1146. Affonso, the first king, gave to it the town of Evora, captured from the Moors in 1211, and the Knights were first called "Brothers of Santa Maria of Evora". Pedro Henriquez, an illegitimate son of the king's father, was the first grand master. After the conquest of Aviz the military castle erected there became the mother-house of the order, and they were then called "Knights of St. Benedict of Aviz", since they adopted the Benedictine rule in 1162, as modified by John Ziritu, one of the earliest Cistercian abbots of Portugal. Like the Knights of Calatrava in Castile, the Knights of Portugal were indebted to the Cistercians for their rule and their habit—a white mantle with a green fleur-de-lys cross. The Knights of Calatrava also surrendered some of their places in Portugal to them on condition that the Knights of Aviz should be subject to the visitation of their grand master. Hence the Knights of Aviz were sometimes regarded as a branch of the Calatravan Order, although they never ceased to have a Portuguese grand master, dependent for temporalities on the Portuguese king. At the accession of King Ferdinand (1383) war broke out between Castile and Portugal. When João I, who had been grand master of the Knights of Aviz, ascended the throne of Portugal, he forbade the knights to submit to Castilian authority, and consequently, when Gonzalvo de Guzman came to Aviz as Visitor, the knights, while according him hospitality, refused to recognize him as a superior. Guzman protested, and the point remained a subject of contention until the Council of Basle (1431), when Portugal was declared to be in the wrong. But the right of the Calatravans was never exercised, and the next grand master of the Knights of Aviz, Rodrigo of Sequiro, continued to assert supreme authority over them.

The mission of the military orders in Portugal seemed to fail after the overthrow of Moslem domination, but the Portuguese expeditions across the sea opened up a new field for them. The first landings of Europeans in Africa, the conquest of Ceuta by King João I (1415), the attacks upon Tangier under João's son Duarte (1437), were also crusades, inspired by a religious spirit and sanctioned by similar papal Bulls. The Knights of Aviz and the Knights of Christ, scions of the Knights Templars, achieved deeds of valour, the former under the Infante Fernando, the latter under Henrique, brother of King Duarte. Fernando displayed a no less heroic forbearance during his six years of captivity among the Moslems, a long martyrdom which after his death placed him among the Blessed (Acta SS., 5 June). This splendid enthusiasm did not last. Soon the whole nation became affected by the wealth that poured in, and the Crusade in Africa degenerated into mere mercantile enterprise;

the pontifical Bulls were made a vulgar means of raising money, and after the grand mastership of the order (1551) had been vested in the king in perpetuity, he availed himself of its income to reward any kind of service in the army or the fleet. If the wealth of the Knights of Aviz was not as great as that of the Knights of Christ, it was still quite large, drawn as it was from some forty-three commanderies. The religious spirit of the knights vanished, and they withdrew from their clerical brothers who continued alone the conventual life. They were dispensed from their vow of celibacy by Alexander VI (1492), who tolerated their marriage to prevent scandalous concubinage; Julius III (1551) allowed them to dispose freely of their personal properties. Nobility of birth remained the chief requirement of aspirants to the mantle, a requirement confirmed by a decree of 1604. Queen Maria I, supported by Pope Pius VI (1 Aug., 1789), attempted a last reformation and failed. Finally, the military orders were suppressed by Dom Pedro, after the downfall of the Miguelist usurpation (1834).

CH. MOELLER.

A KNIGHT OF ST. BENEDICT OF AVIZ

Avranches, DIOCESE OF. See, COUTANCES.

Avranches, COUNCIL OF.—In 1172 (Sept., 27-28) a council was held at Avranches in France, apropos of the troubles caused in the English Church by the murder of St. Thomas Becket. Henry II, King of England, after due penance, was absolved from the censures incurred by the assassination of the holy prelate, and swore fidelity to Alexander III in the person of his legate. It was forbidden to confer on children benefices that carried with them the cure of souls, or on the children of priests the churches of their fathers. Each parish was required to have an assistant (vicarius) and the Advent fast

was commended to all who could observe it, especially to ecclesiastics.

THOMAS J. SHAHAN.

Avril, PHILIPPE, Jesuit, b. at Angoulême, France, 16 September, 1654; d. in a shipwreck in 1698. He was professor of philosophy and mathematics at Paris when he was summoned to the missions of China. Following the instructions of Father Verbiest, then at Pekin, he attempted an overland journey, and travelled for six years through Kurdistan, Armenia, Astrakhan, Persia, and other countries of the East. Arriving at Moscow, he was refused permission to pass through Tatary, and was sent by the Government to Poland, from whence he made his way to Constantinople and from there went back to France. Though exhausted by hæmorrhages he set out again on a vessel, which was lost at sea. He has left interesting and valuable accounts of his long wanderings.

T. J. CAMPBELL.

**AXUM** (AUXUME), a titular metropolitan see of ancient Christian Ethiopia. Its episcopal list, from about the middle of the fourth century to 650, is found in Gams (p. 462). Modern Axum is the capital of the Abyssinian province of Tigré, and nestles in a *kloof*, or valley, beneath a lofty peak of the Adoua mountains, at 7,545 feet above the level of the sea. Beneath it is a vast plain in which arise several streams tributary to the Nile. "The features of the place", says a recent traveller, "are very marked; firstly one comes across the large sacred enclosure, nearly a mile in circumference, thickly planted with trees and reeds, in the centre of which rises the cathedral, surrounded by the monastic buildings and the residence of the *Etchigeh*, or bishop. This enclosure occupies nearly the whole of the entrance to the valley; beyond it on the hill slopes are the houses of the inhabitants, whilst running up the valley is the long line of stupendous obelisks and beyond is the ancient tank or reservoir from which the inhabitants still get their water supply" (Bent, *The Sacred City of the Ethiopians*).

The city is of great antiquity, and was, together with Adule (Adoua on the coast) known to the Greeks and Romans as the chief centre of trade, with the interior of Africa, for gold-dust, ivory, leather, hides, and aromatics. The population is of mixed Ethiopic (negroid) and Arab origin, and is probably descended, in great measure, from an Arab colony settled on the coast at a very remote period. The numerous Himyaritic (Arabic) inscriptions in the vicinity exhibit the influence of Arabia; similarly the stone monuments with their evidences of sun and star worship. Moreover, it is well known that in the sixth century of our era the Kings of Abyssinia, then and long after resident at Axum, extended their sway over the Sabæan and Himyarite (Homerite) tribes of Yemen on the opposite Arabian shore. Greek influences are also traceable in the architecture of Axum and from a very early date, probably from the days of the Ptolemies of Egypt. In other words, this "sacred city of the Ethiopians" has been from time immemorial an outpost of ancient civilization against the mass of African barbarism. Axum became a Christian city in the time of St. Athanasius of Alexandria, who consecrated its first bishop, St. Frumentius, still honoured as the great patron of Abyssinia; since which time (c. 330) the Abyssinian Church has remained in close dependency on the Church of Alexandria, and yet receives from Egypt its chief ecclesiastical officer, the Abouna. There is still extant (P. G., XXV, 635) a famous letter of the Emperor Constantius (337-361) to Aëzanes, the King of Axum, ordering him to send Frumentius to Alexandria to receive the Arian doctrine from the heretical successor intruded in the place of Athanasius. The other principal ecclesiastics resident at Axum are the above mentioned *Etchigeh* (*Etchagué*), or principal bishop, always a native; the *Nébrid*, a kind of arch-deacon or head of the priesthood and rector of the

cathedral; the *Lij Kaneat*, or judge in ecclesiastical matters, together with monks and priests of various grades. There are also many persons known as *defteras*, described as "lay assistants in all the services, acting as singers and performers in all the church ceremonies; the scribes, advocates, and doctors of Abyssinia and the most instructed and intelligent people of the land" (Bent, *op. cit.*, 161).

Axum claims to hold in the innermost recesses of its cathedral the original Tables of the Law and the *tabout*, or Ark of the Covenant that the Abyssinians say was brought from Jerusalem to their ancient fortress of Ava by Menelek, the son of Solomon, and the Queen of Sheba, and transferred later to Axum. The palace of that famous Queen is also shown at Axum. Until 1538 Axum was both the civil and religious centre of Abyssinia. In that year, it was captured by Mohammed, Prince of Lella, since which time the Negus resides at Gondar. The cathedral is a fine edifice, and was built in the sixteenth century during the period of Portuguese influence in Abyssinia, but on the substructure of a very ancient Christian church. It has a flat roof and battlements, and there is a corridor outside where the priests dance and sing. Around the cathed-

THE OLD CATHEDRAL, AXUM

dral are many large shade-trees beneath which are built smaller churches or treasuries, in which are stored valuables of all kinds. Its sacred enclosure is not only the centre of ecclesiastical life, but also one of the most honoured sanctuaries in Abyssinia, where any criminal can find shelter by ringing the bell in the porch and declaring three times in a loud voice his intention of claiming a refuge. Women are not allowed to enter it. Indeed, all Axum is practically a sacred, inviolable refuge, for which reason the people en-

joy a condition of peace and tranquillity unknown elsewhere in Abyssinia (Bent, 163).

Very interesting are the numerous stone pedestals that once bore metal statues of the pre-Christian kings of Axum, memorials of victory, and the stone monoliths and obelisks, fallen or standing, estimated by Bent at about fifty. The latter form "a consecutive series from very rude unhewn stones up to the highly finished and decorated obelisks, and it is highly probable that we have here the origin and development of the obelisk side by side" (Bent, 132). The only standing obelisk of the decorated kind, highly carved with sham doors and beam ends, in imitation of a many-storied edifice, is nine stories high, and ends with a semi-circular finial, on which is still to be seen a representation of the solar disk. "In other words," says Mr. Bent (p. 185) "we have before us a perfect representation of the Beth-el or House of God terminating in the firmament, in which the Sabæan sun-god is supposed to reside." Altars for animal sacrifices were fitted to the bases of these obelisks; several of them are still visible. Mounds and rubbish heaps are scattered about the sacred enclosure at Axum that doubtless contain many objects of profane and ecclesiastical interest.

Near the cathedral is a square enclosure with a pillar at each of its angles, and in the centre twelve stones that Abyssinian tradition says were for the twelve judges of Prester John, but are probably the bases of ancient triumphal thrones of the Kings of Axum. Among the valuable Ethiopic manuscripts found in Abyssinia in modern times is the Book of Axum, or Abyssinian Chronicles, brought back by the traveller Bruce. In 1805 the English traveller, Salt, discovered at Axum a bilingual inscription in Greek and Gheez (the religious language of Abyssinia) of which only the Greek (thirty-one lines) remains. It refers to the exploits of King Aezanes, already mentioned. In 1833 the German traveller, Ruppell, discovered two other Gheez inscriptions, referring to the deeds of a monarch of Axum in the sixth century. These Gheez inscriptions are valuable for the history of the Semitic alphabet. Some Greek coins, older than the fourth century have been found there, also Ethiopic coins of a somewhat later date, bearing the title, "Negush Aksum", or King of Axum.

THOMAS J. SHAHAN.

**Ayacucho**, or GUAMANGA, DIOCESE OF.—A Peruvian diocese, suffragan to Lima. The See of Guamanga was erected by Paul V, 20 July, 1609, was vacant from 1821 to 1838, when it was transferred to Ayacucho. It has 200,610 Catholics; 96 parishes, 120 secular priests, 212 churches or chapels.

BATTANDIER, *Ann. Pont. Cath.*, 1907.

**Ayeta**, FRAY FRANCISCO DE, a Spanish Franciscan of the seventeenth century, and (while time and place of his birth and death are not known as yet, his memorable deeds having been overlooked and neglected until now) one of the most deserving and energetic characters of the end of that century in New Spain or Mexico. He became successively Visitor of the Province of the Holy Evangel of New Mexico, and its Procurator at Madrid; also Commissary of the Inquisition in New Spain. The decline in useful activity among the regular orders in Mexico, which began about the middle of the seventeenth century, being taken as a pretext by the secular authorities for despoiling the regulars of their missions, Ayeta became one of the most fervent defenders of the Franciscans, and he wielded a very aggressive pen. Three books are known to have been published by him, all without date and place; an "Apología del orden de San Francisco en América", which is supposed to have appeared about 1690; "Defensa de la provincia del Santo Evangelio de México sobre la retención de los curatos y doctrinas"; and "Último recurso de la provincia de San José de Yucatan sobre despojo de parroquias". Ayeta investigated in person the most remote missions, especially those of New Mexico, and he was the first to warn the Spanish authorities of the storm then preparing among the Pueblo Indians. His report, from 1678, in which he exposed the defenceless condition of the New Mexican colony as against the wild Indians, and the dangerous impression which it had made upon the sedentary tribes, induced the authorities of New Spain to reinforce the garrison at Santa Fe, but it was too late. The Pueblos broke out on the tenth of August, 1680, and for fourteen years New Mexico was lost to Spain. Ayeta hurried to El Paso, and when the fugitives from the North reached that post, to the number of two thousand famished and attenuated persons, Ayeta was the first to tender them the needed relief in food and clothing. He was a man of superior mind and indomitable energy, entirely devoted to his task and to his order.

BETANCOURT, *Crónica de la provincia del Santo Evangelio de México* (2d ed., Mexico, 1871); BÉRISTAIN DE SOUZA, *Biblioteca Hispano-americana setentrional* (Mexico, 1816), I; SARINANA Y CUENCA, *Oración fúnebre . . . en las exequias de veinte y uno religiosos de la observancia & ca. que murieron á manos de los Indios apóstatas del Nuevo México* (Mexico, 1681). This sermon is manifestly based upon the data furnished by Ayeta in a yet unpublished report on the priests who were murdered in 1680.—BANDELIER, *Histoire de la colonisation et des missions du Sonora, Chihuahua, Nouveau Mexique, et Arizona, jusqu'à l'an 1700* (MSS. at the Vatican, 1888). See also *Documentos para la historia de México* (third series, very rare); and BANDELIER, *Documentary History of the Zúñi Tribe*, in *Journal Am. Arch.*, No. 1.

AD. F. BANDELIER.

**Ayllón**, LUCAS VÁSQUEZ DE, the Spanish discoverer of Chesapeake Bay, and the first of those daring navigators who tried to find a north-west passage from Europe to Asia, date of birth uncertain; d. 18 October, 1526. He was a member of the Superior Council in San Domingo. He sent an expedition to Florida under Francisco Gordillo, who, in June, 1521, landed in lat. 33° 30', somewhere near Cape Fear in North Carolina. In quest of the north-west passage, Ayllón came up from Hispaniola in 1524, and tried the James River and Chesapeake Bay. He received from Charles V a grant of the land he had discovered, and, in 1526, founded the settlement of San Miguel de Guandape, not far from the site of the city of Jamestown, built by the English fully eighty years later. The employment of negro slaves in this work is perhaps the first instance of negro slave-labour within the present territory of the United States. Ayllón died of ship fever, and of the colony of 600 souls he had brought with him only 150 survivors made their way back to Hispaniola.

EDWARD P. SPILLANE.

**Aylward**, JAMES AMBROSE DOMINIC, theologian and poet, b. at Leeds, 4 April, 1813; d. at Hinkley (England), 5 October, 1872. He was educated at the Dominican priory of Hinkley, entered the Order of St. Dominic, was ordained priest in 1836, became provincial in 1850, first Prior of Woodchester in 1854, and provincial a second time in 1866. He composed several pious manuals for the use of his community and "A Novena for the Holy Season of Advent" gathered from the prophecies, anthems, etc., of the Roman Missal and Breviary (Derby, 1849). He re-edited (London, 1867) a "Life of the Blessed Virgin St. Catherine of Sienna", translated from the Italian by the Dominican Father John Fen (Louvain, 1609), also an English translation of Father Chocarne's "Inner Life of Lacordaire" (Dublin, 1867). His essays "On the Mystical Elements in Religion, and on Ancient and Modern Spiritism" were edited posthumously by Cardinal Manning (London, 1874). Father Aylward's principal monument is his translation of Latin hymns, most of which he contributed to "The Catholic Weekly Instructor". In his "Annus Sanctus" (London, 1884) Orbey Shipley has reprinted many of them. He says of Father Aylward that he was "a cultured and talented priest of varied powers and gifts."

JULIAN, *Dict. of Hymnology* (New York, 1892), 105; GILLOW, *Bibl. Dict. of Eng. Cath.*, I, 90, 91.

THOMAS J. SHAHAN.

**Aymará**, also AYMARA (etymology unknown as yet), a numerous tribe of sedentary Indians inhabiting the northern sections of Bolivia, part of the eastern declivities of the Andes of that republic, and the sections of Peru bordering upon Lake Titicaca, except its northern extremity, which is held by Quichua-speaking Indians. It is not safe as yet to give their numbers, since white blood has been liberally introduced during three centuries, while on the eastern slopes, in the so-called Yungas, mixture

with negroes has been frequent. Still there are certainly several hundred thousands of them, counting in such *mestizos* (Cholos) as live according to Indian customs. The name "Aymará" rather applies to the language, which seems allied to the Quichua, or prevailing Indian idiom of the Peruvian mountains and of the southern part of the Bolivian highlands. The Aymará are chiefly mountaineers, inhabiting the elevated table land, or *Puna*, between the eastern Cordillera and the volcanic coast chain. Limited agriculture, the raising of potatoes and kindred tubers, of *quinua* (*chenopodium quinua*), maize in the few places where it will thrive at the general altitude of over 12,000 feet of the table land. The raising of the llama and alpaca and of some cattle and donkeys, are their

chief occupations, also service in the cities as journeymen, and on the lake-shore as stevedores. They live in tribal communities (*estancias*), autonomous, and with executive officers (*hilacata* and *alcalde*) whom they choose after the indications of their chief medicine-men, to be afterwards confirmed by the civil authorities of Bolivia. Duration of office is mostly one year. They pay a *per capita* tax, are not subject to military duty in theory, and are

AYMARÁ NATIVES

seldom required to perform any. Many of these Indians, while apparently indigent, possess no little wealth, chiefly in coin. Some of them are also artisans. They are nominally Catholics, but preserve a remnant of ancient idolatry, with its rituals and ceremonies, carefully hidden from outsiders. In appearance stolid and humble, they are in fact a cruel, treacherous stock, averse to every attempt at progress, hostile to the whites, particularly to foreigners. But they sometimes make good house servants. They were first visited by the Spaniards in the last days of 1533, whom they received well, owing to their hatred of the Inca tribe of Cuzco. The latter had overrun most of the Lake territory in the course of the fifteenth century and established themselves on the Islands of Titicaca and Koati (see articles) and at Copacavana on the mainland. The relations between the Kollas—as the Quichua call the Aymará to this day (see KOLLAO)—and the Incas were not friendly. The Spaniards were at first treated with hospitality, but as soon as they returned in greater numbers the western and southwestern Aymará rose in arms and had to be repressed by force. During the civil wars (1538 to 1554) the Aymará remained passive and suffered (like the rest of the Peruvian Indians) from the consequences. Uprisings of Aymará groups against the Spaniards began in 1629, and local disturbances (in many of which the Indians were at fault) continued. In 1780 a general uprising began among the Aymará of western Bolivia, but there was no concerted action, and although there were terrible massacres, and the investment of La Paz by the Aymará almost ended in the capture of that city,

the Indians were finally subdued in 1782. Since then they have remained comparatively quiet. While a necessary and important element as land-tillers and freighters, journeymen and house servants, they would be, on account of their numbers, a steady menace to Bolivia, were it not for their incapacity for united efforts, their adherence to primitive customs preventing any submission to a common leader. With the coming introduction of railways in Bolivia, the Aymará will have to submit, and modify their habits and customs.

The earliest and best description of the northern and central Aymará is found in the *Relazione per Sua Maestà*, written 15 July, 1534, by PEDRO SANCHO in the name of Pizarro and officers, and published (in Italian) by RAMUSIO in vol. III (1585).—*Relación del Sitio del Cuzco*, 1539 (Madrid, by JIMENEZ DE LA ESPADA); Cieza, *Parte primera de la crónica del Perú* (Antwerp, 1555); *Segunda Parte* (Madrid); JUAN DE BETANZOS, *Suma y Narración de los Incas*, 1551 (recent publication at Madrid); GARCILASSO DE LA VEGA, *Comentarios reales de los Incas* (Lisbon, 1609); OVIEDO, *Historia, general y natural de las Indias* (Madrid, 1850); HERRERA, *Historia general de los Hechos de los Castellanos en las Islas y Tierra firme del Mar Océano* (1729, etc.); ANELLO OLIVA, *Historia del Perú* (Lima, without date)—this history was written in 1631.—BERNABÉ COBO, *Historia del Nuevo Mundo*, 1653 (Seville, 1803). Of later works I only refer to WIENER, *Perou et Bolivie* (Paris, 1880) and to the works of Dr. MIDDENDOORF.—The Aymará idiom appears first in literature in 1583. *Catecismo en la Lengua Española y Aymará del Perú, Ordenado por autoridad del Concilio Provincial de Lima* (Lima, 1583); *Tercer Catecismo y Exposición de la Doctrina Cristiana, por Sermones* (Lima, 1586); BEATONIO, *Arte de la Lengua Aymará* (Rome, 1603); IRENA, *Vocabulario de la Lengua Aymará* (Juli, southern Peru, 1612). On the uprisings of the Aymará in 1780 to 1782, BALLIVIAN, *Archivo boliviano* (Paris, 1872); also ODRIOLZA, *Documentos históricos del Perú* (1863), I. A very rare work on the Aymará language and seldom consulted, is TOMAS RUBIO, *Arte de la Lengua Aymará* (Lima, 1616).

AD. F. BANDELIER.

**Aymeric of Piacenza**, a learned Dominican, b. at Piacenza, Italy; d. at Bologna, 19 August, 1327. Soon after his entrance into the Lombard province of the Dominican Order, he was sent (1262) to pursue his studies at Milan, where he formed a close friendship with Niccolò Boccasini, later pope under the name of Benedict XI (1303-04). After teaching philosophy and theology for twenty-four years he was elected Provincial of Greece. In this capacity he travelled to the Chapter General of Toulouse in May, 1304, where a successor to Bernard de Jusix was to be elected, but just before the first session renounced his office and vote, with the consent of the pope. That this act of humility was the cause of his election to the master generalship of the order is the unanimous verdict of all its chroniclers. His first care was to regulate studies in those provinces where the opposition of the Fraticelli to intellectual pursuits had been most felt. He definitely determined the qualifications for degrees in the order. Oriental languages were no less encouraged by him than natural sciences. In 1309 Clement IV enjoined on Aymeric who was on his way to the chapter of Saragossa in Spain, to examine into the charges brought against the Templars. He found little to complain of. In 1310 he was summoned to the Council of Vienne to take part in the process of the Templars. In the meantime, however, he resigned his office, and thus avoided the displeasure of Clement IV, whose policy he never heartily endorsed. At the same time, as he candidly avowed, he was saved from acting against the dictates of his conscience. He is the reputed author of a treatise against the heretics of his day, and of works on moral, dogmatic, and scholastic questions, none of which are known to be extant. Montfaucon (*Diarium Italicum*, xxvii) speaks of a curious present given by Aymeric to the convent of Bologna. It was the Pentateuch in Hebrew and learned Jews of the time declared that the manuscript had been written by Esdras. "Although this smacks of the fabulous", cautiously remarks Montfaucon, "... still it cannot be denied that the codex appears to have been

old when given to Aymeric". As a man of letters Aymeric was in close touch with the learned men of his time. Pietro Crescenzo of Bologna completed his "*De Re Rustica*" at the repeated solicitations of Aymeric, by whom it was corrected before the author presented it to Charles II of Sicily. The letters of Aymeric are found in "*Litteraræ Encyclicæ Magistrorum Generalium Ord. Præd.*" (ed. Reichert, Rome, 1900), which forms the fifth volume of the "*Monumenta Hist. Fratr. Præd.*" (181-202).

TIRABOSCHI, *Storia della litt. Ital.*, V, I, 152-153; QUÉTIF AND ECHARD, *SS. Ord. Præd.*, I, 494 sq.; MORTIER, *Histoire des Maîtres Généraux de l'ordre des Frères Prêcheurs* (Paris, 1905), II, 420-473; KAUFMANN in *Der Katholik*, Feb., 1900. THOS. M. SCHWERTNER.

**Azara, FÉLIX DE**, a Spanish naturalist, b. at Barbuñales in Aragon, 18 May, 1746; d. 1811. He first embraced the military career as an engineer, distinguished himself in various expeditions, and rose to the rank of Brigadier General in the Spanish Army. He was appointed member of the Spanish commission sent to South America, in 1781, to settle the question of limits between the Portuguese and Spanish colonies. He remained in South America till 1801. While there he turned his attention to the study of mammals, less as an anatomist or physiologist than as an observer of the life and habits of quadrupeds. His observations, to which he added a large number of statements obtained by hearsay, were not always favourably criticized, but to-day the perspicacity of Azara as a student of the life of South American mammals is generally acknowledged. He also extended his investigations to birds. Before leaving South America, he sent his brother (then Spanish Ambassador at Paris) many notes and observations of a zoological nature, which Moreau de Saint-Méry published at Paris in 1801 under the title of "*Essai sur l'histoire naturelle des quadrupèdes du Paraguay*". In 1802 there appeared at Madrid "*Apuntamientos para la Historia natural de los cuadrupèdes del Paraguay y Río de la Plata*". In the same year Azara published "*Apuntamientos para la Historia de los pájaros del Paraguay y Río de la Plata*". In 1809 there appeared at Paris under his name "*Voyage dans l'Amérique méridionale depuis 1781 jusqu'en 1801*". In the latter work he criticizes the Jesuit methods of organizing and educating the Indians, showing that he completely failed to understand the nature of the American aborigines. Azara, while an efficient soldier and good engineer, as well as shrewd observer of animal life, was incapable of understanding the character of the Indian, and of grasping the only method by which the Indian could slowly but surely be civilized.

*Geografía física y estética de las provincias del Paraguay y misiones Guaraníes, compuesta en el año 1790* (Montevideo, 1904, with portrait and biography by SCHULLER); TCHUDI, *Peru Reisekizzen* (St. Gall, 1846); IDEM, *Fauna peruana*; BREHM, *Das Tierleben* (3d ed.); and the works of Azara himself, enumerated in article.

AD. F. BANDELIER.

**Azaria, ARISTACES**, a Catholic Armenian abbot and archbishop, b. at Constantinople, 18 July, 1782; d. at Vienna, 6 May, 1854. He was sent at the age of fifteen to the College of the Propaganda in Rome, but his studies were interrupted (1798) by the French invasion. Having taken refuge among the Mechitarists of Triest, he entered their order in 1801, and in the same year was ordained priest. The authorities of the ephemeral Kingdom of Illyria confiscated (1810) the property of his convent, and, after vain attempts to obtain restitution, the monks settled in Vienna, where they lived by the instruction of Armenian youth and the revenue of a printing-press. Azaria was henceforth active as a missionary among his compatriots and a servant of the Holy See. In 1826 he was made general abbot of the community, and in 1827 was raised to the (titular) dignity of

Archbishop of Caesarea. Under him the Mechitarist community in Vienna prospered, its library was increased, a bookstore added to the printing-press, and an abundant religious literature created, in Armenian and in German. He opened houses of his community in Rome, Triest, and Stamboul, founded the Armenian journal "*Europa*", established an academy for the literary and political improvement of his people, and obtained from the Porte (1830) the creation of an independent Catholic Armenian patriarchate. He wrote several (mostly anonymous) works, among them "*De Vita Communi Perfectæ Religiosorum Utriusque Sexus*", in which he criticizes the condition of many Austrian religious houses, and "*Die Erziehung im Geiste des Christenthumes*" (Vienna, 1839). After a visit to Rome (1850) in the interest of monastic reform, he returned to Vienna (1852) where he died after the celebration of his golden jubilee.

HERGENROTHER in *Kirchenlex.*, I, 1768.

THOMAS J. SHAHAN.

**Azarias, BROTHER** (PATRICK FRANCIS MULLANY), educator, essayist, littérateur, and philosopher, b. near Killenaule, County Tipperary, Ireland, 29 June, 1847. His education began at home, and after the removal of his family to Deerfield, N. Y., U. S. A., was continued in the union school of that place, and subsequently in the Christian Brothers' Academy at Utica. Believing himself called to the life of a religious teacher, he entered the novitiate of the Brothers of the Christian Schools, in New York City, on the 24th of February 1862. He taught in Albany, New York City, and Philadelphia until 1866, when he was called to the professorship of mathematics and literature in Rock Hill College, Ellicott City, Md. Gradually his interests were diverted from mathematics and were absorbed by literature and philosophy, which, with pedagogy, continued to hold them until the end of his career. From 1879 to 1886 he was President of Rock Hill College. Then followed two years of research in European libraries, chiefly those of Paris and London. On his return to the United States, he became professor of literature in De La Salle Institute, New York City, and remained such till his death at the Catholic Summer School, Plattsburgh, 20 August, 1893. The funeral services held in St. Patrick's Cathedral, New York City, gave ample testimony to his widespread influence and to the esteem in which he was held.

The secret of his success is to be found in his deep reverence for the apostolate of teaching, a reverence which found expression beyond the walls of the class room. He was a frequent contributor to the "*Catholic World*", the "*American Catholic Quarterly Review*", and the "*American Ecclesiastical Review*", and his name appears in the files of the "*Educational Review*" and of the "*International Journal of Ethics*". His lectures bore the stamp of culture and scholarship. The most notable are these:—"*The Psychological Aspects of Education*", delivered before the Regents' Convocation, University of the

BROTHER AZARIAS

State of New York, 1877; "Literary and Scientific Habits of Thought", before the International Congress of Education, 1884; "Aristotle and the Christian Church", before the Concord School of Philosophy, 1885; "Church and State", before the Farmington School of Philosophy, 1890; "Religion in Education", before the New York State Teachers' Association, 1891; "Educational Epochs", before the Catholic Summer School, 1893. At the time of his death, he was engaged in preparing a "History of Education" for the International Education Series.

His first work as an independent author appeared in 1874, with the title, "An Essay Contributing to a Philosophy of Literature" (seventh edition, 1899). It is an excellent key both to his method of study and to the plan of presentation to which he consistently adhered in subsequent works and addresses. Renan and Emerson had attempted to make literature a substitute for religion in cultured circles; with characteristic insight and modesty, Brother Azarias proves in this essay that literature draws its life and excellence from religion. He divides the book into three parts: Facts and Principles, Theory, and Practice. In the first he discusses the nature, origin, and function of literature, examines its relation to language and architecture, and formulates the law of literary epochs. He then presents the salient features of the pre-Reformation ages, and argues that the Elizabethan era of letters was the fruit of the seeds of Catholicism that had been planted and nurtured in early Britain. After contrasting ancient and modern literature, he examines the principles of those philosophic systems that have most influenced modern thought. In the light of these results he studies the literary artist, the morality which is binding on him, and the canons that should guide him in his work. The book is of great value in giving the student correct principles of orientation.

"The Development of Old English Thought" (third edition, 1903) appeared in 1879 as the first part of a projected course in English literature, which, however, was never completed. The author begins with sketching the "continental homestead" of the English; he then contrasts the Celt and Teuton, examines the pagan traditions on which Christian literature was engrafted, and concludes with charming pen pictures of Hilda, Cædmon, Benedict Biscop, and the Venerable Bede. The period covered is the first thousand years of the Christian era.

"Aristotle and the Christian Church" (London and New York, 1888) sets forth the attitude of the Catholic Church towards Aristotelean philosophy in the thirteenth and fourteenth centuries, shows the difference in spirit between the Stagirate and the Schoolmen, and accounts in part for this by tracing the growing influence of Aristotle in the West and in the East until the two streams of thought converged to swell the tide of Scholasticism. This essay was commended by Cardinal Manning.

"Books and Reading" (seventh edition, New York, 1904) was originally a reprint of two lectures delivered before the Cathedral Library Reading Circle of New York City, 1889. The later editions of the work, while more developed and extended than the first, yet suffer from two disadvantages, the omission of an index and of suggestive courses of reading and study. The book attempts to make literature in general, and Catholic literature in particular, a living force for those even who have not received the benefits of higher education.

"Phases of Thought and Criticism" (1892) is an interesting study of the spiritual sense and its culture. In developing his thesis, Brother Azarias draws a striking contrast first between Newman and Emerson as typical thinkers, and then between the "habits of thought engendered by literary pursuits and those begotten of scientific studies." The fol-

lowing chapters are concerned with the spiritual sense of three great masterpieces, "The Imitation of Christ", the "Divina Commedia", and the "In Memoriam", each of which, to quote his own words, "expresses a distinct phase of thought, and is the outcome of a distinct social and intellectual force". This volume is among the most admired of his writings for thought, style, and method.

Of his minor works the most charming is "Mary, Queen of May", which was written for the "Ave Maria". It exhales the faith and trust of a devout client, and reveals those finer qualities of head and heart which bound Brother Azarias so firmly to his order and won him so many friends. After his death many of his contributions to reviews were gathered and published in three volumes, viz. "Essays Educational", "Essays Philosophical", and "Essays Miscellaneous" (1896). The first of these includes the lectures delivered at the Catholic Summer School, just before his death; the second reprints as its most notable paper the lecture on "Aristotle and the Christian Church", adding thereto the "Nature and Synthetic Principle of Philosophy", the "Symbolism of the Cosmos", "Psychological Aspects of Education", and "Ethical Aspects of the Papal Encyclical on Capital and Labor". The best papers in the third volume are "Religion in Education", "Our Catholic School System", and "Church and State"; of the remaining numbers two are literary in subject, and the third is also found in "Phases of Thought and Criticism".

SMITH, Brother Azarias (New York, 1897); *Addresses and Letters read at the Memorial Meeting in Honor of Brother Azarias* (Washington, 1894); HARDY, *Educational Review* (December, 1893); *The Rosary* (October, 1893); HENRY, Brother Azarias—*Threnody*, *Am. Cath. Q.*, January, 1894; STEDMAN-HUTCHINSON, *Library of American Literature*.

BROTHER CHRYSOSTOM.

**Azevedo, IGNATIUS, BLESSED.** See IGNATIUS.

**Azevedo, LUIZ DE,** Ethiopic missionary and scholar, b., according to the more probable narration of Franco (Imagem da Vertude em o Noviciado de Coimbra, 359-61), at Carrazedo Montenegro, in the Diocese of Braga, Portugal, in 1573; d. in Ethiopia in 1634. He became a Jesuit in 1588, and sailed for the Indies in 1592. In 1605 he began his missionary labours in Ethiopia, where he remained until his death. Azevedo was called the Apostle of the Agaus, and is justly reckoned among the most illustrious of the Doctors of the Church of Ethiopia, to which he reclaimed many schismatics. He translated into Chaldaic the commentaries of Father Toleus on the Epistle of St. Paul to the Romans, and those of Francis Ribera on the Epistle of St. Paul to the Hebrews; the "Canonical Hours", the "Office of the Blessed Virgin Mary", and other works. He is the author of a grammar of the Ethiopic language, and translated into the same tongue the New Testament, a Portuguese catechism, instructions on the Apostles' Creed, and other books of the same nature.

**Azor, JUAN,** b. at Lorca, province of Murcia, Southern Spain, in 1535; entered the Society of Jesus, 18 March, 1559; d. in Rome, 19 February, 1603. He was professor of philosophy and later of theology, both dogmatic and moral, at Piacenza, Alcalá, and Rome, and was a member of the first committee appointed by the Father General Acquaviva to draw up the famous "Ratio Studiorum". Father Azor was a man of wide and solid learning, deeply versed in Greek, Hebrew, and history, as well as in his more special branch of theological science. His chief title to general remembrance rests on his classical work on moral theology, in three folio volumes: "Institutionum Moralium, in quibus universæ quæ-

tiones ad conscientiam recte aut prave factorum pertinentes breviter tractantur pars 1<sup>ma</sup>”, the first volume of which appeared at Rome in 1600, the second six years later, and the last in 1611. The work met with flattering success in Rome and at all the Continental seats of learning, and was honoured by a special Brief of Clement VIII. Numerous editions were brought out at Brescia, Venice, Lyons, Cologne, Ingolstadt, Paris, Cremona, and Rome. The work continued to hold its lofty position during the succeeding centuries, was strongly recommended by Bossuet in his synodal statutes, and was held in highest regard by that master in moral theology, St. Alphonsus Liguori. Gury speaks of Father Azor as “a moderate Probabilist, in wisdom, in depth of learning and in gravity of judgment taking deservedly high rank among theologians”. There are extant in MS. other works by Father Azor; in Rome, in the Jesuit archives, a commentary on the Canticle of Canticles; at Würzburg, an exposition of the Psalms, and at Alcalá several theological treatises on parts of the “Summa” of St. Thomas.

ARTHUR J. McCaffray.

**Azores** (Portuguese *Açores*, “Falcons”), an archipelago situated in that tract of the Atlantic Ocean which is known to mariners as the Sargasso Sea. The islands lie, approximately, from S. E. to N. W., about a diagonal of the quadrilateral formed by the 37th and 40th parallels of north latitude and the 24th and 32d meridians of west longitude. Their distribution may be considered as forming three subgroups: the relatively large islands of São Miguel and Santa Maria, to the extreme south-east; Fayal, Pico, São Jorge, Terceira, and Graciosa about midway, Terceira being about 880 geographical (1012 English) miles from the Portuguese coast; Flores and Corvo on the extreme north-west. These nine islands, aggregating in area about 922 square miles, vary greatly in size, from São Miguel, with an area of 288, to Corvo, with an area of not more than 5 square miles. The Formigas and other tiny islets throughout the archipelago are of no importance except as perils to navigation.

Physically, the Azores are in general characterized by the bold and irregular conformation usually found in islands of volcanic origin. The snow-capped volcano which is the predominating feature of Pico rises to a height of 8500 feet; the Vara, in São Miguel, is more than 5500 feet; but the crater of the Sete Cidades volcano, also in São Miguel, is said to be not more than 866 feet above the sea level. The volcanic character of these islands is also unmistakably shown by the recurrence in their mountain-formations of more or less extinct craters (locally called *caldeiras*—“kettles”), one of which, the Caldeira of Graciosa, forms a steaming lake of pitch. Almost all the islands contain mineral springs, the best known of which are in São Miguel, Terceira, Graciosa, and Flores. As might be expected, the Azores are specially subject to earthquakes; in 1522 the city of Villa Franca, in São Miguel, was destroyed, with, it is said, 6000 of its inhabitants, by an earthquake, and another earthquake, in June, 1811, is memorable for the birth, about two miles off the coast of São Miguel, of the little island which was named Sabrina after the British warship that was present at, and reported, the phenomenon. The climate, though mild and equable, is extremely humid, the number of rainy days in the year averaging about 163, or not far from 50 per cent, and producing a rainfall estimated at very nearly 39 inches; snow never falls, except on the highest mountains; the recorded minimum temperature is about 39 F., the maximum only 81 F. (very exceptionally as high as 86 F.), and the mean for all seasons 63 F.

**HISTORY.**—The existence of this archipelago was

not generally known to the inhabitants of Europe before the fifteenth century of our era, although there is evidence that Phœnician, Scandinavian, and Arabian navigators visited it at different periods. In 1432 the Portuguese, Gonçalo Velho Cabral, discovered the island of Santa Maria, and by the year 1457 all the islands had been visited by either Portuguese or Flemish explorers, none of whom found any aboriginal inhabitants, wild animals, or reptiles. In 1466 Afonso V of Portugal granted to the Duchess Isabel of Burgundy, his aunt, some sort of feudal privilege in the Azores, in consequence of which the colonists for some time were mostly Flemings, and the Portuguese themselves in those days called the islands *As Ilhas Flamengas* (the Flemish Islands). The first Portuguese colonies of any importance in the Azores were those of São Miguel, and Terceira, and at the end of the fifteenth century a certain number of the Moors, driven from Granada by Ferdinand and Isabella, took refuge in the islands.

It was not until 1534 that the ecclesiastical organization of the Azores was effected. Until then they had been under the jurisdiction of the Grand Prior of the Order of Christ. The Bull of Pope Paul III, dated 5 November, 1534, immediately after that pontiff's accession to the Apostolic See, formed a diocese with its metropolis at Angra do Heroísmo, in the island of Terceira, to include the whole of this archipelago. The See of Angra was made suffragan to that of Funchal, but in 1547 it was removed from this jurisdiction and placed under that of the then Archiepiscopal (now Patriarchal) See of Lisbon. From 1580 to 1640 the Azores, like the rest of the Portuguese dominions, had to submit to the rule of Spain, and during that period the neighbouring waters were the scene of many hard fights between the Spanish and the English sea-rovers. The commercial prosperity of the islands declined after the recovery of Portuguese independence and the accession of the House of Braganza in 1640. The city of Angra attained some slight historical notoriety in 1662, when Afonso VI, deposed by his brother Dom Pedro, was imprisoned there. Material prosperity began to be restored in the Azores immediately after the period of the French invasion of the Peninsula and the flight of João IV to Brazil (1807), when the former restrictions of commerce were removed. In the Portuguese revolution of 1828–33, the Azorean populations took a decided stand against the absolutist Dom Miguel, repulsed an attack upon the island of Terceira by a Miguelist fleet, and contributed largely to form the *Progressista* army which landed at Oporto in 1833, driving Dom Miguel into exile, and establishing on the throne the Queen Donna Maria da Gloria, who for two years preceding had resided at Angra.

**PRESENT CONDITIONS.**—The Azores are not a colony, nor a foreign dependency of Portugal, but an integral part of the kingdom. His Most Faithful Majesty is represented in the islands by a governor residing at Angra, which is regarded as the political capital; at the same time the inhabitants are on a legislative and fiscal equality with those of the Portuguese mainland, being regularly represented in the Cortes at Lisbon. The total population of the archipelago in the year 1900 was 256,291 (i. e. 277.9 to the square mile), mostly of Portuguese origin, though of course with considerable intermixture of Flemish and Moorish blood, with traces of immigration from the British Isles, and a sprinkling of negroes.

Economically, the people of the Azores depend chiefly upon agriculture, this term being taken as including the production of wine. Most of the wine produced in the archipelago comes from the island of Pico, and, under the name of Fayal wine, derived from the port whence it was shipped, used to be famous in bygone days. The area exclusively de-

voted to vineyards is about 9500 acres (nearly 15 square miles), producing nearly 1,000,000 gallons of wine annually. Wheat and a large variety and abundance of fruits are grown in the valleys. Some 6000 men are employed in the fisheries, and the value of their annual catch amounts to about \$175,000. The populations of Terceira, São Jorge, and Graciosa, numbering about 72,000, manufacture cheese, butter, soap, linens, woollens, bricks, and tiles; in Fayal, Pico, Flores, and Corvo a population of 58,000 are chiefly engaged in basket-weaving and the fashioning of small fancy articles from the pith of the fig tree. The latest available statistics give the total of shipping annually clearing and entering all the ports of the Azores as 2,052,792 tons, with a total value of exports and imports \$1,050,000.

The people are, with rare exceptions, Catholics. Werner (*Orbis Terrarum Catholicus*, s. v.) says that there are only about 100 Protestants and 30 Jews in the whole Diocese of Angra. This diocese contains 110 parishes and many subsidiary churches and chapels; the cathedral of Angra, under the invocation of the Saviour (São Salvador) has its full staff of dignitaries and a chapter of twelve canons, and there is a seminary which prepares 120 students for the priesthood. The secular clergy number 353 besides which there are eight religious houses in Terceira and fifteen, including four convents of female religious, in São Miguel. The population of the cathedral city is about 11,000, that of Ponta Delgada, in São Miguel, exceeding it by about 6000.

#### Azotus. (Heb. *Ashdodh*; in Sept. *Ἀζωτος*.) (1)

One of the five great cities of the Philistines (Jos., xiii, 3), the modern Esdud, situated three miles from the Mediterranean Sea, about half-way between Gaza and Jaffa. The temple of Dagon, whither the Ark of the Covenant was carried by the Philistines, was situated here (I K., v, 1-5; I Mach., x, 83; xi, 4). Azotus, like other Philistine cities, suffered varying fortunes in the wars with Israel, Assyria, and Egypt. Ozias fought against it (II Paral., xxvi, 6), Sargon besieged and took it (Isaias, xx, 1; Schrader, "Keilinschriftliche Bibliothek", II, 66-67), and Sennacherib did likewise (Schrader, op. cit., II, 90-91). According to Herodotus, Psammetichus besieged the city for twenty years. In 163 B. C. Judas Machabeus cleared Azotus of idols (I Mach., v, 68), and in 148 B. C. Jonathan and Simon burnt the temple of Dagon (I Mach., x, 83-84). To-day Esdud is a modern village, with many ruins attesting its glorious past. In the New Testament Azotus is mentioned in connexion with Philip's return from Gaza (Acts, viii, 40). (2) The mountain to which Bacchides pursued the Jews in battle (I Mach., ix, 15).

F. X. E. ALBERT.

AZOTUS, a titular see of Palestine, near the sea-coast, between Jaffa and Ascalon. Its episcopal list (325-536) is given in Gams (452). It is the Ashdod of the Book of Josue (xv, 47), was one of the five principal cities of the Philistines, and the chief seat of the worship of their god Dagon (I Sam., v, 1-7). Herodotus mentions it (II, 157) as having withstood King Psammetichus of Egypt in a siege of twenty-nine years, the longest then known.

THOMAS J. SHAHAN.

**Aztecs**, probably from *Aztal* (heron), and *Tlacatl* (man), "people of the heron", in the Nahuatl, or Mexican, language of Mexico, a surname applied to the tribe of the Mexica, or Chichimeca Mexitin (whence *Mexico* and *Mexicans*), a ramification of

the Nahuatl linguistic stock which occupied aboriginal Mexico, in more or less contiguous groups, at the beginning of the sixteenth century, when the Spaniards first came into contact with them. The Mexica proper held only a group of islands about the centre of Lake Tezcuco, and one or two minor settlements on the shore. In 1519 the tribe numbered about thirty thousand souls of all ages and sexes, and was able to put into the field eight thousand warriors. By far the greater part of the population was concentrated in the central settlement called Tenochtitlan (from *teitl*, "stone", *nochtli*, "prickly pear", and *tlan*, "place", or "site"), which was founded, as is generally admitted, about the year A. D. 1325. Until their settlement upon the lake, the history of the Mexican tribe is uncertain. Data, in the shape of picture-writings, are fragmentary, except such as were executed in the sixteenth century by Indians, under the impulse of the viceroys or of ecclesiastics. These documents record constant shiftings of the tribe from points which are as yet undetermined, like Aztlan (Place of the Heron) and Chicomoctoc (Seven Caves). These places are by most authorities located north of Mexico, and some colour is given to the assumption by the relationship traced between the Nahuatl language of Mexico and Nicaragua and the Shoshonian idioms of the North-west.

The Mexicans were the last of the Nahuatl-speaking Indians to reach the shore of the great Lake of Mexico. They found the valley occupied by several tribes of the same stock, and were received by these as intrusive destitutes. Thrust back and forth among these tribes for a number of years, and exposed to great sufferings, the feeble remnants of the Mexicans finally sought refuge on some sandy patches that protruded into the middle of the lake, and here they found, if not absolute, at least comparative, security. While in the beginning they had to subsist on aquatic food (fish and insects), they began to slowly increase in numbers. There being little space for tillage, they imitated a device in use among the tribe of Chalco; the construction of rafts which they covered with soil, and thus secured vegetable diet. Timber being obtainable only on the mainland, they resorted to adobe for the construction of shelters, and a settlement was gradually built up which gave promise of stability. Soon after their establishment in the lake, the Mexican tribe was composed of two groups; one of these was *Tenochtitlan*, the other bore the name of *Tlaltelolco*. Each of them having its own government, hostilities became inevitable, resulting in the defeat of the Tlaltelolco people. For some time after, the latter were held in a kind of servitude, until mutual resentment commenced to wear off. The overthrow of Tlaltelolco took place at the beginning of the fifteenth century, which is as near a date as we venture to assign, too close precision in dates previous to the conquest not being advisable as yet.

In the meantime, the other tribes speaking the Nahuatl idiom, who were established on the mainland (Tezcuco, Tlacopan, Atzacapozalco, Xochimilco, Chalco, etc.), alternately at peace and at war with each other, had not paid much attention to the Mexicans. About the time of the overthrow of Tlaltelolco, the Tecpanecas of Atzacapozalco obtained decidedly the upper hand and exacted tribute and servitude of their neighbours. They finally attempted to overrun the Aztecs also, and were successful for a short time, but the latter, directed by their war-chief, Moctecuzoma Ilhuicamina, and his colleague, the Cihuacohuatl Tlacaelel, formed an alliance with the tribes of Tezcuco and defeated the Tecpanecas, reducing them to a minimum of influence in the valley. Out of this alliance arose, in the middle of the fifteenth century, a formal league between the Mexicans, the tribe of Tezcuco, and that of Tlacopan,

offensive and defensive, after the manner of the "League of the Iroquois". The events preceding the formation of this league are stated in many ways, according as information has been obtained from one or the other of the tribes entering into it, each claiming, of course, the leading part; but it is certain that the Mexicans held the military leadership, and probably received the greater part of the spoils. From the formation of this league dates that extension of Mexican sway which has led to the erroneous conception of a primitive Mexican nationality and empire.

The first aggressions of the confederates were on the tribes of Xochimilco and Chalco, at the southern outlet of the valley. They seem to have been reduced to tribute and the condition of tributaries and military vassals. Then, in the second half of the fifteenth century, raids began upon Indian groups dwelling outside of the lake basin. These raids were conducted with great shrewdness. East of the valley, powerful tribes of the Nahuatl linguistic stock, such as Tlaxcala, Huexotzinco, Cholula, and Atlixco, grouped about the great volcano Popoca-tepetl, were carefully avoided at first. The war parties of the confederates circumvented their ranges, pouncing upon more distant groups, nearer the coast. The same thing took place with Indians south of the valley, where the League extended its murderous inroads to Oaxaca. The vanquished were either exterminated or dispersed, if they resisted too well or attempted to recover their independence; or else were reduced to the payment of a tribute, annually collected by special gatherers dispatched from the valley, and of whom the tributaries were mortally afraid. This tribute consisted of products of the land, and of human victims for sacrifice. Besides, the subjected tribes were bound to service in war. The social condition of the vanquished was unchanged; they kept their self-government, their autonomy. The extent of Mexican, in the sense of confederate, sway has been exaggerated; neither Yucatan nor Guatemala was affected, and what have been represented as Mexican "subjects", or "colonies", in those countries were tribes of Nahuatl language established in the South at a very early date, and having no connexion with Mexico and its Indians except the tie of common speech. Hence the so-called "Mexican Empire" was composed of a confederacy, territorially restricted to the lake basin, and outlying tribes, autonomous but tributary. All attempts of the Aztecs and their allies to overrun, in the manner above described, the more powerful tribes residing even in their immediate vicinity, failed. An attack on the Tarascans of Michuacan under the war-chief Axayacatl, about 1475, resulted in disastrous defeat. The wars with Tlaxcala, Cholula, and Huexotzinco, as well as with Atlixco, ended usually in drawn battles, with no decisive advantage for either side. Still, it is not unlikely that the confederates would ultimately have succeeded, since they had, through their raids on the coast-tribes, cut off their adversaries from the supply of salt, and also surrounded them almost completely, cutting off their resources in the direction of the sea.

This was the condition of affairs when, in 1519, Cortez landed at Vera Cruz, then an uninhabited beach. He recognized the weak points of the situation, and successively brought over to his side the enemies of the league, then one of its members, Tezcuco, and finally, with these auxiliaries, captured the lake-stronghold of the ancient Mexicans, or Aztecs, putting an end to their existence as a tribe. The degree of culture which the Mexicans, or Aztecs, had reached was not superior to that of any of the sedentary tribes of the Mexican tableland, and in some respects it was below that of the Indians

of Yucatan, Honduras, or Chiapas. Their social organization rested on the basis of localized clanship, twenty clans (Calpulli), with descent in the male line, forming the autonomous units which the tribe enveloped like a shell. The representatives of these clans, one for each, constituted the supreme tribal authority, the council, or Tlatocan, and were elected for life or during good behaviour. These in turn, with the sanction of the religious chiefs, selected a head war-chief, or *Tlacatecuhtli* (Chief of Men), and an administrative head, who bore the strange title of *Cihua-Cohuall* (Snake Woman), and probably had more religious attributes. It was the former whom the Spaniards understood to be a monarch, whereas he was properly but a chief executive, subject to removal. Moctecuzoma (Montezuma) was deposed while a captive of Cortés, and there are indications that one of the earlier chieftains (Tizoc), suffered a similar fate. The twenty clans were grouped in four principal quarters, each had its own war-chief with a special title. The four were subordinate to the Chief of Men, who was also *ex officio* the commander-in-chief of the joint forces of the confederacy. Each clan administered its own internal affairs, the tribal council only intervening in case of dissensions between clans, and managing intercourse with the two other members of the league.

The religious organization of the Mexicans had become very complex. The numerous Shamans (called priests by most authors) were grouped into four subdivisions, the medicine-men (Tlama-cazqui, probably), the hunters (Otomitl), and the warriors; above all of whom were the two Teotecuhtli as heads of worship. This organization was perpetuated, as among many Indian tribes to-day, by selection and training. The basis of the creed was a rude pantheism. Monotheism was unknown. Nor are there any traces of early Christian teachings. The so-called "cross" of Palenque is, first, not a work of the Mexicans, but of Maya tribes, and, second, it is not a cross but an imperfect *Swastika*. In consequence of the pantheistic idea of a spiritual essence pervading creation, and individualizing at will in natural or human forms, numberless fetishes, or idols, were manufactured, which entailed a very elaborate cult and a very sanguinary one, from the time that historical deities (deified men) began to assume prevalence. The chief idols of the Mexicans were historic personages, probably Shamans of very early times, surrounded by a halo of miraculous deeds, hence credited with supernatural powers and, finally, supernatural descent. These fetishes (Tezcatlipoca, Quetzalcohuatl, etc.) were sometimes of more than human size, of stone and wood, elaborately carved and bedecked

GOD OF WAR AND DEATH

These fetishes (Tezcatlipoca, Quetzalcohuatl, etc.) were sometimes of more than human size, of stone and wood, elaborately carved and bedecked

with cloth and ornaments. To the idols human victims were sacrificed in various ways, and, relatively, in large numbers, although it is scarcely possible that more than hundreds—not thousands as reported—should have been slaughtered annually. The victims were obtained in warfare, and also formed part of the tribute imposed upon conquered tribes. Aside from these cruel executions, the Shamans subjected their own persons to not less cruel tortures and to severe penance.

A certain education was given to the male youth in special buildings connected with the houses of worship and called *Telpuchalli* (Houses of the Youth). That education consisted in the rehearsal of ancient songs and the use of weapons. For counting, and for the preservation of historic memories, as also for tribute, pictographs, executed on a thin paste of maguey fibre spread over delicate pieces of tanned hide, were sometimes used. These paintings could indicate numbers (by dots and symbols), names (figures related to the meaning of the word), dates (dots and signs), and events (one or more human figures in action). Besides, they had two distinct calendars, the origin of which seems very ancient. Their great cycle was of fifty-two years subdivided into four periods, of thirteen years each. The years were named *Tochtli* (Rabbit), *Acatl* (Reed), *Tecpatl* (Flint), and *Calli* (House), and these four names were repeated thirteen times in the great cycle. The month consisted of twenty days, named and figured after the same method. They had also a ritual calendar, of twenty periods of thirteen days each, and for ceremonial purposes only. Their numeration went from one to twenty, from twenty to four hundred, eight thousand being the highest figure having a symbol (*Xiquipilli*, a bag, or sack). Their knowledge of heavenly bodies was limited; they knew the bissextile, and used a rude correction, but had no astronomical instruments. Neither had they any conception of the angle as a means of

to fuse the metals by means of the blowpipe. They used copper and an accidental bronze, but no iron. Obsidian played an important part, being the material for edged tools and mirrors. They had no metallic currency, gold and silver were only for ceremonial and personal decoration.

The buildings of Tenochtitlan were of adobe (sun-dried bricks). The houses were mostly low, but wide; the places of worship small and dingy chapels, erected on the tops of huge artificial mounds of earth encased in stone work. These mounds (*teo-calli*, houses of the gods, or spirits) occupied the centre of the settlement, and contained some sculptures remarkable for size and elaborateness. The *teo-calli* were also citadels to the otherwise unprotected *pueblos*. The several causeways built from Tenochtitlan to the mainland, were very creditable achievements. Tenure of lands was communal, without private ownership, each clan holding a certain area, distributed for use among its members. Agricultural implements were primitive. Land-tillage was of secondary importance to a tribe essentially lacustrine, and which relied chiefly upon warfare for its subsistence. Together with their confederates of Tezcuco and Tlacopan, the ancient Mexicans, or Aztecs, lived by preying upon other tribes, either plundering or levying tribute. They had no thought of founding a state or nationality. Commerce was carried on, even with tribes that were hostile, and it sometimes gave a welcome pretext for aggression. Of domestic quadrupeds they had only a species of indigenous dog. Like all Indian towns, Tenochtitlan had a large central market-place (*tianquiz*), the extent and resources of which have been considerably exaggerated, as well as most other features of so-called Indian civilization.

Of more recent works, ROBERTSON, *History of America*, and PRESCOTT, *History of the Conquest of Mexico*, are most widely known and have a large number of editions, but they should be consulted critically. As an accumulation of references to original sources, HUBERT H. BANCROFT, *Native Races of the Pacific States* (New York, 1875), and *History of the Pacific States* are very valuable. Eye-witnesses of the conquest like HERNANDO CORTÉS, *Cartas de Relación*, and the sources in Ramusio are of great importance, but should be treated with circumspection as interested reporters. Important also are GONZALO FERNÁNDEZ DE OVIEDO Y VALDÉS, *Historia general y moral de las Indias*, III (1853); FRANCISCO LÓPEZ DE GOMARA, *Conquista de México, Segunda Parte de la Crónica general de las Indias* (1554). Besides, for the status of the Aztecs, or Mexicans, and their degree of culture, the works of ecclesiastics and missionaries; the books of MOTOLINIA; GERÓNIMO DE MENDIETA, *Historia eclesiástica indiana*, also of JUAN DE TORQUEMADA, *Monarquía indiana* (1729), are of first rank. CAMARGO, *Historia de Tlaxcala* (Mexico, 1892); ZURITA and POMAR, *Nueva colección de Documentos para la Historia de México* (Mexico, 1891); and SAHAGUN, *Historia general de las Cosas de Nueva España* (Mexico, 1828), deserve careful attention. Lastly we refer to FATHER DIEGO DURÁN, *Historia de los indios de Nueva España* (Mexico, 1867); to TEZOZOMOC, *Crónica mexicana* (Mexico, 1878); and to the so-called *Códice Ramírez*, written by the Jesuit JUAN DE TOBAR, and printed in the same volume as the work of TEZOZOMOC. FERNANDO DE ALBA, *Iztlirochitl, Relaciones históricas* and his *Historia de los Chichimecas, antiguos Reyes de Tezcuco* (both in LORD KINGSBOROUGH's *Antiquities of Mexico*) also belong to the same period, the sixteenth century, and were also published much later. In the eighteenth century, VETIA Y ECHEVERRÍA wrote a compendious *Historia antigua de México* (Mexico, 1836), and CLAVIGERO his well-known *Storia del Messico*, of which many editions and translations have appeared. The voluminous collections entitled: *Colección de documentos inéditos del Archivo de Indias*, and *Colección de documentos para la historia de España*, contain many documents of great interest. All these sources should be treated with great critical caution and made use of from a specifically ethnological standpoint. They are all valuable, but suffer from the failings of the knowledge of their times and from the inevitable shortcomings of the personal element. Literature on the Nahuatl or Mexican (Aztec) language begins very soon after the introduction of the printing press in Mexico, that is, after 1535-36.

AD. F. BANDELIER.

**Asymes** (Gr. ἀσυμος, without leaven; Heb. *mapoth*), unfermented cakes used by the Jews in their various sacrifices and religious rites (Ex., xxix, 2, 23; Num., vi, 15, 17, 19; Lev., ii, 4; vi, 16-17; vii, 12; viii, 2, 26), as commanded by the Law (Ex.,

PLAN OF TENOCHTITLAN  
(From "Isolano" 1528) Lenox Library, New York

measuring. Dress and adornment were elaborate, in official functions; otherwise, the costume was simple, of cotton, with sandals and without trousers. The head was bare, except in the case of chiefs and some of the Shamans. Ornaments were of gold, silver, and bright stones, mostly turquoises, the stones being esteemed for colour or brilliancy only. Gold was obtained as tribute, also silver. They knew how

xxiii, 18; xxxiv, 25; Lev., ii, 11). Their use was also prescribed for the Feast of the Passover (Ex., xii, 8, 15; xiii, 3, 6, 7; Num., ix, 11; Deut., xvi, 3, 4, 8). On account of the facility with which they could be prepared, they were also made in ordinary life for unexpected guests (Gen., xviii, 6; Judges, vi, 19-21, etc.) and in times of necessity, e. g., at the time of the Exodus (Ex., xii, 34, 39), whence the name, "bread of affliction" (Deut., xvi, 3). In I Cor., v, 8, unleavened bread is the type of sincerity and truth. Unleavened cakes were especially used for the Feast of Azyms, also called the "solemn feast" (Num., xxviii, 17). This festival was instituted to commemorate Israel's deliverance from Egyptian bondage (Ex., xii, 17; xiii, 3-10). Its observance began on the fifteenth of Abib, or Nisan, "the month of new corn", and continued seven days, the first and last of which were specially solemn (Ex., xii, 15-18; xiii, 7; Lev., xxiii, 6-8, etc.). No other but unleavened bread was allowed during the whole feast. Although originally distinct, the Feast of Azyms and the Feast of the Passover are often treated as one and the same (Deut., xvi, 16; Matt., xxvi, 17; Mark, xiv, 12; Luke, xxii, 1, 7).

F. X. E. ALBERT.

**Azymites** (a privative and ζῶν, leaven), a term of reproach used by the schismatic Greeks since the eleventh century against the Latins, who, together with the Armenians and the Maronites, celebrate the Holy Eucharist with unleavened bread. Since reviling is apt to beget reviling, some few Latin controversialists have retorted by assailing the Greeks as "Fermentarians" and "Prozymites". There was, however, but little cause for bitterness on the Latin side, as the Western Church has always maintained the validity of consecration with either leavened or unleavened bread. Whether the bread which Our Lord took and blessed at the Last Supper was leavened or unleavened, is another question. Regarding the usage of the primitive Church, our knowledge is so scant, and the testimonies so apparently contradictory, that many theologians have pronounced the problem incapable of solution.

Certain it is that in the ninth century the use of unleavened bread had become universal and obligatory in the West, while the Greeks, desirous of emphasizing the distinction between the Jewish and the Christian Pasch, offered up leavened bread. Some surprise has been expressed that Photius, so alert in picking flaws in the Latin Liturgy, made no use of a point of attack which occupies so prominent a place in the polemics of the later schismatics. The obvious explanation is that Photius was shrewd and learned enough to see that the position of the Latins could not successfully be assailed. Two centuries later, the quarrel with Rome was resumed by a patriarch who was troubled with no learned scruples. As a visible symbol of Catholic unity, it had been the custom to maintain Greek churches and monasteries in Rome and some of Latin Rite in Constantinople. In 1053, Michael Cæularius ordered all the Latin churches in the Byzantine capital to be closed, and the Latin monks to be expelled. As a dogmatic justification of this violent rupture with the past, he advanced the novel tenet that the unleavened oblation of the "Franks" was not a valid Mass; and one of his chaplains, Constantine by name, with a fanaticism worthy of a Calvinist, trod the consecrated Host under his feet. The proclamation of war with the pope and the West was drawn up by his chief lieutenant, Leo of Achrida, Metropolitan of the Bulgarians. It was in the form of a letter addressed to John, Bishop of Trani, in Apulia, at the time subject to the Byzantine emperor, and by decree of

Leo the Isaurian attached to the Eastern Patriarchate. John was commanded to have the letter translated into Latin and communicated to the pope and the Western bishops. This was done by the learned Benedictine, Cardinal Humbert, who happened to be present in Trani when the letter arrived. Baronius has preserved the Latin version; Cardinal Hergenröther was so fortunate as to discover the original Greek text (Cornelius Will, *Acta et Scripta*, 51 sqq.). It is a curious sample of Greek logic. "The love of God and a feeling of friendliness impelled the writers to admonish the Bishops, clergy, monks and laymen of the Franks, and the Most Reverend Pope himself, concerning their azyms and Sabbaths, which were unbecoming, as being Jewish observances and instituted by Moses. But our Pasch is Christ. The Lord, indeed, obeyed the law by first celebrating the legal pasch; but, as we learn from the Gospel, he subsequently instituted the new pasch. . . . He took bread, etc., that is, a thing full of life and spirit and heat. You call bread *panis*; we call it *artos* (*ἄρτος*). This from *airoel* (*αἰρω*), to raise, signifies a something elevated, lifted up, being raised and warmed by the ferment and salt; the azym, on the other hand, is as lifeless as a stone or baked clay, fit only to symbolize affliction and suffering. But our Pasch is replete with joy; it elevates us from the earth to heaven even as the leaven raises and warms the bread", etc. This etymological manipulation of *artos* from *airo* was about as valuable in deciding a theological controversy as Melancthon's discovery that the Greek for "penance" is *metanoia*. The Latin divines found an abundance of passages in Scripture where unleavened bread is designated as *artos*. Cardinal Humbert remembered immediately the places where the unleavened loaves of proposition are called *artoi*. If the writers of the letter had been familiar with the Septuagint, they would have recalled the *artous azyms* of Ex., xxix, 2.

To Cæularius the exegetical merit of the controversy was of minor importance. He had found an effective battle-cry, well calculated to infuse into the breasts of his unreasoning partisans that hatred and defiance of the Latins which filled his own breast. The flour and water wafers of the "Franks" were not bread; their sacrifices were invalid; they were Jews, not Christians. Their lifeless bread could only symbolize a soulless Christ; therefore, they had clearly fallen into the heresy of Apollinaris. By arts like these, the unfortunate Greeks were seduced from their allegiance to the centre of Catholic unity; and a schism was precipitated which centuries have not yet healed. It is interesting to notice that this question of azyms, which brought forth a cloud of virulent pamphlets and made a deeper impression on the popular imagination than the abstruse controversy of the *Filioque*, caused little or no discussion among the theologians at the Councils of Lyons and Florence. At the latter Council the Greeks admitted the Latin contention that the consecration of the elements was equally valid with leavened and unleavened bread; it was decreed that the priests of either rite should conform to the custom of their respective Church. Modern Russians have claimed for their nation the dubious honour of having opened this crusade against azyms; but the treatises ascribed to Leontius, Bishop of Kiew, who lived a century earlier than Cæularius, and in which all the well-known arguments of the Greeks are rehearsed, are judged to have proceeded from a later pen.

JAMES F. LOUGHLIN.

**Baader, FRANZ XAVER VON**, German philosopher, b. at Munich, 1765; d. at the same place, 23 May, 1841.

I. The idealistic stream of German philosophy which started with Kant and culminated, in two divergent branches, in Hegel and Schopenhauer, encountered on the one side an opposing current of empirical realism setting back from Herbart, and on the other a partly reactionary, and yet partly concurrent movement originating in certain Catholic thinkers. Prominent among the latter was Baader. Having entered the University of Ingolstadt at sixteen and taken his doctorate at nineteen, he continued his medical studies two years longer at Vienna and then assisted his father, who was court physician. He soon gave this up, however, for mining engineering and after considerable travel in Germany he spent about five years in England (1791-96), where he became acquainted with the mysticism of Böhme and with the extremely opposite empiricism of Hume and Hartley. The work of William Godwin, "Enquiry concerning Political Justice", not only called his attention to moral and social questions but also led him to German philosophy, especially to that of Kant. Baader had a temperamental sympathy for the German Protestant mystic Böhme, but for Kant's philosophy, especially its ethical autonomism, viz.: that human reason alone and apart from God is the primary source of the supreme rule of conduct, he had nothing but disgust. This he calls "devil's morality" and fiercely declares that were Satan visibly to reappear on earth it would be in the garb of a professor of moral philosophy. For the English sceptics he had both a natural and an acquired aversion. Reared and educated as a Catholic, though holding some decidedly un-Catholic notions, he could find no satisfaction in reason divorced from faith. Passing through Hamburg on his return from England he met Jacoby, with whom he long lived in close friendship. Schelling likewise counted him as a friend and owed to him some of the mystical trend of his system. On his return to Germany Baader was made Superintendent of the Bavarian mines and was subsequently raised to the nobility for his services. He was awarded a prize of 12,000 gulden given by the Austrian Government for an important discovery relating to the use of Glauber salts instead of potash in the manufacture of glass. Retiring from business in 1820 he soon afterwards published his "Fragmenta Cognitionis" (1822-25), and at the opening of the University of Munich, in 1826, he was appointed professor of speculative theology. His philosophico-religious lectures (published as "Speculative Dogmatik", 1827-36) attracted much attention. In 1838, however, a ministerial order prohibiting laymen from lecturing on such subjects obliged him to restrict himself to anthropology. Vigorous in body and in mind he pursued his intellectual work until his final illness.

II. Baader's "Tag und Studien Bücher" (Diary), printed in the first volume of his works, affords an insight into the vicissitudes of his mind and the development of his ideals. It was primarily to his early religious training under his domestic tutor, Sailer, subsequently Bishop of Landshut, that he owed the convictions with which he combated the prevailing rationalism by appealing to innate experience and the subjective necessity of faith. Religious reading supplemented by prayer strengthened his natural tendency towards mysticism. Then,

too, his eagerness to comprehend Christianity more thoroughly than the rationalistic theology succeeded in doing—the hope of finding the key, as he says, to the world of mind by putting himself in direct correspondence with the ideal—drew him, in an age poor in positive theology, towards a mystical literature which had combated, if not successfully, at least with earnestness and good intent, both the German and the French rationalism. Saint-Martin's "Philosophe inconnu", which fell into his hands in 1787, carried him back to Böhme and thence to the whole theosophic tradition which this German mystic had given to the modern world—to Paracelsus, Meister Eckart, Eriugena, the Cabbala, and the earlier Gnostics. He encountered on his way back to the past a tangible theology, notably in the works of St. Thomas upon which he comments in his Diary, but also in the Fathers and especially in the Bible.

Since, however, it was alien doctrine which had led him to the Catholic, the authority of the latter remained more or less confounded with that of the former. Moreover, his study of the English empiricists and of Kant's rationalism gave a critical cast to his thought if it did not add to his ideas. In placing theogonic speculations at the basis of his physical and moral ideas, and in seeking from mysticism an answer to the riddles of the universe, he thought to reach a solution of the fundamental problems of his time and realize the dream of his youth—a religious philosophy. Joining the contemplations of mysticism to the exactness of criticism he endeavoured to justify the appeal to both. Mysticism was to fructify criticism and criticism authorize mysticism. He aimed thus at opposing the negative with a positive rationalism. The transcendental truths (metaphysical, and especially theological concepts declared unknowable by Kant) were to find their justification and verification in the human, but at the same time Divinely impressed, consciousness. Reason and feeling separated by Kant were reunited by Baader. Jacoby's appeal to emotion for the certitude of transcendental truth Baader saw to be, at best, but a negative, an irrational, escape, while Fichte, by making such truth the creation of the Ego, failed to account for the Ego itself. The Hegelian logomachy of the Ego and the non-Ego could no more satisfy Baader than could Schelling's assertion of the absolute identity of subject and object. He had seen from the start the sterility of Schelling's principle and had confuted its pantheism.

Baader's aim was a theistic philosophy which would embrace the worlds of nature and of spirit and afford at once a metaphysical solution of the problem of knowledge (science) and an understanding of the Christian idea and the Divine activity as manifested by revelation. Whatever be thought of this ambitious endeavour, and the Catholic student must recognize its variance both with philosophy and theology, Baader's system surpasses both in depth and in breadth all the other philosophies of his time. He owes this pre-eminence not only to a deeper penetration, but likewise to a broader survey which embraced and estimated many of the facts and truths of Christianity and the science of the past. Unfortunately the false mysticism derived from Böhme led him into a fanciful interpretation of the mysteries of faith, while his attempt at rationalizing those mysteries was often hardly less bizarre. His system, therefore, if it may so be called, had the misfortune,

on the one hand, of being ignored because of its purpose to synthesize Christian faith and revive the old philosophy and theology; and, on the other, of being rejected because it disfigured Christian teaching by its rationalizing spirit. It consequently may be said to have exercised an intensive and transitional, rather than an extensive and definitive, influence on the movement of thought. English sensism having resulted logically in scepticism, and Kant's critical effort to save some certainty by purely subjective scrutiny having hopelessly lost the mind in a maze of its own spinning, Baader saw that the only salvation lay in a return to the traditional line of philosophy which had been broken off by Descartes. Unfortunately in resuming that line Baader unwound some of its essential strands and inwove others of less consistent fibre wherewith the remaining threads would not cohere. But in this very harking back to a saner past Baader was influential in hastening the healthier revival which was more definitely effected by his countrymen Kleutgen and Stöckl. Moreover, in so far as Baader opposed the prevailing rationalism and defended Christian truth, his influence is declared by so unprejudiced a writer as Robert Adamson to have extended beyond the precincts of Baader's Church. Rothe's "Theologische Ethik" is thoroughly impregnated with his spirit, and among others, J. Müller's "Christl. Lehre von der Sünde" and Martinsen's "Christl. Dogmatik" show evident marks of his influence.

III. It is extremely difficult to give any satisfactory conception of Baader's system within narrow limits. Baader was a most fertile writer but threw out his thoughts in aphorisms, some of which indeed he subsequently collected, but most of which received their development in reviews and personal correspondence. Even his two principal works, "Fragmenta Cognitionis" and "Speculative Dogmatik", are really mosaics and one has to seek long before discovering any unifying principles. Moreover, he moves in leaps; his style lacks coherence and order. A suggestive expression, a Latin or French quotation gives an unlooked-for turn to a discourse. The reader is knocked about from one side to another. Now he may be driven from logic to metaphysics and again from theology to physical philosophy. The author's ideas often run into those of others leaving no line of demarcation. Add to this the uncertainty of his terminology, his equivocal and often bizarre use, or abuse, of words and the reading of Baader becomes no easy occupation. A summary of his system may be given as follows:

(1) Man's knowledge is a participation in God's knowledge. The latter necessarily compenetrates the former which is therefore always *con-scientia*. Our knowledge is a gift, something received, and in this respect is faith which is therefore a voluntary acceptance of the known object from God's knowing in us and hence proceeds from the will. This, however, is preceded by an involuntary subjection, a necessitated desire—*Nemo vult nisi videns*. We experience the Indwelling Presence soliciting us to faith. Faith however, in turn, becomes the basis of knowledge in which again faith reaches its completion. Faith is thus as necessary for knowledge as knowledge is for faith. Now the content of faith is expressed by technical formulæ in religious tradition. Hence as philosophy is necessarily connected with the subjective process of faith, so is it likewise with that of tradition. Only thus can it begin and develop. Hence all science, all philosophy, is religious. Natural theology, natural ethics, etc., strictly speaking, are impossible. Philosophy arose only when religious tradition called for explication and purification. Afterwards it divorced itself, but it thus led to its own dissolution.

(2) But faith is not simply a gift (*Gabe*); it is also a responsibility (*Aufgabe*). It must be developed by

reason, penetrated, vivified, and freed from the possibility of doubt. It is not memory, nor a mere relic of the past. It must cast off the temporary but retain the abiding; be permanent but progressive. Mysteries are not impenetrable, but only concealed truths: "*Deum trinum esse non creditur sed scitur*" and "*Deum esse non creditur sed scitur*" are twin truths. The whole content of religion must be reduced to exact science. There is no closed truth just as there is no closed virtue. Science proceeds from faith, but faith is developed and recast by science.

The hopeless confusion here manifest between knowledge as a natural or purely rational process, and faith, in the Catholic sense of a supernatural virtue, finds a parallel in Baader's ethics. With him the true, i. e. religious, and hence Christian, ethics knows that God Who gives the law also fulfils it in us, so that from being a burden it ceases to be a law. Fallen man has not the power to restore himself; hereditary sin, the seed of the Serpent, hinders him in this. Still he retains the "Idea", the seed of the woman, i. e. redeemableness. This possibility is actualized by God's becoming man, and thus realizing the moral law in "the Man", the Saviour, Who by overcoming temptation has destroyed evil at its centre and from within, and Who has crushed the Serpent's head. But evil, too, must be destroyed from without by constant mortification of ego-hood. In this task man co-operating with his fellows for the attainment of happiness is neither a solitary worker, as the Kantian would say, nor completely inactive, as Luther teaches. Like hereditary sin, grace propagates itself *quasi per injectionem vite*. Prayer and the Eucharist place man *en rapport* with Christ, through Whom man, if he co-operate, will be restored to the spiritualized condition whence he fell by sin. This spiritualization thus becomes the final subjective end for the individual and society.

The religious idea here appears as the source and the life of Baader's sociology. The law of love for God and neighbour is the unitive principle of all social existence, liberty, and equality; as the opposite principle of self-love is the root of all disunion, slavery, and despotism. God is the binding source of all law, from Him is all social authority. Hence Baader strongly opposes the might-makes-right doctrine of Hobbes, and the social contract of Rousseau, no less than Kant's autonomism, which regards religion as an appendage of morality. Now the religious idea and the moral and juridic law being inseparably conjoined, and neither having actual existence save in Christianity which is concrete in the Catholic Church, civil society (the State), and religious society (the Church), should co-operate. Baader apparently until towards the close of his life held that the Church should have direct—not simply indirect—authority even in civil affairs, and he was enthusiastic for a reinstatement, in a form adapted to his times, of the medieval relation between the two orders. But a change seems to have come over his mind—occasioned very probably by some personal irritation which he felt at the criticism to which his theological teachings were subjected—and he taught for a short time opinions concerning the constitution of the Church and the Papacy which were utterly irreconcilable with Catholic Faith, while the language in which these opinions was conveyed was as unbecoming the philosopher as it was his subject. Before his death, however, he retracted this portion of his teaching.

While Baader's sociology maintains that religion is the very root and life of civil society, it takes account also of political and economic administration. Thus it contains his opinions favouring the organization of the classes, the revival of the medieval "corporations" or industrial associations, the politi-

cal representation of the proletariat, and some well-reasoned objections to unlimited industrial competition and free trade. On the whole, his sociology is the wisest, strongest, sanest, and most practical part of his whole system, just as his technical theology is the weakest, the most bizarre, unsound, and impractical. The reason of the difference may not improbably be found in the fact that in the former the best elements of his own mind and character were free to assert themselves, while in his theology they seem almost throughout to be under the spell of Böhme whose fanciful mysticism bore him away to a region as far removed from experience—present and past—as from the world of reason and faith. Apart from theology Baader's teachings have a permanent value.

*Sammliche Werke* (Leipzig, 1851-60), XV, contains biography, XVI, an able sketch of the whole system by LUTTERBECK; HOFFMAN, *Vorhalle zur spekultativen Lehre Baaders*; *Philosophische Schriften*, 3 vols.; HAMBERGER, *Cardinalpunkte der Baaderschen Philosophie*; LUTTERBECK, *Philosophische Standpunkte Baaders*. F. P. SIEGFRIED.

**Baal, Baalim** (Hebr. בָּאָל; plural, בְּאִלִּים), a word which belongs to the oldest stock of the Semitic vocabulary and primarily means "lord", "owner". So, in Hebrew, a man is styled "baal" of a house (Ex., xxii, 7; Judges, xix, 22), of a field (Job, xxxi, 39), of cattle (Ex., xxi, 28; Isa., i, 3), of wealth (Eccles., v, 12), even of a wife (Ex., xxi, 3; cf. Gen., iii, 16). The woman's position in the Oriental home explains why she is never called *Ba'alah* of her husband). So also we read of a ram, "baal" of two horns (Dan., viii, 6, 20), of a "baal" of two wings (i. e. fowl; Eccles., x, 20). Joseph was scornfully termed by his brothers a "baal" of dreams (Gen., xxxvii, 19). And so on. (See IV Kings, i, 8; Isa., xli, 15; Gen., xlix, 23; Ex., xxiv, 14, etc.) Inscriptions afford scores of evidences of the word being similarly used in the other Semitic languages. In the Hebrew Bible, the plural, *be'alim*, is found with the various meanings of the singular; whereas in ancient and modern translations it is used only as referring to deities. It has been asserted by several commentators that by *baalim* the emblems or images of Baal (*hāmmāntm*, *māṣṣebhōth*, etc.) should be understood. This view is hardly supported by the texts, which regularly point out, sometimes contemptuously, the local or other special Baals.

**BAAL AS A DEITY.**—When applied to a deity, the word Baal retained its connotation of ownership, and was, therefore, usually qualified. The documents speak, for instance, of the Baal of Tyre, of Harran, of Tarsus, of Hermon, of Lebanon, of Tamar (a river south of Beirut), of heaven. Moreover, several Baals enjoyed special attributions: there was a Baal of the Covenant [*Ba'al Berith* (Judges, viii, 33; ix, 4); cf. *'El Berith* (ibid., ix, 46)]; one of the flies (*Ba'al Zebub*, IV Kings, i, 2, 3, 6, 16); there was also probably one of dance (*Ba'al Mārṣad*); perhaps one of medicine (*Ba'al Mārphē*), and so on. Among all the Semites, the word, under one form or another (*Ba'al* in the West and South; *Bel* in Assyria; *Bal*, *Bol*, or *Bel* in Palmyra) constantly recurs to express the deity's lordship over the world or some part of it. Nor were all the Baals—of different tribes, places, sanctuaries—necessarily conceived as identical; each one might have his own nature and his own name: the partly fish-shaped Baal of Arvad was probably Dagon; the Baal of Lebanon, possibly Cid, "the hunter"; the Baal of Harran, the moon-god; whereas in several Sabeian and Minean cities, and in many Chanaanite, Phœnician, or Palmyrene shrines, the sun was the Baal worshipped, although Hadad seems to have been the chief Baal among the Syrians. This diversity the Old Testament inti-

mates by speaking of *Baalim* in the plural, and specifying the singular *Baal* either by the article or by the addition of another word.

What the original conception was is most obscure. According to W. R. Smith, the Baal is a local god who, by fertilizing his own district through springs and streams, becomes its lawful owner. Good authorities, nevertheless, oppose this view, and, reversing the above argument, hold that the Baal is the genius-lord of the place and of all the elements that cause its fecundity; it is he who gives "bread, water, wool, flax, oil, and drink" (Os., ii, 5; in the Hebr. text, 7); he is the male principle of life and reproduction in nature, and as such is sometimes honoured by acts of the foulest sensuality. Whether or not this idea sprang from, and led to the monotheistic conception of a supreme deity, the "Lord of Heaven", of whom the various Baals would be so many manifestations, we shall leave to scholars to decide. Some deem that the Bible favours this view, for its language frequently seems to imply the belief in a Baal *par excellence*.

**BAAL-WORSHIP AMONG THE GENTILES.**—The evidence is hardly of such weight as to justify us in speaking of a worship of Baal. The Baal-worship so often alluded to and described in Holy Writ might, perhaps, be better styled Cid-worship, moon-worship, Melek (Moloch)-worship, or Hadad-worship, according to places and circumstances. Many of the practices mentioned were most probably common to the worship of all the Baals; a few others are certainly specific.

A custom common among Semitic peoples should be noticed here. Moved, most likely, by the desire to secure the protection of the local Baal for their children, the Semites always showed a preference for names connected with that of the deity; those of Hasdrubal (*'Azrā Ba'al*), Hannibal (*Hanni Ba'al*), Baltasar, or Belshazzar (Bel-sar-Ushshur), have become famous in history. Scores of such names belonging to different nationalities are recorded in the Bible, in ancient writers, and in inscriptions.

The worship of Baal was performed in the sacred precincts of the high places so numerous throughout the country (Num., xxii, 41; xxxiii, 52; Deut., xii, 2, etc.) or in temples like those of Samaria (III Kings, xvi, 32; IV Kings, x, 21-27) and Jerusalem (IV Kings, xi, 18), even on the terraced roofs of the houses (IV Kings, xxiii, 12; Jer., xxxii, 29). The furniture of these sanctuaries probably varied with the Baals honoured there. Near the altar, which existed everywhere (Judges, vi, 25; III Kings, xviii, 26; IV Kings, xi, 18; Jer., xi, 13, etc.), might be found, according to the particular place, either an image of the deity (Hadad was symbolized by a calf), or the *butyion* (i. e. sacred stone, regularly cone-shaped in Chanaan) supposed to have been originally intended to represent the world, abode of the god; of the *hāmmāntm* (very possibly sun-pillars; Lev., xxvi, 30; II Par., xxxiv, 4, etc.), and the *'āshērah* (wrongly interpreted "grove" in our Bibles; Judges, vi, 25; III Kings, xiv, 23; IV Kings, xvii, 10; Jer., xvii, 2, etc.), a sacred pole, sometimes, possibly, a tree, the original signification of which is far from clear, together with votive or commemorative stelæ (*māṣṣebhōth*, usually mis-translated "images"), more or less ornamented. There incense and perfumes were burned (IV Kings, xxiii, 5; Jer., vii, 9, xi, 13, and, according to the Hebrew, xxxii, 29), libations poured (Jer., xix, 13), and sacrifices of oxen and other animals offered up to the Baal; we hear even (Jer., vii, 31; xix, 5; xxxii, 35; II Par., xxviii, 3) that children of both sexes were not infrequently burned in sacrifice to Melek (D. V. Moloch, A. V. Molech), and II Par., xxviii, 3 (perhaps also IV Kings, xxi, 6) tells us that young princes were occasionally chosen as victims

to this stern deity. In several shrines long trains of priests, distributed into several classes (III Kings, xviii, 19; IV Kings, x, 19; xxiii, 5; Soph., i, 4, etc.) and clad in special attire (IV Kings, x, 22) performed the sacred functions: they prayed, shouted to the Baal, led dances around the altar, and in their frenzied excitement "cut themselves with knives and lancets, till they were all covered with blood" (III Kings, xviii, 26-28). In the meantime the lay worshippers also prayed, kneeling, and paid their homage by kissing the images or symbols of the Baal (III Kings, xix, 18; Os., xiii, 2, Hebr.), or even their own hands. To this should be added the immoral practices indulged in at several shrines (III Kings, xiv, 24; IV Kings, xxiii, 7; cf. Deut., xxiii, 18) in honour of the Baal as male principle of reproduction, and of his mate Asherah (D. V. Astarthe, A. V. Ashtaroth).

**BAAL-WORSHIP AMONG THE ISRAELITES.**—Nothing could be more fatal to a spiritual faith than this sensual religion. In fact, no sooner had the Israelites, coming forth from the wilderness, been brought into contact with the Baal-worshippers than they were, through the guile of the Madianites, and the attractions of the licentious worship offered to the Moabitish deity (probably Chamos), easily seduced from their allegiance to Yahweh (Num., xxv, 1-9). Henceforth the name of Beelphegor remained like a dark spot on the early history of Israel [Os., ix, 10; Ps. cv (in the Hebr. cvi), 28]. The terrible punishment inflicted upon the guilty sobered for a while the minds of the Hebrews. How long the impression lasted we are hardly able to tell; but this we know, that when they had settled in the Promised Land, the Israelites, again forsaking the One True God, paid their homage to the deities of their Chanaanite neighbours (Judges, ii, 11, 13, etc.). Even the best families could not, or did not dare, resist the seduction; Gedeon's father, for instance, albeit his faith in his Baal seems to have been somewhat lukewarm (Judges, vi, 31), had erected an idolatrous altar in Ephra (Judges, vi, 25). "And the Lord, being angry against Israel, delivered them into the hands of their enemies that dwelt round about". Mesopotamians, Madianites, Amalecites, Ammonites, and, above all, Philistines, were successively the providential avengers of God's disregarded rights.

During the warlike reigns of Saul and David, the Israelites as a whole thought little of shaking off Yahweh's yoke; such also was, apparently, the situation under Solomon's rule, although the example given by this prince must have told deplorably upon his subjects. After the division of his empire, the Northern Kingdom, first led by its rulers to an unlawful worship of Yahweh, sank speedily into the grossest Chanaanite superstitions. This was the more easy because certain customs, it seems, brought about confusion in the clouded minds of the uneducated portion of the people. Names like Esbaal (I Par., viii, 33; ix, 39), Meribbaal (I Par., viii, 34; ix, 40), Baaliada (I Par., xiv, 7), given by Saul, Jonathan, and David to their sons, suggest that Yahweh was possibly spoken of as Baal. The fact has been disputed; but the existence of such a name as Baalia (i. e. "Yahweh is Baal", I Par., xii, 5) and the affirmation of Osee (ii, 16) are arguments that cannot be slighted. True, the word was used later on only in reference to idolatrous worship, and even deemed so obnoxious that *bôshêth*, "shame", was frequently substituted for it in compound proper names, thus giving, for instance, such inoffensive forms as Elioda (II Kings, v, 16), Yerûbbêshêth (II Kings, xi, 21, Hebr.), Isboseth (II Kings, ii, 10) and elsewhere, Miphiboseth (II Kings, ix, 6; xxi, 8); but these corrections were due to a spirit which did not prevail until centuries after the age with which we shall presently deal.

Achab's accession to the throne of Israel inaugurated a new era, that of the official worship. Married to a Sidonian princess, Jezebel, the king erected to the Baal of her native city (Sid, or Melkart) a temple (III Kings, xvi, 31, 32) in which a numerous body of priests officiated (III Kings, xviii, 19). To what a forlorn state the true faith in the Northern Kingdom fell Elias relates in III Kings, xix, 10, 14: "The children of Israel have forsaken thy covenant: they have thrown down thy altars, they have slain thy prophets with the sword." There remained but seven thousand men whose knees had not been bowed before Baal (III Kings, xix, 18). Ochozias, son of Achab and Jezebel, followed in his parents' footsteps (III Kings, xxii, 54), and although Joram, his brother and successor, took away the *mâçebhôth* set up by his father, the Baal-worship was not stamped out of Samaria (IV Kings, iii, 2, 3) until its adherents were slaughtered, and its temple destroyed at the command of Jehu (IV Kings, x, 18-28). Violent as this repression was, it hardly survived the prince who had undertaken it. The annals of the reigns of his successors witness to the religious corruption again prevailing; and the author of IV Kings could sum up this sad history in the following few words: "They forsook all the precepts of the Lord their God: and made to themselves two molten calves, and groves [*âshêrah*], and adored all the host of heaven: and they served Baal. And consecrated their sons, and their daughters through fire: and they gave themselves to divinations, and sooth-sayings: and they delivered themselves up to do evil before the Lord, to provoke him. And the Lord was very angry with Israel, and removed them from his sight, . . . and Israel was carried away out of their land to Assyria, unto this day" (IV Kings, xvii, 16-18, 23).

Meanwhile the Kingdom of Juda fared no better. There, also, the princes, far from checking the drift of the people to idolatry, were their instigators and abettors. Established by Joram (IV Kings, viii, 18), probably at the suggestion of Athalia his wife, who was the daughter of Achab and Jezebel, the Phœnician worship was continued by Ochozias (IV Kings, viii, 27). We know from IV Kings, xi, 18, that a temple had been dedicated to Baal (very likely the Baal honoured in Samaria) in the Holy City, either by one of these princes or by Athalia. At the latter's death, this temple was destroyed by the faithful people, and its furniture broken to pieces (IV Kings, xi, 18; II Par., xxiii, 17). If this reaction did not crush utterly the Baal-worship in Juda, it left very little of it alive, since, for over a century, no case of idolatry is recorded by the sacred writers. In the reign of Achaz, however, we find the evil not only flourishing again, but countenanced by public authority. But a change had taken place in Juda's idolatry; instead of the Sidonian Baal, Melek (Moloch), the cruel deity of the Ammonites, had become the people's favourite (II Par., xxviii, 2; IV Kings, xvi, 3, 4). His barbarous rites, rooted out by Ezechias, appeared again with the support of Manasses, by whose influence the Assyro-Babylonian astral deities were added to the Pantheon of the Judean idolaters (IV Kings, xxi, 3). The meritorious efforts of Josias (IV Kings, xxiii, 4, 5) produced no lasting results, and after his death the various superstitions in vogue held away until "the Lord cast out from his face Juda and Jerusalem" (IV Kings, xxiii, 32, 37; xxiv, 9, 19, and elsewhere).

The Babylonian invasions dealt to the Baal-worship in Palestine a deadly blow. At the restoration Israel shall be Yahweh's people, and He their God (Ezech., xiv, 11), and Baal will become altogether a thing of the past.

CHARLES L. SOUVAY.

**Baalbek**, the Heliopolis of the Greek and Latin writers, a Syrian town at the base of the western slope of the Anti-Lebanon, and the see of a Maronite and of a Melchite bishop. Nothing is known of the origin and ancient history of Baalbek, although conjectural attempts have been made to identify it with Baalgad (Jos., xi, 17; xiii, 5), Aven (A. V. Amos, i, 5), etc. Among the monuments of Baalbek were three temples: the Great Temple of Jupiter, the Temple of the Sun, and the Circular Temple of Venus; all of them date from the second century A. D. The so-called Acropolis, on the platform of which two of the temples were erected, is older. Baalbek has been destroyed almost entirely by earthquakes and wars, but even to-day its ruins are said to be the most beautiful in existence. The boldness of the architecture and the cyclopean dimensions of some of the monoliths of the Acropolis are among the many features interesting both to the scientist and the traveller. The political history of Baalbek is that of the surrounding country. (See SYRIA.)

The introduction of Christianity into Baalbek is obscure. In the life of St. Eudocia, there is mention of one Theodotus, Bishop of Heliopolis, in the reign (117-138) of Hadrian. (Acta SS., 1 March, 8 sqq.) The account is of doubtful historical value and when Constantine forbade the licentious pagan practices, there were no Christians there. Constantine, however, erected a church or perhaps simply transformed one of the temples into a Christian basilica, which he entrusted to a bishop with priests and deacons (Eusebius, *Life of Const.*, III, lviii). During the reign of Julian (361-363) the Christians were severely persecuted (Sozomen, *History*, V, x). Paganism disappeared from Baalbek only after Theodosius (379-395) had destroyed the idols and probably the Great Temple. Of the former bishops of Baalbek (Heliopolis) only a few scattered names have been preserved. Baalbek is now a titular archiepiscopal see in *partibus infidelium*, with the Most Rev. Robert Seton, formerly of Newark, New Jersey, U. S. A., as incumbent, consecrated 5 July, 1903. In 1861, Baalbek was made a Maronite bishopric, with about 30,000 Catholics. The Melchite diocese was erected in 1868, and numbers some 5,000 Catholics with fifteen priests, mostly Basilian monks. The Armenians of the district are under the Armenian Archbishop of Aleppo, and the Latins under the vicar Apostolic of the same place. (See ALEPPO.) The Orthodox Greeks (schismatical) also have a resident bishop at Baalbek; further, the town is a station of the British Syrian Schools' Committee with two

missionary women, three native women, and a village school, a high school, and a dispensary.

R. BUTIN.

**Baanites.** See PAULICIANS.

**Babel** occurs in the Vulgate only in Gen., xi, 9; the form Babylonia is found in Bar., i, 1, 4; ii, 22; vi, 1-3; I Mach., vi, 4; II Mach., viii, 20; everywhere else the Vulgate uses the form Babylon. The word is derived from the Babylonian *bāb-ilu*, meaning "gate of God". Gen., xi, 9 suggests a different meaning based on the derivation of the name from the Hebrew word *bāldl*, to confound. The city of Babylon had various names among its inhabitants, e. g. Ka-dingir, Babi-dingir, Tintir, Shu-an-na, etc. The prophets call it "daughter of the Chaldeans" (Is., xlvii, 1), and Sesach or Sesac (Jer., xxv, 26; li, 41), a word variously explained by commentators. It was built on the site of the modern village of Hille. According to Herodotus, a double or perhaps a triple wall, 50 cubits in width and 200 cubits in height, surrounded the town, forming a square of 120 stadia. The square of the interior wall was 90 stadia long and 360 stadia in circumference. Both the Bible and the cuneiform inscriptions assign a very great age to the city, and the Biblical data (Gen., xi, 1-9) concerning the material of the walls are confirmed by the testimony of the ruins. "Let us make brick, and bake them with fire. And they had brick instead of stones, and slime instead of mortar."

The ancient city possessed marvellous temples, splendid palaces, and curious gardens. Among the temples, two deserve special attention, E-sagila, the temple of Bel Merodach, on the eastern bank of the Euphrates, and E-zida, the temple of Nebo, west of the river. The ruins of these sanctuaries are probably identical with those of Bābil and Birs Nimrūd, though opinions differ concerning Bābil. The buildings were pyramidal in form and rose in several, usually seven, step-like sections. The storied tower of Birs Nimrūd counts seven of these quadrangular platforms painted in seven colours, black, white, yellow, blue, scarlet, silver, and gold, and in the same order sacred to the stellar gods, Adar (Saturn), Ishtar (Venus), Merodach (Jupiter), Nebo (Mercury), Nergal (Mars), Sin (the Moon), Shamash (the Sun). It has been learned in the excavations at Nippur that the pyramidal tower or *ziggurat* did not constitute the whole of the Babylonian Temple. This latter had an inner and an outer court, both nearly square and nearly of the same dimensions; the tower occupied about one-third of the area of the inner court, and near to it stood the temple proper where the sacrifices were offered. We may infer from the discoveries made in Nippur and in Sippara that a library and a school will be found to have been connected with the Babylonian temples. In the light of these discoveries the story of the Tower of Babel (Gen., xi, 4) assumes a new importance, whether we identify its remains with the ruins of Birs Nimrūd or with those of the Bel temple at Nippur, or again with those of Bābil. No doubt, it was its temples not less than its royal palaces and its hanging gardens that rendered the city of Babylon "glorious among kingdoms, the famous pride of the Chaldeans" (Is., xiii, 19). We meet with the city at the earliest dawn of history, and it flourishes, in spite of its temporary reverses, till it is finally destroyed by Seleucus Nicator; even then Jews kept on inhabiting some of the mounds of Babylon till about A. D. 1000, after which time the country was given up to the roaming tribes of Arabs, in accordance with the words of the prophet:

"wild beasts shall rest there, and their houses shall be filled with serpents, and ostriches shall dwell there, and the hairy ones shall dance there: and owls shall answer one another there, in the houses thereof, and sirens in the temples of pleasure" (Is., xiii, 21-22). (See TOWER OF BABEL, BABYLONIA.)

**Babenstuber, Ludwig**, a German philosopher and theologian; vice-chancellor of the University of Salzburg; b. 1660 at Teining in Bavaria; d. 5 April, 1726, at the Benedictine monastery of Ettal. Having completed his early studies he entered the novitiate of the Order of St. Benedict, at Ettal in 1681, made his religious profession in 1682, and thereafter devoted the greater part of his life to teaching. At the commencement of his studies he had given no promise of brilliancy, but by his untiring application and industry he shortly acquired so vast a store of knowledge, that he soon came to be regarded as one of the most learned men of his day—*vir consummatus in omni genere doctrinæ et probitatis*, as he is styled in Dom Egger's "Idea ordinis Hierarchico-Benedictini", and in the "History of the University of Salzburg". Until 1690 Babenstuber was Director of the scholastic of his order at Salzburg, taught philosophy there from 1690 to 1693, and then went to Schlehdorf to teach theology in the monastery of the canons regular.

Returning to Salzburg in 1695, he took up successively the professorships of moral theology, dogmatic theology, and exegesis, in the celebrated Benedictine university of that city. He remained at Salzburg for twenty-two years, during which period he held the office of vice-rector for three years, and that of vice-chancellor of the university for six. In 1717 he returned to his monastery at Ettal, where he spent the remainder of his days. In dogmatic theology Babenstuber was a pronounced Thomist; in moral, a vigorous defender of probabilism. He maintained, among other things, that a single author, if he were "beyond contradiction" (*omni exceptione major*), could, of his own authority, render an opinion probable, even against general opinion. In matters of faith, however, he rejected the principle of probabilism absolutely. In one of his disquisitions he had also stated that it was allowable to celebrate Mass privately on Maundy Thursday and Holy Saturday, but before his "Ethica Supernaturalis" had issued from the press, he learned that the Roman tribunals forbade it, and so he promptly corrected that assertion. Babenstuber's published works include a wide range of subjects, mainly philosophical and theological. The most important are: "Philosophia Thomistica" (4 vols., Salzburg, 1704); "Ethica Supernaturalis" (Augsburg, 1718).

THOMAS OESTREICH.

**Babinet, Jacques**, French physicist, b. at Lusignan, Vienne, 5 March, 1794; d. at Paris, 21 October, 1872. He began his studies at the Lycée Napoléon.

There he became a pupil of Binet, whose influence caused him to abandon the study of law, for which his family had destined him, and to devote himself to the pursuit of science. He continued at the Polytechnic School, which he left in 1812 to enter the Military School at Metz. For some time he was attached to the Fifth Regiment of Artillery, but at the Restoration he left the army and began to teach. He was professor of mathematics at Fontenay-le-Comte, then professor of physics at Poitiers, and later at the Lycée Saint-Louis. From 1825 to 1828 he delivered a course of lectures on meteorology; in 1838 he succeeded Savary at the Collège de France; and in 1840 he was elected to the Academy of Sciences.

His scientific fame rests on his work in optics, although his contributions to science include the other branches of physics and mechanics. He improved the valves of the air-pump, attaining a very high vacuum; he constructed a hygrometer and a goniometer, and invented the Babinet compensator, a double quartz wedge used in the study of elliptically polarized light. "Babinet's theorem" deals with the diffraction of light. He must, however, be chiefly remembered as a great popularizer of science, an amusing and clever lecturer, a brilliant and entertaining writer of popular scientific articles. He fully recognized the limitations of physical science, while his sincere faith showed itself especially at the end, when he passed away with touching resignation, beloved by all for his kindly and charitable nature.

Babinet's contributions to the "Revue des Deux Mondes" and to the "Journal des Débats" and his lectures on observational science before the Polytechnic Association were collected in eight volumes: "Etudes et lectures sur les sciences d'observation" (1855-65). His other serious works include: "Résumé complet de la physique" (Paris, 1825); "Expériences pour vérifier celles de M. Trevelyan" (Paris, 1835). The following four monographs are published in the Memoirs of the Société Philomathique: "Sur la masse de la planète Mercure" (1825); "Sur la couleur des réseaux" (1829); "Sur la détermination du magnétisme terrestre" (1829); "Sur la cause du retard qu'éprouve la lumière dans les milieux réfringents" (1839).

**Babington, Antony**. See MARY QUEEN OF SCOTS.

**Babylas, Bishop and Martyr**.—He was the successor of Zebinus as Bishop of Antioch in the reign of the Emperor Gordianus (238-244), being the twelfth bishop of this Oriental metropolis. During the Decian persecution (250) he made an unwavering confession of faith and was thrown into prison where he died from his sufferings. He was, therefore, venerated as a martyr. St. John Chrysostom and the "Acts of the Martyrs" relate further concerning him, that Babylas once refused an emperor, on account of his wrongdoing, permission to enter the church and had ordered him to take his place among the penitents. Chrysostom does not give the name of the emperor; the Acts mention Numerianus. It is more probably Philip the Arabian (244-249) of whom Eusebius (Hist. eccl., VI, xxxiv) reports that a bishop would not let him enter the gathering of Christians at the Easter vigil. The burial-place of St. Babylas became very celebrated. The Cæsar Gallus built a new church in honour of the holy martyr at Daphne, a suburb of Antioch, and the bones of the saint were transferred to it. When after this Julian the Apostate consulted the oracle of Apollo at the temple to this god which was near by, he received no answer because of the proximity of the saint. He, therefore, had the sarcophagus of the martyr taken back to its original place of burial.

In the Middle Ages the bones of Babylos were carried to Cremona. The Latin Church keeps his feast on 24 January, the Greek Church on 4 September.

J. P. KIRSCH.

**Babylon**, the curial title of a Latin archbishopric, also of a Chaldean patriarchate and of a Syrian archbishopric. See BAGDAD.

**Babylonia**.—In treating of the history, character, and influence of this ancient empire, it is difficult not to speak at the same time of its sister, or rather daughter, country, Assyria. This northern neighbour and colony of Babylon remained to the last of the same race and language and of almost the same religion and civilization as that of the country from which it emigrated. The political fortunes of both countries for more than a thousand years were closely interwoven with one another; in fact, for many centuries they formed one political unit. The reader is therefore referred to the article ASSYRIA for the sources of Assyro-Babylonian history; for the story of exploration, language, and writing; for its value in Old Testament exegesis, and for much of Babylonian history during the period of Assyrian supremacy.

**GEOGRAPHY**.—The country lies diagonally from north-west to south-east, between 30 and 33 N. lat. and 44 and 48 E. long., or from the present city of Bagdad to the Persian Gulf, from the slopes of Khuzistan on the east to the Arabian Desert on the west, and is substantially contained between the Rivers Euphrates and Tigris, though to the west a narrow strip of cultivation on the right bank of the Euphrates must be added. Its total length is some 300 miles, its greatest width about 125 miles; about 23,000 square miles in all, or the size of Holland and Belgium together. Like those two countries, its soil is largely formed by the alluvial deposits of two great rivers. A most remarkable feature of Babylonian geography is that the land to the south encroaches on the sea and that the Persian Gulf recedes at present at the rate of a mile in seventy years, while in the past, though still in historic times, it receded as much as a mile in thirty years. In the early period of Babylonian history the gulf must have extended some hundred and twenty miles further inland. According to historical records both the towns Ur and Eridu were once close to the gulf, from which they are now about a hundred miles distant; and from the reports of Sennacherib's campaign against Bit Yakin we gather that as late as 695 B. C., the four rivers Kerkha, Karun, Euphrates, and Tigris entered the gulf by separate mouths, which proves that the sea even then extended a considerable distance north of where the Euphrates and Tigris now join to form the Shat-el-arab. Geological observations show that a secondary formation of limestone abruptly begins at a line drawn from Hit on the Euphrates to Samarra on the Tigris, i. e. some four hundred miles from their present mouth; this must once have formed the coast line, and all the country south was only gradually gained from the sea by river deposit. In how far man was witness of this gradual formation of the Babylonian soil we cannot determine at present; as far south as Larsa and Lagash man had built cities 4,000 years before Christ. It has been suggested that the story of the Flood may be connected with man's recollection of the waters extending far north of Babylon, or of some great natural event relating to the formation of the soil; but with our pres-

ent imperfect knowledge it can only be the merest suggestion. It may, however, well be observed that the astounding system of canals which existed in ancient Babylonia even from the remotest historical times, though largely due to man's careful industry and patient toil, was not entirely the work of the spade, but of nature once leading the waters of Euphrates and Tigris in a hundred rivulets to the sea, forming a delta like that of the Nile.

The fertility of this rich alluvial plain was in ancient times proverbial; it produced a wealth of wheat, barley, sesame, dates, and other fruits and cereals. The cornfields of Babylonia were mostly in the south, where Larsa, Lagash, Erech, and Calneh were the centres of an opulent agricultural population.

STATUE OF ROYAL PERSONAGE (NON-SEMITIC) WHO REIGNED AT LAGASH

The palm tree was cultivated with assiduous care and, besides furnishing all sorts of food and beverage, was used for a thousand domestic needs. Birds and water-fowls, herds and flocks, and rivers teeming with fish supplied the inhabitants with a rural plenty which surprises the modern reader of the cadastral surveys and tithe-accounts of the ancient temples. The country is completely destitute of mineral wealth, and possesses no stone or metal, although stone was already being imported from the Lebanon and the Ammanus as early as 3000 B. C.; and much earlier, about 4500 B. C., Ur-Nina King of Shurpura sent to Magan, i. e. the Sinaitic Peninsula, for hard stone and hard wood; while the copper mines of Sinai were probably being worked by Babylonians shortly after 3750, when Snefru, first king of the Fourth Egyptian dynasty, drove them away. It is remarkable that Babylonia possesses no bronze period, but passed from copper to iron; though in later ages it learnt the use of bronze from Assyria.

The towns of ancient Babylonia were the following: southernmost, (1) Eridu, Semitic corruption of the old name of *Eri-dugga*, "good city", at present the mounds of Abu-Sharain; and (2) Ur, Abraham's birthplace, about twenty-five miles north-east of Eridu, at present Mughair. Both of these towns lay west of the Euphrates. East of the Euphrates, the southernmost town was (3) Larsa, the Biblical Ellasar (Gen., xiv; in Vulg. and D. V. unfortunately rendered Pontus), at present Senkere; (4) Erech, the Biblical Arach (Gen., x, 10), fifteen miles north-west of Larsa, is at present Warka; and eight miles north-east from the modern Shatra was (5) Shurpura otherwise Lagash, now Tellô. Shurpura was one of Babylon's most ancient cities, though not mentioned in the Bible; probably "Raventown" (*shirpur-raven*), from the sacred emblem of its goddess and sanctuary, Nin-Girsu, or Nin-Sungir, which for a score of centuries was an important political centre, and prob-

ably gave its name to Southern Babylonia—Sungir, Shumer, or, in Gen., x, 10, Sennaar. (6) Gishban (read also *Gish-ukh*), a small city a little north of Shurpura, at present the mounds of Iskha, is of importance only in the very earliest history of Babylonia.

(7) The site of the important city of Isin (read also *Nisin*) has not yet been determined, but it was probably situated a little north of Erech. (8) Calneh, or Nippur (in D. V., Gen., x, 10, *Calanne*), at present Nuffar, was a great religious centre, with its Bel temple, unrivalled in antiquity and sanctity, a sort of Mecca for the Semitic Babylonians. Recent American excavations have made its name as famous as French excavations made that of Tellô or Shurpura. (9) In North Babylonia we have again, southernmost, the city of Kish, probably the Biblical Cush (Gen., x, 8); its ruins are under the present mound El-Ohémir, eight miles east of Hilla. (10) A little distance to the north-west lay Kutha, the present Telli Ibrahim, the city whence the Babylonian colonists of Samaria were taken (IV Kings, xvii, 30), and which played a great rôle in Northern Babylonia before the Amorite dynasty. (11) The site of Agade, i. e. Akkad (Gen., x, 10), the name of whose kings was dreaded in Cyprus and in Sinai in 3800 B. C., is unfortunately unknown, but it must have been not far from (12) Sippara; it has even been suggested that this was one of the quarters of that city, which was scarcely thirty miles north of Babylon and which, as early as 1881, was identified, through British excavations, with the present Abu-Habba. (13) Lastly, Babylon, with its twin-city Borsippa, though probably founded as early as 3800 B. C., played an insignificant rôle in the country's history until, under Hammurabi, about 2300 B. C., it entered on that career of empire which it maintained for almost 2000 years, so that its name now stands for a country and a civilization which was of hoary antiquity before Babylon rose to power and even before a brick of Babylon was laid.

**EARLY HISTORY.**—At the dawn of history in the middle of the fifth millennium before Christ we find in the Euphrates Valley a number of city-states, or rather city-monarchies, in rivalry with one another and in such a condition of culture and progress, that this valley has been called the cradle of civilization, not only of the Semitic world, but most likely also of Egypt. The people dwelling in this valley were

certainly not all of one race; they differed in type and language. The primitive inhabitants were probably of Mongolian ancestry, they are styled Sumerians, or inhabitants of Sumer, Sungir, Sennaar. They invented the cuneiform script, built the oldest cities, and brought the country to a great height of peaceful

HEAD OF A SUMERIAN, GUDEA EPOCH.  
FOUND IN TELLÔ

prosperity. They were gradually overcome, dispossessed, and absorbed by a new race that entered the plain between the two rivers, the Semites, who pressed on them from the north from the kingdom of Akkad. The Semitic invaders, however, eagerly adopted, improved, and widely spread the civilization of the race they had conquered. Although a number of arguments converge into an irrefragable proof that the Sumerians were the aboriginal inhabitants of Babylonia, we have no historical records of the time

when they were the sole occupants of the Euphrates Valley; at the dawn of history we find both races in possession of the land and to a certain extent mixed, though the Semite was predominant in the North while the Sumerian maintained himself for centuries in the South. Whence these Sumerians came, cannot be decided, and probably all that will ever be known is that, after a nomadic existence in mountainous districts in the East, they found a plain in the lands of Sennaar and dwelt in it (Gen., xi, 2). Their first settlement was Eridu, then a seaport on the Persian Gulf, where their earliest myths represent the first man, Adapu, or Adamu (Adam?), spending his time in fishing, and where the sea-god taught them the elements of civilization. It is certain, however, that they possessed a considerable amount of culture even before entering the Babylonian plain; for, coeval with the first foundations of their oldest temples, they possessed the cuneiform script, which can be described as a cursive hand developed out of picture-signs by centuries of primeval culture. From whence the Semitic race invaded Babylonia, and what was its origin, we know not, but it must be noted that the language they spoke, though clearly and thoroughly Semitic, is yet so strikingly different from all other Semitic languages that it stands in a category apart, and the time when it formed one speech with the other Semitic tongues lies immeasurably far back beyond our calculations.

The earliest records, then, show us a state of things not unlike that of our Saxon heptarchy: petty princes, or city-monarchies successfully endeavouring to obtain lordship over a neighbouring town or a group of towns, and in turn being overcome by others. And, considering that most of these towns were but a score of miles distant from one another and changed rulers frequently, the history is somewhat confusing. The most ancient ruler at present known to us is Enahgushanna, who is styled King of Kengi. Owing to the broken state of the sherd on which the inscription occurs, and which possibly dates soon after 5000 B. C., the name of his capital is unknown. It probably was Shurpura, and he ruled over Southern Babylonia. He claims to have won a great victory over the City of Kish, and he dedicated the spoil, including a statue of bright silver, to Mullil, the god of Calanne (Nippur). It seems likely that Kish was the most southern city captured by Semites; of one of its kings, Manishtusu, we possess a mace-head, as a sign of his royalty, and a stele, or obelisk, in archaic cuneiforms and Semitic Babylonian. Somewhat later Mesilim, the King of Kish, retrieved the defeat of his predecessor and acted as suzerain of Shurpura. Another probable name of a King of Kish is Urumush, or Alusharshid, though some make him King of Akkad. Whereas our information concerning the dynasty of Kish is exceedingly fragmentary, we are somewhat better informed about the rulers of Shurpura. About 4500 B. C. we find Urkagina reigning there and, somewhat later, Lugal (*lugal*, "great man", i. e. "prince", or "king") Shuggur. Then, after an interval, we are acquainted with a succession of no fewer than seven Kings of Shurpura: Gursar, Gunidu, Ur-Ninâ, Akur-Gal, Eannatum I, Entemena and Eannatum II—which last king must have reigned about 4000 B. C. De Sarszec found at Tellô a temple-wall some of the bricks of which bore the clear legend of Ur-Ninâ, thus leaving on record this king's building activity. Thanks to the famous stele of the vultures, now in the Louvre, to some clay steles in the British Museum, and a cone found at Shurpura, we have an idea of the warlike propensities of Eannatum I, who subdued the people of Gishban by a crushing defeat, made them pay an almost incredible war-indemnity of corn, and appointed over that city his own viceroy, "who placed his yoke on the land of Elam", "and of Gishgal", and who is represented as braining with

his club foes whose heads are protruding out of the opening of a bag in which they are bound.

That, notwithstanding these scenes of bloodshed, it was an age of art and culture can be evidently shown by such finds as that of a superb silver vase of Entemena, Eannatum's son and successor, and, as crown-prince, general of his army. After Eannatum II the history of Shurpura is a blank, until we find the name of Lugal Ushumgal, when, however, the city has for a time lost its independence, for this ruler was the vassal of Sargon I of Akkad, about 3800 B. C.

ARCHAIC BABYLONIAN INSCRIPTION TO SUN GOD BY  
SARGON I, ABOUT 3800 B. C.

Yet, some six centuries afterwards, when the dynasty of Akkad had ceased to be, the *patesis*, or high-priests, of Shurpura were still men of renown. A long inscription on the back of a statue tells us of the vast building achievements of Ur-Bau about the year 3200; and the name of his son and successor, Nammagani. About two centuries later we find Gudea, one of the most famous rulers the city ever possessed. Excavations at Tellô have laid bare the colossal walls of his great palace and have shown us how, both by land and sea, he brought his materials from vast distances, while his architecture and sculpture show perfect art and refinement, and we incidentally learn that he conquered the district of Anshan in Elam. After Gudea, we are acquainted with the names of four more rulers of Shurpura, but in these subsequent reigns the city seems to have quickly sunk into political insignificance. Another Sumerian dynasty was that of Erech, or Gishban. About 4000 B. C. a certain Lugal Zaggisi, son of the Patesi of Gishban, who became King of Erech, proudly styled himself King of the World, as Enshagkushanna and Alusharshid had done, claimed to rule from the Persian Gulf to the Mediterranean, and praises the supreme god Enlil, or Bel, of Nippur, who "granted him the dominion of all from the rising of the sun to the setting thereof and caused the countries to dwell in peace". Yet to us it seems but a rushlight of glory; for after his son Lugal-Kisalsi the Kingdom of Erech disappears in the night of the past. The same may be said of the dynasty of Agade. Ittibil's son, Sargon I, suddenly stands before us as a giant figure in history about 3800 B. C. He was a monarch proud of his race and language, for his inscriptions were in his Semitic mother-tongue, not in the Sumerian, like those of previous kings. He is rightly called the first founder of a Semitic empire. Under him flourished Semitic language, literature, and art, especially architecture. He established his dominion in Susa, the capital of Elam, subdued Syria and Palestine in three campaigns, set up an image of himself on the Syrian coast, as a monument of his triumphs, and welded his conquests into one empire. Naram-Sin, his son, even extended his father's conquests, invading the Sinai

Peninsula and, apparently, Cyprus, where a seal-cylinder was found on which he receives homage as a god. On inscriptions of that date first occurs mention of the city of God's Gate, or Babylon (*Bâb-ilu* sometimes *Bâb-ilani*, whence the Greek *Βαβυλών*), then written ideographically *Kâ-Dungir*.

After Bingani, Naram-Sin's son, Semitic successes were temporarily eclipsed; Egypt occupied Sinai, Elam became again independent, and in Babylonia itself the Sumerian element reasserted itself. We find a dynasty of Ur in prominence. This city seems at two different periods to have exercised the hegemony over the Euphrates Valley or part of it. First under Urgur and Dungi I, about 3400 B. C. This Urgur assumed the title of King of Sumer and Akkad, thus making the first attempt to unite North and South Babylonia into a political unit, and inaugurating a royal style which was borne perhaps longer than the title of any other dignity since the world was made. Ur predominates, for the second time, about 2800 B. C., under Dungi II, Gungunu, Bur-Sin, Gimil-Sin, and Ine Sin, whose buildings and fortifications are found in many cities of Babylonia. The history of Ur is as yet so obscure that some scholars (Thureau-Dangin, Hilprecht, Bezold) accept but two dynasties, others (Rogers) three, others (Hugo Radau) four. The supremacy of Ur is followed, about 2500 B. C., by that of (N) Isin, apparently an unimportant city, as its rulers style themselves Shepherds, or Gracious Lords, of Isin, and place this title after that of King of Ur, Eridu, Erech, and Nippur. Six rulers of Isin are known: Ishbigarra, Libit-Ishara, Bur-Sin II, Ur-Ninib, Ishme-Dagan, and Enannatum. The last of the city-kingsdoms was that of Larsa, about 2300 B. C., with its sovereigns Siniddinam Nur-Adad, Chedorananchundi, Chedorlaomer, Chedorlabug, and Eri-Aku. The composition of these royal names with Chedor, the Elamite *Kudur*, sufficiently shows that they did not belong to a native dynasty, whether Sumerian or Semitic. One of the earliest Elamite invaders of Babylonia was Rim-Amun, who obtained such a foothold on Babylonian soil that the year of his reign was used to date contract tablets, a sure sign that he was at least king *de facto*. Chedorananchundi invaded Babylonia about the year 2285, reached Erech, plundered its temples, and captured the city-goddess; but whether he established a permanent rule, remains doubtful. Somewhat later Chedorlaomer (*Kudur-Laghamar*, "Servant of Laghamar", an Elamite deity), known to us from the Bible, seems to have been more successful. Not only does he appear as overlord of Babylonia, but he carried his conquest as far west as Palestine. Chedorlabug was originally Prince of Emutbal, or western Elam, but obtained dominion over Babylonia and rebuilt the temple at Ur. His son Rim-Sin, or Eri-Aku, considered himself so well established on Babylonian territory that he affected the ancient titles, Exalter of Ur, King of Larsa, King of Sumer and Akkad. Yet he was the least of the city-kings, and a new order of things began with the rise of Babylon.

**THE FIRST EMPIRE.**—The dynasty which laid the foundation of Babylon's greatness is sometimes called the *Arabian*. It certainly was West-Semitic and almost certainly Amorite. The Babylonians called it the dynasty of Babylon, for, though foreign in origin, it may have had its actual home in that city, which it gratefully and proudly remembered. It lasted for 296 years and saw the greatest glory of the old empire and perhaps the Golden Age of the Semitic race in the ancient world. The names of its monarchs are: Sumu-abi (15 years), Sumu-la-ilu (35), Zabin (14), Apil-Sin (18), Sin-muballit (30); Hammurabi (35), Samsu-iluna (35), Abishua (25), Ammi-titana (25), Ammisaduga (22), Samsu-titana (31). Under the first five kings Babylon was still only the mightiest

amongst several rival cities, but the sixth king, Hammurabi, who succeeded in beating down all opposition, obtained absolute rule of Northern and Southern Babylonia and drove out the Elamite invaders. Babylonia henceforward formed but one state and was welded into one empire. They were apparently stormy days before the final triumph of Hammurabi. The second ruler strengthened his capital with large fortifications; the third ruler was apparently in danger of a native pretender or foreign rival called Immeru; only the fourth ruler was definitely styled king; while Hammurabi himself in the beginning of his reign acknowledged the suzerainty of Elam. This Hammurabi is one of the most gigantic figures of the world's history, to be named with Alexander, Cæsar, or Napoleon, but best compared to a Charlemagne, a conqueror and a lawgiver, whose powerful genius formed a lasting empire out of chaos, and whose beneficent influence continued for ages throughout an area almost as large as Europe. Doubtless a dozen centuries later Assyrian kings were to make greater conquests than he, but whereas they were giant destroyers he was a giant builder. His large public and private correspondence gives us an insight into his multitudinous cares, his minute attention to details, his constitutional methods. (See "The Letters and Inscriptions of Hammurabi", by L. W. King; London, 1898, 3 vols.) His famous code of civil and criminal law throws light on his genius as legislator and judge. The stele on which these laws are inscribed was found at Susa by M. de Morgan and the Dominican friar Scheil, and first published and translated by the latter in 1902. This astounding find, giving us, in 3638 short lines, 282 laws and regulations affecting the whole range of public and private life, is unequalled even in the marvellous history of Babylonian research. From no other document can a more swift and accurate estimate of Babylonian civilization be formed than from this code. (For a complete English translation see T. G. Pinches, op. cit. infra, pp. 487-519.)

Whereas the Assyrian kings loved to fill the boastful records of their reigns with ghastly descriptions of battle and war, so that we possess the minutest details of their military campaigns, the genius of Babylon, on the contrary, was one of peace, and culture, and progress. The building of temples, the adorning of cities, the digging of canals, the making of roads, the framing of laws was their pride; their records breathe, or affect to breathe, all serene tranquillity; warlike exploits are but mentioned by the way, hence we have, even in the case of the two greatest Babylonian conquerors, Hammurabi and Nabuchodonosor II, but scanty information of their deeds of arms. "I dug the canal Hammurabi, the blessing of men, which bringeth the water of the overflow unto the land of Sumer and Akkad. Its banks on both sides I made arable land; much seed I scattered upon it. Lasting water I provided for the land of Sumer and Akkad. The land of Sumer and Akkad, its separated peoples I united, with blessings and abundance I endowed them, in peaceful dwellings I made them to live"—such is the style of Hammurabi. In what seems an ode on the king, engraved on his statue we find the words: "Hammurabi, the strong warrior, the destroyer of his foes, he is the hurricane of battle, sweeping the land of his foes, he brings opposition to naught, he puts an end to insurrection, he breaks the warrior as an image of clay." But chronological details are still in confusion. In a very fragmentary list of dates the 31st year of his reign is given as that of the land Emutbalu, which is usually taken as that of his victory over western Elam, and considered by many as that of his conquest of Larsa and its king, Rim-Sin, or Eri-Aku. If the Biblical Amraphel be Hammurabi we have in Gen., xiv, the record of an expedition of

his to the Westland previous to the 31st year of his reign. Of Hammurabi's immediate successors we know nothing except that they reigned in peaceful prosperity. That trade prospered, and temples were built, is all we can say.

The Amorite dynasty was succeeded by a series of eleven kings which may well be designated as the *Unknown Dynasty*, which has received a number of names: Ura-Azag, Uru-ku, Shish-ku. Whether it was Semite or not is not certain; the years of reign are given in the "King-List", but they are surprisingly long (60-56-55-50-28, etc.), so that not only great doubt is cast on the correctness of these dates, but the very existence of this dynasty is doubted or rejected by some scholars (as Hommel). It is indeed remarkable that the kings should be eleven in number, like those of the Amorite dynasty, and that we should nowhere find a distinct evidence of their existence; yet these premises hardly suffice to prove that so early a document as the "King-List" made the unpardonable mistake of ascribing nearly four centuries of rule to a dynasty which in reality was contemporaneous, nay identical, with the Amorite monarchs. Their names are certainly very puzzling, but it has been suggested that these were not personal names, but names of the city-quarters from which they originated. Should this dynasty have a separate existence, it is safe to say that they were native rulers, and succeeded the Amorites without any break of national and political life. Owing to the questionable reality of this dynasty, the chronology of the previous one varies greatly; hence it arises, for instance, that Hammurabi's date is given as 1772-17 in Hastings' "Dictionary of the Bible", while the majority of scholars would place him about 2100 B. C., or a little earlier; nor are indications wanting to show that, whether the "Unknown Dynasty" be fictitious or not, the latter date is approximately right.

In the third place comes the Kassite dynasty, thirty-six kings, for 576 years. The tablet with this list is unfortunately mutilated, but almost all the nineteen missing names can with some exactness be supplied from other sources, such as the Assyrian synchronistic history and the correspondence with Egypt. This dynasty was a foreign one, but its place of origin is not easy to ascertain. In their own official designation they style themselves kings of Kardun-yash and the King of Egypt addresses Kadashman Bel as King of Kardun-yash. This Kardun-yash has been tentatively identified with South Elam. Information about the Kassite period is obtained but sparsely. We possess an Assyrian copy of an inscription of Agum-Kakrime, perhaps the seventh King of this dynasty: he styles himself: "King of Kasshu and Akkad, King of the broad land of Babylon, who caused much people to settle in the land of Ashmumak, King of Padan and Alvan, King of the land of Gutu, wide extended peoples, a king who rules the four quarters of the world". The extent of territory thus under dominion of the Babylonian monarch is wider than even that under the Amorite dynasty; but in the royal title, which is altogether unusual in its form, Babylon takes but the third place; only a few generations later, however, the old style and title is resumed, and Babylon again stands first; the foreign conquerors were evidently conquered by the peaceful conquest of superior Babylonian civilization. This Agum-Kakrime with all his wide dominions had yet to send an embassy to the land of Khani to obtain the gods Marduk and Zarpanit, the most sacred national idols, which had evidently been captured by the enemy. The next king of whom we have any knowledge is Karaindash (1450 B. C.) who settled the boundary lines of his kingdom with his contemporary Asshur-bel-nisheshu of Assyria. From the Tell-el-et-marna tablets we conclude that in 1400 B. C., Babylon

was no longer the one great power of Western Asia; the Kingdom of Assyria and the Kingdom of Mitanni were its rivals and wellnigh equals. Yet, in the letters which passed between Kadashman-Bel and Amenophis III, King of Egypt, it is evident that the King of Babylon could assume a more independent tone of fair equality with the great Pharaoh than the kings of Assyria or Mitanni. When Amenophis asks for Kadashman-Bel's sister in marriage, Kadashman-Bel promptly asks for Amenophis' sister in return; and when Amenophis demurs, Kadashman-Bel promptly answers that, unless some fair Egyptian of princely rank be sent, Amenophis shall not have his sister. When Assyria has sought Egyptian help against Babylon, Kadashman-Bel diplomatically reminds Pharaoh that Babylon has in times past given no assistance to Syrian vassal princes against their Egyptian suzerain, and expects Egypt now to act in the same way in not granting help to Assyria. And when a Babylonian caravan has been robbed by the people of Akko in Canaan, the Egyptian Government receives a peremptory letter from Babylon for *amende honorable* and restitution. Amenophis is held responsible, "for Canaan is thy country, and thou art its King". Kadashman-Bel was succeeded by Burnaburiash I, Kurigalzu I, Burnaburiash II. Six letters of the last-named to Amenhotep IV of Egypt suggest a period of perfect tranquillity and prosperity. For the cause and result of the first great conflict between Assyria and Babylon see ASSYRIA.

How the long Kassite dynasty came to an end we know not, but it was succeeded by the dynasty of Pashi (some read Isin), eleven kings in 132 years (about 1200-1064 B. C.). The greatest monarch of this house was Nabuchodonosor I (about 1135-25 B. C.); though twice defeated by Assyria, he was successful against the Lulubi, punished Elam, and invaded Syria, and by his brilliant achievements stayed the inevitable decline of Babylon. The next two dynasties are known as those of the Sealand, and of Bazi, of three kings each and these were followed by one Elamite king (c. 1064-900 B. C.). Upon these obscure dynasties follows the long series of Babylonian kings, who reigned mostly as vassals, sometimes quasi-independent, sometimes as rebel-kings in the period of Assyrian supremacy (for which see ASSYRIA).

THE SECOND, OR CHALDEAN, EMPIRE.—With the death, in 626 B. C., of Kandalanu (the Babylonian name of Assurbanipal), King of Assyria, Assyrian power in Babylon practically ceased. Nabopolassar, a Chaldean who had risen from the position of general in the Assyrian army, ruled Babylon as Shakanak for some years in nominal dependence on Ninive. Then, as King of Babylon, he invaded and

annexed the Mesopotamian provinces of Assyria, and when Sinsharishkun, the last King of Assyria, tried to cut off his return and threatened Babylon, Nabopolassar called in the aid of the Manda, nomadic tribes of Kurdistan, somewhat incorrectly identified with the Medes. Though Nabopolassar no doubt contributed his share to the events which led to the complete destruction of Ninive (606 B. C.) by these Manda barbarians, he apparently did not in person co-operate in the taking of the city, nor share the booty, but used the opportunity to firmly establish his throne in Babylon. Though Semites, the Chaldeans belonged to a race perfectly distinct from the Babylonians proper, and were foreigners in the Euphrates Valley. They were settlers from Arabia, who had invaded Babylonia from the South. Their stronghold

was the district known as the Sealands. During the Assyrian supremacy the combined forces of Babylon and Assyria had kept them in check, but, owing probably to the fearful Assyrian atrocities in Babylon, the citizens had begun to look towards their former enemies for help, and the Chaldean power grew apace in Babylon till, in Nabopolassar, it assumed the reins of government, and thus imperceptibly a foreign race superseded the ancient inhabitants. The city remained the same, but its nationality changed. Nabopolassar must have been a strong, beneficent ruler, engaged in rebuilding temples and digging canals, like his predecessors, and yet maintaining his hold over the conquered provinces. The Egyptians, who had learnt of the weakness of Assyria, had already, three years before the fall of Ninive, crossed the frontiers with a mighty army under Necho II, in the hope of sharing in the dismemberment of the Assyrian Empire. How Josias of Juda, trying to bar his way, was slain at Megiddo is known from IV Kings, xxiii, 29.

Meanwhile Ninive was taken, and Necho, resting satisfied with the conquest of the Syrian provinces, proceeded no further. A few years later, however, he marched a colossal army from Egypt to the Euphrates in hopes of annexing part of Mesopotamia. He was met by the Babylonian army at Carchemish, the ancient Hittite capital, where he wished to cross the Euphrates. Nabopolassar, being prevented by ill health and advancing age, had sent his son Nabuchodonosor, and put him in command. The Egyptians were utterly routed in this great encounter, one of the most important in history (604 B. C.). Nabuchodonosor pursued the enemy to the borders of Egypt, where he received the news of his father's death. He hastened back to Babylon, was received without opposition, and began, in 604 B. C., the forty-two years of his most glorious reign. His first difficulties arose in Juda. Against the solemn warning

INSCRIBED BOUNDARY STONE, REIGN OF MARDEK-BALATSUKKI, KING OF BABYLON, 830 B. C.

of Jeremiah the Prophet, Jehoiakim refused tribute, i. e. rebelled against Babylon. At first Nabuchodonosor II began a small guerilla warfare against Jerusalem; then, in 597 B. C., he dispatched a considerable army, and after a while began the siege in person. Jehonias, however, son of Jehoiakim, who as a lad of eighteen had succeeded his father, surrendered; 7000 men capable of bearing arms and 1000 workers in iron were carried away and made to form a colony on a canal near Nippur (the River Chobar mentioned in Ezekiel, i, 1), and Zedekias was substituted for Jehonias as vassal King of Juda.

Some ten years later Nabuchodonosor once more found himself in Palestine. Hophra, King of Egypt, who had succeeded Necho II in 589 B. C., had by secret agents tried to combine all the Syrian States in a conspiracy against Babylon. Edom, Moab, Ammon, Tyre, and Sidon had entered into the coalition, and at last even Juda had joined, and Zedekias, against the advice of Jeremiah, broke his oath of allegiance to the Chaldeans. A Babylonian army began to surround Jerusalem in 587 B. C. They were unable to take the city by storm and intended to subdue it by starvation. But Pharaoh Hophra entered Palestine to help the besieged. The Babylonians raised the siege to drive the Egyptians back; they then returned to Jerusalem and continued the siege in grim earnest. On July the 9th, 586 B. C., they poured in through a breach in the wall of Ezekias and took the city by storm. They captured the flying Zedekias and brought him before Nabuchodonosor at Riblah, where his children were slain before him and his eyes blinded. The city was destroyed, and the temple treasures carried to Babylon. A vast number of the population was deported to some districts in Babylonia, a miserable remnant only was allowed to remain under a Jewish governor, Godolias. When this governor was slain by a Jewish faction under Ishmael, a fraction of this remnant, fearing Nabuchodonosor's wrath, emigrated to Egypt, forcibly taking Jeremiah the Prophet with them.

Babylon's expedition to Juda thus ended in leaving it a devastated, depopulated, ruined district. Nabuchodonosor now turned his arms against Tyre. After Egypt this city had probably been the main-spring of the coalition against Babylon. The punishment intended for Tyre was the same as that of Jerusalem, but Nabuchodonosor did not succeed as he did with the capital of Juda. The position of Tyre was immeasurably superior to that of Jerusalem. The Babylonians had no fleet; therefore, as long as the sea remained open, Tyre was impregnable. The Chaldeans lay before Tyre thirteen years (585-572), but did not succeed in taking it. Ethobaal II, its king, seems to have come to terms with the King of Babylon, fearing, no doubt, the slow but sure destruction of Tyrian inland trade; at least we have evidence, from a contract-tablet dated in Tyre, that Nabuchodonosor at the end of his reign was recognized as suzerain of the city. Notwithstanding the little success against Tyre, Nabuchodonosor attacked Egypt in 567. He entered the very heart of the country, ravaged and pillaged as he chose, apparently without opposition, and returned laden with booty through the Syrian Provinces. But no permanent Egyptian occupation by Babylon was the result.

Thus Nabuchodonosor the Chaldean showed himself a capable military ruler, yet as a Babylonian monarch, following the custom of his predecessors, he gloried not in the arts of war, but of peace. His boast was the vast building operations which made Babylon a city (for those days) impregnable, which adorned the capital with palaces, and the famous "procession road", and Gate of Ishtar, and which restored and beautified a great number of temples in different towns of Babylonia. Of Nabuchodonosor's

madness (Daniel, iv, 28-34) no Babylonian record has as yet been found. A number of ingenious suggestions have been made on this subject, one of the best of which is Professor Hommel's substitution of Nabu-na'id for Nabu-chodonosor, but the matter had better stand over till we possess more information on this period. Of the prophet Daniel we find no certain mention in contemporary documents; the prophet's Babylonian name, Baltassar (Balatsu-usur), is unfortunately a very common one. We know of at least fourteen persons of that time called Balatu and seven called Balatsu, both of which names may be abbreviations of Baltassar, or "Protect His life". The etymology of Sidrach and Misach is unknown, but Abednego and Arioch (Abdnebo and Eriaku) are well known. Professor J. Oppert found the base of a great statue near a mound called Duair, east of Babylon, and this may have belonged to the golden image erected "in the plain of Dura of the province of Babylon" (Dan., iii, 1). In 561 B. C., Nabuchodonosor was succeeded by Evil-Merodach (IV Kings, xxv, 27), who released Joachim of Juda and raised him above the other vassal kings at Babylon, but his mild rule evidently displeased the priestly caste, and they accused him of reigning lawlessly and extravagantly. After less than three years he was assassinated by Neriglissar (Nergal-sar-usur), his brother-in-law, who is possibly the Nergalsharezer present at the taking of Jerusalem (Jer., xxxix, 3-13). Neriglissar was after four years succeeded by his son Labasi-Marduk, no more than a child, who reigned nine months and was assassinated.

The conspirators elected Nabonidus (Nabu-nā'id) to the throne. He was the last King of Babylon (555-539 B. C.). He was a royal antiquarian rather than a ruling king. From their foundations he rebuilt the great Shamash temple in Sippar and the Sin temple in Harran, and in his reign the city walls of Babylon "were curiously built with burnt brick and bitumen". But he resided in Tema, shunned the capital, offended the provincial towns by transporting their gods to Shu-anna, and alienated the priesthood of Babylon by what they would call misdirected piety. To us his antiquarian research after first foundation-stones of the temples he rebuilt is of the greatest importance. He tells us that the foundation-stone of the Shamash temple laid by Naram Sin had not been seen for 3200 years, which, roughly speaking, gives us 3800 B. C., for Sargon of Akkad, Naram Sin's father; upon this date most of our early Babylonian chronology is based. The actual duties of government seem to have been largely in the hands of the Crown Prince Baltassar (Bél-shar-usur), who resided in Babylon as regent. Meanwhile Cyrus, the petty King of Anshan, had begun his career of conquest. He overthrew Astyages, King of the Medes, for which victory Nabonaid praised him as the young servant of Merodach; he overthrew Croesus of Lydia and his coalition; he assumed the title of King of the Parsu, and had begun a new Indo-Germanic world power which replaced the decrepit Semitic civilization. At last Nabonaid, realizing the situation, met the Persians at Opis. Owing to internal strife amongst the Babylonians, many of whom were dissatisfied with Nabonaid, the Persians had an easy victory, taking the city of Sippar without fighting. Nabonaid fled to Babylon. Cyrus's soldiers, under the generalship of Ugbaru (Gobryas), Governor of Gutium, entered the capital without striking a blow and captured Nabonaid. This happened in June; in October Cyrus in person entered the city, paid homage at E-sagila to Marduk. A week later the Persians entered, at night, that quarter of the city where Baltassar occupied a fortified position in apparent security, where the sacred vessels of Jehovah's temple were profaned, where the hand appeared on the wall writing *Mane, Tekel Phares*, and where Daniel was offered

the third place in the kingdom (i. e. after Nabonaid and Baltassar). That same night Baltassar was slain and the Semitic Empire of Babylon came to an end, for the ex-King Nabonaid spent the rest of his life in Carmania.

In one sense Babylonian history ends here, and Persian history begins, yet a few words are needed on the return of the Jewish captives after their seventy years of exile. It has long been supposed that Cyrus, professing the Mazdean religion, was a strict monotheist and released the Jews out of sympathy for their faith. But this king was, apparently, only unconsciously an instrument in God's hands, and the permission for the Jews to return was merely given out of political sagacity and a wish for popularity in his new domains. At least we possess inscriptions of him in which he is most profuse in his homage to the Babylonian Pantheon. As Nabonaid had outraged the religious sentiments of his subjects by collecting all their gods in Shu-anna, Cyrus pursued an opposite policy and returned all these gods to their own worshippers; and, the Jews having no idols, he returned their sacred vessels, which Baltassar had profaned, and gave a grant for the rebuilding of their Temple. The very phraseology of the decree given in I Esdras, i, 2 sqq., referring to "the Lord God of Heaven" shows his respectful attitude, if not inclination, towards monotheism, which was professed by so many of his Indo-Germanic subjects. Darius Hystaspes, who in 521 B. C., after defeating Pseudo-Smerdis, succeeded Cambyzes (King of Babylon since 530 B. C.) was a convinced monotheist and adorer of Ahuramazda; and if it was he who ordered and aided the completion of the temple at Jerusalem, after the interruption caused by Samaritan intervention, it was no doubt out of sympathy with the Jewish religion (I Esdr., vi, 1 sqq.). It is not quite certain, however, that the Darius referred to is this king; it has been suggested that Darius Nothus is meant, who mounted the throne almost a hundred years later. Zerubabel is a thoroughly Babylonian name and occurs frequently on documents of that time; but we cannot as yet trace any connexion between the Zerubabel of Scripture and any name mentioned in these documents.

**SOME SPECIAL BIBLE REFERENCES.**—(1) The first passage referring to Babylonia is Gen., x, 8-10: "Chus begat Nemrod, and the beginning of his kingdom was Babylon and Arach and Achad and Chalanne in the land of Sennaar." The great historical value of these genealogies in Genesis has been acknowledged by scholars of all schools; these genealogies are, however, not of persons, but of tribes, which is obvious from such a bold metaphor as: "Chanaan begat Sidon, his first born" (v, 15). But in many instances the names are those of actual persons whose personal names became designations of the tribes, just as in known instances of Scottish and Irish clans or Arab tribes. Chus begat Nemrod. Chus was not a Semite, according to the Biblical account, and it is remarkable that recent discoveries all seem to point to the fact that the original civilization of Babylonia was non-Semitic and the Semitic element only gradually displaced the aborigines and adopted their culture. It must be noted, also, that in v. 22 Assur is described as a son of Sem, though in v. 11 Assur comes out of the land of Sennaar. This exactly represents the fact that Assyria was purely Semitic where Babylonia was not. Some see in Chus a designation of the city of Kish, mentioned above amongst the cities of early Babylonia, and certainly one of its most ancient towns. Nemrod, on this supposition, would be none else than Nin-marad, or Lord of Marad, which was a daughter-city of Kish. Gilgamesh, whom mythology transformed into a Babylonian Hercules, whose fortunes are described in the Gilgamesh-epos, would then be the person designated by the Biblical Nemrod. Others

again see in Nemrod an intentional corruption of Amarudu, the Akkadian for Marduk, whom the Babylonians worshipped as the great God, and who, perhaps, was the deified ancestor of their city. This corruption would be parallel to Nisroch (IV Kings, xix, 37) for Assuraku, and Nibhaz (IV Kings, xvii, 31) for Abahazu, or Abed Nego for Abdebeo. The description of "stout hunter" or hero-entrapper would fit in well with the rôle ascribed to the god Marduk, who entrapped the monster Tiamtu in his net. Both Biblical instances, IV Kings, xvii, 31, and xix, 37, however, are very doubtful, and Nisroch has recently found a more probable explanation.

(2) "The beginning of his kingdom was Babylon and Arach and Achad and Calanne".—These cities of Northern Babylonia are probably enumerated inversely to the order of their antiquity; so that Nippur (Calanne) is the most ancient, and Babylon the most modern. Recent excavations have shown that Nippur dates far back beyond the Sargonic age (3800 B. C.) and Nippur is mentioned on the fifth tablet of the Babylonian Creation-story.

(3) The next Biblical passage which requires mention is that dealing with the Tower of Babel (Gen., xi, 1-9). This narrative, though couched in the terms of Oriental folklore, yet expresses not merely a moral lesson, but refers to some historical fact in the dim past. There was perhaps in the ancient world no spot on all the earth where such a variety of tongues and dialects was heard as in Babylonia, where Akkadians, Sumerians, and Amorites, Elamites, Kassites, Sutites, Qutites, and perhaps Hittites met and left their mark on the language; where Assyrian or Semitic Babylonia itself only very gradually displaced the older non-Semitic tongue, and where for many centuries the people were at least bilingual. It was the spot where Turanian, Semitic, and Indo-Germanic met. Yet there remained in the national consciousness the memory that the first settlers in the Babylonian plain spoke one language. "They removed from the East", as the Bible says and all recent research suggests. When we read, "The earth was of one tongue", we need not take this word in its widest sense, for the same word is often translated "the land". Philology may or may not prove the unity of all human speech, and man's descent from a single set of parents seems to postulate original unity of language; but in any case the Bible does not here seem to refer to this, and the Bible account itself suggests that a vast variety of tongues existed previous to the foundations of Babylon. We need but refer to Gen., x, 5, 21, 31: "In their kindreds and tongues and countries and nations"; and Gen., x, 10, where Babylon is represented as almost coeval with Arach, Achad, and Calanne, and posterior to Gomer, Magog, Elam, Arphaxad, so that the original division of languages cannot first have taken place at Babel. What historical fact lies behind the account of the building of the Tower of Babel is difficult to ascertain. Of course any real attempt to reach heaven by a tower is out of the question. The mountains of Elam were too close by, to tell them that a few yards more or less were of no importance to get in touch with the sky. But the wish to have a rallying-point in the plain is only too natural. It is a striking fact that most Babylonian cities possessed a *ziggurat* (a stage, or temple-tower), and these bore very significant Sumerian names, as, for instance, at Nippur, *Dur-anki*, "Link of heaven and earth"—"the summit of which reaches unto heaven, and the foundation of which is laid in the bright deep"; or, at Babylon, *Esagila*, "House of the High Head", the more ancient designation of which was *Etemenanki*, "House of the Foundation of Heaven and Earth"; or *Ezida*, at Borsippa, by its more ancient designation *Eurimianki*, or "House of the Seven Spheres of Heaven and Earth". The remains of *Ezida*, at present Birs Nimrud, are tradition-

ally pointed out as the Tower of Babel; whether rightly, is impossible to say; Esagila, in Babylon itself, has as good, if not a better, claim. We have no record of the building of the city and tower being interrupted by any such catastrophe as a confusion of languages; but that such an interruption because of diversity of speech of the townspeople took place, is not impossible. In any case it can only have been an interruption, though perhaps of many centuries, for Babylon increased and prospered for many centuries after the period referred to in Genesis. The history of the city of Babylon before the Amorite dynasty is an absolute blank, and we have no facts to fill up the fifteen centuries of its existence previous to that date. The etymology given for the name Babel in Gen., xi, 9, is not the historic meaning of the word, which, as given above is *Kadungir*, *Bâb-Itu*, or "God's Gate". The derivation in Genesis rests upon the similarity of sound with a word formed from the root *balal*, "to stammer", or "be confused".

(4) Next to be mentioned is the account of the battle of the four kings against five near the Dead Sea (Gen., xiv). Sennaar mentioned in v. 1 is the Sumer of the Babylonian inscriptions, and Amraphel is identified by most scholars with the great Hammurabi, the sixth King of Babylon. The initial guttural of the king's name being a soft one, and the Babylonians being given to dropping their H's, the name actually occurs in cuneiform inscriptions as Ammurapi. The absence of the final *l* arises from the fact that the sign *pi* was misread *bil* or perhaps *ilu*, the sign of deification, or complement of the name, being omitted. There is no philological difficulty in this identification, but the chronological difficulty (viz., of Hammurabi being vassal of Chedorlaomer) has led others to identify Amraphel with Hammurabi's father Sin-muballit, whose name is ideographically written Amar-Pal. Arioch, King of Pontus (Pontus is St. Jerome's unfortunate guess to identify Ellazar) is none else but Rim-Sin, King of Larsa (Ellazar of A. V.), whose name was Eri-Aku, and who was defeated and dethroned by the King of Babylon, whether Hammurabi or Sin-muballit; and if the former, then this occurred in the thirty-first year of his reign, the year of the land of Emutbalu, Eri-Aku bearing the title of King of Larsa and Father of Emutbalu. The name Chedorlaomer has apparently, though not quite certainly, been found on two tablets together with the names Eriaku and Tudhula, which latter king is evidently "Thadal, king of the Nations". The Hebrew word *goyim*, "nations", is a clerical error for *Gutium* or *Guti*, a neighbouring state which plays an important rôle throughout Babylonian history. Of Kudur-lahgumal, King of the Land of Elam, it is said that he "descended on", and "exercised sovereignty in Babylon the city of Kar-Duniash". We have documentary evidence that Eriaku's father Kudurmabug, King of Elam, and after him Hammurabi of Babylon, claimed authority over Palestine the land of Martu. This Biblical passage, therefore, which was once described as bristling with impossibilities, has so far only received confirmation from Babylonian documents.

(5) According to Gen., xi, 28 and 31, Abraham was a Babylonian from the city of Ur. It is remarkable that the name *Abu ramu* (Honoured Father) occurs in the eponym lists for 677 B. C., and *Abê ramu*, a similar name, on a contract-tablet in the reign of Apil-Sin, thus showing that Abram was a Babylonian name in use long before and after the date of the Patriarch. His father removed from Ur to Harran, from the old centre of the Moon-cult to the new. Talmudic tradition makes Terah an idolater, and his religion may have had to do with his emigration. No excavations have as yet taken place at Harran, and Abraham's ancestry remains obscure. Aberamu of Apil-Sin's reign had a son Sha-Amurri, which fact

shows the early intercourse between Babylonian and the Amorite land, or Palestine. In Chanaan Abraham remained within the sphere of Babylonian language and influence, or perhaps even authority. Several centuries later, when Palestine was no longer part of the Babylonian Empire, Abd-Hiba, the King of Jerusalem, in his intercourse with his over-lord of Egypt, wrote neither his own language nor that of Pharaoh, but Babylonian, the universal language of the day. Even when passing into Egypt, Abraham remained under Semitic rule, for the Hyksos reigned there.

(6) Considering that the progenitor of the Hebrew race was a Babylonian, and that Babylonian culture remained paramount in Western Asia for more than 1000 years, the most astounding feature of the Hebrew Scriptures is the almost complete absence of Babylonian religious ideas, the more so as Babylonian religion, though Oriental polytheism, possessed a refinement, a nobility of thought, and a piety, which are often admirable. The Babylonian account of creation, though often compared with the Biblical one, differs from it on main and essential points for (a) it contains no direct statement of the *Creation* of the world: Tiamtu and Apsu, the watery waste and the abyss wedded together, *beget* the universe; Marduk, the conqueror of chaos, shapes and orders all things; but this is the mythological garb of evolution as opposed to creation. (b) It does not make the Deity the first and only cause of the existence of all things; the gods themselves are but the outcome of pre-existent, apparently eternal, forces; they are not cause, but effect. (c) It makes the present world the outcome of a great war; it is the story of Resistance and Struggle, which is the exact opposite of the Biblical account. (d) It does not arrange the things created into groups or classes, which is one of the main features of the story in Genesis. (e) The work of creation is not divided into a number of days—the principal literary characteristic of the Biblical account. The Babylonian mythology possesses something analogous to the Biblical Garden of Eden. But though they apparently possessed the word *Edina*, not only as meaning "the Plain", but as a geographical name, their garden of delight is placed in Eridu, where "a dark vine grew; it was made a glorious place, planted beside the abyss. In the glorious house, which is like a forest, its shadow extends; no man enters its midst. In its interior is the Sun-god Tam-muz. Between the mouths of the rivers, which are on both sides". This passage bears a striking analogy to Gen., ii, 8-17. The Babylonians, however, seem to have possessed no account of the Fall. It seems likely that the name of Ea, or Ya, or Aa, the oldest god of the Babylonian Pantheon, is connected with the name Jahve, Jahu, or Ja, of the Old Testament. Professor Delitzsch recently claimed to have found the name Jahve-ilu on a Babylonian tablet, but the reading has been strongly disputed by other scholars. The greatest similarity between Hebrew and Babylonian records is in their accounts of the Flood. Pir-napistum, the Babylonian Noe, commanded by Ea, builds a ship and transfers hither his family, the beasts of the field, and the sons of the artificers, and he shuts the door. Six days and nights the wind blew, the flood overwhelmed the land. The seventh day the storm ceased; quieted, the sea shrank back; all mankind had turned to corruption. The ship stopped at the land of Nisir. Pir-napistum sends out first a dove, which returns; then a swallow, and it returns; then a raven, and it does not return. He leaves the ship, pours out a libation, makes an offering on the peak of the mountain. "The gods smelled a savour, the gods smelled a sweet savour, the gods gathered like flies over the sacrificer." No one reading the Babylonian account of the Flood can deny its intimate connexion with the narrative in Genesis, yet

the former is so intimately bound up with Babylonian mythology, that the inspired character of the Hebrew account is the better appreciated by the contrast.

**RELIGION.**—The Babylonian Pantheon arose out of a gradual amalgamation of the local deities of the early city states of Sumer and Akkad. And Babylonian mythology is mainly the projection into the heavenly sphere of the earthly fortunes of the early centres of civilization in the Euphrates valley. Babylonian religion, therefore, is largely a Sumerian, i. e. Mongolian product, no doubt modified by Semitic influence, yet to the last bearing the mark of its

BRICK OF KURIGALEZU KING OF BABYLON (ABOUT 1400 B. C.), BRITISH MUSEUM

Mongolian origin in the very names of its gods and in the sacred dead languages in which they were addressed. The tutelary spirit of a locality extended his power with the political power of his adherents; when the citizens of one city entered into political relations with the citizens of another, popular imagination soon created the relation of father and son, brother and sister, or man and wife, between their respective gods. The Babylonian Trinity of Anu, Bel, and Ea is the result of later speculation, dividing the divine power into that which rules in heaven, that which rules on earth, and that which rules under the earth. Ea was originally the god of Eridu on the Persian Gulf and therefore the god of the ocean and the waters below. Bel was originally the chief spirit (in Sumerian *En-lil*, the older designation of Bel, which is Semitic for "chief" or "lord") of Nippur, one of the oldest, possibly the oldest, centre of civilization after Eridu. Anu's local cult is as yet uncertain; Erech has been suggested; we know that Gudea erected a temple to him; he always remained a shadowy personality. Although nominal head of the Pantheon, he had in later days no temple dedicated to him except one, and that he shared with Hadad. Sin, the moon, was the god of Ur; Shamash, the sun, was the god of Larsa and Sippar; when the two towns of Girsu and Uruazaga were united into the one city of Lagash, the two respective local deities, Nin-Girsu and Bau, became man and wife, to whom Gudea brought wedding presents. With the rise of Babylon and the political unification of the

whole country under this metropolis, the city-god Marduk, whose name does not occur on any inscription previous to Hammurabi, leaps to the foreground. The Babylonian theologians not only gave him a place in the Pantheon, but in the Epos "Enuma Elish" it is related how, as reward for overcoming the Dragon of Chaos, the great gods, his fathers, bestowed upon Marduk their own names and titles. Marduk gradually so outshone the other deities that these were looked upon as mere manifestations of Marduk, whose name became almost a synonym for God. And though Babylonians never quite reached monotheism, their ideas sometimes seem to come near it. Unlike the Assyrians, the Babylonians never possessed a female deity of such standing in the Pantheon as Ishtar of Ninive or Arbela. In the Second Empire, Nebo, the city-god of Borsippa, over against Babylon, rises into prominence and wins honours almost equal to those of Marduk, and the twin cities have two almost inseparable gods. Judging from the continual invocation of the gods in every conceivable detail of life, and the continual acknowledgment of dependence on them, and the anxious humble prayers that are still extant, the Babylonians were as a nation pre-eminent in piety.

**CIVILIZATION.**—It is impossible in this article to give an idea of the astounding culture which had developed in the Euphrates Valley, the cradle of civilization, even as early as 2300 B. C. A perusal of the article HAMMURABI, and a careful reading of his code of laws will give us a clear insight in the Babylonian world of four thousand years ago. The ethical litany of the Shurpu tablets contains an examination of conscience more detailed than the so-called "Negative" confessions in the Egyptian Book of the Dead and fills us with admiration for the moral level of the Babylonian world. Though polygamists, the Babylonians raised but one woman to the legal status of wife, and women possessed considerable rights and freedom of action. Marriage settlements protected the married, and the unmarried managed their own estates. On the other hand, they possessed an institution analogous to vestal virgins at Rome. These female votaries had a privileged position in Babylonian society; we know, however, of no such dire penalty for their unfaithfulness as the Roman law inflicted. A votary could even enter into nominal marriage, if she gave her husband a maid as Sarah gave Abraham. According to Law 110 of Hammurabi, however, "if a votary who dwells not in a cloister open a wine-house or enter a wine-house for drink, that female they shall burn". On the other hand (Law 127), "if a man has caused the finger to be pointed against a votary and has not justified it, they shall set that man before the judges and mark his forehead". The dark side of Babylonian society is seen in the strange enactment: "If the child of a courtesan or of a public woman come to know his father's house and despise his foster-parents and go to his father's house, they shall tear out his eyes". The repeated coupling of the words "votary or public woman" and the minute and indulgent legislation of which they are the objects make us fear that the virtue of chastity was not prized in Babylon. Although originally only a provident, prosperous agricultural people, the Babylonians seem to have developed a great commercial talent; and well might some Assyrian Napoleon have referred to his Southern neighbours as "that nation of shopkeepers". In 1893 Dr. Hilprecht found 730 tablets twenty feet underground in a ruined building at Nippur, which proved to be the banking archives of the firm Nurashu and Sons, signed, sealed, and dated about 400 B. C. We also possess a deed of purchase by Manishtusu, King of Kish, some 4000 B. C., in archaic Babylonian, which in accuracy and minuteness of detail in moneys and values would

compare well with a modern balance sheet that has passed the chartered accountants. Proofs are not lacking of the commercial talents of the Babylonians during the thirty-five centuries between these dates.

LITERATURE.—Vast as is the material of Babylonian inscriptions, equally varied are their contents. The great majority no doubt of the 300,000 tablets hitherto unearthed deal with business matters rather than with matters literary; contracts, marriage settlements, cadastral surveys, commercial letters, orders for goods or acknowledgments of their receipt, official communications between magistrates and civil or military governors, names, titles, and dates on foundation stones, private correspondence, and so on. Still a fair percentage has a right to be strictly classed as "literature" or "belles-lettres". We must moreover constantly keep in mind that only about one-fifth of the total number of these tablets have been published and that any description of their literature must as yet be fragmentary and tentative. It is convenient to classify as follows: (1) the Epos; (2) the Psalm; (3) the Historical Narrative.

ONE OF THE SEVEN TABLETS OF CREATION

(1) *The Epos*.—(a) The so-called "Seven Tablets of Creation", because written on a series of seven very mutilated tablets in the Kouyunshik Library. Happily the lacunæ can here and there be filled up by fragments of duplicates found elsewhere. Borrowing an expression from the early Teuton literature, this might be called the "saga of the primeval chaos". Assyrian scribes called it by its first words "Enuma Elish" (When on high) as the Jews called Genesis "Bereshith" (in the beginning). Although it contains an account of the world's origin, as above contrasted with the account given in the Bible, it is not so much a cosmogony as the story of the heroic deeds of the god Marduk, in his struggle with the Dragon of Chaos. Though the youngest of the gods, Marduk is charged by them to fight Tiamtu and the gods on her side. He wins a glorious victory; he takes the tablets of fate from Kingu, her husband; he splits open her skull, hews asunder the channels of her blood and makes the north wind carry it away to hidden places. He divides the corpse of the great Dragon and with one half makes a covering for the heavens and thus fixes the waters above the firmament. He then sets about fashioning the universe, and the stars, and the moon; he forms man. "Let me gather my blood and let me set up a man, let me make then men dwelling on the earth." When Marduk has finished his work, he is acclaimed by all the gods with joy and given fifty names. The gods are apparently eager to bestow their own titles upon him. The aim of the poem clearly is to explain how Marduk, the local god of as modern a city as Babylon, had displaced the deities of the older Babylonian cities, "the gods his fathers".

(b) The great national epos of Gilgamesh, which probably had in Babylonian literature some such place as the *Odyssey* or the *Æneid* amongst the Greeks and Romans. It consists of twelve chapters or cantos. It opens with the words *Sha nagba imûru* (He who saw everything). The number of extant tablets is considerable, but unfortunately they are all very fragmentary and with exception of the eleventh chapter the text is very imperfect and shows as yet

huge lacunæ. Gilgamesh was King of Erech the Walled. When the story begins, the city and its temples are in a ruinous state. Some great calamity has fallen upon them. Erech has been besieged for three years, till Bel and Ishtar interest themselves in its behalf. Gilgamesh has yearned for a companion, and the goddess Arurn makes Ea-bani, the warrior; "covered with hair was all his body and he had tresses like a woman, his hair grew thick as corn; though a man, he lives amongst the beasts of the field". They entice him into the city of Erech by the charms of a woman called Samubat; he lives there and becomes a fast friend of Gilgamesh. Gilgamesh and Ea-bani set out in quest of adventure, travel through forests, and arrive at the palace of a great queen. Gilgamesh cuts off the head of Humbabe, the Elamite king. Ishtar the goddess falls in love with him and asks him in marriage. But Gilgamesh scornfully reminds her of her treatment of former lovers. Ishtar in anger returns to heaven and revenges herself by sending a divine bull against Gilgamesh and Ea-bani. This animal is overcome and slain to the great joy of the city of Erech. Warning dreams are sent to Gilgamesh and his friend Ea-bani dies, and Gilgamesh sets out on a far journey, to bring his friend back from the underworld. After endless adventures our hero reaches in a ship the waters of death and converses with Pir-napistum, the Babylonian Noe, who tells him the story of the flood, which fills up the eleventh chapter of some 330 lines, referred to above. Pir-napistum gives to Gilgamesh the plant of rejuvenescence but he loses it again on his way back to Erech. In the last chapter Gilgamesh succeeds in calling up the spirit of Ea-bani, who gives a vivid portrayal of life after death "where the worm devoureth those who had sinned in their heart, but where the blessed lying upon a couch, drink pure water". Though weird in the extreme and to our eyes a mixture of the grotesque with the sublime, this epos contains descriptive passages of unmistakable power. A few lines as example: "At the break of dawn in the morning there arose from the foundation of heaven a dark cloud. The Storm god thundered within it and Nebo and Marduk went before it. Then went the heralds over mountain and plain. Urugala dragged the anchors loose, the Annunak raised their torches, with their flashing they lighted the earth. The roar of the Storm god reached to the heavens and everything bright turned into darkness."

(c) The Adapa-Legend, a sort of "Paradise Lost", probably a standard work of Babylonian literature, as it is found not only in the Ninive library, but even among the Amarna tablets in Egypt. It relates how Adapa, the wise man or *Atrachasis*, the purveyor to the sanctuary of Ea, is deceived, through the envy of Ea. Anu, the Supreme God, invites him to Paradise, offers him the food and drink of immortality, but Adapa, mistakenly thinking it poison, refuses, and loses life everlasting. Anu scornfully says: "Take him and bring him back to his earth."

(d) Ishtar's descent into Hades, here and there bearing a surprising resemblance to well-known lines of Dante's *Inferno*. The goddess of Erech goes:

To the land whence no one ever returneth,

To the house of gloom where dwelleth Irkalla,

To the house which one enters but nevermore leaveth,

On the way where there is no retracing of footsteps,

To the house which one enters, and daylight all ceases.

On an Amarna tablet we find a description ghostly and graphic of a feast, a fight, and a wedding in hell.

(e) Likewise fragments of legendary stories about the earliest Babylonian kings have come down to us. One of the most remarkable is that in which Sargon of Akkad, born of a vestal maiden of high degree,

is exposed by his mother in a basket of bulrushes and pitch floating on the waters of the Euphrates; he is found by a water carrier and brought up as a gardener. This story cannot but remind us of Moses' birth.

(2) *The Psalm*.—This species of literature, which formerly seemed almost limited to the Hebrew race, had a luxurious growth on Babylonian soil. These songs to the gods or to some one god are indeed often either weird incantations or dreary litanies; and when after perusal of a good number of them one turns to the Hebrew Psalter, no fair-minded person will deny the almost immeasurable superiority of the latter. On the other hand, naught but unreasoning prejudice would trouble to deny the often touching beauty and nobility of thought in some of these productions of the instinctive piety of a noble race. It is natural moreover that the tone of some Babylonian psalms should strongly remind us of some songs of Israel, where every psalmist boasted that he had as forefather a Babylonian: Abraham from Ur of the Chaldees. Some of these psalms are written in Sumerian with Semitic Babylonian interlinear translations; others in Semitic Babylonian only. They show all sorts of technicalities in versification, parallelism, alliteration, and rhythm. There are acrostics and even double acrostics, the initial and final syllable of each line being the same. These psalms contain praise and supplication of the great gods, but, what is most remarkable, some of them are penitential psalms, the sinner mourning his sin and begging restoration to favour. Moreover, there are a great number of "lamentations" not over personal but over national calamities; and a Babylonian "prophet" wept over the fall of Nippur many centuries before Jeremiah wrote his inspired songs of sorrow over the destruction of Jerusalem. Besides these there are numberless omen tablets, magical recipes for all sorts of ills, and rituals of temple service, but they belong to the history of religion and astrology rather than to that of literature.

(3) *The Historical Narrative*.—The Babylonians seemed to have possessed no *ex professo* historians, who, like a Herodotus, endeavoured to give a connected narrative of the past. We have to gather their history from the royal inscriptions on monuments and palace walls and state-cylinders, in which each sovereign records his great deeds in *perpetuam rei memoriam*. Whereas we fortunately possess an abundance of historical texts of the Assyrian kings, thanks to the discovery of Assurbanipal's library, we are as yet not so fortunate in the case of Babylonian kings; of the early Babylonian city-kings we have a number of shorter inscriptions on steles and boundary stones in true lapidary style and longer historical records in the great cylinder inscriptions of Gudea of Lagash. Whereas we possess considerable historical texts of Hammurabi, we possess but very little of his many successors on the Babylonian throne until the Second Babylonian Empire, when long historical texts tell us the doings of Nabopolassar, Nabuchodonosor, and Nabonidus. They are all of a pompous grandeur that palls a little on a Western mind, and their self-adulation comes strange to us. They are in the style which popular imagination is wont to attribute to the utterances of His Celestial Majesty, the Emperor of China. They invariably begin with a long homage to the gods, giving lengthy lists of deities, protectors of the sovereign and state, and end with imprecations on those who destroy, mutilate, or disregard the inscription. The Babylonian royal inscriptions, as far as at present known, are almost without exception peaceful in tone and matter. Their ever recurring themes are the erection, restoration, or adornment of temples and palaces, and the digging of canals. Even when at war, the Babylonian king thought it bad taste to

refer to it in his monumental proclamations. No doubt the Babylonians must have despised Assyrian inscriptions as bloodthirsty screeds. Because the genius of Babylon was one of culture and peace; therefore, though a world-centre a thousand years before Ninive, it lasted more than a thousand years after Ninive was destroyed.

In addition to literature given after article ASSYRIA: BOSCAWEN, *The First of Empires* (2d ed., London, 1905); BEZOLD, *Ninive und Babylon* (Leipzig, 1903); PINCHES, *The Old Testament in the Light of the Historical Records and Legends of Assyria and Babylonia* (London, 1903); SAYCE, *The Archaeology of the Cuneiform Inscriptions* (London, 1907); JASTROW, *Die Religion der Babylonier und Assyrier* (Gießen, I, 1905; II, 1907); RADAU, *Early Babylonian History* (New York, 1900); LAGRANGE, *Historical Criticism and O. T.* (London, 1906); JEREMIAS, *Das Alte Testament in Lichte des alten Orients* (Leipzig, 1906); DELITZSCH, *Babel und Bibel* (Leipzig and Stuttgart, 1905) for a collection of texts with immediate bearing on O. T.; WINCKLER, *Keilschriftliches Textbuch zum Alten Testament* (Leipzig, 1903).

J. P. ARENDZEN.

**Baccanceld** (BAPCHILD, near Sittingbourne, Kent), SYNOD OF (694). This meeting was rather a *witenagemot*, or Parliament, than an ecclesiastical synod, presided over by Wihtried, King of Kent. There were present at its deliberations Brihtwald, Archbishop of Canterbury, Tobias, Bishop of Rochester, besides abbots, abbesses, priests, deacons, and lay lords. The chief enactments are embodied in a charter whose terms secured to the Church forever the donations and privileges bestowed on it by the laity, since 'what had once been given to God might never be resumed to man's use'. Moreover, on the death of prelates fitting successors were to be appointed with the advice and approval of the archbishop, without any royal intervention; such action would nullify the election; and lay interference was expressly disclaimed as being outside the limits of the laity's rights. The cathedral churches of Canterbury and Rochester were granted in perpetuity immunity from royal requisitions or tribute otherwise than voluntary, and these were never to create precedent; all these privileges being secured under severe spiritual penalties for infringement. The interest and importance of this document rest on the fact that Spelman and others regard it as the most ancient English charter. Its authenticity has been called in question; but though different versions of it exist, there can be little doubt of the general genuineness of the terms common to all, as here summarized.

HENRY NORBERT BIRT.

**Bacchylus**, Bishop of Corinth, whom Eusebius mentions among the prominent second-century churchmen (H. E., V, xxii), is known only by the part he took in sustaining Pope Victor I in the Quartodeciman controversy. When that pope, determining to have the Roman paschal computation universally accepted, wrote to secure the co-operation of influential churches, many synods were held and their presiding bishops wrote to Victor, all, with the exception of the Asiatics, in support of his design. Among them was Bacchylus. According to a ninth-century witness (c. xiii in Hardouin, *Acta Concil.*, V, 1495) he had held a provincial synod, about 195, with eighteen other bishops; and St. Jerome attests that his letter, qualified as *elegantem librum*, was written in the name of the bishops of Achaia (De vir. ill., c. xlv). Eusebius, however, who had perhaps seen the letter, distinguishes it from the synodical epistles by saying that it was written in Bacchylus's own name (loc. cit., xxiii). It might be that Bacchylus held a synod, but in writing gave his letter a personal rather than a collective form. No text of the letter is extant, the sources above referred to containing the only available data.

TILLEMONT, *Mémoires* (Venice, 1732), III, 106-107, 633; HARNACK, *Geschichte der altchristl. Lit.* (Leipzig, 1893), I, 281; VENABLES in *Dict. Christ. Biog.*, I, 236.

JOHN B. PETERSON.

**Bacharius**, an early fifth-century writer, known only through two treatises which warrant the conjecture that he was a monk, possibly an abbot, and a Spaniard. The first of these writings, entitled by Gennadius "Liber de Fide" is an apologetical letter to the pope in which Bacharius, like many another monk coming to Rome from Spain at the time, vindicates his faith against the suspicions of a heterodoxy akin to Priscillianism which were based on his residence in heretical lands. He points out that he left his country because of its errors (whence some conclude that he was exiled) and makes a profession of faith that witnesses to his thorough orthodoxy. The second, entitled "Ad Januarium liber de reparatione lapsi", is an appeal to an abbot, Januarius, to mitigate his severity towards an incontinent monk who though repentant was excluded from the monastery. The letter breathes a beautiful spirit of prudently tempered charity and like the first is replete with scriptural texts and allusions. The theory of Bacharius's identity with the Spanish bishop Perigrinus seems untenable.

Texts of letters with GALLARD's introduction and GENNADIUS's references in *P. L.*, XX, 1015-62; MURATORI, *Opere* (Aresso, 1770), XI, 248-275; TILLEMONT, *Mémoires* (Venice, 1732), XVI, 473-478; VENABLES in *Dict. Christ. Biog.*, I, 236; MANGENOT in *Dict. de théol. cath.*, II, 6.

JOHN B. PETERSON.

**Bachmann** (AMNICOLA), PAUL, Catholic theological controversialist, b. at Chemnitz, Saxony, about 1466. His biographical data are very meagre. Nothing is known of his youth, and very little of his life, before his appearance as an opponent of the Lutheran movement. He entered the Order of Cîteaux at the convent of Altenzelle on the Mulde. He seems to have been employed as professor in the Cistercian house of studies newly founded at Leipzig. Here he won the degree of Master of Arts. He was made procurator and finally, in 1522, Abbot of Altenzelle, in succession to Abbot Martin (1493-1522). At the outbreak of Lutheranism, Bachmann sprang into prominence as one of its most energetic opponents. He was one of that distinguished group of scholars composed of Cochläus, Emser, Peter Forst, and Augustin von Alvelde, who, under the direction of John of Schleinitz, Bishop of Meissen, fought the movement in Saxony. Bachmann gave special attention to the reformation of monastic life and to a defence of the veneration of the Saints. While he was not wholly successful in preventing defection from the ranks of his own order, he at least hindered the secularization of his own monastery of Altenzelle during his lifetime. His vigorous defence of orthodoxy engaged him in a war of pamphlets with the reformers, in which his own contributions yield little in bitterness of tone and coarseness of language to those of his antagonists. In a contemporaneous satire entitled "Mors et sepultura doctrinæ Lutheranae" (Strobel, *Opuscula quædam satirica et ludica tempore Reform. scripta*, Fasc. 1, 1784, 49 sqq.) written in the style of the "Epistolæ obscurorum virorum", Bachmann is very severely handled. A letter is there ascribed to him over the signature "Humilis frater Paulus Hamnicolus, indignus Abatissa Monstri Cellensis in Misnia". Besides his controversial pamphlets Bachmann's writings comprise hymns and devotional works in prose and verse.

STREBER in *Kirchenlexicon*, I, 1829.

MATTHIAS LEIMKUHNER.

**Backer**, AUGUSTIN DE, bibliographer, b. at Antwerp, Belgium, 18 July, 1809; d. at Liège, 1 Dec., 1873. He was educated at the Jesuit Colleges of Saint-Nicholas, Beauregard, Saint-Acheul, and Fri-

bourg. In 1835 he was received into the Society of Jesus by the General, Father Roothaan, who sent him to Nivelles, in Belgium, for his novitiate. He taught three years in the College of Namur, and in 1840 began in Louvain his studies for the priesthood. At an early age his vocation as a bibliographer began to manifest itself. While yet a student he made a collection of Elzevirs and planned a work that would give the history of the early printing presses in Europe. In order to acquire the necessary information for this compilation, he visited from 1831 to 1834 the principal libraries in Belgium and twice those of Paris, thus unwittingly preparing himself for his future labours. While at Louvain he came across the incomplete "Bibliotheca Scriptorum Societatis Jesu" published in 1676 by Father Nathaniel Southwell (Bacon), and he resolved to undertake the work that will ever remain the monument of his laborious life, "La bibliothèque des écrivains de la compagnie de Jésus". This colossal work Father de Backer, with the assistance of his brother Aloysius, published in a series of seven quarto volumes in the years 1853-61, and followed this up in 1869-76 with a new edition in three large folios containing the names of 11,000 Jesuit authors. The changes and improvements of this edition are so marked as to make it practically a new work. Besides an introductory sketch of the author, there are recorded under each title the editions, translations, and critiques as well as the works which were published in refutation. Father de Backer died while engaged on the third volume of the new edition, but the work was completed by his brother. Another collaborator in the second edition was Charles Sommervogel, whose own magnificent "Bibliography of the Society of Jesus" in eleven folio volumes was made possible by the gigantic labours of the two de Backers.

EDWARD P. SPILLANE.

**Backx**, PETER HUBERT EVERMODE, b. 10 December, 1805, at Tilburg, Holland; d. 28 October, 1868. Ordained priest 17 March, 1832, he may be considered the second founder of the Norbertine Abbey of Tongerlo (Province of Antwerp, Belgium), which was established in 1128, or eight years after the foundation of the Premonstratensian Order by St. Norbert. It had to suffer much from the Protestants during the second half of the sixteenth century, but the fatal blow was struck by the French Republic, which, on 6 December, 1796, expelled the religious, confiscated the abbey, and sold it to the highest bidder. At that time Tongerlo was at the height of its prosperity. After the suppression of the Jesuits, the abbot and community of Tongerlo had made all arrangements for the continuation of the "Acta Sanctorum" and the "Analecta Belgica" of the Bollandists, and four of its canons were co-operating with two of the former Bollandists in this gigantic publication. The catalogue of the Abbey of Tongerlo, made in 1796, gives the names of one hundred and nineteen priests and professed scholastics and of six novices. A large number of these lived in the abbey, others were attached to parishes belonging to it. Some were completing their theological studies in Rome or at the University of Louvain, one was President of St. Norbert's College in Rome, another was president of the college of the same name at Louvain. Under the French Republic and again, after the battle of Waterloo, during the reign of William I, King of the Netherlands, the expelled and dispersed religious were not allowed to form a new community, but better times came with the creation of Belgium as a separate kingdom, in 1830. Only sixteen of the one hundred and twenty-five religious

were living at that time and nearly all were well advanced in years. The castle of Halmale near Antwerp was rented, and the first novice, Peter Hubert Backx, received the white habit and with it the name in religion of Evermode. Three more young priests and others who had finished their classical studies followed his example. In 1839 Evermode Backx was chosen superior of the revived community.

At the death of one of the proprietors one-half of the dilapidated Abbey of Tongerlo was bought at a public auction and Abbot Backx led, amidst the rejoicings of the villagers, the young community to Tongerlo, 1 July, 1840. That very afternoon, the Divine Office was resumed with the first Vespers of the Feast of Our Lady's Visitation. On the following day, the venerable Chrysostom Raemakers, who had celebrated the last Mass on the day of the suppression, 6 December, 1796, sang a solemn Mass in one of the rooms improvised as a temporary oratory, the abbey church and other buildings having been pulled down.

Evermode Backx's first work was to repair what was left of the former abbey and to erect new buildings for the growing community. In 1849 the second part of the confiscated abbey was bought and in 1852 the first stone of a large church was solemnly laid by the papal nuncio, so that the abbey began to have the appearance of a large and well-ordered monastery. After a strenuous government of twenty-eight years Evermode Backx died, regretted by his spiritual children. The work was carried on with equal zeal by his successors, the Right Rev. Abbot Chrysostom De Swert (d. 1887) who sent some of his religious to found the priories of Crowle and Spalding, England; the Right Rev. Thomas Heylen, afterwards Bishop of Namur, Belgium, the founder of Corpus Christi Priory, Manchester, and of the Norbertine missions in the Independent State of Congo, Africa; and the Right Rev. Adrian Deckers, formerly Prefect Apostolic in the Congo. The catalogue of the Abbey of Tongerlo for 1907 gives the names of 78 priests, 8 professed scholastics, 4 novices, and 23 lay brothers, or a total of 113 religious, several of whom are engaged in parish work, 14 working in England, and 16 in the Congo missions.

MARTIN GEUDENS.

**Bacon, DAVID WILLIAM**, first Bishop of Portland, Maine, U. S. A., b. in New York City, 15 Sept., 1813; d. in New York, 5 Nov., 1874. He made his classical studies at the Sulpician College at Montreal and his theological course at Mount St. Mary's Seminary, Emmitsburg, Maryland, and was ordained a priest in Baltimore, 13 December, 1838. Returning to New York he served on the mission at Utica and Ogdensburg, and then in New York City and at Belleville, New Jersey. In 1841 he was sent to establish the third parish in Brooklyn, and for this bought the unfinished building begun in November, 1831, as the "Independent Catholic Church" by the Rev. John Farnan, who had been suspended by Bishop Dubois. It was completed and dedicated, 10 June, 1842, under the patronage of the Assumption of the Blessed Virgin. Here he remained until 1855, when he was named first Bishop of Portland, and consecrated in St. Patrick's Cathedral, New York, on the 22d of April of that year. There were only six priests and eight churches in his diocese, which at that time included the entire State of Maine. His zeal, tact, and energy overcame the many obstacles which Know-Nothing bigotry, the Civil War, and the great fire that destroyed most of the city of Portland on the 4th of July, 1866, put in the way of the progress of the Faith in that section. He had the consolation, at his death, of leaving to his successor the care of 63

churches, 52 priests, 23 parish schools, and a Catholic population of about 80,000. In the summer of 1874 he started for Rome with Archbishop McCloskey, but having fallen ill on ship-board was forced to remain in the Naval Hospital at Brest until the Archbishop returned, on his way home. Bishop Bacon was carried on board the steamer and barely reached New York alive. He was taken to a hospital on shore, where he died a few hours later. The bronze altar of the Sacred Heart, in St. Patrick's Cathedral, New York, was erected by Archbishop McCloskey in thanksgiving because the life of his old friend was spared until he got back to his native land.

THOMAS F. MEEHAN.

**Bacon, JOHN** (JOHANNES ANGLICUS, JOHANNES DE BACONTHORPE), an English Carmelite and theologian, b. towards the end of the thirteenth century at the place in the county of Norfolk whence he derives his name; d. in London, 1346. He is not to be confounded with Francis de Bacon, the Spanish Carmelite, reader of divinity in Paris from 1362, Procurator General, 1366, doctor, 1369, Provincial of Catalonia (d. circa 1390), *doctor sublimis*. John Bacon, surnamed *doctor resolutus*, entered the order at Snitterley, Norfolk, studied at Oxford and Paris, was bachelor previous to 1321, and master in 1325. From 1329 till 1333 he was Provincial of England; the remainder of his life was consecrated to study. He possessed a penetrating mind, and wrote on all the subjects belonging to the ordinary course of studies. His writings comprised more than one hundred and twenty volumes, but are for the greater part lost. The most celebrated among them were those on the Gospels, especially St. Matthew, on St. Paul, and the commentary on the "Sentences", which was printed in 1510 at Milan, and for a time became the textbook in the Carmelite Order. Bacon follows Averroes in preference to St. Thomas with whom he disagrees on many points. He adopted a system of Realism according to which the universals do not follow but precede the act of the intellect. Truth is materially and causally in the external object, formally in the intellect; in the order of generation and perfection the first subject is the individual substance; although the external object is in itself intelligible, the active intellect is required to render it *ultimately* intelligible; the conformity of the thing thought with the external object constitutes truth. The final cause of all things is God; but although the first object of our knowledge be the Divine essence Bacon does not admit that this knowledge comes to us by the light of our natural reason; it is, in his opinion, a supernatural gift of grace.

B. ZIMMERMAN.

**Bacon, NATHANIEL**, better known under the assumed name of SOUTHWELL, a Jesuit priest and bibliographer, b. in the county of Norfolk, England, in 1598; d. at Rome, 2 Dec., 1676. He received his early training at St. Omers, entered the English College at Rome in 1617, and after his ordination to the priesthood in 1622 was sent to labour on the English mission. Two years later he entered the Jesuit novitiate, but shortly after was transferred to the Roman Province, where he discharged the duties of procurator and minister of the English College. Appointed in 1647 Secretary to the General of the Society of Jesus, Father Vincent Caraffa, he dis

played such talent for business that he was retained as Secretary by the four succeeding Generals of the Order. Upon his retirement from this office in 1668 he began the well-known "*Bibliotheca Scriptorum Societatis Jesu*" in folio, published in Rome in 1676. This compilation was based on an earlier work of Father Ribadeneira, issued in 1602 and brought down to 1641 by Father Alegambe. Father Southwell revised the original works, adding copious notes of his own. Dr. Oliver praises this volume as "a compilation truly admirable for research, accuracy, elegance of language, piety, and charity of sentiment". Father Southwell was also the author of "*A Journal of Meditations for Every Day in the Year*", published in London in 1669. On the same authority we learn that he was accounted by his religious brethren a model of virtue and sanctity. He died in the professed house of the Gesu, at Rome.

EDWARD P. SPILLANE.

**Bacon, ROGER.** See ROGER BACON.

**Baconian System of Philosophy,** THE, takes its name from its founder, Francis Bacon, Lord Verulam, Viscount St. Albans, statesman and philosopher, b. 22 January, 1561; d. 9 April, 1626. He was the second son of Lord Keeper Bacon and Anne, his second wife, daughter of Sir Anthony Cooke and sister-in-law of Lord Burghley. In his thirteenth year (1573) he entered Trinity College, Cambridge, where he studied under Whitgift. Before he left (1575) he had already acquired a considerable reputation for his ability and learning. It was at Cambridge, as he later confessed to Rawley, that he first had fallen into a dislike of the Aristotelean philosophy—"not for the worthlessness of the author, to whom he would ever ascribe all high attributes, but for the unfruitfulness of the way; being a philosophy, as his Lordship used to say, only strong for disputations and contentions but barren of the production of works for the benefit of the life of man. In which mind he continued until his dying day."

In June, 1576, he was admitted to Gray's Inn, being destined for the profession of law; but shortly afterwards was attached to the French embassy of Sir Amyas Paulet. His father died in 1579, leaving him small provision. He thereupon returned to England to continue his legal studies and was admitted barrister 27 June, 1582. Two years later he was elected to Parliament for the Borough of Melcombe Regis. In the following year he penned his "Letter of Advice to Queen Elizabeth", a document of considerable interest to Catholics, as expressing Bacon's views upon their treatment. Mary Stuart was yet alive, and there were plots and rumours of plots against the queen. There were still many adherents of the old faith; and conformity might be secured either by severe measures or by insidious ones. The young member had Catholics for the queen's enemies. It was impossible, he thought, to satisfy them; dangerous to irritate by too great severity. He recommended changes in the Oath of Supremacy and even went so far as to urge a circumspect toleration of the sectaries because their teaching led to an issue "which your most excellent Majesty is to wish and desire" viz., the diminution and weakening of Papists. His political life and advancement, notwithstanding his intrigue and incessant suit for office, were slow; his extraordinary ambition doomed for years to fruition. He had the misfortune to incur the queen's displeasure by opposing a grant of subsidies in such form as to infringe upon the privileges of the Commons. The patronage he found in Essex led to a friendship as remarkable as its end was dramatic and disastrous.

Until 1607, when James I had reigned nearly four years, he had advanced no further in office than to be given the reversion of the post of Registrar of the Star Chamber. But in 1607, he became Solicitor-General. Then, until his fall, he advanced rapidly. The Attorney-Generalship was given to him in 1613. He became successively a member of the Privy Council (1616), Lord Keeper of the Great Seal (1617), Lord Chancellor (1618). He was raised to the peerage with the title of Baron Verulam (1618) and made Viscount St. Albans (1621). Suddenly he fell. He was accused, as Chancellor, of taking bribes. To this charge he pleaded guilty, was deprived, and declared incapable of holding any office, place, or employment in the State. He was excluded from both Parliament and Court, fined £40,000, and sentenced to imprisonment in the Tower during the king's pleasure. In time, all his sentence was remitted.

His death occurred five years later. On his way to dine at Highgate, he alighted from his carriage, purchased, killed, and stuffed a hen with snow in order to observe the retarding effects of cold upon putrefaction. He caught a chill which set up bronchitis. A week later he died in the house of the Earl of Arundel; and was buried, according to his wish, at St. Alban's in the church of St. Michael.

The philosophy of Lord Bacon is too fragmentary to lend itself to criticism other than discursive, too largely conceived to be brushed aside with a mere line of comment, too full of symbolic expression to be exactly and briefly set down. It is rather of the nature of a method than a system and it is a method that is incomplete. Few attempts at giving a new direction to the pursuit of truth have been more overrated; few the butt of such vigorous criticism. It might be said that Bacon suffered most in it from falling into the very pitfalls that he indicated as dangerous to others. His confidence in his own powers was colossal. Few men could have written as he did in the "*Novum Organum*": "The die is cast, the book is written, to be read either now or by posterity—I care not which; it may wait a century for a reader, as God has waited 6000 years for an observer." His misconstruction and minimizing of the work of the old philosophers—except, perhaps, Democritus—is as startling as his ignorance of the contemporary science of his day, or as the application he makes of his own principles; for the incipient rules of induction (their use already exemplified in Aristotle's "*Analytica Posteriora*"), that find their more exact expression in Mill's Canons, should have prevented some, at least, of his cruder scientific views. With all his signalling of the insidious dangers of the *Idola*, he could not altogether rid his understanding of the preoccupations caused by them, even in the presentation of his Inductive Method. These celebrated phantoms of the mind, of which we must be at pains to rid ourselves, are four in number: the *Idola Tribus* (preoccupations common to mankind); the *Idola Specus* (belonging to the individual); the *Idola Fori* (resulting from a confusion of words and things in the common speech of the market-place); the *Idola Theatri* (consisting of the received dogmata of philosophers that take possession of the mind by reason of a presumed authority). Still, the fact that he pointed them out and laid stress upon the danger is an advance. His lists, too, of facts, his confused congeries of instances, point the way to a scientific examination of Nature. Their contents are to be treated by (1) agreement, (2) disagreement, and (3) comparison. Roughly speaking, this would be tantamount to the use of the Method of Agreement and Difference, taken together with that of Concomitant Variations. What is not brought into sufficient prominence is the extremely useful part played by guesswork and hypotheses in the generalization and

grouping of facts and instances; but this is scarcely to be wondered at, since Bacon, though he does allow a grudging value to it, proposed to inaugurate a certain process by which inductions might be readily produced from facts by an almost mechanical or mathematical process.

Interesting to the scholastic philosopher is his treatment of causes—and particularly of the formal cause. There are the usual four causes, the formal and final belonging, in Bacon's scheme, to metaphysical investigation; the efficient and material to physical. The aim of the author of the "Novum Organum" was to banish final causes from the scope of physical science. His limiting of the efficient cause to physical science throws light upon his abrupt separation of philosophy and theology (*vide infra*). With regard to the formal cause of being, our author is peculiarly inconsistent. He uses the term in a succession of different suppositions, so that his true meaning is effectually obscured in the varying uses of the word. But, from a passage in the "De Augmentis", it may be inferred that he treated of what is known to the scholastic as *forma accidentalis*. The "forms" of colour, gravity, density, heat, etc. "of which the essences, upheld by matter, of all creatures do consist", are proposed for investigation—not the "forms" of substances. It will be noted that he makes the essences consist of these "forms" sustained by matter—a view that, with slight modifications, is to be found in several more modern systems.

Bacon's object was avowedly a practical one. Given the inductive knowledge of the "form", we ought to be able to produce the logically consequent quality in matter. He conceived it a possibility to juggle with the "forms" in much the same sense as the alchemist of earlier days hoped to transmute essences. His own positive contributions to the advancement of science were meagre in the extreme. No philosopher goes to his works for guidance, no scientist for information. Indeed, Dr. Whewell says that no scientific discovery has ever been made by Bacon's method. The gaps in his system were never bridged by those promised processes that were to render it complete. But it would be a mark of superficial consideration and historical inaccuracy to label the method that he advanced wholly jejune or useless. As a matter of fact, he called attention to the dangerous neglect of accurate observation that was the reproach of the later scholastics; and he gave an undoubted incentive to the prosecution of positive science. If he did little himself to raise science to the position of dignity it now occupies, he at least indicated the path upon which it should proceed. But in creating the method of induction he abused that of deduction; and without a single general principle as a basis, any philosophy, systematic or mathematical, is open to the charge of inconsequence.

Bacon's position in regard to revelation is well known. Reason can attain no positive knowledge of God. This must come by faith alone. Religion is above reason, but is not opposed by it. On the contrary, it is the office of reason to meet the objections and refute the arguments that are urged against the truths of revelation. Whether Bacon was really a rationalist or a believer has been disputed. As a statesman, he was an Anglican and Erastian. As a philosopher, religion does not come within his purview. But there are passages in his writings that show a decidedly reverent and religious spirit, especially in some of the "Essays".

Lord Bacon's chief works are contained in the following list. The dates given are those of publication. (1) "Advancement of Learning", 1605. (This was expanded and translated into Latin and edited by Rawley as "Opera F. Baronis de Verulamio . . . Tomus primus qui continet de Dignitate et Augmen-

tis Scientiarum libros IX", 1623.) (2) "De Sapientia Veterum", 1609 (done into English by Sir A. Gorges, Knight, as "The Wisdom of the Ancients", 1619); (3) "Essays; Religious Meditations (in Latin); Places of perswasion and dissuasion; of the Colours of Good and Evil" (a fragment), 1579. In the second edition (1598) the Meditations are in English. In this first English edition there were 10 Essays; in the second (1612) 38; in the third (1625) 58. (4) "Historia Ventorum" (Part III of the "Instauratio Magna"), 1622; (5) "Historia Vitæ et Mortis" (2nd Title of Part III, I. M.), 1623; (6) "New Atlantis" (published by Rawley), 1627; (7) "Novum Organum"; "Distributio Operis"; "Parasceve"; "Catalogues", 1620. (The plan of the whole "Instauratio Magna" is laid down in the preface.) (8) "Sylva Sylvarum" (published by Rawley), 1627. The chief editions of Bacon's works were made by Rawley (1627-57); Tenison (1679); Stephens (1734). "Complete editions" by Blackbourne (1730); Mallet (1740); Birch (1763); Montague (1834); Spedding, Ellis, and Heath (1857-83).

FRANCIS AVELING.

BACS, DIOCESE OF. See KALOCZA.

BADAJOS, DIOCESE OF (PACENSIS).—The Latin name *Paz*, or *Civitas Pacensis*, was given to this district because it was thought to be the *Paz Julia* or *Paz Augusta* of the Romans. But it is now certain that the *Paz* of the Roman period is the city of Beja, in Portugal, not far from Badajoz, and that the latter name is of Arabic origin. The bishopric was erected in 1225, shortly after it was reconquered from the Moors by King Alfonso IX of Leon. Its first bishop was Don Pedro Perez, appointed by Alfonso X, the Wise, and from that time it has had an uninterrupted succession of bishops. The diocese, which is suffragan to Seville, is bounded on the north by the Dioceses of Coria, Plasencia, and Toledo, on the east by those of Toledo, Ciudad Real, and Cordova, on the south by the Archdiocese of Seville, and on the west by Portugal. It is composed of 136 parishes, divided into 13 vicariates, which in ancient times numbered 18, with approximately half a million souls. The cathedral has a chapter composed of 5 prelates, 13 canons, 16 beneficed clerics (formerly called *medioracioneros*), besides the chaplains and other personnel necessary for the proper carrying out of Divine worship. There is a diocesan seminary, under good instructors, for the education of aspirants to the priesthood, also colleges in the city of Badajoz and in Zafra, conducted by the Regular Priests of the Heart of Mary, and several religious communities in other cities. The Poor Clares have an establishment at Almendrales; the discaled Franciscans, Carmelites, and Sisters of St. Anne at Badajoz, and the Augustinians, Carmelites, and Poor Clares elsewhere, making in all 19 communities of cloistered nuns, besides 3 communities of Sisters of Charity who attend the sick at Badajoz, Zafra, and Frenegal de la Sierra. There are schools for primary and religious instruction in all the parishes.

The diocesan territory of Badajoz comprises almost all of the civil province of the same name, which lies between the meridians 4° 36' 12" and 7° 9' west of

Greenwich, and between 37° 30' and 39° 30' north latitude, with an area of 7,143 square miles. Several rivers, among them the famous Guadiana (the *Flumen Anas* of the ancients), flow through this province, and the Madrid-Caceres-Lisbon railroad traverses it. All of this district is very fertile, and yields all kinds of cereals, wine, and oil, also cork, the manufacture of which is practically the only industry of this section. The climate is hot and unhealthy, intermittent and infectious fevers being very prevalent. This part of Spain was first inhabited by the Vettones and Veturi, descendants of the Celts, and was called Vettonia. When the Romans divided Farther Spain (*Hispania Ulterior*) into various provinces, Badajoz was made a part of the province of Lusitania, whose capital, Mérida (*Emerita Augusta*), became at the same time the metropolitan see. When the Arabs obtained possession of this territory, Mérida was annexed to the Emirate of Cordova, and ceased to be a bishopric. The city of Mérida is now included in the Diocese of Badajoz. The Kings of Leon and Castile reconquered this section and gave to the part which is now Badajoz and Caceres the name of Estremadura (*Extrema Durii*), meaning, the region on the opposite side of the River Douro, which had for a long time been the dividing line between Moors and Christians.

Hernán Cortés, the conqueror of Mexico, was a native of Medellín in the province and Bishopric of Badajoz. Massona, Archbishop of Mérida, and Paul the Deacon (Paulus Diaconus Emeritensis) may also be mentioned among the distinguished natives of this district; of whom the former took part in the Councils of Toledo, and the latter is known as the author of "De vitá et Miraculis Patrum Emeritensium".

FLOREZ, *España Sagrada*. See also *Histories, Year-books, and Ecclesiastical Guides of Spain*.

#### TIRSO LÓPEZ.

**Baden, GRAND DUCHY OF**, is situated in the southwestern part of the German Empire, bounded by Switzerland, Alsace, the Palatinate, Hesse, Bavaria, and Württemberg, covering an area of 5,821 square miles. According to the census of 1 December, 1905, the population numbered 2,010,728, including 1,198,511 Catholics, 762,826 Evangelicals, 8,096 Old Catholics, 2,060 Lutherans, 2,823 Reformed, 2,157 of various Evangelical denominations, 7,449 of other Christian beliefs, 25,893 Jews, and 600 others of various religious persuasions.

**I. HISTORY.** (a) *The Middle Ages*.—The present Grand duchy has been formed from the territories of various ecclesiastical and secular rulers. At the beginning of the Christian Era the Baden of to-day was a part of the so-called tithe lands (*agri decumates*) which were protected by a wall against the barbarian Germans. From this point the Alemanni made repeated incursions into the Roman territory, and after the death of the Emperor Aurelius Probus (282) they took possession of the southern part of the tithe lands. The victories of 496 and 536 made the Franks masters of this region, and Pepin the Short set aside the old form of government by tribal dukedoms in 748, introducing the form of organization of the Frankish Empire. The rise of the Frankish power brought Christianity into the province. The southern part of the country received the Faith about 610 from St. Columbanus and his pupil St. Gall, who were followed a hundred years later by St. Pirminius. St. Trudpert laboured in the Breisgau, and St. Kilian in the north-eastern part of the territory. The valley of the Rhine was evangelized from Mainz. Much of the credit for having converted the land belongs to the many monasteries that were founded in the course of these centuries: Reichenau, Honau near Kehl, St. Trudpert, Ettenheimmünster, Gengenbach, Schwarzach, St. Michael near Heidel-

berg, Petershausen near Constance, and St. Blasien; also monasteries for women, as Säckingen, Waldkirch, Sulzburg, and others.

Under the weak rule of the last Carolingians and after the extinction of the dynasty, the old form of government by tribal dukedoms again prevailed, and only powerful kings like Otto I, Henry II, and Henry III were able to maintain their authority. The natural allies of the kings against the dukes of the different tribes were the ecclesiastical authorities, the bishops and abbots, who thereby obtained great influence and large possessions. Ecclesiastically the territory of the present Baden was divided into six dioceses: Constance, Speyer, Strasburg, Worms, Mainz, and Würzburg; moreover the Bishops of Bamberg were wealthy landed proprietors, Henry II having bestowed on them Crown-lands in the Ortenau, as well as placing the abbeys of Ettenheimmünster, Gengenbach, and Schuttern under their jurisdiction. The monasteries of Reichenau and St. Blasien, in particular, became possessed of large temporalities. Among secular rulers great prominence was attained by Count Berthold (d. 1078), who claimed descent from the old Allemannian dukes and in 1061 became Duke of Carinthia and Margrave of Verona. In the struggle between the papacy and Emperor Henry IV, Berthold remained faithful to the Church. The youngest of his three sons, Salomon, was Bishop of Constance (1084–1110), and the other two, Berthold II (d. 1111) and Hermann I (d. 1074), were the ancestors of the dukes and margraves of the Zähringen line. The ducal line of descendants received in fief from the Empire a part of Burgundy and central and western Switzerland, with Zürich as capital. Of these rulers Berthold II founded Freiburg in the Breisgau, Berthold IV, Fribourg in Switzerland; and Berthold V, Berne. At the death of Berthold V in 1218 this branch of the family became extinct, and its freehold estates passed on to the margraves of the other branch, whose descendants are still the reigning family of Baden. The first of the line of margraves of this branch was Hermann I, who died a monk in the Abbey of Cluny. Many of his descendants distinguished themselves in the affairs of the Empire, as, for instance, Hermann V (1190–1242), who fought against the Mongols, Rudolf I (1243–88), who was first the enemy and then the friend of Rudolph of Hapsburg; Bernhard I (1372–1431), a generous patron of the monasteries of Gotsaue and Schwarzach; and James I (1431–53), who endowed the collegiate foundation in the city of Baden-Baden. Others, however, lessened the family influence by the repeated partitions of their estates, thus contributing to the territorial subdivisions of what is now Baden.

Among the neighbouring rulers those with the largest landed possessions were the Counts of the Rhine Palatinate (Heidelberg etc.), the Hapsburg dynasty, which in the fourteenth century obtained the whole of the Breisgau, together with the cities of Freiburg, Breisach, Waldkirch, and other places; the Counts of Fürstenberg, whose domains lay chiefly in the region of the Baar (such as the town of Donaueschingen); and the Counts of Wertheim. There were, besides, numerous rulers of smaller secular principalities, knights of the Empire, and free cities. To all these must be added the ecclesiastical rulers, the six bishops, some 160 monasteries, and a few estates held in commendation by Knights of St. John and the German Knights Templars. The intellectual, spiritual, and economic life which flourished at this time on the Upper Rhine was as varied as the territorial divisions of the land. Evidences of the zeal with which the arts and learning were cultivated not only in the monasteries, but also in the cities, are to be found in the many buildings dating from that period, as, for instance, those at Constance, Freiburg, Ueberlingen, etc., in monastic

libraries, in the large attendance at the Universities of Heidelberg, and Freiburg, in the intermediate schools, among which the one at Pforzheim won a high reputation, in the diffusion of the art of printing, etc. On account of the undeniable abuses which had crept into ecclesiastical life, many fell under the influence of certain intellectual movements which prepared the way for the Reformation, such as secret religious associations, and the Pseudo-mystics, the Hussites, the Flagellants, and especially Humanism, which was in great favour at the court of the Electors Palatine.

(b) *From the Reformation to the formation of the present State.*—The first impulse to revolutionary religious ideas in Baden came from Luther himself, who in 1518 spent some time in Heidelberg, where he appeared as a public speaker and soon gained adherents. The Reformation first took firm root in the Countship of Wertheim, in Constance (1530), in the Countship of Hanau-Lichtenberg (1545), and in the electoral palatinate (1546). The territories under ecclesiastical rulers and the House of Hapsburg remained true to the Catholic Faith. The progress of the Reformation in the Margravate of Baden was far from being uniform. Margrave Christopher I of Baden (1475–1527) had in 1503 united all the family territory, but the division in 1533 between his two sons Bernhard III and Ernest separated the margravate into two parts which were not reunited until 1771. Bernhard received the Margravate of Baden-Baden, and his brother the Margravate of Baden-Durlach. A part of the population of Baden-Baden had already adopted the new teachings, but at the death of Bernhard III (1536), Duke Albert V of Bavaria, the guardian of Bernhard's son, Philip II, brought the country back to the Catholic Faith. Philip himself (1569–88), who had been educated by the Jesuits at Ingolstadt, was a vigorous opponent of the new teaching.

The Baden-Durlach branch of the family laid claim to Baden-Baden during the reign of Philip's successor, Edward Fortunatus (1588–1600), occupied a part of the country until 1622, and introduced the Reformation. Margrave William (1622–77), however, after many reverses, succeeded with the aid of the Catholic party in the Empire in gaining the undisputed mastery of the margravate. Aided in an especial manner by the Jesuits and Capuchins, for whom he established houses, he brought the Protestant part of the country back to the Catholic Faith. His successor, Louis William (1677–1707), rendered many services to the Church and the Empire in fighting against the Turks (1683) and the French. Louis William, his wife, Augusta Sibylla, as regent for their son Louis George (1707–61), and the last named in his turn notably furthered the interests of the Church of Baden. With the death of Augustus George (1761–71), who by papal dispensation had left the ecclesiastical state, and who founded many religious institutions, the line of Baden-Baden became extinct, and the succession fell to the Baden-Durlach branch. Margrave Ernest (1527–53) of Baden-Durlach had favoured the Reformation, and his son Charles II (1553–77) soon established the Reformation in his domains. After this time the Protestant religion remained dominant in the land of Baden-Durlach and its supremacy was not affected even by the reconciliation to the Church of James III, third son of Charles II, as James's death followed soon upon his conversion (1690). The most noted of the Baden-Durlach rulers were: Frederick V (1622–59), who founded many schools; Frederick VI (1659–77), who distinguished himself by his devotion to the emperor and the Empire; Charles William (1709–38), who in 1715 established the present capital of Karlsruhe, greatly improved the finances and the administration of justice, and zealously promoted the interests of

the schools. His grandson, Charles Frederick (1738–1811), during his long reign introduced salutary reforms in all parts of his territory, thus raising his country from the level of a petty principality to the rank of one of the greater central states of the German Empire. The extinction of the Baden-Baden branch greatly increased his possessions, which were still further enlarged by the political changes resulting from the French Revolution. In 1796 Charles Frederick was forced to surrender to France his possessions on the left bank of the Rhine, but was amply compensated by the Imperial Delegates' Enactment (1803). He received the Diocese of Constance, that part of the Rhine Palatinate lying on the right bank of the river, including the cities of Heidelberg, Mannheim, etc., parts of the Dioceses of Strasburg and Speyer, eleven religious houses and abbeys, and seven cities of the empire. By the Peace of Pressburg (1805), and the accession of Baden to the Confederation of the Rhine (1806), Baden was still further enlarged by the former possessions of Austria in the Breisgau, the city of Constance, and other territories, whereby substantially the present boundaries were established. On 13 August, 1806, Baden was proclaimed a Grand duchy. The enforced participation of the duchy in the campaigns of Napoleon resulted in heavy loss of life and property.

(c) *Recent History.*—In 1818 Grand Duke Charles (1811–18), the successor of Charles Frederick, gave the country a fairly liberal constitution. The first Landtag, however, came into conflict with the government of Grand Duke Louis (1818–30), who had been trained in the ideas of absolutism, and was able at times to rule almost despotically. Despite the introduction of many timely reforms during the reign of Grand Duke Leopold (1830–52), there were often bitter contentions between the Government and the representatives of the people. In the course of these difficulties, the opponents of the Government became constantly more inflamed until a leading party of opposition was formed, which, influenced by the prevailing political tendencies, gave evidence of a strong inclination towards radical principles. Radicalism obtained a strong footing not only in the Landtag, but also throughout the country. The revolutionary movement of 1848, which began in France, found, therefore, in Baden a most favourable soil. Although the Government granted many of the demands of the people for more liberal administration, outbreaks occurred. In the beginning these were suppressed, but a mutiny of the troops in Rastatt and Karlsruhe brought victory to the Revolutionists. In May, 1849, the insurgents took possession of Karlsruhe, proclaimed a republic, and established a provisional government. It was only through the aid of Prussia and the German Confederation that the revolution in Baden was repressed, and the Grand duke could re-establish his authority. Severe punishment was meted out to the guilty, especially to the mutinous soldiers.

II. *ECCLESIASTICAL CONFLICTS.*—During the reign of Grand Duke Louis II (1852–56), whose brother Frederick held the regency until 1856, when he himself succeeded to the title, the Government and the representatives of the Catholic Church, who had been at odds for a long time, came into open conflict. The revolutions of the Napoleonic period had shaken the organization of the Church in Germany to its very foundations. In the modern Grand duchy of Baden, as it existed at the beginning of the nineteenth century, two-thirds of the population professed the Catholic religion. They constituted 728 parishes divided among six different dioceses (Constance, Strasburg, Speyer, Worms, Mainz, and Würzburg). A reconstruction of ecclesiastical affairs was manifestly necessary and was made, so far as the State was concerned, by the organization decrees of 1803

and the constitutional decrees of 1807, regulating the position of the State with regard to the Church. Although the first of these decrees guaranteed to Catholics a continuance of their diocesan system, the free exercise of their religion, and the possession and use of church property, shortly after their promulgation a large number of monasteries and charitable institutions were entirely abolished, others confiscated, and still others converted into secular educational institutions. In place of being organized into dioceses as formerly, Catholics were placed under two vicariates (Bruchsal and Constance). A special board was appointed for the administration of the temporal affairs of the Church, first known as the Catholic *Kirchensektion* (Church Section), and later as the Catholic *Oberkirchenrat* (Supreme Ecclesiastical Council). Despite the personal good will of Grand Duke Charles Frederick, the spirit of these decrees was unfavourable to the Catholic Church; the rights of the State were unduly extended, to the prejudice of the Church. Worse than the ordinances themselves was the way in which they were put into execution by the Liberal officials of Old Baden, who viewed the Catholic Church with open hostility. The unjust treatment of Catholics in the new Grand duchy and the indignities put upon them were so pronounced that even Napoleon, as Protector of the Confederation of the Rhine, in two notes to the Government of Baden (February and March, 1810) protested against it. Unfortunately a large part of the Catholic clergy, who had either been reared in the tenets of Josephinism, or had fallen into the religious indifferentism of the times, failed to rally to the necessary defence of the rights of the Church. Even the highest ecclesiastical dignitaries of the land, as, for example, Vicar-General Wessenberg, favoured the tenets of Febronianism and warmly encouraged the project of a German National Church independent of Rome. This state of affairs prolonged for years the negotiations which had been begun with the Holy See for the reorganization of the Church in Baden. Finally the Bull "Provida solersque" (16 August, 1821) established the province of the Upper Rhine (*Oberrheinische Kirchenprovinz*), defined the boundaries of the five dioceses therein comprised (Freiburg, Fulda, Limburg, Mainz, and Rottenburg), and assigned Freiburg as the seat of the metropolitan. In Baden, by the order of the Grand duke, the candidate for the archiepiscopal see was elected by free vote of the assembled deans (1822), but their choice of Wanker, a professor of theology in Freiburg, was condemned by the pope as canonically invalid. It was only after lengthy negotiations that an agreement was reached; and on 11 April, 1827, Leo XII promulgated the Bull of erection "*Ad Dominici gregis custodiam*"; on 16 October, 1827, the deed of foundation was signed; and on 21 October the first archbishop, Bernhard Boll, was consecrated and installed.

Nevertheless a satisfactory adjustment of affairs had not yet been found. The deed of foundation contained many provisions contrary to the spirit of the papal Bull. In marked contrast to the agreement made with Rome was the church law passed by the Government 30 January, 1830. True, it ensures to Catholics the free profession of faith and public exercise of religion, but, on the other hand, to the State is given an undue amount of power over the Church; all orders and enactments of any importance proceeding from spiritual authorities must, according to this law, be submitted to the approval of the civil powers; it requires that even decrees and dispensations of a general nature issued by the Church, although concerning matters purely spiritual, must be first inspected by the public authorities. It subjects papal Bulls, Briefs, and dispensations to the *placet* of the sovereign, does away with the canonical court of appeal, grants to clergy and laity, by a usurpation

of spiritual authority, recourse to the civil courts, instead of the higher ecclesiastical courts, etc. The pope as well as the archbishop entered a protest against the provisions of this law, so permeated with the spirit of a national church, but without success. Although the first archbishops, Bernhard Boll (1827-36) and his successor, Ignaz Demeter (1836-42), acceded to the wishes of the Government as far as their position as Catholic prelates permitted, all their remonstrances against the interference of the State and their appeals for a more liberal treatment of the Church were useless. On the contrary, the Government openly favoured movements of a rationalistic and irreligious nature, even on the part of professors of theology in the University of Freiburg; it allowed the just demands of the archbishop for adequate disciplinary powers to pass unnoticed, gave protection to unworthy clerics and those who had been insubordinate to their ecclesiastical superiors, almost entirely excluded the co-operation of the Church in the management of Catholic schools and in the administration of Catholic church property, permitted insults to be levelled against the Church by the Radicals in the Landtag, favoured Rongeanism, etc. In spite of this unjust treatment, however, when, in 1848, the flames of the revolution broke out, the Archbishop, Hermann von Vicari (1842-68), and the majority of the Catholic clergy remained loyal to the rightful sovereign and refused to take the oath required by the revolutionary regime. In consideration of this attitude, the Government, after the victory over the revolutionary forces, seemed disposed to change its policy; it permitted the Jesuits to hold missions among the people and allowed the archbishop greater freedom in the administration of church discipline. The change, however, was not of long duration; soon the old system of state guardianship was again in force.

The four suffragan bishops of the province of the Upper Rhine also came into conflict with their respective governments in securing freedom for the Catholic Church. To obtain unity of action Archbishop Vicari, in compliance with the regulations of the plenary council of the German Catholic episcopate held at Würzburg (1848) summoned his suffragans to Freiburg in the spring of 1851. In a memorial addressed to their respective sovereigns, they demanded the privilege of training their priests and appointing them without outside interference, the free exercise of ecclesiastical discipline among priests and laymen, and the privilege of conducting Catholic schools, of establishing religious societies and associations, and of administering church property without hindrance. Having waited in vain for a reply from the Government, the bishops addressed a reminder to the authorities (February, 1852), renewing the demand for the abolition of the state supremacy. Not until 5 March, 1853, did they receive a decision; this contained trivial concessions, but was adverse on the principal points. The old system of state tutelage was to remain unconditionally in force. Thereupon the five bishops reconvened (April, 1853) in Freiburg and embodied their demands in a second memorial dated 18 June, setting forth the inadequacy of the concessions granted 5 March, and reserving to themselves the right of taking further measures. While four of the bishops received from their respective authorities more or less far-reaching concessions, a bitter struggle was precipitated in Baden.

Meanwhile, an occurrence in Baden had increased the estrangement to an open rupture between the civil authorities and the archbishop. After the death of Grand Duke Leopold (24 April, 1852), the Government, i. e. the *Oberkirchenrat*, which in 1845 had taken the place of the *Kirchensektion*, ordered the archbishop to have services held for the deceased

sovereign. In conformity with the laws of the Church, the archbishop prohibited the celebration of requiem Masses for Protestant princes and ordered other appropriate services instead. The authorities, however, persisted in their demand, declared the services ordered by the archbishop inadequate, and attempted to induce pastors to celebrate requiem Masses in defiance of the archiepiscopal mandate. Only about sixty out of the 800 priests complied, whereupon the archbishop decreed that the clergy who had disregarded his command should, in expiation, attend certain exercises of five days conducted by the Jesuit Father Roh, at the theological seminary of St. Peter. Although the civil authorities promised their protection to those priests who should resist this sentence, the clergy to a man obeyed the order of the archbishop, ensuring him a victory so complete as to give him the power of resistance in further conflicts.

In response to the second memorial from the bishops of the province of the Upper Rhine, the representatives of the State of Baden refused to make a single concession to the Catholic Church. The archbishop then informed the Government that he would take steps to secure the rights that were his, but were unjustly withheld by the civil authorities. He held competitive examinations for parish appointments and for admittance into the theological seminary, without the presence of a government commissioner; he filled parishes to which the Government could not establish a canonical right of patronage, demanded from the Oberkirchenrat an administration of church property strictly in accordance with canon law, threatening excommunication in case of disobedience. Thereupon the Government placed the official actions of the archbishop under police surveillance, banished the Jesuits from Freiburg, and threatened the clergy who submitted to the Church with the loss of their incomes, and with civil punishment. Two priests of Karlsruhe and Freiburg, who had proclaimed the sentence of excommunication pronounced upon the Oberkirchenrat by the archbishop, were actually placed under arrest. On still more unwarrantable interference by the Government, the archbishop issued a circular letter to be read from the pulpits, ordering an independent administration of ecclesiastical institutions without regard for civil mandates, and prohibiting the clergy from having any connexion with state officials. The Government, seeing in this enactment an instigation against civil authority, forbade its promulgation in the churches and attempted to seize all copies of the letter, in some cases succeeding by force. A judicial inquiry was instituted against the archbishop (18 May, 1854), charging him with disturbing and endangering the public peace. On 22 May he was placed under arrest, and confined to his room under a guard of gendarmes until 31 May. At the command of the archbishop the diocesan court continued to transact all business, and sent a dispatch to Rome asking the pope to make provisions for the administration of the diocese. All churches were to be draped in mourning, church bells were silent, altars were stripped of their adornments, and everywhere the faithful assembled for public prayer. The pope, in a note dated 8 June, addressed to the civil authorities of Baden, took the archbishop under his protection. The Government then proposed to enter into negotiations with the Holy See, and a peaceful arrangement was made, which created a tolerable *modus vivendi*. The proceedings against the archbishop and clergy were stopped, and gradually the way was opened for amicable relations between the civil authorities and the archbishop.

The lengthy negotiations with Rome were brought to a close by the signing of the Concordat of 8 June, 1859, which went far towards meeting the just claims

of the Church and accorded practically all the demands of the archbishop, in particular the right of appointment to parishes, the supervision of religious instruction, participation in the management of church property, the right of decision in questions concerning marriage, etc. Thereupon the Liberals and Democrats rose in opposition to the Concordat; everywhere meetings of protest were held, resulting in 1861 in the dismissal of the Conservative and the formation of a Liberal ministry. The latter, on 29 October, without consulting the Holy See, arbitrarily declared the Concordat null and void and substituted a law quite inimical to the Church, which received the approbation of the Landtag. On 20 November, 1861, the Government and the archbishop came to an agreement concerning the filling of benefices and the administration of church property.

After a short respite, new conflicts arose between the two authorities with reference to the school system (1864). The Government, now entirely under the control of the Liberals, proposed a bill for a school law which almost entirely nullified the influence of the Church on education, conceding to the Church only the supervision of religious instruction. Although Catholic clergy exerted every effort to bring about the failure of this scheme, and the archbishop in a pastoral letter opposed it, the bill in a somewhat aggravated form became a law, and the opposition of the Catholic population expressed in numerous mass-meetings and addresses to the duke was completely disregarded. The Liberals, who were in the majority in the Landtag, and had control of the Government, hesitated at nothing to make still more practically effective their principles of hostility to the Church. In 1867 the Government instituted state examinations for theological students, to be held before a civil commissioner on the completion of the university course. The Curia protested, and forbade the theological students to submit to this examination. As a result the clergy in the parishes subject to the appointment of the Grand duke received, instead of their stipends and appointments as pastors, only those of parish administrators. After the death of the archbishop (15 April, 1868), the Government, by refusing to consider seven out of eight candidates, made the choice of an archbishop practically impossible, and the see remained vacant for eighteen years. In 1869 civil marriage was made obligatory. In 1870 all Catholic institutions not purely ecclesiastical, but devoted to education or to charity, were secularized, withdrawn from the control of the Church, and large endowments left for Catholic purposes were thus alienated from their appointed use. In 1872 the members of religious orders and congregations were forbidden to give elementary instruction, to assist in the work of the ministry, or to conduct missions. In 1873 the Old Catholics were placed on an equal footing with the Catholic Church; several Catholic churches were turned over to them, and their Bishop Reinkens was recognized by the Government as a Catholic national bishop (*Landesbischof*). In 1874 admission to any ecclesiastical office was made to depend on proof of a general scientific training, meaning thereby a three years' course at a German university, excluding all Jesuit institutions. The archiepiscopal seminaries and boarding schools for boys were closed. In 1875 undenominational schools were introduced and made obligatory, the Catholic corporation schools were made unsectarian, and several monastic educational institutions were suppressed. Not until after the retirement of the Liberal minister, Jo'ly, the soul of the anti-Catholic legislation, i. e. since 1876, were measures taken for the re-establishment of peace with the Catholic Church. In 1880 state examinations for theological students were dispensed with;

in 1862 the archiepiscopal see was filled by the appointment of Johann Baptist Orbin, who ruled until 1886; his successors were Johann Christian Roos, until 1896; George Ignaz Komp, who died as archbishop elect on the journey to his see (1896), and Thomas Nörber from 1896. In 1888 the boarding schools for boys and the seminaries were reopened, and members of religious orders were once more allowed to preach.

Meanwhile the political development of Baden had been undisturbed. In 1866, it is true, the Grand duke had been forced against his will to fight on the side of Austria and the German Confederation against Prussia; but as early as 28 July he arranged a truce and proclaimed his withdrawal from the German Confederation. On 17 August he concluded peace, and an offensive and defensive alliance with Prussia. The military forces of Baden were organized on Prussian lines, and when, in 1870, Baden openly took sides with Prussia, they fought with distinction in many battles. On 25 November Baden entered the North German Confederation, which was strengthened by the accession of the other South German States to the new German Empire (1871). The internal administration was now conducted along Liberal lines. The Liberal majority of the Chamber was not disturbed until 1893. In 1904 a more impartial election law was introduced. The Government, however, still holds to its Liberal tendencies, and refuses the just demands of Catholics for the admission of religious orders of men. Unfriendliness towards the Catholic Church seems again to be gaining ground, as is shown by ordinances requiring an investigation among the whole body of the Catholic clergy on account of alleged abuses of electoral influence and other charges.

III. STATE AND CHURCH IN BADEN.—The relations between the Catholic Church and the Government are not entirely satisfactory, as is evident from the historical account, the State often exercising an excessive control. According to the legislation now in force, the Roman Catholic Church in Baden possesses the right of a public corporation, with the privilege of public worship and the formation of religious societies. The Church conducts its affairs freely and independently. The clergy are not restricted in their communication with ecclesiastical superiors. The highest spiritual authority of Catholic Baden is the Archbishop of Freiburg, who is also Metropolitan of the province of the Upper Rhine; he is a member of the First Chamber of Baden, ranks immediately after the ministers of state, and enjoys the title of Excellency. Ecclesiastical offices are filled by the church authorities, but are granted only to those who are citizens of Baden and can give proof of having had a general scientific training. No exemption from a regular three years' course at a German university is granted to anyone who has completed the same course at a Jesuit institution. Every priest on entering the work of the ministry in Baden must take the constitutional oath. The public exercise of church functions is permitted to priests coming from outside of Baden only under certain conditions. Without government authorization no religious order may be brought into Baden, nor may a new foundation be made by an order already established. Moreover, this authorization is subject to revocation. The holding of missions and the work of the ministry by members of religious orders are in general forbidden, unless in case of extreme necessity. By legislation of the German Empire, the obligation of a civil marriage ceremony was introduced, the duty of military service on the part of Catholic theological students abolished, and the Society of Jesus and what the laws call "congrate" orders and congregations excluded from the German Empire.

*Church Property.*—The property of the archiepiscopal board, the cathedral chapter, the metropolitan church, and the seminary, as well as the funds under the immediate control of the archbishop or the chapter, are managed by the archbishop and the chapter without interference; that under rural chapters by the chapters themselves under the supervision of the ordinary; local property, i. e. the definite property of a separate parish, is administered by a parish council under the presidency of the clergy, the members being chosen for a period of six years from the Catholics of the parish. The property of the ecclesiastical institutions of a district is managed by a commission, half the members being chosen by the Government, and half by the archbishop from the Catholics of the district. The intercalary fund (that is to say, the fiscal department for the collection, management, and lawful expenditure of the incomes of vacant benefices in the Grand Duchy of Baden) is administered by a council known as the Catholic *Oberstiftungsrat*, consisting of a president and six members, under the joint supervision of the archbishop and the Government. The members are Catholics, half being appointed by the Government, and half by the archbishop. All must meet the approval of both. The president must also be selected and named with the consent of both. The *Oberstiftungsrat* also supervises the administration of the local and diocesan institutions and of all benefices, occupied or vacant.

Local associations of the members belonging to the churches recognized in Baden have, as parishes, the rights of public corporations. For the defrayal of expenses incident to public worship, as, for example, the maintenance and repair of parish churches and rectories, the purchase and care of the necessary church furniture, and the salaries of the under employed of the church, the parish can assess certain taxes on its members. There is, in addition, a general church assessment for the common needs of the Catholic Church of Baden, e. g. the expenses of the highest ecclesiastical authorities, the establishment of new church offices, etc. The execution of parochial rights and duties is vested in the parish meeting; in those parishes numbering eighty or more members, the parish is represented by an elective council. The resolution of the parish meeting or parochial council determining the church assessment is subject to the approval of the State. To become legally effective, any change in the formation of a parish, by reorganization, dissolution, partition, or reunion, needs the sanction of the civil authorities. The administration of ecclesiastical foundations (*Stiftungen*) is also entirely subject to state supervision. All gifts and bequests in favour of existing foundations, likewise the establishment of new and independent ones, require the approbation of the State. Churches, chapels, hospitals, and other public foundations devoted to the care of the poor and orphans, and to similar charitable purposes, are exempt from the house tax. Homes for the care of the sick and the support of the poor, as well as public educational institutions, are exempt from the income tax on the capital invested. The taxable values of rectories are exempt from any parish assessment.

*Church and School.*—The public educational system is under the direction of the State, the highest authority being the *Oberschulrat* (Supreme Educational Council), which is directly subject to the Minister of the Interior. The highest ecclesiastical superiors may designate a representative to attend the deliberations of the *Oberschulrat* whenever there is question of religious instruction and its place in the plan of studies. In the public schools instruction is given simultaneously to all children of school age, regardless of creed, with the exception of religious instruc-

tion. The local supervision over the public schools, as well as the supervision of all local school funds, including those of each religious confession, is entrusted to the town council; at the same time each of the creeds represented in the community is represented by its pastor. In the appointment of teachers to public schools all possible respect is had for the religious belief of the children; in schools attended by children of only one creed the teachers are to be of that creed. Religious instruction is provided and supervised by the respective churches and congregations. They may be assisted in this by teachers. The general plan of religious instruction is laid out by the higher spiritual authorities and supervised by their deputies. The establishment of private educational institutions is permitted, but only under certain conditions; these establishments are under state supervision; from time to time the school authorities visit them and hold examinations. Ecclesiastical corporations and institutions may found educational establishments only on the passage of a special law. Members of religious orders or of religious congregations that resemble orders are forbidden to teach in any educational institution in the Grand Duchy of Baden. The Government may grant exemption to individuals, but such exemption is revocable at will. Churches are authorized to maintain institutions for the theological and practical training of young men for the priesthood, and to conduct boarding houses (*Konvikte*) for students who frequent the gymnasias or the university with the intention of preparing themselves for the ecclesiastical state.

IV. STATISTICS.—Baden, with the Hohenzollern territories belonging to Prussia, forms the Archdiocese of Freiburg. The strong intermixture of creeds throughout Baden is a result of the earlier territorial dismemberment described above. According to the census of 1905, in 34 of the 53 judicial districts, the Catholics are in the majority. They are especially strong in the north-east (the Tauber valley), the farther Odenwald, and the southern half of Baden. Even here, however, predominantly Protestant districts are to be found, e. g. Kehl, Lahr, Emmendingen, the Margravate of Sulzburg as far as Basle, and the valley of the Wiese as far up as Lörrach; in addition to the districts just mentioned, the country on both sides of the Neckar and the Lower Rhine are overwhelmingly Protestant. Ecclesiastically, Baden is divided into 3 city chapters and 36 rural chapters, with about 814 parishes and curacies, 114 chaplaincies, and 259 assistants. The cathedral parish of Freiburg and the parish of St. Peter are exempted from the above-mentioned chapter system. Besides this, there are 3 military and 3 institutional chaplaincies. At the beginning of 1907 Baden had 1,260 Catholic priests, i. e. pastors, assistants, and chaplains. Of the 1187 ecclesiastical benefices of Baden, 295 are in the gift of the Grand duke as patron; 264 are left to the free collation of the archbishop; 145 are filled through presentations by noblemen, landowners, and others; 168 are disposed of by the so-called *terna*, i. e. the archbishop proposes to the Grand duke three candidates for a benefice, and the latter selects one for canonical institution. In the case of 9 benefices, the right of presentation is alternate; in 47 cases it is disputed or unknown. The salary of pastors and beneficed clergy is derived from the temporalities of the living; the income of poorly equipped parishes is supplemented by an annual state appropriation which sometimes amounts to \$50,000.

*Orders and Congregations.*—Male orders and congregations are prohibited from making any foundations in the Grand Duchy of Baden. In proportion to the population, the number of orders and congregations of women is small, and new foundations are vigorously opposed by the Government. The fol-

lowing teaching orders are represented: the Sisters of the Holy Sepulchre in Baden-Baden, the Dominican Sisters in Constance, Cistercian Sisters in Lichtenenthal near Baden-Baden, in Offenburg the Choir Sisters of St. Augustine from the congregation of Notre Dame (with a branch in Rheinburg), the Ursulines in Villingen (with a branch in Breisach); there are in all 5 orders for the education of girls. The following congregations for the care of the sick are represented in Baden: the Sisters of St. Vincent de Paul, with mother-house at Freiburg, the Sisters of St. Francis, with mother-house at Gengenbach, the Sisters of the Holy Cross from Ingenbohl in Switzerland, with mother-house at Hegne, near Constance. In addition there are in Baden the Vincentian Sisters from the mother-house at Strasburg, Sisters of the Most Holy Saviour (the so-called Niederbronn Sisters), from the mother-house at Oberbronn, Alsace, Franciscan Sisters from the mother-house at Mallersdorf, Bavaria, Josephite Sisters from St. Marx (Alsace), also Sisters of the Holy Cross from the mother-house at Strasburg.

*Education.*—As explained above, the school system is entirely under the direction of the State; consequently there are but few purely Catholic educational institutions. For the training of the Catholic clergy there are the archiepiscopal seminary (*Priesterseminar*) at St. Peter, the home (*Konvikt*) for theological students at Freiburg, and 4 gymnasial boarding schools at Constance, Freiburg, Rastatt, and Tauberbischofsheim. At the state university (Freiburg) there is a faculty of Catholic theology numbering 11 professors; the number of theological students during the summer semester of 1907 was 226. The 62 Government intermediate schools of Baden (17 classical gymnasias, 3 "real", 4 preparatory, 7 higher gymnasias; 23 *Realschulen*, 8 high schools) recorded an attendance in 1905 of 5,157 Catholic students. In 17 of the Government intermediate schools religious instruction is given by 26 specially appointed priests (*Religionslehrer*); in the others religious instruction is cared for by the local clergy. Of the 11 private intermediate schools for boys, the Institute and School of Monsignor Lender in Sasbach (*Progymnasium* and *Realschule*) is Catholic in character; in 1905 it had 483 Catholic students, and 8 priests as religious instructors. The 7 government high schools for girls had in 1905 an attendance of 964 Catholic students. Of the 33 private intermediate schools for girls, attended by 1,437 Catholic girls, 5 are distinctly Catholic in character, and have an attendance of 1,132. The Catholic periodicals now published in Baden number 25.

*Charitable Institutions.*—In Baden there are 254 institutions for the care of the sick, with 13,800 beds; about 100 of these hospitals, infirmaries, etc. are directed, or are actually served, by Catholic orders and congregations. The Diocese of Freiburg contains 3 orphanages (Riegel, Gurtweil, and Walldürn); in the village of Herthen there is a large institution for the care of imbeciles, with about 400 inmates, under the direction of the Sisters of the Holy Cross; in Heitersheim there is a large institution for the reclamation of girls, directed by a Catholic sisterhood. The Baden non-sectarian Red Cross Society, to which many Catholics belong, has 34 relief-centres for men, with about 5,500 members, and 333 unions for women, with 57,600 members; the association maintains 75 stations with about 470 employes. There are in Baden 13 Catholic homes for servant girls.

*Catholic Societies.*—Concerning these societies there are no adequate statistics. We may mention, however, the People's Union (*Volksverein*) for Catholic Germany, with 27,100 members, Catholic workmen's unions (150), Catholic journeymen's unions (53), apprentices' unions and clubs for young men (35), and St. Joseph's unions (2). Freiburg is the

centre of the associated charities (*Charitasverband*) of Catholic Germany. The chief religious societies and confraternities are: the Archconfraternity of the Most Holy Sacrament of the Altar, the Most Pure Heart of Mary, and of Christian Mothers, the League of Prayer for Germany, the Association of the Holy Family, the Association of the Holy Childhood of Jesus, the Boniface Society, the Ludwig Mission Society, St. Michael's Society, the Societies of St. Vincent de Paul for men and women, and others.

The most important Catholic church edifices are the cathedrals of Freiburg and Constance, the churches of Ueberlingen and Breisach, and those of Baden-Baden, Salem, St. Blasien, Reichenau, Gengenbach, Bronnbach, Schwarzbach, Ladenburg, Neustadt, Karlsruhe.

A complete bibliography is to be found in KIENITZ and WAGNER, *Badische Bibliothek* (Karlsruhe, 1897 and 1900). The more important works, especially those treating of ecclesiastical history, are: SCHÖFFLIN, *Historia Zaringo-Badenia* (7 vols., Karlsruhe, 1763-66); DÜMGE, *Regesta Badensia* (Karlsruhe, 1836); MONE, *Quellenammlung der badischen Landesgesch.* (4 vols., Karlsruhe, 1836); PREUSCHEN, *Badische Geschichte* (Karlsruhe, 1842); MONE, *Die katholischen Zustände in Baden* (Ratisbon, 1841 and 1843); BADER, *Die katholische Kirche in Baden* (Freiburg, 1860); LONGNER, *Beiträge zur Geschichte der oberheinischen Kirchenprovinz* (Tübingen, 1863); *Offizielle Aktenstücke über die Kirchen und Schulfrage in Baden* (7 numbers, Freiburg, 1864-75); VIERORDT, *Badische Geschichte bis zum Ende des Mittelalters* (Tübingen, 1865); BRÜCK, *Die oberheinische Kirchenprovinz* (Mains, 1868); SPOHN, *Badisches Staatskirchenrecht* (Karlsruhe, 1868); FRIEDBERG, *Der Staat und die katholische Kirche im Grossherzogtum Baden* (2d ed., Leipzig, 1874); KÖRBER, *Die Ausbreitung des Christentums im südlichen Baden* (Heidelberg, 1878); *Das Grossherzogtum Baden* (Karlsruhe, 1885); BAUMSTARK, *Die kirchenpolitischen Gesetze und Verordnungen für die römisch-katholische Kirche im Grossherzogtum Baden* (Karlsruhe, 1888); WEECH, *Badische Geschichte* (Karlsruhe, 1890); HEINER, *Gesetze die katholische Kirche (in Baden) betreffend* (Freiburg, 1890); MAAS, *Geschichte der katholischen Kirche im Grossherzogtum Baden* (Freiburg, 1891); HEINER, *Die kirchlichen Erlasse, Verordnungen und Bekanntmachungen der Erzbischöfe Freiburg* (2d ed., Freiburg, 1898); MÜLLER, *Badische Landtagsgesch.* (Berlin, 1899-1902), I-IV; FESTER and WITTE, *Regesten der Markgrafen von Baden und Hachberg* (2 vols., Innsbruck, 1900); KRIEGER, *Topographisches Wörterbuch des Grossherzogtums Baden* (2d ed., 2 vols., Heidelberg, 1903-05); GÖNNER and SESTER, *Das Kirchenpatronatsrecht im Grossherzogtum Baden* (Stuttgart, 1904); *Zeitschrift für Geschichte des Oberrheins* (Karlsruhe, 1850-85), I-XXXIX; *Id.*, new series (Freiburg, 1886-92, Karlsruhe, 1893-1904, Heidelberg, 1902, sqq.), I-XXII.

The most important historical periodicals are: *Zeitschrift für Geschichte des Oberrheins* (Karlsruhe since 1850); *Freiburger Diözesanarchiv* (Freiburg, since 1885); *ALEMANNIA* (Bonn, 1873 sqq.; since 1900 in Freiburg).

JOSEPH LINS.

**Badia**, TOMMASO, Cardinal, author, papal legate, b. at Modena, 1483; d. at Rome, 6 September, 1547. He entered the Dominican Order in his native city, soon excelled all his brethren in learning, and taught theology successively at Ferrara, Venice, and Rome. When Sylvester de Prierias was sent on a mission to the princes of Italy, Badia was chosen to fill, temporarily, the office of Master of the Sacred Palace, to which he succeeded permanently, probably in 1523. He was put on the commission which drew up the list of abuses to be reformed in the Council of Trent. He took part in the Diet of Worms (1540), not only as disputant, but also as theologian of Cardinal Contarini. On his return to Italy Paul III created him cardinal, and though selected as one of the legates to preside at Trent he was retained at Rome to examine the doctrinal and disciplinary memoranda drawn up in the sessions of the council. It was on his favourable recommendation and approval of its constitutions that Paul III confirmed the Society of Jesus. At his own desire he was buried in the Minerva beside Cardinal Cajetan. He is the author of several philosophical treatises, as well as works on Divine Providence, the immortality of the soul and several treatises against Luther, none of which have been published.

THOS. M. SCHWERTNER.

**Badin**, STEPHEN THEODORE, the first Catholic priest ordained within the limits of the original thirteen States of the Union, pioneer missionary of Kentucky, b. at Orléans, France, 17 July, 1768; d. at Cincinnati, Ohio, 21 April, 1853. Educated at Montaigu College, Paris, he entered the Sulpician Seminary of his native city in 1789. He was sub-deacon when the seminary was closed by the revolutionary government, in 1791, and sailed from Bordeaux for the American mission in November of the same year, with the Revs. B. J. Flaget and J. B. David, both destined in God's providence to wear the mitre in Kentucky. They arrived in Philadelphia on the 26th of March, 1792, and were welcomed at Baltimore by Bishop Carroll on the 28th. Stephen T. Badin pursued his theological studies with the Sulpicians and was ordained a priest by Bishop Carroll, 25 May, 1793. His was the first ordination in the United States. After a few months spent at Georgetown to perfect himself in English, Father Badin was appointed to the Mission of Kentucky. He left for that scene of his apostolic labours with Father Barrières, 3 September, 1793, travelled on foot as far as Pittsburgh, and by flat boat down the Ohio, landing at Limestone (Maysville), Ky., where they found twenty Catholic families. They walked sixty-five miles to Lexington, and on the first Sunday of Advent, 1793, Father Badin said his first Mass in Kentucky at the house of Denis McCarthy.

He settled at White Sulphur, Scott County, sixteen miles from Lexington, and for about eighteen months attended this church and neighbouring missions. In April, 1794, his companion, who resided in Bardstown, left for New Orleans, and Father Badin was now alone in the Kentucky mission. For fourteen years he attended to the spiritual wants of the various Catholic settlements, scattered over an extent of more than 120 miles, forming new congregations, building churches, never missing an appointment. To visit his missions regularly he had to live in the saddle, and it is estimated that he rode more than 100,000 miles during his ministry in Kentucky. For many years he was unaided and alone; it was only in July, 1806, that he received permanent help, when the Rev. Charles Nerinckx came to take the larger part of the burden from his shoulders. They lived together at St. Stephen's, on Pottingers Creek, which was still their headquarters on the arrival, in 1811, of Bishop Flaget, whom Father Badin had suggested and urged as first Bishop of Bardstown. Difficulties about the holding of church property soon arose between the bishop and Father Badin, without, however, interfering with the reverence of the latter for the bishop and the bishop's friendship for him. Together they went to Baltimore in 1812 to submit the controversy to Archbishop Carroll. It was not settled. They returned to Kentucky in April, 1813, and Father Badin resumed his missionary duties and accompanied his bishop on many pastoral journeys, until 1819. The Rev. J. B. David had been appointed coadjutor in 1817, but persistently refused to accept the honour. Father Badin, believing that this selection would put an end to the controversy about church property, and be for the good of the diocese of which he was the founder, left for France in the spring of 1819. The consecration of Bishop David in September of that year, and unjust suspicions about his disposition of church properties caused him to remain abroad. In 1820 he accepted the parish of Millanay and Marreilly-en-Gault, about forty miles from Orléans. He continued, however, to take the greatest interest in the Kentucky mis-

sions, insisted on his loyalty to Bishop Flaget, and helped constantly and generously to secure gifts in money and valuable church-furniture for the missionaries. In 1822 he published in Paris a "Statement of the Missions in Kentucky", with the same purpose in view.

Father Badin returned to America in 1828. After a year on the Michigan mission, he went back to Kentucky in 1829. The next year he offered his services to Bishop Fenwick of Cincinnati, and took charge of the Pottawottomie Indians at St. Joseph's River. Miss Campau of Detroit, an expert Indian linguist, acted as interpreter and teacher, until Father Badin left the place in 1836. Having returned to Cincinnati in that year, he wrote for the "Catholic Telegraph" a series of controversial "Letters to an Episcopalian Friend". In 1837 he went to Bardstown, Ky., was appointed vicar-general, and continued to visit the various missions. In 1841 he removed to Louisville with the bishop's household. In that year he conveyed a great deal of church property (notably that of Portland, near Louisville) to the bishop, and a farm to the Very Rev. E. Sorin of Notre Dame, Indiana.

On the 25th of May, 1843, Father Badin celebrated the golden jubilee of his priesthood, at Lexington, where he had offered up the Holy Sacrifice of the Mass for the first time in Kentucky. In September, 1846, he accepted from Bishop Quarter of Chicago the pastorate of the French settlement at Bourbonnais Grove, Kankakee County, Illinois. In the winter of 1848 he was again in Kentucky, and Bishop-Coadjutor Spalding welcomed him to the episcopal household. About two years later he became the guest of Archbishop Purcell at Cincinnati, and eventually died at the archbishop's residence. His body lay undisturbed in the cathedral crypt for over fifty years. In 1904 Archbishop Elder permitted its removal to the University of Notre Dame, Indiana.

Father Badin's writings are: "Etat des missions du Kentucky" (Paris, 1822), tr. in the "U. S. Cath. Miscellany" for December, 1824, and in the "Catholic World", September, 1875; "Carmen Sacrum", a Latin poem composed on the arrival of Bishop Flaget in Kentucky, June, 1811, translated into English by Colonel Theodore O'Hara of Frankfort, Ky., author of the "Bivouac of the Dead"; "Epicedium", Latin poem composed on the occasion of the death of Col. Joe Davis at the Battle of Tippecanoe, 7 November, 1811, translated by Doctor Michell of New York (Louisville, 1844); "Sanctissimæ Trinitatis Laudes et Invocatio" (Louisville, 1843), also the original text and tr. in Webb's "The Centenary of Catholicity in Kentucky" (Louisville, 1844); "Letters to an Episcopalian Friend"—three controversial articles on the Church and the Eucharist (published in the "Catholic Telegraph" of Cincinnati, 1836).

CAMILLUS P. MAES.

**Badius Ascensius.** See PRINTING, ART OF.

**Badius, RAPHAEL**, a Florentine Dominican of the seventeenth century. He was deeply versed in Tuscan and Florentine antiquities, and his researches made him particularly conversant with quaint and curious matters of history and hagiography. He rendered valuable assistance to the Jesuit Fathers, Henschen and Papebroch, in their labours on the "Acta Sanctorum", as they themselves acknowledge (T. II, Junii, ad diem X, de Joanne Dominici, p. 395, n. 6). As Chronicler of the Convent of Santa Maria Novella, Florence, he was also known to the historian and bibliographer Cinellus, who makes frequent and grateful mention of the learned Dominican's helpful

knowledge of the literature and writers of Florence (Bib. Volante, Scanzia VI, 88; IV, 87; XII, 106). In 1681, he was Dean of the University of Florence. QUÉRIFF-ÉCHARD, *Scriptores Ord. Præd.* (Paris, 1721), II, 741.

JOHN R. VOLZ.

**Baegert, JOHN JACOB**, missionary and ethnographer, b. at Schlettstadt in Alsace, 23 December, 1717; d. at Neustadt-on-the-Haardt in the Rhenish Palatinate, 29 September (or December), 1777. Baegert belonged to an Alsatian family from which had come several members of religious orders. He studied philosophy two years, entered the Society of Jesus at Aschaffenburg, 27 September, 1736, taught the humanities at Mannheim in 1740, studied theology at Molsheim, and after ordination, 14 February, 1749, went to America as a missionary. Lower California was given to him as his field of labour. Here he founded the mission of San Ignacio and worked for seventeen years until the expulsion of the Society in 1767. He embarked at Loretto on the return journey, 3 February, 1768, and after a short stay in a Spanish monastery of the Minorites retired to the Jesuit college at Neustadt-on-the-Haardt, where he ended his days. In 1773 Baegert published anonymously at Mannheim "Nachrichten von der amerikanischen Halbinsel Californien . . . mit einem zweifachen Anhang falscher Nachrichten". The publication is distinguished by truthfulness of statement and corrects the over-favourable description of conditions in California which had been given by Father Venegas in his account issued at Madrid in 1751. Father Baegert describes the physical character of Lower California, the customs and language of the natives and narrates the history of the mission. Owing to the numerous ethnographical observations the work was of value up to the middle of the nineteenth century and an edited translation was issued by the Smithsonian Institution in 1863-64; Vivien de Saint-Martin also wrote a detailed account of the work. The contemporaries of Baegert spoke highly of his talent for poetry and of his fine personal qualities.

*Reports of the Smithsonian Institution* (Washington, 1863), 352 sqq.; (1864), 378 sqq.; (1865), 41 sqq.; DE SAINT-MARTIN, *L'Année géographique*, V, 1866 (Paris, 1867), 233-39; BACKER-SOMMERVOGEL, *Bibliothèque* (1890), I, 760 sqq., and (1898), VIII, 1724; HUONDER, *Deutsche Jesuitenmissionäre des XVII. und XVIII. Jahrhunderts in Stimmen aus Maria-Laach*, sup. to vol. (contains the most reliable personal data).

OTTO HARTIG.

**Baert, FRANÇOIS**, Bollandist, b. at Ypres, 25 August, 1651; d. at Antwerp, 27 October, 1719. He entered the Society of Jesus at Mechlin, 28 September, 1667. After passing through the novitiate he was regent of several colleges in the province of Belgian Flanders, studied theology and philosophy, and was finally ordained priest in 1680. The following year, 1681, he was made assistant to Father Daniel Papebroch, the last survivor of the first generation of Bollandists. The name of Baertius is on the title-pages of nine volumes of the *Acta Sanctorum*; the last four of May and of the first five of June; but to judge from the articles published in these volumes his collaboration is by no means so large as these figures would indicate. There are no articles bearing his signature either in the volumes for May nor in the fifth volume for June. The other four volumes for June contain some fifteen articles by him, all very short excepting the commentaries on St. Columba and St. Basil the Great, of the date of 9 June. In 1688, in company with Father Conrad Janninck, he made a trip to Austria and Hungary in search of literary material; the journey lasted eight months and the two returned with a large number of documents.

CH. DE SMEDT.

**Baumer, SUITBERT**, historian of the Breviary and one of the most scholarly patrologists of the nineteenth century, b. 28 March, 1845 at Leuchtenberg near Kaiserswerth (Rhine); d. at Freiburg 12 August, 1894. He made his university studies at Bonn and Tübingen; in 1865 he entered the Benedictine Abbey of Beuron, then newly founded, and was ordained priest in 1869. The years 1875-90 were spent at Maredsous Abbey in Belgium and at Erdington in England; in the latter year he returned to Beuron. Dom Baumer was long the critical adviser of the printing house of Desclée, Lefebvre and associates at Tournai, for their editions of the Missal, Breviary, Ritual, Pontifical, and other liturgical works. He contributed to leading reviews a number of valuable essays, e. g. on the Stowe Missal (the oldest liturgical record of the Irish Church) in the "Zeitschrift f. kath. Theologie" (1892), on the author of the "Micrologus" (an important medieval liturgical treatise) in "Neues Archiv" (1893), on the "Sacramentarium Gelasianum" in the "Historisches Jahrbuch" (1893). He also wrote a life of Mabillon (1892) and a treatise on the history and content of the Apostles' Creed (1893). His most important work is the classical history of the Roman Breviary "Geschichte des Breviers" (Freiburg, 1895; French tr., R. Biron, Paris, 1905). In this work he condensed the labours of several generations of erudite students of the Breviary and the best critical results of the modern school of historical liturgists.

*Allg. deutsche Biographie*, XLVI, 257, and the biographical account prefixed to the German and French texts of his history of the Breviary.

THOMAS J. SHAHAN.

**Bagamoyo**, VICARIATE APOSTOLIC OF, in German East Africa, separated by a pontifical Decree of 11 May, 1906, from the Vicariate Apostolic of Northern Zanzibar. The Catholics number 14,728 (in all German East Africa there are about 6,700,000 natives, most of whom belong to mixed tribes of the Bantu race). The mission is cared for by the Congregation of the Holy Ghost and the Immaculate Heart of Mary (52) and by the Trappists (8), aided by two congregations of women: Filles de Marie (7), and Sisters of the Precious Blood, formerly Trappistines (28). The first vicar Apostolic, Rt. Rev. Franz Xaver Vogt, of the Congregation of the Holy Ghost, was elected 25 July, 1906. There are 15 churches and chapels, 15 stations with medical service, 15 orphanages, 6 industrial, or trade, and agricultural, schools, 71 schools with 7,574 native pupils, 2 leper stations, and 2 hospitals. The vicar Apostolic resides at Bagamoyo, a small seaport town near the mouth of Kingani, opposite the Island of Zanzibar, and the centre of the telegraph and cable systems of the colony. (See AFRICA.)

THOMAS J. SHAHAN.

**Bagdad.**—This city was founded on the Tigris by the second Abbaside Caliph Abou Giafar al Mansur (762 or 764) and named by him Medinet es-Salam, or City of Salvation; Bagdad is a popular name said to mean "Garden of Dat", a Mussulman dervish. During five centuries it was the rich and brilliant capital of the famous Arabian Empire. Houlagou, a grandson of Genghis Khan, entered it in 1262; it afterwards became a possession of the Kara Koyouli Turks, was taken by Tamerlane, and, in 1517, fell into the hands of the Persians who, except for a short interval in the sixteenth century, ruled over it until 1638, when Sultan Murad made it definitively a city of the Ottoman Empire. It is now the chief town of a vilayet, or district, of the same name, and has lost much of its former importance, though it

still remains the most important city of Asiatic Turkey, after Damascus and Smyrna, and a great emporium of international trade. It exports textile fabrics, gold and silverware, horses, dates, etc. There are many beautiful mosques in the city, and the ruins of its ancient walls are still visible. The climate is hot; fevers are frequent, and the plague sometimes appears. Its population, taken as including the neighbouring villages, is said to be about 145,000; of these 86,000 are Mussulmans, mostly Arab Sunnites and Persian Shiites; 52,000 are Jews, and 7,000 Christians. Turkish statistics, however, are usually very uncertain. The Christians are divided as follows: 3,300 Armenians (including about 1,000 Catholics and 100 Protestants), 100 Greeks (50 Catholics); 1,600 (3,000?) Chaldeans; 1,200 Syrians; and 500 Latins.

In 1638, after the Turkish conquest, owing to the previous kindness of Abbas the Great, Urban VIII created, at the expense of a pious French lady, a Latin bishopric for the Catholics in Persia, under the title of Babylon, the old city being then (though erroneously) identified with Bagdad. For a long time the bishops of this title, when they came to the East, resided at Hamadan, in Persia, and for various reasons there were often no bishops, but only vicars Apostolic. It was only in 1742 that Père Joseph-Marie de Jésus, a Carmelite, was allowed to enter this Mussulman town. In 1848 the see became an archbishopric, with Ispahan as a suffragan see, till 1874; the archbishop, Monsignor Trioche, was appointed Apostolic Delegate for the Catholics of Oriental rites. He resigned this office in 1850, and until his death, in 1887, there were special delegates, the last of whom, Monsignor Altmayer, succeeded him and reunited both titles, as did his successor, Monsignor Jean Drue. We must here, moreover, notice that the Latin Archbishop of Bagdad, according to the decree of Urban VIII, must always be of French nationality.

The limits of the ecclesiastical province extend as far as Assyria, Mesopotamia, and the territories of Bassorah and Amida, with about 2,000 Latin faithful, mostly foreigners. It includes three Apostolic prefectures: Bagdad, Mardin, and Mossul. The Prefecture of Bagdad is governed by French Discalced Carmelites, who have at Bagdad a large and beautiful college, an elementary school, a dispensary, and stations at Bassorah, Amarah, and Bushire, with primary schools and some ten churches or little chapels. French Sisters of the Presentation of Tours conduct at Bagdad an important school for girls and an orphans' institute. For the Prefectures of Mardin (French Capuchins) and Mossul (French Dominicans), see articles under those titles.

The Apostolic Delegation of Bagdad, for Mesopotamia, Kurdistan, and Armenia Minor, is, as appears from its official appellation, more extensive than the Latin archbishopric. It embraces 5 Armenian dioceses, with 40 priests and about 12,000 faithful; 5 Syrian dioceses, with 80 priests and about 12,000 faithful; 9 Chaldean dioceses, with 160 priests and about 40,000 faithful.

Since the foundation of the Chaldean patriarchate by Innocent XI in 1681, after the conversion of a great many Nestorians, the Chaldean patriarch bears the title of Babylon, i. e. Bagdad. His residence was first at Diarbekir, then at Bagdad (since about 1838), and is now at Mossul. A Syrian archbishopric was also erected in 1862, with the same title of Babylon, or Bagdad; and the titular resides, or is authorized to reside, at Bagdad.

According to Bar-Hebræus ("Chronicon Eccl.", ed. Lamy, II, 236), Elias, the Greek Patriarch of Antioch, in 910 re-established at Bagdad the ancient residence of the Orthodox Catholics which had been unoccupied since the Nestorian Schism (432). The

Greek name for Bagdad was Eirenopolis, the equivalent of Medinet es-Selam. Eirenopolis is now considered among the Greeks a metropolitan title, and is held by a prelate who assists the Patriarch of Antioch as his vicar.

CUINET, *La Turquie d'Asie*, III, 3-212; PIOLET, *Les missions catholiques françaises au XIX<sup>e</sup> siècle*, I, 222-271; *Missiones Catholicae* (Propaganda, Rome, 1907.)

#### S. PÉTRIDÈS.

**Bageis**, a titular see of Lydia in Asia Minor. This name is found on coins, but becomes *Bagis* in the Synecdemus of Hierocles and *Bage* in later "Notitiæ græcæ episcopatum". Bageis takes the epithet *Cæsarea* and names the River Hermos on its coins. It has been placed by Keppel's inscriptions near Sirghe on the Hermos (Guediz-tchai); but the site of the city is said to be on the north bank, while Sirghe is on the south side of the river. Harnack (*Mission und Ausbreitung des Christentums in den ersten drei Jahrhunderten*, 486) maintains that its bishop was present at Nicea, but this is an error caused by a confusion with Baris, another Lydian city; the lists edited by H. Gelzer and C. H. Turner are silent about Bageis. We know really only three bishops of Bageis: Chrysaphius, or Chrysanthus, at Ephesus (431), placed wrongly by Lequien in a non-existent see, Balcea or Balicia; Leonides, who subscribed the letter of the Lydian bishops to the Emperor Leo I (458); Basilius, at the council under Photius (879). The city still figures in a list about 1170-79. The Lydian Bageis, Bagis, or Bage, is not to be confounded with Bage in Numidia.

#### S. PÉTRIDÈS.

**Baglioni**, GIOVANNI, CAVALIERE, known as the "Deaf Man of the Barozzo", a painter of distinction, b. in Rome, 1571; d. there 1644. His artistic work is, however, overshadowed by his biographies of his contemporaries. The literary work which furnishes his chief claim to fame is his "Lives of the Painters, Sculptors, and Architects" living in Rome, from 1573 to 1642—from the pontificate of Gregory XIII to that of Urban VIII. He was a pupil of Francesco Morelli and during his life did a number of works of importance at Rome under Popes Sixtus V, Clement VIII, and Paul V, notably in the Vatican, in Saint Peter's, and in Saint John Lateran. Pope Paul V created him a Knight of the Order of Christ for his painting of Saint Peter raising Tabitha from the dead. This was in St. Peter's but is not now extant. For the church of Santa Maria dell' Orto he painted in the chapel of Our Lady with the Zuccheri scenes from the life of the Blessed Virgin. Among other works which he executed for this church is a "Saint Sebastian". An excellent example of Baglioni's work is "The Last Supper" at San Niccolò in Carcere. From his brush also there is a "Saint Stephen" in the Cathedral at Perugia, and in that of Loretto a "Saint Catherine".

BRYAN, *Dictionary of Painters and Engravers* (London, and New York, 1903-05).

#### AUGUSTUS VAN CLEEF.

**Bagnorea** (anciently NOVEMPAGI, BALNEUM REGIUM), DIOCESE OF, is situated in the district of Viterbo, Italy, and immediately subject to the Holy See. The Diocese of Bagnorea has a population of about 20,000; the city contains about 4,500 inhabitants. According to tradition, St. Ansanus preached the Gospel here in the third century, and the church of Santa Maria delle Carceri outside the Alban Gate was said to have been built above the prison in which he was confined. There are no records as to the date of the erection of this diocese; St. Gregory the Great, however, is authority for the statement that about

the year 600 the Deacon John was appointed bishop of this see. Up to the time of Urban V, Montefiascone was part of the Diocese of Bagnorea, but was made by this pontiff the seat of a new diocese. Ughelli, without, however, adducing any documentary proof, says that the Diocese of Bagnorea was joined to the Diocese of Viterbo, 4 February, 1449, but neglects to mention when they were re-established as separate dioceses. Among the sacred edifices worthy of note are: the ancient Gothic cathedral and the new cathedral built by Bishop Ulderico Nardi (1698), and restored in 1764 by Bishop Giuseppe Aliuffi. Here is preserved an arm of St. Bonaventure, a citizen of Bagnorea, as well as some of his writings. Among the most celebrated bishops, besides those already mentioned, are St. Aldualdus (861), Corrado Manili (1521), a celebrated professor of law in the Universities of Padua and Pavia, Tommaso Sperandio (1574), Pietro Paolo Febei (1635), who founded the seminary, Martino Cordella, banished to France in 1789 because he would not take the oath of allegiance to the French Republic. During the barbarian invasions, between the sixth and ninth centuries, the city was taken several times by the Goths and the Lombards. In 822 the Emperor Louis I added it to the Papal States.

The Diocese of Bagnorea contains 6 rural deaneries, 24 parishes, 106 churches, chapels, and oratories, 54 secular priests, 45 seminarians, 10 priests, secular and regular, 38 lay brothers, 63 members of female religious orders, 2 schools for girls, and a population of 26,380.

CAPPELLETTI, *Le chiese d'Italia* (Venice, 1844), V, 505; *Anuario eccl.* (Rome, 1906).

#### U. BENIGNI.

**Bagot**, JEAN, theologian, b. at Rennes, in France, 9 July, 1591, d. at Paris, 23 August, 1664. He entered the Society of Jesus 1 July, 1611, taught belles-lettres for many years in various colleges of France, philosophy for five years, theology for thirteen years, and became theologian to the general of the society. In 1647 he published the first part of his work "Apologeticus Fidei" entitled "Institutio Theologica de verâ Religione". In 1645 the second part, "Demonstratio dogmatum Christianorum", appeared, and in 1646 "Dissertationes theologicæ" on the Sacrament of Penance. In his "Avis aux Catholiques", Bagot attacked the new doctrine on grace, directing against it also his "Lettre sur la conformité de S. Augustin". In 1653 his "Libertatis et gratiæ defensio" was published.

In 1655 Rousse, Curé of Saint Roch (or Masure, the Curé of St. Paul's), published a little work entitled "De l'obligation des fidèles de se confesser à leur curé, suivant le chapitre 21 du concile general de Latran". Père Bagot answered this in his "Défense du droit épiscopal et de la liberté des fidèles", which he afterwards translated into Latin. A controversy arose, in which various ecclesiastics, including Mgr. de Marca, Archbishop of Toulouse, took sides against Bagot. The work was referred to the faculty of theology at Paris, which censured some of the propositions. Bagot, however, defended his doctrine before this assembly with the result that the censure was removed. He answered his opponents in the "Réponse du P. Bagot". On his return from Rome he devoted the remaining years of his life to the congregation of the Blessed Virgin, and died superior of the professed house at Paris.

HURTER, *Nomenclator*, II, 67; DE BACKER, *Bibl. des écriv. de la c. de J.*, I, 32; SOMMERVOGEL, *Bibl. de la c. de J.*, I, 774; *idem in Dict. de théol. cath.*

#### G. E. KELLY.

**Bagshaw**, CHRISTOPHER, convert, priest, prisoner for the Faith, and a prominent figure in the controversies between Catholic priests in the reign of Elizabeth. He came of a Derbyshire family, but the year of his birth is unknown. He died in Paris

sometime after 1625. Bagshaw was at St. John's College, Cambridge, in 1566, was graduated B. A. at Balliol, Oxford, 1572, and probably became a Fellow of that college in the same year. As a Fellow he was a party to the expulsion from the college of the afterwards famous Jesuit, Father Parsons.

At proceeding M. A. in 1575, Bagshaw was still a zealous Protestant. His administration as Principal of Gloucester Hall (1579) was unpopular and brief. In 1582, in France, he became a Catholic and was ordained a priest. Going to Rome with the permission of Cardinal Allen, he entered the English College. It is said by Bullen, that he was expelled by Cardinal Boncompagni for his quarrelsome temper and unpopularity. Foley's list of students of the English College does not contain his name. Later, at Paris he proceeded doctor of divinity and doctor of the Sorbonne, though afterwards he was dubbed by his Jesuit opponents *doctor erraticus, doctor per saltum*. On his return to England he was imprisoned (1587) in the Tower of London, under the statute of 27th of Elizabeth, an act against Jesuits and Seminarists. (The text of this law is in Hardy and Gee.) With a number of other priests out of the more than 400 labouring in England, he was imprisoned in Wisbeach Castle, 1593.

There now came to a head a factional division among the labourers on the English mission. There were two original sources of difference: the existence of a Spanish faction, headed by the Jesuits, and the Jesuits' control of the English College at Rome (Cf. Dodd and Tierney; Lingard). The partisan feelings aroused found vent in two controversies in which Bagshaw was prominent, if not first, on the side opposed to the Jesuits and their friends. The earlier dispute, arbitrated after nine months, arose from the vigorous opposition of Bagshaw and the elder clergy to the introduction of a religious rule among the thirty-three priests in Wisbeach Castle. Later, when, partly for the purpose of consolidating English Catholic sentiment in favour of a Catholic successor to Elizabeth, Cardinal Cajetan placed at the head of the English Mission, as archpriest, Father George Blackwell, with instructions to consult the Jesuit provincial on matters of importance (Lingard VIII, vii), Bagshaw headed a party of protest, which, on being disciplined, appealed, with the secret aid of Elizabeth's government, to Rome. Their appeal was in part successful, though the appointment was confirmed.

Bagshaw, after his liberation, resided abroad, and is described in Daniel Featley's "Transubstantiation Exploded" as having been Rector of Ave Maria College. This work was published in 1638, and contained notes of a public disputation with Bagshaw. His death and burial, at Paris, occurred after 1625. He may have written in part "A true Relation of the Faction begun at Wisbech by Father Edmonds, alias Weston, a Jesuit, 1595, and continued since by Father Walley, alias Garnet, the Provincial of the Jesuits in England, and by Father Parsons in Rome" (1601); "Relatio Compendiosa Turbarum quas Jesuitæ Angli unâ cum D. Georgio Blackwello, Archiepiscopo, Sacerdotibus Seminariorum, Populoque Catholico concivere", etc. (Rouen, 1601).

J. V. CROWNE.

**Bahama Islands, THE, OR LUCAYOS,** the most northerly group of the West Indies, are a chain of coral islands lying between 21° 42' and 27° 34' N. lat., and 72° 40' and 79° 5' W. long., composed of twenty-five permanently inhabited islands and an immense number of cays and rocks. The group lies to the east of Southern Florida, and is separated from it

by the Gulf Stream; and to the north of Cuba, from which it is separated by the Old Bahama Channel. As to the name, nothing definite seems to be known of the origin of Bahama. It is undoubtedly of aboriginal origin, while Lucayos is evidently the Spanish *Los Cayos*, the Cays. The following are the principal islands and their area, and their population according to the census of 1901:—

Name	Area: Sq. Miles	Pop. Census 1901
Abaco and Cays	776	3,314
Andros	1,600	5,347
Berry Islands	4	215
Bimini	8	566
Cat Island	160	4,658
Eleuthera	164	8,733
Exuma and Cays	110	3,086
Grand Bahama	430	1,780
Inagua	530	1,453
Long Cay,	204	1,565
Acklins, and		
Crooked Island		
Long Island	130	3,562
Mayaguana	96	335
New Providence	85	12,534
Rum Cay	29	529
Ragged Island	5	348
Watlings Island	60	667
Total	4,500	55,000

Of the total population, about 80 per cent are of African negro descent; less than ten per cent are whites, mostly of English and Scotch descent through Loyalists from the American Colonies; and the rest are coloured or mixed. Slavery was abolished, 1 August, 1834; the number of slaves was 10,086 and the owners received compensation at the rate of £12.14.4 per head. New Providence, on which Nassau, the capital, is situated, the only island having a safe harbour, with eighteen feet of water, is the principal island. Owing to its salubrious climate, Nassau is a favourite winter resort for American tourists. The average temperature for the four winter months is 71° F.

GOVERNMENT BUILDINGS, NASSAU

**Political Status and Exports.**—Politically the Bahamas are a British Colony, being governed by a Governor and an Executive Council of eight members, a Legislative Council of nine members appointed by the Crown, and an elective legislative assembly of twenty-nine members. The islands are of coral formation, thus differing completely in their geological structure from the other West India Islands as well as from the adjacent mainland of Florida. Soil and vegetation are sparse. The chief exports are sponge, tortoise shell, ambergris, pink pearls, and shells gathered in the shallow waters of the Bahama Banks. Sisal fibre, pine-apples, grapefruit, oranges, and various other tropical fruits,

as well as precious woods, form the chief land products of export. The large bulk of the trade, both import and export, is with the United States.

*History.*—Historically the islands are of interest, because one of them, San Salvador (see SAN SALVADOR, THE LANDFALL OF COLUMBUS), was the first land of the New World discovered by Columbus, 12 October, 1492. The Spanish never made a permanent settlement in the Bahamas, but shortly after the discovery they carried off many aborigines to the mines of San Domingo, and ere long the whole population, never perhaps very large, seems to have disappeared. The statement made in some of the recent guide books, that 40,000 souls were supposed to have been carried to the mines of Hispaniola by the Spaniards, is evidently overdrawn. Had the Bahamas ever been so thickly populated, there would remain the evidence of ruins of buildings or of soil cultivation. There are few if any fruit trees whose introduction cannot be traced, and there are no food-animals on the islands. Whatever population there was, must, therefore, have subsisted on fish, corn, yams, and on a very few small wild fruits. There is nothing to warrant the supposition that the Bahamas ever had more than a very sparse aboriginal population. So little is known of the original inhabitants that they cannot be definitely classified. They may have been of Carib stock or of the race that inhabited the adjoining mainland of Florida. The brief description which Columbus gives of them, and the formation of the few skulls discovered, seem to favour the theory that they were either one with the aborigines of Florida, or a mixture of the latter with the Caribs of the West Indies. The fact that they were very mild-mannered, and not cannibalistic, favours the opinion that they were kin to the Seminoles of Florida. Excepting a few skulls, stone idols, and implements, a few of which are to be seen in the public library at Nassau, there are no aboriginal remains, and there are no ruins of any description, a fact which points to a North American, rather than to a West Indian, or Central American, origin.

In 1578 Queen Elizabeth conferred upon Sir Gilbert Humphrey all lands not already occupied by some Christian power, and finding the Bahamas neglected, he annexed them; but no settlement was established. The enmity existing between England and Spain afforded adventurers, chiefly English and French, an excuse to make them a vantage ground from which to make depredations on Spanish shipping to and from the New World, and the natural formation of the Bahamas furnished them an excellent hiding place. During the seventeenth century the islands were the rendezvous of the famous buccaneers. When, at the treaty of Riswick, in 1697, comparative peace was restored among the European nations, England withdrew her protection of the buccaneers, and some returned to more peaceful avocations (thus Morgan, a chief among them, retired to Jamaica, and subsequently was appointed governor of that island), while many others raised the black flag of piracy against all nations, and made the Bahamas a by-word for lawlessness and crime. In 1718, England began the extermination of piracy, and soon established law and order. Since then England has been in almost undisturbed possession. On 2 March, 1776, Captain Hopkins, in command of the first American Navy, took possession of Nassau, in quest of ammunition, and on 17 March departed, carrying with him Governor Brown. In 1781 the Spaniards took possession and organized a government. At the treaty of Paris, in 1783, the Bahamas reverted to England. During the early Spanish possession and depopulation nothing was done for religion, and the periods of buccaneer and pirate rule precluded religious activity. With English rule came gradually the Church of England, and in the

first years of the nineteenth century, the Methodists, Baptists, and Presbyterians made foundations in Nassau. In 1861 the Bahamas were made a bishopric of the Church of England. The inhabitants of the Bahamas are all nominally Christians, and claim allegiance to some one of the denominations named. The Baptists, served almost exclusively by native coloured preachers, are numerically the strongest. There are no reliable religious statistics.

*Catholic Church in the Bahamas.*—Though there existed a tradition of ruins of "religious" buildings being still visible in 1803 on Cat Island (probably dating from the temporary Spanish occupation of 1781-83), there is no evidence of any Catholic priest ever having visited the Bahamas until 1845, when a Father Duquesney, on a voyage from Jamaica to Charleston, S. C., U. S. A. made a stay of six weeks at Nassau, and held services in a private house with perhaps a few Catholic Cubans or Haitians present. In 1863 Rev. J. W. Cummings of New York, and in 1865 a Rev. T. Byrne spent each a few weeks in Nassau, and conducted services. Beginning with 1866, the Rev. Dr. Nelligan of Charleston made several visits, and the Bahamas were recognized in the public prints as belonging ecclesiastically to Charleston, S. C. In 1883 Bishop H. P. Northrop of that diocese paid a short visit. At his request the Propaganda, in a letter dated 28 July, 1885, requested the Archbishop of New York to look after the spiritual interests of the Bahamas, and since that date they have been under the jurisdiction of the Archbishop of New York.

In February, 1885, the Rev. C. G. O'Keeffe of New York, while visiting Nassau, organized the few Catholics, with the result that on 25 August, 1885, the cornerstone of the first Catholic Church in the Bahamas was laid by Georgina Ayde-Curran, wife of Surgeon Major Ayde-Curran of the British Army. On 13 February, 1887, it was dedicated under the patronage of St. Francis Xavier, by Archbishop M. A. Corrigan of New York. Father O'Keeffe, to whom belongs the honour of establishing the first Catholic Church in the Bahamas, remained in charge till 1889. In October, 1889, Rev. D. P. O'Flynn came to Nassau with four Sisters of Charity from Mount St. Vincent, New York, who at once opened a free school for coloured children, and a select school. In June, 1890, Rev. D. P. O'Flynn was succeeded by Rev. B. J. Reilly. In February, 1891, the Rev. Chrysostom Schreiner, O. S. B., of St. John's Abbey, Minnesota, took charge of the mission, and since 1894, two other Benedictine Fathers have been associated with him in the work. In 1893 a new mission was opened at Salvador Point, Andros Island, and in 1897, the Sacred Heart mission was opened in the eastern portion of the city of Nassau. There are, therefore, at present St. Francis Xavier's Church, and Sacred Heart Chapel in Nassau, with each of which is connected a free school, taught by the Sisters of Charity, and an Academy by the same sisters. At St. Saviour's Mission, Andros Island, there is a free school taught by a lay teacher. The statistics of the mission for 1906 are as follows: 1 church and 2 chapels; 3 Benedictine Fathers, the superior of the mission bearing the title of Vicar Forane of the Bahamas; 9 Sisters of Charity; 1

HOUSE IN GRANTSTOWN

academy; 3 free schools with an attendance of 470 pupils. Total Catholic population 360.

**Turks and Caicos Islands**, situated to the north of Haiti, belonging geographically to the Bahama group, were separated from the other Bahamas in 1848, and made a political dependency of Jamaica. There is no Catholic population. Grand Turk, whose one industry is salt-raking, is the seat of the commissioner. It is occasionally visited by priests from Jamaica.

**Bailey, THOMAS**, controversialist, died c. 1657. He was son of Bishop Bailey of Bangor and was educated as an Anglican at Magdalen College, Cambridge, where he graduated B.A., in 1627, and M.A., in 1631. After ordination he was appointed Sub-Dean of Wells (1638). During the civil wars he retired to Oxford where he proceeded Doctor of Divinity. He was a staunch royalist and after the battle of Naseby was for a time in the king's retinue at Raglan Castle. Subsequently through the help of the Marquess of Worcester, who was a Catholic, he travelled abroad and thus became acquainted with Catholic life, which led to his conversion. On his return he published a work of strong royalist tendencies to prove the divine right of Episcopacy; this book gave offence to Cromwell's government and resulted in his arrest and imprisonment in Newgate. While a prisoner he wrote another book called "*Herba parietis*" (The Wall-flower), in allusion to his captive state. After his release he retired to Italy, where he obtained employment in the household of Cardinal Ottoboni at Ferrara. He died shortly before the Restoration, probably in the cardinal's employ, although Anthony à Wood repeats a rumour that he died at Bologna as a common soldier. Among the works published in his name is a life of Blessed John Fisher, which has given rise to some difficulty, for it was written by Dr. Richard Hall in 1559, nearly a century before. Bailey published it with additions which the martyr's latest biographer, Rev. T. Bridgett, describes as "nothing but verbiage and blunders". He adds that some of the additions "are palpably false and have brought discredit upon Hall". It was suggested by Dodd that Bailey's name was added without his knowledge by the bookseller, but if the preface signed T. B. be genuine he certainly claimed authorship, a fact which does not enhance his reputation. His authentic works are: "*Certamen Religiosum*" (London, 1649), an account of the conference concerning religion between Charles I and the Marquess of Worcester; answered by L'Estrange, Cartwright, and Heylyn; "*The Royal Charter granted unto Kings by God Himself*" (London, 1649, 1656, 1680); "*Herba parietis*" (London, 1650); "*The End to Controversie*" (Douai, 1654); "*Golden Apothegms of Charles I and Henry, Marquess of Worcester*" (London, 1660). Bailey also completed and published Bishop Lindsell's edition of Theophylact. The book mentioned in Walton's "*Life of Bishop Sanderson*" as "*Dr. Bailey's Challenge*" may be a separate work but more probably is merely a reference to one of the above.

EDWIN BURTON.

**Baillargeon, CHARLES-FRANÇOIS**, a French-Canadian bishop, b. 26 April, 1798, at Ile-aux-Grues, P. Q.; d. 13 October, 1870. He studied theology at the Seminary of Quebec, where he taught rhetoric. Ordained in 1822, he was successively chaplain at St. Roch, pastor of St. François, Isle of Orleans, of the joint parishes of L'Ange-Gardien and Chateau-Richer. While rector of Notre Dame de Québec, he displayed apostolic zeal and charity during three visitations of cholera (1832, 1834, 1849), and the horrors of typhus (1847), assisting many Irish orphans. He was made Bishop of Tloa and coadjutor to Archbishop Turgeon of Quebec, 23 February, 1851, being the first Canadian bishop since the conquest appointed without the intervention of the British Crown. He became administrator in 1855 and succeeded as Archbishop of Quebec, 26 August, 1867. He attended the Vatican Council. He published a French translation, with commentary, of the New Testament (2d ed., 1865), lauded by Pius IX, "*Recueil d'Ordonnances*" (1859), and over thirty important Pastoral Letters, besides many other official documents.

LIONEL LINDSAY.

**Baillet, ADRIEN**, French author, b. 1649 at Neuville en Hez, near Beauvais, France; d. at Paris, 1706. His parents were poor, but the Cordeliers of La Garde, struck by the boy's piety and alertness of mind, took him into their monastery and then had him admitted to the College of Beauvais, where, at the close of his studies, he became teacher of humanities. Ordained priest in 1676, he served for a time as curate of Lardieu and was then made canon of Beaumont, but neither pastoral nor canonical functions satisfied him. At the end of four years his love of learning took him to Paris, where he secured the place of librarian to the celebrated de Lamoignon. An insatiable reader and a rigid ascetic, he spent his life in the seclusion of study and austerity. In a comparatively short time he had made an analytical catalogue, in thirty-two folios, of Lamoignon's library. The great mass of erudition thus acquired soon passed into innumerable books. His writings may be divided into three groups: (1) Erudition, (2) History, (3) Religion. To the first group belong: "*Jugements des savants sur les principaux ouvrages des auteurs*" (1685); "*Des auteurs déguisés*" (1690); "*Des enfants célèbres*" (1688). With the exception of the last, which still attracts by its curiousness, these books are now almost forgotten, both because they are incomplete and because they have been more than replaced by the works of such writers as Brunet, Quérard, Barbier, etc. Baillet's criticisms were not accepted by all. Ménage, who thought himself ill-treated, wrote the "*Anti-Baillet*" to which Baillet replied by "*Des satires personnelles*" (1682). La Monnoie published a revised edition of all the foregoing books, to which he joined by way of introduction an "*Abrégé de la vie de M. Baillet*" (Paris, 1722; Amsterdam, 1725).

To the second group belong: "*Histoire de Hollande*" (1690); "*Vie de Descartes*" (1692); "*Vie de Godefroy Hermant*"; "*Vie de Richer*" (1693); "*Histoire des démêlés du Pape Boniface VIII avec Philippe le Bel*" (1718), etc. The author shows too much sympathy for the Jansenist Hermant and the Gallican Richer. His life of Descartes is replete with interesting but rather garbled information. Lelong

thought so well of the "History of the Conflict between Boniface VIII and Philippe le Bel" that he edited it (Paris, 1718).

To the third and by far the most important group belong: "Dévotion à la Vierge et le culte qui lui est dû" (Paris, 1694; Tournai, 1712). The avowed purpose of this book is to clear Mariology from indiscreet devotions, but Baillet clearly overreaches himself by bluntly denying the Immaculate Conception and the Assumption of Mary, and by attacking devotions sanctioned by the Church. The book was put on the "Index Expurgatorius" *donec corrigatur* in 1694 and 1701. The erudition displayed in "Les vies des saints, composées sur ce qui nous est resté de plus authentique et de plus assuré dans leur histoire" (Paris 1701 and 1794) is prodigious, yet the greater part of it (from January to August) was put on the Index in 1707 and 1711. The cause of that condemnation is the hypercritical spirit evinced throughout in the "Vie des Saints". While aiming at doing away with unauthenticated miracles, Baillet comes very near casting doubt on all miraculous manifestations. Benedict XIV (De festis, II, xvi, 8) calls him a man with an intemperate mind and an ever-ready disposition to impeach even the best attested facts. The Bollandist Stilling (Acta SS., V, 458, 488) says of him, apropos of Bl. Louis Allemand: "I deem it unnecessary to refute a man who, I find, stumbles at nearly every step". Other Bollandists reproach him for not keeping the rules he had so well laid down in his "Jugements", and find him frequently at fault, now by excess of criticism, now by excess of credulity. Eusebius is almost the only ancient historian who finds favour with Baillet. All the other writers of hagiology are held by him in suspicion and almost in contempt. That frame of mind could not yield good results. "Some French critics in sacred biography", says Alban Butler, in the introduction to his "Lives of the Saints", "have tintured their works with a false and pernicious leaven, and, under the name of criticism, established scepticism". That sentence applies in a measure to Baillet. His contemporaries were not mistaken as to the origin of that pernicious leaven. The Bishop of Gap, Berger de Malissoles, in prohibiting the work in his diocese, wrote: "That book on a great many points of dogma and discipline savours the sentiments not only of Jansenism but also of the so-called reformers".

LA MONNOIE, *Abrégé de la vie de M. Baillet* (Amsterdam, 1725); HURTER, *Nomenclator* (Innsbruck, 1892); MIGNÉ, *Diction. de biographie chrétienne* (Paris, 1851).

J. F. SOLLIER.

**Bailloquet, PIERRE**, missionary among the Indians of Canada, b. in 1612, at Saintes, France; d. in the Ottawa missions, 7 June, 1692. He entered the Society of Jesus at Bordeaux, 20 November, 1631, and after ordination was sent as a missionary to Canada. He arrived at Quebec in the summer of 1647, and for forty-five years laboured and suffered among the savage tribes that roamed the vast territory extending from Acadia in the east to the lands of the Illinois in the far west. The hardships and privations he endured are well nigh incredible. According to the "Relations" he frequently had "the earth for bed and mattress, and strips of bark for a palace, which was filled less with air than with smoke"; and owing to his zeal he was often in danger of being tomahawked or burned at the stake by the savages. When almost eighty years of age and stricken with grievous infirmity, he dragged himself across the snow for leagues to go to the huts of those who were unable to come to him. He died in his eightieth year, having been sixty-one years in the religious life.

DE GUILHERMY, *Mémoires de la c. de J., Assemblée de France*, I, 711; THWAITES, *Jesuit Relations*, LXXII, 70.

E. P. SPILLANE.

**Baily, THOMAS**, a Catholic clergyman, b. in Yorkshire, England; d. at Douai, France, 7 October, 1591. He was a student at Clare Hall, Cambridge, where he obtained the degree of Bachelor of Arts in 1546. Soon after he became a Fellow of that house, receiving the degree of Master of Arts in 1549. In 1554 he was appointed Proctor and in the following year he subscribed to the Roman Catholic Articles. About November, 1557, he was appointed Master of Clare Hall and was given the degree of Bachelor of Divinity in 1558. In the same year Queen Elizabeth ascended the throne and efforts were made by the Protestant party to gain recruits to its ranks, but Baily refused to conform to the new religion. As a consequence he was deprived of his Mastership. He next visited Louvain, where he remained until 30 January, 1576, during the interval receiving the degree of Doctor of Divinity. From Louvain he went to Douai at the invitation of Doctor Allen (afterwards Cardinal), during whose absence he usually filled the position of President of the English College both at Douai and Reims. He finally left Reims, 27 January, 1589, returning to Douai, where he remained until his death. He was associated with Cardinal Allen in the management of the College, the distribution of the labour being that Cardinal Allen had charge of the discipline, Dr. Baily the temporal affairs, and Dr. Bristow, another of Cardinal Allen's co-labourers, the studies. He was buried in the chapel of St. Nicholas in the parish church of St. James, Douai. COOPER in *Dict. Nat. Biog.*, II, 432; GILLOW, *Bibl. Dict. Eng. Cath.*, I, 105. THOMAS GAFFNEY TAAFFE.

**Bainbridge, CHRISTOPHER**, Archbishop of York, and Cardinal, b. at Hilton, near Appleby, in Westmoreland, probably 1464; d. at Rome, 14 July, 1514. He proceeded to Oxford, entering Queen's College, of which he became provost in or before 1495, being about that time admitted LL.D.; he became later a liberal benefactor to his college. He held a number of benefices, including the treasurership of the Diocese of London, on Henry VII's presentation, and Master of the Rolls, a post he held till his elevation to the See of Durham, which took place in 1507, nominated thereto by the king, who restored the temporalities of the see to him. He was consecrated on 12 December. This see he held but a short while, being translated to York the next year by a papal Bull dated 20 September, 1508. In 1509 he was sent by Henry VIII as his ambassador to Rome. Julius II created him a cardinal on 10 March, 1511, giving him the title of St. Praxedis, in reward for negotiating Henry's adherence to the pope as against France, for which country he felt a strong antipathy all his life. As cardinal he was commissioned by Julius to lead a military expedition against Ferrara, which he successfully besieged. He endeavoured to secure from Pope Leo X the bestowal on Henry of the title of "Most Christian King" which Louis of France had forfeited by waging war against the pope; but the peace of 1514 made this project abortive. Bainbridge was poisoned by an Italian priest named Rinaldo de Modena, who acted as his steward or bursar, in revenge for a blow which the cardinal, a man of violent temper, had given him. It was hinted that the crime was perpetrated at the instigation of Sylvester de Giglis, Bishop of Worcester, the resident English ambassador at Rome, but de Giglis exonerated himself. Bainbridge was buried in the English Hospice, now known as the English College, Rome. He was a stout upholder of Henry's interests at the Curia.

HENRY N. BIRT.

**Baines, PETER AUGUSTINE**, titular Bishop of Siga, one of the most striking figures among English Cath-

olies at the period of Emancipation, was born at Kirkby, in Lancashire, 25 January, 1787; d. 6 July, 1843. For his early education he was sent to the English monastery at Lamspring, in Hanover, where he arrived in 1798. Four years later the monastery was suppressed by the Prussian Government, and the monks and their pupils returned to England. Some of them, Baines among the number, took refuge at the recently founded monastery at Ampleforth, in Yorkshire. It was not long before his talents and force of character brought him into prominence in the small community there. He joined the Benedictine Order, and held in succession every post of authority in the monastery, the priorship alone excepted.

In 1817 Baines left Ampleforth and was appointed to Bath, one of the most important Benedictine missions in the country. There he became a well-known figure, his sermons attracting great attention not only among Catholics, but also among Protestants. His printed letters in answer to Archdeacon Moysey created quite a stir, being commonly known as "Baines's Defence". His reputation continuing to increase, Bishop Collingridge, O. S. F., Vicar Apostolic of the Western District, chose him for his coadjutor. He received episcopal consecration as titular Bishop of Siga at the hands of Archbishop Murray, at Dublin, 1 May, 1823.

Bishop Baines soon began to formulate schemes for the future of the district, on that large scale so congenial to his mind. Realizing that, alone among the four, it was without a regular seminary for the education of its clergy, he set himself to work to supply the want. The Western District differed from the other three in that the bishop had always been chosen from among the regular clergy—Benedictines or Franciscans—and a large proportion of the missions were in their hands. Dr. Baines thought that he saw the solution of his difficulty in utilizing the new school which had been recently opened at Downside, near Bath. The fact that it was under Benedictine management appeared to him no disadvantage, and he has assured us that he meant his whole scheme to benefit his order. But he considered that a bishop should be supreme in his own seminary, and boldly proposed that the whole community of monks at Downside should be transferred from the Anglo-Benedictine Congregation, and placed under the Bishop of the Western District. The idea was not favourably received at Downside, so the bishop put forward the alternative proposition that they should exchange their property for that at Ampleforth, hoping that the members of his own monastery might take more kindly to his scheme. This proposal, however, was also refused, and there matters rested for some years.

In 1826 Bishop Baines's health gave way, and he was ordered a long tour on the Continent. He spent the greater part of the time in Rome, and Wiseman tells us (*Last Four Popes*, p. 323) that Leo XII, wishing to create a Benedictine Cardinal, fixed upon Bishop Baines for that dignity, and was only prevented by death from carrying out his intention. Bishop Collingridge died 3 March, 1829, the same year in which Catholic Emancipation was passed, and Bishop Baines returned to England, in restored health, to succeed as vicar Apostolic. He at once revived his scheme for the seminary at Downside, and, having failed to secure the consent of the monks, he put forward the contention that the monasteries at Downside and Ampleforth had never been canonically erected, for, owing to the unsettled condition of the English mission, the formality of obtaining the written consent of the ordinary had been overlooked. He drew the drastic conclusion that all the monastic vows had been invalid, and that the property belonged to the bishops. The case was argued out in Rome, but it was considered that, even if the strict law was on

Bishop Baines's side, equity demanded that the rights of the Benedictines should be maintained, and a *sanatio* was issued by papal authority, making good any possible defects in the past. Leave was given, however, for four of the Ampleforth monks, including the prior, to be secularized. They left, together with thirty of the boys, to join Bishop Baines, who had himself been secularized, in founding a new college. The site chosen was Prior Park, a large mansion outside Bath, which Bishop Baines bought, and he set to work to build two colleges at either end of the "mansion house", which he dedicated to St. Peter and St. Paul respectively, the former being intended as a lay college, the latter as a seminary. He seems to have had visions of a Catholic University as a sequel to Emancipation, and Prior Park was intended to be its centre.

The new college thus opened under most favourable auspices; but it never became really prosperous. The buildings were on too vast a scale for the number of students, and the older clergy viewed askance an undertaking which they feared would absorb all the resources of the diocese. To add to the difficulties, in the year 1836 a destructive fire almost completely consumed the interior of the mansion, involving fresh outlay in making good the damage. In 1840 the number of vicariates in England was raised from four to eight, Wales being separated off into a district of its own. Bishop Baines continued over the Western District for three years more, when his sudden death took place. On the 4th of July, 1843, he distributed the prizes at Prior Park; the following day he preached at the opening of the new church of St. Mary on the Quay, Bristol, returning to Prior Park in the evening, apparently in his usual health; but the following morning he was found dead in his bed. His funeral at Prior Park was conducted with the solemnity due to his position and his personality; but when, some years later, the college was sold, his body was removed to Downside, where it rests to-day.

Many of Bishop Baines's sermons, pastorals, etc., were published, and some ran to several editions. An oil painting of him, formerly at Prior Park, is now at the Bishop's House (St. Ambrose), Clifton. There is an engraving in the Catholic Directory for 1844. GILLOW, *Bibl. Dict. Eng. BERNARD WARD.

**Baines, RALPH**, Bishop of Lichfield and Coventry, England, b. at Knowsthorpe, Yorks, date of birth uncertain; d. 18 November, 1559. Educated at St. John's College, Cambridge, he was ordained priest at Ely, 1519. Rector of Hardwicke in Cambridgeshire until 1544 when he went to Paris where he became Professor of Hebrew. In 1553 he returned to England and was consecrated Bishop of Lichfield and Coventry, 18 November, 1554. He vigorously opposed the Reformers and was one of the eight defenders of Catholic doctrine at the Westminster Conference 1558-59. On the accession of Elizabeth he was deprived of his bishopric (21 June, 1559) and committed to the care of Grindal, Protestant Bishop of London, thus becoming one of the eleven imprisoned bishops. The recent researches of the Rev. G. Phillips (op. cit., inf.), who has exhaustively treated the question of the imprisonment of these bishops, prove that, though nominally a guest, he was in fact a strict prisoner. His captivity lasted until 18 November, 1559, when, as Pitts writes, he "died an illustrious Confessor of the Lord". He wrote "*Prima Rudimenta in linguam Hebraicam*" (Paris, 1550); "*Compendium Michol, hoc est absolutissimæ grammaticæ Davidis Chimihi*" (Paris, 1554); "*In Proverbia Salomonis*" (Paris, 1555).

EDWIN BURTON.

**Baini, ABBATE GIUSEPPE**, b. in Rome, 21 October, 1775; d. there 21 May, 1844. Baini made his first musical studies under the direction of his uncle Lorenzo Baini, a distinguished disciple of the Roman School, who introduced him into the spirit and traditions of the Palestrina style. Later Baini became the pupil and friend of Jannacconi, choirmaster of the Vatican Basilica, through whom he was admitted into the choir of the Sistine Chapel as a bass singer. In 1818 Baini was unanimously elected director of the famous choir, a position which he held till his death.

While Baini has left a considerable number of compositions (notably a ten-voiced "Miserere" which is still performed, alternately with those of Allegri and Bai, during Holy Week, by the Sistine Chapel choir), all of which are written in the style of the great period of classic polyphony, his great life-work was his "Memorie storico-critiche della vita e delle opere di Giovanni Pierluigi da Palestrina" (1828). Through the translation into German of this work by Francis de Sales Kandler (Vienna, 1834), the life and labours of Palestrina's school and period became more accessible and were a powerful influence in the revival and restoration of liturgical music which was about to take its beginning. The publication of Palestrina's complete works was one of the results of Baini's biography of the master. Baini lived so completely in the great musical past that he had but scant sympathy with, or understanding for, modern developments of the art. Besides the biography of Palestrina he has left a study on the theory of rhythm of the ancients under the title: "Saggio sopra l'identità di ritmi musicali e poetici"; an unfinished history of the Sistine Chapel choir; and other essays of a critical or theoretic character.

JOSEPH OTTEN.

**Baithen, SAINT**, of Iona, an Irish monk, specially selected by St. Columba as one of the band of missionaries who set sail for Britain in 563. Born in 536, the son of Brenaron, he was an ardent disciple of St. Columba, and was appointed Abbot of Tiree Island, a monastery founded by St. Comgall of Bangor. St. Adamnan, in recording the death of St. Columba, tells us that the dying words of the Apostle of Iona, as he was transcribing the fifty-third Psalm, were: "I must stop here, let Baithen write what follows". Baithen had been looked on as the most likely successor to St. Columba, and so it happened that on the death of that great apostle, in 596, the monks unanimously confirmed the choice of their founder. St. Baithen was in high esteem as a wise counsellor, and his advice was sought by many Irish saints, including St. Fintan Munnu of Taghmon.

St. Adamnan (Eunan), the biographer of St. Columba, tells many interesting incidents in the life of St. Baithen, but the mere fact of being the immediate successor of St. Columba, by the express wish of that apostle, is almost sufficient to attest his worth. The "Martyrology of Donegal" records the two following anecdotes. When St. Baithen partook of food, before each morsel he invariably recited "Deus in adjutorium meum intende". Also, "when he worked in the fields, gathering in the corn along with the monks, he used to hold up one hand towards Heaven, beseeching God, while with the other hand he gathered the corn". St. Baithen of Iona is generally known as Baithen Mor,

to distinguish him from eight other saints of the same name—the affix *mor* meaning "the Great". He wrote a life of his master, and some Irish poems, which are now lost, but which were seen by St. Adamnan. He only ruled Iona three years, as his death took place in the year 600, though the "Annals of Ulster" give the date as 598. Perhaps the true year may be 599. His feast is celebrated on October 6th. Some writers assert that St. Baithen of Iona is the patron of Ennisboynne, County Wicklow, but this is owing to a confusion with St. Baoithin, or Baithin mac Findche, whose feast is commemorated on 22 May. Another St. Baoithin, son of Cuana, whose feast is on 19 February, is patron of Tibohin, in Elphin.

W. H. GRATTAN FLOOD.

**Baius** (or DE BAY), MICHEL, theologian and author of a system known as Baianism, was b. at Melun in Hainaut, 1513, and d. at Louvain 16 September, 1559. Though poor, he succeeded in procuring, in the various colleges of the Louvain University, a complete course of studies, including humanities, philosophy, and theology. His first appointment, immediately after his ordination, was as principal of the Standonk College, 1541. Three years later he was given the chair of philosophy which he retained till 1550. In that year he took the degree of Doctor of Theology, was made President of the Collège Adrien and also substitute to the professor of Holy Scripture, then absent at the Council of Trent, the full professorship following two years later at the titular's death. Baius had very early formed a close friendship with John Hessels. While the three leaders of the university: Tapper, Chancellor; Ravestein, Professor of Theology; and Hasselius, Professor of Holy Scripture, were at the Council of Trent, Baius and Hessels profited by their absence to give vent to long cherished ideas and introduce new methods and new doctrines. On his return from Trent, in 1552, Chancellor Tapper found that evil influences had been at work and asked Cardinal de Granvelle, Archbishop of Mechlin, to interfere. Granvelle succeeded in quieting the innovators for awhile, but Tapper's death, in 1559, became the signal of fresh disturbances. At the request of the Franciscans, the Sorbonne of Paris had censured eighteen propositions embodying the main innovations of Baius and Hessels. Baius answered the censure in a memoir now lost, and the controversy only increased in acridity. Pope Pius IV, through Cardinal Granvelle, imposed silence upon both Baius and the Franciscans, without, however, rendering any doctrinal decision. When the sessions of the Council of Trent were resumed, in 1561, Baius and Hessels were selected to represent the university at Trent. The papal legate, Commendone, objected to the choice of the university, but Cardinal de Granvelle thought that the two innovators' presence at Trent would be good both for them and for the university. In 1563 he sent them to Trent, not, however, as delegates of the university, but as theologians of the King of Spain. Just before leaving for Trent Baius had published his first tracts. Unfortunately, the contents of those tracts were not within the programme of the last three sessions of the Council of Trent, and no public discussion of the disputed points took place. It is known, however, that Baius' and Hessels' views were distasteful to the Fathers, and that the Catholic king's prestige alone saved them from formal condemnation.

Baius returned to Louvain in 1564 and the same year published new tracts which, with the addition of another series, were collected in "*Opuscula omnia*", in 1566, the year of Hessels' death. It is likely that Hessels collaborated with Baius in these "*Opuscula*". Their defence rested now on Baius alone, and it was no small task. Ravestein, who had succeeded Tappier as chancellor, thought it was high time to call a halt, and informed Rome, requesting decisive action; 1 October, 1567, Pope Pius V signed the Bull, "*Ex omnibus afflictionibus*", in which were to be found a number of condemned propositions, but without mention of Baius' name. According to the usage of the Roman Chancery, the papal document was without punctuation, divisions, or numbers. Again, as had been done before in several instances, the objectionable propositions were not censured severally, but to the whole series were applied various "notes", from "heretical" down to "offensive". Moreover, not only was Baius' name not mentioned, but for obvious reasons of prudence in those days, so near the Reformation, the text itself was not to be made public. These facts gave occasion to many quibbles on the part of the Baianists: What was the exact number of propositions?—76, 79, or 80?—Were they, or were they not, Baius' propositions?—Why had not a copy of the Bull been given to those on whose honour it was supposed to reflect? In the famous sentence, "*quas quidem sententias stricto coram nobis examine ponderatas quamquam nonnullæ aliquo pacto sustineri possent in rigore et proprio verborum sensu ab assertoribus intento hæreticas, erroneas . . . damnamus*", was the comma *Pianum* to be placed after *intento* or after *possent*, the meaning being reversed according as the comma came after the one or the other word? Nevertheless, Baius did not stoop to these evasions at first, but when the papal Bull (1567) was brought to the university and read to the faculty, he subscribed with the other professors. Meanwhile, the text of the Bull having been divulged by some indiscreet person, Baius began to find fault with it and wrote to, or for, the pope two lengthy apologies, in vindication, he said, not so much of himself as of St. Augustine. The tone of the apologies was respectful in appearance rather than in reality. By a Brief, dated 1569, Pius V answered that the case had been maturely examined and finally adjudged, and demanded submission. After much tergiversation, wherein he stooped to the ridiculous evasion of the comma *Pianum* and the practical stultification of a papal act, Baius abjured to Morillon, de Granvelle's vicar-general, all the errors condemned in the Bull, but was not then and there required to sign his recantation. The absence of that formality contributed later to revive the discussions. In 1570, at Ravestein's death, Baius became dean of the faculty. Then rumors went abroad that the new dean was by no means in accord with orthodox teaching. Followers and adversaries suggested a clear pronouncement. It came under the title of the "*Explicatio articulorum*", in which Baius averred that, of the many condemned propositions, some were false and justly censured, some only ill expressed, while still others, if at variance with the terminology of the Scholastics, were yet the genuine sayings of the Fathers; at any rate, with more than forty of the seventy-nine articles he claimed to have nothing whatever to do. Baius, after two recantations, was simply reverting to his original position. The Bull was then solemnly published at Louvain, and subscribed by the whole faculty. Baius accepted it again. His apparent magnanimity even won him sympathy and preferments; he was in quick succession made Chancellor of Louvain, Dean of St. Peter's Collegiate Church, and "conservator" of the university's privileges. Thus was peace restored, but only for a while.

Certain inconsiderate views of the master regarding the authority of the Holy See, and even of the Council of Trent, and, on the part of his disciples, the ill disguised hope that Gregory XIII might declare void all that had been done by his predecessor, bade fair to reopen the whole question. Pope Gregory XIII would not permit this. The Bull, "*Provisionis nostræ*" (1579), confirmed the preceding papal acts and the Jesuit Toletus was commissioned to receive and bring to the pope the final abjuration of Baius. We have it under the name of "*Confessio Michaelis Baii*". It reads, in part: "I am convinced that the condemnation of all those propositions is just and lawful. I confess that very many (*plurimas*) of these propositions are in my books, and in the sense in which they are condemned. I renounce them all and resolve never more to teach or defend any of them." Despite this recantation, Baius' errors had sunk too deep into his mind not to occasionally crop up in rash tenets. Up to the last few years of his life sad contests were raised by, or around, him, and nothing short of the official admission by the university of a compact body of doctrine could quell those contests. Baius died in the Church, to which his studiousness, attainments, and piety did honour, but whose doctrinal unity his rashness came near to infringing. The evil seed he had sown bore fruits of bitterness later on in the errors of Jansenism.

His SYSTEM.—Baius' system has been conveniently called Baianism, as a more objective name for it would be difficult to find. It is contained in a series of *opuscula*, or pamphlets: "*On Free Will*"; "*Justice and Justification*"; "*Sacrifice*"; "*Meritorious Works*"; "*Man's Original Integrity and the Merits of the Wicked*"; "*The Sacraments*"; "*The Form of Baptism*"; "*Original Sin*"; "*Charity*"; "*Indulgences*"; "*Prayers for the Dead*". Baius himself collected all those pamphlets in "*M. Baii opuscula theologica*" (Louvain, 1566). The Maurist Gerberon gave a more complete edition: "*M. Baii opera cum bullis pontificum et aliis ad ipsius causam spectantibus*" (Cologne, 1696). This edition was put on the Index in 1697 on account of its second part, or "*Baiana*", in which the editor gives useful information about, but shows too much sympathy for, Baius. The gist of Baianism is also found in the 79 propositions censured by Pius V (Denzinger, *Enchiridion*, 881-959). All cavil apart, the first 60 are easily identified in Baius' printed works, and the remaining 19—"tales quæ vulgo circumferuntur", says an old manuscript copy of the Bull "*Ex omnibus*"—represent the oral teaching of the Baianist wing. In the preface to "*Man's Original Integrity*" Baius says: "What was in the beginning the integrity natural to man? Without that question one can understand neither the first corruption of nature (by original sin) nor its reparation by the grace of Christ." Those words give us the sequence of Baianism: (1) the state of innocent nature; (2) the state of fallen nature; (3) the state of redeemed nature.

(1) *State of Innocent Nature*.—From the fact, so strongly asserted by the Fathers, of the actual conjunction of nature and grace in the first man, Baius infers their necessary connexion or even practical identity. In his view, primitive innocence was not supernatural, at least in the ordinary acceptation of that word, but due to, and demanded by, the normal condition of humanity (which cannot, without it, remain in the state of salvation). And that primitive state, natural to man, included among its necessary requirements destination to heaven, immunity from ignorance, suffering, and death, and the inherent power of meriting. None of these was, nor could rightly be called, a gratuitous gift of grace.

(2) *State of Fallen Nature*.—The downfall of man

is not, and cannot be, according to Baius, the mere forfeiting of gratuitous or supernatural gifts, but some positive evil reaching deep into our very nature. That evil is original sin. By original sin Baius understands, instead of a simple privation of grace, habitual concupiscence itself, transmitted according to the laws of heredity and developed according to the laws of physical and psychical growth. It is a sin or moral evil by itself, even in irresponsible children, and that outside of all relation to a will, be it original or personal. What, then, becomes of human liberty as a source of moral responsibility? Baius does not think it necessary that, in order to be moral agents, we should be free from internal determinism, but only from external compulsion. From so tainted a source, Redemption apart, only tainted actions can flow. They may sometimes appear virtuous, but it is only an appearance (*vitia virtutes imitantia*). In truth all human actions, not purified by Redemption, are vices pure and simple and damning vices at that (*vitia sunt et damnant*).

(3) *State of Redeemed Nature*.—The gifts of primitive innocence, forfeited by original sin, are restored by Jesus Christ. Then and then only do they become graces, not, indeed, on account of their supernatural character, but because of fallen man's positive unworthiness. Aided by grace, the redeemed can perform virtuous actions and acquire merits for heaven. Does that entail a higher status, an inner renovation or sanctifying grace?—Baius does not consider it necessary. Moral action, whether called justice, or charity, or obedience to the law, is the sole instrument of justification and virtue and merit. The rôle of grace consists exclusively in keeping concupiscence under control, and in thus enabling us to perform moral actions and fulfil the law. True, Baius speaks of the remission of sin as necessary for justification, but this is only a *factio iuris*; in fact, a catechumen before baptism, or a penitent before absolution may, by simply keeping the precepts, have more charity than certain so-called just men. If the catechumen and penitent are not styled just, it is only in deference to Holy Scripture, which requires for complete justice both newness of life (i. e. moral action) and pardon of sin (i. e. of the *reatus*, or liability to punishment). To grant that kind of pardon is the only object and efficacy of the sacraments of the dead, baptism and penance. With regard to the sacraments of the living, the Eucharist—the only one on which Baius expressed his views—has no other sacrificial value than that of being a good moral action drawing us close to God.

A mere glance at the above sketch cannot fail to reveal a strange mixture of Pelagianism, Calvinism, and even Socinianism. Baius is a Pelagian in his concept of the primitive state of man. He is a Calvinist in his presentation of the downfall. He is more than a Lutheran and little short of the Socinian in his theory of Redemption. Critics know that all these errors were in a manner harmonized in Baius' mind, but they are not agreed as to what may have been the genetic principle of that theological formation. Some find it in the 38th proposition: "Omnis amor creaturæ rationalis aut vitiosa est cupiditas, quæ mundus diligitur, quæ a Joanne prohibetur, aut laudabilis illa charitas, quæ per spiritum sanctum in corde diffusâ Deus amatur" (The rational creature's love is either vicious desire, with its attachment to the world, which St. John forbids, or that praiseworthy charity which is poured forth in our hearts by the Holy Spirit, and through which God is loved). Others see it in a wrong analysis of man, the higher faculties, appertaining to the moral and religious life, being violently torn apart from the lower powers, and so magnified as to become

identical with grace and the indwelling of the Holy Ghost. Others, again, think it is optimism in appraising man's native condition, or pessimism in gauging his condition after sin, the result being the same with regard to the value of Redemption. Taking the question from an historical standpoint, we find that Baius was from the beginning a humanist with a perfect enthusiasm for Christian antiquity in general, St. Paul and St. Augustine in particular, and a dislike almost amounting to abhorrence for the thoughts and methods of medieval schoolmen. The self-assumed task of interpreting the Apostle of the Gentiles and the great African Doctor apart from the traditional current of Scholastic thought was perhaps an impossibility in itself, but certainly one for Baius' limited erudition and paradoxical mind. To this all-absorbing mania, much more than to a lack of sincere loyalty to the Church, must we trace Baius' blindness to the already defined dogmas and his half-revolts against the living *magisterium*. A partial explanation of, if not excuse for, that monomania is, however, found in the fact that at the very outset of his theological career Baius came under the influence of men who, like the Dominican Peter de Soto, believed the Catholic reaction against the Reformers had gone somewhat too far, and suggested that more stress be laid on Scripture and Patrology and less on Thomism. That, in his intention at least, Baius only wanted to take the most advantageous position in order the better to defend the Faith against heretics, we know from a letter he wrote (1569) to Cardinal Simonetta: "After reading Peter the Lombard and some other Scholastic Doctor, I endeavoured to bring theology back to Holy Scripture and the writings of the Fathers, those at least who still enjoy some credit with the heretics: Cyprian, Ambrose, Jerome, Augustine, Leo, Prosper, Gregory, and the like." Such are the various causes which may in a measure account for the position taken by Baius. The chronology of his writings teaches us little more. It fails to give us a true insight into the logical development of his thought. It may be, after all, that each of the above-mentioned genetic principles held priority in his mind at different times and in different needs.

DOCTRINE OF THE CHURCH.—The Catholic teaching, already outlined against the Pelagians by various councils and popes from the fifth century, is fully presented against the Reformers by the Council of Trent, especially Session V, Decree on Original Sin, and Session VI, Decree on Justification. In those two sessions, both anterior to Baius' writings, we find three statements which are obviously irreconcilable with Baius' three main positions described above: (1) Man's original justice is represented as a supernatural gift; (2) Original Sin is described not as a deep deterioration of our nature, but as the forfeiture of purely gratuitous privileges; (3) Justification is depicted as an interior renovation of the soul by inherent grace. The condemnation by Pius V of the 79 Baianist tenets is an act of the supreme *magisterium* of the Church, an *ex cathedrâ* pronouncement. To say, with the Baianists, that the papal act condemns not the real and concrete tenets of the Louvain professor, but only certain hypothetical or imaginary propositions; to pretend that the censure is aimed not at the underlying teaching, but only at the vehemence or harshness of the outward expressions, is to practically stultify the pontifical document. From the tenor of the Bull, "Ex Omnibus", we know that to each of the 79 propositions one or several or all of the following censures will apply: *heretica, erronea, suspecta, temeraria, scandalosa, in pias aures offendens*. For a more precise determination of the Catholic doctrine, we have to consult, besides the Council of Trent, the *consensus Catholicorum theologorum*. That consensus was voiced with no un-

certainly by such universities as Paris, Salamanca, Alcalá, and Louvain itself, and by such theologians as Cunerus Petri (d. 1580—"De Gratiâ", Cologne, 1583); Suarez (d. 1617—"De gratiâ Dei" in Op. Omn., VII, Paris, 1857); Bellarmine (d. 1623—"De gratiâ et libero arbitrio", in *Controversiæ*, IV, Milan, 1621); Ripalda (d. 1648—"Adversus Baium et Baianos", Paris, 1872); Stayaert (d. 1701—"In propositiones damnatas assertiones", Louvain, 1753); Tournely (d. 1729—"De Gratiâ Christi", Paris, 1726); Casini (d. 1755—"Quid est homo?" ed. Scheeben, Mainz, 1862). It should not, however, be omitted here that, even apart from Jansenism, which is a direct offshoot of Baianism, some traces of Baius' confused ideas about the natural and the supernatural are to be found here and there in the history of theology. The Augustinian School, represented by such able men as Noris, Bellelli, and Berti, adopted, though with qualifications, the idea of man's natural aspiration to the possession of God and beatific vision in Heaven. The standard work of that school, "*Vindiciæ Augustinianæ*", was even once denounced to the Holy See, but no censure ensued. More recently Stattler, Hermes, Günther, Hirscher, and Kuhn evolved a notion of the supernatural which is akin to that of Baius. While admitting relatively supernatural gifts, they denied that the partaking of Divine nature and the adoption to eternal life differ essentially from our natural moral life. That theory was successfully opposed by Kleutgen and seems now to have died out. The new French theory of "immanence", according to which man postulates the supernatural, may also have some kinship with Baianism, but it can only be mentioned here as it is yet the centre of rather fervid discussions. Matulewicz, "*Doctrina Russorum de Statu iustitiæ originalis*" (Cracow, 1903), says that modern Russian theology embodies in great measure the condemned views of Baius.

Besides works mentioned in article, DUCHESNE, *Histoire du Baianisme* (Douai, 1731); DE LA CHAMBRE, *Traité historique et dogmatique sur la doctrine de Baius* (s. l., 1739); LIGUORI, *Trionfo della chiesa* (Naples, 1772); LINSSENMAN, *Michel Baius* (Tübingen, 1867); SCHEEBEN in *Kirchenlex.*, s. v., and in *Der Katholik* (Mainz, 1868); SCHWANE-DEGERT, *Histoire des dogmes* (Paris, 1904); VI, LE BACHELET in *Dict. de théol. cath.*, s. v.; WILHELM and SCANNELL, *Manual of Catholic Theology* (New York, 1906); KROLL, *The Causes of the Jansenist Heresy in Am. Cath. Quart.* (1885), 577.

J. F. SOLLIER.

**Baker, CHARLES, VENERABLE** (*recté*, according to his own entry in the English College Diary, DAVID HENRY LEWIS), an English Jesuit martyr, b. in Monmouthshire in 1616; d. at Usk, 27 August, 1679. His father, Morgan Lewis, was a lax Catholic, afterwards converted; his mother, Margaret Pritchard, was a very devout Catholic. David was brought up as a Protestant, and educated at the Royal Grammar School at Abergavenny, of which his father was the head master. In his sixteenth year, he spent three months in Paris as companion to a son of Earl Rivers, and there was received into the Church by a Father Talbot, S. J. On returning to England, he remained with his parents till their death and then, having a desire for the priesthood, went to Rome, where he was admitted as an *alumnus* to the English College, 3 November, 1638. He was ordained priest in 1642, and entered the novitiate of the Society at Sant' Andrea, 16 April, 1644. In 1647 he was sent to the English mission, but was quickly recalled and made Spiritual Father at the Roman College. In 1648 he returned to England finally, and was assigned to the South Wales District, where he laboured zealously for twenty-eight years. It is told of him that to avoid the persecutors, he used to take long and dangerous journeys at night that he might be able to visit the faithful under cover of darkness, and that his devotedness gained for him the title of Father of the Poor.

In the summer of 1678, Titus Oates came forward with his pretended revelations, and Parliament in a frenzy of bigotry offered fresh rewards for the discovery and arrest of priests and Jesuits. Father David was one of the victims. A bigoted Calvinist magistrate named Arnold, who had hitherto professed friendship for him, caused him to be arrested at Llantarnam in Monmouthshire, 17 November, 1678. He was carried in a sort of triumphal procession to Abergavenny, where, in allusion to one article of Oates's fabrications, he was shown to the people as "the pretended Bishop of Llandaff". He was then committed for trial, and meanwhile imprisoned, first at Monmouth and then at Usk. The trial came off at Monmouth 28 March, 1679. It was impossible to connect Father David with the pretended Popish Plot, so he was charged under the Statute of 27 Elizabeth, which made it high treason to take orders abroad in the Church of Rome and afterwards to return to England and say Mass. The trial was not too fairly conducted, and the witnesses were of a worthless class. Still the breach of the law was undeniable, and he was condemned to undergo the barbarous penalties which the law prescribed. For the moment, indeed, he was reprieved, and was taken up to London to be confronted with Oates and his associates. It was hoped that he might be induced to save his life either by apostasy or by inculcating some others in the Plot. But this hope proving vain, he was sent back to Monmouthshire, and his sentence was carried out at Usk. The cause of his beatification was introduced, under the name of "David Lewis *alias* Charles Baker" by the Decree of 4 December, 1886.

SYDNEY F. SMITH.

**Baker, DAVID AUGUSTINE**, a well-known Benedictine mystic and an ascetic writer, b. at Abergavenny, England, 9 December, 1575; d. of the plague in London, 9 August, 1641. His father was William Baker, steward to Lord Abergavenny, his mother, a daughter of Lewis ap John (*alias* Wallis), Vicar of Abergavenny. He was educated at Christ's Hospital and at Broadgate's Hall, now Pembroke College Oxford, afterwards becoming a member of Cliford's Inn, and later of the Middle Temple. At Oxford he lost his faith in the existence of God, but after some years, being in extreme peril of death, he escaped by what

FATHER DAVID AUGUSTINE BAKER, O.S.B.

appeared to him a miracle. Following up the light thus given him, he was led to the threshold of the Catholic Church, and was received into its fold. In 1605 he joined the Benedictine Order at Padua, but ill-health obliged him to postpone his religious profession, and he returned home to find his father on the point of death. Having reconciled him to the Church and assisted him in his last moments, Father Baker hastened to settle his own worldly affairs and to return to the cloister. He was professed by

the Italian Fathers in England as a member of the Cassinese Congregation, but subsequently aggregated to the English Congregation. At the desire of his superiors he now devoted his time and the ample means which he had inherited, to investigating and refuting the recently started error that the ancient Benedictine congregation in England was dependent on that of Cluny, founded in 910. He was immensely helped in his studies and researches for this purpose by the Cottonian Library which contained so many of the spoils of the old Benedictine monasteries in England, and which its generous founder placed entirely at his disposal. In collaboration with Father Jones and Father Clement Reyner he embodied the fruit of these researches in the volume entitled "Apostolatus Benedictinorum in Angliâ". At Sir Robert Cotton's Father Baker came in contact with the antiquary, William Camden, and with other learned men of his day. In 1624 he was sent to the newly established convent of Benedictine nuns at Cambrai, not as chaplain, but to aid in forming the spiritual character of the religious. Here he remained for about nine years, during which time he wrote many of his ascetical treatises, an abstract of which is contained in the valuable work "Sancta Sophia" compiled by Father Serenus Cressy. In 1633 he removed to Douai, where he wrote his long treatise on the English mission, but he was nearly worn out with his austerities before the order came for him to proceed to the battle-field. During his short sojourn in London, Father Baker was forced frequently to change his abode in order to avoid the pursuivants who were on his track. It was not, however, as a martyr that he was to end his days, but as a victim of the plague to which he succumbed in the sixty-sixth year of his age. Of upwards of thirty treatises chiefly on spiritual matters written by Father Baker, many are to be found in manuscript at Downside, Ampleforth, Stanbrook, and other Benedictine monasteries in England. An adequate biography of this master of the ascetic life is still a desideratum.

J. M. STONE.

**Baker, FRANCIS ASBURY**, priest of the Congregation of St. Paul the Apostle, b. Baltimore, Md., U. S. A., 30 March, 1820; d. 4 April, 1865. Father Baker was a son of Dr. Samuel Baker, a physician of note in Baltimore. He was graduated from Princeton College in 1839. His parents, whom he lost early in life, had been Methodists, but their surviving children joined the Episcopal Church. He took orders in that communion, and was ordained a presbyter in September, 1846. His career promised to be not only successful but brilliant. Possessed of many mental gifts, he had, moreover, refinement, wealth, and an engaging personality; he was deeply pious, thoroughly consecrated to his chosen work. He was assigned at first as an assistant at St. Paul's Episcopal Church, Baltimore, and six years later was named rector of St. Luke's Church in the same city. He took rank at once as an eloquent preacher.

The Oxford Movement coincided with the years of his preparation and early ministry, and its influence in the United States resulted in the conversion of many distinguished men. It was not possible that an intelligent and sincere man like Baker could remain unmoved amid the awakening and the return to Catholic principles which the study of primitive and patristic history and theology caused. The severance of intimate ties cost him much, but he obeyed the call and in April, 1853, made his profes-

sion of faith. Attracted to the religious state, he entered the Redemptorist Order, was ordained priest in the Cathedral of Baltimore, 21 September, 1856, and began forthwith a laborious but most fruitful career as a missionary. The Redemptorists had inaugurated in 1851 the work of giving missions to the English-speaking Catholics of the United States, and the flood of immigration, then at its height, made the work exhausting and continuous. The missionary band included Fathers Hecker, Walworth, Hewitt, and Deshon, all converts and all Americans, an unusually strong and varied combination, and to them Father Baker proved a welcome acquisition. He brought to his work the zeal of an apostle, a matured and persuasive eloquence, and the attraction of a character at once magnetic and saintly. Nor are these the words of mere eulogy. The recollections of the generation which listened to him, the judgment of competent critics, the numerous conversions, the abiding impressions he effected, the evidences which his printed sermons display of oratorical gifts—all entitle Father Baker to a high place among Catholic preachers.

In his sermons we find a blending of argumentation with appeal, a diction at once forceful and finished, and an apt and abundant use of Holy Scripture, which, combining with his earnest and dignified delivery, gave to his message a powerful effect. Leaving the Redemptorists with Fathers Hecker, Walworth, Hewitt, and Deshon, for the purpose of organizing a special missionary community for English parishes, he shared with them the labour of founding the Paulist Institute. It was he who gave the impulse and established the tradition of rubrical exactitude and ceremonial splendour which have continued to be a characteristic of that community. He died of typhoid pneumonia contracted in ministering to the sick.

MICHAEL PAUL SMITH.

**Baker City, DIOCESE OF**, comprises Wasco, Klamath, Lake, Sherman, Gilliam, Wheeler, Morrow, Grant, Union, Crook, Umatilla, Wallowa, Baker, Harney, and Malheur counties in the State of Oregon, U. S. A., an area of 65,683 square miles. It was established in 1903. The Rev. Charles J. O'Reilly, rector of the Church of the Immaculate Heart of Mary, Portland, Oregon, and editor of the "Catholic Sentinel" was named its first bishop and consecrated 25 August of that year. The diocese has a Catholic population estimated at about 4,000, whose spiritual needs are cared for by ten diocesan and seven Franciscan and Jesuit priests. The Sisters of St. Francis, St. Dominic, and the Most Holy Name of Jesus and Mary conduct five schools and academies. At the Umatilla Indian reservation there are more than 500 Catholic Indians attended by the Jesuit fathers of the Rocky Mountain Mission, two Brothers of Christian Instruction, and eight Sisters of St. Francis. There are 13 churches and 36 mission stations in the diocese.

Bishop O'Reilly was born 4 January, 1862, at St. John, New Brunswick, Canada, and educated at the Christian Brothers' school of St. John and at St. Joseph's College, Memramcook. He made his theological studies at the Grand Seminary, Montreal, and was ordained priest at Portland 29 June, 1890. He was then appointed to the mission of Oswego and Tegardville, and in February, 1894 was made rector of the Church of the Immaculate Heart of Mary, Portland.

THOMAS F. MEEHAN.

**Bakócz**, THOMAS, Cardinal and statesman, b. about 1442, in the village of Erdoed, county Szatmár, Northeastern Hungary; d. 15 June, 1521. His family belonged to the lower class, but was raised to the rank of nobility by his older brother Valentine. Through the generosity of this same brother he was enabled to pursue a thorough course of studies first in the town of Szatmár-Németi, then in Cracow, Poland, and finally in the Italian cities of Ferrara and Padua. He returned to his native country about the year 1470, with the doctor's degree, and soon after made the acquaintance of a distinguished ecclesiastic from Italy, Gabriel Rangoni, who enjoyed the confidence of King Matthias (1458-90) and held high positions in Hungary. By this prelate Bakócz was introduced to the king about the year 1474; and through a fortunate incident he attracted the attention of his sovereign. He was retained at court, employed in the chancery, and soon became secretary to the king and substitute of the royal chancellor. In 1480 he received a provostship in the town of Titel, Southern Hungary; and in 1486 he was promoted to the Bishopric of Raab. After the death of King Matthias in 1490 Bakócz took an active part in the selection of a new ruler; and when his candidate, Ladislaus II (1490-1516), a Polish prince and King of Bohemia, was chosen, Bakócz was made chancellor of the realm. As such he became the real ruler of his country, whose destinies he directed with firmness and skill. He concluded advantageous treaties with other powers, and made the alliance with Venice the pivot of his foreign policy. On that account he kept Hungary out of the League of Cambrai formed in 1508 between Pope Julius II (1503-13), France, Spain, and the Emperor Maximilian (1493-1519) against Venice. No wonder that the authorities of Venice vied with King Ladislaus in securing honours and riches for the powerful and ambitious prelate.

When the Bishopric of Erlau became vacant in 1491, Bakócz was appointed to it by the king. Pope Alexander VI (1492-1503) at first opposed, but later ratified, the appointment in 1497; and shortly afterwards, in December of the same year, transferred Bakócz to the primatial See of Gran. In addition to this Bakócz was created cardinal in 1500, and made Patriarch of Constantinople in 1507. The republic of Venice gladly assigned to him the revenues which were found within its own territory and attached to the patriarchal title. Not satisfied with all this Bakócz aspired to the papal throne, and received assurances of support from the Emperor Maximilian and from Venice; however, adverse circumstances prevented the realization of these hopes. A man of such prominence had necessarily his part in the ecclesiastical events of a general character. When in 1510 several cardinals rebelled against Pope Julius II, both sides tried to win him for their plans. Bakócz maintained a waiting attitude, until the pope, in 1511, condemned the schismatic Council of Pisa and announced that a general synod would be held in the Lateran in 1512. Bakócz was invited to this council, and without further hesitation he sailed on a Venetian ship to Ancona, and arrived in Rome in January, 1512, where he was received by the pope with much pomp and splendour. In the council, which opened the following May, Bakócz took an active part; he was on the committee for the reform of the Church and the Roman Curia. After the death of Pope Julius II, early in 1513, and during the conclave, it became evident that he had little prospect of winning the papal tiara; in fact on the 10th of March Cardinal Medici was chosen as Leo X (1513-21).

The new pope secured at once the service of the influential Bakócz for a crusade against the Turks. He appointed the primate a legate *a latere* not only

for Hungary but also for the neighbouring countries, and granted to him most ample faculties. After his return to Hungary in 1514 Bakócz made preparations at once for the expedition, and soon an army of about 100,000 soldiers was gathered under the leadership of George Dózsa. Unfortunately the nobles were opposed to the enterprise, and the whole matter ended in a civil war between them and the Crusaders, in which the nobility remained victorious. After the death of King Ladislaus II in 1516 the influence of Bakócz ceased almost completely; the last years of his life were spent more in retirement. He was a man of the world, very ambitious, and not always tender in the choice of the means to an end. Out of his large fortune, and through his influential position, he provided in a princely manner for the members of his family. Owing to the great power so long wielded by him, he made many enemies among his own countrymen, whose opposition triumphed in the end. With all that his personal conduct was blameless; not even a shadow of suspicion was cast upon his character by his enemies. He was deeply religious, and had a special devotion to the Blessed Virgin, in whose honour he fitted out a chapel in the Cathedral of Erlau, and built one near that of Gran. In the latter, a magnificent structure of the Renaissance, his remains found their last resting place.

FRANCIS J. SCHAEFER.

**Bakunin**, MICHAEL. See SOCIALISM.

**Balaam**.—The derivation of the name is uncertain. Dr. Neubauer would connect it with the god Ammo or Ammi, as though Balaam belonged to a people whose god or lord was Ammo or Ammi. It is certainly remarkable that Balaam is said (Num., xxii, 5) to come from "the land of the children of Ammo" (D. V. reads "Ammon").

THE NARRATIVE.—The story of Balaam is contained in Numbers, chapters xxii-xxiv; xxxi, 8-16; Deut., xxiii, 4; Josue, xiii, 22; and xxiv, 9-10. There are also references to him in Nehemias, xiii, 2; Micheas, vi, 5; II Peter, ii, 15; Jude, 11; and Apoc., ii, 14. Balac, King of Moab, alarmed at Israel's victories over the Amorrites, sent messengers with presents to Balaam, son of Beor, who dwelt in Pethor (the Pitru of the cuneiform texts) to induce him to come and curse Israel. For in those early times, men attached great importance to a curse, as, for instance, that of a father on his child; and Balaam had a special reputation in this matter. "I know", said Balac to him through his messengers, "that he whom thou shalt bless is blessed, and he whom thou shalt curse is cursed." When the messengers had delivered their message, Balaam consulted the Lord as to whether he should go or stay, and being refused permission to go, in the morning he gave a negative answer to the ambassadors. Nothing daunted, Balac sent another embassy, composed of men of higher rank, princes, with directions to offer Balaam anything he liked, provided only he would come and curse Israel. Again Balaam consulted the Lord and obtained permission to go, on condition that he undertook to do what God commanded. In view of what follows, some commentators think that this leave was extorted by importunity, and that Balaam was actuated in making his request by mercenary motives, and had fully made up his mind to curse Israel.

The next morning Balaam saddled his ass and set out with the princes of Moab. On the way, the ass manifested every sign of alarm; it swerved suddenly from the path, crushed Balaam's leg against a wall and finally sank to the ground under him, so that

Balaam cruelly beat it and even threatened it with death. Then the ass was endowed by God with the power of speech, and upbraided its master with his cruelty towards it. At the same time Balaam's eyes were opened and he saw the cause of the ass's strange conduct, viz. an angel of the Lord standing in the way with drawn sword to bar his passage. The angel upbraided Balaam with his cruel conduct towards the ass and told him that it was the action of the ass which had saved his life. Finally, he permitted Balaam to continue his journey, but only on condition that he would speak nothing but what he commanded. Balac met Balaam on the borders of Arnon, and they went together to Kiriath-buzoth, where sacrifices were duly offered. The following day, Balac took Balaam to Bamoth-Baal, whence he could see the outskirts of the host of Israel. Seven bullocks and seven rams having been sacrificed, and Balaam having gone apart to consult the Lord, the prophet returned to Balac and refused to curse Israel. On the contrary, he eulogized them: "Who", he said, "can count the dust of Jacob or number the fourth part of Israel? Let me die the death of the righteous, and my last end be like his."

Then Balac took Balaam to the top of Mount Phasga, to see if from there he would not curse Israel. But, after the same rites and formalities had been gone through, Balaam again pronounced a blessing on the Israelites, more emphatic than the former: "Behold, I have received commandment to bless. And he hath blessed, and I cannot reverse it."

"Neither bless nor curse", exclaimed Balac. But he resolved to try the prophet once more, and accordingly took him to the top of Mount Phogor which looks towards the wilderness. Here sacrifices were offered, but without further formality, Balaam, under the influence of "the spirit of God", broke forth into the beautiful eulogy of Israel which begins with the words: "How beautiful are thy tabernacles, O Jacob, and thy tents, O Israel!" Filled with anger, Balac dismissed Balaam to his home. But before departing, the prophet delivered his fourth pronouncement on the glorious future of Israel and the fate of its enemies. His vision, too, piercing beyond the earthly Kingdom of Israel, seems to have dimly seen the Messianic reign to come. "I see him", he said, "but not now; I behold him, but not nigh: there shall come forth a star out of Jacob, and a sceptre shall rise out of Israel", etc. Balac and Balaam separated, but before returning to his own country, Balaam sojourned with the Madianites. There he seems to have instigated his hosts to send Madianite and Moabite women among the Israelites to seduce them from their allegiance to Jehovah (Num., xxxi, 16). This was while the children of Israel were dwelling at Settim, and no doubt is closely connected with the troubles and disorder over Beelphegor, told of in the twenty-fifth chapter of Numbers. The punishment inflicted by God on the Israelites was signal. A plague fell upon them, and carried off 24,000 (xxv, 9). Nor did Balaam escape. He was slain, together with the five kings of Madian, in the war waged by Israel against that nation related in the thirty-first chapter of Numbers.

**CONSERVATIVE VIEW.**—The usual traditional, or conservative, view of the episode of Balaam is that it is an historical narrative in the ordinary sense. The supernatural plays an important part in it, but it is contended that the credibility of the narrative requires only a belief in the miraculous, and that the acceptance of many of the most important parts of the Bible requires such a belief. The episode of the speaking ass is strange; but no stranger than the story of the speaking serpent in Paradise.

The future is foretold by Balaam; but so it is by the great prophets of Israel. A question is discussed as to what Balaam was. Was he a prophet in the true sense of the word, or a soothsayer? It does not seem possible to say that he was a prophet in the same sense as Isaiahs or any of the great prophets of Israel. On the other hand, in Numbers, xxiv, 2, he is said to have spoken under the influence of "the spirit of God". Indeed, throughout his connexion with Balac, he seems to have acted under the influence of God's spirit. But when his state of life is looked at as such, he cannot be regarded as having belonged to the order of the prophets. St. Thomas calls him "a prophet of the devil". Scripture does not call him a prophet, but a diviner, and Balac approached him with the price of divination. Moreover, the way in which he joined Balac in idolatrous worship seems to preclude the idea of his being a genuine servant of Jehovah. Prophecy is a gift given for the good of others. Balaam was used for the good of Israel.

**CRITICAL VIEW.**—Modern critics take a different view of the episode, in conformity with their general conclusions as to the Hexateuch. For them the narrative of Numbers, chapters xxii, xxiii, and xxiv, is part of the prophetic history. That is, in these chapters there is no trace of the priestly writer P, though to him is assigned the passage xxv, 6-18, which contains an account of the crime and punishment of Zambri and Cozbi. Though critics are unanimous that chapters xxii, xxiii, and xxiv are the work of the two writers called the Jahvist and the Elohist, they do not find it easy to apportion that part of Numbers between the two authors. Indeed, the only point on which they are agreed is that chapter xxii belongs to the Elohist, with the exception of verses 22-35, which they assign to the Jahvist. This section contains the episode of the ass, and critics say that it destroys the sequence of the narrative. Thus in verse 20 Balaam gets leave from God to go with the princes of Moab; but in verse 22 God is angry with him, apparently because of his going. Though this apparent inconsistency has been variously explained by conservative commentators, critics argue from it and other similar instances, that the episode of the ass (verses 22-35) has been skillfully fitted into the rest of the chapter, but is really the work of another writer; and that the original narrative which is broken off at verse 21 continues at verse 36. Further proofs of dual authorship are often far from clear. Thus, there is said to be a duplication in xxii, 3: "And the Moabites were in great fear of him, and were not able to sustain his assault". Surely this is weak in the extreme. Does not the natural tendency of the Jewish writer to parallelisms sufficiently explain it?

The reference to historical events in Balaam's fourth prophecy leads most critical writers to fix the date of its composition not earlier than David's reign. David's Moabitic war is said to be the war referred to in Num., xxiv, 17. But, putting aside the gift of prophecy, we know that writings of this kind, like the Psalms, are often retouched in ages later than that of their original composition. At most, therefore, it seems legitimate to conclude that this passage shows signs of having been expanded and re-edited at that period.

J. A. HOWLETT.

**Balanæa**, a titular see of Syria. The city of this name, a colony of Aradus (Strabo, XVI, 753), is placed by Stephanus Byzantius in Phœnicia, though it belongs rather to Syria. Its first known bishop was present at the Council of Nicæa in 325

(Lequien, Oriens Christ., II, 923). From that time to the sixth century the names of three others are known. At the latter date it was a suffragan of Apamea, the metropolis of Syria Secunda. When Justinian established a new civil province, Theodorias, with Laodicea as metropolis, Balanæa was incorporated with it, but continued to depend ecclesiastically on Apamea, till it obtained the status of an exempt bishopric. This was its condition in the tenth century, when it was directly subject to the Patriarch of Antioch. The Crusaders created there a Latin see, of which a bishop is known about 1200 (Lequien, III, 1189); the river near by it served as a boundary between the Kingdom of Jerusalem and the principality of Antioch. The Franks called it *Valania* according to the Greek pronunciation, the Mussulmans *Balūnoḡs*. Owing to the unsafe conditions of the country the Latin bishop lived at Margat, a neighbouring castle of the Hospitallers. Balanæa, to-day called Baniyas, is a little village at the foot of the hill of Qalcat el-Marqab, between Tartous (Tortosa) and Latakia (Laodicea); it is the residence of the *kaimakam* of the district. It numbers about 1,550 inhabitants, 1,200 Maronites, and 230 non-Catholic Christians; they cultivate chiefly onions, olive-trees, and very good tobacco. The roadstead is excellent, but is visited only by small boats.

S. VAILHÉ.

**Balbina, SAINT.**—Memorials of a St. Balbina are to be found at Rome in three different spots which are connected with the early Christian antiquities of that city. In the purely legendary account of the martyrdom of St. Alexander (Acta SS., Maii, I, 367 sqq.) mention is made of a tribune Quirinus who died a martyr and was buried in the catacomb of Prætextatus on the Via Appia. His grave was regarded with great veneration and is referred to in the old itineraries (guides for pilgrims) of the Roman catacombs. Tradition said that his daughter Balbina, who had been baptized by St. Alexander and had passed her life unmarried, was buried after death near her father in the same catacomb. The feast of St. Balbina is celebrated 31 March. Usuardus speaks of her in his martyrology; his account of St. Balbina rests on the record of the martyrdom of St. Alexander. There is another Balbina whose name was given to a catacomb (cœm. Balbinæ) which lay between the Via Appia and the Via Ardeatina not far from the little church called *Domine quo vadis*. Over this cemetery a basilica was erected in the fourth century by Pope Mark. There still exists on the little Aventine in the city itself the old title of St. Balbina, first mentioned in an epitaph of the sixth century and in the signatures to a Roman council (595) of the time of Pope Gregory I. This church was erected in a large ancient hall. Its titular saint is supposed to be identical with the St. Balbina who was buried in the catacomb of Prætextatus and whose bones together with those of her father were brought here at a later date. It is not certain, however, that the two names refer to the same person.

Quirinus und dessen Tochter Balbina* (Nauwig, 1848); UGONIO, *Historia delle stazioni di Roma* (Rome, 1588), 126 sqq.; MARUCCI, *Les basiliques et églises de Rome* (Rome, 1902), 173 sqq.; DE ROSSI, *Bull. di arch. crist.* (1867), I sqq.

J. P. KIRSCH.

**Balbinus, BOLESLAUS**, a Jesuit historian of Bohemia, b. 4 December, 1621, at Königrätz, of an ancient noble family; d. 29 November, 1688, at Prague. His entire life was devoted to collecting and editing the materials of Bohemian history, and his researches have often been utilized by the Bollandists. He wrote over thirty works, the most important of which is a "Miscellanea Historica regni Bohemiæ" or

"Miscellany of Bohemian history" (6 vols., Prague, 1679-87) in which he described the chief historical events of his native land, its natural history, the genealogies of its nobles, lives of prominent Bohemians, etc. He wrote also in Latin an "Apology for the Slavic and especially the Bohemian tongue". Balbinus was the first to edit the ancient vernacular chronicle known as the "Life of St. Ludmilla and Martyrdom of St. Wenceslas", a new edition of which was published in 1902 by Dr. Pekár and is by him held to be a text of the tenth century, and therefore "the oldest historical work written in Bohemia and by a Bohemian". Balbinus wrote also "De archiepiscopis Bohemiæ" (Prague, 1682) and "Bohemia Sancta, sive de sanctis Bohemiæ, Moraviæ, Silesiæ, Lusatiæ" (ibid., 1682).

THOMAS J. SHAHAN.

**Balboa, VASCO NUÑEZ DE**, discoverer of the Pacific Ocean from the west coast of Central America, b. in Spain, 1475, either at Badajoz or at Jerez de los Caballeros; d. at Darien, 1517. He went to Central America in 1500 with Rodrigo de Bastidas and thence, in secret, with Martín Fernández de Enciso to Cartagena. The story that he got aboard either in an empty barrel or wrapped up in a sail may be true. He soon assumed an important rôle among the participants of the expedition, and settled Darien in 1509. Then he proclaimed himself governor, and sent both Enciso and Nicuesa away. From Darien he undertook, with a few followers, the hazardous journey across the Isthmus that led to the discovery of the Pacific Ocean, 25 September, 1513, and established beyond all doubt the continental nature of America. The appointment in 1514 of Pedrarias Dávila (see ARIAS DE AVILA) as governor of the regions discovered and partly occupied by Balboa, and his appearance on the coast of Darien with a large armament, at once gave rise to trouble. Arias was an aged man of mediocre attainments, jealous, deceitful, and vindictive. Balboa was generous, careless, and over-confident in the merits of his achievements, and was no match for the intrigues that forthwith began against him. To mask his sinister designs Arias gave one of his daughters to Balboa in marriage. The latter was allowed to continue his explorations while Arias and the Licentiate Gaspar de Espinosa were slowly tightening a net of true and false testimony around him, under cover of the inevitable *Residencia*. The Crown gave Balboa the title of *Adelantado* of the South Sea, Governor of Coyba and of what subsequently became the district of Panama, but Arias and his agents understood how to reduce these titles to empty honours. Quevedo, Bishop of Castilla del Oro, was Balboa's sincere friend and assisted him, but with Quevedo's departure for Spain the case was lost. Fearful lest the bishop's appeal for his friend might result against Arias and his party, the *Residencia* was at once converted into criminal proceedings, death sentence hastily pronounced, and Balboa beheaded for high treason in 1517 at Darien. One of the main pretexts for the sentence was Balboa's action towards Enciso and Nicuesa. Balboa has been credited by most authors with having been first to hear of Peru. This is incorrect. In his few attempts at exploring the coast of southern Panama he heard only of Indian tribes of northern or north-western Colombia.

**Balbuena, BERNARDO DE**, a Spanish poet, b. in Val de Peñas, 1568; d. in Porto Rico, 1627. At a very early age he was taken by his parents to Mexico, where he received his education. Later he spent twelve years in Jamaica, and then passed the remainder of his days as Bishop of Porto Rico, to which see he was appointed in 1620. He published "La Grandeza Mejicana" in 1604, and in 1608, in Madrid, "Siglo de Oro en las Selvas de Eriphile," a very learned pastoral romance abounding in beautiful poetic passages. The book, however, contained no description of the scenery or manners of the New World and nothing connected with the history of the times. Possibly for this reason it was not in great demand among Balbuena's contemporaries. But in 1821 it had the honour of being republished by the Spanish Academy. Another work "El Bernardo ó Victoria de Roncesvalles" was published in Madrid in 1624 (new edition, 1808). It is an epic poem on the subject of Spain's resistance to the invasion of Charlemagne.

VENTURA FUENTES.

**Balbus, HIERONYMUS (ACCELLINI)**, humanist, poet, diplomatist, and Bishop of Gurk in Carinthia, b. about 1450 at Venice; d. there, probably 1535. He was a pupil of Pomponius Lætus, the founder of the Roman Academy. As a young man, by his manner and bearing alike, Balbus gave great offence; he was of a quarrelsome disposition, and, for a time, led a very loose life. But in later years he was highly respected and came to be regarded as one of the most accomplished men of his day. In 1485 he was professor at the University of Paris. His overbearing manner here soon brought him into conflict with various scholars, and in consequence of the attack which these men made on his character, he was obliged to leave Paris in 1491. A few years later (1494), at the invitation of Emperor Maximilian I, he went to the University of Vienna, where he lectured on poetry, the Roman classics, and jurisprudence. He was again in Paris, for a short period, in 1495, and visited London in 1496, but resumed his professorship at Vienna in 1497. Here he became a member of the Danube Society, and lived on terms of intimate friendship with its learned founder, Conrad Celtis the Humanist, at that time professor and librarian at the University of Vienna. In little less than a year, renewed contentions with his colleagues forced him to quit Vienna. Balbus next went to Prague (1498), where he accepted a professorship which had been obtained for him by his Viennese friends. But his irregular conduct, scandalous writings, and disputatious temper soon drove him from the city. On leaving Prague he withdrew to Hungary (Fünfkirchen), and remained in retirement for a period of fifteen years, during which time he changed his manner of life completely, and even took orders. His subsequent career as an ecclesiastic was one of considerable distinction. He became provost of the Cathedral Chapter at Waizen, 1515, later also of that at Pressburg, and, for some years, held an important position at the Court of Hungary, where he was tutor of the royal princes, and private secretary to the king, Ladislaus VI.

In 1521 Balbus appeared at the Diet of Worms as the ambassador of Louis II of Hungary, and attracted considerable attention by an eloquent discourse in which he protested against the innovations of Luther, and urged upon the assembled princes the necessity of a joint undertaking against the Turks. Shortly afterwards he was in the service of Arch-

duke Ferdinand of Austria, who, in 1522, designated him Bishop of Gurk, and sent him to Rome on a congratulatory embassy to the newly elected pontiff, Adrian VI. It was a part of his mission also to induce the pope to proclaim a crusade against the Turk. The address which he made on being received by the pope in a public audience, 9 February, 1523, abounded in extravagant rhetoric, but in humanistic circles it was considered a marvel of eloquence. Balbus remained in Rome for some time, and was there consecrated Bishop of Gurk, 25 March, 1523. As a bishop, he enacted many wholesome and timely ordinances, and had the preservation of church discipline sincerely at heart, but he was frequently absent from his diocese. From one of his letters we learn that in the time of Clement VII he lived at Rome for some years in the papal palace and was much in the confidence of that pontiff. In 1530, though quite an old man, he accompanied Charles V to Bologna to attend the emperor's coronation. At Bologna he wrote his best known work, "De coronatione principum", which, on account of the views it contains on the relation of Church and State, was placed on the Index, 23 July, 1611. Balbus was the author of many other works. Of these, the poetical, oratorical, and politico-moral writings were edited by Joseph von Retzer (Vienna, 1791-92, 2 vols.). His poems, in part coarse and indelicate, are of no particular merit.

THOMAS ÖESTREICH.

**Baldachinum of the Altar**, a dome-like canopy in wood, stone, or metal, erected over the high altar of larger churches, generally supported on four columns, though sometimes suspended by chains from the roof. Other forms will be noted in tracing the cause of its history. The name is late medieval, *baldacchino*, from *Baldocco*, Italian form of Bagdad whence came the precious cloths of which in their later development these canopies were made. It was called earlier *ciborium*, from the Greek *κύβριον* (the globular seed-pod of the lotus, used as a drinking-cup) because of the similarity of its dome top to an inverted cup. The early history of the baldachinum is obscure, but it probably originated in the desire to give to the primitive altar table a more dignified and beautiful architectural setting. The arcosolium altars of the catacombs perhaps foreshadow this tendency. With the construction or adaptation of the larger church edifices of the fourth century, the baldachinum became their architectural centre, emphasizing the importance of the sacrificial table as the centre of Christian worship. Thus, while the altar retained its primitive simplicity of form and proportions, the baldachinum gave it the architectural importance which its surroundings demanded. By its dais-like effect, it designated the altar as a throne of honour. It served also the practical purpose of supporting, between its columns, the altar-curtains, while from its roof were suspended lamps, vases, richly ornamented crowns, and other altar decorations. The summit was surmounted by the altar-cross. The earliest reference to the baldachinum is found in the "Liber Pontificalis" (ed. Duchesne, I, 172, 191, 233, 235) which described the *Fastidium argenteum* given by Constantine to the Lateran basilica during the pontificate of Sylvester I (314-335) and replaced, after the ravages of Alaric's Gothic hordes, by another erected during the pontificate of Sixtus III (432-440). The oldest representation in art is the early sixth-century mosaic in the church of St. George in Thessalo-

nica; while the oldest actual specimen is that in the church of St. Apollinare in Classe at Ravenna (c. 810). The use of the baldachinum was general up to the twelfth century, when it yielded to the growing importance of the reliquary as an adjunct to the altar, sometimes disappearing altogether, sometimes

BALDACHINUM IN ST. PETER'S, ROME

taking the form of a canopy over the relic-casket. With the placing of the altar against the wall, the baldachinum took the form of a projecting dais canopy (v. *Altar-Canopy* under ALTAR: IN LITURGY) or became the ciborium-like superstructure of the tabernacle or central tower of the altar. Italy was less affected by this evolution than were the centres of Gothic art, and the use of the older form is common there to-day. The most magnificent baldachinum in the world is that in St. Peter's in Rome designed by Bernini for Pope Urban VIII.

JOHN B. PETERSON.

**Balde**, JACOB, a German poet, b. 4 January, 1604, in the Imperial free town of Ensisheim in Upper Alsace; d. at Neuburg, 9 August, 1668. He studied the classics and rhetoric in the Jesuit college of his native town, philosophy and law at the University of Ingolstadt, where on 1 July, 1624, he was admitted into the Society of Jesus. Having undergone the usual ascetical and literary training he taught classics and rhetoric in the colleges of Munich and Innsbruck, and in his leisure hours composed the Latin mock-heroic poem "*Batrachomyomachia*" (The Battle of the Frogs and the Mice). After completing his theological studies at Ingolstadt, where he was ordained priest in 1633, he was appointed professor of eloquence in the university. Called to Munich a few years later to educate the sons of Duke Albert, he soon after received the office of court preacher to the elector Maximilian. Owing to failing health he

was, in 1654, sent to Neuburg on the Danube, where he became the intimate friend and adviser of the Count Palatine Philipp Wilhelm. Here he died. The poetical works of Balde are marked by a brilliant imagination, noble thoughts, wit and humour, strength and tenderness of feeling, great learning, love of nature, and knowledge of the human heart. His mastery of classical Latin was such that he wielded it with astonishing power and originality, and he used the ancient metres and poetical forms with consummate ease and skill. His poetical themes are the world and religion, friendship and fatherland, art and letters. His patriotic accents, says Herder, have made him a German poet for all time. He witnessed the horrors of the Thirty Years War, and the devastation and disruption of his country, and while lamenting the fate of Germany, sought to re-awaken in the hearts of the people the old national spirit.

Balde was above all a lyric poet, many of his odes to the Virgin Mother of God being of surpassing beauty, but he has also written epic and pastoral poems, satires, elegies, and dramas. During his lifetime he was acclaimed "the German Horace", but soon after his death he fell into neglect, until Herder, towards the end of the eighteenth century, by his translation of many of Balde's lyrics, published in the periodical "*Terpeichore*", revived the poet's memory and the fame of his genius among scholars. Balde, however, could never have become a popular poet in the wider sense of the word, as nearly all his works were written in Latin, which was in his time the international language of the cultured classes, whereas German was too unwieldy and crude a vehicle of poetical expression. Balde's poetry is not faultless; he occasionally offends against good taste, burdens his verses with mythological lore, and does not always keep his luxuriant imagination under control. The only complete edition of his works was published in eight volumes at Munich in 1729.

B. GULDNER.

**Balderic** (BAUDRY), a monk of Liège, a writer and teacher of the twelfth century, b. date unknown, at Florennes in Belgium; d. about 1157. He was proctor at the court of Pope Eugene III, and accompanied him to France when the machinations of Arnold of Brescia compelled the pontiff to leave Rome. At a synod held in Paris in 1147, Balderic became acquainted with Albero, the Archbishop of Trier, who induced him to become head of the cathedral school in Trier. As long as Albero lived, Balderic remained his friend and adviser, and, after his death, wrote his biography, which is remarkable for its classical Latin. It is published in *Mon. Germ. Script.*, VIII, 243 sqq., and in P. L., CLIV, 1307 sqq.

WATTENBACH, *Deutschlands Geschichtsquellen* (Berlin, 1894), II, 3; HAUCK, *Kirchengeschichte Deutschlands* (Leipzig, 1903), IV, 476.

MICHAEL OTT.

**Balderic**, or BAUDRY, Bishop of Dol, in France, chronicler, b. about 1050; d. 7 January, 1130. After a brilliant course of studies at the famous school at Angers, he entered the Abbey of Bourgueil in Anjou, where he became abbot in 1079. In 1107 he received from Pascal II the pallium of Bishop of Dol. He assisted at all the councils held in his day, went several times to Rome, and left an account of a journey to England. He exercised considerable activity in reforming monastic discipline. The last years of his life were spent in retirement. He is remembered as the author of important or interesting contributions to history, poetry, and hagiography

Balderic's most valuable work is his "Historia Hierosolymitanae libri IV", an account of the First Crusade, based in part on the testimony of eye-witnesses, and submitted for correction to the Abbot Peter of Mailleais, who had accompanied the Crusaders. Among his other works are poems on the conquest of England and on the reign of Philip I; lives, in Latin, of his friend Robertus de Arbrissello (published by the Bollandists under 25 Feb.), of St. Valerian (published by Bouquet, Hist. Eccl. de France), and of St. Hugh of Rouen (published by Du Monstier, "Neustria Pia"); finally a letter to the monks of Fécamp which contains some valuable material relating to Breton manners, and to English and Norman monasteries (Duchesne and Bouquet, *Historiens de France*).

*Histoire littéraire de la France*, VIII, 400; MOLINIER, *Sources de l'hist. de France*.

J. V. CROWNE.

**Baldi**, BERNARDINO, an Italian poet and savant, b. at Urbino, 5 June, 1553; d. at the same place, 10 October, 1617. After being initiated into higher mathematics by his fellow-townsmen Commandino, he went to Padua (1573) and Rome (1576), where he managed to acquire a wide erudition, scientific, classical, and Oriental; Chaldaic, Arabic, and Persian were among the languages he learned. Having subsequently taken orders, he was made Abbot of Guastalla (Mantua) by Prince Ferrante Gonzaga. In spite of many wanderings, entailing long-protracted absences, he retained the abbacy until 1609, when his native city claimed him for the rest of his life. Cardinal Cinzio Aldobrandini, the nephew of Clement VIII, and Francesco Maria della Rovere, Duke of Urbino, were proud of his friendship. The latter entrusted him with an embassy to Venice in 1612.

Baldi's poetic laurels were mainly earned by "La Nautica", a didactic poem closely following the "Georgics" in finely polished blank verse (1576). To this were added nineteen "Egloghe miste" (1583), "L'invenzione del bossolo de navigare", miscellaneous short poems (1590), and the "Epigrammi" (1614). An attempt at introducing fourteen and eighteen syllable lines in "Lauro" (1600) and "Il Diluvio Universale" (1604), met with utter failure. In addition to his Latin poems and several polyglot compilations, we have: "Cento Apologhi" (1583), some dialogues, a well-known "Descrizione del palazzo ducale d'Urbino" (1587), the biographies of Federico, second Duke, and Guidobaldo I, of Urbino, a curious biographical work on Italian and foreign mathematicians (Urbino, 1707), two Latin treatises on Vitruvius, numerous letters and translations from the Targum Onkelos, the Arabic Psalms, Aratus, Musæus, Hero of Alexandria, Aristotle, etc. The unconstrained elegance of his diction gives him a foremost rank as a prose-writer. A standard edition of his best writings is that of Ugolini and Polidori (Florence, 1859).

EDOARDO SAN GIOVANNI.

**Baldi**, BERNARDO. See BERNARD OF PAVIA.

**Baldinucci**, ANTHONY, BLESSED, b. 19 June, 1665, at Florence; d. 6 November, 1717. He entered the Society of Jesus 21 April, 1681, and was ordained priest 28 October, 1695. After his third year of probation he began his missionary career at Monte Santo. The field of his labours were the towns of Frascati and Viterbo, in which, with the exception of some more distant places, he laboured for the rest of his life. His methods of preaching were of the most unusual and startling character. Splendid processions were organized which proceeded from

various parts of the country to the place where the mission was being given. Many of the people wore crowns of thorns and scourged themselves as they went along. When Baldinucci preached he frequently carried a cross, and was loaded down with heavy chains. He often walked up and down among the people scourging himself to blood. The exercises were usually brought to a close by the burning in the public square of cards, dice, musical instruments, etc. He always carried with him a miraculous picture of the Madonna which was borne before him as he proceeded from place to place. The propagation of devotion to the Blessed Virgin was one of his special aims. To keep order among the vast throngs who flocked to hear him, he always employed a number of laymen whom he called *deputati*. They were not unfrequently men of very bad lives whom he chose purposely in order to conciliate and convert them. His work among the clergy was marked by great prudence and success. Though his preaching was incessant, he found time to write two courses of Lenten Sermons, to gather materials for many more, compose hundreds of discourses, and carry on an immense correspondence. The effect of his apostolic work on the excitable people among whom he laboured was stupendous. At times, when approaching a city, he found crowds covering the walls awaiting his arrival. His peculiar methods are explainable as those best adapted to his surroundings and times. After twenty years of labour he died at the age of fifty-two. He was already canonized in public estimation, but, although the official ecclesiastical process was begun in 1753, the decree of his beatification was issued only on 23 April, 1893.

T. J. CAMPBELL.

**Baldovinetti**, ALESSO, a notable Florentine painter, b. in Florence, 14 October, 1427; d. there, 29 August, 1499. His father was a wealthy merchant, but leaving the paternal business he registered himself, at the age of twenty-one, as a member of the Academy of Saint Luke. He called himself a pupil of Paolo Uccelli, and, according to Vasari, was the master of the famous Ghirlandajo. He experimented much with colours in fresco and oil, but his remaining works are badly preserved. He had the reputation of being the ablest worker in mosaic of his day.

Baldovinetti assisted Andrea del Castagno and Domenico Veneziano in the frescoes, since destroyed, of Santa Maria Nuova in Florence. Among his works which remain is a large fresco of "The Adoration of the Shepherds" in the cloisters of Santa Annunziata. His was the design for the portrait of Dante by Domenico del Michelino in the duomo. The large panel painting of "The Holy Trinity Adored by Saints Gualberto and Benedetto", now in the Academy at Florence, was executed for the church of Santa Trinità in that city. He painted on the walls of the choir of that edifice scenes, not now extant, from the Old Testament, containing numerous portraits of his contemporaries. In the chapel of San Miniato, Florence, are frescoes of angels, prophets, and evangelists. The same edifice also contains an "Annunciation". In the galleries of the Uffizi are an "Enthroned Virgin and Child with Saints", and a most decorative and quaintly graceful "Annunciation". His portrait by himself is in the gallery at Bergamo and Ghirlandajo painted it near his own in his frescoes in Santa Maria Novella, Florence.

AUGUSTUS VAN CLEEF.

**Baldred, SAINT,** (1) a Celtic Bishop of Strathclyde, b. about 643; d. at Aldhame, Haddingtonshire, about 607. He is said to have been the immediate successor of the great St. Kentigern, or Mungo, the founder of the See of Glasgow, Scotland. Like St. Kentigern, he was of Irish ancestry, but is reckoned as a British saint, inasmuch as Strathclyde was part of Britain. The chronology of the period when he flourished is somewhat obscure, but the best authorities on Scottish history agree that St. Baldred was born towards the middle of the sixth century. Previous to his consecration, St. Baldred had laboured for many years in Strathclyde, and had founded numerous houses for monks as also for holy virgins in addition to the churches of Aldhame, Tyinguham and Preston Kirk. Owing to the disturbed state of the kingdom, he was forced after a short rule to retire from the spiritual government of the Strathclyde Britons as also happened to his predecessor. His feast is observed on 6 March. (2) **BALDRED**, or **BALTHERUS**, a holy hermit-priest of the eighth century, who has been confounded with the preceding Scottish saint. According to Simeon of Durham and Hovendeus the date of his death is given as 756. Turgot of Durham is more explicit, and he tells us that Baldred, or Baltherus, the priest, died "in the seventeenth year of the episcopate of Cynulf", that is 756, or on the 6 March, 757. This Baldred is associated with the See of Lindisfarne, and was an Englishman. Numerous miracles are ascribed to him, and his feast is given as 6 March.

To add to the confusion, some writers have imagined that this Baldred is identical with Bilfritt, or Bilfrid, a hermit goldsmith, whose exquisite work may yet be seen in the British Museum on the cover of a Book of Gospels, generally known as the Gospels of St. Cuthbert. This cover was made during the rule of Bishops Eadfrid and Ethelwold of Lindisfarne, 698 to 740. The relics of St. Bilfrid were discovered by Aelfrid, and were placed, with those of St. Baldred, in St. Cuthbert's shrine at Durham, but were subsequently transferred to the shrine of St. Bede in 1104.

W. H. GRATTAN FLOOD.

**Baldung, HANS**, known as **GRIEN** or **GRÜN**, from his fondness for brilliant green, both in his own costume and in his pictures, a vigorous and distinguished painter, engraver, and draughtsman on wood, b. at Gmünd, Swabia, about 1476; d. at Strasburg, 1545. Baldung was a lifelong friend of Dürer and received a lock of the latter's hair when he died. Dürer influenced Baldung's work, as did Matthæus Grünewald and Martin Schongauer. His portraits, when unsigned, have at times passed as the work of that greater master, Dürer. An exceptional draughtsman and a good colourist, Baldung's work is marked by an original and fertile imagination. He is thought to have worked with Dürer at Nuremberg for two years, assisting him and painting under his eye the copies of "Adam and Eve" now in the Pitti Gallery at Florence. He became a citizen of Strasburg in 1509, and was made senator the year of his death.

Baldung spent seven years at Freiburg in the Breisgau, where, in a monastery, is found his most famous work, an altar piece, the central portion showing "The Coronation of the Virgin", the wings bearing on the inside the Apostles and on the outside four scenes from the life of Our Lady. Two altar pieces in the Convent of Lichenthal, near Baden-Baden, are assumed to be his earliest works. Baldung's paint-

ings are chiefly in public galleries at Berlin, Vienna, Munich, Stuttgart, Prague, Darmstadt, Basle, Karlsruhe, Aschaffenburg, and Frankfurt. In the Berlin Museum are "Christ on the Cross" (two pictures), a triptych "Adoration of the Kings", with saints on the interior and exterior of the wings, and "The Stoning of Saint Stephen"; in the Munich Pinakothek, the portrait of his friend, Margrave Philipp Christoph of Baden; at Vienna in the Museum, the "Portrait of a Young Man", and a portrait of himself in green; in the Academy, a "Holy Family"; in the Liechtenstein Gallery, "The Ages of Man in Six Female Figures", and a "Madonna"; in the Schönborn Gallery, "Adam and Eve".

AUGUSTUS VAN CLEEF.

**Baldwin I-II.** See CONSTANTINOPLE.

**Baldwin I-V.** See JERUSALEM, KINGDOM OF.

**Baldwin**, Archbishop of Trier and Elector of the Holy Roman Empire, b. 1285; d. 1354; he belonged to the noble family of the Counts of Luxemburg, or Lützelburg, and was a brother of the Emperor Henry VII. When he was only three years of age, his father, Count Henry III, was killed in battle. The charge of Baldwin's education, therefore, devolved on his mother, Beatrix of Avesnes, and his brother, the future emperor. Being exceptionally talented, he was sent at the early age of thirteen to the University of Paris, where, under the direction of two private tutors, he received a thorough education. In 1305, when the Archbishop of Mainz died, Henry wished to procure this archiepiscopal see and electorate for his brother, and sent his former physician, Peter Aichspalter, then Bishop of Basle, to Pope Clement V, at Avignon, with instructions to use his influence in behalf of Baldwin. The pope, however, refused to entrust the most important archiepiscopal see of Germany to a youth who was then only nineteen years old. When Aichspalter, shortly after, cured the pope of a severe sickness, he was himself made Archbishop of Mainz, with the understanding, it seems, that Baldwin was to succeed the aged Archbishop Diether of Trier. Accordingly, when Diether died in 1307, Baldwin became Archbishop and Elector of Trier. He was consecrated, 11 March, 1308, at Poitiers by the pope himself and took possession of his archbishopric on the 2d of June, in the same year.

Though only twenty-two years old, Baldwin had many qualities which fitted him for the triple office of bishop, prince, and elector. Without levying special taxes he paid off within a short time the many debts incurred by his predecessor, and he fearlessly asserted his rights of sovereignty over the refractory municipal authorities of Trier. Shortly after the new archbishop's consecration the Emperor Albert was murdered (May, 1308), and Baldwin, acting with Archbishop Aichspalter of Mainz, prevailed upon the other electors to award the imperial crown to Henry of Luxemburg. During the short reign of Henry VII (1309-13) Baldwin was his brother's most influential adviser and accompanied him in his expeditions through the empire and to Rome. After Henry's death he desired as emperor his nephew, King John of Bohemia, then only eighteen years old. However, seeing the futility of his efforts to win the other electors for King John, and fearing the election of Frederick of Austria, who was hostile to the house of Luxemburg, Baldwin urged the election of Louis of Bavaria. But all his attempts to gain over the opposing electors were unsuccessful, and a double election resulted. During the civil war of eight years which ensued he fought on the side of Louis

the Bavarian, and contributed largely to his final success. In the conflict between Louis and Pope John XXII, which was equally disastrous to Church and Empire, Baldwin also sided with Louis, and for this reason did not receive the papal approbation when the Cathedral Chapter of Mainz postulated him as successor to Aichspalter (who d. 5 June, 1320). Upon the death, in 1328, of Matthias, whom the pope had appointed Archbishop of Mainz, to succeed Aichspalter, Baldwin was again postulated as archbishop by the Cathedral Chapter of Mainz, took possession of the archdiocese, and administered it nearly nine years (1328-37), despite the protests of the pope, who had appointed Henry Virneburg to the position. On the 16th of July, 1338, he took an important part in the meeting of the imperial electors at Rense, near Coblenz, where they protested against all papal interference in the election of the emperors and decided that the emperor elected by them could exercise his imperial authority without the approbation of the pope. When Clement VI renewed the excommunication of Louis the Bavarian, and there was hope that Charles IV, a grandnephew of Baldwin, would receive the imperial crown, Baldwin finally abandoned the Bavarian and at a meeting at Rense (11 July, 1346) prevailed upon the other electors to declare Louis deposed and elect Charles IV emperor. Baldwin crowned the new emperor at Aachen, 26 July, 1349.

Within his own diocese Baldwin successfully fought against the many robber-barons who at that time infested Europe. He destroyed their strongholds and forced the barons to submit to the laws or leave his domain. He promoted commerce by erecting the bridge which still spans the River Moselle at Coblenz. Numerous churches in various parts of the diocese were built by him, and many wholesome decrees were passed at the synods which he convoked. But Baldwin, the bishop, dwindles beside Baldwin, the soldier and statesman. During the forty-six years of his reign (1308-54) the destinies of the German Empire were largely guided by the powerful hands of this prelate-prince. He was a shrewd diplomat and a brave soldier, but above all he was a member of the house of Luxemburg, and its aggrandizement was the mainspring of his political activities. The Avignonese popes, John XXII and Clement VI, may have set up unjust claims in regard to the imperial office, but there is no justification for Baldwin's siding with Louis the Bavarian even after that emperor was deservedly excommunicated. There may have been palliating circumstances as to his administration of the Archdiocese of Mainz in opposition to the pope's command, but, as a subject of the pope, he should have submitted. He was the author of the so-called "Balduineum", a collection of documents relating to the possessions and privileges of Trier, together with a series of pictures bearing on Henry's expedition to Rome, which was republished at Berlin in 1881. His remains lie in the Cathedral of Trier.

MICHAEL OTT.

**Baldwin** (also BAUDOUIN), FRANCIS, a celebrated jurist, b. 1 January, 1520 at Arras, then part of the German Empire; d. 24 October, 1573, at Paris. He was sent in his early youth to Louvain, where he studied jurisprudence with great success. At the end of his studies he came to the court of the Emperor

Charles V (1519-56) at Brussels. He subsequently travelled extensively, appearing at Paris and Geneva several times and teaching successively at Bourges (1549-56), Strasburg, Heidelberg, Douai, Paris, and Angers. The assertion of his sevenfold change of religion from Catholicism to Calvinism and from Calvinism to Catholicism cannot be substantiated. But it is certain that, in the earlier part of his life, he exhibited toward the Calvinistic system a friendliness incompatible with sound Catholic convictions. This attitude for some time recommended him to princes for the settlement of religious questions interesting both Catholics and Protestants. His attachment to the Faith gradually grew stronger, however, and beginning with the year 1560, he made a serious study of ecclesiastical questions, successfully defending the Catholic religion against Calvin. He died a devout Catholic in the arms of the celebrated Spanish Jesuit, Maldonatus.

Baldwin was a very prolific writer on juridical and ecclesiastical topics. Among his works are: "Constantinus Magnus" (Basle, 1556; Strasburg, 1612); "Minucii Felicis Octavius" (Heidelberg, 1560). He is the first to ascribe the "Octavius" to Minucius Felix; "S. Optati Libri Sex de Schismate Donatistarum" (Paris, 1563); "Discours sur le fait de la Réforme" (Paris, 1564).

N. A. WEBER.

**Baldwin of Canterbury**, thirty-ninth Archbishop, a native of Exeter, date of birth unknown; d. 19 Nov., 1190. He was ordained priest and made archdeacon by Bartholomew, Bishop of Exeter. He subsequently became a Cistercian monk at the Abbey of Ford, in Devonshire, and within a year was made Abbot of Ford. In 1180 he was promoted to the Bishopric of Worcester and in the same year was elected to the primatial see by the bishops of the province. The election was disputed by the monks of Canterbury, who chose first the Abbot of Battle, then Theobald, Cardinal-Bishop of Ostia. King Henry II interfered. Baldwin, who, according to Gervase, refused to accept the archbishopric unless he was elected by the monks, was installed, and an arrangement was entered into by which, in the future, the bishops' elections were to be disallowed. He was several times engaged in disputes with the Canterbury monks, necessitating the further interference of King Richard and of the Holy See. The prior, Norreys, whom he had nominated, was deposed; but his right to appoint the priors was acknowledged.

Baldwin acted as legate in Wales, where he held a visitation in 1187, and in 1188 preached the Crusade, after having himself taken the cross on hearing the news of the loss of Jerusalem. In 1190 he set out for the Holy Land, in company with Hubert, Bishop of Salisbury, and others, providing at his own costs two hundred knights and three hundred retainers. While there he acted as viceroy of the patriarch. Giraldus Cambrensis describes him as gentle, kindly disposed, learned, and religious. He died during the siege of Acre, leaving all he possessed for the relief of the Holy Land and naming Bishop Hubert as his executor. His works (to be found in the "Bibliotheca Patrum Cisterciensium", V) are "De Commendatione Fidei"; "De Sacramento Altaris". There are also some discourses and a penitential in MS. preserved in the Lambeth Library.

FRANCIS AVELING.

**Balearic Isles**, a group in the western part of the Mediterranean belonging to Spain and consist-

ing of four larger islands, Majorca, Minorca, Iviza, and Formentera, and eleven smaller islands of rocky formation. Politically they form the Balearic province, and on 31 December, 1900, had an area of 1936 square miles and a population of 311,649, almost exclusively Catholic. The capital is Palma. The original inhabitants of these islands were of Iberian stock, and were famous in antiquity as slingers. In the seventh century B. C. they were subjugated by the Carthaginians; in 206 B. C., the city of Mahon was built by Hannibal's brother Mago and called after his name. In 123-122 B. C., the Roman consul Quintus Cæcilius Metellus conquered the islands and founded the cities of Palma and Pollentia. The Romans were succeeded in the sovereignty of the islands by the Vandals (426) under Genseric as leader; during the reign of Justinian they were subject to Byzantine authority. Charlemagne incorporated them for a while with the Frankish empire, but in 798 they fell into the hands of the Arabs. About 1230 James I (Jaime) of Aragon gained possession of the islands and conferred the sovereignty on his third son, who transmitted it to his descendants; from 1276 to 1343 they formed the independent kingdom of Majorca, a secundo geniture of Aragon, at the latter date being reunited to the Crown. In the war of the Spanish Succession Minorca was occupied by the English (1708) and remained, with the exception of a brief interval (1756-63), in their possession until by the Peace of Versailles (1763) the islands were ceded back to Spain.

Christianity reached the Balearic Isles almost as soon as the Spanish mainland. As early as the fourth century mention is made of Bishops of Minorca and in the fifth century of Bishops of Majorca and Iviza. During the period of Arabian rule these sees were suppressed, and the islands were placed under the Bishop of Barcelona. After the expulsion of the Moors a see was re-established on the island of Majorca (1237), in direct dependence on the Holy See, and in 1238 Raymund de Torella was made first bishop. The diocese, which has been ruled by fifty-two bishops up to the present time, was made subject to the Archbishop of Valencia in 1492; in 1782 Iviza, and in 1795 Minorca were erected into separate sees. In 1851 Iviza was reunited with Majorca. The Balearic Isles are at present divided into two dioceses subject to the ecclesiastical province of Valencia: Majorca and Iviza (*Diæcesis Majoricensis et Ibusensis*), with Palma as the see, and Minorca (*Diæcesis Minoricensis*), with Ciudadela as the see.

The Diocese of Majorca, exclusive of Iviza, embraces the islands of Majorca, Cabrera, and Colubraria; in 1906 it contained a population of 262,000, divided into 8 archipresbyterates, 39 parishes and (at the beginning of 1907) 47 mission churches; 704 priests, including 60 who are not residing in the diocese; 318 churches and oratories. The cathedral chapter consists of 5 prebendaries, 4 officials, and 7 canons. The training of young men for the priesthood is provided for in the *seminario conciliar* in Palma which has 12 professors and 145 students. In 1907 the diocese contained 33 houses of religious orders conducted by 13 religious congregations of men: Jesuits 1; Capuchins 1; Hermits of St. Augustine 1; Mercedarians 1; Tertiaries regular of St. Francis 3; Mission Priests of St. Vincent de Paul 1; Oratorians of St. Philip Neri 2; Brothers of the Christian Schools 4; Redemptorists 5; Missionaries of the Most Sacred Hearts 4; Carmelites 2; Hermits of Sts. Paul and Anthony 4; Brothers of Mercy 4; and 149 foundations conducted by twenty-five orders and congregations of women: Poor Clares, Dominicans, Hieronymites, Carmelites, Augustinians, Sisters of Mercy, Little Sisters of the Poor, Sorores de Patrocinio, etc. Among the churches the most important is the cathedral at Palma called La Leo, an enormous edifice built in

Gothic style, begun during the reign of James I and not completed until 1601; in 1905 the cathedral was raised to the rank of a minor basilica. The most frequented places of pilgrimage are the shrines of San Salvador, Nostra Señora de Lluch, and the Santuario del Puig de Pollença.

The Diocese of Iviza nominally united with Majorca, but in reality ruled by its own vicar-capitular, contains 26,000 Catholics, 22 parishes, 26 churches and chapels, about 50 priests, and 1 seminary.

The Diocese of Minorca embraces the island of that name and contains 40,000 Catholics, 23 parishes, 80 churches and chapels, about 102 secular and 6 regular priests, an episcopal seminary, at Ciudadela, an Instituto de segunda enseñanza at Mahon, 35 primary schools, 3 benevolent institutions conducted by the Sisters of Mercy, viz: a hospital and a founding asylum at Mahon, and a founding asylum at Ciudadela. The cathedral was built in 1287 on the site of a mosque, and having been partially destroyed in 1628, was restored in 1719. In 1795 it was raised to the rank of a cathedral.

JOSEPH LINS.

**Bales** (or **Bayles**, *alias* **Evers**), CHRISTOPHER, VENERABLE, priest and martyr, b. at Coniscliffe near Darlington, County Durham, England, about 1564; executed 4 March, 1590. He entered the English College at Rome, 1 October, 1583, but owing to ill-health was sent to the College at Reims, where he was ordained 28 March, 1587. Sent to England 2 November, 1588, he was soon arrested, racked, and tortured by Topcliffe, and hung up by the hands for twenty-four hours at a time; he bore all most patiently. At length he was tried and condemned for high treason, on the charge of having been ordained beyond seas and coming to England to exercise his office. He asked Judge Anderson whether St. Augustine, Apostle of the English, was also a traitor. The judge said no, but that the act had since been made treason by law. He suffered 4 March, 1590, "about Easter", in Fleet Street opposite Fetter Lane. On the gibbet was set a placard: "For treason and favouring foreign invasion". He spoke to the people from the ladder, showing them that his only "treason" was his priesthood. On the same day Venerable Nicholas Horner suffered in Smithfield for having made Bales a jerk, and Venerable Alexander Blake in Gray's Inn Lane for lodging him in his house.

BEDE CAMM.

**Ball**, MOTHER FRANCES MARY TERESA, b. in Dublin 9 January, 1794; d. 19 May, 1861; foundress of the Irish Branch of the Institute of the Blessed Virgin Mary (see INSTITUTE OF MARY, IRISH). She was a daughter of John Ball and Mabel Clare Bennet. At the age of nine years, Frances was sent to the convent school at the Bar, York, England, conducted by the English Ladies of the Institute of the Blessed Virgin Mary. She remained here until the death of her father, in 1808, and then spent some time with her mother at home. In 1814, under the direction of Dr. Daniel Murray, Archbishop of Dublin, Frances returned to York and entered the novitiate of the Institute of the Blessed Virgin Mary. There she received her religious training, and made her profession in 1816, taking, in religion, the name of Mary Teresa. Recalled by Archbishop Murray, she re-

turned to Dublin with two novices, in 1821, to establish the Irish Branch of the Institute of the Blessed Virgin Mary for the instruction of children. In 1822 she opened the first institution of the order in Ireland, in Rathfarnham House, four miles from Dublin. Mother Frances was a woman of great piety and administrative ability. Her energies were devoted to the establishment of schools and to the development of the sisterhood which now has members in many countries.

COLERIDGE, *The Life of Mother Frances Mary Teresa Ball* (London, 1881).

EDWIN DRURY.

**Ballarat**, DIOCESE OF, one of the three suffragan dioceses of the ecclesiastical province of Melbourne, Australia. It comprises that part of the State of Victoria which is bounded on the east by the 144th meridian E. longitude, thence by the Loddon to the River Murray; on the north by the River Murray; on the west by South Australia; and on the south by the Southern Ocean.

**HISTORY**.—Victoria (known till 1851 as the Port Phillip District of New South Wales) was first permanently colonized in 1835. The rich pastures of the Ballarat district were occupied in 1838. For thirteen years thereafter the site of Ballarat was a picturesque pastoral scene. In 1851 the Port Phillip District was formed into a separate colony under the name of Victoria. It was a period of severe commercial depression, and many of the colonists prepared to set out for the newly discovered goldfields of Ophir, in New South Wales. On 29 June, 1851, the first profitable goldfield in Victoria was discovered at Clunes by James W. Esmond, an Irish Catholic miner, who had been on the Sacramento in '49. The hopes of the colonists rose; ebbled again as Clunes proved a passing disappointment; then came in with a rush when, in August, rich gold was struck at Ballarat. Many of the little eight-feet-square claims were marvellously rich, lined with "jewellers' shops" and "pockets" of gold. Ballarat became at a bound the richest goldfield in the world, and forty thousand people were soon encamped upon it. Rich fields were discovered in quick succession at Mount Alexander, Bendigo, and other places. Victoria became the modern Transylvania; there ensued a great rush of population to her shores; and she became, and long remained, the most populous of the Australian colonies. At Ballarat, through the lost battle of the Eureka Stockade the insurgent miners of 1854 ultimately won a victory over the exasperating old system of mining licences and "digger hunts".

Bishop Goold of Melbourne made strenuous efforts to cope with the conditions created by the sudden expansion of population. The first priest appointed to Ballarat was the Rev. Patrick Dunne, most of whose flock in Coburg had stampeded to the goldfields. Father Dunne lived in a calico hut, slept on a slab of gumtree bark, and had for his first church a canvas tent. For some years afterwards a few priests attended to the spiritual wants of what now comprises the Diocese of Ballarat. It was formed in 1874 out of the See of Melbourne. Its first bishop was the Right Rev. Michael O'Connor, a Dublin priest. He was consecrated in Rome on the 7th May, 1874, and was enthroned in his cathedral at Ballarat on the 20th December of the same year. He introduced the Christian Brothers, the Sisters of Mercy, and the Loreto nuns, and after a fruitful episcopate died on the 14th February, 1883. His successor was the Right Rev. James Moore, consecrated 27 April, 1884. Dr. Moore opened the successful boys' college at Ballarat, and introduced the Redemptorist Fathers and the Sisters of Nazareth, of St. Joseph, and of St. Brigid. He was skilled in finance, was a builder with big ideas, and at his death, 26th June, 1904, left Ballarat one of the best equipped dioceses in Aus-

traliasia. He was succeeded by the Right Rev. Joseph Higgins, who was translated from the See of Rockhampton on the 3rd of March, 1905. He made mission- and school-extension the chief work of his episcopate. The Sisters of St. Joseph of Cluny were introduced; convents, primary and high schools, and churches (over twenty in two years to March, 1907) erected; and many new missions organized. Much of the work summarized here has been carried out in the once drought-scourged, but now prosperous, Mallee country; and remote Mildura, the Ultima Thule of the diocese, has now a resident priest, a convent of the Sisters of Mercy, and a parish school with a daily attendance of 130 pupils.

**RELIGIOUS STATISTICS**.—In March, 1907, there were: parochial districts, 29; churches, 145; secular priests, 62; regular priests, 10; religious brothers, 17; nuns, 230; convents, 18; college (boys), 1; superior day schools (boys) 2; boarding schools (girls), 10; superior day schools (girls), 9; primary schools, 57; home for aged poor, 1; orphanage, 1; children in Catholic schools, 4,900; Catholic population, 59,488.

HENRY W. CLEARY.

**Ballerini**, GIROLAMO and PIETRO, celebrated theologians and canonists, the sons of a distinguished surgeon of Verona. A rare intellectual sympathy bound these brothers together and led them to assist each other in the preparation and composition of their many works. GIROLAMO was born at Verona 29 January, 1702, and died 23 April, 1781. After finishing his course in the Jesuit college of his native city he entered the seminary and was ordained a secular priest. In the pursuit of his favourite historical studies he soon came to appreciate the valuable labours of the learned Cardinal Noris, also of Verona, and brought out (1729-33) a complete edition of his works. The scholarship of the editors is best seen in the fourth volume, especially in their dissertations against Garnerius, and in their study of the early days of the Patriarchate of Aquileia. They also published (1733) an edition of the writings of Matteo Giberti Bishop of Verona, and in 1739 a critical edition of the sermons of St. Zeno of Verona.

PIETRO, b. 7 September, 1698; d. 28 March, 1769, after completing his studies both at college and the seminary was chosen principal of a classical school in Verona. Here he began his long and notable literary career in 1724, when he prepared for his pupils a treatise on the method of study taught and followed by St. Augustine. Some passages in this work gave serious offence to the school of absolute Probabilists, and for some years Pietro was engaged in a lively dispute with them, defending his principles of Probabiliorism in three volumes. Shortly afterwards he turned his attention to the much debated question of usury, and threw his influence against the claims of the Laxists. To sustain his argument in this controversy he prepared (1740) an edition of the "Summa" of St. Antoninus which he sent to Pope Benedict XIV, and also (1774) one of the "Summa" of St. Raymond of Pennafort. During this same year he published "La Dottrina della Chiesa Cattolica circa l'usura", in which he condemned all forms of usury. This exceptional literary activity made the name of the Ballerini brothers famous throughout Italy, and in 1748 Peter was chosen by the senate of Venice to serve as its canonist in Rome in a dispute over the Patriarchate of Aquileia. His conspicuous talent on this mission attracted the attention of Pope Benedict XIV, who commissioned him to prepare an edition of St. Leo's works in refutation of the defective one published by Quesnel.

After almost nine years of labour in which he enjoyed free access to all the libraries of Rome, Pietro brought out his monumental work in three volumes (Rome, 1753-57) reproducing the entire edition of Quesnel together with elaborate refutations and additions (Migne, P. L., LIV-LVI). The third volume is a profound study of the sources of canon law. Quesnel had published a collection of canons from a codex which he believed to have been in use under Popes Innocent I, Zozimus, and Leo the Great. Besides disproving this, Pietro brought out in an improved form earlier Latin editions of the canons, together with some very old unknown versions of Greek canons. He also published two valuable works (against Febronius) on papal power, "*De vi ac ratione Primatus Romanorum Pontificum*" (Verona, 1766), and "*De potestate ecclesiastica Summorum Pontificum et Conciliorum generalium*" (Verona, 1765).

MAZZUCHELLI, *Gli scrittori d'Italia* (Brescia, 1753-63), II, part I, 178; FABRONI, *Vite Italianorum doctrina excellentium* (Pisa, 1778-1805), XVIII, 109.

LEO F. O'NEIL.

**Ballina**, DIOCESE OF. See KILLALA.

**Balliol**, JOHN. See OXFORD.

**Ballon**, LOUISE BLANCHE. See SISTERS OF PROVIDENCE AND REFORMED BERNARDINES.

**Balme** (BALMA), HENRY (also called HUGH) a Franciscan theologian, born at Geneva, date uncertain; d. 23 February, 1439. He entered the Order of Friars Minor in the province of Burgundy. He was a man of exceptional worth according to the testimony of St. Colette, whose confessor he was. Possessing an intimate knowledge of his penitent's life, he wrote a brief account of her marvellous gifts. The saint, however, on hearing of its existence, caused it to be destroyed. Among his other writings is one on "*Theologia Mystica*" which was attributed to St. Bonaventure and is to be found in many editions of the latter's works, but the editors of the latest edition (Quaracchi, 1898, Vol. VIII, p. cxi), following Sbaralea, have restored it to its rightful owner.

ANDREW EGAN.

**Balmes**, JAIME LUCIANO, philosopher and publicist, b. at Vich, Spain, 28 August, 1810; d. there, 9 July, 1848. His parents enriched him with no material wealth, but he owed to them a firm, well-balanced temperament, a thorough education, and,

JAIME LUCIANO BALMES

probably to his father, a marvellous memory. If to these endowments we add a penetrating intellect, an instinctive sense of right method, an absorbing passion for knowledge, an unflinching though noble ambition, an indomitable determination, a pure life—wherein no unruly sensuousness seems to have ever beclouded the spirit—and abundant opportunities for mental development, we may be prepared to accept even what looks so much like an extravagance on the part of his biographers, that with his sixteenth year, having passed through the schools of Vich, he had completed the seminary course, including philosophy and elementary theology. The next stage of his education was completed at the University of Cervera, where after seven years he received his licentiate in 1833. Later on, he

stood for the dignity of *Magistral* of Vich, contesting for the position with his former teacher, Dr. Soler. Returning to Cervera after his ordination to the priesthood he held a position as an assistant professor and pursued the study of civil and canon law. He shortly afterwards received the doctorate *in pompa*. In 1834 he went back to his native place where he devoted himself with his wonted ardour to physics and mathematics, and accepting a position as professor in the latter branch, varied the onerous duties of this position by cultivating the classics and writing poems. The latter, though not of a very high order of merit, served to extend his reputation to the capital. He wrote for the "*Madrialeño Católico*" a prize essay on "*Clerical Celibacy*" which was so favourably received by the public that he was encouraged to send forth a small book, entitled "*Observaciones sociales, políticas, y económicas sobre los bienes del clero*" (1840), which won for him national distinction, the essay arousing special interest in the Cortes. Soon afterwards he wrote "*Consideraciones sobre la situación en España*", directed mainly against Espartero, then at the zenith of his power. It was a bold deed and might easily have been fatal to Balmes.

This was followed by a translation, with Spanish introduction, of the maxims of St. Francis de Sales (1840). He was now far advanced in his "*Protestantism Compared with Catholicism*" but suspended the work for fifteen days to compose "*La Religión demostrado al alcance de los niños*" a work of advanced instruction for children which rapidly spread throughout Spain and Spanish America and was translated into English. Elected a member of the Academy of Barcelona (1841), he wrote his inaugural dissertation on "*Originality*", an essay which exemplifies the predominant trait of its author's mind. Having completed his reply to Guizot's "*Civilization in Europe*", he published it at Barcelona (1844) under the title "*El Protestantismo comparado con el Catolicismo en sus relaciones con la civilización Europea*". The work was at once translated into French and subsequently into Italian, German, and English, and extended the fame of Balmes throughout the world. This work, which for its wealth of fact and critical insight would alone have taxed the resources of a longer life than that which was allotted to Balmes, left to its author time and energy adequate to accomplish tasks of hardly less magnitude and significance. During the bombardment of Barcelona by Espartero, Balmes, going away unwillingly with his friends, took refuge in a country house with no other books than his breviary, "*The Imitation*", and the Bible, and while the cannon roared in his ears the philosopher, repeating the experience of Archimedes at the siege of Syracuse, composed the "*El Criterio*" (The Criterion, New York, 1875; The Art of Thinking, Dublin, 1882), a thoroughly practical guide on method in the pursuit of knowledge. It seems incredible that the work could have been produced as it was within a month. Shortly after Balmes became associated with two friends, Roca y Cornet and Ferrer y Subirana, in editing "*La Civilización*", a widely influential review wherein appeared one of his most powerful, because sympathetic, papers—that on O'Connell. In 1843 Balmes withdrew from the editorship to found in Barcelona a review of his own, "*La Sociedad*". It contained a mass of important papers meeting the social, political, and religious exigencies of the time. "*La Sociedad*" was reprinted at Barcelona in 1851. It was through its pages that the greater part of a notable work, subsequently completed by the author, was issued—"*Cartas á un eséptico* (Letters to a Sceptic, Dublin, 1875).

About the date of the appearance of "*El Protes-*

tantismo" (1844) Balmes was called to Madrid where he established a newspaper "El Pensamiento de la Nación" in the interests of politics and religion. Its special purpose was the advocacy of the marriage of Isabella II with the eldest son of Don Carlos, a union which appeared to Balmes to offer the most effectual solution of the existing political problems of Spain. He even accepted a mission to Don Carlos and succeeded in persuading the latter to renounce his title of king in favour of the Count of Montemolin. Unfortunately, the plan which might have spared his country many misfortunes failed through French interference. Balmes, seeing his cherished design come to naught when Isabella married her cousin Don Francisco de Assisi, suspended the publication of "El Pensamiento" notwithstanding the remonstrance of friend and foe, for the journal had, through the impress of his mind and character and literary power, come to mark an epoch in the history of the Spanish press. Balmes now retired from the political arena to devote the closing years of a life all too short to the publication of his philosophical writings. In May, 1845, he visited France, Belgium, and England, a journey of which there are few details recorded save that he was fêted in Paris, where he also met Chateaubriand, and in Brussels, and Mechlin. Returning to Madrid, he repaired thence to Barcelona where he issued in 1846 his "Filosofía fundamental" (this was translated into English by Henry F. Brownson, with an introduction by his father Dr. Orestes A. Brownson (New York, 1864). It is an exposition of the philosophy of St. Thomas in view of the intellectual conditions of the nineteenth century. His biographer, Dr. Soler, speaks of this work as one "which, from the stupendous variety of knowledge which it manifests and the richness of its mental treasures, appears a collection of libraries, a mine of science, for there is no faculty foreign to the vast comprehension of its author". Allowing for some extravagance in this fervid eulogy, no reader competent to judge can fail to recognize the breadth, depth, and practical timeliness of the "Fundamental Philosophy".

From Barcelona he returned to his native place, where he composed his "Filosofía elemental" (Madrid, 1847), a compendium that became widely used in the schools and which was also translated into English. In 1847 he wrote his pamphlet "Pío Nono" wherein he defends the liberal policy of Pius IX, at the opening of his pontificate, when that pope gave a universal amnesty and adopted constitutional government. Though perhaps the best written of all Balmes's works, it was unfavourably received, was bitterly attacked by his enemies, and regretted by most of his friends. The pain inflicted on his sensitive spirit by the unjust aspersions and insidious innuendoes of his opponents preyed upon his constitution which, never robust, had been severely taxed by incessant labours. He retired once more to Barcelona dividing there his time between linguistic studies, his inaugural discourse for the Royal Spanish Academy, to which he had been admitted, and the Latin translation of his "Elementary Philosophy", undertaken at the request of Archbishop Affre of Paris. He returned to his native Vich, May, 1848, where his health steadily declined till the end came on the 9th of July following. Balmes is described as of more than medium stature, slight of frame though well-developed; his face was pale but delicately tinged; his eye penetrating; his aspect agreeable and naturally majestic. His temperament combined the better elements of the traditional four. He was moderate in all lines of conduct, except probably in study and intellectual work, which he seems to have carried at times to a passionate excess. His thoughts and expression were so copious and so close to his call that he could

easily dictate to two secretaries on any subject he might take in hand. Exact and methodical in his relations to God, he was no less conscientious in his duties towards his neighbour. Unostentatiously charitable to the poor, he was unaffectedly kind and affable, though somewhat reserved, in all social converse. A strong soul in a sensitive organism, his intellectual life absorbed and spiritualized the physical.

Balmes has a universally admitted place of honour amongst the greatest philosophers of modern times. He knew the reflective thought of his day and of the past. The systems of Germany, from Kant to Hegel, he studied carefully and criticized judiciously. The scholastics, especially St. Thomas, were familiar to him. He meditated on them profoundly and adopted most of their teaching, but passed it through his own mental processes and turned it out cast in the mould of his own genius. Descartes, Leibnitz, and especially the Scottish school, notably Jouvigny, had considerable influence on the method and matter of his thought, which is characterized consequently by a just eclecticism. He deemed it a danger to take lightly the opinions of any great mind, since, as he said, even if they did not reflect complete reality, they rarely were devoid of strong grounds and at least some measure of truth. Balmes was, therefore, one of the most influential causes in reviving sound philosophy in Spain and indeed throughout Europe generally during the second quarter of the nineteenth century—an influence that continues still through his permanent works. Certain indeed of his theories are open to criticism. He perhaps accords too much to an intellectual instinct, a theory of the Scottish school, and too little to objective evidence in the perception of truth. In psychology he rejects the *intellectus agens* (the abstractive intellect) and the *species intelligibiles* (intermediary presentations), and he holds the principle of life in brutes to be naturally imperishable.

These, however, are but accidental and relatively unimportant divergencies from the permanent body of the traditional philosophy—the system which receives in his "Filosofía fundamental" a fresh interpretation and a further development in answer to the intellectual conditions of his day; for it was an habitual conviction with Balmes that the philosopher's business is not merely to rethink and restate but to reshape and develop. While the book just mentioned reflects the speculative aspect of its author's mind, the work that most fully manifests his personality, his mental, moral, and religious character, and his social and political ideals, together with the range and accuracy of his learning—the work, therefore, that is likeliest to endure—is "El Protestantismo comparado". Though conceived originally as a reply to Guizot's "History of Civilization", it is much more than a critique or a polemic. It is really a philosophy of history—or rather of Christianity—combining profound insight and critical analysis with wide erudition. It searches for the basal principles of Catholicism and of Protestantism, and summons the evidence of history concerning the comparative influence exercised by the former and the latter in the various spheres of human life—intellectual, moral, social, and political. The side on which the author's sympathies lie is frankly indicated by him, while he appeals to the historical data in justification. It should be read in the Spanish to be fully estimated; for the English translation, done through a French medium, though accurate and scholarly, can hardly be expected to reflect all the light of the original.

For the rest, the general position of Balmes among his countrymen may be summed up in the words of one of the leading Spanish journals, "El Heraldo", at the time of his death. "Balmes ap-

peared, like Chateaubriand; on the last day of the revolution of his country to demand from it an account of its excesses, and to claim for ancient institutions their forgotten rights. Both mounted on the wings of genius to a height so elevated above the passions of party that all entertained respect and veneration for them. One and the other brought such glory to their country that, though they combated generally prevailing opinions and prejudices, all good citizens wove for them well-earned crowns and loved them with enthusiasm." Besides the works mentioned above, a collection of fragments and unpublished pieces were issued after his death under the title "Escritos póstumos" (Barcelona, 1850); also "Poesías póstumas" (ib.), and "Escritos políticos" (ib.).

F. P. SIEGFRIED.

**Balsam**, an oily, resinous, and odorous substance, which flows spontaneously or by incision from certain plants, and which the Church mixes with olive oil for use as chrism. Balsams are very widely distributed throughout the plant kingdom, being particularly abundant in the pine family, but the name is generally restricted in the present day to resins which in addition to a volatile oil contain benzoic and cinnamic acid. Among the true balsams are the Balm of Gilead, or Mecca, which is cultivated in Arabia, Egypt, Syria, etc., and is extremely costly; the copaiba balsam, and those of Peru and Tolu—all three found chiefly in South America. The term *balsam*, however, is also applied to many pharmaceutical preparations and resinous substances which possess a balsamic odour.

The practice of the Church of using balsam, as mentioned above, is very ancient, going back possibly to Apostolic times. (See CHRISM.) The scarcity and high price of other perfumes has obliged the Latin Church to be content with balm alone in the mixture of holy chrism; but in the East, where the climate is more favourable than ours to the growth of these plants, the Church uses no less than thirty-six species of precious perfumes, according to the Eucharistion, in the oil, which makes it an ointment of exquisite fragrance. The Latin Church does not insist on the quantity or the quality of the balsam to be used; any substance commonly known as a balsam may be utilized, and such a quantity as will give its odour to the oil is sufficient. This mingling of the balsam with the oil is intended to convey, by outward sign, the good odour of Christ, of whom it is written (Cantic., i, 3): "We will run after thee to the odour of thy ointments." It typifies also the odour of good works, the thought which ought to inspire those who worthily receive the sacraments; and it symbolizes an innocent life and the gifts of the Holy Spirit.

The balsam is blessed by the bishop at the Mass which he solemnly celebrates on Holy Thursday and is poured into the oil after he has administered Holy Communion to the faithful. The cruet of balsam is brought by a subdeacon to the assistant priest, who in turn places it on a table in the sanctuary before the bishop. The latter blesses the balsam, reciting over it the three prayers found in the Roman Pontifical: he calls it the fragrant tear of dry bark—the oozing of a favoured branch that gives us the priestly unction. Later he mixes the balsam with a little oil on a paten and pours it into the chrism with a suitable invocation: "May this mixture of liquors be to those who shall be anointed with it, a propitiation and a salutary protection for ever and ever. Amen."

In the early ages the pope, without using any form, as appears from the Roman *Ordines*, poured the balsam into the oil, while still in the sacristy before Mass (Ordo Romanus, X, n. 3; P. L., LXXXVIII, 1010), but the blessing took place after the Communion of the pope, and before that of the clergy and the faithful (Duchesne, *Christian Worship*, 2d Eng. ed., 305, 306, 467). According to the Gregorian Sacramentary (Muratori, ed., P. L., LXXXVIII, 330), however, the pope mixes the balsam and oil during the Mass. In the Church of Soissons in France, at one time, the "Veni Creator" was sung before the mingling of the balsam and oil.

**Balsamon**, THEODORE, a canonist of the Greek Church, b. in the second half of the twelfth century at Constantinople; d. there, after 1195 (Petit). He was a deacon, nomophylax, or guardian of the Laws, and from 1178 to 1183, under the Patriarch Theodosius, he had charge of all ecclesiastical trials or cases. In 1193 he became Greek Patriarch of Antioch. Balsamon's best work is his "Scholia", or commentary on the "Nomocanon" of Photius, published first in Latin at Paris (1561), at Basle (1562); in Greek and Latin at Paris (1615), and again at Basle (1620). It is also found in Beveridge's "Pandecta Canonum", Oxford, 1672 (P. G., cxxxviii). From 1852 to 1860, Rhalli and Potli published at Athens a collection of the sources of Greek canon law which contains Balsamon's commentary. In his "Scholia" Balsamon insists on existing laws, and dwells on the relation between canons and laws—ecclesiastical and civil constitutions—giving precedence to the former. Balsamon also compiled a collection of ecclesiastical constitutions and wrote other works, in all of which is apparent his animosity towards the Roman Church. Two of his letters were published: one treating of fasting, the other on the admission of novices into monasteries.

ANDREW B. MEEHAN.

**Baltasar**, or as found in the Septuagint Βαλτασαδρ, is the Greek and Latin name for Belshazzar, בֶּלְשַׁצְצָר, which is the Hebrew equivalent for *Bel-sarra-usur*, i. e. "May Bel protect the king". Bel was the chief and titular god of Babylon. In Daniel, v, Baltasar is described as the son of Nabuchodonosor (A. V., Nebuchadnezzar) and the last King of Babylon. It is there narrated how the town was invaded—by the Medes under Darius, as would seem from Dan., v, 28, 29—whilst the king was giving a sumptuous feast to his nobles. The king himself was slain. The narrator further informs us that the sacred vessels which Nabuchodonosor had carried with him from Jerusalem were defiled on that occasion. By order of King Baltasar they were used during the banquet, and his wives and concubines drank out of them. In the midst of the revelry a hand is seen writing on the wall the mysterious words *Mane, Thecel, Phares* (A. V., *Mene, Tekel, Peres*). The king's counsellors and magicians are summoned to explain the writing, but they fail to do so. The Queen then enters the banquet hall and suggests that Daniel should be called for. Daniel reads and explains the words: the days of the kingdom had been numbered; the king had been weighed in the balance and had been found wanting; his kingdom would be given to the Medes and the Persians.

In the account given by Herodotus of the capture of Babylon by the Persians under Cyrus, Labynitus II, son of Labynitus I and Nicotris, is named as the last King of Babylon. Labynitus is commonly held to be a corruption of Nabonidus. Herodotus further mentions that Cyrus, after laying siege to the town,

entered it by the bed of the Euphrates, having drained off its waters, and that the capture took place whilst the Babylonians were feasting (Herod., I, 188-191). Xenophon also mentions the siege, the draining of the Euphrates, and the feast. He does not state the name of the king, but fastens on him the epithet "impious", ἀσέβης. According to him, the king made a brave stand, defending himself with his sword, but was overpowered and slain by Gobryas and Gadatas, the two generals of Cyrus (Cyrop., vii, 5). The Chaldean priest Berosus names Nabonidus as the last King of Babylon and says that the city was taken in the seventeenth year of his reign. We are further informed by him that Nabonidus went forth at the head of an army to oppose Cyrus, that he gave battle, lost, and fled to Borsippa. In this town he was besieged and forced to surrender. His life was spared, and an abode assigned to him in Karmania. (Prof. C. P. Tiele, *Babylonisch-Assyrische Gesch.*, 479; Euseb., *Præp. Ev.*, ix, 41; Idem, *Chron.*, i, 10, 3.) Josephus follows the Biblical account. He remarks that Baltasar was called by the Babylonians Naboandelus, evidently a corruption of Nabonidus, and calls the queen, grandmother (ἡ μάμμη) of the king. He adheres to the Septuagint rendering in making the reward held out to Daniel to have been a third portion of the kingdom instead of the title, third ruler in the kingdom. Rabbinical tradition has preserved nothing of historical value.

The cuneiform inscriptions have thrown a new light on the person of Baltasar and the capture of Babylon. There is in the first place the inscription of Nabonidus containing a prayer for his son: "And as for Bel-sarra-usur my eldest son, the offspring of my body, the awe of thy great divinity fix thou firmly in his heart that he may never fall into sin" (Records of the Past, V, 148). It is commonly admitted that Bel-sarra-usur is the same as Belshazzar, or Baltasar. Dr. Strassmaier has published three inscriptions which mention certain business transactions of Bel-sarra-usur. They are the leasing of a house, the purchase of wool, and the loan of a sum of money. They are dated respectively the fifth, eleventh, and twelfth year of Nabonidus. Of greater importance is the analytical tablet on which is engraved an inscription by Cyrus summarizing the more memorable events of the reign of Nabonidus and the causes leading up to the conquest of Babylon. The first portion of the tablet states that in the sixth year of Nabonidus, Astyages (Istuvegu) was defeated by Cyrus, and that from the seventh till the eleventh year Nabonidus resided in Tema (a western suburb of Babylon) whilst the king's son was with the army in Accad, or Northern Babylonia. After this a lacuna occurs, owing to the tablet being broken. In the second portion of the inscription we find Nabonidus himself at the head of his army in Accad near Sippar. The events narrated occur in the seventeenth, or last, year of the king's reign.—"In the month of Tammuz [June] Cyrus gave battle to the army of Accad. The men of Accad broke into revolt. On the 14th day the garrison of Sippar was taken without fighting. Nabonidus flies. On the 16th day Gobryas the governor of Gutium [Kurdistan] and the army of Cyrus entered Babylon without a battle. Afterwards he takes Nabonidus and puts him into fetters in Babylon. On the 3rd day of Marchesvan [October] Cyrus entered Babylon" (Sayce, *Fresh Light from the Ancient Monuments*; Pinches, *Capture of Babylon*). In addition to this tablet we have the Cyrus cylinder published by Sir Henry Rawlinson in 1880. Cyrus pronounces a eulogy upon his military exploits and assigns his triumph to the intervention of the gods. Nabonidus had incurred their wrath by removing their images from the local shrines and bringing them to Babylon.

On comparing the inscriptions with the other accounts we find that they substantially agree with the statement by Berosus, but that they considerably differ from what is recorded by Herodotus, Xenophon, and in the Book of Daniel. (1) The inscriptions do not mention the siege of Babylon recorded by Herodotus and Xenophon. Cyrus says Gobryas his general took the town "without fighting". (2) Nabonidus (555-538 B. C.), and not Baltasar, as is stated in Daniel, was the last King of Babylon. Baltasar, or Bel-sarra-usur, was the son of Nabonidus. Nor was Nabonidus or Baltasar a son or descendant of Nabuchodonosor. Nabonidus was the son of Nebobaladhsu-ik-bi, and was a usurper of the throne. The family of Nabuchodonosor had come to an end in the person of Evil-Merodach, who had been murdered by Nergal-sharezer, his sister's husband. The controversy occasioned by these differences between the conservative and modern schools of thought has not yet reached a conclusion. Scholars of the former school still maintain the historical accuracy of the Book of Daniel, and explain the alleged discrepancies with great ingenuity. They assume that Baltasar had been associated with his father in the government, and that as prince-regent, or co-regent, he could be described in authority and rank as king. For this conjecture they seek support in the promise of Baltasar to make Daniel "third ruler" (D. V., "third prince") in the kingdom, from which they infer that he himself was the second. Professor R. D. Wilson, of Princeton, claims that the bearing of the title "King" by Baltasar was in harmony with the usage of the time (Princeton Theol. Rev., 1904, April, July; 1905, January, April). The other discrepancy, namely, that Nabuchodonosor is called the father of Baltasar (Dan., v, 2, 11, 18) they account for either by taking the word "father" in the wider sense of predecessor, or by the conjecture that Baltasar was his descendant on the mother's side.

On the other hand, the school of critics declines to accept these explanations. They argue that Baltasar not less than Nabuchodonosor appears in Daniel as sole and supreme ruler of the State. While fully admitting the possibility that Baltasar acted as prince-regent, they can find no proof for this either in the classical authors or in the inscriptions. The inference drawn from the promise of Baltasar to raise Daniel to the rank of a "third ruler" in the kingdom they regard as doubtful and uncertain. The Hebrew phrase may be rendered "ruler of a third part of the kingdom". Thus the phrase would be parallel to the Greek term "tetrarch", i. e. ruler of a fourth part, or of a small portion of territory. For this rendering they have the authority of the Septuagint, Josephus, and; as Dr. Adler informs us, of Jewish commentators of repute (see Daniel in the Critics' Den, p. 26). Furthermore, they argue that the emphatic way in which Nabuchodonosor is designated as father of the king leads the reader to infer that the writer meant his words to be understood in the literal and obvious sense. Thus the queen, addressing Baltasar, thrice repeats the designation "the king thy father", meaning Nabuchodonosor: "And in the days of thy father light, knowledge and wisdom were found in him [Daniel]: for King Nabuchodonosor thy father appointed him prince of the wise men, enchaners, Chaldeans, soothsayers, thy father, O King."

Balthazar. See MAGI.

**Baltimore, ARCHDIOCESE OF**, senior see of the United States of America, established a diocese 6 April, 1789; as an archdiocese 8 April, 1808; embraces all that part of the State of Maryland west of the Chesapeake Bay (6,442 square miles) including also the District of Columbia (64 square miles), making in all 6,502 square miles. The entire population of this area is about 1,273,000. The Catholics, numbering 255,000, are principally of English, Irish, and German descent. There are also Polish, Lithuanian, Bohemian, and Italian congregations, and six churches exclusively for coloured people, four in Baltimore, two in Washington. (See WASHINGTON and DISTRICT OF COLUMBIA.)

**I. COLONIAL PERIOD.**—(a) *Politico-Religious Beginnings.*—Catholic Maryland, the first colony in the New World where religious toleration was established, was planned by George Calvert (first Lord Baltimore), a Catholic convert; founded by his son Cecilus Calvert (second Lord Baltimore), and named for a Catholic queen, Henrietta Maria, wife of Charles I of England. Except for the period of Ingle's Rebellion (1645–47) its government was controlled by Catholics from the landing of the first colony under Leonard Calvert (25 March, 1634) until after 1649, when the Assembly passed the famous act of religious toleration. The first three Lords Baltimore, George, Cecilus, and Charles, were Catholics. The last three, Benedict Leonard, Charles, and Frederick, were Protestants. Puritans who had been given an asylum in Maryland rebelled and seized the government (1652–58) and Catholics were excluded from the administration of the province and restrained in the exercise of their faith. When Lord Baltimore again obtained control (1658), religious liberty was restored until 1692.

Taking advantage of Protestant disturbance in the colony, William of Orange, King of England, declared the Proprietary's claim forfeited, made Maryland a royal province, and sent over Copley, the first royal governor (1692). The Anglican Church was then made the established church of Maryland, every colonist being taxed for its support. In 1702, religious liberty was extended to all Christians except Catholics. Catholics were forbidden (1704) to instruct their children in their religion or to send them out of the colony for such instruction (1715). Priests were forbidden to exercise their functions and Catholic children could be taken from a Catholic parent. Appealed to by Catholics, Queen Anne intervened and the clergy were permitted to perform their duties in the chapels of private families (9 December, 1704). Thus originated the manor chapels, and the so-called "Priests' Mass-Houses". The apostasy of Benedict Leonard Calvert (1713) was a cruel blow to the persecuted Catholics. In 1716 an oath was exacted of office-holders renouncing their belief in Transubstantiation. An act disfranchising Catholics followed (1718). Charles Carroll, father of the Signer, went to France (1752) for the purpose of obtaining a grant of land on the Arkansas River for his persecuted brethren. This plan, however, failed. To exterminate Catholicity an attempt was made to pass a bill confiscating the property of the clergy (3 May, 1754, Lower House Journal in MSS., Maryland Archives). The missionaries, having received land from the Proprietaries upon the same conditions as the other colonists, divided their time between the care of souls and the cultivation of their mission-supporting farms. The cutting off of these revenues, would therefore have been disastrous to the Church. Fortunately this attempt did not succeed. Such were the political conditions until the time of the Revolution (Archives Maryland Hist. Soc. Baltimore; Johnson, *Foundations of Maryland*, Baltimore, 1883; Johnston, *Religious Liberty in Maryland and Rhode Island*, Catholic Truth Society Publications; Browne,

George and Cecilus Calvert, New York, 1890; Hall, *The Lords of Baltimore*, *ibid.*, 1902).

(b) *The First Missionaries.*—In the first colony brought over by the Ark and the Dove (25 March, 1634) were three Jesuits, Fathers Andrew White and John Althan, and a lay brother, Thomas Gervase (White, *Relatio Itineris in Marylandiam*, Baltimore ed., 1874; cf. *Am. Hist. Review*, April, 1907, p. 584; Treacy, *Old Catholic Maryland*, Swedesboro, N. J., 1889; Hughes, *Hist. of S. J. in N. America*, 1907). The following year another priest and lay brother arrived. Fathers Philip Fisher (real name Thomas Copley) and John Knolles landed in 1637. In 1642, the Roman Congregation of the Propaganda, at Lord Baltimore's request, sent to Maryland two secular priests, Fathers Gilmett and Territt. Two Franciscans arrived in 1673, one of whom was Father Massæus Massey a Santa Barbara, a truly apostolic man. There were not more than six Franciscans at any time on the missions in Maryland. Their missions ceased with the death of Father Haddock in 1720. In 1716 two Scotch Recollects (Franciscans) came to the Eastern Shore of Maryland. The title "Apostle of Maryland" belongs unquestionably to Father Andrew White, S. J., whose zeal was boundless. During Ingle's Rebellion (1645–47) Fathers White and Fisher were taken in chains to England where the former died. Father Fisher returned to Maryland in 1648, dying in 1653, leaving the Rev. Lawrence Starkey alone on the mission. Fourteen years after the first colony landed nearly all the natives south of what is now Washington had embraced the Faith, living in peaceful happy intercourse with the settlers. Father White said Mass and baptized the princess of the tribe in his wigwam on the Port Tobacco River. A chapel farther down the stream replaced the wigwam which was in turn succeeded by St. Thomas's Manor church built in 1798 by the Rev. Charles Sewell, S. J. Such was the glorious result of the wisdom and zeal of the first Jesuit missionaries of Maryland (B. U. Campbell, in *U. S. Cath. Hist. Magazine*, Baltimore; Calvert Papers, Maryland Hist. Society, 1889–94; Treacy, *op. cit.*; The Catholic Cabinet, St. Louis, 1843–45; The Religious Cabinet, Baltimore, 1842).

In accordance with Lord Baltimore's instructions, a church was built in the early days at St. Mary's, the capital of the province. William Bretton and his wife, Temperance, in 1661 deeded the ground for the chapel of St. Ignatius and the cemetery at Newtown. Newtown Manor was afterwards purchased by the Jesuits. In 1677 a Catholic college was opened by Father Foster, S. J., and Mr. Thomas Hothersall, a scholastic. In 1697 we find a brick chapel at St. Mary's; frame chapels at St. Inigoes, Newtown, Port Tobacco, Newport, Father Hobart's chapel (Franciscan) near Newport; one on the Boarman estate, and one at Doncaster in Talbot County. During this period (1634–1700) there were about thirty-five Jesuits in the missions of Maryland, all of whom with two or three exceptions were English. They were men of apostolic zeal and disinterestedness. The mission at Bohemia, in Cecil County was founded by Father Mansell (1706), the priests of this mission carrying the Faith into Delaware. St. Inigoes house was established in 1708 and later a chapel was added. Hickory Mission, from which Baltimore was afterwards attended, was established in 1720, and St. Joseph's Chapel, Deer Creek (the Rev. John Digges, Jr.), in 1742. We find the Rev. Benedict Neale at Priest's Ford, Harford County, in 1747. St. Ignatius's Church, Hickory, was established (1792) by the Rev. Sylvester Boarman. About 1755, 900 Catholic Acadian refugees settled in Maryland, but the Catholics were forbidden to give them hospitality. Many of them lost the Faith, but some of their descendants still preserve the Faith for which their fathers suffered. An unfinished house in Baltimore (north-west corner of Calvert and Fayette

Streets) was used by them as a chapel. A Catholic school was established in Baltimore (1757) by Mary Ann March, but was closed on account of the violent persecution of Protestant clergymen. The historic Whitemarsh mission was founded in 1760 by the Rev. John Lewis. Frederick Chapel (St. John's) was built by Father Williams, S.J.; the church was built in 1800 by the Rev. John Dubois, at that time the only priest between Baltimore and St. Louis. The present church was consecrated in 1837. In 1903 the Jesuits gave up the church and novitiate. The Jesuit novitiate was opened at Georgetown, D. C., 1806. During the War of 1812, it was at St. Inigoes and Frederick for a few years, then returned to Georgetown, was removed to Whitemarsh about 1820, and to Frederick in 1833, whence in 1903 it was finally removed to St. Andrews-on-the-Hudson, near Poughkeepsie, New York.

In 1669, the Catholic population numbered 2,000; in 1708 it was 2,979 in a population of 40,000; in 1755 about 7,000. In 1766, the following missions were attended by Jesuits: St. Inigoes, Newtown, Port Tobacco, Whitemarsh, Deer Creek, Fredericktown, Queenstown, Bohemia, and Baltimore. The twenty Jesuits on the Maryland mission at the time of their order's suppression (1773) remained at their posts. The first priest born in Maryland was the Rev. Robert Brooks (1663). His four brothers also became priests. Conspicuous for unselfish zeal at this period was Rev. William Hunter; whilst for over forty years Father George Thorold laboured in Maryland (1700-42). The clergy was, in general, self-supporting. (Treacy, *op. cit.*; Extracts from Letters of Missionaries, Baltimore, 1877; Shea, *Life and Times of Archbishop Carroll*, New York, 1888.)

(c) *The Catholic Colonists.*—The Catholic population, mostly rural, was generous to the Church and hospitable to the priests. We find many deeds and bequests for ecclesiastical purposes in the early records. Enduring one hundred years of persecution from the Protestants to whom they had offered asylum, proscribed, disfranchised, offered peace and emolument in exchange for apostasy, the Catholics generally continued faithful, and it is inspiring to read the list of Catholic names that survived the dark days, and that are still in evidence on the Catholic roll of honour—Brent, Lee, Fenwick, Boarman, Sewell, Lowe, Gardiner, Carroll, Neale, Jenkins, Digges, Bowling, Edelin, Matthews, Lancaster, Stonestreet, Boone, Mattingly, Brooks, Hunter, Coombes, Spalding, Semmes, Dyer, Jamison, Queen, Hill, Gwynn, Wheeler, Elder, McAtee, Pye, Miles, Abell, Camalier, Smith, Plowden, Freeman, Maddox, Greenwell, Floyd, Drury, Mudd, Hamilton, Clark, Payne, Brock, Walton, Doyne, Darnall. During the American Revolution, Catholics, with very rare exceptions, sided with the patriots; Maryland's best Catholic names are to be found on the rolls of the Continental army, both as officers and privates. The most prominent and influential citizen of Maryland during this epoch was Charles Carroll of Carrollton, one of the signers of the Declaration of Independence. At this time only Maryland, Pennsylvania, Virginia, and Delaware had removed the disabilities against Catholics. The National Convention (Philadelphia, 1787) granted religious liberty to all. (McSherry, *Hist. of Maryland*, Baltimore, 1882; Scharf, *Hist. of Maryland*, Baltimore, 1879.)

II. AMERICAN PERIOD.—Such were the conditions in Maryland when the first bishop was appointed. Speaking of this period in 1790 Bishop Carroll said "it is surprising that there remained even so much as there was of true religion. In general Catholics were regular and unoffensive in their conduct, such, I mean, as were natives of the country"—but he complains bitterly of the injury to the Faith caused by those Catholics who came to the colony about this

time (Shea, *Life of Archbishop Carroll*, 49). In fact the Church began to recover from this scandal only forty years after. Catholic Americans were subject spiritually to English Catholic superiors (the arch-priests), until 6 September, 1665, when Innocent XI appointed Dr. John Leyburn, Vicar-Apostolic of all England. The British Colonies in America remained under the jurisdiction of Dr. Leyburn and his successors, Bishops Gifford, Petre, Challoner, and Talbot, until the appointment of Dr. Carroll. After the Revolution it was plain that the United States could not conveniently remain subject in spirituals to a superior in England. A meeting was called at Whitemarsh (27 June, 1783) by the Rev. John Lewis, Vicar-General of the Vicar Apostolic of London. This meeting was attended by the Revs. John Carroll, John Ashton, Charles Sewell, Bernard Diderick, Sylvester Boarman, and Leonard Neale. It resulted in a petition asking for the appointment of the Rev. John Lewis as Superior, with quasi-episcopal faculties. At this time the French Minister to the United States schemed to make the missions of the United States subject to France. Benjamin Franklin, United States representative to France, ignorant of the true state of affairs, at first supported this intrigue. Congress, however, informed Franklin that the project was one "without the jurisdiction and power of Congress, who have no authority to permit or refuse it". The American priests then presented a memorial to Pius VI. As a result the appointment of the Rev. John Carroll as Superior of the missions of the United States, with power to administer confirmation, was ratified (9 June, 1784). He received the decree appointing him Prefect Apostolic 26 November, 1784. At this time, there were, according to Dr. Carroll, 15,800 Catholics in Maryland (of whom 3,000 were negroes); 7,000 Catholics in Pennsylvania; 200 in Virginia; 1,500 in New York. In 1782 the total population of Maryland was 254,000. There were nineteen priests in Maryland and five in Pennsylvania. Dr. Carroll made his first visitation in Maryland in 1785, and administered confirmation. About this time he took up his residence in Baltimore, where the Rev. Charles Sewell was pastor. In 1788, the clergy petitioned Pius VI for the appointment of a bishop. Their request was granted. They were permitted to determine whether the bishop should be merely titular, or should have a see in the United States—and to choose the place for, as well as to elect the occupant of the see.

*Election of Bishop Carroll.*—Twenty-four priests assembled at Whitemarsh. Twenty-three voted for Dr. Carroll, who was, accordingly, appointed first Bishop of Baltimore, subject to the Roman Congregation of the Propaganda. Dr. Carroll was consecrated in the chapel of Lulworth Castle, England, 15 August, 1790, the consecrator being the Right Rev. Charles Walmesley, Senior Vicar Apostolic of England. Before leaving England, Dr. Carroll arranged with the Sulpician Fathers to establish an ecclesiastical seminary in Baltimore at their own expense. Accordingly, the superior, the Rev. Francis Nagot with three priests and five seminarians arrived at Baltimore in July, 1791. The "One Mile Tavern" and four acres of land were purchased and on 18 July, St. Mary's Seminary was opened.

(a) *Progress of Catholicism.*—The next year the Revs. J. B. David and B. J. Flaget, afterwards Bishops of Bardstown (Louisville), Kentucky, with Mr. Stephen Badin who was the first priest ordained in Baltimore (1793), arrived. In 1787, the Rev. Joseph Mosley died leaving about 600 communicants on the Eastern Shore, where he had laboured twenty-two years. At this time there was only one other priest stationed there. The next year the veteran John Lewis died, being the last of the Superiors of the origi-

nal Maryland missions. In 1789 Georgetown College was founded. A frame church was erected at Westminster (1789), succeeded by Christ Church (1805), under the Rev. Joseph Zucchi. In 1791 the Diocese of Baltimore included all the territory east of the Mississippi, except Florida; in this vast territory there were churches at Baltimore, New York (1785), Boston (1788), Charleston (1788); in Maryland at St. Inigoes, Newtown, Newport, Port Tobacco, Rock Creek, Annapolis, Whitemarsh, Bohemia, Tuckahoe, Deer Creek, Frederick, Westminster; in Pennsylvania, at Philadelphia, Lancaster, Conewago, Goshenhoppen; in Delaware, at Coffee Run, also at Vincennes, Kaskaskia, Cahokia, and Prairie du Rocher. In 1790, a Carmelite community was established at Port Tobacco under Mother Frances Dickinson. The nuns remained there until 1831, when twenty-four sisters under Mother Angela Mudd removed to Baltimore. In 1791, the first diocesan synod in the United States was opened at the bishop's house in Baltimore. Twenty-two priests and the bishop were present. At this synod the offertory collections were inaugurated. Between 1791 and 1798 seventeen French priests arrived, some of whom became famous in the history of the United States—the Revs. John Dubois (1791), Benedict Flaget, J. B. David, Ambrose Maréchal (1792), William DuBourg, and John Moranville (1794), and John Lefevre Cheverus (1796). Until this time the burden of the missions of Maryland had been borne by the Jesuits. From 1700 to 1805 about ninety Jesuits had laboured on the mission, of whom about sixty were English, sixteen Americans, and the rest German, Irish, Welsh, Belgian, and French. They were apostolic men who devoted their lives without earthly reward to the service of others.

In 1792, Catholics in the eastern section of Baltimore, finding it inconvenient to attend the pro-cathedral, asked for a priest and rented a room in the third story of a house, corner of Fleet and Bond Streets, where the first Mass was said by Bishop Carroll. This congregation numbered about twelve persons. The Rev. Antoine Garnier, from St. Mary's Seminary, visited them twice weekly until 17 December, 1795, when the Rev. John Floyd took charge. The first church was erected on Apple Alley near Wilks Street. Father Floyd dying in 1797, Father Garnier was again made pastor until 1803, when the Rev. Michael Cuddy succeeded him. Dying within the year, his place was taken by the Rev. John Moranville, through whose zeal the corner-stone of St. Patrick's Church (Broadway and Bank Streets) was laid 10 July, 1804. It was dedicated 29 November, 1807, being then the most imposing church in the diocese. Father Moranville died in 1824, and was succeeded by the Rev. Nicholas Kearney (d. 1840), the Rev. John Dolan (d. 1870), and the Rev. John T. Gaitley (d. 1892). In 1898 the old church was replaced by the present handsome Gothic edifice. St. Patrick's School, begun by Father Moranville, preceded all public schools in Baltimore. The earliest German Catholic congregation was established 17 February, 1702, assembling for the first time for Divine service in a house near Centre Market. About 1800 Father Reuter, a priest in charge of the German Catholics, fomented a schism amongst them. They built a church where St. Alphonsus's now stands, called it St. John the Evangelist's, and defied the bishop, who carried the case to the courts, which decided in his favour (1805). Archbishop Eccleston confided the church to the Redemptorists in 1840. The corner-stone of the new church was laid in 1841, the name being changed to St. Alphonsus's. This church is distinguished for two pastors whose reputes for sanctity entitles them to special mention, the Venerable John N. Neumann (Bishop of Philadelphia, 1852-60), the process of whose beatification is still pending in Rome (Berger,

Life of Right Rev. John N. Neumann, D.D., New York, 1884); and the Rev. Francis X. Seelos who died in 1867, the first steps towards whose canonization were taken in 1901 (Zimmer, Life of Rev. F. X. Seelos, New York, 1887). St. Joseph's, Emmitsburg, was founded in 1793, by the Rev. Matthew Ryan. The Revs. John Dubois and Simon Bruté were afterwards pastors of this church. The first baptismal record of St. Mary's Church, Bryantown, was entered in 1793. Father David, the first pastor, was transferred to Georgetown in 1804. In 1794, the first church was built in Hagerstown, attended by the Rev. D. Cahill. About 1795, a log church (St. Mary's) was built at Cumberland; a brick church was substituted in 1838. It was replaced by the present church (St. Patrick's) begun in 1849 by the Rev. O. L. Obermeyer, and consecrated in 1883. St. Joseph's, Taneytown, was built by Mr. Brookes (1796). Its first pastor was the well-known Russian nobleman and convert, Father Demetrius A. Gallitzin.

It was soon seen that a coadjutor for the diocese was desirable in case of the bishop's death, and the Rev. Lawrence Græssel, a German priest of Philadelphia, was appointed to that office. This zealous priest dying soon after, the Rev. Leonard Neale, a native of Maryland, was selected, and was consecrated 7 December, 1800, at the Baltimore pro-cathedral. A notable event at this time was the marriage of Jerome Bonaparte, brother of Napoleon, to Miss Patterson of Baltimore, Bishop Carroll officiating (24 December, 1803).

(b) *Educational Institutions.*—As already stated Georgetown College was opened by the Jesuit Fathers in 1791. (Centennial Hist. of Georgetown College, Washington, 1891.) In 1803 the faculty of St. Mary's Seminary instituted an undenominational college course which continued until 1852, when Loyola College was opened. During this period it numbered among its students many who afterwards became prominent; among others Robert Walsh, A. B. Roman, the Latrobes, the Carrolls, the Jenkins, the Foleys, S. Eccleston, J. Chanche, F. E. Chatard, C. I. White, S. T. Wallis, Robert McLane, C. C. Biddle, Reverdy Johnson, Oden Bowie, Leo Knott, Christopher Johnson. At one time (1839-40) it had 207 students. In the meantime an attempt was made to separate the college from the seminary, and in 1807 Father Nagot established a college at Pigeon Hills, Pennsylvania, but in 1808, the sixteen students were transferred to a new institution begun at Emmitsburg by the Rev. John Dubois, a Sulpician. Such was the beginning of Mt. St. Mary's College. It gave to the Church one cardinal (McCloskey), five archbishops, twenty-one bishops, and five hundred priests. To carry out a design long entertained by the Sulpicians, St. Charles College, a *petit séminaire*, was begun and built on land donated by Charles Carroll of Carrollton. The corner-stone was laid in 1831, but owing to the lack of funds the college was not opened until 1848. The Rev. O. L. Jenkins was its first president, with one instructor and four students, but at his death (1869) there were thirteen instructors, 140 students, and one hundred priests among its alumni. Since 1853, St. Mary's Seminary has been exclusively a *grand séminaire*, with philosophy and theology courses. The memories of the devoted priests who during more than a century have composed its faculties, men of great learning and deep piety, are cherished with loving reverence by the numerous clergy they have taught. The alumni roll of St. Mary's contains the names of one cardinal, 30 bishops, 1,400 priests (Centennial History of St. Mary's Seminary, Baltimore, 1891). The Society of Jesus was re-established in Maryland (1805) with the Rev. Robert Molyneux as superior.

In 1808, Mrs. Elizabeth Ann Seton, a convert from Episcopalianism, went from New York to Baltimore and lived with some companions next to St. Mary's

CATHEDRAL OF THE ASSUMPTION, BALTIMORE

# BALTIMORE

1. OLD ST. PATRICK'S    2. CORPUS CHRISTI CHURCH (JENKINS MEMORIAL)    3. ST. MARY'S SEMINARY

Seminary. A convert, the Rev. Samuel S. Cooper, having given Mrs. Seton and her nine companions a lot at Emmitsburg, they founded there (1810) the Academy of St. Joseph. In 1812, the community was established under the rules of the Sisters of Charity and Mrs. Seton was elected mother superior. She died in 1821, leaving a flourishing community of fifty sisters (White, "Life of Eliza A. Seton", New York, 1853; Seton, "Memoir Letters and Journal of Elizabeth Seton", New York, 1869; De Barbary, "Elizabeth Seton", 2 vols., Paris, 1881; Sadlier, New York, s. d.). The community remained independent until 1850, when the sisters allied themselves with the Sisters of Charity of France, adopting the French costume. Thirty-one sisters in the Diocese of New York preferred to continue under the old rule and organized a separate body. During the Civil War (1862-63), 140 Sisters of Charity gave their services on the field and in the hospitals. The following notable institutions have been founded in the diocese from the mother house at Emmitsburg: St. Mary's Orphan Asylum (1817); Mt. Hope Retreat (1840); St. Vincent's Infant Asylum (1856); St. Joseph's House of Industry (1863); St. Agnes's Hospital (1863).

(c) *The Baltimore Cathedral.*—The acquisition of Louisiana by the United States increased the labours of Bishop Carroll. In 1805, the Holy See made him Administrator Apostolic of Louisiana and the Floridas. Until this time the bishop had officiated in St. Peter's Church, built about 1770, at the corner of Northeast and Forrest Streets. The Rev. Bernard Diderick, a Belgian priest, attended the church monthly from 1775-82. The Rev. Charles Sewell of St. Mary's County was the first resident pastor. Persuaded by Dr. DuBourg, the bishop and trustees decided (1806) to erect the new cathedral on the present site. The corner-stone was laid 7 July, 1806, by Bishop Carroll. The first rector of the cathedral was the Rev. Francis Beaton. He died (1809) before the church was finished. His successor was the Rev. Enoch Fenwick (d. 1827), to whose untiring zeal was due the completion of the church in 1821. During the building of the church the congregation had grown so large that the Sulpicians opened to the public the chapel of St. Mary's Seminary, then newly dedicated (1808). For half a century it continued to be the succursal church of the cathedral. On 31 May, 1821, the cathedral was dedicated by Archbishop Maréchal. The architect who had generously given his services gratis, and faithfully watched over the erection of the edifice was Benjamin H. Latrobe, a Protestant gentleman, and a devoted friend of Archbishop Carroll. He was engaged at the same time in building the National Capitol. The high altar of the cathedral was a gift to Archbishop Maréchal from his pupils in Marseilles. The imposing portico of the building was added in 1863, under the direction of the architect, Eben Faxon. The cathedral was consecrated 25 May, 1876, by Archbishop Bayley. During Cardinal Gibbons's administration a commodious sacristy was erected (1879); the sanctuary was extended (1888); two altars, gifts of Mrs. Michael Jenkins and James Sloan, were added, and the altar rail in memory of William Boggs donated (1906). There are few edifices in the United States as rich in historical memories as the Baltimore Cathedral. Within its walls have been held three plenary councils (1852, 1866, 1884), ten provincial councils, and nine diocesan synods; three cardinals have been invested, Gibbons, 1886; Satolli, 1890; Martinelli, 1901; six archbishops have received the pallium, twenty-five bishops have been consecrated, and 644 priests have been ordained by Cardinal Gibbons alone. The bishops consecrated in the cathedral were: B. J. Fenwick (1825), Dubois (1826), Whitfield (1828), Purcell (1833), Eccleston (1834), Chanche (1841), Whelan (1841), Tyler (1844),

Elder (1857), Barry (1857), Verot (1858), Becker (1868), Gibbons (1868); Thomas Foley (1870), Gross (1873), Northrop (1882), Glorieux (1885), Curtis (1886), Haid (1888), John Foley (1888), Chapelle (1891), Donahue (1894), Allen (1897), Granjon (1900), Conaty (1901). In the chapel built by Cardinal Gibbons under the high altar repose the ashes of Carroll, Maréchal, Whitfield, Eccleston, Kenrick, and Spalding. Besides those already mentioned many distinguished clergymen have been associated with the cathedral; Revs. Roger Smith, Charles C. Pise, Charles I. White, first editor of "The Catholic Mirror", John Hickey, S.S., H.B. Coskery, Thomas Becker, Thomas Foley, Thomas S. Lee, A. A. Curtis, P. J. Donahue, and C. F. Thomas. The cathedral parish has always counted among its members a great number of distinguished persons. Among its pewholders have been Charles Carroll of Carrollton, Chief Justice Taney, David Williamson, Luke Tiernan, Thomas Sim Lee, Thomas C. Jenkins, E. Austin Jenkins, Alfred Jenkins, William George Read, John Hillen, Patrick Bennett, Basil Elder, John Walsh, Solomon Hillen, John and Richard Caton, Dr. Peter Chatard, Abraham White, Jerome Bonaparte, Courtney Jenkins, Mark Jenkins, Basil Spalding, Judge Parkin Scott, Philip Laurensen, M. Benzinger, Charles M. Dougherty, Col. J. N. Bonaparte, William Kennedy, Robert Barry, Columbus O'Donnell, John Murphy. In recent times and at present we find the Attorney-General of the United States, Hon. Charles J. Bonaparte, Michael Jenkins, Joseph Jenkins, Dr. Felix Jenkins, George Jenkins, the Misses Jenkins, Mr. and the Misses Andrews, the Misses Gardner, William Boggs, Daniel Foley, Mrs. and the Misses Mactavish, W. R. Cromwell, Mrs. John S. Gittings, Major N. S. Hill, Richard and Allen MacSherry, Charles G. Nicholson, Miss Emily Harper, C. D. Kenny, A. Leo Knott, J. M. Littig, the Drs. Milholland, Robert Rennert, Robert Jenkins, Henry Bogue, the Messrs. Abell, the Misses Abell, Mrs. Alice Caughy, Messrs. Shriver, Joseph Turner, Mrs. Van Bibber, Owen Daly, Alexander Yearley, Harry Benzinger, James R. Wheeler, Charles Tiernan, Judge Charles Heuveler, Drs. Chatard, Drs. O'Donovan, Dr. Charles Grindall, Messrs. and the Misses Boone, Edgar Gans, Captain Billups, Messrs. Key, F. Dammann, Mrs. J. I. Griffias, and Victor Baughman. Indeed the roll-call of the cathedral parishioners contains the names of the most distinguished Catholics of their times. It is worthy of remark that although the trustee system has been continued at the cathedral for over one hundred years, there has never been any serious disagreement between the clergy and laity. The archiepiscopal residence was built during Dr. Whitfield's administration, and the two wings were added in 1865 by Captain William Kennedy.

(d) *Division of the Diocese.*—In compliance with Bishop Carroll's request for a division of his diocese, Pius VII (8 April, 1808) issued the Bulls creating four new sees, naming the Rev. Richard L. Concannon, a Dominican for New York; the Rev. Michael Egan, a Franciscan for Philadelphia; the Rev. John Cheverus for Boston, and the Rev. Benedict Joseph Flaget, Sulpician, for Bardstown. At the same time Baltimore was made the metropolitan see with Dr. Carroll as the first archbishop. Dr. Concannon, consecrated in Rome (1808), died at Naples (1810) when about to sail. Dr. Egan and Dr. Cheverus were consecrated at Baltimore in the pro-cathedral (1810) and Dr. Flaget at St. Patrick's the same year. The pallium was conferred on Archbishop Carroll in St. Peter's, Baltimore, 18 August, 1811. At this time there were in the United States about seventy priests and eighty churches. Maryland, Virginia, the District of Columbia, the Carolinas, what is now Alabama, Mississippi, Louisiana, and Florida were still under the jurisdiction of Baltimore, and in 1811 the

Holy See added some of the Danish and Dutch West Indies. At this period occurred the interference of Archbishop Troy and other Irish bishops in American affairs (Shea, *Life and Times of Abp. Carroll*, pp. 664-668). Dr. Carroll's protest at Rome was rendered ineffectual, owing to the representations of the Dominican Fathers Harold, who had hastened the death of Bishop Egan of Philadelphia, and afterwards, in Europe, enlisted against the Archbishop the support of the Irish prelates. Worn out with the struggle, he died 3 December, 1815.

III. SUCCESSORS OF ARCHBISHOP CARROLL.—(a) *Leonard Neale*.—Archbishop Carroll was succeeded by Leonard Neale, a native of Maryland. The Poor Clares (Mother Mary de la Marché and two others) had already opened an academy in 1801 at Georgetown, with Miss Alice Lalor as assistant teacher. These nuns returned to Europe after the death of the abbess; Miss Lalor continued the academy. Archbishop Neale erected the community of teachers into a house of the Order of the Visitation 28 December, 1817. Archbishop Neale died 17 June, at Georgetown, and was buried in the convent chapel.

(b) *Ambrose Maréchal*.—Archbishop Maréchal was born in France, and joined the Company of St. Sulpice. He had already refused the See of Philadelphia (1816), but finally consented to become Archbishop Neale's coadjutor. He was consecrated at St. Peter's, Baltimore, 14 December, 1817, by Bishop Cheverus. In his first visitation he confirmed 2,506 persons. In his diocese, which comprised Maryland, Virginia, the Carolinas, Georgia, and the territory west of Georgia to the Mississippi, there were then, according to his estimate, 100,000 Catholics. About 10,000 were in Baltimore, having increased to that figure from 800 in 1792. In one year there were 10,000 communions in the seminary chapel alone. There were fifty-two priests, principally French and American born. The Diocese of Baltimore at this time (1819) mourned the loss of Thomas Sim Lee, twice governor, and Maryland's representative in the Convention which ratified the Constitution. In 1820, two schismatic priests, aided by intriguing Irish prelates, succeeded in having Patrick Kelly secretly appointed to the See of Richmond and John England to that of Charleston. Thus, without the archbishop's knowledge or consent, New York, Philadelphia, Richmond, and Charleston were given for bishops utter strangers, bound by oath of allegiance to England, then at variance with the United States. The Diocese of Baltimore was thus divided into two parts, Maryland and the District of Columbia on the Atlantic, and a thousand miles off Alabama and Mississippi, with Richmond and Charleston between. Archbishop Maréchal, while at Rome, (1821) obtained for the provincial bishops the right to recommend candidates for vacant sees. Mississippi was erected into a Vicariate Apostolic with Dr. DuBourg as Vicar Apostolic; Alabama and Florida were attached to the Vicariate Apostolic of Mobile (1825). In 1822, Bishop Kelly returned to Ireland, and Archbishop Maréchal was appointed Administrator of the Diocese of Richmond. The archbishop died 29 January, 1828.

(c) *James Whitfield*.—He was succeeded by James Whitfield, an Englishman by birth. His consecration by Bishop Flaget took place 25 May, 1828, in the cathedral. October 4, 1829, the First Provincial Council of Baltimore was opened, and the same day the archbishop received the pallium. The Fathers of this council were Archbishop Whitfield, Bishops Flaget, the two Fenwicks (Boston and Cincinnati), England, Rosati, and Rev. William Matthews, representing Philadelphia. (See BALTIMORE, THE PROVINCIAL COUNCILS OF.) To carry out the council's decrees, a synod, attended by thirty-five priests, was held 31 October, 1831. There were at this time in Maryland about 80,000 Catholics in a population of 407,000;

in the District of Columbia about 7,000 in a population of 33,000. There were fifty-two priests in the diocese. Out of his private fortune, Archbishop Whitfield built St. James's Church, Baltimore (1833). It was first used by English-speaking Catholics, who, finding it too small for their increasing numbers, commenced the erection of St. Vincent's Church (1841). About the same time the German congregation of St. John's (Saratoga Street) began the building of their new church, St. Alphonsus; needing in the meantime a place for worship, they were granted the use of St. James's, after the opening of St. Vincent's (of which Father Gildea was the first pastor). The Redemptorists from St. Alphonsus took charge henceforth of St. James's and built there the first convent of their order in the United States. Several other churches were established by the Redemptorists. In 1845, they founded St. Michael's, a small church on the corner of Pratt and Regester Streets; the present church on the corner of Lombard and Wolfe Streets was commenced in 1857. Its congregation is now one of the largest in the city. The Redemptorists also founded Holy Cross parish, the corner-stone of the church being laid in 1858. Since 1869, the secular clergy have been in charge. The church of the Fourteen Holy Martyrs was begun (1870) by the Redemptorists; in 1874, they transferred it to the Benedictines. Rev. Meinrad Jeggle, O.S.B., was rector from 1878 to 1896. The new church was commenced in 1902. St. Wenceslaus's, dedicated in 1872, formed the nucleus of the Slav congregations in Baltimore. The Redemptorists took charge of it in 1882. A new church and school were commenced in 1903. In 1873 they began the Sacred Heart Church (Canton).

The Maryland Province of the Society of Jesus was formally established in 1833, with Father William McSherry, a Virginian, as first provincial. The Second Provincial Council met at the cathedral, Baltimore, 20 October, 1833. Besides Archbishop Whitfield, there were present Bishops David, England, Rosati, Fenwick (Boston), Dubois, Portier, F. P. Kenrick, Reese, Purcell. Bishop Flaget was absent; the Jesuits, Sulpicians, and Dominicans were represented. A Roman Ritual adapted to the wants of this country was ordered to be prepared. Rev. Samuel Eccleston elected coadjutor, was consecrated in the cathedral 14 September, 1834, by Archbishop Whitfield, who died the following October.

(d) *Samuel Eccleston*.—Archbishop Eccleston, a native of Maryland, a convert and a Sulpician, was thirty-three years old when he succeeded to the See of Baltimore. During his administration the anti-Catholic sentiment began to lose its violence and the tide of conversions set in. In 1834 there were within the jurisdiction of Baltimore (Maryland, Virginia, and District of Columbia) 70 churches and 69 priests. There were only 327 priests in the whole United States. The Visitation Nuns from Georgetown established a house in Baltimore (1837) with Mother Juliana Matthews as first superioress. Mother Anastasia Coombes established another Visitation monastery at Frederick in 1846. In 1852 another house was established (Mt. de Sales) at Catonsville, under Mother Cecilia Brooks.

The Third Provincial Council was held in the cathedral, 1837. It was attended by the archbishop, and Bishops Rosati, Fenwick (Boston), F. P. Kenrick, Purcell, Chabrat, Clancy, Bruté, Blanc. Bishop Dubois declined to assist. The Fourth Provincial Council was opened at the cathedral, 16 May, 1840. Ten bishops accepted the invitation of Archbishop Eccleston to attend the council, Flaget, Rosati, Fenwick (Boston), Portier, F. P. Kenrick, Purcell, Blanc, Loras, Miles, De la Hailandière. The Sulpicians, Dominicans, and Redemptorists were also represented. Rev. Richard Whelan and Rev. John Chanche were recommended by this council, respectively for the

Dioceses of Richmond and Natchez, thus freeing the archbishop from the administration of Richmond. The St. Vincent de Paul Society was established in the diocese (1840) and the Young Catholic Friends' Society in 1848. In 1842, the corner-stone of Calvert Hall was laid on the site of the pro-cathedral (Saratoga Street). The present imposing building was opened 1891. Rock Hill Academy was purchased by the Christian Brothers (1857) and Rock Hill College incorporated 1865.

The Fifth Provincial Council was held in the cathedral, May, 1843. It was attended by seventeen bishops. At this time there were 90,000 Catholics, 58 churches, 70 priests, two seminaries, three colleges, two academies for boys, six for girls, five orphan asylums, and ten free schools. The total population of Maryland in 1840 was 469,232. The Sixth Provincial Council met at the cathedral, 10 May, 1846. Twenty-three bishops were present and four religious orders were represented. "The Blessed Virgin Mary Conceived Without Sin" was chosen as patroness of the Province. Sisters of Notre Dame (mother-house of Eastern Province on Aisquith Street) came to Baltimore, 5 August, 1847. "Notre Dame of Maryland" was established 22 September, 1873. The Seventh Provincial Council met at the cathedral, May, 1849. Archbishop Eccleston, in pursuance of the council's decision, issued a pastoral letter reviving the custom of Peter's-pence, and inviting Pius IX, then in exile at Gaeta, to attend. The Archbishops of Baltimore and St. Louis and twenty-three bishops were present; seven religious orders were represented. This council recommended New Orleans, Cincinnati, and New York as metropolitan sees, also the creation of the Sees of Savannah, Wheeling, and St. Paul. The fathers petitioned for the definition of the Immaculate Conception. One of their decrees forbade priests officiating at marriages where a minister had officiated or intended to do so. The Province of Baltimore now comprised the Dioceses of Philadelphia, Pittsburg, Richmond, Wheeling, Charleston, and Savannah.

About this time Rev. John Hickey established a precedent by refusing to testify in court concerning stolen property restored through a penitent. The court sustained him. During Archbishop Eccleston's time, besides those mentioned above, several other churches were erected. The corner-stone of St. Joseph's was laid in 1839. In 1849, it was given to the Jesuits, but returned to the diocesan clergy in 1860. The new church was begun in 1899. St. Peter's, begun in 1843, was consecrated in 1879 under Rev. Edward McColgan, V.G., its first pastor. The Sisters of Mercy came to St. Peter's from Pittsburg in 1855; Mother Catherine Wynne was first superioress. They afterwards opened Mt. St. Agnes (1867) of which Mother de Chantal Digges was first superioress; they also have charge of the City Hospital. St. Augustine's (Elkridge) was founded 1845. Its first pastor was Rev. B. Piot; the present beautiful church is the gift of Mr. C. D. Kenny (1902). St. Charles Borromeo (Pikesville) was commenced 16 July, 1848, by Father White. The present imposing Romanesque edifice was dedicated 12 March, 1899. The Immaculate Conception parish was organized in 1850 with Rev. Mark Anthony, C.M., as its first pastor; the present church was dedicated in 1858, during the pastorate of Rev. Joseph Giustiniani, C.M. Archbishop Eccleston died at Georgetown, 22 April, 1851, and was buried in Baltimore. At this time there were in the diocese (Maryland and District of Columbia) 83 churches and chapels; 103 priests; 6 ecclesiastical seminaries; 12 free schools, and 23 charitable institutions; Catholic population 100,000. Rev. H. B. Coskery was administrator until the following August, when Dr. Francis P. Kenrick, Coadjutor-Bishop of Philadelphia, was elevated to the See of Baltimore.

(e) *Francis Patrick Kenrick*.—Archbishop Kenrick convoked the First Plenary Council of Baltimore, 9 May, 1852. (See BALTIMORE, PLENARY COUNCILS OF.) To carry out the council's decrees a synod was called (June, 1853), attended by 35 diocesan and 17 regular priests. At this synod parochial rights and limits were defined. The Eighth Provincial Council met in the Baltimore Cathedral, 5 May, 1855. Eight sees were represented. It regulated pew rents and collections, and established a rule for the cathedraticum. Col. B. U. Campbell, a Maryland Catholic, who by his contributions laid the foundation for the history of the Church in the United States, died about this time (1855). In 1856 the Catholics of the city of Baltimore numbered 81,000, and had 13 churches, while in the entire diocese (Maryland and the District of Columbia) there were 99 churches and chapels, 130 priests, and a population of 120,000. The Forty Hours' Devotion was established in the diocese (1858). In 1858 the Ninth Provincial Council was held in the cathedral; 8 bishops were present and 6 religious orders were represented. At the Council's request the Holy See granted to the Archbishop of Baltimore the precedence in councils and meetings, held by the prelates of the United States, even though he were not senior archbishop. The petition of the Fathers of this Council for a perpetual dispensation from the Saturday abstinence was granted. In 1862, the Baltimore Province comprised Philadelphia, Pittsburg, Charleston, Savannah, Richmond, Wheeling, Erie, and the Vicariate Apostolic of Florida. In the Diocese of Baltimore there were 124 churches and chapels; 170 priests, 36 free schools, 35 charitable institutions; Catholic population 150,000.

A synod was convened (1863) at which the version of the Bible revised by the archbishop was adopted as the one to be used in the diocese. Under Archbishop Kenrick, the following churches were built in Baltimore: St. John's in 1853, with Rev. J. B. McManus as first pastor. The present church was opened in 1856. The church of St. Ignatius Loyola was consecrated 15 August, 1856. Rev. John Early, S.J., was its first pastor and founder of Loyola College on Holliday Street (1852); in 1855 the present college was opened on Calvert Street (Hist. Sketch of Loyola College, Baltimore, 1902). Many distinguished citizens claim it as their Alma Mater. St. Bridget's Church (Canton) was dedicated 1854 and was built by Rev. James Dolan out of his private means, as were also St. Mary's, Govanstown, and the Dolan Orphans' Home. Rev. John Constance was first pastor of St. Bridget's. New churches were begun in Kent County, Long Green, and Clarkesville during 1855. Archbishop Kenrick died 6 July, 1863, and Very Rev. H. B. Coskery, a native of Maryland, again became administrator. He had been appointed Bishop of Portland in 1854, but had returned the Bulls.

*Coloured Catholics*.—During his administration St. Francis Xavier's Church for negroes was dedicated (1864). Its first pastor was Father Michael O'Connor. It was put in charge of the Josephites (1871) from Mill Hill College, England, brought to Baltimore by Rev. Herbert Vaughan. These missionaries came to minister to the Catholic negroes of Maryland, there being—greatly to the honour of their Catholic masters—16,000 of them in the State at the time of the emancipation. From St. Francis sprung St. Monica's, St. Peter Claver's (1889), and St. Barnabas's (1907), all churches for coloured people. As early as 1828 the Sulpician Father Jacques Joubert founded at Baltimore a house of Coloured Oblate Sisters of Providence. They conduct at present St. Frances's Academy and Orphanage, and in Washington St. Cyprian's Parochial School and Academy. St. Joseph's Seminary was opened in Baltimore by the Josephites (1888) with three white and one coloured student.

Epiphany Apostolic College, its preparatory seminary, was opened in 1889 by Rev. Dominic Manley. In 1881 St. Elizabeth's Home for coloured children was established in Baltimore by Mother Winifred and three English Sisters of St. Francis. Their convent on Maryland Avenue was opened in 1889, the house being a gift to the order from Mrs. E. Austin Jenkins.

(f) *Martin John Spalding*.—At Archbishop Kenrick's death the United States Government attempted to interfere in the selection of an archbishop, but failed (Cathedral Records, Baltimore, 1906, p. 46; Shea, Hist. of Cath. Ch. in U. S., 1844-66, New York, 1889-92, p. 393), and the Rt. Rev. Martin John Spalding, Bishop of Louisville, was elected 23 May, 1864. Archbishop Spalding invited the Sisters of the Good Shepherd from Louisville (1864) to come to Baltimore, and established them in a home given by Mrs. Emily Mactavish. Their work is the reformation of fallen women and the preservation of young girls. At this time (1864) the Church lost one of its foremost members, Roger B. Taney, Chief Justice of the United States. The Tenth Provincial Council was opened in the cathedral, 25 April, 1869; 14 prelates were present. The Second Plenary Council of Baltimore met 7 October, 1866, in the cathedral. It recommended the establishment of the Apostolic Vicariate of North Carolina. St. Mary's Industrial School for Boys, erected on land donated by Mrs. Emily Mactavish, was opened in 1866, and placed in charge of the Xaverian Brothers from Belgium. Mt. St. Joseph's College, begun (1876) as an aid to the Xaverian Novitiate, has now 40 novices and 150 students. St. James's Home (Baltimore) furthers the work of the Industrial School by securing positions for, and boarding, older boys. It has about 70 boarders. A somewhat unusual event took place 16 August, 1868, when Revs. James Gibbons and Thomas Becker were consecrated together in the cathedral by Archbishop Spalding. Woodstock College, the seminary of the Jesuit Fathers, was opened in 1869; Father Angelo Barasci was its first rector. Since then many standard treatises on theology, philosophy, and science have been published by its professors, the best known being the works of Mazzella, De Augustinis, Sabetti, Maas, Piccirelli, and Sestini. In 1865 John T. Stephanini and Charles Long, Passionist Fathers, were appointed to St. Agnes's Church, Catonsville. The Passionist monastery of St. Joseph was completed in 1868; Father Long was elected its first rector. It was destroyed by fire in 1883 and a new monastery was built in 1886. The Little Sisters of the Poor were established in Baltimore, 6 April, 1869. Since then 3,082 old people have been cared for by them. Rev. Thomas Foley, who had been at the cathedral for twenty-two years, was consecrated Administrator of Chicago in 1870. Archbishop Spalding died 7 February, 1872. During his administration the churches built in Baltimore were: St. Martin's (Fulton Avenue) corner-stone laid in 1865, Rev. John Foley, first pastor; St. Mary's Star of the Sea founded in 1869, by Rev. Peter McCoy. The Sisters of St. Joseph came to this parish in 1875. After Archbishop Spalding's death, Very Rev. John Dougherty administered the diocese until the installation of Archbishop Bayley (October, 1872).

(g) *James Roosevelt Bayley*.—Archbishop Bayley had been an Episcopalian minister in New York, became a Catholic, a priest, and at the time of his elevation to Baltimore, was Bishop of Newark. Philadelphia was made a metropolitan see in 1875. The Province of Baltimore was thus limited to the Sees of Baltimore, Charleston, Richmond, Wheeling, Savannah, Wilmington, St. Augustine (created 1870), and the Vicariate of North Carolina. There were in the diocese in 1870, 160 churches and chapels; 230 priests; 18 charitable, and six educational, institutions. In one year the archbishop confirmed two hundred times. Of the 6,405 persons confirmed, 847

were converts. The Eighth Provincial Synod opened in Baltimore, 27 August, 1875; 93 priests and representatives of 8 religious communities were present. St. Ann's (York Road) built by Capt. William Kennedy and his wife, was dedicated in 1874, Rev. William E. Bartlett being its first pastor. The Capuchin Fathers established themselves in the diocese (1875) in the Monastery of St. Peter and Paul, Cumberland. In 1882, it was made the seminary of the order; 59 priests have been ordained there. Previous to this, the Redemptorist, Rev. John N. Neumann, had built the church of St. Peter and Paul on the site of Fort Cumberland (1848). In 1866, the Carmelites succeeded the Redemptorists and remained until 1875, when the Capuchin Fathers took charge. When the Redemptorists left Cumberland, they established (1867) their house of studies at Ilchester (Hist. of the Redemptorists at Annapolis, Ilchester, 1904). St. Catherine's Normal Institute for training Catholic teachers was established in Baltimore (1875) by Sisters of the Holy Cross. They have schools also attached to the churches of St. Patrick and St. Pius. The latter church was begun by Archbishop Bayley, its erection being made possible by a generous donation of Mr. Columbus O'Donnell. It was dedicated in 1879, with Rev. L. S. Malloy first pastor. The Right Rev. James Gibbons, Bishop of Richmond, was made coadjutor with right of succession 20 May, 1877. Archbishop Bayley died the following October.

(h) *James Gibbons*.—Archbishop Gibbons is the only Archbishop of Baltimore born in that city. The Third Plenary Council met in the cathedral 9 November, 1884—being the largest council held outside of Rome since the Council of Trent. The zucchetto was conferred upon Cardinal Gibbons 7 June, 1886, and the following March he was invested in Rome and took possession of his titular church, Santa Maria in Trastevere. The Ninth Provincial Synod was convened in Baltimore September, 1886, 115 priests attending; 8 religious orders were represented. The Catholic University of America was instituted in 1887, and the Archbishop of Baltimore was named, ex officio, the Chancellor. (See CATHOLIC UNIVERSITY OF AMERICA.) The centenary of the diocese was celebrated November, 1889. There were present Cardinals Gibbons and Taschereau; Mgr. Satolli, representative of the pope, 8 archbishops, 75 bishops, 18 monsignori, and 400 priests. Canada, Mexico, England, and Ireland were represented. On that occasion leading Catholic laymen took part in a Catholic Congress (Hughes, Proceedings of Catholic Congress, Detroit, 1890) and there was a procession of 30,000 men with Mr. James R. Wheeler as marshal. In 1893, the cardinal's Silver Jubilee was celebrated. Nearly every see in the United States was represented; there were also present representatives of the Holy Father, and of the episcopate of England, Ireland, Canada, and Oceania. Bishop A. A. Curtis was consecrated in the cathedral November, 1886, and Bishop P. J. Donahue in 1894. 29 April, 1906, the centenary of the laying of the corner-stone of the cathedral was celebrated. There were present the cardinal, the apostolic delegate, Most Rev. Diomedeo Falconio, 9 archbishops, 56 bishops, 4 abbots, and about 800 priests.

Among the late additions to the diocese are the Mission Helpers and the Sisters of Divine Providence. The Mission Helpers opened a house in Baltimore in 1890; it was canonically organized, 5 November, 1906. The Sisters of Divine Providence (of Kentucky) were established in the diocese in 1892, having charge of the household interests of the Catholic University, St. Mary's Seminary, and the cardinal's residence. The churches built during Cardinal Gibbons's administration, in addition to those already mentioned are: St. Andrew's, dedicated 6 October, 1878; St. Paul's founded in 1899 (the present imposing church was erected in 1903); St. Gregory's by

means of a donation of Mr. Patrick McKenna (1884); St. Stanislaus's (Polish), founded in 1880 and taken over in 1906 by the Franciscans; Corpus Christi, built through the munificence of the sons and daughters of Mr. Thomas C. Jenkins, in memory of their parents, and dedicated 1 January, 1891; St. Leo's (Italian), begun in 1880, by Rev. J. L. Andreis. During the administration of Cardinal Gibbons 86 new churches have been erected in the diocese. At present there are 211 priests of the diocese and 273 of religious orders. There are 128 churches with resident pastors and 136 chapels. In Baltimore there are 44 (24 built during the administration of Cardinal Gibbons) and 18 in Washington (10 built in the same period). There are three universities, 11 seminaries, 13 colleges and academies, 95 parochial schools with 21,711 pupils, and 7 industrial schools. The Catholic population is at present about 255,000. The increase (1906) was 10,611, of whom 800 were converts.

Owing to the disinterested spirit of its archbishops, the Archdiocese of Baltimore, the Mother Church of the United States, has been subdivided until, in extent of territory, it is one of the smallest. Yet it yields to none in its spirit of faith and in the generosity of its people. Whenever called upon by the voice of religion its children have responded in a manner beyond their proportionate share. In support of the Catholic University, it is surpassed by none in proportion to its population. In the gatherings of the prelates of the United States the Catholic homes of Baltimore have welcomed the visitors to their hospitality. Probably no diocese has been so enriched by private donations for churches and institutions. The growth of the Catholic population is due first to natural increase, secondly to immigration, and thirdly to conversion. The large proportion of conversions must be attributed in a great measure to the personal popularity of its present archbishop, Cardinal Gibbons, and to the influence of his convert-making book, "The Faith of Our Fathers".

WILLIAM T. RUSSELL.

**Baltimore, LORDS.** See CALVERT.

**Baltimore, PLENARY COUNCIL OF.**—While the ecclesiastical province of Baltimore comprised the whole territory of the American Republic, the provincial councils held in that city sufficed for the church government of the country. When, however, several ecclesiastical provinces had been formed, plenary councils became a necessity for the fostering of common discipline. As a consequence, the Fathers of the Seventh Provincial Council of Baltimore requested the Holy See to sanction the holding of a plenary synod. The petition was granted and the pope appointed Archbishop Kenrick of Baltimore as Apostolic Delegate to convene and preside over the council.

I. THE FIRST PLENARY COUNCIL OF BALTIMORE was solemnly opened on 9 May, 1852. Its sessions were attended by six archbishops and thirty-five suffragan bishops. The Bishop of Monterey, California, was also present, although his diocese, lately separated from Mexico, had not yet been incorporated with any American province. Another prelate in attendance was the Bishop of Toronto, Canada. The religious orders and congregations were repre-

sented by the mitred Abbot of St. Mary of La Trappe and by the superiors of the Augustinians, Dominicans, Benedictines, Franciscans, Jesuits, Redemptorists, Vincentians, and Sulpicians. The last solemn session was held on the 20th of May. The decrees were as follows: (No. i) The Fathers profess their allegiance to the pope as the divinely constituted head of the Church, whose office it is to confirm his brethren in the Faith. They also declare their belief in the entire Catholic Faith as explained by the oecumenical councils and the constitutions of the Roman pontiffs. (No. ii) The enactments of the seven provincial councils of Baltimore are obligatory for all the dioceses of the United States. (No. iii) The Roman Ritual, adopted by the First Council of Baltimore, is to be observed in all dioceses, and all are forbidden to introduce customs or rites foreign to the Roman usage. Sacred ceremonies are not to be employed in the burial of Catholics whose bodies are deposited in sectarian cemeteries; or even in public cemeteries, if there be Catholic cemeteries at hand. (No. iv) The Baltimore "Ceremonial" is to be used all through the country. (No. v) Bishops are to observe the canons concerning ecclesiastical residence. (No. vi) Bishops are exhorted to choose consultors from among their clergy and to ask their advice in the government of the diocese. A monthly meeting of these consultors to discuss diocesan affairs is praiseworthy. (No. vii) A chancellor should be constituted in every diocese, for the easier and more orderly transaction of business. (No. viii) Bishops should appoint censors for books relating to religion. (No. ix) European priests desiring to be received into an American diocese must have written testimonials from their former bishops and the consent of the ordinary here. (No. x) Our quasi-parishes should have well-defined limits, and the jurisdiction and privileges of pastors should be indicated by the bishops. The ordinary can change these limits and it is his right to appoint the incumbents. (No. xi) After next Easter, matrimonial banns must be published, and bishops should dispense with this only for grave reasons. (No. xii) Pastors themselves should teach Christian doctrine to the young and ignorant. (No. xiii) Bishops are exhorted to have a Catholic school in every parish and the teachers should be paid from the parochial funds. (No. xiv) An ecclesiastical seminary should be erected in each province. (No. xv) The bishops or their delegates should demand every year an account of the administration of church funds from those who administer them, whether laymen or clerics. (No. xvi) Laymen are not to take any part in the administration of church affairs without the free consent of the bishop.

If they usurp any such authority and divert church goods to their own use or in any way frustrate the will of the donors; or if they, even under cover of the civil law, endeavour to wrest from the bishop's hands what has been confided to his care, then such laymen by that very fact fall under the censures constituted by the Council of Trent against usurpers of ecclesiastical goods. (No. xvii) When the title to a church is in the bishop's name, pastors are warned not to appoint trustees or permit them to be elected without the bishop's authority. (No. xviii) Benediction of the Blessed Sacrament must be performed in all dioceses in the manner prescribed by the Baltimore "Ceremonial". (No. xix) Bishops should use their influence with the civil authorities to prevent anyone in the army or navy from being obliged to attend a religious service repugnant to his conscience. (No. xx) A Society for the Propagation of the Faith, similar to that in France, should be fostered and extended. (No. xxi) The faithful are exhorted to enter into a society of prayer for the conversion of non-Catholics. (No. xxii) A petition should be addressed to the Holy See asking for extraordinary faculties concerning

matrimonial cases and the power, also, of delegating such faculties. (No. xxiii) Permission to use the short formula in the baptism of adults is to be requested of the Holy See, either for perpetuity or for twenty years. (No. xxiv) The sixth decree of the Seventh Provincial Council of Baltimore is to be understood as applying to those who rashly (*temere*) marry before a Protestant minister. Priests should give no benediction to those whom they know to intend to remarry before a preacher, or who, having done so, show no signs of penitence. (No. xxv) These decrees are binding as soon as they are published by the Archbishop of Baltimore after their revision and approval by the Holy See.

In sending the pope's approval of these decrees, the prefect of the Propaganda exhorted the bishops to add the feasts of the Circumcision of Our Lord and the Immaculate Conception B. V. M. to the festivals already observed. He added that although some diversity as to fasts and feasts is found in the American dioceses, still it is not desirable to lessen the number in those places where they are in accord with the discipline of the universal Church, because fewer feasts are observed in other American dioceses. The bishops are not to labour for conformity among the dioceses in customs that are foreign to the discipline of the universal Church, for thus the appearance of a national Church would be introduced. The cardinal prefect added that the Holy See tolerated relaxations of the common law of the Church for grave reasons, but such derogations were not to be confirmed and extended, but rather every effort was to be made to bring about the observance of the universal discipline. As to the method of adult baptism, the Holy See extended the dispensations to use the short formula for another five years. A letter from Cardinal-Prefect Franzoni, added to the acts of the council, treats of the question of how the bishops are to be supported by their dioceses. It likewise insists that priests ordained *titulo missionis* are not to enter religious orders without the consent of their ordinaries, as they are required to make oath that they will serve perpetually in the diocese for which they were ordained. In the acts of this council is found a statement of the Bishop of Monterey concerning the California Missions. He informed the Fathers that a large sum of money had formerly been placed in the hands of the Mexican Government to be used under the sanction of Spanish law for the support of the Californian missionaries. For years they had received none of this money and the late revolutions made any hope of reparation unlikely. However, as it is reported that the civil power in California intends to demand this money from the Mexican treasury for public purposes, he desired to know what effort the American bishops thought it desirable to make in the premises. The outcome of the whole discussion was the sending of a letter on the subject to the Archbishop of Mexico. We may add here that this money was later recovered and employed for the Church in California. (See CALIFORNIA, sub-title *History*.)

II. THE SECOND PLENARY COUNCIL was presided over by Archbishop Spalding of Baltimore as Delegate Apostolic. It was opened on the 7th of October and closed on 21 October, 1866. The acts note that, at the last solemn session, Andrew Johnson, President of the United States, was among the auditors. The decrees of this council were signed by seven archbishops, thirty-nine bishops or their procurators, and two abbots. The decrees are divided into fourteen titles and subdivided into chapters.

Title i, *Concerning the Orthodox Faith and Present Errors*, declares the Catholic doctrine (cap. i) on Divine revelation and the one Church of Christ; (ii) the nature and necessity of faith; (iii) the Holy Scripture; (iv) the Holy Trinity; (v) the future life; (vi) the

pious invocation and veneration of the B. V. Mary and the saints. (vii) The seventh chapter in which the present errors are discussed treats of (a) the dissensions among the Protestant sects and of zeal for their conversion. (b) Indifferentism. The Fathers warn their flock against the teaching that one religion is as good as another provided one be honest and just to his neighbour. They call this a plague, spreading under the guise of charity and benevolence. (c) Unitarianism and Universalism. These theories, the first denying the divinity of Christ and the other eternal punishment, tend to the rejection of the supernatural in religion. (d) Transcendentalism and Pantheism. These are the systems of men, who having dethroned God, make a deity of man. (e) Abuse of magnetism. The faithful are warned that magnetism is often employed for superstitious and illicit purposes, namely, to forecast the future by means of female "mediums". (f) The hallucinations and dangers of spiritism. There is little reason to doubt that some of the phenomena of spiritism are the work of Satan. It is noteworthy that the leaders of this system deny either implicitly or explicitly the divinity of Christ and the supernatural in religion.

Title ii, *Concerning the Hierarchy and the Government of the Church*, treats (cap. i) of the Roman pontiff; (ii) of the hierarchy teaching and ruling; (iii) of provincial councils, which ought to be held every three years; (iv) of diocesan synods, in which the bishop alone is legislator and judge. This chapter also treats of quarterly conferences for the discussion of theological questions by the clergy. (v) The officials of the bishop are considered in this chapter. Besides the diocesan consultors and the vicar-general, the bishop should appoint vicars forane or rural deans who are to preside at clerical conferences, to watch over ecclesiastical property, to counsel the junior clergy and report annually to the bishop on the state of their districts. Other officials mentioned are the secretary, chancellor, notary, and procurator for temporal affairs. Synodal examiners and judges for the criminal cases of clerics are also to be constituted. The latter, by delegation of the bishops, hold courts of the first instance and they should follow a judicial method closely approximating that prescribed by the Council of Trent.

Title iii, *Concerning Ecclesiastical Persons*, is divided into seven chapters. (cap. i) Of metropolitans. (ii) Of bishops; they are to make a visitation of their dioceses frequently; they should provide support for aged and infirm priests; before death they should appoint an administrator *sede vacante* for their dioceses. If this has not been done, the metropolitan is to make the appointment, or if it be a question of the metropolitan church itself, then the senior suffragan bishop constitutes an administrator until the Holy See can provide. The administrator cannot make innovations in the administration of the diocese. (iii) Of the election of bishops. A method for episcopal nominations to American sees is given, as also the requisite qualifications for candidates. (iv) Of priests exercising the sacred ministry. When several priests serve a church, one only must be designated as pastor. Priests should often preach to their people; they must not marry or baptize the faithful of other dioceses. Although our missions are not canonical parishes, yet it is the desire of the bishops to conform as much as possible to the discipline of the universal church in this matter. In cities containing more than one church, accurate limits for their districts should be assigned. When in these decrees the terms "parish" or "parochial rights" are used, the bishops have no intention of thereby indicating that the rector of a church is irremovable. No priest should be appointed to a parish unless he has made an examination before the bishop and two priests, and has

been five years in the diocese. This does not apply to regulars. (v) Of preaching. While explaining the Church's doctrine, preachers should also treat fully of points denied by heretics or unbelievers. Their style, however, is not to be controversial but explanatory. In their method they should follow the Roman Catechism and make a careful study of the writings of the Fathers of the Church. Let them accommodate themselves to the capacity of their auditors. In reprehending vices, let them never become personal; neither should they be influenced in their preaching by human motives but declare the truth fearlessly. They are not to mingle political and civil matters with religious doctrines in their sermons or attack public magistrates. While the custom of delivering funeral orations is to be retained, yet care must be taken not to bestow undue praise. In all sermons let prolixity be avoided. (vi) Of clerical life and manners. Clerics are to avoid a dress and personal appearance not becoming their station. They should abstain from all improper spectacles and games. Let them avoid having recourse to civil tribunals when possible. They must not engage in trade forbidden by the canons. Let them not be importunate in speaking of money matters to their flocks. The custom of priests taking money on deposit, for which interest is to be paid, is condemned. Let bishops as well as priests observe the prescriptions of the Council of Trent concerning their households. All clerics should avoid idleness as a pest. (vii) Of ecclesiastical seminaries. The erection of preparatory as well as greater seminaries is recommended. Theology and philosophy, Scripture and Hebrew are to be taught in the latter. No student is to pass from one seminary to another without testimonial letters. In those dioceses where Germans are found who cannot speak English, it is expedient that the seminarians learn enough German to hear confessions.

Title iv, *Of Ecclesiastical Property*.—The decrees of the first seven councils of Baltimore concerning the abuses of lay trustees and of the best method of securing church property by civil sanction are repeated and re-enacted. As to lay trustees, they must not be members of secret societies nor men who have not fulfilled the paschal duty. They cannot expend a sum of money above three hundred dollars without written consent of the bishop. The pastor, not the trustees, appoints organist, singers, sacristan, school-teachers, and others employed about the parish. When difference of opinion exists between pastor and trustees, all must abide by the decision of the bishop. All misunderstanding between the ordinary and regulars concerning temporal affairs will be averted if, at the founding of a new house, a document be drawn up expressing clearly all that relates to the foundation itself, to the rights thence flowing and to the duties connected with it.

Title v, *Of the Sacraments*.—(i) The Roman Ritual and the Baltimore "Ceremonial" are to be followed. Pastors should keep registers of baptisms, confirmations, marriages, and funerals. All of these, except the last, should be written in Latin. (ii) Of baptism. It must always be conferred in the church except in case of imminent death. Whether for infants or adults, all rites omitted at baptism must be afterwards supplied. As a rule converts are to be baptized; but care must be taken to inquire if they had been previously validly baptized, lest the sacrament be repeated. The same is to be said of those baptized in danger of death by laymen. Churching after child-birth, which has been generally neglected in this country, is to be insisted upon. (iii) Of confirmation. Sponsors of the same sex as the recipient are to be employed. (iv) Of the Holy Eucharist. Frequent Communion is to be encouraged. Children should as a rule be admitted to First Communion

between ten and fourteen years of age. (v) Of penance. (vi) Of indulgences. Preachers must be careful not to recommend doubtful or fictitious indulgences. Let them propose such as the faithful can gain most frequently, easily, and with greatest fruit. (vii) Of extreme unction. Olive oil is required for this sacrament. The Fathers commend the proposition of the Bishop of Savannah to establish a community of Trappists on lands near St. Augustine, Florida, who would supply genuine olive oil, wine, and beeswax candles for the use of the churches. (viii) Of Holy orders. Clerics cannot be ordained without a canonical title. By Apostolic dispensation, our priests have thus far been ordained *titulo missionis* for the most part. The Holy See is to be petitioned for a continuation of this privilege. (ix) Of Matrimony. Rules are laid down for determining doubts concerning the probable death of soldiers in the late civil war. Mixed marriages are to be discouraged. (x) Of the sacramentals.

Title vi, *Of Divine Worship*.—(i) Of the Sacrifice of the Mass. Priests are never to leave the altar to collect alms from the faithful. Our quasi-parish-priests are not obliged to apply their Mass for their flock on festival days. (ii) Of Benediction and the Forty Hours' Exposition. The latter is to be performed according to the manner sanctioned by the Holy See for the Diocese of Baltimore. (iii) Of Vespers. The rudiments of the Gregorian chant should be taught in the parish schools.

Title vii, *Of Promoting Uniformity of Discipline*.—(i) Of fasts and feasts. Those now in use in each province are to be retained. The Patronal Feast of the Immaculate Conception is, however, to be celebrated in every diocese as of obligation. (ii) Of uniformity in other matters. Bishops should endeavour to use a uniform method of acting in granting matrimonial dispensations. Catholics may be buried with sacred rites in non-Catholic cemeteries if they possess a lot in them, provided it was not acquired in contempt of church law. The poor must be buried gratuitously. Entrance money should not be collected at churches. Orphans are to be cared for. Faculties for blessing cemeteries and church bells may be delegated to priests.

Title viii, *Of Regulars and Nuns*.—(i) When a religious community has accepted a diocesan work, strictly so called, it should not relinquish it without giving the bishop notice six months beforehand. A clear distinction is to be made as to what property belongs to a religious community and what to the diocese. (ii) Nuns are not to make solemn vows until ten years after the taking of simple vows. Bishops are not to permit religious women to travel around soliciting alms.

Title ix, *Of the Education of Youth*.—(i) Of parish schools. Teachers belonging to religious congregations should be employed when possible in our schools. The latter should be erected in every parish. For children who attend the public schools, catechism classes should be instituted in the churches. (ii) Industrial schools or reformatories should be founded, especially in large cities. (iii) A desire is expressed to have a Catholic university in the United States.

Title x, *Of Procuring the Salvation of Souls*.—(i) Of zeal for souls. (ii) Missions in parishes are to be encouraged; missionaries must not, however, interfere in the administration of the parish. (iii) Various confraternities and sodalities are named and recommended and regulations are given for their institution. (iv) Priests, both secular and regular, are exhorted to endeavour to further the conversion of the negroes in our midst.

Title xi, *Of Books and Newspapers*.—(i) Parents should guard their children against bad books. The bishops desire that textbooks in Catholic schools and colleges should be purged of everything contrary

to faith. (ii) Of the dissemination of good books. (iii) Prayer books should not be published until officially revised. (iv) Newspapers are frequently injurious to good morals. When a Catholic newspaper has a bishop's approbation, this means only that he judges that nothing will be published against faith or morals in its pages. He does not make himself responsible, however, for all that the paper contains.

Title xii, *Of Secret Societies*.—The Freemasons were long ago condemned by the Church. The Odd Fellows and Sons of Temperance are also forbidden societies. In general, the faithful may not enter any society which, having designs against Church or State, binds its members by an oath of secrecy. Title xiii, *Concerning the Creation of New Bishops*. Title xiv, *Of the Execution of the Conciliar Decrees*.—A number of important instructions and decrees of the Holy See are appended to the Acts of this council.

III. THE THIRD PLENARY COUNCIL was presided over by the Apostolic Delegate, Archbishop Gibbons of Baltimore. Its decrees were signed by fourteen archbishops, sixty-one bishops or their representatives, six abbots, and one general of a religious congregation. The first solemn session was held 9 November, and the last 7 December, 1884. Its decrees are divided into twelve titles. *Preliminary Title*. All the decrees of the Second Plenary Council remain in force except such as are abrogated or changed by the present council. Title i, *Of the Catholic Faith*. Title ii, *Of Ecclesiastical Persons*.—(i) Of bishops. When a see becomes vacant, the archbishop will call together the consultors and irremovable rectors of the diocese and they shall choose three names which are to be forwarded to Rome and to the other bishops of the province. The latter shall meet together and discuss the candidates. If they wish, they may reject all the names proposed by the clergy and substitute others, but they must give their reasons for this action when sending their recommendation to Rome. (ii) Of diocesan consultors. They should be six or at least four in number. If this be impossible, however, two will suffice. The bishop chooses the consultors, half at his own option, the other half after nomination by the clergy. The bishop should ask the advice of his consultors as to holding and promulgating a diocesan synod; dividing parishes; committing a parish to religious; constituting a committee for diocesan seminaries; choosing new consultors or examiners non-synodically; concerning transactions about church-property where the sum involved exceeds five thousand dollars; exacting new episcopal taxes beyond the limits designated by the canons. Consultors hold office for three years and they may not be removed except for grave reasons. They are to vote collectively. When the episcopal see is vacant, the administrator must ask their counsel in all the above-mentioned cases. (iii) Of examiners of the diocesan clergy. They are to be six in number. Their duties are principally to examine the junior clergy, and the candidates for irremovable rectorships. (iv) Of deans and vicars forane. The institution of these district officials is recommended to the bishops. It is advisable to bestow on them some faculties beyond what other rectors have and some honorary pre-eminence. (v) Of irremovable rectors. Parishes to have such rectors must have a proper church, a school for boys and girls, and revenues sufficiently stable for the support of the priest, church, and school. In all dioceses every tenth rector should be irremovable if the requisite conditions are obtainable. The candidate for such rectorship must have been in the ministry ten years and shown himself a satisfactory administrator in spirituals and temporals. He must also make a prescribed examination (*concursus*). An irremovable rector cannot be removed

from his office except for a canonical cause and according to the mode of procedure contained in the Instruction "Cum Magnopere". (vi) Of the *concursus*. The examination for irremovable rectorships must take place before the bishop or vicar-general and three examiners. Candidates must reply to questions in dogmatic and moral theology, liturgy, and canon law. They are also to give a specimen of catechetical exposition and of preaching. The qualities of the candidates are also to be weighed in forming a judgment. The bishop is to give the vacant rectorship only to a candidate who has received the approving votes of the examiners. (vii) Of the diocesan clergy. 1. Priests ordained for a diocese are bound by oath to remain in it. 2. Alien priests bringing satisfactory testimonials from former bishops may be incardinated in a diocese only after a probation of three or five years, and formal adscription by the ordinary. We may note that this council speaks of presumptive incardination also, but by a later Roman decree (20 July, 1898) that form of adscription is abrogated. 3. Infirm priests should be cared for. 4. Unworthy priests have no just claims to support, yet if they wish to amend, a house governed by regulars should be provided for them. (viii) Of clerical life and manners. Priests should make a spiritual retreat once every year, or at least every two years. They are exhorted to give themselves to solid reading and study. They are to avoid conduct that can afford even the least suspicion of evil. They are not to bring an action against another cleric before a civil tribunal about temporal matters without written permission of the bishop. As to ecclesiastical affairs, they are to remember that judgment pertains only to the church authorities. (ix) Of regulars. The provisions of the papal constitution "Romanos Pontifices" are extended to the United States. This constitution treats of the exemption of regulars from episcopal jurisdiction; of what concerns their ministry in a diocese; and of their temporal possessions. All controversies on these subjects are to be referred to the prefect of the Propaganda. Bishops are to recur to him also in matters concerning institutes of simple vows that are not diocesan but have their own superior-general. Diocesan Institutes, even having a rule approved by the Holy See, are entirely subject to the jurisdiction of the ordinary. Bishops are to see that the laws of enclosure (*clausura*) are observed. Regulations are laid down for the ordinary and extraordinary confessors of nuns. Those who belong to religious brotherhoods, whose members are forbidden to aspire to the priesthood, may not, after leaving such congregation, be ordained for any diocese without a dispensation from Rome.

Title iii, *Of Divine Worship*.—(i) Of celebrating Mass twice on the same day. (ii) Of uniformity in feasts and fasts. In future in all dioceses of this country there are to be the following six feasts of obligation and no others: The Immaculate Conception, Christmas, Circumcision of Our Lord (New Year's Day), Ascension, Assumption, and All Saints' Day. No new dispositions are made as to fast days. (iii) Of the Lord's Day. The faithful are to be exhorted to observe it properly. (iv) Of sacred music. Profane melodies are forbidden. The music should accord with the sacredness of time and place. Psalms are not to be curtailed at Vespers. The Mass must not be interrupted by the length of the choir-singing.

Title iv, *Of the Sacraments*.—(i) Of the baptism of converts. The ritual prescribed for their reception into the Church is to be observed. (ii) Of matrimony. Catholics who marry before a sectarian minister are excommunicated. Mixed marriages are not to be contracted unless promises are given that the Catholic party is in no danger of perversion, and will strive to convert the non-Catholic party. Also that all

the children born of the union are to be brought up Catholics. No dispensation from these promises can be given.

**Title v, Of the Education of Clerics.**—(i) Preparatory seminaries should be instituted. The pupils should be taught Christian Doctrine, English, and at least one other language according to the necessities of the diocese. They must learn to speak and write Latin. Greek is also to be taught. The usual branches of profane learning, not omitting the natural sciences, as well as music and the Gregorian chant are to be part of the curriculum. (ii) Of the greater seminaries. Judgment must be exercised in admitting aspirants to the priesthood and they must be zealously formed to virtue and learning. Two years are to be devoted to a philosophical and four to a theological course. The faculty of theology is to embrace dogmatic and moral theology, Biblical exegesis, church history, canon law, liturgy and sacred eloquence. Great care must be taken in the selection of spiritual directors and professors for the students. Examinations are to be held semi-annually or annually in the presence of the bishop or vicar-general and the examiners of the clergy. Students are to be warned to spend their vacations in a manner becoming the clerical profession. The temporal and spiritual administration of the seminary belongs principally to the bishop; he is to be aided by two commissions, one for spirituals and one for temporals. (iii) Of the principal seminary or university. The Fathers consider the times ripe for creating a Catholic university, and for this purpose they appoint a commission. The university is to be entirely under the management of the episcopate. The bishops should, however, continue to send some of their subjects to Rome, Louvain, and Innsbruck, as the new university is intended for postgraduate theological studies. (iv) Of the examinations of the junior clergy. For five years after ordination, priests must make an annual examination in Scripture, dogmatic and moral theology, canon law, church history, and liturgy. (v) Of theological conferences. All priests having cure of souls must attend ecclesiastical meetings for the discussion of questions of doctrine and discipline. These conferences are to be held four times a year in urban and twice a year in rural districts.

**Title vi, Of the Education of Catholic Youth,** treats of (i) Catholic schools, especially parochial, viz., of their absolute necessity and the obligation of pastors to establish them. Parents must send their children to such schools unless the bishop should judge the reason for sending them elsewhere to be sufficient. Ways and means are also considered for making the parochial schools more efficient. It is desirable that these schools be free. (ii) Every effort must be made to have suitable schools of higher education for Catholic youth.

**Title vii, Of Christian Doctrine.**—(i) Of the office of preaching. (ii) A commission is appointed to prepare a catechism for general use. When published it is to be obligatory. (iii) Of prayer books. (iv) Of books and newspapers. While objectionable writings are to be condemned, Catholics should oppose them also by orthodox newspapers and books.

**Title viii, Of Zeal for Souls.**—(i) Immigrants should be instructed by priests of their own language. (ii) A commission is appointed to aid the missions among Indians and Negroes. (iii) Censures against secret societies are to be made known to the faithful. If Rome has not condemned a particular society by name, it will belong only to a commission consisting of the archbishops of the country to decide whether it falls under the laws of forbidden organizations or not. If they cannot agree, the matter is to be referred to Rome. On the other hand, Catholic

societies, especially those of temperance, are to be encouraged.

**Title ix, Of Church Property.**—(i) The Church's right to hold property. (ii) The bishop is the guardian and supreme administrator of all diocesan property. (iii) Priests are diligently to guard parochial property under the direction of the bishop. If they do not request their salary at the proper time, they are supposed to have renounced their right to it. (iv) In choosing lay trustees only those members of the congregation have a voice, who, being twenty-one years of age, have fulfilled the paschal precept, have paid for a seat in the church during the past year, have sent their children to Catholic schools and belong to no prohibited society. The pastor is ex officio president of the board of trustees. (v) In all churches some seats must be set aside for the poor. Abuses incident to picnics, excursions, and fairs are to be guarded against. Balls are not to be given for religious purposes. It is a detestable abuse to refuse the sacraments to those who will not contribute to collections. Bishops are to determine the stipend proper for ecclesiastical ministries. Foreign priests or religious cannot solicit alms in a diocese without the consent of the ordinary.

**Title x, Of Ecclesiastical Trials.**—(i) Every diocese is to have an episcopal tribunal. (ii) Its officials for disciplinary cases are to be a judge, fiscal procurator or diocesan attorney, attorney for the accused, and a chancellor. To those may be added an auditor, a notary, and apparitors. For matrimonial cases the officials are to be an auditor, defender of the marriage tie, and a notary. The interested parties may also employ advocates. (iii) In criminal causes, the bishop, according as the law and case demand, may proceed either extra-judicially or judicially. This chapter describes the method to be employed in both instances.

**Title xi, Of Ecclesiastical Sepulture.**—Cemeteries should be properly cared for.

**Title xii.** The decrees of this council are binding as soon as they are promulgated by the Delegate Apostolic. At the request of the Fathers, the Holy See permitted the celebration in the United States of the feasts of St. Philip of Jesus, St. Turibius, and St. Francis Solano. It also granted to the bishops, under certain conditions, the power of alienating church goods without previously referring each case to Rome. The Fathers of this council signed the postulation for the introduction of the cause of beatification of Isaac Jogues and René Goupil, martyrs of the Society of Jesus, and of Catherine Tegakwita, an Iroquois virgin. This Third Plenary Council exhibits the actual canon law of the Church in the United States.

WILLIAM H. W. FANNING.

**Baltimore, PROVINCIAL COUNCILS OF.**—These councils have a unique importance for the Church in the United States, inasmuch as the earlier ones legislated for practically the whole territory of the United States public, and furnished moreover a norm for all the later provincial councils of the country. This article touches on only those parts of the legislation which may seem in any way to individualize the discipline of the Church in the United States or depict the peculiar needs and difficulties of its present period.

I. The First Provincial Council, was held in 1829 and was attended by one archbishop and four bishops. Its decrees refer to the enactment of two provincial conventions which may be summarized briefly: Bishop Carroll's Diocese, Synod of 1801, decreed: (No. 3) The ceremonies of baptism need not be

supplied for converted heretics who had been previously validly baptized. (No. 4) As a rule children are not to be confirmed before the age of reason. (No. 5) The offerings of the faithful are to be divided into three parts: for the support of the pastor, the relief of the poor, and the sustentation of the church. (No. 11) The faithful are to be warned that the absolution of priests not approved by the bishop is invalid. (No. 15) None are to be married until they know the Christian Doctrine. Slaves, however, need know only the principal truths, if more cannot be acquired. (No. 16) In mixed marriages the non-Catholic must promise before witnesses to bring up the offspring of the union as Catholics. (No. 17) Hymns and prayers in the vernacular are to be encouraged at evening services. (No. 20) Catholics may work on days of obligation owing to the circumstances of place, but they must hear Mass if possible. (No. 23) The rich are to be warned that they sin grievously if, through their parsimony, pastors cannot be sustained and multiplied. (No. 24) When there is question of refusing Christian burial, the bishop must be consulted beforehand when possible.

The second series of enactments referred to are the articles concerning ecclesiastical discipline sanctioned by the common consent of the Archbishop of Baltimore and the other American bishops in 1810. The main articles are: (No. 2) Regulars should not be withdrawn from pastoral work without the consent of the bishops, if their assistance be deemed a necessity to the existence or prosperity of their missions. (No. 3) The Douay version of the Bible is to be used. (No. 5) Baptism must be conferred in the church where possible. (No. 6) If no sponsor can be obtained, private baptism only is to be administered. (No. 9) The faithful are to be warned against improper theatres, dances, and novels. (No. 10) Freemasons cannot be admitted to the sacraments.

Besides ordering the publication of these decrees along with their own synodical enactments, the fathers of the First Provincial Council decreed: (No. 1) Priests should labour in any mission assigned to them by the bishops. (No. 5) Owing to the abuses of lay trustees all future churches should be consigned to the bishop when possible. (No. 6) Trustees cannot institute or dismiss a pastor. No ecclesiastical patronage exists in this country. (No. 10) Infants of non-Catholics may be baptized if their parents promise to give them a Catholic education, but the sponsor must be a Catholic. (No. 20) In administering the sacraments and in the burial service, Latin and not English must be employed. (No. 31) A ceremonial written in English is to be drawn up. (No. 34) Catholic schools should be erected.

At one of the sessions of this council several lawyers (among them R. B. Taney, afterwards Chief Justice of the Supreme Court of the United States) gave advice to the bishops on points of American law concerning property rights and ecclesiastical courts. In addition to their decrees, the bishops asked and obtained from Rome permission to use for adults the formula of infant baptism; to consecrate baptismal water with the form approved for the missionaries of Peru, and to extend the time for fulfilling the paschal precept, i. e. from the first Sunday of Lent to Trinity Sunday.

II. The Second Council, held in 1833, was attended by one archbishop and nine bishops. The main decrees were: (No. 3) A delimitation of the American dioceses. (No. 4) A method of selecting bishops, which a later Council (Prov. VII) modified. (No. 5) Recommending the entrusting to the Jesuits of the Indian missions in the West, as also (No. 6) the missions among former American slaves, repatriated in Liberia, Africa, to the same fathers. (No. 8)

Bishops are exhorted to erect ecclesiastical seminaries.

III. The Third Council in 1837 was composed of one archbishop and eight bishops. Its decrees enacted: (No. 4) Ecclesiastical property is to be secured by the best means the civil law affords. (No. 6) Ecclesiastics should not bring ecclesiastical cases before the civil tribunals. (No. 7) Priests are prohibited from soliciting money outside their own parishes. (No. 8) Pastors are warned against permitting unsuitable music at Divine worship. (No. 9) The two days following Easter and Pentecost are to be days of obligation no longer. (No. 10) Wednesdays in Advent are not to be days of fast and abstinence.

IV. The Fourth Council in 1840 issued decrees signed by one archbishop and twelve bishops as follows: (No. 1) In mixed marriages no sacred rites or vestments are to be used. (No. 5) Temperance societies are recommended to the faithful. (No. 6) Pastors are to see that those frequenting public schools do not use the Protestant version of the Bible or sing sectarian hymns. They must also employ their influence against the introduction of such practices into the public schools. (No. 8) Bishops are to control ecclesiastical property and not permit priests to hold it in their own name. Among those attending this council was the Bishop of Nancy and Toul, France, to whom the fathers granted a right to a decisive vote. A letter of consolation was sent by the council to the persecuted bishops of Poland, and another of thanks to the moderators of the Leopold Institute of Vienna, Austria.

V. In 1843, the Fifth Council was attended by one archbishop and sixteen bishops. Among its enactments were: (No. 2) Laymen may not deliver orations in churches. (No. 4) It is not expedient that the Tridentine decrees concerning clandestine matrimony be extended to places where they have not been already promulgated. (No. 5) Pastors are to be obliged to observe the law of residence. (No. 6) Priests may not borrow money for church uses without written permission of the bishop.

VI. The Sixth Council (one archbishop and twenty-two bishops attending) in 1846, decreed: (No. 1) that the Blessed Virgin Mary conceived without sin is chosen as the patron of the United States. (No. 2) Priests ordained *titulo missionis* may not enter a religious order without permission of their ordinaries. (No. 3) The canons concerning the proclaiming of the banns of matrimony are to be observed. At the request of the fathers, the Holy See sanctioned a formula to be used by the bishops in taking the oath at their consecration.

VII. In 1849 two archbishops and twenty-three bishops held the Seventh Council. The main decrees were: (No. 2) The Holy See is to be informed that the fathers think it opportune to define as a dogma the Immaculate Conception of the Blessed Virgin Mary. (No. 3) A change in the election of bishops is introduced. (No. 5) Bishops are not to give an *exeat* at the request of a priest unless it be certain that another bishop will receive him. (No. 6) Priests are forbidden to assist at the marriages of those who have already had a ceremony performed by a Protestant minister, or who intend to have such ceremony performed. (No. 7) A national council should be held in Baltimore in 1850, by Apostolic Authority. The fathers moreover petitioned the Holy See to raise New Orleans, Cincinnati, and New York to metropolitan dignity and to make a new limitation of the Provinces of Baltimore and St. Louis. They desired likewise that Baltimore should be declared the primatial see of the Republic. The pope granted the first part of the petition, but deferred acting on the question of the primacy.

VIII. The Eighth Council was assembled in 1855. One archbishop and seven bishops or their represen-

natives attended it. This council enacted: (No. 1) The fathers joyfully receive the dogmatic decision of the pope defining the Immaculate Conception of the Blessed Virgin Mary. (No. 2) Priests are warned that after August, 1857, adults must be baptized according to the regular formula for that service in the Roman Ritual and not according to that for infant baptism. (No. 4) No tax is to be demanded for dispensations from matrimonial impediments. (No. 6) Bishops are exhorted to increase the number of their diocesan consultants to ten or twelve. It will not be necessary, however, to obtain the opinion of all of them, even on important matters. For this, the counsel of three or four will suffice. On the death of the bishop, however, all the consultants shall send to the archbishop their written opinions as to an eligible successor for the vacant see. (No. 7) The various diocesan synods should determine on the best mode of providing for the proper support of the bishop. (No. 8) The fathers desire to see an American College erected in Rome. To the Acts of this council is appended a decree of the Holy See, sanctioning a mode of procedure in judicial causes of clerics.

IX. The Ninth Council in 1858 was attended by one archbishop and seven bishops. The main work of this synod consisted in drawing up petitions to the Holy See concerning a dispensation from abstinence on Saturdays; the conceding of certain honorary privileges to the Archbishop of Baltimore; the granting to the bishops the permission to allow the Blessed Sacrament to be kept in chapels of religious communities not subject to the law of enclosure. All of these petitions were granted by the Holy See. That concerning the Archbishop of Baltimore granted to him, as ruler of the mother-church of the United States, an honorary pre-eminence, to consist in his taking precedence of any other archbishop in the country, without regard to promotion or consecration, and in his having the place of honour in all councils and conventions. The fathers also sent to Rome an inquiry as to the nature of the vows (solemn or simple) of religious women, especially of Visitation Nuns in the United States, an answer to which was deferred to a later time (1864). The question was also discussed as to whether Archbishop Kenrick's version of the Bible should be approved for general use. It was finally decided to wait for Dr. John Henry Newman's expected version, and then to determine along with the bishops of other English-speaking countries on one common version.

X. In 1869, the Tenth Council enacted decrees that were signed by one archbishop, twelve bishops, and one abbot. Among these decrees we note: (No. 5) Bishops are exhorted to establish missions and schools for the negroes of their dioceses. (No. 7) Priests are to be appointed to aid the bishops in administering the temporal concerns of the diocese. They are also to supervise the spiritual and material affairs of religious women. At the request of the fathers, the Holy See extended for five years the privilege of using the short formula in the baptism of adults.

It should be remarked that the first seven provincial councils of Baltimore were practically, though not formally, plenary councils of the United States.

The numbers of decrees indicated in the text will be found conformable to any authorized edition of these councils; *Acta et Decreta S. Conc. Recentiorum. Collectio Lacensis, Auctoribus Presbyt., S. J. (Freiburg, 1875)*, contains in vol. III, the full text of the decrees of these ten councils; *Concilia Provincialia Baltimore Habita ab Anno, 1889 ad 1849* (Baltimore, 1851), gives the acts of only the first seven provincial councils.

WILLIAM H. W. FANNING.

**Baltus, JEAN FRANÇOIS**, theologian, b. at Metz, 8 June, 1667; d. at Reims, 9 March, 1743. He entered the Society of Jesus, 21 November, 1682, taught humanities at Dijon, rhetoric at Pont-à-Mousson, Scripture, Hebrew, and theology at Strasburg, where

he was also rector of the university. In 1717, he was general censor of books at Rome, and later rector of Châlon, Dijon, Metz, Pont-à-Mousson, and Châlons. He left several works of some value to the Christian apologist, notably: (1) "Réponse à l'histoire des oracles de M. de Fontenelle", a critical treatise on the oracles of paganism, in refutation of Van Dale's theory and in defence of the Fathers of the Church (Strasburg, 1707), followed in 1708 by "Suite de la réponse à l'histoire des oracles". (2) "Défense des S. Pères accusés de platonisme" (Paris, 1711); this is a refutation of "Platonisme dévoilé", a work of the Protestant minister Souverain of Poitiers. (3) "Jugement des SS. Pères sur la morale de la philosophie païenne" (Strasburg, 1719). (4) "La religion chrétienne prouvée par l'accomplissement des prophéties de l'Ancien et du Nouveau Testament suivant la méthode des SS. Pères" (Paris, 1728). (5) "Défense des prophéties de la religion chrétienne" (Paris, 1737). To these may be added a funeral oration on the Most Rev. Peter Creagh, Archbishop of Dublin (Strasburg, 1705), the "Acts of St. Balaam, Martyr", and the "Life of St. Febronia, Virgin and Martyr" (Dijon, 1720 and 1721 respectively).

MARK J. MCNEAL.

**Balue, JEAN**, a French cardinal, b. probably c. 1421, in Poitou; d. 5 October, 1491, at Ripatransone (March of Ancona). He has been frequently, but erroneously, called "de la Balue". He was graduated as licentiate in law about 1457, and at an early date entered the ecclesiastical state. He became so intimate with Jacques Juvénal des Ursins, Bishop of Poitiers (1449-57), that the latter named him executor of his will. The charge that in this capacity he misappropriated funds destined for the poor must be received with reserve. After the death of Des Ursins, Balue entered the service of John de Beauvau, Bishop of Angers (1451-67), who made him vicar-general (1461). In 1462, he accompanied his bishop to Rome, and thenceforth his career was marked by clever and unscrupulous intrigue. On his return, he was introduced by Charles de Melun to King Louis XI (1461-83), and, owing to the royal favour, his rise both in ecclesiastical and civil affairs was rapid. In 1464, Louis XI made him his almoner; the same year, Balue received the Abbeys of Fécamp and Saint-Thierry (Reims) and in 1465, that of Saint-Jean-d'Angély, two priories, and the Bishopric of Evreux. Having obtained the deposition of his benefactor, Beauvau, from the See of Angers, he secured the see for himself (1467). His intrigues in the affair of the Pragmatic Sanction procured him, at the request of Louis XI, the cardinalate, to which Paul II (1464-71) reluctantly raised him (1467). Guilty of high treason, he was arrested two years later (1469) with his accomplice William d'Harau-court, Bishop of Verdun (1456-1500). As a cardinal, he could not be judged by a civil tribunal, but the negotiations between the pope and the king, regarding his trial, remaining fruitless, he was held captive by Louis XI for eleven years (1469-80). The baseless story of his detention in an iron cage originated in Italy in the sixteenth century. After many fruitless attempts, the pope in 1480 obtained Balue's freedom through Cardinal Julian de la Rovère, later Pope Julius II (1503-13). Balue went to Rome with the cardinal, was restored to all his rights and dignities (1482) and was named Bishop of Albano (1483). At the death of Louis XI (1483) he came, at the request of Charles VIII, as papal legate to France and left it as French ambassador to Rome (1485). Balue succeeded, moreover, in securing, besides several benefices, the nomination as Protector of the Order of St. John of Jerusalem and Guardian to Prince Djem, brother of the Sultan of Turkey.

But his end was near; he died in 1491 and was buried at Rome. He had attained numerous dignities and amassed wealth, but dishonoured the Church.

FORGEOT, *Jean Baluze* (Paris, 1895); PASTOR, *Gesch. der Päpste* (Freiburg, 1904), 4th ed., II, 372-375; tr. IV, 102-105 (London, 1894).

N. A. WEBER.

**Baluze**, ETIENNE, a French scholar and historian, b. at Tulle, 24 December, 1630; d. in Paris, 28 July, 1718. His education was commenced at the Jesuit college of his native town, where he distinguished himself by his intelligence, his constant devotion to study, and his prodigious memory. Obtaining a scholarship on the recommendation of his professors, he completed his classical courses at the College of St. Martial, which had been founded at Toulouse, in the fourteenth century, by Pope Innocent VI for twenty Limousin students. Resolved to devote himself to the study of literature and history, Baluze set to work with great zeal, perseverance, and success. Critical and painstaking in the investigation of facts, he undertook to study the origins of the French nation, its customs, laws, and institutions, using for this purpose only genuine documents and original records instead of fanciful legends and fabulous stories, thus introducing a scientific spirit into historical research, philology, and chronology.

At the age of twenty-two he wrote a remarkable work of historical criticism. A Jesuit, Father Frizon, had just published a book, "*Gallia purpurata*", containing the lives of the French cardinals, which met with great success until Baluze gave out (1652) his "*Anti-Frizonius*" in which he pointed out and corrected many errors made by Father Frizon. In 1654, Pierre de Marca, Archbishop of Toulouse, one of the greatest French scholars in the seventeenth century, appointed Baluze his secretary. Upon the death of his patron, in June, 1662, Baluze published the "*Marca Hispanica*", a remarkable historical and geographical description of Catalonia. This work made him known to Colbert, who appointed him his librarian, a position he held for thirty years, many years, that is, after Colbert's death. The excellent collection of manuscripts and books which was found in the latter's library was the fruit of his care and advice. His own collection was also very important; it comprised about 1100 printed books, 957 manuscripts, more than 500 charters, and seven cases full of various documents. Baluze is to be ranked among those benefactors of literature who have employed their time and knowledge in collecting from all sources ancient manuscripts, valuable books, and state papers. He annotated them with valuable comments, being very well acquainted with profane and ecclesiastical history as well as with canon law, both ancient and modern.

The number of works Baluze published is considerable; we shall mention the most important among them: (1) "*Marii Mercatoris opera*" (1684), collated with manuscripts and enriched with notes illustrative of the history of the Middle Ages. (2) "*Regum Francorum capitularia*" (1677). This collection contains several capitularies never published before. Baluze corrected them with great accuracy and in his preface gave an account of the original documents and of the authority of the several collections of the capitularies. (3) "*Epistolæ Innocentii Papæ III*" (1682); not a complete collection, as Baluze was refused the use of the letters preserved in the Vatican. (4) "*Conciliorum nova collectio*" (1683), containing such pieces as are wanting in Labbe's collection. (5) "*Les vies des papes d'Avignon*" (1693), in which he gave a preference to Avignon over Rome as the seat of the Popes. (6) "*Miscellanea*" (1680), of which Mansi published a new edition in 1761. (7) "*Historia Tutelensis*" (1717), or the history of Tulle. This was Baluze's

favourite work. He wrote it out of love for his native place, "*ne in nostrâ patriâ peregrini atque hospites esse videamur*". It embraces a period of eight centuries, from the founding of the city (900), to the episcopate of Daniel de Saint-Aulaire (1702). The history of Tulle is divided into three books, the first dealing with the counts, the second with the abbots, and the third with the bishops.

In 1670, Baluze was appointed professor of canon law at the Collège de France, of which he became director in 1707, with a pension awarded by the king. But he soon felt the uncertainty of courtly favours. Having attached himself to Cardinal de Bouillon, who had engaged him to write the history of his family, he became involved in the cardinal's disgrace. Baluze was accused of having used spurious papers in his patron's interest. Consequently he received a *lettre de cachet* ordering him to retire to Lyons. Being expelled from the university and deprived of his personal fortune, he wandered from Rouen to Blois, from Blois to Tours, and later to Orléans, where he lived until 1713. After the peace of Utrecht, the family of Cardinal de Bouillon recovered the favour of the king, and Baluze was recalled, but never again employed as a professor or as a Director of the Collège de France. He lived far from Paris and was engaged in publishing St. Cyprian's works at the time of his death. Baluze, together with Luc d'Achéry, Mabillon, Sainte-Marthe, Ducange, Montfaucon, and others, gathered an immense quantity of rich materials which the historians of the nineteenth century, such as Sismondi, Guizot, Augustin and Amédée Thierry, Michelet, Henri Martin, Fustel de Coulanges, were to use with the greatest skill.

JEAN LE BARS.

**Bamber** (*alias* READING), EDWARD, VENERABLE, priest and martyr, b. at the Moor, Poulton-le-Fylde, Lancashire; executed at Lancaster 7 August, 1646. Educated at the English College, Valladolid, he was ordained and sent to England. On landing at Dover, he knelt down to thank God, which act, observed by the Governor of the Castle, was the cause of his apprehension and banishment. He returned again, and was soon afterwards apprehended near Standish, Lancashire; he had probably been chaplain at Standish Hall. On his way to Lancaster Castle he was lodged at the Old-Green-Man Inn near Cloughton-on-Brock, and thence managed to escape, his keepers being drunk. He was found wandering in the fields by one Mr. Singleton of Broughton Tower (who had been warned in a dream to help him), and was assisted and sheltered by him. Arrived the third time, he was committed to Lancaster Castle, where he remained in close confinement for three years, once escaping, but recaptured. At his trial with two other priests, Whitaker and Woodcock, two apostates witnessed against him that he had administered the sacraments, and he was condemned to die. He suffered with great constancy, reconciling to the Church a felon executed with him, and encouraging his fellow-martyrs to die bravely. His conduct so enraged the persecutors that they urged the executioner to butcher him in a more than usually cruel and savage manner. An ode composed on his death is still extant.

BEDE CAMM.

**Bamberg**, ARCHDIOCESE OF, in the kingdom of Bavaria, embraces almost the whole of the presidency of Upper Franconia, the northern part of

**Middle Franconia** (in particular the cities of Nuremberg, Fürth, Ansbach, and Erlangen), parts of Lower Franconia, of the Upper Palatinate, and of the Duchy of Saxe-Coburg. According to the census of 1 December, 1900, the archdiocese then contained 379,442 Catholics; in 1907 the Catholics numbered 410,000, and members of other denominations 720,000. Bamberg as an ecclesiastical province includes, besides the Archdiocese of Bamberg, the suffragan dioceses of Würzburg, Eichstätt, and Speyer, all of Bavaria.

**HISTORY.**—In the early centuries the region afterwards included in the Diocese of Bamberg was inhabited for the most part by Slavs; the knowledge of Christianity was brought to these people chiefly by the monks of the Benedictine Abbey of Fulda, and the land was under the spiritual authority of the Diocese of Würzburg. The Emperor Henry II and his pious wife Kunigunde decided to erect a separate bishopric at Bamberg, which was a family inheritance. The emperor's purpose in this was to make the Diocese of Würzburg less unwieldy in size and to give Christianity a firmer footing in the districts of Franconia. In 1008, after long negotiations with the Bishops of Würzburg and Eichstätt, who were to cede portions of their dioceses, the boundaries of the new diocese were defined, and John XVIII granted the papal confirmation in the same year. The new cathedral was consecrated 6 May, 1012, and in 1017 Henry II founded on Mount St. Michael, near Bamberg, a Benedictine abbey for the training of the clergy. The emperor and his wife gave large temporal possessions to the new diocese, and it received many privileges out of which grew the secular power of the bishops (cf. Weber in "Historisches Jahrbuch der Görresgesellschaft" for 1899, 326-345 and 617-639). Pope Benedict VIII during his visit to Bamberg (1020) placed the diocese in direct dependence on the Holy See. In 1248 and 1260 the see obtained large portions of the estates of the Counts of Meran, partly through purchase and partly through the appropriation of extinguished fiefs. The old Bishopric of Bamberg was composed of an unbroken territory extending from Schlüsselfeld in a north-easterly direction to the Franconian Forest, and possessed in addition estates in the Duchies of Carinthia and Salzburg, in the Nordgau (the present Upper Palatinate), in Thuringia, and on the Danube. By the changes resulting from the Reformation the territory of this see was reduced nearly one half in extent; in 1759 the possessions and jurisdictions situated in Austria were sold to that State. When the secularization of church lands took place (1802) the diocese covered 1276 square miles and had a population of 207,000 souls.

Up to this period the Diocese of Bamberg had been ruled by 63 bishops. The first eight were appointed by the German emperors; after this they were chosen by the clergy and people jointly; still later they were elected by the cathedral chapter. On several occasions, when the election was disputed, the appointment was made by the pope. The first bishop, Eberhard I (1007-40), chancellor to Henry II, greatly increased the possessions of the diocese; Suidger (1040-46) became pope under the name of Clement II; Hartwig (1047-53) defended the rights of his see against the Bishop of Würzburg and received the pallium from the pope in 1053; Adalbero (1053-57) was followed by Günther (1057-65) who held the first synod of Bamberg (1058). Günther died at Odenburg (Sopron) in Hungary, while on a crusade. Hermann (1065-75) acquired the Principality of Banz; in the struggle between the empire and the papacy he took the side of the empire. He was charged with obtaining his election by simony and deposed. Rupert (1075-1102), as partisan of Henry IV, was a member of the pseudo-Synod of

Brixen which declared Pope Gregory VII to be deposed; on this account the bishop was excommunicated. During his episcopate Rupert did much for the encouragement of classical learning in the diocese. St. Otto I (1102-39), the Apostle of the Prussians and Pomeranians, had a large share in the reconciliation of the pope and the emperor by the Concordat of Worms; he founded numerous churches and monasteries and during a famine showed large-hearted generosity to his subjects. Otto's immediate successors were men of less distinction: Egilbert (1139-46), who had been Patriarch of Aquileia; Eberhard II of Otelingen (1146-70) who with great pomp celebrated, in 1147, the canonization of Henry II. Eberhard increased the territory of the diocese, but, being a partisan of Frederick I, he was for a time under sentence of excommunication. He was succeeded by Hermann II, of Aurach (1170-77). Otto II, of Andechs (1177-96), rebuilt in 1181 the cathedral, which had been burned. Otto II understood how to remain loyal both to the emperor and the pope. Thiemo (1196-1202) obtained in 1200 the canonization of the Empress Kunigunde, joint foundress with the emperor Henry II of the see; Conrad, Duke of Silesia (1201-03), died soon after his election; Eckbert, Count of Meran and Andechs (1203-37), was suspected of being privy to the murder of King Philip of Germany in 1208; the ban of the empire was proclaimed against him, and he was removed from his see, but in 1212 he was restored, and in 1217 took part in an unsuccessful crusade to Palestine. In spite of his warlike disposition he was zealous in promoting the spiritual life of his clergy. Poppo I, Count of Andechs (1237-42), soon retired from his office; Henry I of Bilberstein (1242-51) received from the emperor the title of Prince-Bishop for himself and his successors, as well as numerous rights of sovereignty. Thenceforth the Bishops of Bamberg had ecclesiastical precedence directly after the archbishops.

Their power was encroached on, however, from two directions; on the one side by the cathedral canons, the so-called Brothers of St. George, who abandoned the *vita communis* during the episcopate of Bishop Berthold of Leiningen (1257-85) and developed gradually into a cathedral chapter. In time the cathedral chapter of Bamberg was chosen, as in other German dioceses, exclusively from the nobility; the chapter, by so-called election pacts (*Wahlkapitulationen*) forced the bishops to abandon numerous privileges and many of the church livings under their control in favour of the chapter, limited the bishop's disciplinary authority over the clergy as well as his right to levy taxes, and abridged other powers. The episcopal authority was also limited, as in other parts of Germany, by the growing power of the towns which rebelled against the secular jurisdiction of the ecclesiastical princes. Thus the city of Bamberg revolted (1291) against Arnold of Solms (1286-96), a quarrel which was settled in 1291 by arbitration in favour of the bishop. During this episcopate the finances of the diocese became much involved, and the indebtedness increased under Leopold I of Gröndlach (1297-1303). A Dominican appointed by the pope, Wulfing of Stubenberg (1304-18), founded in Bamberg a Dominican monastery and a convent of Dominican nuns. Several of the succeeding bishops ruled for brief periods: John of Güttingen (1322-23), afterwards Bishop of Freising; Henry II of Sternberg (1324-28), a Dominican; John, Count of Nassau (1328-29), who died before consecration; Werntho Schenk of Reichenegg (1329-35); Leopold II of Egloffstein (1335-43), who maintained ecclesiastical discipline in his diocese and shrewdly kept out of the quarrels between pope and emperor. Frederick I of Hohenlohe (1344-52) did much to establish peace between the imperial

and ecclesiastical authorities; in 1348 he had a register (*turbarium*) drawn up of all the estates and rights belonging to the see. Leopold III of Bebenburg (1353-63) was granted the right of coinage and re-established the disordered finances of the see. Frederick II of Truhendingen (1364-66) was followed by Louis, Margrave of Meissen (1366-74), who soon became Elector of Mainz. Lamprecht of Brunn (1374-98), formerly Bishop of Strasburg, imposed new taxes in order to reduce the indebtedness of the see. This led to a revolt of the citizens of Bamberg, and the bishop was put to flight in 1379; in 1380 he conquered the city and imposed heavy penalties upon it. Albert, Count of Wertheim (1399-1421), settled a quarrel of many years' standing with the Burgrave of Nuremberg and protected the Jews living in the diocese. Frederick III of Aufsess (1421-31), one of the most religious princes of his age, convened a synod in order to restore ecclesiastical discipline and to check the avarice and immorality of the clergy; the opposition to these reforms, especially that of the cathedral canons, forced him to resign the see (d. 1440). Anthony of Rotenhan (1432-59) was unable to improve the bad condition of the episcopal finances of the bishopric; in 1440 the citizens of Bamberg forced him to flee, but he soon afterwards took the city by storm and executed a number of the citizens. The diocese was several times devastated by the Hussites. More peaceful times now followed: George I of Schaumburg (1459-75), an able ruler, restored ecclesiastical discipline among the people, clergy, and monasteries, and encouraged the newly discovered art of printing (the printer Pfister had a press at Bamberg as early as 1460). Philip of Henneberg (1475-87) continued the labours of his predecessor, redeemed a large number of the estates mortgaged by Anthony of Rotenhan to the Jews, and in 1478 drove the Jews out of the diocese. Henry III Gross of Trockau (1487-1501) was an energetic organizer and issued a number of laws; in 1491 he held a synod. Veit I Truchsess of Pommersfelden (1501-03) and George II Marschalk of Ebnet (1503-05) had very brief reigns.

The period of the Reformation was an unfortunate one for the diocese. Luther's doctrines very soon found entrance into its territory. The fortieth bishop, George III Schenk of Limburg (1502-22), did much to encourage art and the erection of churches, but he showed himself weak in his opposition to the religious innovations and allowed the writings of the Reformers to be printed and spread in the diocese. Luther's doctrines also found friends and well-wishers in the cathedral chapter. Weigand of Redwitz (1522-56) desired to make a stand against the progress of the Reformation, but was prevented by political and social conflicts. In 1524 the peasants, excited by the preaching of evangelical freedom by the adherents of the new teachings, revolted in several places and refused to pay tithes. The city of Bamberg also rebelled against the bishop; the citizens called on the peasants for aid, plundered the episcopal palace, the houses of the canons and clergy, the monasteries, and a large number of estates in the open country which belonged to the nobles and clergy. George von Truchsess, commander of the army of the Swabian Confederation, restored order; a number of the revolutionary leaders were executed, a heavy punishment was inflicted on the city of Bamberg, and the nobles who had suffered loss received unnecessarily large compensation. In spite of the bishop's zeal for souls, the Reformation spread through the diocese, and Protestantism gained a footing, especially in Nuremberg and in the Franconian possessions of the Electors of Brandenburg. This period was followed by an era of calm during the episcopates of George IV Fuchs von Rugheim (1556-61), Veit II of Würzburg (1561-77), John

George I Zobel of Giebelstadt (1577-80), Martin von Eyb (1580-83); none of these men, however, were able to correct abuses and reduce the debts of the see. The cathedral chapter was chiefly responsible for the troubles under which the diocese suffered; their nepotism, simony, avoidance of ordination to the priesthood, and, in many cases, their evil lives (concubinage was common) prevented reform. Ernst von Mengersdorf (1583-91) took energetic measures against the moral decay of clergy and people; in 1585 he founded a seminary in Bamberg for the training of priests; he also did much to improve the material welfare of the people. Neithart von Thüngen (1591-98) laboured with great success in behalf of the counter-Reformation; he provided for the education of the clergy, enlarged the ecclesiastical seminary, and re-established the Catholic religion in his territory in accordance with the then accepted principles of law. A less successful episcopate was that of John Philip von Gebattel (1599-1609), during whose reign the pest desolated the diocese. John Gottfried von Aschhausen (1609-22), who, after 1617, was also Bishop of Würzburg, took energetic measures against concubinage among the clergy. In 1612 he called in the Jesuits, to whom he gave the house and church of the Carmelites; he put the Jesuits in charge of the ecclesiastical seminary and made them the cathedral preachers. In this way the bishop insured the reform of his clergy and the spiritual renewal of Catholicism. There is one stain on his memory which also rests on that of his successor: the toleration and encouragement of trials for witchcraft.

Many misfortunes befell the diocese during the Thirty Years War; among these were heavy war imposts, spoliation, and devastation. In 1632 Bamberg was conquered by the Swedes, and in 1633 was obliged to recognize Bernard of Weimar as its ruler. Bishop John George II Fuchs von Dornheim (1623-33) died in Carinthia far away from his see. Franz von Hatzfeld (1633-42) was not able to enter his diocese until 1635. Melchior Otto Voit of Salzburg (1642-53) changed the gymnasium into a university in 1647; his successors, Philip Valentine Voit von Reineck (1655-72), Philip von Dernbach (1672-83), Marquard Sebastian Schenk von Stauffenberg (1683-93), followed his example in encouraging the spiritual activity of the Jesuits and other orders, in the improvement of schools, and in reducing the indebtedness of the diocese. A time of great prosperity was the period of the two Counts von Schönborn, Lothair Franz (1693-1729), and Frederick Charles (1729-46). After 1695 the former of these two bishops, Lothair Franz, was also Elector of Mainz; he built the prince-bishop's palace (now a royal residence), a large college for the Jesuits, as well as several castles, and was a great patron of art and learning; the latter, Frederick Charles, added faculties of law and medicine to the university and adorned the city with numerous public buildings. On account of his pulpit eloquence his contemporaries gave him the name of the German Fleury. The reigns of the next bishops, John Philip Anthony von Frankenstein (1746-53) and Franz Conrad, Count von Stadion (1753-57), were also peaceful. During the administration of Adam Frederick, Count von Seinsheim (1757-79), the diocese suffered greatly from the Seven Years War; during its progress the Prussians ravaged and plundered the region, levied contributions on the inhabitants, and carried off the church treasures. When pestilence and famine followed the other miseries of war the bishop showed great liberality in providing for his starving subjects. Franz Ludwig von Erthal (1779-95), who was at the same time Bishop of Würzburg, was another prelate who aimed to promote the welfare of the diocese; he issued wise laws, tried to equalize the burdens of taxation, founded charitable institutions (the general hospital

at Bamberg among them), and raised the standard of the clergy. But although personally religious, in the political relations of the Church he yielded in a measure to the prevailing tendencies of the *Aufklärung* (Illumination) movement of his day. Christoph Franz von Buseck (1745–1802) was the last Prince-Bishop of Bamberg. In 1796 he took refuge at Prague from the French invasion, and in 1799 at Saalfeld. He had only just returned, in 1802, when Bavaria seized his prince-bishopric; and in 1803 the delegates of the empire formally enacted the secularization of Bamberg, and allotted it to be a possession of the Elector of Bavaria. All the provostships and monasteries were then suppressed, the university was changed into the still extant lyceum, and the prince-bishop was pensioned.

Upon the death of von Buseck (1805) George Charles von Fechenbach, Bishop of Würzburg, administered the affairs of the diocese until 1808. After this the see remained vacant for ten years; the ecclesiastical government was carried on by a vicariate-general, consisting of a president and eight counsellors. The Concordat agreed upon between Bavaria and Rome in 1817 brought in a new era. Bamberg was made an archbishopric with boundaries as given at the beginning of this article. The first archbishop, Count Joseph von Stubenberg, previously Prince-Bishop of Eichstätt, took possession of the archiepiscopal see of Bamberg in 1818 and administered both dioceses until his death in 1824. Bishop von Stubenberg deserves great credit for the manner in which he protected the property of the Catholic Church. He was followed by (1824–42) Joseph Maria, Freiherr von Fraunberg, who had been Bishop of Augsburg, (1842–58) Boniface Caspar von Urban, (1858–75) Michael von Deinlein, who founded a seminary for boys and encouraged Catholic associations and missions among the people, (1875–90) Frederick von Schreiber, and (1890–1904) Joseph von Schork, a noted pulpit orator. Archbishop von Schork promoted missions (*Volkmissionen*) among the people, as well as charitable and social organizations among clergy and laity. Frederick Philip von Abert (b. at Münnerstadt, 1 May, 1852) was appointed Archbishop, 30 January, 1905.

**ECCLIASTICAL STATISTICS.**—The Archdiocese of Bamberg is divided into the archiepiscopal commissariat of the city of Bamberg and 20 rural deaneries. The diocesan year-book for 1906 gives: 194 parishes and dependent stations; 35 curacies; 113 chaplaincies; 58 benefices; 583 churches and chapels; 406 secular clergy; 29 regular clergy; 788 Catholic parish schools; 23 Catholic district school inspectors; 202 local school inspectors. The cathedral chapter is composed of 1 provost, 6 deans, 10 canons, 1 honorary canon, and six curates. The secular priests have a clerical association (*Fœdus Ottonianum*) with 320 members and a home for invalid priests; the association has also a retiring fund (*Emeritenfonds*) of \$92,500. There are 7 houses of male orders, with 90 members, namely: 4 Franciscan with 17 priests and 29 brothers; 1 of Calced Carmelites with 5 priests, 3 clerics, and 7 brothers; 1 of Conventual Minorites, with 5 priests, 5 brothers, and 3 novices; 1 of Brothers of Charity, with 2 priests, 11 brothers, and three novices. The archdiocese contains a large number of houses of the female orders and congregations: 17 houses, in 8 localities, of the English Ladies (*Englische Fräulein*) with 223 inmates; 13 houses of the Poor School-Sisters, with 123 inmates; 3 houses of the Franciscan Sisters, with 11 inmates, from the mother-house of Maria-Stern at Augsburg; 8 houses of the Tertiary Sisters of St. Francis, from Mallerstorf, with 35 inmates; 8 houses of the Franciscan Sisters, from the convent of Dillingen with 43 inmates; 5 houses of Sisters of Charity of St. Vincent de Paul with 55 inmates; 17 houses in 10 localities contain-

ing 107 inmates, of the Sisters of the Most Holy Saviour from the mother-house at Oberbronn, with 107 inmates; 12 houses, with 32 inmates, of the Daughters of the Holy Redeemer from the mother-house at Würzburg; 2 convents, with 11 inmates, of the Sisters of Oberzell; making a total of 85 houses with 640 female religious. For the training of the clergy there are an archiepiscopal seminary for priests (50 students) and an archiepiscopal seminary for boys (75 pupils). The students of the seminary (*Priesterseminar*) are educated at the Royal Lyceum, which has philosophical and theological faculties and 9 clerical professors; the pupils of the seminary for boys' school (*Knabenseminar*) attend the two gymnasia of Bamberg in each of which an ecclesiastic acts as religious instructor (*Religionslehrer*). The clergy have also charge of the von Aufsess seminary and home for Catholic students. The Franciscans have at Bamberg a seminary for students at the gymnasia who wish to enter the order after completing their studies. Of the female congregations, the English Ladies conduct 3 Academies and boarding-schools for girls, and 7 primary girls' schools; the other congregations conduct common schools, housekeeping and industrial schools, and crèches. The orders and congregations in the diocese have some 90 charitable institutions under their care, among these are: 15 alms-houses and infirmaries; 12 hospitals; 22 crèches; 15 centres for obtaining visiting nurses; 1 insane asylum; 4 homes for unemployed servants; 5 poor-houses, etc. Among the Catholic societies in the diocese may be mentioned: 50 Associations for Workingmen and Mechanics; 14 Journeymen's Associations (*Gesellenvereine*); 7 Apprentices' Societies; 1 Workingwomen's and 1 Shopgirls' Association; the Ludwig-Mission Association; the St. Boniface Association; the Christian Family Association; the Society of Christian Mothers; the Catholic Men's Society, the People's Union for Catholic Germany, etc.

The most important ecclesiastical building of the diocese is the cathedral. The edifice erected by the Emperor Henry II, the Saint, was destroyed by fire in 1081; the new cathedral, built by St. Otto of Bamberg, was consecrated in 1111, and in the thirteenth century received its present late-Romanesque form. It is about 309 feet long, 92 feet broad, 85 feet high, and the four towers are each about 266 feet high. Among the finest of its monuments is that to the Emperor Henry II and his Empress Kunigunde, considered the masterpiece of the sculptor Tilman Riemenschneider. Among other noteworthy churches of the city are the twelfth-century church of the former Benedictine abbey of St. Michael and the upper parish church, a Gothic building dating from 1387. Among the noted churches of the diocese are those of the Fourteen Martyrs, Gösswein, and Mariaweier—all places of pilgrimage; the Gothic church of Our Lady at Nuremberg, and the churches of the former abbeys of Banz and Ebrach.

JOSEPH LINS.

**Banaiah** (A. V. Benaiah; Kenrick, Banaiah; Heb. בְּנֵי־יָהוָה, also בְּנֵי־יָהוָה, "Jehovah hath built up"—Gesenius; Gr. Βαναΐας, Banaia; Lat. Banaia, Banaia), the name of several men mentioned in the Bible. The orthography varies, but the component elements of the various forms are the same.

The most famous of all who bore the name was "the son of Joiada, the priest"—"the most valiant among the thirty"—"captain of the third company for the third month" (I Par., xxvii, 5, 6). The meaning of the text is not clear; he seems to have been a priest and one of the principal officers at court. "Joiada, the son of Banaiah" (I Par., xxvii, 34) may be a false reading, in which the names have been interchanged. Banaiah is credited with three notable exploits that required strength and courage: (a) He killed two lions, or perhaps brave warriors of Moab ("two lion-like champions of Moab"—Gesenius, s. v. לִיְוָיִם; in Gr. and Lat. the Heb. word is merely transliterated, leaving the meaning doubtful); (b) he descended into a pit and there killed a lion; (c) he also vanquished and put to death an Egyptian hero of extraordinary size and great strength (II K., xxiii, 20, 21 = I Par., xi, 22, 23). He commanded the "Cerethi and Phelethi", or "the king's guards"—D. V. footnote (II K., viii, 18; I Par., xviii, 17), or "Cerethites" and "Phelethites" (II K., xx, 23). The D. V. describes him as "the first among the thirty, but yet to the first three he attained not: and David made him of his council" (I Par., xi, 25). In II K., xxiii, 23, the Heb. text gives the same history, but the Gr. and the Lat. versions cause confusion by notable variations. The A. V. reads: "Behold, he was honourable among the thirty, but attained not to the first three: and David set him over his guard" (I Chron., xi, 25). This is from the Heb., but "guard" may be questioned (Gesenius renders the word by "a hearing, audience"). "The first among the thirty" (D. V.) is far from being exact (Jos., Ant., vii, 12).

Banaiah supported Solomon's title to the throne against the ambitious intrigues of Adonias (III K., i, 32-38, 44), whom, by Solomon's command, he afterwards put to death (III K., ii, 25). He also executed Joab and succeeded him as generalissimo (III K., ii, 34, 35); likewise Semei for having disobeyed Solomon (III K., ii, 46). For some Rabbinic literature, see *Jew. Encyc.* s. v.

JOHN J. TIERNEY.

**Bancel**, LOUIS, b. at Valence, 1628; d. at Avignon, 1685. When very young he entered the Dominican Order at Avignon. Even before his ordination to the priesthood he was appointed lector of philosophy. He afterwards taught theology at Avignon. He was remarkable for his subtle intellect and prodigious memory. He was the first to receive the appointment to the chair of theology in the University of Avignon (1654). This chair he held till his death. He was elected several times Dean of the Theological Faculty and always presided at the public defence of the theses of the candidates for academical degrees. He was also Synodal Examiner of the Diocese of Avignon, and Prefect of the Avignon legation. He wrote: "Moralis D. Thomæ, Doctoris Angelici ex omnibus ipsis operibus deprompta" (Avignon, 1677; Venice, 1723, 1757, 1758, 1780); and "Brevis universæ theologiæ cursus" (Avignon, 1684-92). As the author died while the third volume was in press, the editing of the work was finished by Joseph Patin, O. P. From the last tome was expunged a thesis maintaining

as probable the salvation of unbaptized infants by the faith of their parents. The unpublished manuscripts of "Opus integrum de Castitate" and "Opus de veritate solius religionis Christianæ" were left with the Dominicans at Avignon.

M. A. WALDRON.

**Bandello**, MATTEO, b. at Castelnovo di Scrivia in Piedmont, Italy, in 1480; d. Bishop of Agen, France, in 1565. He entered the Order of St. Dominic; but his life and writings bear slight trace of a religious character (3 Vols. Lyons, 1554 *passim*; Vol. IV appeared in 1573). He is best known by his *Novelle*, 214 in number. These tales show very considerable literary skill. But they are of no credit to the churchman. In many cases they are perverse descriptions of horrors and wickedness. Many of them were translated into English by Painter, and furnished themes to the dramatists of the Elizabethan period. It is by this means, most likely, that Shakespeare learned the story of Romeo and Juliet. The story of "Parisina" told by Bandello was later taken up by Byron. The best edition of the *Novelle* is that of Silvestri, Milan, 1813-14, in nine volumes. Some of them are contained in the second volume of the "Tesoro dei Novellieri Italiani", Paris, 1847. Some were translated by Roscoe, in "Italian Novelists", III, (London, 1825).

W. S. REILLY.

**Bandinelli**. See ALEXANDER III.

**Banduri**, ANSELMO, archaeologist and numismatologist, b. 1671 at Ragusa, off the coast of Dalmatia; d. at Paris, 4 January, 1743. He joined the Benedictines at an early age, studied at Naples, and was eventually sent to Florence, then a flourishing centre of higher studies. Here he made the acquaintance of the famous Benedictine scholar Montfaucon, then travelling in Italy, in search of manuscripts for his edition of the works of St. John Chrysostom. Banduri rendered him valuable services and in return was recommended to Duke Cosmo III as a proper titular for the chair of ecclesiastical history in the University of Pavia. It was also suggested that the young Benedictine be sent to Paris for a period of preparation, and especially to acquire a sound critical sense. After a short sojourn at Rome, Banduri arrived at Paris in 1702 and entered the Abbey of Saint Germain des Prés, as a pensioner of the Grand Duke of Tuscany. He soon became an apt disciple of the French Maurists and began an edition of the anti-iconoclastic writings of Nicephorus of Constantinople, of the writings of Theodore of Mopsuestia, and of other Greek ecclesiastical authors. Banduri never published these works, though as late as 1722 he announced, as near at hand, their appearance in four folio volumes. In the meantime, he was attracted by the rich treasures of Byzantine manuscript and other material in the Bibliothèque Royale and the Bibliothèque Colbert. In 1711 he published at Paris his "Imperium Orientale, sive Antiquitates Constantinopolitane", etc., a documentary illustrated work on the Byzantine Empire, based on medieval Greek manuscripts, some of which were then first made known. He also defended himself successfully against Casimir Oudin, an ex-Premonstratensian, whose attacks were made on a second-hand knowledge of Banduri's work. In 1718 he published, also at Paris, two folio volumes on the imperial coinage from Trajan to the last of the Palæologi (98-1453), "Numismata Imperatorum Romanorum a Trajano Decio usque ad Palæologos Augustos" (supplement by Tanini, Rome, 1791). Of this work Father Eckhel, S.J., prince of numis-

matologists, says (*Doctrina Nummorum I, cviii*) that it contains few important contributions. At the same time he praises the remarkable bibliography of the subject that Banduri prefixed to this work under the title of "*Bibliotheca nummaria sive auctorum qui de re nummaria scripserunt*", reprinted by Fabricius (Hamburg, 1719). In 1715 Banduri was made an honorary foreign member of the Academy of Inscriptions, and in 1724 was appointed librarian to the Duke of Orleans; he had in vain solicited a similar office at Florence on the death of the famous Magliabecchi.

MAURICE M. HASSETT.

Bañez (originally and more properly VAÑEZ and sometimes, but erroneously, IBAÑEZ), DOMINGO, a Spanish Dominican theologian, b. 29 February, 1528, at Medina del Campo, Old Castile; d. there 22 October, 1604. The qualifying *Mondragonensis*, attached to his name, seems to be a patronymic after his father, John Bañez of Mondragon, Guipuzcoa. At fifteen he began to study philosophy at the University of Salamanca. Three years later he took the Dominican habit at St. Stephen's Convent, and made his profession 3 May, 1547. During a year's review of the liberal arts and later, he had the afterwards distinguished Bartolomé Medina as a fellow student. Under such professors as Melchior Cano (1548-51), Diego de Chaves (1551), and Pedro Sotomayor (1550-51) he studied theology, laying the foundations of the erudition and acquiring the acumen which later made him eminent as a theologian and an exponent and defender of Thomistic doctrine. He next began teaching, and under Domingo Soto, as prior and regent, he held various professorships for ten years. He was made master of students, explaining the "Summa" to the younger brethren for five years, and incidentally taking the place, with marked success, of professors who were sick, or who for other reasons were absent from their chairs at the university. In the customary, sometimes competitive, examinations before advancement, he is said easily to have carried off all honours. He taught at the Dominican University of Avila from 1561 to 1566. About 1567 he was assigned to a chair of theology at Alcalá, the ancient Complutum. It appears that he was at Salamanca again in 1572 and 1573, but during the four scholastic years 1573-77 he was regent of St. Gregory's Dominican College at Valladolid, a house of higher studies where the best students of the Castilian province were prepared for a scholastic career. Elected Prior of Toro, he went instead to Salamanca to compete for the chair of Durandus, left vacant by Medina's promotion to the chief professorship. He occupied this position from 1577 to 1580. After Medina's death (30 December, 1580) he appeared again as competitor for the first chair of the university. The outcome was an academic triumph for Bañez, and he was duly installed in his new position amid the acclamations of professors and students. There he laboured for nearly twenty years. His name acquired extraordinary authority, and the leading schools of orthodox Spain referred to him as the *præclarissimum jubar*—"the brightest light"—of their country.

In another way, Bañez in his prime was rendering memorable service to the Church as director and confessor of St. Teresa (1515-82). Her own words mark him as the spiritual adviser who was most relied upon as a guide and helper, both in her interior life and in her heroic work of the Carmelite reform. "To the Father Master Fra Dominic Bañez, who is now in Valladolid as Rector of the College of St. Gregory, I confessed for six years, and, whenever I had occasion to do so, communicated with him by letter. . . . All that is written and told, she communicated to him,

who is the person with whom she has had, and still has, the most frequent communications." (See "Life of St. Teresa of Jesus, by herself" tr. by David Lewis, 3d ed., London, 1904, Relation VII, 448, 450.) Of the first foundation of the reform, St. Joseph's Monastery at Avila, she wrote that Bañez alone saved it from the destruction resolved upon in an assembly of civil and religious authorities (op. cit., ch. xxxvi, 336 sqq.). He did not then know the saint, but "from that time forth he was one of her most faithful friends, strict and even severe, as became a wise director who had a great saint for his penitent." He testifies, in the process of her beatification, that he was firm and sharp with her, while she herself was the more desirous of his counsel the more he humbled her, and the less he seemed to esteem her (op. cit., p. xxxvi). He looked for the proof of her love of God in her truthfulness, obedience, mortification, patience, and charity towards her persecutors, while he avowed that no one was more incredulous than himself as to her visions and revelations. In this his mastery of the spiritual life was shown to be as scientific as it was wholesome and practical. "It was easy enough to praise the writings of St. Teresa and to admit her sanctity after her death. Fra Bañez had no external help in the applause of the many, and he had to judge her book as a theologian and the saint as one of his ordinary penitents. When he wrote, he wrote like a man whose whole life was spent, as he himself tells us, in lecturing and disputing" (ibid.).

As the schoolman, the lecturer, and academic disputant, Bañez stands forth as a figure of unprecedented distinction in scholastic Spain. In his time discussion was rife, and disquieting tendencies counter to the beaten paths of Augustine and Thomas manifested themselves. The great controversy, with whose beginnings his name is prominently associated, goes back to a public disputation held early in 1582. Francisco Zumel, of the Order of Mercy, was moderator. Prudentius Montemayor, a Jesuit, argued that Christ did not die freely, and consequently suffered death without merit, if the Father had given him a command to die. Bañez asked what the consequences would have been if the Father had given command not only as to the substance of the act of death, but also as to its circumstances. Prudentius responded that in that case there remained neither liberty nor merit. Louis de Leon, an Augustinian, sided with Prudentius and presently the discussion was taken up by the masters in attendance and carried to the kindred subjects of predestination and justification. Other formal disputations ensued, and strong feeling was manifested. Juan de Santa Cruz, a Hieronymite, felt constrained to refer the matter to the Inquisition (5 February), and to his deposition he appended sixteen propositions covering the doctrines in controversy. Leon declared that he had only defended the theses for the sake of argument. His chief thought was to prevent them from being qualified as heretical. Notwithstanding these and further admissions, he was forbidden to teach, publicly or privately, the sixteen propositions as reviewed and proscribed.

In 1588, Luis Molina, a Jesuit, brought out, at Lisbon, his celebrated "*Concordia liberi arbitrii cum gratiæ donis*", bearing the *censura*, or sanction, of a Dominican, Bartolomeu Ferreiro, and dedicated to the Inquisitor General of Portugal, Cardinal Albert of Austria; but a sentiment against its appearance in Spain was aroused on the ground of its favouring some of the interdicted propositions. The cardinal, advised of this, stopped its sale, and requested Bañez and probably some others to examine it. Three months later, Bañez gave his opinion that six of the forbidden propositions appeared in the "*Concordia*". Molina was asked to defend himself, and his answers

to the objections and to some other observations were added as an appendix, with which, sanctioned anew (25 and 30 August, 1589), the work was permitted to circulate. It was regarded as an epoch-making study, and many Fathers of the Society of Jesus rallied to its defence. From Valladolid, where the Jesuit and Dominican schools in 1594 held alternate public disputations for and against its teaching on grace, the contention spread over all Spain. The intervention of the Inquisition was again sought, and by the authority of this high tribunal the litigants were required to present their respective positions and claims, and a number of universities, prelates, and theologians were consulted as to the merits of the strife. The matter was referred however, by the papal nuncio to Rome, 15 August, 1594, and all dispute was to cease until a decision was rendered. In the meantime, to offset his Dominican and other critics, Molina brought counter accusations against Bañez and Zumel. The latter submitted his defence in three parts, all fully endorsed by Bañez, 7 July, 1595. The Dominican position was set forth about the same time by Bañez and seven of his brethren, each of whom presented a separate answer to the charges. But the presiding officer of the Inquisition desired these eight books to be reduced to one, and Bañez, together with Pedro Herrera and Didacus Alvarez, was instructed to do the work. About four months later, Alvarez presented their joint product under the title: "Apologia fratrum prædicatorum in provinciâ Hispaniæ sacræ theologiæ professorum, adversus novas quasdam assertiones cuiusdam doctoris Ludovici Molinæ nuncupati", published at Madrid, 20 November, 1595. It is noteworthy that this work was signed and ratified by twenty-two masters and professors of theology. To it was added a tract on the intrinsic efficacy of Divine grace. Nearly two years later, 28 October, 1597, Bañez resumed the case in a new summary and petitioned the pope to permit the Dominican schools to take up their teaching again on the disputed questions. This was the "Libellus supplex Clementi VIII oblati pro impetrandâ immunitate a lege silentii utrique litigantium parti impositâ", published at Salamanca. An answer to the "Libellus" was conveyed in a letter of Cardinal Madrucci, 25 February, 1598, written in the name of the pope, to the nuncio in Spain: "Inform the Fathers of the Order of Preachers that His Holiness, moderating the prohibition that was made, grants them the faculty freely to teach and discuss, as they did in the past, the subject-matter of *auxiliis divinæ gratiæ et eorum efficacii*, conformably to the doctrine of St. Thomas; and likewise the Fathers of the Society, that they also may teach and discuss the same subject-matter, always holding, however, to sound Catholic doctrine". (Serry, Hist. Cong. de Aux., I, XXVI.) This pronouncement practically ended whatever personal participation Bañez had in the famous controversy.

It has been contended that Bañez was at least virtually the founder of present-day Thomism, especially in so far as it includes the theories of physical preemption, the intrinsic efficacy of grace; and predestination irrespective of foreseen merit. To any reader of Bañez it is evident that he would have met such a declaration with a strenuous denial. Fidelity to St. Thomas was his strongest characteristic. "By not so much as a finger-nail's breadth, even in lesser things", he was wont to say, "have I ever departed from the teaching of St. Thomas". He singles out for special animadversion the views in which his professors and associates dissent even lightly from the opinions of the Angelic Doctor. "In and throughout all things, I determined to follow St. Thomas, as he followed the Fathers", was another of his favourite assurances. His zeal for the integrity of Thomistic teaching could brook no doctrinal novelty, particu-

larly if it claimed the sanction of St. Thomas's name. In the voluminous literature on the De Auxiliis and related controversies, the cardinal tenets of Thomism are ascribed by its opponents to a varied origin. The Rev. G. Schneeman, S. J., (*Controversiarum de divinis gratiæ liberique arbitrii Concordiâ initia et progressus*, Freiburg im Br., 1881), the Rev. Father De Regnon, S. J. (Bañez et Molina, Paris, 1883) and the Rev. Father Baudier, S. J. (in the *Revue des Sciences Ecclésiastiques*, Amiens, 1887, p. 153) are probably the foremost modern writers who designate the Thomists as Bannesians. But against them appears a formidable list of Jesuits of repute who were either Thomists themselves or authorities for other opinions. Suarez, for instance (*Op. omni.*, XI, ed. Vives, Paris, 1886; *Opusc.*, I, Lib. III, De Auxiliis, vii), credits Medina with the first intimations of physical preemption and elsewhere (*Op. omni.*, XI, 50; *Opusc.*, I, Lib. I, De Conc. Dei, xi, n° 6) admits that St. Thomas himself once taught it. Toletus (*Comment.* in 8 Lib. Aristotelis, Venice, 1573, Lib. II, c. iii, q. 8) and Pererius (*Pref. to Disquisit. Magicarum*, Lib. VI, I Ed.) considered as Thomistic the Catechism of the Council of Trent, which was the work (1566) of three Dominican theologians. [For Delrio see Goudin, *Philosophia* (Civita Vecchia, 1860), IV, pt. IV, 392, Disp. 2, q. 3, § 2.] The Rev. Victor Frins, S. J., gives it as his opinion (S. Thomæ Aq., O. P. doctrina de Cooperatione Dei cum omni naturâ creatâ præsertim liberâ; *Responsio* ad R. P. Dummermuth, O. P., Paris, 1893) that whilst Medina and Pedro Soto (1551) taught physical predetermination, the originator of the theory was Francis Victoria, O. P. (d. 1546). The Dominicans Ferrariensis (1576), Cajetan (1507), and Giovanni Capreolus (d. 1436) are also accredited Thomists in the estimation of such authorities as the Jesuits Becanus [*Summa Theol. Schol.* (Mainz, 1612), De Deo, xviii, no 14] and Azorius [*Institut. Moral.* (Rome, 1600-11), Lib. I, xxi, § 7], and the theologians of Coimbra (*Comment.* in 8 libros Phys., Lib. II, q. 13, a. 1). Molina, strangely enough, cites the doctrine of a "certain disciple of St. Thomas"—supposedly Bañez—as differing only in words from the teaching of Scotus, instead of agreeing with that of Aquinas [*Concordia* (Paris, 1876), q. 14, a. 13, Disp. 50]. These striking divergences of opinion of which only a few have been cited would seem to indicate that the attempt to father the Thomistic system on Bañez has failed. [Cf. *Defensio Doctrinæ S. Thomæ*, A. M. Dummermuth, O. P., Louvain and Paris, 1895, also Card. Zigliara, *Summa Phil.* (Paris, 1898), II, 525.]

The development of Thomistic terminology in the Dominican school was mainly due to the exigencies not only of the stand taken against Molina and the forbidden propositions already mentioned, but of the more important defence against the attacks and aberrations of the Reformers. The "predetermination" and "predefinition" of Bañez and his contemporaries, who included others besides Dominicans, emphasized, on the part of God's knowledge and providence, a priority to, and independence of, future free acts, which, in the Catharino-Molinistic theories, seemed to them less clearly to fall under God's causal action. These terms, however, are used by St. Thomas himself. (*Comment. de divinis nominibus*, Lect. iii.) The words "physical preemption" were meant to exclude, first a merely moral impulse and, secondly, a concurrence of the Divine causality and free will, without the latter's subordination to the First Cause. That such terms, far from doing violence to the teachings of their great leader, are their true expression, has, of course, been an unvaried tenet of the Thomistic school. One of the presiding officers of the Congregation De Auxiliis, Cardinal Madrucci, speaking of Bañez in this connexion, said: "His teaching seems to be deduced from the princi-

ples of St. Thomas and to flow wholly from St. Thomas's doctrine, although he differs somewhat in his mode of speaking" (Serry, *Hist. Cong. de Aux.*, appendix, col. 89). It seems but fair to the memory of Bañez that this opinion should ultimately prevail.

As a writer, Bañez is clear, direct and vigorous. Occasionally prolix, he is never dull or inane. He treats a subject lengthily only when it is highly important or manifestly useful. His thought is generally lucidity itself in his pithiest scholastic condensations, nor is it less perspicuous when he adopts a freer and more elegant style in behalf of a wider range of readers. Of copious erudition, he was also keen in logic and profoundly versed in metaphysics, surpassing, in this respect, the ablest of his contemporaries. He evidenced a broad-minded and progressive spirit in placing, at no little expense, a fully equipped printing establishment in the convent of St. Stephen, and in employing for its successful operation the best craftsmen that were then to be had. The list of his works is completed as follows:

- (1) "Scholastica commentaria in I<sup>am</sup> partem angelici doctoris D. Thomæ usque ad 64 qu.", fol. Salamanca, 1584; Venice, 1585, 1602; Douai, 1614; (2) "Scholastica commentaria super cæteras I<sup>as</sup> partis questiones", fol. Salamanca, 1588; (3) "Scholastica commentaria in II<sup>am</sup> II<sup>as</sup>, quibus quæ ad fidem, spem et charitatem spectant, clarissime explicantur usque ad quest. XLVI", fol. Salamanca, 1584; Venice, 1586; (4) "Scholastica commentaria in II<sup>am</sup> II<sup>as</sup> a quest. LVII ad LXXVII de jure et justitia decisiones", fol. Salamanca, 1594; 1604, Venice, 1595; Cologne and Douai, 1615; (5) "Relectio de merito et augmento charitatis anno MDLXXXIX Salamanticæ in vigilia pentecostes solemniter pronunciata", Salamanca, 1590, 1627; (6) "Commentaria in questiones Aristotelis de generatione et corruptione", fol. Salamanca, 1585; Venice, 1596; Cologne, 1614; (7) "Institutiones minoris dialecticæ et In Aristotelis dialecticam", Cologne, 1618; (8) "Responsio ad quinque questiones de efficaciâ divinæ gratiæ", Angelica Library, Rome, MS. **Bangalore.** See **MYSORE.**

**Bangor, ANTIPHONARY OF,** an ancient Latin manuscript, supposed to have been originally written at Bangor (Ireland).

The codex, found by Muratori in the Ambrosian Library at Milan, and named by him the "Antiphonary of Bangor" ("Antiphonarum Benchorense"), was brought to Milan from Bobbio with many other books by Cardinal Federigo Borromeo when he founded the Ambrosian Library in 1609. Bobbio, which is situated in a gorge of the Apennines thirty-seven miles north-east of Genoa, was founded by St. Columbanus, a disciple of St. Comgal, founder of the great monastery at Bangor on the south side of Belfast Lough in the county of Down. St. Columbanus died at Bobbio and was buried there in 615. This establishes at once a connexion between Bobbio and Bangor, and an examination of the contents of the codex placed it beyond all doubt that it was originally compiled in Bangor and brought

thence to Bobbio, not, however, in the time of St. Columbanus. There is in the codex a hymn entitled "*ymnum sancti Congilli abbatis nostri*", and he is referred to in it as "*nostris patroni Congilli sancti*". Again there is a list of fifteen abbots, beginning with Comgal and ending with Cronanus who died in 691; the date of the compilation, therefore, may be referred to 680-691. Muratori, however, is careful to state in his preface that the codex, though very old, and in part mutilated, may have been a copy made at Bobbio, by some of the local monks there, from the original service book. It is written, as regards the orthography, the form of the letters, and the dotted ornamentation of the capital letters, in "the Scottic style", but this, of course, may have been done by Gaelic monks at Bobbio. The actual bearer of the codex from Bangor is generally supposed and stated to have been St. Dungal, who left Ireland early in the ninth century, acquired great celebrity on the Continent, and probably retired to Bobbio towards the close of his life. He bequeathed his books to "the blessed Columbanus", i. e., to his monastery at Bobbio. The antiphonary, however, cannot be identified with any of the books named in the catalogue of the books bequeathed by Dungal, as given by Muratori (*Antiquitatis Italicæ Mediæ ævi*, Milan, 1740, III, 817-824). Here only a summary can be given of the contents of the codex to which the name of "Antiphonary" will be found to be not very applicable: (1) six canticles; (2) twelve metrical hymns; (3) sixty-nine collects for use at the canonical hours; (4) special collects; (5) seventy anthems, or versicles; (6) the Creed; (7) the Pater Noster. The most famous item in the contents is the venerable Eucharistic hymn "*Sancti venite Christi corpus sumite*", which is not found in any other ancient text. It was sung at the Communion of the clergy and is headed, "*Ymnum quando comonicarent sacerdotes*". A text of the hymn from the old MS. of Bobbio, with a literal translation, is given in "*Essays on the Discipline and Constitution of the Early Irish Church*", (p. 166) by Cardinal Moran, who refers to it as that "golden fragment of our ancient Irish Liturgy". The Creed in this codex differs in its wording from all other forms known to exist. It is in substance the original Creed of Nicæa. It does not contain the *ex Patre Filioque procedit*, but merely states the *homousia* of the three Persons of the Holy Trinity.

WARREN, *The Antiphonary of Bangor: an Early Irish MS.* (a complete facsimile in colotype, with a transcription, London, 1893); IDEM, *Liturgy and Ritual of the Celtic Church* (Oxford, 1881), pp. 187-194; MURATORI, *Anecdota Ambrosiana, in Opera Omnia* (Aresso, 1770), II, part iii, 217; P. L., LXXII, 579; REEVES, *Uist. Journ. Archeol.*, I, 168.

ARTHUR UA CLERIGH.

**Bangor** (BANGORIUM, BANGORIENSIS), DIOCESE OF, anciently known as Bangor Vawr, situated in Carnarvonshire on the Menai Straits, must be distinguished from Bangor Iscoed also in Wales, and the celebrated Irish monastery of Bangor in County Down. The foundation of the see is traditionally ascribed to St. Daniel or Deiniol (d. 584?) who is stated to have been consecrated by St. Dubricius, or, according to others, St. David. Some writers place his death in 544, others in 554, while the tenth century "*Annales Cambriæ*" assign it to 584. Yet even this date is regarded by recent research as too early. We may, perhaps, safely ascribe the foundation of the see to the close of the sixth century. The history of the diocese before the Norman Conquest is so obscure that Godwin (*De præsulibus Angliæ*, 1743) does not allow that there were any bishops at all before the coming of the Normans.

In 1092 Hervey, a cleric in the court of William Rufus, was consecrated Bishop of Bangor and in the same year was present in that capacity at the

council held by St. Anselm at Westminster, being the first Welsh bishop to attend an English council. His rule was not successful, for difficulties arose owing to his people resenting the coming of a stranger ignorant of their language, customs, and character. He, on the other hand, adopted violent measures

CATHEDRAL OF BANGOR

in the assertion of his rights, with the result that bloodshed ensued, and he finally had to take refuge in England, where he was translated to the See of Ely in 1108. The cathedral had been destroyed by the Normans in 1071, but was subsequently rebuilt, though no trace of Norman work remains in the present structure. Anian (1267-1305), who, as Bishop of Bangor, baptized Edward II took the chief part in rebuilding the cathedral. He also drew up the "Missale in usum Ecclesiæ Banchorensis" and the "Pontifical" which represent the liturgical books of "the use of Bangor". It again suffered severely in the wars between the English and Welsh during the reign of Henry III, and in 1402 was entirely burnt down by Owen Glendower. There could hardly have been a vigorous diocesan life, for the cathedral and episcopal residence lay in ruins for nearly a century. At length in 1496, a vigorous administrator became bishop in the person of Henry Deane, prior of the Austin canons at Llanthony near Gloucester. He immediately began to rebuild the ruined choir and his work still exists. Besides restoring his cathedral, he was active in regaining the possessions of the see which had been annexed by the more powerful men in the neighbourhood. Unfortunately for Bangor after four years' rule he was in 1500 translated first to Salisbury, and afterwards to Canterbury. He is said to have left his crosier and mitre, both of great value, to his successor, on condition that he should proceed with the rebuilding.

But neither of the next two bishops, Thomas Pigot, Abbot of Chertsey (1500-03), and John Penny (1504-08), did anything for the fabric. On the translation of Bishop Penny to Carlisle, Bangor was entrusted to Thomas Skevington, or Pace (1509-33), who of all its bishops did most for it. He was Abbot of Beaulieu in Hampshire, and though he did not reside in his see, he showed practical interest in his diocese by completing the cathedral. He rebuilt the entire nave and tower, and presented four bells which were afterwards sold by the first "reforming" bishop. He also rebuilt the episcopal residence. He died in 1533, and after the short episcopates of John Capon (1534-39) and John Bird (1539-41), was followed by Arthur Bulkeley, who resided in the diocese indeed, but who is accused of having neglected it in his own interests. According to the Anglican historian, Godwin, he was struck blind while watching the cathedral bells, which he had sold, being shipped off. But this story is questioned by Brown Willis, the

historian of the Welsh cathedrals. Bulkeley died in 1553, and was succeeded by William Glynn (1553-58) the last Catholic bishop.

Since the Reformation the cathedral has continued to serve the Anglican bishops in its old capacity, while also doing duty as the parish church of the town. It is the smallest and humblest of all the cathedrals in England or Wales, being an embattled cruciform structure resembling a good-sized parish church. The diocese consisted of the whole of Anglesea and Carnarvonshire, with the greater part of Merionethshire and some parishes in the counties Denbigh and Montgomery. There were three archdeaconries, Bangor, Anglesea, and Merioneth. The arms of the see were gules, a bend, or gutty de poix between two mullets, argent.

**Bangor Abbey.**—The name of two famous monastic establishments in Ireland and Wales.

(1) The Irish Abbey of Bangor was situated in the County Down, on the southern shore of Belfast Lough. Sometimes the name was written "Beannchor", from the Irish word *beann*, a horn. According to Keating, a king of Leinster once had cattle killed there, the horns being scattered round, hence the name. The place was also called the Vale of Angels, because, says Jocelin, St. Patrick once rested there and saw the valley filled with angels. The founder of the abbey was St. Comgall, born in Antrim in 517, and educated at Clooneenagh and Clonmacnoise. The spirit of monasticism was then strong in Ireland. Many sought solitude the better to serve God, and with this object Comgall retired to a lonely island. The persuasions of his friends drew him from his retreat; later on he founded the monastery of Bangor, in 559. Under his rule, which was rigid, prayer and fasting were incessant. But these austerities attracted rather than repelled; crowds came to share his penances and his vigils; they also came for learning, for Bangor soon became the greatest monastic school in Ulster. Within the extensive rampart which encircled its monastic buildings, the Scriptures were expounded, theology and logic taught, and geometry, and arithmetic, and music; the beauties of the pagan classics were appreciated, and two at least of its students wrote good Latin verse. Such was its rapid rise that its pupils soon went forth to found new monasteries, and when, in 601, St. Comgall died, 3,000 monks looked up for light and guidance to the Abbot of Bangor.

With the Danes came a disastrous change. Easily accessible from the sea, Bangor invited attack, and in 824 these pirates plundered it, killed 900 of its monks, treated with indignity the relics of St. Comgall, and then carried away his shrine. A succession of abbots continued, but they were abbots only in name. The lands passed into the hands of laymen, the buildings crumbled, and when St. Malachy, in the twelfth century, became Abbot of Bangor he had to build everything anew. The impress of his zeal might have had lasting results had he continued in this position. But he was promoted to the See of Down, and Bangor again decayed. By the Statute of Kilkenny the "mere Irish" were excluded from it, though it did not prosper thereby. In 1469, the Franciscans had possession of it, and a century later the Augustinians, after which, at the dissolution of the monasteries in that part of Ireland, it was given by James I to James Hamilton, created Viscount Clancuboye. An irregular sue

cession of Catholic abbots was still kept up, the last being Abbot MacCormack, who lived in France, but, returning to Ireland during the Reign of Terror, found a refuge at Maynooth College and died there in the early years of the nineteenth century.

Among the Abbots of Bangor few acquired fame, but many of the students did. Findehua has his life written in the Book of Lismore; Luanus founded 100 monasteries and St. Carthage founded the great School of Lismore. From Bangor Columbanus and Gall crossed the sea, the former to found Luxeuil and Bobbio, the latter to evangelize Switzerland. In the ninth century a Bangor student, Dungal, defended orthodoxy against the Western iconoclasts. The present town of Bangor is a thriving little place, popular as a seaside resort. Local tradition has it that some ruined walls near the Protestant church mark the site of the ancient abbey; nothing else is left of the place hallowed by the prayers and penances of St. Malachy and St. Comgall.

(2) The Welsh Abbey of Bangor was situated in Flintshire, not far from Chester, and in the Middle Ages was often confounded with Bangor in Carnarvonshire, which was an episcopal see. The date of its foundation and its founder's name are equally uncertain. With great confidence and evident conviction, Montalembert declares that its founder was St. Iltud, or Iltude. But some allowance must be made for French partiality, for Iltud was an Armorican Gaul. His life and acts are narrated in the "Lives of the Cambro-British Saints"; they have been carefully edited by Mr. Rees; and though it is stated that he was an Armorican, and had been a soldier, and married, before he became a monk, it is not said that he was connected with Bangor. It is more probable that the abbey was founded by Dunawd, a Welshman, whence it was often called Bangor Dunawd. And if St. Deiniol was the son of Dunawd, as it is said, this would fix the foundation of the Flintshire abbey at about the beginning of the sixth century, for Bangor in Carnarvonshire was founded by St. Deiniol in 514. It would also dispose of the assertion that Pelagius, the heretic, was at one time its abbot, for he died long before. It is certain that Bangor was the greatest monastic establishment in Wales, having at one time 2,000 monks. The Angles and Saxons had then conquered Britain and had treated the Britons with great severity. A remnant of these latter found refuge in Wales, where they brooded over their wrongs, and, being Christians themselves, refused to preach the Gospel to their conquerors. When St. Augustine came to England, in the last years of the sixth century, he visited the Britons in Wales. Their moral condition was then bad; they clung to the old mode of celebrating Easter, and some errors of doctrine had also crept into their creed. He had a conference with delegates from Bangor, but they refused to co-operate with him in the work of converting the still unconverted English. In punishment, he predicted that, as they refused to preach the way of life to the English, they would at the hands of these same English suffer death. And this came to pass in 603 when Ethelfrid of Northumbria defeated the Britons near Chester. Hearing that the monks of Bangor were praying for his enemies, he turned aside from the battle and put 1,200 of them to death. Extensive ruins of this abbey still remained in the twelfth century, but in Usher's time, in the seventeenth century, these ruins had all but disappeared. On the site of the abbey now stands the small town of Bangor-on-the-Dee.

**Banias.** See CÆSAREA PHILIPPI.

**Banim, JOHN and MICHAEL.**—JOHN, poet, dramatist, novelist, b. 3 April, 1798, at Kilkenny, Ireland; d. 31 August, 1842. His father, following the double occupation of farmer and storekeeper, was in easy circumstances. John's literary efforts began very early; at ten he wrote some verses and a tale of considerable length. After a preparatory training in private schools he entered Kilkenny College in 1810. Having a taste for painting and drawing he went to Dublin in 1813 to study art. In two years he was back in Kilkenny, became a drawing teacher, and fell desperately in love with one of his pupils, a girl two years his junior. The girl's father refused his consent, with the result that in two months she died of a broken heart. Her lover almost followed her example. An entire disregard of self at the time of the funeral caused paralysis and left him a victim of spinal disease, which afflicted him almost incessantly and finally caused his death. At the end of a year he set out for Dublin with a literary career in view. It was not long before he made his reputation. In 1821, when only twenty-three years old, he wrote the tragedy "Damon and Pythias", which was played at Covent Garden with Macready and Charles Kemble in the principal parts. After his marriage, which took place during a visit to his parents, he planned with his brother Michael, "The Tales of the O'Hara Family". These were to be written in collaboration, each brother to submit his work to the other for revision. As a result, it is impossible to distinguish from internal evidence the work of each. Their ambition was to do for Ireland what Scott, by his Waverley Novels, had done for Scotland—to make their countrymen known with their national traits and national customs and to give a true picture of the Irish character with its bright lights and deep shadows. To London, a wider field for literary work, Banim went in 1822 "without friends and with little money to seek his fortune". The next ten years were a fruitful season, during which he contributed frequently to various periodicals, and produced a considerable number of operatic pieces, dramas, essays, and novels, but always at the expense of "wringing, agonizing, burning pain". Writing of this period to his brother, he says: "Of more than twenty known volumes I have written, and treble their quantity in periodicals, no three pages have been penned free from bodily pain". The little crumbs of comfort he received he generously shared with his countryman, Gerald Griffin, who wrote of his early struggles in London: "What would I have done if I had not found Banim?" In 1829 John Banim was ordered to France in the hope that he might repair his shattered health, but the journey was of no avail. In a few years a stroke of paralysis "deprived him of the use of his limbs and brains". In 1835 he returned to Kilkenny by slow stages. Dublin and his native city showed him signal honour by demonstrations that moved him deeply. A public appeal for assistance met with such generous response that his financial troubles were ended. The Government, in recognition of his literary work, granted him a pension of £150, and an additional sum of £40 a year for the education of his daughter. His last work was the revision of a story which he had inspired and encouraged his brother to write, "Father Connell", the picture of his beloved parish priest of Kilkenny. He died in his own Windgap Cottage, just outside

Kilkenny, at the early age of forty-four. His principal works are: the poems, "Soggarth Aroon", "Aileen", "The Celt's Paradise"; the dramas, "Damon and Pythias" and "The Prodigal"; and the novels, "John Doe", "The Fetches", "Peter of the Castle", "The Mayor of Windgap", and "The Boyne Water", the last a political novel.

MICHAEL, novelist, and co-worker with his brother John, b. at Kilkenny, Ireland, 5 August, 1796; d. 30 August, 1874. At sixteen he began the study of law, but soon abandoned it because of business reverses which befell his father. He took upon himself his father's burden and re-established his parents in comfortable circumstances. The little leisure his business cares allowed him he made the most of by gathering material for "The Tales of the O'Hara Family". At the urgent request of John, he contributed several of the stories, his first, "Crohoore of the Billhook", being perhaps the most popular of all. But Michael generously kept himself in the background in order to let his younger brother have all the honour of their joint production. Out of twenty-four volumes he wrote thirteen. Unlike John, however, he was a man of action, and threw himself earnestly into various movements for the uplifting of his countrymen, educationally and economically. After serving for many years as postmaster of Kilkenny, he died at the age of seventy-eight at Bootstown, not far from Dublin. The principal works of Michael Banim are: "Crohoore of the Billhook", "The Ghost Hunter", "Father Connell", and "The Croppy", a tale of 1798.

The Banims may be justly called the first national novelists of Ireland. They knew their countrymen not as the strange, grotesque caricatures too often portrayed in fiction, but as members of the great human family with noble impulses and generous traits. Their work, however, is notably free from patriotic bias. Their Irishmen have their faults. Though naturally sympathetic, tender-hearted, and forgiving, these typical Celts could become stern, bitter, and revengeful. Ignorance, poverty, and cruelty are shown to exist among the peasantry. But the reader cannot fail to see the cause of all this—the natural working out of religious persecution and political oppression. Criticism has been directed against some of their writings as "harrowing", and "impure". The latter criticism is unfortunately justified; John admitted and regretted it, and Michael acted on it by preventing one of the stories, "The Nowlans", from being reprinted. As to the "harrowing" elements, which are certainly conspicuous, the brothers answered: "We paint from a people of a land among whom, for the last six centuries, national provocations have never ceased to keep alive the strongest and often the worst passions of our nature". It may be added that, besides their desire to give a true picture of their country, still crippled and prostrate from the effects of the Penal Laws, they were undoubtedly influenced by the Romantic movement, then at its height. A recent edition of the works of the Banims, in ten volumes, which gives a life of John Banim, appeared in New York, 1896.

**Banjaluca, DIOCESE OF**, in Western Bosnia, includes some of the most beautiful portions of the province. Banjaluka is the ancient Roman *Ad Ladios*. By the Bull "Ex hac augusta", 5 July, 1881, restoring the Catholic hierarchy in Bosnia, Leo XIII created one archiepiscopal and three episcopal sees, Banjaluka being the first in precedence among the latter. It includes 4 deaneries, 32 parishes, and more than 80,000 faithful. Its first bishop, Marian Mar-

ković, O. S. F., was consecrated 4 May, 1884, but only as Apostolic administrator. His first cathedral was a half-ruined shed, but he afterwards acquired a little church near his residence. At present (1907) most of the parishes are held by Franciscans. In the year 1869 was founded at Mariastern an abbey of Trappists which has already sent out two monastic colonies, to Josephsburg and to Marienburg in Bosnia, and another to Zara in Dalmatia. There are hospitals and schools conducted by Sisters of Charity and Sisters of the Precious Blood. In 1900 Banjaluka and Bi-hatch also became a diocese for the so-called Orthodox population, the Metropolitan residing at Banjaluka.

L. PETIT.

**Bankruptcy, CIVIL ASPECT OF.**—Bankruptcy (*La banqueroute*; earlier English terms, *bankruptship*, *bankruptcy*) in civil jurisprudence as well as in popular signification is the fact of becoming, or the state of being, a bankrupt. In the statute of 1705, 4 Anne, c. XVII, as printed in the Cambridge edition of the English Statutes, the word is spelled *bankruptcy*, but the statute of 1711, 10 Anne, c. XV, as printed in the same edition, and in the London edition, adopts the present spelling. Being derived from *bankrupt*, as insolvency is derived from insolvent, the retaining of the letter *t* has been suggested to be an instance of erroneous spelling (Murray, *Dict.*, s. v. "Bankruptcy"). Etymologically, *bankrupt* has been said to be made up of the Latin words *bancus*, "table", and *ruptus*, "broken", denoting "the wreck or breakup of a trader's business" (Murray, *Dict.*, loc. cit.), "whose shop or place of trade is broken up or gone" (Wharton, *Law Lexicon*, s. v. "Bankrupt").

Statutory mention of the word *bankrupt* seems to be earlier than that of the word *bankruptcy*, and is first to be found in the title of the English statute of 1542, "against such persons as do make bankrupt", a translation, perhaps, of the French "*qui font banque route*". (Blackstone, *Commentaries*, Bk. II, c. xxxi, p. 472, Note e). This statute recites that some "persons craftily obtaining into their hands great substance of other men's goods" either flee to parts unknown or keep their houses, not paying "their debts and duties", but consuming "the substance obtained by credit of other men for their own pleasure and delicate living". For distribution rateably of such persons' assets among their creditors this statute provides a summary method which, to quote Blackstone, is "extra judicial", "allowed merely for the benefit of commerce" (II *Commentaries*, 477). We learn, however, from the recitals of a statute of 1570 that, notwithstanding the law of 1542 "made against bankrupts", "those kind of persons have and do still increase". And therefore a new definition is made of a debtor who "shall be reputed, deemed and taken for a bankrupt", and subjected to an "extra-judicial" method. Such a debtor, it is enacted, must be a native-born subject or denizen who, being a "merchant or other person using or exercising the trade of merchandise", "or seeking his or her trade or living by buying and selling", shall have been guilty of certain specified fraud and concealment. The assets of such a debtor may, pursuant to this statute, be divided rateably among those of the creditors who are native-born subjects. Thus the limitation of meaning suggested by the explanation cited of its Latin etymology was placed upon the word *bankrupt*, and thereafter a trader only could be adjudged a bankrupt in England. Debtors who were not traders, and whose means were inadequate to payment of their debts in ordinary course of business, were known as insolvents. But statutory defi-

nitions of persons to be deemed occupied in trade became very comprehensive. Yet with special regard, apparently, for "noblemen, gentlemen and persons of quality" investing in the "East India Company or Guiney Company" and certain other enterprises, the imputation of being merchants or traders within any "statutes for bankrupts" is, by a statute of 1662, expressly spared to persons putting in money in these stocks. The circumstance of occupation is, under the present English Bankruptcy Act, immaterial. Aliens and denizens had been brought within the law by a statute of the year 1623.

By the law of Scotland bankruptcy is not limited to any particular occupation. But according to Scotch law insolvency, that is, inability to pay debts or fulfil obligations, does not become bankruptcy until, in manner determined by statute, this inability is publicly acknowledged, and is thus, as expressed in the statute, "notour". The purpose of the English Statutes of 1542 and 1570 did not extend beyond distribution of the bankrupt's property among his creditors. Right of recourse against the debtor by ordinary process of law for any remaining indebtedness these statutes expressly preserved. But by the statute of 1705 a bankrupt, duly surrendering all his effects and conforming to the law, might obtain his discharge from liability for debts theretofore contracted. And more modern statutes permit a debtor himself to institute proceedings in bankruptcy. The Scotch law now permits a "notour bankrupt" to apply for what is termed a decree of *cessio bonorum*, by which he may be discharged from his debts.

The Constitution of the United States (Art. I, § 8) confers upon Congress power to "establish uniform laws on the subject of bankruptcies throughout the United States". Under this provision Congress may disregard any distinction between bankruptcy and insolvency laws, of which laws Chief Justice Marshall remarks (Wheaton's Reports, IV, 194) that the line of partition between them is not so distinctly marked as to enable any person to say with positive precision what belongs exclusively to the one and not to the other class of laws. Originally, however, insolvency laws and bankruptcy laws were prompted by opposite motives and were clearly distinguishable. The motive of insolvency laws was the relief of insolvent debtors, by affording them a remedy against imprisonment and, in ancient Rome, other penalties. On the contrary, the motive of bankruptcy laws was, as already seen, the relief of creditors by affording a remedy against dishonest debtors who might possibly not be insolvent, but whose conduct while indebted was deemed to be such as to entitle their creditors to the summary relief which the law "made against bankrupts" afforded. English as well as Roman insolvency laws contemplated the cases of debtors whom ordinary process of law could reach, but the operation of the English statute of 1542 is limited to debtors who "make bankrupt" and against whom such process was ineffectual, and the statute of 1570 is further limited to traders. The court afterwards established, in the reign of George III, for cases of insolvency was "the Court for relief of insolvent debtors"; but bankrupt laws, remarks Sir Edward Coke, are to be construed "for the aid, help, and relief of the creditors". And under certain circumstances a solvent debtor may by the United States law be pronounced a bankrupt.

Congress has passed four bankruptcy laws; the Act passed 4 April, 1800, which was repealed by Act of 19 December, 1803; the Act passed 19 August, 1841, repealed by Act of 3 March, 1843; the Act passed 2 March, 1867, and repealed 7 June, 1878, and the Act of 1 July, 1898, yet (1907) in force.

At the time of the adoption of the United States Constitution a suggestion was rejected that the power of Congress concerning bankruptcy should be confined to merchants and traders. Yet by the Act of 1800 only a merchant or other person resident in the United States and "actually using the trade of merchandise by buying and selling in gross, or by retail, or dealing in exchange or as a banker, broker, factor, underwriter, or marine insurer" could be adjudged a bankrupt. Voluntary bankruptcy is not mentioned in the Act of 1800, but by the Act of 1841 "all persons" residing in any State, District, or Territory of the United States owing debts not incurred through defalcation as a public officer or in a fiduciary capacity might apply to become voluntary bankrupts. Involuntary bankruptcy was still restricted to merchants and certain other classes of business men. The Act of 1867 provided for both voluntary and involuntary bankruptcy without regard to the debtor's occupation. By the Act of 1898, the several District Courts of the United States, the Supreme Court of the District of Columbia, the District Courts of the several Territories, and the United States Courts in the Indian Territory and the District of Alaska are made courts of bankruptcy. A person is within this Act insolvent whose property (exclusive of property wrongfully conveyed, transferred, concealed, or removed) is at a fair valuation insufficient to pay his debts. Any natural person or unincorporated company or business corporation as defined in the Act, and owing at least one thousand dollars (except certain natural persons specified), may be adjudged an involuntary bankrupt. Proceedings in involuntary bankruptcy are to be instituted by petition filed within four months after an act of bankruptcy. Such an act consists in conveying, transferring, concealing, or removing, or permitting to be concealed or removed, any of the debtor's property with intent to hinder, delay, or defraud his creditors or any of them; or in transferring while insolvent any property with intent to prefer a creditor or creditors; or in suffering or permitting, while insolvent, any creditor to obtain a preference through legal proceedings or in not having such preference vacated or discharged. So a general assignment for benefit of creditors and certain proceedings under Insolvent Laws, or application by an insolvent for a receiver or trustee are acts of bankruptcy. On the other hand, "any qualified person", namely, any person who owes debts provable in bankruptcy (except a corporation) "may file a petition to be adjudged a voluntary bankrupt". The assets of the bankrupt are to be divided among his creditors, and the court of bankruptcy is empowered to grant him a discharge, that is, a "release . . . from all of his debts which are provable in bankruptcy, except such as are excepted by this Act".

The power conferred on Congress by the Constitution does not wholly preclude the several States of the Union from passing bankruptcy laws. A State may enact such laws conclusive as to the rights of its own citizens, provided such laws do not impair the obligation of contracts within the meaning of the Constitution, nor conflict with any existing Act of Congress establishing a uniform system of bankruptcy.

So far we have considered our subject from a legal point of view. From the point of view of the political economist, bankruptcy and insolvency laws are of great importance. For cost of production of goods includes risk of bad debts, and therefore laws lessening this risk decrease the cost of production. John Stuart Mill concludes that most individual insolvencies are the result of misconduct. But the occurrence of many business failures in a community at any period is a warning or symptom of "the politico-economical disease," which econ-

omists denominate a commercial crisis, and for this deeper causes are sought than mere individual misconduct. By fortuitous causes which could not have been foreseen the most skilful calculations may fail; demand for particular kinds of goods may lag behind a supply which has become excessive because of mistakes of the "captains of industry" as to extent of future demand. And there results a disarrangement of the relation between production and consumption, a disturbance of equilibrium, so that commercial settlements become impossible and a crisis ensues. Notable crises of modern times were: the crisis of Hamburg in 1799, when 82 failures occurred; the English crisis of 1814, when 240 banks suspended; in the United States, the "wild-cat" crisis of 1837, when all the banks closed, the crisis of 1857, when there occurred 7,200 failures, and the crisis of 1873. To economists, conditions of this kind, resulting from the causes just mentioned, have seemed to denote the necessity for the establishment of a new equilibrium. And it has been suggested that the Jewish jubilee was a means to that end, and an ordinance somewhat in the character of an insolvency or bankruptcy law.

A political community may fail, as may an individual, in meeting financial engagements. There may thus occur what has been termed state, or public, bankruptcy. Of this an ancient instance was the action of the Roman Senate in reducing the weight of the As after the first Punic War. And similar instances of governmental dishonesty occurred during the Middle Ages. In later times State bankruptcy has often taken the form of enforced conversion, involving partial repudiation, of the State debt. At the close of the reign of Louis XIV of France, the State was bankrupt, and to the celebrated John Law was vainly entrusted its financial rescue. The government set up by the French Revolution became not only bankrupt itself, but by its contest with Austria drove the latter empire into the bankruptcy of 1811. And the bankruptcy of Austria has even been said to have become permanent. Turkey, Spain, and some Spanish-American republics may be mentioned as States becoming bankrupt through repudiation. The same remark may be made concerning some of the States of the United States.

CHARLES W. SLOANE.

**Bankruptcy, MORAL ASPECT OF.**—Bankruptcy must be considered not only from the legal but also from the moral point of view; for sound mo-

rality prescribes that debts must be paid. But a man who becomes bankrupt proclaims his inability to pay his debts in full as they become due. Such an acknowledgment does not now entail the penalty of slavery or of imprisonment as of old; the law takes possession of his property and divides it among his creditors. If it suffices after all to pay his creditors in full, there is an end of the matter, justice and conscience are satisfied. If, however, as is usually the case, the creditors only receive a portion of what is due to them, they have suffered loss through the action of the bankrupt, and if he is the voluntary cause of that loss, he is morally to blame as the cause of injustice to his neighbour. There is no moral blame attributable to a man who through misfortune and by no fault of his own has become bankrupt and unable to pay his debts. But if bankruptcy has been brought about by the debtor's own fault, he must be condemned in the court of morals, even if he escape without punishment in a court of law. Bankruptcy may be the result of one's own fault in a great variety of ways. Living beyond one's means, negligence or imprudence in the conduct of business, spending in betting and gambling money which is due to creditors are frequent causes of debtors appearing in the bankruptcy court. All such causes are accompanied with more or less of moral guilt, in proportion to the bankrupt's advertence to their probable consequences, and the voluntariness of his action.

Breaches of the moral law are also committed in a great variety of ways in connexion with the bankruptcy itself. The benefit of the law is extended to the bankrupt debtor if he faithfully complies with all its just requirements. To do this then is a matter of conscience. He is bound to make a full disclosure of all his property, and to surrender it all for the benefit of his creditors. He may indeed retain what the law allows him to retain, but nothing else, unless the law makes no provision at all for him, and the result of surrendering everything would be to reduce himself and those dependent on him to destitution. Such a result, however, must not be readily presumed in the case of modern bankruptcy law which is humane in its treatment of the unfortunate debtor and makes what provision is necessary for him. It is obvious that it is against the rights of creditors and against justice for an insolvent debtor to transfer some of his property to his wife or to a friend, who will keep it for him till the storm blows over, so that the creditors cannot get at it. In the same way a debtor is guilty of dishonesty and fraud if he hide or remove some of his property, or if he allow a fictitious debt to be proved against the estate.

Loss is caused the creditors and injustice is committed by an insolvent debtor who continues to trade after the time when he fully recognizes that he is insolvent, and that there is no reasonable hope of recovering himself. He may continue to pay what debts he can as they become due if payment is demanded by his creditors, and he may make current payments for value received. But if in contemplation of bankruptcy he pays some creditor in full with a view to giving that creditor a preference over the others, he becomes guilty of a fraudulent preference. Bankruptcy law indeed prescribes that certain privileged debts should be paid in full, but it lays down that the rest must be paid rateably among the creditors without favour to any. If a bankrupt through favour pays a creditor in full, while the others have in consequence to be satisfied with less than their just share, he is guilty of fraud. This is not only the case if such payment is made after the petition in bankruptcy

has been presented, but also if it is done within a certain period, fixed by law, before the presentation of the petition. In Great Britain this period is three months, in the United States it is four months previous to the adjudication. Laws forbidding such preferential payments are just, and they should be observed. If they have been violated, and the fact becomes known, the payments may be recovered by the trustee in bankruptcy or the official receiver. However, although fraudulent preferences are contrary to positive law, it is not clear that they are against natural justice so as to impose on the guilty parties an obligation in conscience apart from any order of the court to make restitution. The question is disputed among theologians, and some maintain that no obligation to make restitution can be imposed, apart from a positive order of the court, inasmuch as after all the preferred creditor has only got what belonged to him.

If the conduct of the bankrupt with reference to his bankruptcy has been such as the law requires, the court grants him a discharge; otherwise he will be subject to certain disabilities as an undischarged bankrupt. Some special debts and obligations are not affected by the discharge, and even with regard to those which it does affect, the question arises whether an absolute discharge extinguishes the debt, or merely releases the bankrupt from legal liability. The effect of such a judicial act depends on the law of the country. If that law expressly provides that a bankrupt who has obtained his discharge is not thereby freed from his former obligations, but merely protected against legal proceedings for debt, there is an end of the question. On the other hand, it cannot be denied that the law of a country may release an honest and unfortunate debtor from his load of indebtedness, and make him free to start business afresh. In commercial societies especially such an enactment might conduce to the public good, since it is not granted to fraudulent debtors but only to such as are honest and fulfil the rigorous requirements of the law. It is merely a question of fact as to what is the effect of the law of any particular country. Lawyers and theologians are agreed that in most countries the effect of a discharge is merely to bar legal proceedings for debt against the bankrupt. His moral obligation to pay all his debts in full when he is able still remains; he may put off payment till such time as he can conveniently fulfil his obligations, and in the meanwhile he is guaranteed freedom from molestation. This seems to be the effect of the National Bankruptcy Law of the United States. "Since the discharge is personal to the bankrupt, he may waive it, and since it does not destroy the debt but merely releases him from liability, that is, removes the legal obligation to pay the debt, leaving the moral obligation unaffected, such moral obligation is a sufficient consideration to support a new promise" (Brandenburg, *The Law of Bankruptcy*, 391).

On the contrary, an absolute discharge, when granted to the honest bankrupt according to English law, frees the bankrupt from his debts, with certain exceptions, and makes him a clear man again. This is admitted by English lawyers and by theologians who treat of the effect of the English law of bankruptcy. When, therefore, an honest bankrupt has obtained his absolute discharge in an English court, he is under no strict obligation, legal or moral, to pay his past debts in full, though if he choose to do so, his scrupulous rectitude will be much appreciated. What has been said about bankruptcy applies also to compositions or schemes of arrangement with one's creditors when they have received the sanction of the court.

LUGO, *De Justitia et Jure* (Paris, 1869), disp. xi; LEBMUEHL, *Theologia Moralis* (Freiburg, 1898), I, nn. 1026, 1035; CROLY, *De Justitia et Jure* (Dublin, 1870-77), III, n. 1232; *Am. Ecol. Review* (Philadelphia) xxxi, 348.

T. SLATER.

**Banns of Marriage** (Lat. *bannum*, pl. *bann-a*, -i from an Old English verb, *bannan*, to summon), in general the ecclesiastical announcement of the names of persons contemplating marriage. Its object is to discover any impediments to a proposed marriage; incidentally, it makes known to all duly interested in the latter the fact of its near celebration. The subject will be treated under the following heads: I. History; II. Tridentine Legislation; III. Mode of Publication; IV. Denunciation of Impediments; V. Sanctions; VI. Dispensation from Banns; VII. Non-Catholic Usage; VIII. Civil Law.

I. HISTORY.—From the beginning of Christian society the marriage of its members was looked on as a public religious act, subject to ecclesiastical control (Tertull., "De monog.", c. xi; "De pudicitia", c. iv). The obligation of making known to the bishop all proposed marriages dates as far back as the beginning of the second century (Ignat. ad Polyc., c. v), and ceased only when, in the fifth and succeeding centuries, owing to the development of the parochial system, it became the duty of the parish priest to prevent invalid or illicit marriages, in which duty he could and did avail himself of the aid of reputable parishioners (*Capitula Caroli imp., ad an. 802*, ed. Boretius in *Mon. Germ. Hist.: Leges*, I, 98). The publication in the church of the names of persons intending marriage seems to have originated in France about the end of the twelfth century; it was already a custom of the Gallican Church in 1215, when Innocent III mentions it in a letter to the Bishop of Beauvais (c. 27, x, iv, 1). In the same year the Fourth Lateran Council made it a general ecclesiastical law (c. 3, x, De clandest. desponsat., iv, 3). The Council of Trent confirmed this law, and specified to a certain extent the manner of its execution. It must be noted that by the council's own special act its marriage decree "Tametsi", with its provision for the banns (see CLANDESTINITY), is binding only in those parishes in which it has been severally promulgated; hence, when such formal promulgation is lacking the obligation of proclaiming the banns rests not on the Tridentine law, but on the earlier Lateran canon, also on local or particular ecclesiastical legislation and custom. (See MARRIAGE.) In England the First Council of Westminster provided (xxii, 2) that the law of publishing in the church the banns of marriage must be observed, but made no provision for the manner and time of introducing the practice (Taunton). In the United States the Sixth Provincial Council of Baltimore recommended the bishops of the province to introduce the law of the banns as laid down by the Councils of Lateran and Trent (*justa mentem concilii Lateranensis et Tridentini*). The First Plenary Council of Baltimore (1852) decreed (no. 88) that after Easter of 1853 the banns should everywhere be published, and dispensation given only for very grave reasons. The Second Plenary Council (1866) confirmed the above (nos. 331-333) and declared the law a very useful one and already received by custom (*saluberima disciplina jam usu recepta*). According to Zitelli (*Apparatus juris eccl.*, 403), at least one publication should be made in those regions and parishes in which the marriage decree of the Council of Trent has not been published; Von Scherer remarks (p. 146, n. 14) that the pre-Tridentine or Lateran law demanded no more than one publication. It is of some interest to note that by a decree of the Sacred Congregation of the Inquisition (14 June, 1703) the French missionaries in Canada were obliged to publish the banns for their savage converts.

II. TRIDENTINE LEGISLATION.—In order to check the increase of clandestine marriages, the Council of Trent decreed (Sess. XXIV, De ref. matr., c. i) that before the celebration of any marriage the names of the contracting parties should be announced publicly three times in the church during the solemnization of Mass, by their own parish priest on three consecutive Holy Days (Waterworth, The Canons and Decrees of the Sacred and Ecumenical Council of Trent, London, 1848, 196 sqq.). Such publication, of course, can be made only at the request of the parties themselves, and after the parish priest is aware of their mutual free consent. Moreover, the parish priest cannot refuse to publish the banns except for reasons stated in the canon law. If the contracting parties refuse to consent to the publication of the banns, the parish priest cannot assist at their marriage, and where the Tridentine legislation does not obtain he is bound to warn them not to attempt marriage elsewhere. In course of time this Tridentine decree has given occasion to more specific interpretation, regularly and primarily applicable where the decree has been promulgated. Among the more important authentic decisions are the following: The proper (own) parish priest of persons intending marriage is he in whose parish both (or one of) the contracting parties have a true domicile or quasi-domicile, i. e. a fixed residence or one that can be legally construed as such. When both parties permanently reside in the same parish no difficulty can arise as to the parish priest whose right and duty it is to publish the banns. But it may happen that one party resides in another parish, or that both parties have each more than one domicile or quasi-domicile, in which case the publication of the banns should occur, regularly speaking, in every parish where at the time of the marriage the parties retain such domicile or quasi-domicile. (See DOMICILE, PARISH PRIEST, MARRIAGE.) It may be noted here that while in general a quasi-domicile is acquired by actual residence in a place with the intention of remaining there the greater part of the year, in England and in the United States the law presumes a quasi-domicile from one month's residence of either party in the place of the marriage. (S. Congr. Inq. to the bishops of England and the United States, 7 June, 1867; see also its decree of 6 May, 1886). A decree of the same congregation (9 November, 1898) provides that anywhere a mere residence of six months shall constitute a quasi-domicile. In the case of unsettled persons possessed of no domicile (*vagi*) the banns are published (with episcopal permission) where the marriage takes place, and in the place or places of their birth. The banns of minors must also be published in the place of residence of their parents or guardians. The law of quasi-domicile is also frequently applicable to servants, apprentices, soldiers, and students in institutions of learning. In the case of mixed marriages, publication of the banns is forbidden (Greg. XVI to the bishops of Bavaria, 12 September, 1834), but is tolerated in the United States by a decree of the Congregation of Propaganda (3 July, 1847), provided there be no mention of the religious persuasion (*confessio acatholica*) of the non-Catholic party (see also S. Congr. Inq., 4 July, 1874, in *Collectanea S. Congr. de Prop. Fide*, Rome, 1893, no. 1223). In Germany and Austria this is also customary in some places (Heiner). The three consecutive Holy Days (*dies festivi*) may be Sundays or other feasts of obligation. Custom has in many places exempted Christmas, Easter, and Pentecost. It is also customary in some places to proclaim the banns on suppressed feast days, also at Vespers, provided there be on such occasions a considerable attendance of people in the church (S. Congr. Inq., 25 October, 1586; 29 April, 1823). The banns are published

regularly at the parish or principal Mass, though the publication may occur at any other Mass on the prescribed days, nor is it required that such publication be repeated at more than one Mass on the aforesaid days. By a rescript of the Congregation of Propaganda the Vicars Apostolic of India were permitted to publish the banns on weekdays. In some places it is provided that the banns shall not be published on two immediately consecutive feast days; similarly that the marriage shall not take place on the day of the last publication (particularly if it be the only one). It may be noted that the general ecclesiastical law does not forbid the marriage on the day of the third publication. The period for which the publication of the banns is valid depends on local ecclesiastical authority and custom. The Roman Ritual (Tit. vii, c. i, n. 11) fixes a limit of two months, but leaves the bishop free to act as prudence dictates. The Second Provincial Council of Quebec (1863) established a period of two months. In practice the period varies from six weeks to six months. It may be added that the marriages of members of royal houses (*matrimonia principum*) are by custom exempted from publication of the banns.

III. MODE OF PUBLICATION.—The parish priest or his representative (vicar, curate) announces in an audible voice, usually before or after the sermon, for each of the contracting parties the baptismal and family name, names of parents, place of birth or residence, age, condition (single or previously married, and according to the Roman Ritual, loc. cit., n. 13, the name of the woman's former husband): It should also be stated whether the actual proclamation is the first, second, or third, and whether there will be a dispensation from further publications. The priest adds that a serious obligation rests on every one to reveal to him any known impediment to the proposed marriage. The parish priest is expected to keep a record or register of all publications of banns made by him, also the certificates of publications made at his request in other parishes, the fact and consequences of which he is entitled to know.

IV. DENUNCIATION OF IMPEDIMENTS.—Whoever is morally certain either by his own knowledge or through reliable persons, of an impediment (e. g. consanguinity, affinity, previous marriage) to an intended marriage, is in conscience bound to reveal it to the parish priest of the contracting parties; it then becomes the duty of such parish priest to investigate the statement made to him (usually under oath) and decide as to the character of the evidence; if a grave suspicion be aroused in him, he must refer the case to the bishop, who decides as to whether a dispensation can or cannot be granted. Confessors, lawyers, physicians, midwives, are not bound to reveal impediments known to them through the discharge of their official or professional duties, nor does an obligation rest on those who fear that to make known an impediment would cause grave detriment to themselves or their families, or who are aware that no good can result from their action, or know that the contracting parties have already made known the impediment. Once aware of the impediment, the parish priest must defer the marriage, refer the matter to the bishop, and, where the Tridentine marriage decree is not valid he ought to warn the parties not to attempt marriage elsewhere. For further details as to the obligation of revealing known impediments, see the moral theologians generally, especially the third book of Sanchez, "De Matrimonio," and the sixth volume of Ballerini-Palmieri, "Theologia Moralis" (Prato, 1894), also the "Bibliotheca Prompta" of Ferraris, s. v.

V. SANCTIONS.—Omission of the banns, even partial, makes a marriage illicit, but not invalid. The bishop may inflict on the contracting parties such ecclesiastical penance as he sees fit to impose,

and he may also punish similarly the witnesses to the marriage. Should later on an impediment be discovered that renders the marriage null and void, they cannot hope, by the strict letter of the law, to obtain a dispensation, nor can they hope to have their marriage considered a putative or apparent one, entailing the legitimation of their children. The bishop is empowered by the law to inflict on the offending parish priest, besides other punishment, three years' suspension from his office; it is worth noting that a similar sanction was enjoined by the fifteenth century canon law of England (Lindwood's Provinciale, Oxford ed., 1679, p. 271).

VI. DISPENSATION FROM BANNS.—The Council of Trent allows the bishop to dispense with the publication of the banns, provided there be a sufficient reason; one such is indicated by the Council itself, i. e. fear of a malicious thwarting of the intended marriage. The vicar-general, vicar capitular, and administrator of a diocese may also dispense from the banns. In case the contracting parties belong to different dioceses, the permission of one bishop (usually the one in whose diocese the marriage takes place) is held sufficient by many canonists. In some countries, as in Bavaria, a mutual understanding to this effect exists. The bishop may also allow the deans or the parish priests to dispense from one or two publications. In many dioceses the parish priest is specially authorized to dispense from the banns for death-bed marriages; elsewhere this authority is delegated to the deans or the more centrally located parish priests. The parish priest may himself decide that the obligation of asking a dispensation no longer exists for him, i. e. in cases of urgent necessity when, on the one hand, he cannot reach the bishop and, on the other, the reasons are such that the latter would be bound to grant the dispensation. In all cases where the three publications are omitted, the contracting parties are regularly required to take the oath before the bishop (*juramentum de statu libero*) that they are not previously betrothed or married, and that they know of no impediment to their marriage (Clement X, Cum Alias, 21 August, 1670; Ballerini-Palmieri, VI, 716-718).

By a decision of the Congregation of the Inquisition (8 August, 1900) the bishop may delegate to the parish priest the performance of this duty. The banns are omitted in the case of revalidation of marriage (Sägmüller, 489) and secret marriages i. e. regularly performed in the church, but behind closed doors, and the record of which, together with the pertinent baptisms, is kept in a special book in the diocesan chancery (Ballerini-Palmieri, op. cit., VI, 778). Dispensation from all the banns is regularly granted only for a very urgent reason; less weighty reasons suffice for a dispensation from two publications or from one. Among the reasons recognized by the law, other than that mentioned by the Council of Trent, are: notable difference of age, or condition of life; peril of the good name of either party; the approach of Advent or Lent, when marriage cannot be solemnized; notable temporal or spiritual detriment; imminent departure of the bridegroom; etc. The diocesan chancery usually charges a fee to cover the clerical expenses, it being forbidden to make any charge for the dispensation itself (S. Cong. of Propaganda to the bishops of Ireland, 12 February, 1821; cf. its decree of 1750; also the Encyclical of 1768 to the same bishops, and Collectanea S. Cong. Prop. Fid., Rome, 1893, 1221). At times the parish priest collects a fee for the publication of banns (Von Scherer, 147); it is reckoned as one of his *jura stolæ*, or casual sources of revenue.

VII. NON-CATHOLIC USAGE.—The Orthodox Greek Church does not require publication of the banns; on the other hand, for every marriage the Greek priest requires regularly a special permission of the

bishop; at Constantinople and in other archiepiscopal churches this permission is granted through the Chartophylax. As the presence of the priest is essential to the validity of a Greek marriage, clandestine unions are practically impossible. (For the Uniat Greeks in Italy the Tridentine decree is obligatory, having been published in Greek in all their parishes by order of Clement VIII and again by order of Benedict XIV; see Vering, 873). The German Lutheran churches provide for publication of the banns in a manner quite similar to the Catholic discipline (*ibid.*, 874). In the Church of England the publication of the banns is a normal preliminary of marriage, both by ecclesiastical law and, as explained below, by civil statute. The Book of Common Prayer directs that the banns of all who are to be married shall be published on three several Sundays or Holy Days during the time of the morning service or of evening service (if there be no morning service) immediately after the second lesson. The form of publication is analogous to Catholic usage, and if the parties reside in different parishes, the banns must be published in both.

VIII. THE CIVIL LAW OF BANNS.—In several European countries the civil law insists by its own authority on the publication of banns; in Austria, for instance, all marriages performed without at least one publication of the banns, and in the parishes of both contracting parties, are declared invalid by the Civil Code (Vering, 862, note 23; Von Scherer, 161). In England, until 1753, there was no statutory publication of the banns; in that year was passed a marriage act, known as Lord Hardwicke's Act (26 Geo. II, c. xxxiii), which provided, among other essentials, that in the future the true names of all persons intending marriage should be published in the church, otherwise the marriage would be null and void. It was, however, expressly provided that the act should not apply across the seas; hence it never became a part of the English Common Law as received in the United States. The actual civil legislation in England dates mostly from the reign of George IV and William IV, and relieves Catholics and Dissenters from the obligation of having their banns published in the churches of the Establishment, as was the case after the passing of Lord Hardwicke's Act, though in other respects, and with considerable modifications, that act still governs the marriage contract in England; in substance it is the Tridentine decree. According to actual English statute legislation, a marriage in the Church of England is invalid without a previous due publication of the banns or a license from the proper ecclesiastical authority granted only within the church of the parish in which one of the parties shall have resided for fifteen days before the marriage. The true names of the parties must be published in an audible voice on three successive Sundays at the morning service after the second lesson, in the church of the parish in which the parties dwell, or with the bishop's consent, in a public chapel. The officiating clergyman is entitled to demand seven days' notice of the intended publication, with the names of the parties, place of abode, and the time they have lived there. The dissent of parents or guardians renders null and void the publication of the banns of minors. The banns or license are valid for a period of three months only. It is to be noted that the omission of the banns invalidates the marriage only when the omission is known and wilful. Non-Anglicans (Jews and Quakers excepted, as otherwise provided for) are freed from the obligations of banns or ecclesiastical license, but they must give notice to the registrar of the district within which the parties have lived for seven days previous. This notice is inscribed in a marriage notice book open to public inspection at all seasonable times, and thereafter suspended for

twenty-one days in some conspicuous place in the registrar's office, and accompanied by a declaration as to absence of impediments, necessary consent of parents or guardians, etc. ("Encyclopedia of the Laws of England", London, 1897, II, 1-3; "American and English Encyclopedia of Law", 2d ed., 1901, XIX, 1190-93; Phillimore, "Ecclesiastical Law of the Church of England", 2d ed., London, 1895, II, 580 sqq.). For the publication of banns in the (Protestant) churches of Ireland and Scotland see W. P. Eversley, "The Law of the Domestic Relations" (2d ed., London, 1890). In most of the United States a license to marry must be obtained by the contracting parties; in Delaware and Ohio publication of the banns is equivalent to a license (H. J. Desmond, *The Church and the Law*, Chicago, 1898, 66). In all the provinces of the Dominion of Canada publication of the banns is required in default of a license to marry. In the Province of Quebec, in default of a license issued to non-Catholics, the publication of the banns is required on three Sundays or Holy Days with reasonable intervals, at morning service, or if none, at an evening service. If the parties belong to different churches, these publications must take place in each church. They must contain the names, surnames, qualities or occupation and domicile of the parties to be married, and whether they are of age or minors, also the names, surnames, occupations, and domicile of their fathers and mothers, and the name of the former husband or wife. A certificate of due publication of the banns is also required before the marriage, and mention is made of it in the Act of Marriage; this certificate must be signed by the person who published the banns, and must contain all the above details stated in the banns themselves. Such certificate is not required if the banns were published by the same person who performed the marriage. Unless the parties have an actual domicile of six months in the place of publication, the latter must occur in the place of last domicile in Lower Canada, or if out of Canada the officer must ascertain that no legal impediment exists. If the parties are under the authority of others the publication must take place in the domicile of such authority (R. S. Weir, *The Civil Code of Lower Canada*, Montreal, 1898, Nos. 57, 58, 130-134). In France the civil code prescribes the publication on two distinct Sundays of the names, occupations, domiciles, and names of parents of persons intending to marry. The marriage cannot take place until three days after the second publication; if a year is allowed to elapse there must be a fresh publication of the banns. Marriages contracted abroad between French subjects or between a French subject and a foreigner, but according to foreign law, are recognized in France. The publication of the banns, however, cannot be omitted under pain of invalidating the marriage.

For the history of banns see ESMEIN, *Le mariage en droit canonique* (Paris, 1891), I, 78; SCHULTE, *Handbuch des kath. Eherechts* (1855), 40; BINDER, *Vom kirchl. Aufgebot der Ehe* (1857); SCHINDLER, *Die Notwendigkeit und die Umstände des Eheaufgebots* (Worms, 1884); *Archiv f. kath. Kirchenrecht*, I, 129, 275; II, 546; IV, 391. All manuals of canon law and moral theology deal at more or less length with this subject, e. g. LAURENTIUS, *Instit. Jur. Eccl.* (Freiburg, 1903), Nos. 567-589; HEINER, *Grundriss des kath. Eherechts* (4th ed., 1900); SÄGMÜLLER, *Lehrb. des kan. Rechts* (Freiburg, 1900 sq.), 485-490; VERING, *Lehrbuch des kath. . . Kirchenrechts* (Freiburg, 1893), 859-863; VON SCHERER, *Handbuch des Kirchenrechts* (Graz, 1898), II, 143-161. Cf. also FERRARIS, *Prompta bibliotheca can.*, s. v.; FELJE, *De impedimentis et dispensat. matr.* (Louvain, 1874), 151-177; TAUNTON, *The Law of the Church* (London and St. Louis, 1906), s. v.; BALLERINI-PALMIERI, *Theologia Moralis* (Prato, 1894), VI, 427-447; GASPARRI, *Tractatus canon. de matrimonio* (2d ed., Rome, 1892).

**Banquet, EUCHARISTIC.** See EUCHARIST, SYMBOLISM OF.

**Bapt, JOHN,** Jesuit missionary and educator,

b. at La Roche, Fribourg, Switzerland, 17 December, 1815; d. at Mount Hope, Maryland, U. S. A., 2 November, 1887. At twelve he began his studies at the college of Fribourg, and on 30 September, 1835, entered the novitiate of the Society of Jesus. He was ordained priest, 31 December, 1846, after the usual course of studies and teaching. He arrived in New York in 1848 and, though ignorant of both English and Indian, was sent to minister to the Indians at Old Town, Maine. The inhabitants received him with every demonstration of joy, but he found them in a very degraded moral condition. They had been without a priest for twenty years, and he laboured zealously for their reformation. He founded several temperance societies in Maine. In 1850 he left Old Town for Eastport. His work immediately began to attract attention, both for its results among Catholics and the number of converts who were brought into the Church. As his missions covered a large extent of territory, he became generally known through the State. When the Know-Nothing excitement broke out he was at Ellsworth. Besides being disliked as a Catholic priest, he was particularly obnoxious because of his efforts to establish a Catholic school there. On 3 June his house was attacked, and on 5 June, 1854, in pursuance of an order of the Town Council, which was directed to be published in the papers, he was dragged out of the residence of one of his people, was tarred and feathered, and ridden on a rail to the woods outside the town, and ordered to leave the neighbourhood. Some accounts have it that there was an attempt to burn him to death, which, for some reason or other, was prevented. He recovered from his injuries and continued his work. The outrage at Ellsworth met with general condemnation. Father Baptist built the first church at Bangor, which was dedicated in 1856. He remained there for three years and was then sent to Boston as rector of the college which was at that time the house of higher studies for the Jesuit scholastics. He was afterwards superior of all the houses of Canada and New York, and subsequently superior of a Residence in Providence, R. I. In 1879 his mind began to fail, a result, it was thought, of the Ellsworth occurrence. His remains were interred at Woodstock, Maryland.

T. J. CAMPBELL.

**Baptism**, one of the Seven Sacraments of the Christian Church, frequently called the "first sacrament", the "door of the sacraments", and the "door of the Church".

**I. AUTHORITATIVE STATEMENT OF DOCTRINE.**—At the outset we think it advisable to give two documents which express clearly the mind of the Church on the subject of baptism. They are valuable, also, as containing a summary of the main points to be considered in the treatment of this important matter. Baptism is defined positively in the one and negatively in the other. (a) The positive document is what is commonly designated as "The Decree for the Armenians" in the Bull "Exultate Deo" of Pope Eugene IV. It is often referred to as a decree of the Council of Florence. While it is not necessary to hold this decree to be a dogmatic definition of the matter and form and minister of the sacraments, it is undoubtedly a practical instruction, emanating from the Holy See, and as such, has full authenticity in a canonical sense, that is, it is authoritative. The decree speaks thus of Baptism: "Holy Baptism holds the first place among the sacraments, because it is the door of the spiritual life; for by it we are made members of Christ and incorporated with the Church. And since through the first man death entered into
